Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic.

These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people is our top priority.
- On March 31, the president extended the nation's Slow the Spread campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut

(50) and Louisiana (150).

- Thirty states and 12 tribes have issued stay at home orders.

DHS_Announcement:_CISA_Releases_Guidance_on_Essential_Critical_Infrastructure_Workers_During_COVID-19

March 19, 2020 at 4:08 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from Christopher Krebs, Director of the Cybersecurity and Infrastructure Security Agency (CISA), regarding the Identification of Essential Critical Infrastructure Workers During COVID-19, found [here](#).

March 19, 2020

CISA Releases Guidance on Essential Critical Infrastructure Workers During COVID-19

As the Nation comes together to slow the spread of COVID-19, on March 16, the President issued updated Coronavirus Guidance for America. This guidance states that:

“If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule.”

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security’s responsibilities as assigned under the Homeland Security Act of 2002 to provide strategic guidance, promote a national unity of effort, and coordinate the overall federal effort to ensure the security and resilience of the Nation's critical infrastructure. CISA uses trusted partnerships with both the public and private sectors to deliver infrastructure resilience assistance and guidance to a broad range of partners.

In accordance with this mandate, and in collaboration with other federal agencies and the private sector, CISA developed an initial list of “Essential Critical Infrastructure Workers” to help State and local officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list can also inform critical infrastructure community decision-making to determine the sectors, sub-sectors, segments, or critical functions that should continue normal operations, appropriately modified to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

The list identifies workers who conduct a range of operations and services that are essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing management functions, among others. The industries they support represent, but are not

necessarily limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

We recognize that State, local, tribal, and territorial governments are ultimately in charge of implementing and executing response activities in communities under their jurisdiction, while the Federal Government is in a supporting role. As State and local communities consider COVID-19-related restrictions, CISA is offering this list to assist prioritizing activities related to continuity of operations and incident response, including the appropriate movement of critical infrastructure workers within and between jurisdictions.

Accordingly, this list is advisory in nature. It is not, nor should it be considered to be, a federal directive or standard in and of itself.

In addition, these identified sectors and workers are not intended to be the authoritative or exhaustive list of critical infrastructure sectors and functions that should continue during the COVID-19 response. Instead, State and local officials should use their own judgment in using their authorities and issuing implementation directives and guidance. Similarly, critical infrastructure industry partners will use their own judgment, informed by this list, to ensure continued operations of critical infrastructure services and functions. All decisions should appropriately balance public safety while ensuring the continued delivery of critical infrastructure services and functions.

CISA will continue to work with you and our partners in the critical infrastructure community to update this list as the Nation's response to COVID-19 evolves. We also encourage you to submit how you might use this list so that we can develop a repository of use cases for broad sharing across the country.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

For further information on the federal government's response to COVID-19,
please visit [Coronavirus.gov](https://www.coronavirus.gov).

FEMA_Stakeholder_Advisory:_State-Managed,_Federally-Supported_COVID-19_Response_Continues

March 24, 2020 at 12:13 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 24, 2020

FEMA Advisory

State-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

CISA_releases_Version_2.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance_originally_published_on_March_19,_2020

March 28, 2020 at 6:01 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding an update to the Essential Critical Infrastructure Worker Guidance, found [here](#).

March 28, 2020

CISA Advisory

CISA releases Version 2.0 of the Essential Critical Infrastructure Worker Guidance originally published on March 19, 2020

As the Nation comes together to slow the spread of COVID-19, on March 16th the President issued updated Coronavirus Guidance for America that highlighted the importance of the critical infrastructure workforce.

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's authorities to secure critical infrastructure. Consistent with these authorities, CISA has developed, in collaboration with other federal agencies, State and local governments, and the private sector, an "Essential Critical Infrastructure Workforce" advisory list. This list is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. Decisions informed by this list should also take into consideration additional public health considerations based on the specific COVID-19-related concerns of particular jurisdictions.

This list is advisory in nature. It is not, nor should it be considered, a federal directive or standard. Additionally, this advisory list is not intended to be the exclusive list of critical infrastructure sectors, workers, and functions that should continue during the COVID-19 response across all jurisdictions.

Individual jurisdictions should add or subtract essential workforce categories based on their own requirements and discretion.

The advisory list identifies workers who conduct a range of operations and services that are typically essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing operational functions, among others. It also includes workers who support crucial supply chains and enable functions for critical infrastructure. The industries they support represent, but are not limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

State, local, tribal, and territorial governments are responsible for implementing and executing response activities, including decisions about access and reentry, in their communities, while the Federal Government is in a supporting role. Officials should use their own judgment in issuing implementation directives and guidance. Similarly, while adhering to relevant public health guidance, critical infrastructure owners and operators are expected to use their own judgement on issues of the prioritization of business processes and workforce allocation to best ensure continuity of the essential goods and services they support. All decisions should appropriately balance public safety, the health and safety of the workforce, and the continued delivery of essential critical infrastructure services and functions. While this advisory list is meant to help public officials and employers identify essential work functions, it allows for the reality that some workers engaged in activity determined to be essential may be unable to perform those functions because of health-related concerns.

CISA will continue to work with our partners in the critical infrastructure community to update this advisory list if necessary as the Nation's response to COVID-19 evolves. You can find the attached guidance as well as other COVID related information at cisa.gov.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

FEMA Advisory: COVID-19 Daily Briefing Points (April 20, 2020)

April 20, 2020 at 4:33 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 20, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 19**, FEMA, HHS, and the private sector combined have coordinated the delivery of, or are currently shipping: 57.4 million N95 respirators, 77.9 million surgical masks, 6.2 million face shields, 11.9 million surgical gowns, 587 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors

summarizing all the medical equipment and supplies that have been distributed to each state from FEMA from April 1st – 14th through Project Airbridge and the commercial supply network.

- The U.S. has now tested 4.18 million people, which is more total tests than the following nations combined: France, the United Kingdom, South Korea, Japan, Singapore, India, Austria, Australia, Sweden, and Canada.
 - As conveyed by Dr. Anthony Fauci and Admiral Brett Giroir, there is enough testing capacity for states to move into phase one of reopening when they choose to do so.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - President Trump and Vice President Pence are working closely with Governors to review what more they can do to develop locally tailored testing strategies.
- HHS and FEMA continue to provide federal support to state run testing.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
- FEMA and HHS have centralized best practices and lessons learned to help medical practitioners, emergency managers, and other stakeholders learn from each other's approaches.
 - The [FEMA Coronavirus Emergency Management Best Practices](#) page contains resources for all levels of government, private sector, academic institutions, professional associations, and other organizations responding to the pandemic.
 - HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

Office of Intergovernmental Affairs (IGA)

Treasury Launches Web Portal and Begins Disbursement of CARES Act Funding to State, Local, and Tribal Governments

April 13, 2020 at 6:01 PM EDT

To: stacey.tichenor@gov.wa.gov

State, Local, and Tribal Leaders –

Today, April 13, the U.S. Department of the Treasury released eligibility guidance for CARES Act funding to State, Local, and Tribal Governments. Below, please find additional information. Note that additional guidance on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Sincerely,

The White House Office of Intergovernmental Affairs

U.S. Department of the Treasury: The CARES Act Provides Assistance for State and Local Governments

April 13, 2020

Through the Coronavirus Relief Fund, the CARES Act provides for payments to State, Local, and Tribal governments navigating the impact of the COVID-19 outbreak.

The CARES Act established the \$150 billion Coronavirus Relief Fund.

Treasury will make payments from the Fund to States and eligible units of local government; the District of Columbia and U.S. Territories (the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands); and Tribal governments (collectively “governments”).

The CARES Act requires that the payments from the Coronavirus Relief Fund only be used to cover expenses that—

- (1) are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID-19);
- (2) were not accounted for in the budget most recently approved as of March 27, 2020 (the date of enactment of the CARES Act) for the State or government; and
- (3) were incurred during the period that begins on March 1, 2020, and ends on December 30, 2020.

Additional information on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Amounts paid to States, the District of Columbia, U.S. Territories, and eligible units of local government are based on population as provided in the CARES Act. The CARES Act directs

Treasury to use U.S. Census Bureau data for the most recent year for which data is available. The amount of payments made to each State will be reduced by the aggregate amount of payments that will be disbursed to eligible local governments within such State that have provided the required certifications to Treasury. Additional information on these points can be accessed below.

A unit of local government eligible for receipt of direct payment includes a county, municipality, town, township, village, parish, borough, or other unit of general government below the State level with a population that exceeds 500,000. Eligible local governments must submit the certification required by the CARES Act to Treasury by the deadline set forth below in order to receive payment.

Payments to Tribal Governments are to be determined by the Secretary of the Treasury in consultation with the Secretary of the Interior and Indian Tribes. Although that consultation has not yet concluded, certain data is requested of Tribal governments at this time to assist in this determination. Additional information on payments to Tribal governments will be posted as it becomes available.

Governments eligible for payments must provide payment information and required supporting documentation through the electronic form accessible below. To ensure payments are made within the 30 day period specified by the CARES Act, governments must submit completed payment materials not later than 11:59 p.m. EDT on April 17, 2020. Eligible local and Tribal governments that do not provide required information—and in the case of a local government, the required certification—by 11:59 p.m. EDT on April 17, 2020, may not receive any payment from the Fund.

- Data sources and the distribution methodology for units of local government (more [here](#)).
- Listing of eligible units of local government (more [here](#)).
- Eligible Units: Submission Required for Receipt of Coronavirus Relief Fund Payments (more [here](#)).

Advisory

Federal Government Continues to Support Response to COVID-19

"The whole of government and the whole community is involved in the fight against COVID-19. We will prevail, but it will take government, the private sector and individual Americans working together." – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people are our top priority. FEMA is leading federal operations on behalf of the White House Coronavirus Task Force, which oversees the whole-of-government response to the pandemic. As part of the White House Coronavirus Task Force, HHS continues providing their subject matter expertise as the nation's pre-eminent public health responders.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. The nationwide emergency declaration increases federal support to the White House Task Force as it leads the ongoing federal response to the COVID-19 pandemic. Pursuant to this declaration, FEMA, in coordination with HHS, is assisting state, local, tribal, territorial governments, and other eligible entities, with the health and safety actions they take on behalf of the American public. All 50 states, the District of Columbia, five territories and one tribe are working directly with FEMA under the nationwide emergency declaration for COVID-19. On March 20, 2020, President Trump declared a major disaster declaration for the State of New York making federal funding available for crisis counseling services in addition to emergency protective measures.

To help the American public distinguish between rumors and facts regarding the response to

COVID-19, FEMA has created a Rumor Control page on FEMA.gov. The public can help control the spread of rumors by sharing our page: [fema.gov/coronavirus](https://www.fema.gov/coronavirus).

FEMA and our interagency partners are working to meet demands for personal protective equipment (PPE) through new acquisition, DOD allocation or Strategic National Stockpile sources.

Every American has a role to play. Consider donating cash, giving blood or volunteering your time to help fight COVID-19.

Please see attached for updated information on FEMA's response efforts, including eligibility under the National Emergency Declaration, How To Help, Community Based Testing Sites (CBTS) and the Defense Production Act.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

###

FEMA's mission is to help people before, during and after disasters.

FURNARE, LUCA J

Follow up on medical supply donations

April 03, 2020 at 7:25 PM EDT

To: reed.schuler@gov.wa.gov

Cc: Zhu, Tong

Good afternoon,

We received some guidance this afternoon that will streamline the paperwork for donations, particularly from national-government to national-government (FEMA) or from an international group to an IRS certified non-profit. I am just letting you know as the non-profit route may be a good avenue for the Cuban donations should they occur. We hope to have a trade notice out next week, but I am available at any time to discuss further (cell number below).

Thank you,

Luca Furnare

Assistant Port Director - Trade

Port of Seattle/Tacoma, WA

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

WEEKLY UPDATE: DHS RESPONSE TO COVID-19

WASHINGTON - The Department of Homeland Security's efforts across its components last week have facilitated a speedy, whole-of-government response to confronting COVID-19 and slowing the spread to keep Americans safe. FEMA is leading the way by carrying out an approach that is locally executed, state managed, and federally supported.

"Protecting both the health and national security of the American people continues to be the top priority for the Department of Homeland Security," said Acting Secretary Chad F. Wolf. "I want to thank the men and women of the DHS workforce for their resilience as they put themselves at risk every day to protect the American people."

Below is a list of some of DHS's efforts against COVID-19 last week:

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

Total Obligations to States. As of April 5th, FEMA has obligated nearly \$4.1 billion in support of COVID-19 response efforts.

Project Air-Bridge. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge:

- From March 30th to April 5th, 10 flights arrived to the U.S with critical supplies.
- The cargo moved so far totals almost 83.5 million gloves, almost 5 million surgical masks, and 1.2 million gowns.
- Upon arrival, the PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization is given to hospitals, health care facilities, and nursing homes around the country.
- 23 additional flights are currently scheduled through April 18.

Ventilator Distribution. FEMA is distributing ventilators to hard hit states. From March 30th to April 4th, FEMA and HHS delivered ventilators from the Strategic National Stockpile to Michigan, New Jersey, Illinois, Connecticut, and Louisiana.

CUSTOMS AND BORDER PROTECTION (CBP)

Keeping Critical Cargo and Trade Moving. CBP continues to process commercial cargo. Approximately \$21B worth of goods crossed back and forth over the borders of U.S, Mexico, and Canada from March 30th to April 5th .

Working to Reduce Illegal Entries. CBP agents encountered nearly 4,200 migrants crossing illegally at the U.S. Southern border daily, compared to nearly 10,000 encounters daily prior to the current containment efforts.

Facilitating Critical PPE Deliveries. CBP lifted a Withhold Release Order that had barred importation of disposable rubber gloves which our health care workers and law enforcement personnel so desperately need right now.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Working with the Department of State, ICE continues to bring Americans home on the return leg of removal flights to Central America. As of April 5th, ICE has flown 853 U.S. citizens and legal permanent residents home on removal flights from Colombia, El Salvador, Honduras, and Nicaragua since the first flight on March 22.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Air Travelers Secure. Due to the pandemic and travel restrictions, TSA continues to screen a significantly reduced number of passengers. From March 27th to April 2nd, TSA successfully screened 1,124,145 travelers ensuring individuals reached their destinations safely.

CYBERSECURITY AND INFRASTRUCTURE SECURITY AGENCY (CISA)

Essential Critical Infrastructure Workers. CISA recently updated its list of essential critical infrastructure workers. As of April 5th, 20 states and territories have published Essential Business Designations.

Election Security Work Continues. CISA coordinated calls between the election community and the United States Postal Service (USPS) and Centers for Disease Control (CDC) to ensure that election officials have the most up to date information and advice from the experts at these agencies regarding COVID-19.

Helping the Private Sector Assess Risk. CISA released a guide titled Risk Management for Novel Coronavirus to assist executives in thinking through physical, supply chain, and cybersecurity issues that may arise from the spread of COVID-19.

UNITED STATES COAST GUARD (USCG)

Facilitating the Offload of Cruise Ships. On April 2nd, the Coast Guard facilitated the offload of more than 1,200 passengers from cruise ships Zaandam and Rotterdam in Port Everglade, FL after it was reported that crewmembers and passengers were infected with COVID-19.

U.S. CITIZENSHIP AND IMMIGRATION SERVICES (USCIS)

Making Extensions for Employment Authorization Easier. On March 30th , U.S. Citizenship and Immigration Services announced that it will reuse previously submitted biometrics

in order to process valid Form I-765, Application for Employment Authorization, extension requests due to the temporary closure of Application Support Centers (ASC) to the public.

Target Date to Reopen Offices. On April 1st, USCIS announced offices temporarily suspended will begin to reopen on May 4th unless the public closures are extended further to help slow the spread of COVID-19.

COUNTERING WEAPONS OF MASS DESTRUCTION (CWMD)

Medical Screening at Airports. CWMD contract personnel are continuing to support CDC with enhanced screening at 13 airports. From March 29th to April 5th, CBP referred 7,565 travelers to CWMD for enhanced screening. As of April 5th, over 265,647 travelers have been referred to CWMD for screening.

SCIENCE AND TECHNOLOGY (S&T)

Coronavirus Research. S&T's National Biodefense Analysis and Countermeasures Center (NBACC) continued researching the impact of environmental conditions, such as temperature and humidity, to determine the virus's survivability in the air, in respiratory fluids, and on various types of surfaces. Additional research includes decontamination methods to determine the most effective materials to clean and disinfect surfaces to rid them of the virus.

Consolidating COVID-19 Data for Government Officials. On April 1st, the NBACC updated the Master Question List (MQL), a compilation of available research and information on operationally-relevant questions.

Public and constituent inquiries | 360.902.4111

Press inquiries | 360.902.4136

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

DHS and USDA Move to Protect American Farmers and Ensure Continued Flow of America's Food Supply

Department to Temporarily Amend Certain H-2A Requirements During COVID-19 National Emergency

WASHINGTON— The Department of Homeland Security, with the support of the U.S. Department of Agriculture (USDA), has announced a temporary final rule to change certain H-2A requirements to help U.S. agricultural employers avoid disruptions in lawful agricultural-related employment, protect the nation's food supply chain, and lessen impacts from the coronavirus (COVID-19) public health emergency. These temporary flexibilities will not weaken or eliminate protections for U.S. workers.

Under this temporary final rule, an H-2A petitioner with a valid temporary labor certification who is concerned that workers will be unable to enter the country due to travel restrictions can start employing certain foreign workers who are currently in H-2A status in the United States immediately after United States Citizenship and Immigration Services (USCIS) receives the H-2A petition, but no earlier than the start date of employment listed on the petition. To take advantage of this time-limited change in regulatory requirements, the H-2A worker seeking to change employers must already be in the United States and in valid H-2A status.

Additionally, USCIS is temporarily amending its regulations to protect the country's food supply chain by allowing H-2A workers to stay beyond the three-year maximum allowable period of stay in the United States. These temporary changes will encourage and facilitate the continued lawful employment of foreign temporary and seasonal agricultural workers during the COVID-19 national emergency. Agricultural employers should utilize this streamlined process if they are concerned with their ability to bring in the temporary workers who were previously authorized to work for the employer in H-2A classification. At no point is it acceptable for employers to hire illegal aliens.

“This Administration has determined that continued agricultural employment, currently threatened by the COVID-19 pandemic, is vital to maintaining and securing the country's critical food supply chain. The temporary changes announced by USCIS provide the needed stability during this unprecedented crisis,” said Acting Secretary of Homeland Security Chad F. Wolf.

“USDA welcomes these additional flexibilities provided by the Department of Homeland Security today,” said Secretary of Agriculture Sonny Perdue. “Providing flexibility for H-2A employers to utilize H-2A workers that are currently in the United States is critically important as we continue to see travel and border restrictions as a result of COVID-19. USDA continues to work with the Department of Homeland Security, the Department of Labor and the Department of State to minimize disruption and make sure farmers have access to these critical workers necessary to maintain the integrity in our food supply.”

The temporary final rule is effective immediately upon publication in the Federal Register. If the new petition is approved, the H-2A worker will be able to stay in the United States for a period of time not to exceed the validity period of the Temporary Labor Certification. DHS will issue a new temporary final rule in the Federal Register to amend the termination date of these new procedures in the event DHS determines that circumstances demonstrate a continued need for the temporary changes to the H-2A regulations.

The H-2A nonimmigrant classification applies to alien workers seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States, usually lasting no longer than one year, for which able, willing, and qualified U.S. workers are not available.

HHS_Letter_to_Hospital_Administrators

April 10, 2020 at 8:04 PM EDT

To: stacey.tichenor@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the attached letter and FAQs sent by Health and Human Services (HHS) Secretary Azar to hospital administrators.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: HHS Letter to Hospital Administrators

To follow-up on his letter from March 29, 2020, Secretary Azar just sent the attached letter and Frequently Asked Questions (FAQ) to hospital administrators across the country. Today's letter underscores the importance of data-sharing and highlights that hospitals are key partners with the Federal Government as we work to ensure that the Whole of America response to COVID-19. The data requested included daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.

The FAQ attachment to the letter details the federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information. Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them. These FAQs will be updated if additional data delivery methods become available.

It remains critical that all requested information listed in the FAQ is provided daily to the federal government to facilitate planning, monitoring, and resource allocation in response to COVID-19.

Contact

If you have any questions, please email your question to U.S. Department of Health and Human Services at Protect-ServiceDesk@hhs.gov.

[HYPERLINK "https://networth.wiki/gillian-turner/" https://networth.wiki/gillian-turner/](https://networth.wiki/gillian-turner/)

(is that a Baphomet sign you're making above with Leland?)

saw you reporting about Boris Johnson's release from Hospital and heard his statement,
you broadcasted, **below:-**

Boris Johnson is the ultimate purveyor of fake news

The ‘brilliant entertainer’, aware of the tricks of his old trade (Journalism) -

HYPERLINK "<https://www.theguardian.com/politics/2020/feb/23/boris-johnson-is-the-ultimate-purveyor-of-fake-news>"
<https://www.theguardian.com/politics/2020/feb/23/boris-johnson-is-the-ultimate-purveyor-of-fake-news>

the Conservative party, is about to foist a tasteless joke upon the British people

– who will not find it funny for long.

” Almost the only people who think Johnson a nice guy are those who do not know him.

he is utterly unfit to be prime minister...Max Hastings

HYPERLINK "<https://www.theguardian.com/commentisfree/2019/jun/24/boris-johnson-prime-minister-tory-party-britain>"
<https://www.theguardian.com/commentisfree/2019/jun/24/boris-johnson-prime-minister-tory-party-britain>

"orange" The Freemason's favorite colour -

in the English Reduction system equals 33 (6+9+1+5+7+5), which reduces to 6

[HYPERLINK "http://rosettedelacroix.com/?p=16949"](http://rosettedelacroix.com/?p=16949) <http://rosettedelacroix.com/?p=16949> -

Boris Johnson Addresses the public following hospital release

[HYPERLINK "https://www.youtube.com/watch?v=59kIPMB-2s4"](https://www.youtube.com/watch?v=59kIPMB-2s4) <https://www.youtube.com/watch?v=59kIPMB-2s4>

after having read the daily mail article here:-

Boris Johnson tested negative for coronavirus before he was released from hospital, Downing Street confirmed today, as the Prime Minister starts his road to recovery at his Chequers country estate.

[HYPERLINK "https://www.dailymail.co.uk/news/article-8213623/Ministers-want-PM-dial-Chequers-bolthole-lockdown-decision-THURSDAY.html"](https://www.dailymail.co.uk/news/article-8213623/Ministers-want-PM-dial-Chequers-bolthole-lockdown-decision-THURSDAY.html) <https://www.dailymail.co.uk/news/article-8213623/Ministers-want-PM-dial-Chequers-bolthole-lockdown-decision-THURSDAY.html>

regarding Boris Johnson's hospital records, can they be released to the public? - especially his negative and positive tests for the alleged Corona Virus -

i.e. who took these tests, and on which test apparatus?,

and can we get a name of the Doctors who treated him at St Thomas'!?

I note in the daily mail article attached there were doctors named but not any doctors from St Thomas' at London Bridge who actually treated the British Prime Minister.

Why didn't they give a statement about the Prime Minister's treatment there and why didn't those who treated and tested him confirm the details publicly , how do we know what in fact Boris Johnson was treated for, who treated him, who tested him on what apparatus etc.???

Also can you chase up the officially published government death records regarding Covid-19 DEATHS and who certified these deaths in the UK, and US and post them on your twitter account,

As Dr. Fauci stated, this alleged new Corona Virus came out right during the high season of the flu epidemic in both Europe and the US , and doctors, and Coronors have been told to document all deaths as Covid-19 - even if they haven't been diagnosed as such??

HYPERLINK "<https://twitter.com/chrisbergPOVNOW/status/1247680994821509121>**"**
<https://twitter.com/chrisbergPOVNOW/status/1247680994821509121>

SHOCKING: MN Sen & Dr. @drscottjensen

said that he received a 7 pg doc from @mnhealth

to fill out death certificates with a diagnosis of #COVID-19 whether the person actually died from COVID-19 or not.

HYPERLINK "<https://twitter.com/i/status/1247680994821509121>**"** <https://twitter.com/i/status/1247680994821509121>

Thanks Gililan. Warm Regards, Rufus York, Geneva Switzerland.

I attach some news worthy links and a couple of video links that I just put together, one of Oprah and the other one of the Cuomo Brothers, (with the rubbery mask) which you may want to investigate further , and or report on subsequently.

THE REASON WHY PRESIDENT DONALD TRUMP GOT A STAR ON THE HOLLYWOOD WALK OF FAME

Re:- COVID-19 Coronavirus “Fake” Pandemic: Timeline and Analysis

from September 2019 - April 2020

analysis (in the timeline below) reveals that powerful corporate interests linked to Big Pharma, Wall Street and agencies of the US government were instrumental in the WHO’s far-reaching decision to declare a world pandemic.

[HYPERLINK "https://www.globalresearch.ca/ncov-2019-coronavirus-time-line/5705776"](https://www.globalresearch.ca/ncov-2019-coronavirus-time-line/5705776)

<https://www.globalresearch.ca/ncov-2019-coronavirus-time-line/5705776>

Future New World Order historians will describe the Coronavirus PsyOp as a coordinated operation of the world’s “Deep States” aimed at unseating resistant world leaders and imposing the Orwellian rule of the “evil Western-version NWO.”

They will say that the regime change elements of the operation utilized...

“Deep State”/Big Pharma-controlled health professionals and organizations to create the COVID-19 boogeyman and give it credibility,

a massive mainstream media, alternative media, and crisis-actor-driven social media campaign to terrorize the public with the boogeyman, and

“Deep State”-aligned national, regional, and local government officials to lend further credibility to the psyop, blame the resistant national leaders for a “negligent response” to the imaginary crisis, and lock down the population and destroy the economy so the national leaders could be removed and the evil NWO could be launched.

The lockdown is NOT a way of beating this virus

79 year old Fauci, makes the devil horn sign

Fauci gets the medal of freedom from 9/11 insider -Bonesman War Criminal George W Bush -

Ron Paul called on President Donald Trump's administration Thursday to fire Dr. Anthony Fauci, the nation's top coronavirus advisor

'He should be fired, but if you don't do it in the literal sense, the people have to fire him,' Paul said. 'They have to fire him by saying 'he's a fraud.'

84, who has run three presidential campaigns since 1988, is also a physician, and has previously written about 'the coronavirus hoax.'

expanded on his skepticism in Thursday's program, telling viewers that the outbreak was being used by the government to infringe on the liberties of Americans.

Video -- 79 year old Tony Fauci Declares 'Cruise Ships Safe for Healthy People'

DOD LEAK: Feds Investigated Birx & CDC Director for "Scientific Fraud & Misconduct"; Fabricated, Falsified HIV/AIDS Vaccine Trials

Robert Redfield, the director of the CDC, and Dr. Deborah Birx — the Coronavirus Coordinator for the White House — were the targets of a damning Department of Defense investigation after colleagues in the U.S. Army and U.S. Air Force blew the whistle on scientific fraud during clinical trials of a HIV/AIDS vaccine.

question is: How did Redfield end up running the CDC and why if Birx, an Obama appointee with such a shady medical history, running the White House Coronavirus coordination?

THE DARK SIDE OF CHRIS AND ANDREW CUOMO FINALLY EXPOSED

[HYPERLINK "https://www.youtube.com/watch?v=wTO2uRhDF5c" https://www.youtube.com/watch?v=wTO2uRhDF5c](https://www.youtube.com/watch?v=wTO2uRhDF5c)

2020 Presidential candidate Covid-19 Corona Virus faker, Chris Cuomo at the forthcoming brokered Democratic Convention, playing a masked up Andrew Cuomo- look at that leathery stretchy face...

it's an established fact that power structures will seize upon opportunities to roll out oppressive authoritarian agendas under the pretense of protecting ordinary people, when in reality they'd been working on advancing those agendas since long before the crisis being offered as the reason for them. It happened with 9/11, and we may be certain that it is happening now.

The reason for this is simple: the powerful are afraid of the public. They always have been. For as long as there has been government power, there has been the fear that the people will realize the power of their numbers and overthrow the government that is in power. And understandably so; it has happened many times throughout history.

Journalist Jonathan Cook said best when he wrote, "Our leaders are terrified. Not of the virus — of us."

France: Yellow Vests continue to march in Paris

The Yellow Vests movement has been demonstrating against the status quo every Saturday since November 2018. A nationwide strike against pension reforms, one of the largest French history, which started in December 2019 breathed new life into the movement.

Another Jesuit footsoldier in the right place at the right time

Emmanuel Jean-Michel Frédéric Macron born 21 December 1977 (age 42)

Amiens, France - Spouse - Brigitte Marie-Claude Macron Born :- 13 April 1953 (age 66)

Macron was baptized a Roman Catholic by his own request at age 12;

He was educated mainly at the Jesuit institute Lycée la Providence.

Lycée la Providence is a French private, Roman Catholic, Jesuit institute of secondary education in Amiens.

[HYPERLINK "https://en.wikipedia.org/wiki/Lyc%C3%A9e_la_Providence"](https://en.wikipedia.org/wiki/Lyc%C3%A9e_la_Providence)

https://en.wikipedia.org/wiki/Lyc%C3%A9e_la_Providence

did not perform national service because he was pursuing his graduate studies. Born in December 1977, he belonged to the last year when service was mandatory.

September 2008, Macron left his job as an Inspector of Finances and took a position at Rothschild & Cie Banque.

proposed to create an official “First Lady” title (as the spouse of the French President currently holds no official title) coming with their own staff, office and a personally allocated budget for their activities.] Following Macron's election as President, and a petition against his proposal that gathered more than 275,000 signatures, the French government announced that Brigitte Macron would not hold the official title of “First Lady” and would not be allocated an official budget.

's popularity fell sharply in 2018, reaching about 25% by the end of November. Dissatisfaction with his presidency has been expressed by protestors in the yellow vests movement.

Crazed socialist Democrat Party Governor Gretchen Whitmer going full-bore dictator on her helpless State of Michigan citizens by banning them from visiting any friends or relatives—banning them from being able to buy seeds for their vegetable gardens or anything they might need to fix the homes they're forbidden to leave—and shockingly ordering that none of her citizens are allowed to buy American Flags anymore.

Gov. Gretchen Whitmer, a Democrat who was elected in 2018, issued a new stay-at-home order on Thursday to combat the coronavirus pandemic. The order, one of the nation's most stringent, included closing parts of big-box stores that sell gardening and home-improvement goods, limiting the use of motorboats, closing public golf courses, and curbing interstate travel.

order has affected small businesses too. Workers in the lawncare and construction industries have said it hampers their ability to make ends meet. Nationwide, in the past three weeks, shutdowns related to the outbreak have put an estimated 17 million Americans out of work.

say that I am furious about this would be an understatement," LaFrance told Insider. "This is a complete overreach by the government."

[HYPERLINK "https://www.businessinsider.com/furious-michiganders-to-protest-at-state-capitol-over-whitmer-order-2020-4?r=US&IR=T"](https://www.businessinsider.com/furious-michiganders-to-protest-at-state-capitol-over-whitmer-order-2020-4?r=US&IR=T) <https://www.businessinsider.com/furious-michiganders-to-protest-at-state-capitol-over-whitmer-order-2020-4?r=US&IR=T>

----- Forwarded Message -----

Fwd: Dave:- re Boris Johnson the ultimate purveyor of fake news (Pls mailme- Govt. Certified Death lists reCV-19)

Hi Dave.

Been watching your World Report, and found it interesting that New York Mayor is now allowing park burials of alleged Covid-19 deaths, in about three foot deep graves & wrapping the bodies in white sheets.. I didn't actually see any bodies in those sheets by the way. I would be grateful to you if you and your team could chase up Certified Death Records held by the U.S./UK governments and announce these on your show.

What is clear is the government models used to predict the extent of the coronavirus pandemic are off by huge margins in the latest coronavirus tracking numbers.

Tracking Website DELETES Information on Hospitalizations, ICU Patients After TGP Reports Numbers Fall Well Below Model Predictions.

[HYPERLINK "https://www.thegatewaypundit.com/2020/04/huge-covid-tracking-website-deletes-information-hospitalizations-icu-patients-tgp-reports-numbers-fall-bogus-model-predictions/"](https://www.thegatewaypundit.com/2020/04/huge-covid-tracking-website-deletes-information-hospitalizations-icu-patients-tgp-reports-numbers-fall-bogus-model-predictions/)

<https://www.thegatewaypundit.com/2020/04/huge-covid-tracking-website-deletes-information-hospitalizations-icu-patients-tgp-reports-numbers-fall-bogus-model-predictions/>

I know that the UK state on their relevant websites that:-

In general, if a death is believed to be due to confirmed COVID-19 infection there is unlikely to be any need for a post-mortem examination to be conducted and the Medical Certificate of Cause of Death should be issued. 3.3 Cases in which death may be due to COVID-19 infection but in which infection is not confirmed.

criteria to assess whether a death may have been due to COVID-19 infection but in which COVID-19 infection has not been proved prior to death are the same as those used to assess the possible infection risk in the living, but with the caveat that the times referred to in the guidelines refer to the time before death or a relevant illness developing prior to death developing.

British prime minister Boris Johnson flanked by chief medical officer Chris Whitty and lead science adviser Patrick Vallance, at a news conference in 10 Downing Street on Monday

Patrick John Thompson Vallance (born March 1960) since March 2018 been the Chief Scientific Adviser to the Government of the United Kingdom.

Vallance, who heads research and development at GlaxoSmithKline (GSK), is a physician and clinical pharmacologist.

2012 to 2018 Vallance served as president of research and development (R&D) at the multinational pharmaceutical company GlaxoSmithKline (GSK).

In 2006, in his mid-40s, he joined GSK as head of drug discovery.[18][19] Four years later he became head of medicines discovery and development and in 2012 he was appointed head of research and development at GSK.

**[HYPERLINK "https://en.wikipedia.org/wiki/Patrick_Vallance"](https://en.wikipedia.org/wiki/Patrick_Vallance)
https://en.wikipedia.org/wiki/Patrick_Vallance**

2012, GSK pleaded guilty to promotion of drugs for unapproved uses, failure to report safety data, and

kickbacks to physicians in the United States and agreed to pay a US\$3 billion (£1.9bn) settlement. It was the largest health-care fraud case to date in that country and the largest settlement by a drug company

Sarah Vine, the journalist and wife of Justice Secretary Michael

Gove, has argued sleeping in the same bed as your partner is a "very bad idea".

a column for the Daily Mail entitled, "Sorry chaps but women love sleep FAR more than sex", the wife of the Conservative MP, with whom she has two children, wrote in favour of the Victorian tradition of separate bedrooms. Referring to sex as "quite impractical", Vine explained how occupying the same bed is often "unsatisfactory for both parties" and compared the marital bed to "a battleground for the duvet".

wife of the Lord Chancellor and former Times beauty editor admitted to considering "surrendering to the pillow and duvet", a more enticing prospect than a night of passion with "even the most accomplished lover". -----Michael is not one to complain.....

[HYPERLINK "https://www.independent.co.uk/news/people/michael-goves-wife-sarah-vine-hails-separate-bedrooms-as-key-to-a-happy-marriage-a6775931.html"](https://www.independent.co.uk/news/people/michael-goves-wife-sarah-vine-hails-separate-bedrooms-as-key-to-a-happy-marriage-a6775931.html) <https://www.independent.co.uk/news/people/michael-goves-wife-sarah-vine-hails-separate-bedrooms-as-key-to-a-happy-marriage-a6775931.html>

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following

the event, the video will be available for download via the [King County TV streaming page](#).
Media questions: [Chase Gallagher](#), King County, 206.263.8537

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_5

April 05, 2020 at 3:25 PM EDT

To: tara.lee@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 5, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - On April 3, CDC issued a recommendation to the public to use cloth face

coverings in community settings to help prevent the spread of COVID-19 by people are infected and do not know it.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- HHS will be providing state, territory and tribal Public Health departments with a one-time shipment of Abbott COVID-19 rapid tests.
 - Shipments are expected to arrive at the 70 identified locations by April.
 - The tests allow for immediate, on-site testing at the point-of-care.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - DOD will deliver 300 ventilators from its supply to New Jersey today, April 5.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and an additional 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 30 ventilators for Guam; an additional 200 ventilators for Louisiana; an additional 200 ventilators to New Jersey; and 100 ventilators for Massachusetts.

- Forty states, four territories and 12 tribes have issued stay at home orders.

US-Canada_Joint_Initiative:_Temporary_Restriction_of_Travelers_Crossing_the_US-Canada_Land_Border_for_Non-Essential_Purposes

March 20, 2020 at 1:17 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

US-Canada Joint Initiative: Temporary Restriction of Travelers Crossing the US-Canada Land Border for Non-Essential Purposes

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars in trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people to exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries. These supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

April 23, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- In order to help Americans, return to work, the federal government will distribute cloth facial coverings for critical infrastructure workers who do not need medical-grade personal protective equipment (PPE) for their daily work.
 - The facial coverings will be delivered in a phased approach for infrastructure workers, first responders and food producers. Prioritization will also be to areas with the highest COVID-19 infection rates.

- Distribution will be based on the Cybersecurity and Infrastructure Security Agency's analysis of priority infrastructure sectors and will include food production and distribution, energy, water and wastewater treatment, essential transportation and logistics, first responders, communications, hazardous materials management, manufacturing of medical supplies, and sanitation and disinfection supplies.
 - The first phase includes distribution of more than 19 million facial coverings.
 - HHS anticipates production of 6.5 million facial coverings each week for the next month.
- As of **April 22**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 96.9 million surgical masks, 6.6 million face shields, 13.8 million surgical gowns, 727 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.69 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- During the **April 24** White House Press Briefing, Food and Drug Administration (FDA) Commissioner Dr. Stephen Hahn announced that the FDA had [approved the first COVID-19 home collection test kit](#).

- The FDA continues to facilitate test development to ensure access to accurate diagnostics, working with over 350 test developers and authorizing 63 types of tests to date.
- On **April 24**, President Trump signed the [Paycheck Protection Program and Health Care Enhancement Act](#) to replenish the Small Business Administration's small business loan program while also providing crucial support for America's frontline medical workers.
 - The act provides \$320 billion in additional funding for the Paycheck Protection Program, along with \$75 billion for hospitals and healthcare providers to fight coronavirus and \$25 billion for ongoing testing across the country.
 - The [Paycheck Protection Program](#) processed nearly \$350 billion in loans to 1.6 million small businesses from funding provided in the CARES Act. More than 4,900 lending institutions participated in making these SBA-backed loans.
- As of **April 24**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.5 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.8 million surgical gowns, 779.1 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

FEMA_Offers_Ways_for_Private_Sector_to_Help_Fight_COVID-19

March 27, 2020 at 4:08 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA Offers Ways for Private Sector to Help Fight COVID-19

Under the White House Coronavirus Task Force's direction, FEMA, HHS and our federal partners continue to work closely with state, local, tribal and territorial governments in executing a whole-of-government response to fight the COVID-19 pandemic and protect the public. The outpouring of support from the private sector to provide medical supplies and equipment has been tremendous. To help us match the many offers of assistance to the right place, at the right time, and in the right quantity, we ask for your help in ensuring partners know how to connect.

To **sell medical supplies** or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Updated Notice ID 70FA2020R00000011](#)). This solicitation requires registration with the System for Award Management (SAM) in order to be considered for award, pursuant to applicable regulations and guidelines. Registration information can be found at www.sam.gov. Registration must be "ACTIVE" at the time of award.

If you have **medical supplies or equipment to donate**, please provide us details on what you are offering through our online medical supplies and equipment form at <https://www.fema.gov/covid19offers>.

If you are interested in **doing business with FEMA** and supporting the response to COVID-19 with your company's **non-medical** goods and/or services, please submit your inquiry to the Department of Homeland Security's Procurement Action Innovative

Response (PAIR) team at DHSIndustryLiaison@hq.dhs.gov.

In addition to these avenues to help, **licensed healthcare professionals that want to volunteer** can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.

If you are a hospital or healthcare provider in need of medical supplies, please contact your state, local, tribal or territory department of public health and/or emergency management agency. Any needs that cannot be met by the state or tribe are then sent to the respective FEMA regional office who are coordinating requirements through the FEMA National Response Coordination Center. FEMA is working with the Department of Health and Human Services and other federal agencies to fulfill requests and ship supplies as quickly as possible.

Additional ways to help can be found at www.fema.gov/coronavirus/how-to-help.

Joint_DHS/EOIR_Statement_on_MPP_Rescheduling

March 23, 2020 at 11:10 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Joint DHS/EOIR Statement on MPP Rescheduling

Due to circumstances resulting from COVID-19, all Migrant Protection Protocol (MPP) master calendar and merit hearings presently scheduled through April 22 will be rescheduled. Neither the MPP program nor any hearings will be cancelled.

Any individual with an MPP hearing date through April 22 should present themselves at their designated port of entry on their previously scheduled date to receive a tear sheet and hearing notice containing their new hearing dates. DHS and EOIR are deeply committed to ensuring that individuals ‘have their day in court’ while also ensuring the health and safety of aliens, our frontline officers, immigration court professionals, and our citizens.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so we'll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available? Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that’s easier.

Best,
Stephanie

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_7,_2020

April 07, 2020 at 4:56 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 7, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services (HHS) Response; FEMA Response Capacity; Strategic National Stockpile; CDC Public Guidance; CDC Respirator Guidance; Hydroxychloroquine/ Chloroquine; FDA Ventilator Guidance; National Guard Activation (Title 32); Community-Based Testing Sites; Defense Production Act; and Other Federal Response.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On **March 31**, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people are critical in the campaign to slow the virus' spread and keep high-risk populations safe.
 - For updates and information on how to protect yourself, visit www.coronavirus.gov.

- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - While FEMA schedules daily flights, it does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 6**, 13 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Seven flights are scheduled to arrive today, 6 in Chicago and 1 in Los Angeles. This is the greatest number of air bridge flights in a single day since the start of the program.
 - An additional 72 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.
- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- As of **April 6**, FEMA and HHS have provided or are currently shipping, 8,920 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (1,350), New York (4,400), Oregon (140), and Washington (500).
 - Governor Brown of Oregon sent the state's 140 ventilators directly to New York.
 - Governor Inslee of Washington is returning 400 of the state's 500 ventilators to

- the SNS to be deployed to areas of greatest need.
 - Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 250-bed Federal Medical Station for the Metro D.C. area.
- Forty states, four territories and 24 tribes have issued stay-at-home orders.

COVID-19 FEMA National Hot Issues and Social Listening Reports - 4/11/20

April 11, 2020 at 6:09 PM EDT

To: Undisclosed recipients:

Good afternoon,

We are not producing a social listening and media analysis report out of Region 10 this weekend. We have included the national hot issues and national social listening reports. If you don't want to open the documents attached, we would like to bring to your attention the Region 10 section from the national social listening report below.

Region 10

Alaska

- The mayor of Anchorage [requested an extension of his emergency powers](#) from the city council.
- Major private land owners criticized state officials for using the pandemic as a justification to approve [construction of a 200 mile road](#) through private property.
- The [Salvation Army Alaska Division](#) is struggling to keep up with demand for food services.

Idaho

- Idaho's new [COVID-19 cases dropped by about 55%](#) from last week.
- [Boise State University](#) will open student housing for local healthcare workers.
- Hailey City Council voted to [extend the city stay-home orders](#), which are more strict than existing state orders.
- [Two Boys and Girls Clubs locations](#) received a \$25,000 donation to support children and their families.

Oregon

- A [federal shipment of PPE arrived in Oregon](#) just as the state's reserves of N95 masks and face shields had dropped to zero.
- Oregon Board of Pharmacy has placed [restrictions on the use of Hydroxychloroquine](#) after reports of stockpiling.
- Local media compiled a [list of nursing homes and long term care facilities](#) with COVID-19 cases.
- [Portland opened three outdoor homeless camps](#) to reduce crowding in shelters.
- [Landlords call for relief](#) as many tenants struggle to make payments.
- After trespassers violated barricades and threw signs off the road, an additional [seven miles of Gorge Highway was closed](#).

Washington

- Facing historic demand, [local food banks say they will run out of food](#) in three weeks.
- Washington State [Supreme Court ordered immediate protection for prison inmates](#) vulnerable to COVID-19.
- In Everett, the [isolation and quarantine site at Angel of Winds Arena](#) has been largely unused.
- In King County, a new [United Way program is helping renters](#) who lost their income.
- At the [Hanford nuclear waste facility](#), thousands of workers were told to stay home for a fourth week.

Using Autodialers for COVID-19 Related Public Service Announcements

April 02, 2020 at 11:51 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the guidance below, and attached, from our partners in the Communications Sector Coordinating Council regarding autodialers and how to ensure that legitimate COVID-related public service announcements are not inadvertently blocked.

April 2, 2020

Using Autodialers for COVID-19 Related Public Service Announcements

If your organization uses, or expects to use, automated dialing technology to make large numbers of voice telephone calls to citizens about COVID-19, there are measures you are advised to take to help ensure that those calls are not inadvertently blocked by service providers or other entities.

What You Should Know

Many telephone service and app providers offer services that consumers can use to block unwanted and illegal robocalls. While those services can protect citizens from illegal fraudulent robocallers (including ones taking advantage of the public's anxiety about COVID-19), there is some risk that legitimate calls made using automated dialing technology might inadvertently be identified as "spam" and blocked.

Calling patterns associated with legitimate, important public service telephone calls might in some instances be similar to those associated with unwanted (and often illegal) robocalls, so the algorithms used to identify and block unwanted robocalls could potentially be triggered.

What You Should Do

Any public service entity that uses an autodialer to contact its citizens can minimize the risk that its calls are incorrectly blocked (or labeled as "spam") by registering its telephone numbers with the companies that offer the blocking tools. Each has a procedure through which legitimate callers can register their numbers and report any instance(s) of incorrect blocking or labeling.

Telephone Service Providers' Portals for Registering Numbers

Legitimate callers can go the web sites below to register legitimate numbers and also address any incorrect labeling or call blocking.

- **AT&T:** <https://hiyahelp.zendesk.com/hc/en-us/requests/new>
 - Analytics Provider: Hiya
- **Sprint, Verizon, U.S. Cellular:** <http://Reportarobocall.com>
 - Analytics Provider: TNS
- **T Mobile:** <http://www.calltransparency.com>
 - Analytics Provider: First Orion

Third-Party App Providers

Legitimate callers can email these companies about their planned autodialing calls:

- **Nomorobo:** reports@nomorobo.com
- **YouMail:** TNissues@youmail.com

Federal_Partners_Continue_Providing_Resources_for_COVID-19_Response_Efforts

March 25, 2020 at 12:57 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 25, 2020

FEMA Advisory

Federal Partners Continue Providing Resources for COVID-19 Response Efforts

The federal government continues to take aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, more than 9,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington, California, Iowa and Louisiana were approved for major disaster declarations to assist with additional needs identified in these states.

11 states and 4 tribes have issued full stay-at-home orders; in addition, 5 states have issued partial or localized orders.

Medical supplies are en route to states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington, New York and California. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff and is expected to arrive by March 27. The U.S. Navy hospital ship Comfort is scheduled to arrive in New York on April 7. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

US-Canada_Joint_Initiative:_Temporary_Restriction_of_Travelers_Crossing_the_US-Canada_Land_Border_for_Non-Essential_Purposes

March 20, 2020 at 1:17 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

US-Canada Joint Initiative: Temporary Restriction of Travelers Crossing the US-Canada Land Border for Non-Essential Purposes

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars in trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people to exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries. These supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Cc: O'Hare, Michael, Maykovich, Vincent, Biasco, Lon, Claney, Catherine, Ezelle, Robert (MIL), Nancy Bickford (Nancy.Bickford@mil.wa.gov), Ike, Ryan, Rossie, Camilla, Keelan, Kayla

Hello Stacey,

During the Governor's Monday, April 13, 11:30 AM call with FEMA Region 10 Administrator, Mike O'Hare, the Regional Administrator promised to get back to the Governor about Admiral P's name.

It is Rear Admiral John P. Polowczyk (Pa-luf-check).

Please let me know if there is anything you need.

Thank you again for all of your help in setting up the call,

Betty

FEMA Advisory: COVID-19 Best Practices Press Release (April 19, 2020)

April 19, 2020 at 3:40 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 19, 2020

Coronavirus (COVID-19) Pandemic: Best Practices

FEMA and the U.S. Department of Health and Human Services (HHS) are collecting and sharing best practices and lessons learned from the whole-of-America response to the coronavirus (COVID-19) pandemic. The best practices are intended to help medical practitioners, emergency managers, and other critical stakeholders learn from each other's approaches and apply solutions to current response and recovery operations.

The [FEMA Coronavirus Emergency Management Best Practices](#) page provides a one-stop shop to explore best practices and lessons learned across all levels of government, private sector, academic institutions, professional associations, and other organizations. HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

Best practices are organized around five themes:

- *Helping People*, which includes best practices on topics such as crisis counseling resources and anticipating and attending to civil rights;
- *Government Operations* best practices such as public information and continuity of operations considerations;
- *Private Sector and Infrastructure*, which includes best practices for commercial trucking and food stores;
- *Recovery Planning and Implementation*, to include the newly released FEMA Disaster Financial Management Guide and economic recovery considerations; and
- *Medical Supplies and Equipment*, including best practices for the preservation of personal protective equipment while ensuring workers are protected.

Please visit www.coronavirus.gov for current health-related guidance and information on

COVID-19.

Coronavirus (COVID-19) Pandemic Whole-of-America Response - April 16

April 16, 2020 at 1:46 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 16, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- * FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people
- * FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- * Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.

-- Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.

--This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.

* The White House announced [a new collaboration by Schema.org](#) to help Americans find the most up-to-date public health guidance and the most relevant information on testing facilities in their communities

--Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.

--All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

FEMA Stakeholder Advisory: Requesting Partner Support for Amplification of American Red Cross Blood Donation Messaging

March 19, 2020 at 5:37 PM EDT

To: FEMA-IGA

Office of External Affairs
U.S. Department of Homeland Security
Washington, DC 20472

FEMA

March 19, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

Requesting Partner Support for Amplification of American Red Cross Blood Donation Messaging

The American Red Cross has asked for support to amplify their blood donation messaging on social media and during media interviews, as appropriate.

We are sharing their talking points and social media posts that they've requested help with amplifying.

Talking Points:

- One thing people can do to help the country during this public health emergency is to donate blood.
- We need an adequate supply of blood to treat patients in hospitals who need emergency surgery or trauma patients.
- But a lot of blood drives take place on college campuses or workplaces, and those drives have been cancelled. (As of March 17, the American Red Cross reports nearly 4,000 drives cancelled and more than 100,000 fewer blood donations – industry numbers are higher)
- If you are a healthy individual, it's important you go donate blood. Volunteer blood donors are the only source of blood for those in need.
- Donating blood is a safe process and people should not hesitate to give. It's important to note that blood drives have the highest standards of safety and infection control.
- We recommend people leave home for necessities like groceries, or a doctor's visit, or the pharmacy – and donating blood is a necessity too.
- So, give blood – you'll feel good about it and you'll be helping your country during this crisis.

- One donation can help save the lives of up to 3 people.

Social posts to amplify:

- Blood drive cancellation stats on [Facebook](#) and [Twitter](#).
- Blood drive precautions on [Facebook](#) and [Twitter](#).
- Patient story on [Facebook](#) and [Twitter](#).

Please note that American Red Cross is only updating the number of blood drive cancellations once a day, new numbers will be available tomorrow morning around 9 am.

Social guide for partners: See attached word document with sample posts and links to downloadable graphics.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 6, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; Hydroxychloroquine/Chloroquine; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The latest updates and information on how to protect yourself and what to do if you think you are sick are available at www.coronavirus.gov.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
 - Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.
 - Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
 - The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
 - As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
 - The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
- The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
 - Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19

- patients.
 - The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
 - 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and 300 additional ventilators to New Jersey.
- Forty states, four territories and 23 tribes have issued stay at home orders.

Subject: Follow up on medical supply donations

Good afternoon,

We received some guidance this afternoon that will streamline the paperwork for donations, particularly from national-government to national-government (FEMA) or from an international group to an IRS certified non-profit. I am just letting you know as the non-profit route may be a good avenue for the Cuban donations should they occur. We hope to have a trade notice out next week, but I am available at any time to discuss further (cell number below).

Thank you,

Luca Furnare

Assistant Port Director - Trade

Port of Seattle/Tacoma, WA

Hi Camilla,

I just received an inquiry you might be able to help me with re the FEMA press release:

- “Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 48 hours.”
 - **We have not received or heard that we are receiving any supplies. John – Do you know if those supplies are only going to Seattle right now?**

- “We have made available sufficient supplies of testing materials so state and local partners can make testing more accessible.”
 - **We do not have sufficient testing supplies. And, we have not heard of any local Spokane partners receiving supplies.**

Advisory

Federal Partners Provide Additional Health & Medical Support for Coronavirus

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On Sunday, March 22, President Trump directed the Secretary of Defense to allow the States of

California, New York and Washington use of the National Guard in a Title 32 status to support State and local emergency assistance efforts. This allows the Governors to call up the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states are able to request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. All 50 states, the District of Columbia, five territories and two tribes are working directly with FEMA under the nationwide emergency declaration for COVID-19. States, tribal and territorial governments do not need to request separate emergency declarations to receive FEMA assistance under this nationwide declaration.

In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states. Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 48 hours.

The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. Additional hospital beds are being made available in Washington, as well as California and New York.

To help the American public distinguish between rumors and facts regarding the response to COVID-19, FEMA has created a Rumor Control page on FEMA.gov. The public can help control the spread of rumors by sharing our page: fema.gov/coronavirus.

Every American has a role to play. Consider donating cash, giving blood, or donating to your local food bank to help fight COVID-19.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Defense Production Act, and How to Help.

Please let me know if you have questions.

###

FEMA's mission is to help people before, during and after disasters.

FEMA_Advisory:_Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response

April 13, 2020 at 8:04 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Project Airbridge, PPE Preservation, and resource requests from the International Reagent Resource.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

In support of the coronavirus (COVID-19) pandemic response, FEMA provides the following: FEMA Project Airbridge video Advisory; Personal Protective Equipment (PPE) Preservation Best Practices Advisory and Fact Sheet, and a Resource Requests from the International Reagent Resource (IRR) Advisory and Fact Sheet.

FEMA Project Airbridge

To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC

data.

A brief video on Project Airbridge is available on [FEMA's Media Gallery Website](#) and on all FEMA social media accounts.

Project Airbridge Advisory: Attachment [1]

Personal Protective Equipment Preservation Best Practices

This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19 pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

Preserving Personal Protective Equipment Best Practices Advisory: Attachment [2]

Preserving Personal Protective Equipment Best Practices Fact Sheet: Attachment [3]

Resource Requests from the International Reagent Resource

The International Reagent Resource (IRR), established by the Centers for Disease Control and Prevention (CDC), acquires, authenticates, and produces reagents that scientists need to carry out basic research and develop improved diagnostic tests, vaccines, and detection methods.

The (IRR) Fact Sheet (attached) outlines a simplified process for states and territories to make resource requests from the IRR. Consolidating testing supplies under the IRR alleviates burden on public health labs, which increases efficiency and reduces need to work with separate, individual suppliers for swabs, reagents, and other diagnostic testing supplies.

International Reagent Resource Advisory: Attachment [4]

Coronavirus_(COVID-19)_Pandemic:_A_pplying_the_Defense_Production_Act

April 14, 2020 at 6:01 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below, and attached fact sheet, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Defense Production Act.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are [executing a four-pronged approach](#) to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation**.

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19 response, please review the attached fact sheet.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_15

April 15, 2020 at 3:19 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 15, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [FEMA Project Airbridge](#).
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/hospital beds; total

- acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - The seven new ventilator contracts announced by HHS this month will supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.

[HYPERLINK "https://youtu.be/doYZV4NtYFQ?list=PLKFDBwQxzEinYVS40s0VHOp0e-Sjx_4QK"](https://youtu.be/doYZV4NtYFQ?list=PLKFDBwQxzEinYVS40s0VHOp0e-Sjx_4QK)
https://youtu.be/doYZV4NtYFQ?list=PLKFDBwQxzEinYVS40s0VHOp0e-Sjx_4QK

Robin, George,

Saw you recently interviewing George about his wife Ali Wentworth having a mild case of the Corona Virus, right in the middle of me watching the above linked video about Good Morning America, Robin Roberts.

I have to agree that there is a lot of disinformation out there when one cruises the web , and I guess all we can do is sift through it.

Anyway, attaching a few links for both of you , which you may find of interest and useful to report on , on your show.

Thanks, Robin, George, wishing you all the best,

From Rufus York, Geneva, Switzerland,

+++++

CBS - Fountain of Youth , the Red Cross and blood plasma

HYPERLINK "<https://www.youtube.com/watch?v=bw0N29RWNmA>"
<https://www.youtube.com/watch?v=bw0N29RWNmA>

At the beginning of this alleged Corona Virus outbreak we were told not to go to hospital for any planned surgeries - now they want our blood!

does the Red Cross always need lots of blood , where does it go to, how is it accounted for?

'93We need people to start turning out in force to give blood.” That urgent call-to-action coming from Peter Marks, M.D., Ph.D., director of the U.S. Food and Drug Administration’s (FDA) Center for Biologics Evaluation and Research, as fear about the coronavirus is keeping people from wanting to donate blood. (lift the house arrest and I might consider it)....

FDA said there is an "urgent" need for blood, blood products and plasma, and waived the standard public comment period in issuing the new guidance,

HYPERLINK "<https://edition.cnn.com/2020/04/02/health/coronavirus-blood-donation-guidelines/index.html>" <https://edition.cnn.com/2020/04/02/health/coronavirus-blood-donation-guidelines/index.html>

lphabet's largest subsidiary is Google. Its other subsidiaries include

[HYPERLINK "https://en.wikipedia.org/wiki/Million_Man_March"](https://en.wikipedia.org/wiki/Million_Man_March)

https://en.wikipedia.org/wiki/Million_Man_March

the outset the Corona Virus epidemic was based on a big lie. -----

WHO's global health emergency was declared on January 30th, when there were 150 confirmed cases outside China.

unspoken truth is that the novel coronavirus provides a pretext to powerful financial interests and corrupt politicians to trigger the entire World into a spiral of mass unemployment, bankruptcy, extreme poverty and despair.

is the true picture of what is happening. "Planet Lockdown" is an encroachment on civil liberties. Entire national economies are in jeopardy. In some countries martial law has been declared.

overall clinical consequences of Covid-19 may ultimately be more akin to those of a severe seasonal influenza (which has a case fatality rate of approximately 0.1%) or a pandemic influenza (similar to those in 1957 and 1968) rather than a disease similar to SARS or MERS, which have had case fatality rates of 9 to 10% and 36%, respectively."

current assessments confirm that COVID-19 is akin to seasonal influenza and pneumonia, categorized as contagious respiratory infections.

the above definitions had made the headlines, there would have been no fear and panic.

crisis is unprecedented in World history. It is destabilizing and destroying people's lives Worldwide. It's a "War against Humanity".

Hi Dave.

Been watching your World Report, and found it interesting that New York Mayor is now allowing park burials of alleged Covid-19 deaths, in about three foot deep graves & wrapping the bodies in white sheets.. I didn't actually see any bodies in those sheets by the way. I would be grateful to you if you and your team could chase up Certified Death Records held by the U.S./UK governments and announce these on your show.

What is clear is the government models used to predict the extent of the coronavirus pandemic are off by huge margins in the latest coronavirus tracking numbers.

Tracking Website DELETES Information on Hospitalizations, ICU Patients After TGP Reports Numbers Fall Well Below Model Predictions.

[HYPERLINK "https://www.thegatewaypundit.com/2020/04/huge-covid-tracking-website-deletes-information-hospitalizations-icu-patients-tgp-reports-numbers-fall-bogus-model-predictions/"](https://www.thegatewaypundit.com/2020/04/huge-covid-tracking-website-deletes-information-hospitalizations-icu-patients-tgp-reports-numbers-fall-bogus-model-predictions/)
<https://www.thegatewaypundit.com/2020/04/huge-covid-tracking-website-deletes-information-hospitalizations-icu-patients-tgp-reports-numbers-fall-bogus-model-predictions/>

I know that the UK state on their relevant websites that:-

In general, if a death is believed to be due to confirmed COVID-19 infection there is unlikely to be any need for a post-mortem examination to be conducted and the Medical Certificate of Cause of Death should be issued. 3.3 Cases in which death may be due to COVID-19 infection but in which infection is not confirmed.

criteria to assess whether a death may have been due to COVID-19 infection but in which COVID-19 infection has not been proved prior to death are the same as those used to assess the possible infection risk in the living, but with the caveat that the times referred to in the guidelines refer to the time before death or a relevant illness developing prior to death developing.

[HYPERLINK "https://www.rcpath.org/uploads/assets/d5e28baf-5789-4b0f-acecfe370eee6223/fe8fa85a-f004-4a0c-81ee4b2b9cd12cbf/Briefing-on-COVID-19-autopsy-Feb-2020.pdf"](https://www.rcpath.org/uploads/assets/d5e28baf-5789-4b0f-acecfe370eee6223/fe8fa85a-f004-4a0c-81ee4b2b9cd12cbf/Briefing-on-COVID-19-autopsy-Feb-2020.pdf) <https://www.rcpath.org/uploads/assets/d5e28baf-5789-4b0f-acecfe370eee6223/fe8fa85a-f004-4a0c-81ee4b2b9cd12cbf/Briefing-on-COVID-19-autopsy-Feb-2020.pdf>

you can get clarified what our stance in the U.S. is on that.

Not to make this note too long, I am attaching a few news links for your further investigations in case you may want to expand on them in your broadcasts.

Wishing you all the best. Warm Regards, Rufus York, Geneva, Switzerland

British prime minister Boris Johnson flanked by chief medical officer Chris Whitty and lead science adviser Patrick Vallance, at a news conference in 10 Downing Street on Monday

Patrick John Thompson Vallance (born March 1960) since March 2018 been the Chief Scientific Adviser to the Government of the United Kingdom.

Vallance, who heads research and development at GlaxoSmithKline (GSK), is a physician and clinical pharmacologist.

2012 to 2018 Vallance served as president of research and development (R&D) at the multinational pharmaceutical company GlaxoSmithKline (GSK).

In 2006, in his mid-40s, he joined GSK as head of drug discovery.[18][19] Four years later he became head of medicines discovery and development and in 2012 he was appointed head of research and development at GSK. [HYPERLINK](https://en.wikipedia.org/wiki/Patrick_Vallance)

["https://en.wikipedia.org/wiki/Patrick_Vallance"](https://en.wikipedia.org/wiki/Patrick_Vallance)

https://en.wikipedia.org/wiki/Patrick_Vallance

2012, GSK pleaded guilty to promotion of drugs for unapproved uses, failure to report safety data, and kickbacks to physicians in the United States and agreed to pay a US\$3 billion (£1.9bn) settlement. It was the largest health-care fraud case to date in that country and the largest settlement by a drug company

Sarah Vine, the journalist and wife of

Justice Secretary Michael Gove, has argued sleeping in the same bed as your partner is a "very bad idea".

a column for the Daily Mail entitled, "Sorry chaps but women love sleep FAR more than sex", the wife of the Conservative MP, with whom she has two children, wrote in favour of the Victorian

tradition of separate bedrooms. Referring to sex as "quite impractical", Vine explained how occupying the same bed is often "unsatisfactory for both parties" and compared the marital bed to "a battleground for the duvet".

wife of the Lord Chancellor and former Times beauty editor admitted to considering "surrendering to the pillow and duvet", a more enticing prospect than a night of passion with "even the most accomplished lover".

FEMA Advisory: Coronavirus (COVID-19) Pandemic Whole-of-America Response

April 13, 2020 at 7:24 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 13, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

In support of the coronavirus (COVID-19) pandemic response, FEMA provides the following: FEMA Project Airbridge video Advisory; Personal Protective Equipment (PPE) Preservation Best Practices Advisory and Fact Sheet, and a Resource Requests from the International Reagent Resource (IRR) Advisory and Fact Sheet.

FEMA Project Airbridge

To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC data.

A brief video on Project Airbridge is available on [FEMA Website](#) and on all FEMA social media accounts.

Project Airbridge Advisory: Attachment [1]

Personal Protective Equipment Preservation Best Practices

This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective

equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19 pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

Preserving Personal Protective Equipment Best Practices Advisory: Attachment [2]

Preserving Personal Protective Equipment Best Practices Fact Sheet: Attachment [3]

Resource Requests from the International Reagent Resource

The International Reagent Resource (IRR), established by the Centers for Disease Control and Prevention (CDC), acquires, authenticates, and produces reagents that scientists need to carry out basic research and develop improved diagnostic tests, vaccines, and detection methods.

The (IRR) Fact Sheet (attached) outlines a simplified process for states and territories to make resource requests from the IRR. Consolidating testing supplies under the IRR alleviates burden on public health labs, which increases efficiency and reduces need to work with separate, individual suppliers for swabs, reagents, and other diagnostic testing supplies.

International Reagent Resource Advisory: Attachment [4]

International Reagent Resource Fact Sheet: Attachment [5]

Hi Camilla,

I just received an inquiry you might be able to help me with re the FEMA press release:

- “Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 48 hours.”
 - **We have not received or heard that we are receiving any supplies. John – Do you know if those supplies are only going to Seattle right now?**
- “We have made available sufficient supplies of testing materials so state and local partners can make testing more accessible.”
 - **We do not have sufficient testing supplies. And, we have not heard of any local Spokane partners receiving supplies.**

Advisory

Federal Partners Provide Additional Health & Medical Support for Coronavirus

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On Sunday, March 22, President Trump directed the Secretary of Defense to allow the States of California, New York and Washington use of the National Guard in a Title 32 status to support State and local emergency assistance efforts. This allows the Governors to call up the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states are able to request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. All 50 states, the District of Columbia, five territories and two tribes are working directly with FEMA under the nationwide emergency declaration for COVID-19. States, tribal and territorial governments do not need to request separate emergency declarations to receive FEMA assistance under this nationwide declaration.

In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states. Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 48 hours.

The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington.

Additional hospital beds are being made available in Washington, as well as California and New York.

To help the American public distinguish between rumors and facts regarding the response to COVID-19, FEMA has created a Rumor Control page on FEMA.gov. The public can help control the spread of rumors by sharing our page: fema.gov/coronavirus.

Every American has a role to play. Consider donating cash, giving blood, or donating to your local food bank to help fight COVID-19.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Defense Production Act, and How to Help.

Please let me know if you have questions.

CSMS #42320854 - Processing International Donations for COVID-19 Response

April 10, 2020 at 2:32 PM EDT

Cc: THOMAS, ZACHARY C

From: <https://www.cbp.gov/trade/automated/cargo-systems-messaging-service>

CSMS #42320854 - Processing International Donations for COVID-19 Response

U.S. Customs and Border Protection sent this bulletin at 04/09/2020 03:24 PM EDT

U.S. Customs and Border Protection

Cargo Systems Messaging Service

CSMS #42320854 - Processing International Donations for COVID-19 Response

This CSMS is being issued to provide guidance on the processing of merchandise imported for relief efforts in response to the COVID-19 (Coronavirus) pandemic. This covers the importation of international donations accepted by the Federal Emergency Management Agency (FEMA) via the International Assistance System (IAS) Concept of Operations (CONOPS), and those goods being imported by U.S. charities (or other private entities) to assist with disaster relief.

IAS Imports

Under the IAS CONOPS, the importation has been sanctioned by the State Department as an approved shipment after FEMA exercises its gift acceptance

authority pursuant to section 701(b) of the Stafford Act, *see* 42 U.S.C. § 5201(b), and the goods are eligible to be entered without the payment of duty or taxes pursuant to 19 U.S.C. 1322(b) or 19 U.S.C. 1318(b)(2). The requirement for advanced electronic filing of cargo information may be waived for these shipments. For IAS goods, upon arrival at a port, a cargo manifest must be provided by the arriving carrier and screened by the port for high-risk factors in accordance with CBP policy. IAS goods do not require a formal entry and may be released off the manifest.

Also, arriving foreign shipments processed under these guidelines must be logged and tracked locally by the port in accordance with existing policies to document the following:

- Port of Entry
- Importer
- Consignee
- Description of Goods
- Quantity
- Country of Origin of the Goods
- Destination of the Goods

Certification that the Goods were Approved for Importation under the IAS

The IAS process only applies to government-to-government assistance (nation-state to nation-state assistance) and the shipments must be accepted by the United States government through the State Department. For individuals who provide assistance outside the auspices of a nation state, domestic U.S. law applies.

Charitable Organization Imports

CBP may not remit the duty on the entry of any goods imported for disaster relief by a private group or individual pursuant to 19 U.S.C. 1322(b), unless the recipient is a recognized tax-exempt charitable organization. These private groups or individuals must provide a letter from the charity, on the charity's letterhead, with the charity's Internal Revenue Service (IRS) number(s), stating that they are willing to accept the imported goods and that the organization intends to donate the imported goods. Shipments meeting these criteria do not require a formal entry and may be released off the manifest.

To determine if a charitable organization is in fact an established and eligible charity, CBP personnel may verify an organization's tax-exempt status on the IRS list web site at <https://www.irs.gov/charities-non-profits/tax-exempt-organization-search>.

Any merchandise that does not meet the above criteria for the IAS CONOPS or donations to charities can still be entered under established entry procedures.

Any questions or concerns regarding this guidance should be addressed to Mr. Randy Mitchell, Director, Commercial Operations Revenue Entry Division, Office of Trade at otentrysummary@cbp.dhs.gov or to Ms. JoAnne Colonnello, Center

Director, Pharmaceuticals, Health, and Chemicals at
covid19_relief_import@cbp.dhs.gov.

For additional information please refer to [CSMS #42231420 - Launching of CBP's COVID-19 Updates and Announcements Webpage](#).

Great news!

Camilla – we are happy to say a few words briefly, but I don't expect we'll have much to say except for our gratitude to SBA for moving expeditiously and to the Delegation for their help on our declaration request. Up to you on whether it's worth us saying that or not.

Hello Casey,

Thanks for reaching out regarding our staff-level congressional call for Tuesday. I've been a bit slow getting out the invitation while I nail down a solid conference line.

I do expect to send out the agenda and invitation today, so great timing! Please let me know if you or Morgan would like to make opening remarks and I'll place you on the agenda.

Thanks so much,

Cam Rossie

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) weâ€™re hosting a Congressional Briefing for the WA delegation. From the feds, weâ€™ll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). Weâ€™d like to also include WA EMD (Dir Ezelle) and, if appropriate, the Govâ€™s office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBAâ€™s Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience,

weâ€™ve attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but Iâ€™ve attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBAâ€™s regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBAâ€™s regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. Itâ€™s also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDCâ€™s located in Lewiston and Coeur dâ€™Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis,

Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>

Â· We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>

- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

CISA_and_NCSC_Joint_Activity_Alert_-_COV ID-19_Exploited_by_Malicious_Cyber_Actors

April 08, 2020 at 11:29 AM EDT

To: tara.lee@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding a joint activity alert on COVID-19 exploitations by malicious cyber actors, found [here](#).

April 8 2020

CISA Alert

CISA and NCSC Joint Activity Alert - COVID-19 Exploited by Malicious Cyber Actors

Partners,

As the nation and the world continues to fight against this newest coronavirus, COVID-19 — the Cybersecurity and Infrastructure Security Agency (CISA) continues to monitor how the crisis is affecting the American public on the cybersecurity and infrastructure security front.

Today, CISA and United Kingdom's National Cyber Security Centre issued an activity alert titled, *COVID-19 Exploited by Malicious Cyber Actors*. This joint alert seeks to address the growing use of COVID-19-related themes by malicious cyber actors and it can be found here: <https://www.us-cert.gov/ncas/alerts/aa20-099a>.

CISA and NCSC see the surge of reporting about malicious cyber activity using COVID-19 to prey on people's goodwill, curiosity and concern, and exploit organizations that establish remote work options. Specifically, this alert discusses the exploitation of virtual private networks, phishing email and text messages about COVID-19, and websites deceptively advertised as COVID 19 sites.

We are sharing this information to help you and your team effectively assess your cybersecurity posture and ensure appropriate mitigation is in place. The alert provides many

resources to help detect and prevent COVID-19 malicious activity on your networks. Industry partners played a key role in helping CISA and NCSC teams determine which IOCs to include in this alert and they continue to be integral to CISA's mission as the nation's risk advisor.

We encourage you to share this alert with anyone who might be able to use it. We will continue to keep you updated as more information becomes available.

For authoritative information and resources on COVID-19 -- including situation reports, guidance, and more, visit the CDC's website and [CISA.gov/coronavirus](https://www.cisa.gov/coronavirus).

Thank you,
CISA

DHS Announcement: CISA Releases Guidance on Essential Critical Infrastructure Workers During COVID-19

March 19, 2020 at 4:08 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from Christopher Krebs, Director of the Cybersecurity and Infrastructure Security Agency (CISA), regarding the Identification of Essential Critical Infrastructure Workers During COVID-19, found [here](#).

March 19, 2020

CISA Releases Guidance on Essential Critical Infrastructure Workers During COVID-19

As the Nation comes together to slow the spread of COVID-19, on March 16, the President issued updated Coronavirus Guidance for America. This guidance states that:

“If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule.”

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security’s responsibilities as assigned under the Homeland Security Act of 2002 to provide strategic guidance, promote a national unity of effort, and coordinate the overall federal effort to ensure the security and resilience of the Nation’s critical infrastructure. CISA uses trusted partnerships with both the public and private sectors to deliver infrastructure resilience assistance and guidance to a broad range of partners.

In accordance with this mandate, and in collaboration with other federal agencies and the private sector, CISA developed an initial list of “Essential Critical Infrastructure Workers” to help State and local officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list can also inform critical infrastructure community decision-making to determine the sectors, sub-sectors, segments, or critical functions that should continue normal operations, appropriately modified to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

The list identifies workers who conduct a range of operations and services that are essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing management functions, among others. The industries they support represent, but are not

necessarily limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

We recognize that State, local, tribal, and territorial governments are ultimately in charge of implementing and executing response activities in communities under their jurisdiction, while the Federal Government is in a supporting role. As State and local communities consider COVID-19-related restrictions, CISA is offering this list to assist prioritizing activities related to continuity of operations and incident response, including the appropriate movement of critical infrastructure workers within and between jurisdictions.

Accordingly, this list is advisory in nature. It is not, nor should it be considered to be, a federal directive or standard in and of itself.

In addition, these identified sectors and workers are not intended to be the authoritative or exhaustive list of critical infrastructure sectors and functions that should continue during the COVID-19 response. Instead, State and local officials should use their own judgment in using their authorities and issuing implementation directives and guidance. Similarly, critical infrastructure industry partners will use their own judgment, informed by this list, to ensure continued operations of critical infrastructure services and functions. All decisions should appropriately balance public safety while ensuring the continued delivery of critical infrastructure services and functions.

CISA will continue to work with you and our partners in the critical infrastructure community to update this list as the Nation's response to COVID-19 evolves. We also encourage you to submit how you might use this list so that we can develop a repository of use cases for broad sharing across the country.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

For further information on the federal government's response to COVID-19,
please visit [Coronavirus.gov](https://www.coronavirus.gov).

Subject: Admiral Polowczyk

Hello Stacey,

During the Governor's Monday, April 13, 11:30 AM call with FEMA Region 10 Administrator, Mike O'Hare, the Regional Administrator promised to get back to the Governor about Admiral P's name.

It is Rear Admiral John P. Polowczyk (Pa-luf-check).

Please let me know if there is anything you need.

Thank you again for all of your help in setting up the call,

Betty

Acting_Secretary_Chad_Wolf_Statement_on_the_President's_Executive_Order_on_Duties_and_Fees_Deferment_for_Certain_Importers

April 20, 2020 at 9:51 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the President's Executive Order on Duties and Fees Deferment for Certain Importers

"I applaud the President for signing this [Executive Order](#), which gives the Administration the ability to help the trade community and U.S. businesses who keep critical supply chains for U.S. manufacturers moving during this unprecedented time. As we all know, the COVID-19 pandemic response has created serious economic issues for many American businesses. This President and this Department have, and always will, put the American worker first.

This EO will give the Administration the flexibility to allow importers who have faced a significant financial hardship during the COVID-19 response to defer the payment of certain duties, taxes, and fees for 90 days. This payment flexibility will be available only for importers with a significant financial hardship. Duties and fees associated with antidumping and countervailing duties (AD/CVD), and Section 201, 232 and 301. Trade Remedies are not included in this relief effort."

FEMA Advisory: COVID-19 Daily Briefing Points (April 23, 2020)

April 23, 2020 at 2:02 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 23, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- In order to help Americans, return to work, the federal government will distribute cloth facial coverings for critical infrastructure workers who do not need medical-grade personal protective equipment (PPE) for their daily work.
 - The facial coverings will be delivered in a phased approach for infrastructure workers, first responders and food producers. Prioritization will also be to areas with the highest COVID-19 infection rates.
 - Distribution will be based on the Cybersecurity and Infrastructure Security Agency's analysis of priority infrastructure sectors and will include food production and

distribution, energy, water and wastewater treatment, essential transportation and logistics, first responders, communications, hazardous materials management, manufacturing of medical supplies, and sanitation and disinfection supplies.

- The first phase includes distribution of more than 19 million facial coverings.
- HHS anticipates production of 6.5 million facial coverings each week for the next month.
- As of **April 22**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 96.9 million surgical masks, 6.6 million face shields, 13.8 million surgical gowns, 727 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.69 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

US-Mexico-Canada Travel Restrictions

Decisive action taken today will protect Americans, slow the spread of the virus, and help save lives:

- The United States is cooperating closely with Canada and Mexico to ensure that North America has a coordinated approach to combating the pandemic caused by the coronavirus.
- The United States and Canada have agreed to restrict travel at our land border to essential travel only.
- Similarly, the United States and Mexico are finalizing an agreement that will facilitate only essential travel at our southern border.

We are maintaining cross-border activities with Canada and Mexico that support health security, trade, commerce, supply security, and other essential activities while taking critical steps to protect our citizens and to curb spread of the virus.

For more information on these measures please visit the [White House fact sheet](#).

Acting_Secretary_Chad_Wolf_Statement_on_the_REAL_ID_Enforcement_Deadline

March 26, 2020 at 11:21 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the REAL ID Enforcement Deadline

“Due to circumstances resulting from the COVID-19 pandemic and the national emergency declaration, the Department of Homeland Security, as directed by President Donald J. Trump, is extending the REAL ID enforcement deadline beyond the current October 1, 2020 deadline. I have determined that states require a twelve-month delay and that the new deadline for REAL ID enforcement is October 1, 2021. DHS will publish a notice of the new deadline in the Federal Register in the coming days.

“The federal, state and local response to the spread of the Coronavirus here in the United States necessitates a delay in this deadline. Our state and local partners are working tirelessly with the Administration to flatten the curve and, therefore, we want to remove any impediments to response and recovery efforts. States across the country are temporarily closing or restricting access to DMVs. This action will preclude millions of people from applying for and receiving their REAL ID. Extending the deadline will also allow the Department to work with Congress to implement needed changes to expedite the issuance of REAL IDs once the current health crisis concludes.

“Protecting both the health and national security of the American people continues to be the top priority for the President of the United States and the Department of Homeland Security.”

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 7, 2020)

April 07, 2020 at 4:31 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 7, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services (HHS) Response; FEMA Response Capacity; Strategic National Stockpile; CDC Public Guidance; CDC Respirator Guidance; Hydroxychloroquine/ Chloroquine; FDA Ventilator Guidance; National Guard Activation (Title 32); Community-Based Testing Sites; Defense Production Act; and Other Federal Response.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On **March 31**, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people are critical in the campaign to slow the virus' spread and keep high-risk populations safe.
 - For updates and information on how to protect yourself, visit www.coronavirus.gov.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - While FEMA schedules daily flights, it does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 6**, 13 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Seven flights are scheduled to arrive today, 6 in Chicago and 1 in Los Angeles. This is the greatest number of air bridge flights in a single day since the start of the program.

- An additional 72 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.
- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- As of **April 6**, FEMA and HHS have provided or are currently shipping, 8,920 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (1,350), New York (4,400), Oregon (140), and Washington (500).
 - Governor Brown of Oregon sent the state's 140 ventilators directly to New York; and,
 - Governor Inslee of Washington is returning 400 of the state's 500 ventilators to the SNS to be deployed to areas of greatest need.
 - Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 250-bed Federal Medical Station for the Metro D.C. area.
- Forty states, four territories and 24 tribes have issued stay-at-home orders.

Administrator_Gaynor_Sends_Letter_to_Emergency_Managers

March 27, 2020 at 1:31 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on COVID-19.

FEMA

March 27, 2020

Administrator Gaynor Sends Letter to Emergency Managers

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. Today, Administrator Gaynor sent the following letter to emergency managers outlining critical steps to help the nation respond to COVID-19:

Fellow Emergency Managers,

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. I thank you for your tireless efforts under these unprecedented and very demanding circumstances.

I write to you today as the Administrator of FEMA and a former state and local emergency manager. Now more than ever, we must work as a team to deliver locally executed, state-managed, and federally supported solutions on behalf of the American people. The best and the brightest emergency managers, public health officials, private industry partners, scientists, and medical doctors and nurses are assembling at FEMA Headquarters and in our regional offices; in your state and local emergency operations centers; and in hospital operations centers across the country. This is truly a whole-of-nation response. Rest assured, the full weight of our Nation is supporting all of us to overcome the pandemic and I have no doubt that we will be successful in defeating the spread of COVID-19.

To be successful across the nation – from the smallest town, tribal nation, island, and to the largest city – we must act decisively and immediately. Today, many of you are at the center of the battle, in places like New York, Washington, California, and Louisiana. Others of you may only have a few cases. It is our collective responsibility to do our very best today, so we can continue to blunt the spread of COVID-19. If you have excess capacity, please consider using EMAC to offer resources that your peers from around the country may need.

As the Nation's lead emergency manager, I want to be completely transparent about our national response and your responsibility to respond proactively and aggressively. To that point, I would like to share seven critical steps that I ask you to **immediately** consider and act upon.

First, mitigation works. Ensure you preserve your “force” while maintaining the ability to respond in a COVID-19 degraded environment without access to the tools typically used in an emergency or disaster like mutual aid and EMAC. Ensure that your communities, small or large embrace mitigation efforts. Every American has a role to play in defeating COVID-19, including good hygiene and social distancing. Follow the President's [15 Days to Slow the Spread](#).

Second, integrate all emergency management and public health operations. Identify and integrate your leading health official into your Emergency Operations Center and Unified Command Group at every level of government. You must form a unified Emergency Management – Public Health Team. Ensure that the entire state political leadership team understand the emergency management process. All requests to the Federal government must be formally communicated by the state's emergency manager to the FEMA Regional Administrator. This is the same process as natural disasters.

Third, collect public, private, and government hospital bed capacity data, if you haven't already – total beds, acute care beds, normal occupancy, predicted surge occupancy. This data will assist you in crafting requests for high demand, low density critical resources should the time come that you may need it. We must use all data wherever possible to allocate scarce resources, including consideration of population size, demographics, and vulnerability.

Fourth, actively plan to stand-up Alternate Care Sites. Be creative in identifying facilities that can support low acuity patients and require a minimal amount of medical staff, already in short supply. Consider locations such as convention centers, hotels, shuttered hospitals, college or university dormitories, or vacant open space in commercial buildings. Ask your FEMA Regional Administrator to brief you on the US Army Corps of Engineers “Hotel to Healthcare” initiative. If you need a plan, here is a [link](#) to a plan.

Fifth, maintain situational awareness of ventilators that may be used across your area. Check hospitals, acute care sites, outpatient locations, and any other location that may use these devices, especially those that may be a source for reallocation to an area of greater need. Like hospital bed capacity, this data will help you understand what you have and what you may need, informing your resource management strategy for these high

demand, low density critical resources should the time come that you may need it. Just as we are moving resources nationally, you should also be moving resources within your state.

Sixth, identify all sources to surge medical professionals. Look for retirees, medical contract services, nurses, respiratory therapists, medical students, and emergency medical technicians or local equivalents. You will need them to support the increased hospital surge and management of patients on ventilators and you should be cataloging and training them now, as appropriate.

Seventh, manage Personal Protective Equipment (PPE) carefully. We have stood-up the *Supply Chain Stabilization Task Force* within FEMA with the purpose of increasing the flow of critical medical supplies such as N95 masks, surgical masks, and ventilators. We are using four guiding principles: 1) preserve what we have; 2) locate medical stockpile around the globe; 3) distribute them to locations most in need; and 4) build capacity in America through partners with industry. While some of these strategies will yield near-term benefits, it must be your highest priority to carefully manage what you have available to you now.

To help you with this, the CDC produced a [Personal Protective Equipment \(PPE\) Burn Rate Calculator](#). This spreadsheet-based model provides information for healthcare facilities to plan and optimize the use of PPE for response to COVID-19. Similarly, non-healthcare facilities (e.g., correctional facilities) may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

FEMA will reimburse all eligible expenses for emergency protective measures under the Stafford Act; however, do not wait for the PPE from the Federal government to show-up. Take aggressive action now to source your own. Because of the actions the Administration and federal government is taking, you will begin to see PPE supplies come online in the weeks ahead as the commercial distribution chain adapts as well as the quantities of shipments from the Strategic National Stockpile continue to move. Continue to be resourceful, ask the building trades to donate PPE or that they allow you access to their supplier; and, ask dental and outpatient offices that are closed to donate PPE to local hospitals and care critical care sites. And finally, I ask you to review and utilize the guidance the *Supply Chain Stabilization Task Force* released regarding guidance for PPE.

Lastly, some [external communication](#) resources that may be helpful:

- **[Best Practices](#):** This page provides a platform for sharing best practices and lessons learned by the government, private sector, academic institutions, professional associations, and other organizations to support the whole of community response.
- **[Rumor Control](#):** This page is to help the public distinguish between rumors and facts regarding the response to COVID-19.
- **[How to Help](#):** This page provides guidance on how to **donate** critical resources & supplies; how to **do business** with FEMA; and, how to **volunteer**.

These are unprecedented times and many lives are potentially at stake. We are doing things many of us have never imagined, especially at this scale. As professional emergency managers, we are built for this – this is what we do best; coordinate, problem-solve, and act. I ask all of you to lead, innovate, and be resourceful. This is a whole of nation response and I need every emergency manager to be an active participant.

We are emergency managers and America needs us at our best.

Respectfully,

Pete Gaynor
Administrator

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the ventilator request process in effect for COVID-19 response.

For more information from FEMA, please visit: [FEMA.gov/Coronavirus](https://www.fema.gov/coronavirus)

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic - Ventilator Request

Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted the process below to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis. In the case of ventilators, immediate is defined as requirements necessary to sustain life within a 72-hour window.

To submit a request, states and tribes will work through their FEMA/ HHS regional leadership. In order for a request to be processed, the state/tribe must provide detailed responses to the following five questions:

1. How many usable ventilators, ICU beds, and convertible ventilators are currently available within the state or tribe?
2. What is the current hospital bed and ICU bed occupancy rate in the state/tribe?
3. How many new ICU beds does the state/tribe estimate it can stand-up **and** the number of ventilators, or FDA-approved [ventilator alternatives](#), it can or is standing up?
4. What is the decompression ability of hospitals in the state/tribe (i.e.: are there currently field hospitals or alternate care facilities established)?
5. How many anesthesia machines are in the state/tribe **and** have they been converted?

Once the requesting state or tribe provides the FEMA/ HHS Region with the answers to these five questions, then the requirement is validated at the Regional level and forwarded to FEMA's National Response Coordination Center (NRCC) for processing.

At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.

In addition to submitting requests through this process, state, and tribal officials are encouraged to share the FDA's [Emergency Use Authorization \(EUA\) for Ventilators](#) issued on March 24. The EUA allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The EUA also provides guidance to assist health care personnel on use of other ventilators like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing resources to reopen safely and responsibly.
- As of April 18, FEMA, HHS, and the private sector combined have coordinated the

delivery of or are currently shipping: 55.8 million N95 respirators, 77.1 million surgical masks, 6.1 million face shields, 11.4 million surgical gowns, 564 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On April 17, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- The U.S. Department of Agriculture announced the [Coronavirus Food Assistance Program \(CFAP\)](#), an immediate relief program that provides \$19 billion in support to farmers and ranchers, maintains the integrity of our food supply chain and ensures access to food for those in need.
 - Direct support to farmers and ranchers provides \$16 billion based on actual losses for agricultural producers.
 - USDA will partner with regional and local distributors to purchase \$3 billion in fresh produce, dairy and meat products. The distributors and wholesalers will provide these items to food banks, community and faith-based organizations and other non-profits serving people in need.

Office of Intergovernmental Affairs

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a [Notice of Arrival Restrictions](#) outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best

practices.

“While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.,” said Acting Secretary Wolf. “To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them.”

Wolf continued: “I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities.”

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th [presidential proclamation](#) which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 22, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical

distributors in various locations across the U.S. through [Project Airbridge](#).

- The U.S. has now processed 4.4 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

DHS_Announces_\$10_Million_in_FY20_Funding_Availability_for
_Targeted_Violence_and_Terrorism_Prevention_Grant_Programs

April 21, 2020 at 9:47 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

**DHS Makes \$10 Million in Funding Available for
Targeted Violence and Terrorism Prevention Grants**

WASHINGTON – The Department of Homeland Security (DHS) is making \$10 million available to help local communities more effectively combat terrorism and targeted violence across the United States. The \$10 million appropriated by Congress under the Fiscal Year 2020 Targeted Violence and Terrorism Prevention (TVTP) Grant Program will support the development of a nationwide terrorism and targeted violence prevention framework. DHS strongly encourages all eligible entities to apply for this funding opportunity to build capabilities in their communities and online.

“Attacks by domestic terrorists, those inspired by foreign terrorist organizations, and acts committed by violent individuals with no clear ideological motivation have occurred in communities across America with tragic outcomes,” said Acting Secretary of Homeland Security Chad F. Wolf. “These grants will improve local communities’ ability to prevent individuals from mobilizing or radicalizing to violence and create locally-based prevention frameworks to address these emerging threats.”

The TVTP Grant Program helps DHS to fulfill its commitment to addressing the threat posed by terrorism and targeted violence at home and builds on the promising practices identified in previous grant programs. It is the only federal grant program dedicated to enhancing prevention capabilities in local communities. In its first year, the TVTP Grant Program has three priorities: (1) establishing and enhancing local prevention frameworks with an emphasis on threat assessment and management capabilities; (2) preventing domestic terrorism; and (3) finding innovative solutions for preventing targeted violence and terrorism.

“I want to thank Congress for funding for this mission in a bipartisan way over the last few years, most recently and most significantly, in the Fiscal Year 2020 Appropriations Act. We look forward to working with Congress to continue to advance this effort.” Wolf continued.

Eligible activities under the TVTP Grant Program cover all aspects of prevention, including building resilience, intervention, recidivism prevention, and reintegration programs at the local level. The program directly supports the objectives of the [DHS Strategic Framework for Countering Terrorism and Targeted Violence](#), which DHS released in September 2019. Making these funds available for local prevention partners is a key milestone in the implementation of the Strategic Framework.

TVTP Grant Program funds will support the development of local prevention capabilities at a time when DHS is observing an uptick in online efforts for terrorism recruitment and

radicalization from a variety of sectors. DHS is committed to expanding the program and the President has requested an additional \$20 million for TVTP grant funds next fiscal year.

The application period will close on May 29, 2020. Applicants should consult the [Notice of Funding Opportunity](#) for more specific information about the process. Applying for this grant is a multi-step process and it is recommended that applicants begin that process early in order to allow sufficient time to complete the interim steps.

For more information, please see the TVTP Grant Program site at <https://www.dhs.gov/tvtpgrants>.

Acting_Secretary_Chad_Wolf_Statement_on_the_REAL_ID_Enforcement_Deadline

March 26, 2020 at 11:21 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the REAL ID Enforcement Deadline

“Due to circumstances resulting from the COVID-19 pandemic and the national emergency declaration, the Department of Homeland Security, as directed by President Donald J. Trump, is extending the REAL ID enforcement deadline beyond the current October 1, 2020 deadline. I have determined that states require a twelve-month delay and that the new deadline for REAL ID enforcement is October 1, 2021. DHS will publish a notice of the new deadline in the Federal Register in the coming days.

“The federal, state and local response to the spread of the Coronavirus here in the United States necessitates a delay in this deadline. Our state and local partners are working tirelessly with the Administration to flatten the curve and, therefore, we want to remove any impediments to response and recovery efforts. States across the country are temporarily closing or restricting access to DMVs. This action will preclude millions of people from applying for and receiving their REAL ID. Extending the deadline will also allow the Department to work with Congress to implement needed changes to expedite the issuance of REAL IDs once the current health crisis concludes.

“Protecting both the health and national security of the American people continues to be the top priority for the President of the United States and the Department of Homeland Security.”

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_4

April 04, 2020 at 1:25 PM EDT

To: tara.lee@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 4, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement

- actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- As of April 3, FEMA and HHS have delivered ventilators from the Strategic National

Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).

- Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
- On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
- Forty states, four territories and 12 tribes have issued stay at home orders.

FEMA Advisory: FY2020 Emergency Management Performance Grant Program Supplemental Funding

April 13, 2020 at 8:54 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 13, 2020

FEMA FY2020 Emergency Management Performance Grant Program Supplemental Funding

The Department of Homeland Security (DHS) and FEMA are announcing the release of the Notice of Funding Opportunity and Final Allocations for the \$100 million in supplemental funding made available to the Emergency Management Performance Grant Program (EMPG) under the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

Topline messaging includes:

- The EMPG Supplemental, (or EMPG-S), program is authorized by CARES Act, Div. B (Pub. L. No. 116-136) and the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Pub. L. No. 93-288. Under the EMPG Program FEMA is authorized to make grants for the purpose of providing a system of emergency preparedness for the protection of life and property in the United States from hazards and to vest responsibility for emergency preparedness jointly in the federal government and the states and their political subdivisions. Under EMPG, grants are awarded to the 56 states and territories. The states and territories make subawards to local and tribal governments.
- The FY 2020 EMPG-S program assists states, local governments, tribes and territories with their public health and emergency management activities supporting the prevention of, preparation for and response to the ongoing Coronavirus Disease 2019 (COVID-19) public health emergency. Through this funding opportunity, FEMA will award funding to support planning and operational readiness for COVID-19 preparedness and response, as well as the development of tools and strategies for prevention, preparedness, and response, and ensure ongoing communication and coordination among federal, state, local, tribal and territorial partners throughout the response.
- Funding awarded under the EMPG-S program is separate and distinct from any funding that will be awarded under the FY 2020 EMPG Program NOFO published on Feb. 14, 2020.
- The attached Information Bulletin and Fact Sheet provide further details as well as final

allocations for the 56 states and territories.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the attached letter and FAQs sent by Health and Human Services (HHS) Secretary Azar to hospital administrators.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: HHS Letter to Hospital Administrators

To follow-up on his letter from March 29, 2020, Secretary Azar just sent the attached letter and Frequently Asked Questions (FAQ) to hospital administrators across the country. Today's letter underscores the importance of data-sharing and highlights that hospitals are key partners with the Federal Government as we work to ensure that the Whole of America response to COVID-19. The data requested included daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.

The FAQ attachment to the letter details the federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information. Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them. These FAQs will be updated if additional data delivery methods become available.

It remains critical that all requested information listed in the FAQ is provided daily to the federal government to facilitate planning, monitoring, and resource allocation in response to COVID-19.

Coronavirus_(COVID-19)_Pandemic:_W hole-of-America_Response_-_April_24

April 24, 2020 at 2:15 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 24, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 22**, HHS launched [Telehealth.hhs.gov](#). The site is a central source of information on telehealth resources and tools for patients and providers.
 - In his blog post "[Health Providers: Join the Telehealth Revolution](#)," the Surgeon General of the United States, Vice Admiral Jerome M. Adams M.D.,

- M.P.H., outlines the benefits of using telemedicine tools.
- Working from the safety of home, these tools allow clinicians to perform virtual visits, refill and adjust essential medications, and modify treatments that will preserve and improve conditions that if left untreated, put patients at risk.
- As of **April 23**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 105 million surgical masks, 6.7 million face shields, 14.9 million surgical gowns, 747 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - The U.S. has now processed 4.9 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Subject: Public info ad campaign options

Good evening, Robert –

My notes about who else to send this info to is at my JIC desk, unfortunately, so I'm just sending to you for now.

Attached are two documents.

The word document is the initial draft of what the campaign might look like. It's draft and was created prior to getting a budget put together so our ultimate campaign may not include all the elements but it gives you a sense of the messaging and targeting.

The excel sheet details four options for the team's consideration. We highly recommend the third or fourth options because they ensure the most impressions and because we anticipate needing to communicate to seniors and the public over the next several weeks. We do not recommend investing heavily in radio because as more people choose to stay home, TV is overcoming radio. Some of these costs could come down if we're able to get networks to donate air time.

- \$100k campaign = two-weeks of digital and multicultural advertising
- \$250k campaign = three weeks of digital, online news and multicultural advertising
- \$500k 8-week campaign = the above plus cable and local news advertising
- \$1M 10-week campaign = the above plus expanded TV advertising and some rural radio

These estimates do not include some of the digital and social media we will do in-house and amplify through an extensive network of partners who have agreed to help amplify messaging through their

own social media, newsletters, etc. Here are the partners who have committed to helping communicate to their members and networks:

State Ombuds
State Council on Aging
Adult Family Home Council
Washington Health Care Association (Assisted Living and NF associations)
Retired Public Employees of WA
Mobile Home Parks Associations
W4A
Alzheimers Association
AARP
ARCORA (delta dental)
Catholic Community Services
Senior Services for South Sound
Columbia Legal Services
Disability Rights WA
Hearing Loss Association
Keiser Permanente
Home Care Associations of WA
Elder Law
Washington Association of Professional Guardians
Washington State Associations of Senior Centers
Washington State Hospice and Palliative Care Organization

Happy to answer questions. I have additional back-up documentation from the marketing firm HCA contracts with that put the numbers together but it's not helpful for purposes of decision-making. If we decide to pursue one of these options, HCA and DOH can compile a detailed outline of the budget + deliverables.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing

resources to reopen safely and responsibly.

- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to

- local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
- Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.
 - Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state's entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- * FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people
- * FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- * Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.

-- Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.

--This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.

* The White House announced [a new collaboration by Schema.org](#) to help Americans find the most up-to-date public health guidance and the most relevant information on testing facilities in their communities

--Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.

--All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

Strategies_for_Addressing_Personal_Protective_Equipment_(PPE)_Shortage

April 14, 2020 at 9:16 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding strategies for addressing Personal Protective Equipment (PPE) shortages.

April 14, 2020

CISA Advisory

Strategies for Addressing Personal Protective Equipment (PPE) Shortage

The U.S. government's strategy for addressing COVID-19 personal protective equipment (PPE) shortages relies on three pillars of practice to ensure continued availability of protective gear: reduce – reuse – repurpose. In this time of the COVID-19 pandemic and the associated PPE shortages, implementation of contingency plans across all sectors are necessary to ensure continued availability of protective gear. In support of this strategy, the U.S. government has recently released two documents that will be of assistance to all infrastructure sectors.

FEMA has published the attached *COVID-19 Pandemic: Personal Protective Equipment Preservation Best Practices*. This document summarizes government guidance and best practices currently being implemented across the United States for COVID-19 response has been released. While tailored to the Healthcare Sector, many of these strategies can be applied to other sectors with similar PPE requirements.

NIOSH has recently issued [Interim Guidance for Conserving and Extending Filtering Facepiece Respirator Supply in Non-Healthcare Sectors](#). That document offers strategies to conserve, extend, and respond to shortages in the supply of NIOSH-approved filtering facepiece respirators (FFRs) used in non-healthcare worksites such as manufacturing and construction. Employers should implement alternative controls to reduce, as much as possible, their reliance on PPE, particularly FFRs.

Please continue to refer to CDC for updates to posted guidance for businesses and employers to plan and respond to COVID-19: <https://www.cdc.gov/coronavirus/2019->

[ncov/guidance-business-response.html](https://www.fda.gov/ncov/guidance-business-response.html). For general and other useful information regarding COVID-19, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. Information on FEMA's efforts to stabilize the PPE supply chain can be found at: <https://www.fema.gov/news-release/2020/04/08/fema-covid-19-supply-chain-task-force-supply-chain-stabilization>.

Respectfully,
Cybersecurity and Infrastructure Security Agency

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photos.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.
- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW)

beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) â€” Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via WebEx [LINK].

TBD will serve as the print pool and TBD will serve as the TV pool.

WHO: Governor Jay Inslee, King County Executive Dow Constantine, Mayor Jenny A. Durkan, FEMA Region 10 Administrator Mike Oâ€™Hare, and Brigadier General Doug Cherry

WHEN: Saturday, March 28, 1:30 p.m.

WHERE: CenturyLink Field Event Center, 800 Occidental Ave S. in Seattle, WA

Subject: Press Conference Tomorrow at 1:30 pm

Hi all – Thanks for everyone’s help to get the release out earlier. I wanted to loop back on logistics for tomorrow’s press conference.

Time

- Press Conference: 1:30 pm at the CenturyLink Event Center, 800 Occidental Ave S. in Seattle, WA

Attendees/Speakers

- Governor Jay Inslee
- King County Executive Dow Constantine
- Seattle Mayor Jenny Durkan
- FEMA Region 10 Administrator Mike O’Hare
- TBD Army
- Q&A

Advisory

- See below. We will send at 9:00 am on Saturday, March 28

On Site:

- Podium/Flags will be provided by the City.
- DOD “ Let us know if there may be any supplies that may be able to be moved on site.

Pool: City will organize a pool

- Print Pool (ST/AP)
- Still photog (ST)
- TV Pool (Will work with News Directors)
- Seattle Channel (to cross post w/ TVW)

Technology

- WebEx: City and Governor’s Office are connecting to provide Q&A for reporters not in the pool

Key Messages

- Important Resources for Our Hospitals “ Partnership to make this a reality
- Staffed with Army doctors and nurses for Non-COVID-19 with ER, X-Ray, and other medical uses
- Construction will begin soon + Seattle may see additional US Army personnel in the area

Staff:

- MO: Anthony Derrick: 260-247-2741
- Stephanie: 206-247-0475

Federal_Partners_Continue_Providing_Resources_for_COVID-19_Response_Efforts

March 25, 2020 at 12:56 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 25, 2020

FEMA Advisory

Federal Partners Continue Providing Resources for COVID-19 Response Efforts

The federal government continues to take aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, more than 9,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington, California, Iowa and Louisiana were approved for major disaster declarations to assist with additional needs identified in these states.

11 states and 4 tribes have issued full stay-at-home orders; in addition, 5 states have issued partial or localized orders.

Medical supplies are en route to states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington, New York and California. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff and is expected to arrive by March 27. The U.S. Navy hospital ship Comfort is scheduled to arrive in New York on April 7. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_20

April 20, 2020 at 4:52 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 20, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 19**, FEMA, HHS, and the private sector combined have coordinated the delivery of, or are currently shipping: 57.4 million N95 respirators, 77.9 million surgical masks, 6.2 million face shields, 11.9 million surgical gowns, 587 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and

- commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA from April 1st – 14th through Project Airbridge and the commercial supply network.
 - The U.S. has now tested 4.18 million people, which is more total tests than the following nations combined: France, the United Kingdom, South Korea, Japan, Singapore, India, Austria, Australia, Sweden, and Canada.
 - As conveyed by Dr. Anthony Fauci and Admiral Brett Giroir, there is enough testing capacity for states to move into phase one of reopening when they choose to do so.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - President Trump and Vice President Pence are working closely with Governors to review what more they can do to develop locally tailored testing strategies.
 - HHS and FEMA continue to provide federal support to state run testing.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - FEMA and HHS have centralized best practices and lessons learned to help medical practitioners, emergency managers, and other stakeholders learn from each other's approaches.
 - The [FEMA Coronavirus Emergency Management Best Practices](#) page contains resources for all levels of government, private sector, academic institutions, professional associations, and other organizations responding to the pandemic.
 - HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.4 million samples, which is more total tests than the

following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.

- States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
- HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
- Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

FEMA Advisory: COVID-19 Daily Briefing Points (April 19, 2020)

April 19, 2020 at 12:31 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 19, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing resources to reopen safely and responsibly.
- As of **April 18**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55.8 million N95 respirators, 77.1 million surgical masks, 6.1 million face shields, 11.4 million surgical gowns, 564 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- The U.S. Department of Agriculture announced the [Coronavirus Food Assistance Program \(CFAP\)](#), an immediate relief program that provides \$19 billion in support to farmers and ranchers, maintains the integrity of our food supply chain and ensures access to food for those in need.
 - Direct support to farmers and ranchers provides \$16 billion based on actual losses for agricultural producers.
 - USDA will partner with regional and local distributors to purchase \$3 billion in fresh produce, dairy and meat products. The distributors and wholesalers will provide these items to food banks, community and faith-based organizations and other non-profits serving people in need.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a [Notice of Arrival Restrictions](#) outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best

practices.

“While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.,” said Acting Secretary Wolf. “To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them.”

Wolf continued: “I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities.”

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th [presidential proclamation](#) which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

For further information, please visit [Coronavirus.gov](#) or [DHS.gov/Coronavirus](#).

FEMA_and_Our_Partners_Continue_to_Support_State-Managed_Coronavirus_Response

March 27, 2020 at 12:14 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of

California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 24, 2020

April 24, 2020 at 10:48 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 24, 2020

SUMMARY

- Idaho Governor Brad Little announced Idaho Rebounds, with stages to reopen Idaho.
- Despite news of outbreaks in some rural Washington counties, many local leaders still call for economic reopening.
- Alaska Governor Mike Dunleavy announced more guidance for the first phase of reopening, starting today, April 24th.
- Oregon's governor will allow healthcare providers to resume non-urgent procedures beginning May 1.
- Treatments and vaccines for COVID-19 quickly became a top topic of conversation in the region following yesterday's White House Briefing. Many are discussing statements made about the use of disinfectants, while public health experts and manufacturers are messaging about the safe use of disinfectant products.

Public Sentiment

- Economic concerns continue to drive Washington residents to call for a reopening of businesses—especially small businesses and those in rural areas.
- While some question the details of the plan to reopen in Idaho—why can churches open before salons, or why businesses cannot open sooner—many feel that a staged approach is a good approach.
- Alaskans are encouraged by the steps to reopen but confused over whether to follow the state's reopening plan that begins today or the Anchorage plan which follows on Monday, April 27th.
- Oregonians are encouraged by the first step in easing restrictions, and by local efforts to help their communities.

Washington

Updates from the Governor

- Inslee extends 20 proclamations relating to COVID-19. The proclamations include orders relating to [long-term care](#), relief from various penalties and fees, telemedicine, healthcare worker licensing, and other emergency measures that will be extended until early May. ([KNDU25](#))

Tension over the "Stay Home, Stay Healthy" order

- Franklin County commissioners have rescinded a controversial resolution allowing businesses to reopen. ([Seattle Times](#), [Q13](#)) Many people are disappointed to hear this, and continue expressing worries over the shuttered economy. ([example 1](#), [example 2](#))
- Walla Walla County Sheriff issued a statement asking county commissioners to reopen the economy. Walla Walla neighbors Franklin County. ([KIMA](#), [Union-Bulletin](#)) Many people are responding that the Sheriff does not have the right to flout state law, and ought to follow guidance from health professionals. Still, many support opening up the economy. ([example 1](#), [example 2](#))
- Chewelah mayor asks governor to start reopening businesses. "It is becoming apparent that if we want to save our local economy, we must take steps to reopen" she wrote the governor. "Many businesses are struggling to survive." ([The Independent](#))
- Yakima County commissioner wants businesses to reopen. ([KIMA](#)) Many responses to the local media report have supported the mayor's perspective. They cite big companies in urban areas that have opened and wonder why small businesses in rural areas are prohibited. ([example](#))
- Some Spokane residents held a "Let Us Fish" protest on Wednesday. ([The Reflector](#))

New Cases

- Coronavirus death toll tops 700 in Washington. ([KOMO](#))
- Yakima County has highest rate of COVID-19 cases in Washington, double the state rate. ([YakimaHerald](#)) The governor says he has not decided yet [whether the former Astria Regional Medical Center will be used](#) to isolate COVID-19 positive patients.
 - In response, some people disagree with how the numbers are reported—assuming the high rate is because the county is doing more testing, or that the number need to subtract the many who have recovered—while others comment on the lack of social distancing observed in the county. ([example](#))

Food Security

- Tyson meat plant in Walla Walla will close due to coronavirus outbreak. ([KOMO](#), [KING5](#), [KREM2](#)) [1,400 workers from the plant](#) will be tested.

Contact Tracing

- University of Washington and Microsoft release a coronavirus contact-tracing app. It's designed to alert people who may have come in contact with the virus while keeping their identity anonymous. ([KING5](#)) In response, people are very worried about privacy. ([example](#))

Testing

- COVID-19 antibody tests are available in Seattle, but patients have been told otherwise. Officials are urging people to allow providers some time to coordinate the logistics of ordering the tests. ([KUOW](#))

Prisoner Release

- Washington Supreme Court denies request to release thousands of inmates to curb coronavirus. The court ruled against a lawsuit filed by five inmates, claiming that the state's planned release of 1,000 inmates is not enough. ([KING5](#), [KOMO](#), [KIRO7](#), [KHO](#), [Q13](#)) Reaction is overwhelmingly supportive of the court's decision. ([example 1](#), [example 2](#), [example 3](#), [example 4](#))
- Early inmate release is a 'kick in the gut' for Chehalis burglary victim. ([KING5](#))

Social Distancing

- New study uses cellphone data to track how many Thurston County residents are staying home to fight coronavirus. ([The Olympian](#))
- Fear and apprehension in Pacific County over coronavirus: 'If you live in Seattle, stay in Seattle.' ([Seattle Times](#))

Community Impact

- Microsoft co-founder Bill Gates published an 11-page memo outlining his ideas on how best to tackle the disease. 'It is impossible to overstate the pain': Fight against coronavirus will define our era, he says. ([Seattle Times](#))

Thanking the Frontlines

- The Blue Angels and Thunderbirds are doing flyovers to thank first responders battling coronavirus pandemic. Planned cities include Seattle and Portland. ([KIRO 7](#))

Reopening

- Oregon Gov. Kate Brown lifts ban on elective surgeries. ([FOX 12](#), [Willamette Week](#), [KATU 2](#), [KOIN](#), [KGW 8](#)) Most people are encouraged with this news. Several commented about how to manage childcare and schooling. ([example](#))
- Douglas County commissioners draft letter to Gov. Brown about soft reopening. ([KATU 2](#))

Federal Response

- Oregon to get 'large shipment' of PPE, Battelle cleaning machine Gov. Brown says. ([KATU 2](#))
- Oregon CARES recipients ask: Where's my money? ([KOIN](#))
- While Oregon State University's pilot project of door-to-door testing continues, Corvallis officials are looking for reimbursement from FEMA. ([Corvallis Gazette-Times](#))

Economy

- Another 36,700 Oregonians filed for unemployment benefits last week. ([KGW8](#))
- Some art shows are moving online, as art communities have been hurt by social distancing. ([News Times](#), [Mail Tribune](#))

Flattening the Curve

- Beaverton School District partners to host COVID-19 drive-thru testing site. ([KPTV 12](#))
- An Oregon high school student is making clear face masks so the hearing-impaired can be safe during coronavirus crisis. ([The Oregonian](#)) Responses are very supportive ([example 1](#)), with some mentions of another example of a creative solution for an employee that relies on lip reading. ([Oregon Daily News](#))

New Cases

- Here are the Oregon counties that have no confirmed coronavirus illness so far. ([The Oregonian](#))

Idaho

Re-opening in Stages

- UPDATE: Little sets 4-stage plan to reopen Idaho businesses over 2 months by end of June. ([East Idaho News](#))
 - Many feel that churches should not be among the places that reopen first. ([example](#))
- When you can go back to the office, the gym, the bar: Little's 4-step plan for Idaho. ([Idaho Statesman](#))
- Gov. Little announced staged reopening process is underway in Idaho. ([Idaho News 6](#))
 - People ask why churches are opening before gyms. People support the governor's phased approach. ([example](#))
- Little: Re-opening starts May 1 - Idaho Rebounds - Our Path to Prosperity. ([Coeur D'Alene Press](#))
- Gov. Brad Little announces plan to reopen state by June. ([KMVT 11](#))
 - While some want businesses to reopen as soon as possible, others feel that it may be too soon and that coronavirus cases could increase. ([example](#))
- Gov. Brad Little, and Darrel Anderson, chair of the Economic Recovery Working Group participate in live Coronavirus Q&A. ([Idaho Public Television Facebook](#)) Reactions vary with folks asking about different components of the phased approach. Many appreciate that it is gradual. Some feel that business must resume as quickly as possible.
- Idaho Rebounds receives a shout out from the White House. ([Governor Brad Little Facebook](#))

Testing

- Meridian Rite Aid to offer self-swab COVID-19 testing; accuracy of method questioned. ([Meridian Press](#))

School

- Idaho district to graduate seniors at drive-in theater. ([Idaho News 2](#))

Alaska

Reopening

- During the daily press conference on Thursday evening, the governor stressed that his office has been working with the communities throughout the state and views reopening as a collaborative approach. Phase one of Alaska's [reopening plan](#) will start tomorrow, April 24th. Anchorage's plan will begin on Monday, April 27th. While cases continue to trend down, the state expects to see more cases as testing continues. The Governor encouraged Alaskan's to get outdoors during this time, easing restrictions on fishing charters and in-state travel. ([Governor Dunleavy's Facebook](#),

[KTUU](#))

- Reception was generally mixed and a few questioned how the differences in the state reopening and Anchorage reopening worked and which to follow. ([example](#))
- Questions about local control linger as Alaska adjusts health mandate on reopening. ([Alaska Daily News](#))
- A new model released by the University of Washington show's that the earliest date Alaska could safely start reopening is May 4th. This is one of several models. ([KTUU](#))

Alaska Native Villages and Tribes

- In court documents released Thursday, the U.S. Treasury Department has taken the position that Alaska Native Corporations are eligible for CARES act funding ([KTVA](#)).
- Bristol Bay Native Corporation, the corporation for BBNA which consists of 31 tribes, has released a [new website](#) for its members to find information and resources for the coronavirus. ([Facebook](#))

Flattening the Curve

- New DHSS graph shows Alaska may be flattening the curve, 2 new cases announced. ([KTUU](#))

Economy

- Food pantries report surge in demand as more Alaskans are laid off and furloughed. ([Alaska Daily News](#))

FEMA

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 15, 2020

SUMMARY

- The spread of COVID-19 is slowing much faster than expected in Washington, but 'We can't let up our guard' says the Washington State Health Officer.
- Oregon Governor Kate Brown has five key metrics that will help determine when the state can reopen.
- Gas prices are down and liquor sales are up in Oregon as public habits are altered by stay-at-home orders.
- Idaho Governor Brad Little will make an announcement today as his stay-at-home order is set to expire.
- Anchorage plans to extend a "hunker down" order until May 5.
- Princess Cruises and Holland America cancel Alaska operations for 2020 season.

Public Sentiment

- Oregonians would like more details about the Governor's plans and indicators for what it will take to ease current restrictions.
- In Idaho, the public weigh economic fears and whether the disease will surge if stay-home order is lifted.
- With the news that two major cruise lines have canceled their 2020 Alaska routes, local destinations worry about the economic impacts.
- The theme that government restrictions infringe upon rights continues, counterbalanced by a willingness from others to make sacrifices to slow the spread of the virus.
- There are mixed reactions to news that the US will be cutting funding for the WHO. While most feel the organization should have been more transparent, there is also a desire to continue to engage international health experts.

Washington

Testing

- Everett COVID-19 drive-in testing site to demobilize after losing federal funding. ([KOMO](#)) The reaction to this news is mostly negative, with many blaming the governor and wondering how this correlates to his statements that Washington needs to ramp up testing. ([Facebook](#))

Social Distancing

- Coronavirus: Distancing efforts must remain in place to prevent rebound in cases, report says ([KIRO 7](#))
 - Most people are saying in response that the stay-at-home order should not be extended

beyond May 4th. Reasons given are that the goal of flattening the curve was achieved, that people will violate the order anyway, and that the challenges of continuing to be homebound are too much. Others call to extend the order, or say to leave it up to the experts to decide. ([Facebook](#))

- Spread of Covid-19 is slowing much faster than expected in Washington, but 'We can't let up our guard' says the Washington State Health Officer. ([KUOW](#))
- Far-right U.S. politicians label lockdowns anti-constitutional. Matt Shea says stay-at-home order 'creeping into martial law territory.' ([The Columbian](#))
- Tri-Citians protesting ban against recreational fishing. ([KEPR](#)) Many [people on Facebook](#) agree that fishing should be a protected right, and that it is safer than many other permitted activities.
- Visiting even 'just one friend' puts everyone at higher risk for coronavirus. University of Washington researchers studied what can happen if someone forgoes social distancing and visits just one friend, and the result can be a major problem. ([KING 5](#), [The Olympian](#)) Some on [Facebook](#) are calling these messages 'fear mongering' and say it is not working anymore. Some point out that visiting a friend is safer than visiting a pot shop or grocery store—both permitted activities.

Elected Officials

- Trump directs halt to payments to WHO during virus pandemic. President Donald Trump said Tuesday that he was cutting off U.S. payments to the World Health Organization during the coronavirus pandemic, saying the organization of failing to do enough to stop the virus from spreading when it first surfaced in China. ([Seattle Times](#))
- Rep. McMorris Rodgers sides with decision to investigate World Health Organization. ([KXLY](#))
- Rep. Derek Kilmer of Washington, chairman of the New Democrat Coalition, will soon release legislation proposing an automatic stabilizer for the popular Paycheck Protection Program, which provides loans to small businesses that will be fully forgiven if the companies keep a majority of their employees on the payroll. ([Roll Call](#))

PPE

- General Motors and Ventec to deliver first batch of ventilators ahead of schedule ([NBC](#))

Food Security

- Seattle is giving \$800 in grocery vouchers to 1,000 recently-displaced workers. ([KIRO7](#))
- Washington National Guard and Northwest Harvest team up to fill emergency food boxes. ([KING5](#))
- Farmers are throwing out food that could go to food banks. American Farm Bureau and Feeding America want to change that ([YakTriNews](#))

Hispanic Impact

- In the cases where ethnicity is known, 24 percent of people infected are Hispanic, but people of Hispanic heritage only makeup 13 percent of Washington's total population. ([KIMA](#))

Tribal

- Suquamish members can request rental relief online. ([Facebook](#))

Business and Economy

- Spokane is working on 10-month grace period for renters, mortgage holders impacted by COVID-19 ([KHQ](#))
- \$35,000 donation will aid Spokane community college students impacted by the pandemic. ([The Spokesman-Review](#))

Oregon

Updates from Governor Brown

- Gov. Brown gave guidance on how COVID-19 restrictions will be eased. ([KGW8](#), [KPTV12](#))
 - The five key metrics that will inform the state's decisions are slowed infection rates, adequate PPE, capacity to conduct testing, ability to conduct contact tracing, and having an effective program for isolation/quarantine of the ill. ([KVAL13](#))
 - In reaction, people are asking for more details and speculating about what will or should happen next. Some call for a regional, county-by-county approach, and many ask that Oregon not tag along with Washington and California's decisions. ([example 1](#), [example 2](#), [example 3](#))

Business and Economy

- S. Oregon bar defied coronavirus order to serve drinks, authorities say; now, its license is suspended. ([The Oregonian](#)) Some on [Facebook](#) say this is a fair consequence; others say it is government overreach.
- Portland announces city employee furloughs, pay raise freeze, mayor salary cut amid coronavirus pandemic. All non-union Portland city employees must take 10 days of unpaid leave by October, raises will be temporarily halted and Mayor Ted Wheeler will go without a salary for the rest of the year, the city announced Tuesday. ([Oregonian](#))
- Oregon liquor stores sold at 'record level' in March, OLCC says. ([KDRV12](#), [Oregonian](#))
- Gas prices keep dropping as coronavirus brings low demand for fuel. ([KATU](#))

New Cases

- 2 more people die from coronavirus in Oregon and 49 new cases are reported. ([KGW8](#), [KATU 2](#))
- Health care leaders launch campaign 'Be Prepared: Take Control'. ([KOIN](#))

Social Distancing

- Coastal residents ask out-of-towners to stay home. ([KOIN6](#))
- Hikers asked to get off Pacific Crest Trail to help stop COVID-19 spread. ([FOX12](#))

Idaho

Stay-at-home order

- Top Idaho house Republicans tell Gov. Little to hand over control of coronavirus response to local officials. ([Boise State Public Radio](#)) "Let's continue informing our citizens about the health risks and then, to the greatest degree possible, let them govern themselves," the house leader wrote. Reactions are [generally dismayed](#).
- Idaho's Republican party chairman says the decision to reopen Idaho must be based on economy, too — not just COVID-19 models. ([Idaho Statesman](#)) Many responses [disagree with the representative's opinion](#), but others agree that the economy may be hurting more than it should.

Sanitation

- Nampa company cleans first responder vehicles for free. They can clean vehicles in two hours. Their marketing staff has joined the effort to "keep them busy." ([KIVI](#))

Blood donations

- Gov. Little donates blood in light of nationwide shortage ([KIVI](#))

New cases

- Woman dies from coronavirus at Boise skilled care facility; 14 others also likely positive. ([Idaho News](#)) Public reaction asks people to take care when going to the facility to help keep healthcare workers safe. Others suggest the timing of this news will lead to extending the stay-at-home order. Others ask why there isn't more reporting on people who have recovered from COVID-19. ([Facebook](#))

Economy

- Senator Mike Crapo (R-Idaho) joined a letter led by U.S. Senator Jim Risch (R-Idaho) to call for dairy farmer assistance. ([Senator Crapo website](#))
- Cranney Farms in West Oakley is offering free potatoes due to the impacts to the supply chain as they would otherwise be discarded. ([Facebook](#))
- Gas prices in Coeur d'Alene have been falling in Idaho to their lowest levels in years. ([Coeur d'Alene Press](#))

Alaska

Economy

- Princess Cruises and Holland America cancel Alaska operations for 2020 season. ([Daily News-Miner](#), [Anchorage Daily News](#), [Alaska Public Media](#), [KTOO](#)) Alaska's Travel Industry Association President and CEO calls the news "[devastating](#)" for hundreds of businesses and communities that rely on tourism revenue.
 - Response from people on Facebook is mostly sadness, and worry over the impact on Alaska's economy, workers. ([example 1](#), [example 2](#))

Unemployment

- Alaska begins paying \$600-per-week federal boost in unemployment benefits. ([Anchorage Daily News](#)) In reaction, some people are frustrated that unemployment benefits are greater than the income of many essential workers. ([Facebook](#))

Anchorage 'Hunker Down' Order

- Anchorage Mayor announces he will extend 'hunker down' order to May 5. ([Anchorage Daily News](#)) The Anchorage Assembly extended the mayors emergency declaration powers through June 5.
 - [In reaction](#), many people believe that the extension is difficult but necessary to stop the pandemic. Others express frustration and say their jobs or businesses will not recover from this shut down.

Governor's Health Mandates

- Governor Dunleavy announced he will rescind a temporary ban on elective medical procedures as the first step in his plan to restart Alaska's economy; also announced he will lift the ban on restaurants selling to-go alcohol. ([Anchorage Daily News](#), [KTVA](#))
 - The governor said he will work with communities and industry leaders on decisions, and reiterated that the economy won't be put ahead of Alaskans' health. ([KTVA](#))
 - In response, residents continue to debate the health mandates; some saying that citizens can conduct business and stay safe at the same time, others saying continued observance of social distance mandates is crucial. ([Facebook](#))
- Health experts warn that lifting health mandates could lead to virus 'rebound'. ([Juneau Empire](#))

Alternative Care Site

- Alaska Airlines Center turning into a COVID-19 care facility. ([KTUU](#), [KTVA](#)) Some people are calling this a waste of money, saying it could have been done cheaper or will not be used. One person blamed FEMA for the high cost of the site, and one other compared it to the CenturyLink site in Seattle. Other people say the site is necessary. ([Facebook](#))

ADVISORY: Inslee press conference on COVID-19 Thursday in Olympia

Gov. Jay Inslee will address media Thursday via streaming video and telephone to provide an update on the state's COVID-19 response.

The governor will be joined by Suzi LeVine, commissioner for the state Employment Security Department.

Thursday, April 16

3:15 PM - Press conference on COVID-19

The press conference will be livestreamed by [TVW](#).

****NOTICE:** To prevent the spread of COVID-19, we are implementing a new remote access system. We strongly request that media participate through that system.

TV: KIRO will be the pool camera for live feeds. They will have 8 feeds to share out to your systems. Arrive by 2:30 PM to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Registering for the event:

Register here: <https://stateofwashington.webex.com/stateofwashington/onstage/g.php?MTID=ee3a261492357c2e7652891d828b19345>

Please provide: Name, E-mail address, phone number, news organization.

The conference will start at 3:15 PM.

Press, please join the call at 3:00 PM. We will run through procedure and test the system to ensure we can answer your questions without technical issues.

Q&A instructions:

If you would like to ask a question, **you must log in to the teleconference via WebEx. We will not be taking questions via phone.**

If you would like to ask a question, **please RSVP. Email:** emily.halvorson@gov.wa.gov Please include your name, news organization and if you want to ask a question.

Question order:

We will prioritize

- The Olympia press corps
- Local and national press who join through WebEx

Once the governor has finished his remarks, we will call on you and unmute only you from our end.

We will control muting from our side. **You do not need to mute yourself.**

When we call on you, announce your name and news organization. Please do not ask if we can hear you. The governor will respond to ensure he can hear you.

For ideal audio and video quality [download](#) the Webex Meetings Application.

Thank you for your flexibility as we transition temporarily to this remote system. We will continue to refine the process moving forward to make it as seamless as possible.

If you are unable to join through WebEx, you may listen in via phone:

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 26, 2020

FEMA Advisory

COVID-19 Federal Response Efforts Continue

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

Sixteen states and 4 tribes have issued full stay-at-home orders; in addition to eight states that have issued partial or localized orders, and one state that has issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to

support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Iowa, Louisiana, New York, North Carolina, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves. Many supplies have already arrived and additional supplies are en route to these designated areas. The U.S. Navy hospital ship Mercy is en route and expected to be operational by April 1 to support Los Angeles with additional hospital beds and medical staff. The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

FEMA Advisory: COVID-19 Daily Briefing Points (April 21, 2020)

April 21, 2020 at 1:10 PM EDT

Cc: FEMA-IGA

FEMA ADVISORY – APRIL 21, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical

distributors in various locations across the U.S. through [Project Airbridge](#).

- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the below announcement from the White House Office of Intergovernmental Affairs regarding Treasury's release of CARES Act guidance for State, Local, and Tribal Governments.

Today, Secretary of the Treasury Steven Mnuchin released guidance for State, Local, and Tribal Governments regarding the Coronavirus Relief Fund (Section 5001 of the CARES Act).

As stated by the [legislation](#) signed by President Trump on March 27, the use of funds “are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID–19).” The guidance document ([here](#)) and frequently asked questions ([here](#)) provide, in detail, examples of eligible and ineligible expenditures of the \$150 billion Coronavirus Relief Fund. You can find additional information about Assistance to State and local governments [here](#).

We will continue to share all relevant information as it becomes available.

Thank you,

White House Office of Intergovernmental Affairs

Coronavirus Aid, Relief, and Economic Security Act (CARES)

Following extensive negotiations between the Trump Administration and Congressional Leaders, President Trump signed the *Coronavirus Aid, Relief, and Economic Security Act (CARES)*. The \$2.2 trillion economic relief package provides American families, healthcare workers, and small businesses with the economic support they need to get

through this challenging time. This aid comes on top of the Family First Coronavirus Aid Package, enacted last month. State/Local/Tribal provisions include:

- \$150 billion in direct aid to State, Tribal, and local governments. Aid will be allocated primarily by a State's population with each State receiving at least \$1.25 billion.
- \$340 billion in additional emergency supplemental funding to combat the coronavirus outbreak.
- \$500 billion for loans and guarantees that authorize the U.S. Treasury to support eligible businesses and States and local governments to cover losses incurred as a result of COVID-19.
- \$100 billion for hospitals and health care facilities to reimburse expenses or lost revenues not otherwise reimbursed that are directly attributable to COVID-19.
- **\$3.5 billion** to allow States to expand childcare benefits for healthcare workers, first responders, and others on the frontlines of this crisis.
- Read more here: **[President Donald J. Trump Is Providing Economic Relief to American Workers, Families, and Businesses Impacted by the Coronavirus](#)**

FEMA Stakeholder Advisory: FEMA Leads Unprecedented Federal Response to Coronavirus

March 21, 2020 at 3:22 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 21, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

FEMA Leads Unprecedented Federal Response to Coronavirus

This is a whole of government response. Like all emergencies, response is most successful when it is locally executed, state managed and federally supported.

The federal government continues to take aggressive and proactive steps to address coronavirus (COVID-19) pandemic as the health and safety of the American people remain a top priority.

FEMA now leads federal operations on behalf of the White House Coronavirus Task Force; who oversees the whole-of-government response to the pandemic. As part of the White House Coronavirus Task Force, HHS will continue to provide their subject matter expertise as the nation's pre-eminent public health responders.

On March 13, 2020, President Trump took decisive, unprecedented action by declaring a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids Governors needing to request individual emergency declarations. The nationwide emergency declaration increases federal support to the White House Task Force as it leads the ongoing federal response to the COVID-19 pandemic. Pursuant to this declaration, FEMA, in coordination with HHS, will assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public.

As of March 20, 2020, all 50 states, the District of Columbia, five territories and one tribe are working directly with FEMA under the Nationwide Emergency Declaration for COVID-19. On March 20, 2020, President Trump declared a major disaster declaration for the state of New York

making federal funding available for crisis counseling services in addition to emergency protective measures.

To help the American public distinguish between rumors and facts regarding the response to Coronavirus (COVID-19), FEMA has created a Rumor Control page on FEMA.gov – the public can help control the spread of rumors by sharing our page: fema.gov/coronavirus.

Please see attached for additional information on FEMA's response efforts, including eligibility under the National Emergency Declaration, Community Based Testing Sites (CBTS) and the Defense Production Act.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

FEMA-IGA

FEMA Stakeholder Advisory: Application Deadlines Extended for Five Additional Fiscal Year 2020 Preparedness Grant Programs

March 21, 2020 at 10:28 AM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 21, 2020

Contact: Congressional and Intergovernmental

Affairs Division

Phone: 202-646-3444

Advisory

Application Deadlines Extended for Five Additional Fiscal Year 2020 Preparedness Grant Programs

On March 5, 2020, the Federal Emergency Management Agency (FEMA) extended the deadlines for four Fiscal Year 2020 preparedness grant programs. Those were the State Homeland Security Grant Program, the Urban Area Security Initiative (UASI) Grant Program, the Operation Stonegarden Grant Program, and the Nonprofit Security Grant Program. The application deadlines for those four programs were extended from April 15, 2020 to April 30, 2020.

Today, FEMA is announcing the extension of the application deadlines for five additional FY 2020 preparedness grant programs.

In response to COVID-19, FEMA is granting additional time to submit applications for five preparedness grant programs until April 30 (this is in addition to previously announced extensions for the Homeland Security Grant Program and Nonprofit Security Grant Program). These applications are for the following Fiscal Year 2020 preparedness grant programs:

- Tribal Homeland Security Grant Program (THSGP)
- Transit Security Grant Program (TSGP)
- Intercity Bus Security Grant Program (IBSGP)
- Intercity Passenger Rail (IPR) program
- Port Security Grant Program (PSGP)

Updated Deadlines

- Original Application Submission Deadline: April 15, 2020 at 5p.m. ET

· **Extended Application Submission Deadline: April 30, 2020 at 5 p.m. ET**

Event	Suggested Timeline for On-Time Submissions
Obtain DUNS Number	3/16/2020
Obtain a valid Employer Identification Number (EIN)	3/16/2020
Update SAM registration	3/16/2020
Submit the initial application in Grants.gov	4/23/2020
Submit the final application in ND Grants	4/30/2020, 5 p.m. ET

Applications **must** be received by the **April 30, 2020** deadline. The Non-Disaster (ND) Grants System has a date stamp that indicates when an application is submitted. Applicants will receive an electronic message confirming receipt of the full application.

DHS/FEMA will not review applications that are received after the deadline or consider them for funding. Consistent with the applicable Notice of Funding Opportunity (NOFO), DHS/FEMA may, however, extend the application deadline on request for an applicant who can demonstrate that good cause exists to justify extending the deadline. Good cause for an extension may include technical problems outside of the applicant's control that prevent submission of the application by the deadline, or other exigent or emergency circumstances.

For additional information, please visit www.fema.gov/grants.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_14

April 14, 2020 at 4:24 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- HHS announced five new contracts for ventilator production rated under the Defense Production Act (DPA), to General Electric, Hill-Rom, Medtronic, ResMed, and Vyaire, as well as two other contracts for ventilator production, to Hamilton and Zoll.
 - In total, combined with contracts with [General Motors](#) and [Philips](#) rated under the DPA issued last week, HHS has finalized contracts to supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
 - The seven new ventilator contracts announced by HHS this month will provide

a total of 137,431 ventilators by the end of 2020.

- The thousands of ventilators delivered to the Strategic National Stockpile starting this month, continuing through the spring and summer, will provide more capacity to respond to the pandemic as it evolves.
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
- On **April 13**, The Department of Homeland Security and FEMA announced the funding notice for an additional \$100 million in supplemental Emergency Management Performance Grant Program funds.
 - The money is available to all 56 states and territories as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. All applications must be submitted on [Grants.gov](https://www.grants.gov) by April 28.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.
- FEMA [issued guidance](#) on the framework, policy details and requirements for determining the eligibility for FEMA reimbursement of states purchasing and distributing food to meet the immediate needs of those who do not have access to food as a result of COVID-19 and to protect the public from the spread of the virus.
 - State, local, tribal, and territorial governments with the legal responsibility for protecting life, public health and safety are eligible applicants under emergency and major disaster declarations for the COVID-19 pandemic.
 - Applicants may enter into formal agreements or contracts with private

organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the pandemic.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_21

April 21, 2020 at 1:28 PM EDT

To: david.postman@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 21, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million

surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

To Christopher Charles Cuomo, c/o CNN Newsroom

Hi Chris,

Watched you interviewing your brother about the gradual lockdown of New York State.

You may have noticed that two of America's biggest states, California and New York, have been locked down. And you may have also noticed that they weren't locked down by Trump, but by their own Democratic Roman Catholic governors and mayors.

I attach a few links which you may deem newsworthy and expand on in your reportages.

Thanks Chris. All the best, regards, Rufus York, Geneva, Switzerland (New the WHO Headquarters)

ELECTION DISRUPTION

Trump's comments came after Canada announced it was closing its borders to most foreign travellers and New Jersey Governor Phil Murphy said he was restricting movement across the state, which borders New York City. tonight, all other non-essential retail, recreational, and entertainment businesses must close after 8.00pm," said Roman Catholic NJ Governor Mr Murphy. non-essential and non-emergency travel in New Jersey is strongly discouraged between the hours of 8.00pm and 5.00am. This will remain in effect for the foreseeable future. We want everyone to be home - and not out," he added.

Francisco passed a "remain-in-place" order requiring millions of residents to stay at home unless absolutely essential.

Kimberly Guilfoyle (Fox News) (m. 8-Dec-2001, div. 28-Feb-2005)

's aunt was married to Ron Pelosi, the brother-in-law of Speaker of the United States House of Representatives Nancy Pelosi.

declared a state of emergency on March 4, 2020, after the first death in California attributable to coronavirus. His stated intention was to help California prepare for and contain the spread of the coronavirus. The emergency declaration allows state agencies to more easily procure equipment and services, share information on patients and alleviates restrictions on the use of state-owned properties and facilities. Newsom also announced that mitigation policies for the state's estimated 108,000 unsheltered homeless people would be prioritized with a significant push to move them indoors.

issued an executive order that allows the state to commandeer hotels and medical facilities to treat coronavirus patients and permits government officials to hold teleconferences in private without violating open meeting laws

combat Corona Virus Tents could be allowed on Sidewalk all day

Mayor-elect Bill de Blasio ascends to City Hall, Archbishop Timothy Dolan is hoping the most powerful pol in New York City gives a lot more thought to an even higher power.

Dolan, the loquacious leader of the Roman Catholic Archdiocese of New York, told ABC7's Up Close program yesterday that he would like to see the relatively non-religious Mr. de Blasio embrace his Catholic roots.

'93When I met him, however briefly, he told me he had been baptized and raised a Catholic and he was very proud of the fact that he had an uncle, a priest.

[HYPERLINK "https://observer.com/2013/12/archbishop-dolan-wants-to-make-bill-de-blasio-a-better-catholic/"](https://observer.com/2013/12/archbishop-dolan-wants-to-make-bill-de-blasio-a-better-catholic/) <https://observer.com/2013/12/archbishop-dolan-wants-to-make-bill-de-blasio-a-better-catholic/>

NEW YORK - New York's mayor called on U.S. President Donald Trump to deploy military personnel to his city, which he said is the front line in the country's war against the coronavirus.

"The great irony [is] the fate of New York City rests in the hands of one man and he is a New Yorker, and right now he is betraying the city he comes from — we are the front line," an angry Mayor Bill de Blasio said at a news conference Thursday evening. "How on Earth is the president sitting idly by and not activating the forces that could help us?"

THANK GOD FOR PRESIDENT TRUMP that he doesn't order the military in, and do a national lock down.

What is it with these Democratic Roman Catholic foot soldiers , we don't want another Inquisition, thanks anyway.!

 family resides in Xanadu 2.0, an earth-sheltered mansion in the side of a hill overlooking Lake Washington in Medina, Washington.
 was platted in 1914 and officially incorporated on August 19, 1955. The town's first mansions were built in the 1920s by wealthy Seattle businessmen, encouraged by the arrival of direct ferry service, and led to the nickname of Washington's "Gold Coast". The area's farmers, mostly of Japanese descent, were evicted during the 1940s internment and their farms were turned over for redevelopment.
 2009, Medina, with the "wide support of residents", installed cameras at intersections along roads entering the city. The cameras are used to capture the license plate number of every car, and a security system automatically notifies local police if the captured number is recorded in a database.
 are notified of the presence of the system with signs that read "You Are Entering a 24 Hour Video Surveillance Area"; according to Medina's police chief, all captured information is stored for 60 days even if nothing negative is found in the database,
 is part of the 48th Legislative District, and its current legislators in the Washington State Legislature are all DEMOCRATS:-
 last Republican to hold the office of Governor was John Spellman in 1985; Washington has had the longest streak of Democratic governors in the nation
 Governor is:- Democrat Jay Robert Inslee
 Senator Patty Kuderer
 Joan McBride
 Representative Vandana Slatter
 48th district also includes the Democratic leaning area of adjacent Bellevue.
 is part of the 1st Congressional District. Its current Representative is Suzan DelBene.
 part of Washington, Medina is represented by Democratic Senators Patty Murray and Maria Cantwell.

Xi Jinping Meets with Co-chair of Bill & Melinda Gates Foundation Bill Gates of US

March 28, 2015, President Xi Jinping met with Co-chair of Bill & Melinda Gates Foundation Bill Gates of the US at the Boao State Guest House in Hainan Province. Both sides mainly exchanged views on enhancing public health service, improving people's health and poverty reduction.

Jinping pointed out that preventing and controlling public epidemics is a common challenge to the international community and requires the international community to strengthen cooperation on joint control. We attach great importance to enhancing public health service and securing people's health, which constitutes an important task of the Chinese government. China is ready to continue cooperation with Bill & Melinda Gates Foundation in this respect. Xi Jinping stressed that China attaches great importance to and has made significant achievements on poverty reduction and relief. But only by making great efforts to promote the poverty reduction and development cause, can China achieve the goal of building a moderately prosperous society by 2020. China is making unremitting effort in this regard. China will take an active part in the post-2015 UN development agenda and is ready to work with the international community to promote the international poverty reduction work for continuous and new results.

Gates said that China has offered a great deal of resources in joint effort with the international community to address the Ebola epidemics and also done a remarkable job in controlling AIDS disease. China has erected a model for the rest of the world by playing a leading role in poverty reduction, for which he highly appreciates. The Bill & Melinda Gates Foundation is ready to intensify cooperation with China in public health service.

Boris Johnson has become the first baptised Catholic to occupy 10 Downing Street
55-year-old, whose mother Charlotte Fawcett is Catholic, was baptised as a child.
godmother is Lady Rachel Billington – daughter of the devoutly Catholic Lord Longford.
the Prime Minister himself is a believer in a legal right to abortion, he has consistently abstained from voting on pro-life matters. It may be significant also that he has said that abortion should not be imposed on Northern Ireland against the wishes of the populace.
Rees-Mogg, the Leader of the House of Commons, is the single conspicuous Catholic in the Cabinet. Rees-Mogg grew up attending weekly mass and occasionally Sunday school at the Roman Catholic Church of the Holy Ghost, Midsomer Norton.
he started catechism in 1975 under his governess and attended mass in the ordinary form
[HYPERLINK "https://en.wikipedia.org/wiki/Jacob_Rees-Mogg"](https://en.wikipedia.org/wiki/Jacob_Rees-Mogg) https://en.wikipedia.org/wiki/Jacob_Rees-Mogg
Boris de Pfeffel Johnson [HYPERLINK "https://en.wikipedia.org/wiki/Boris_Johnson"](https://en.wikipedia.org/wiki/Boris_Johnson) https://en.wikipedia.org/wiki/Boris_Johnson
was born on 19 June 1964 in the Upper East Side of Manhattan, New York City, to 23 year-old Stanley Johnson, an Englishman, then studying economics at Columbia University, and his 22-year-old wife of one year Charlotte Fawcett, an artist from a family of liberal intellectuals and a daughter of Sir James Fawcett, a barrister.
Marina Wheeler - [HYPERLINK "https://en.wikipedia.org/wiki/Marina_Wheeler"](https://en.wikipedia.org/wiki/Marina_Wheeler) https://en.wikipedia.org/wiki/Marina_Wheeler
Boris's parents had married in 1963, before moving to the US where they lived opposite the Chelsea Hotel; in September 1964 they returned to England so that Charlotte could study at the University of Oxford, In
September 1967. Stanley then gained employment with a policy panel on population control and in June moved the family to Norwalk, Connecticut.

LOCK STEP

“IT IS POSSIBLE TO DISCIPLINE AND CONTROL SOME SOCIETIES FOR SOME TIME, BUT NOT THE WHOLE WORLD ALL THE TIME.”
'96 GK Bhat, TARU Leading Edge, India

Step,

This Is No Futuristic Scenario: Panic and the Post-Pandemic Future?

The Rockefeller Foundation Ran a Coronavirus Simulation

coronavirus epidemic playing out in China and two dozen other countries, including the US, is unfolding in line with a decade-old simulation titled “Lock Step” devised by the Rockefeller Foundation in conjunction with the Global Business Network. The scenario, from a publication called “Scenarios for the Future of Technology and International Development” in 2010, describes a coronavirus-like pandemic that becomes the trigger for the imposition of police-state controls on movement, economy, and other areas of society.

Lock Step scenario describes “a world of tighter top-down government control and more authoritarian leadership.”

- Judith Rodin -President, Rockefeller Foundation - [HYPERLINK "https://www.nndb.com/people/212/000123840/"](https://www.nndb.com/people/212/000123840/)

--Another Jesuit Footsoldier in the right place at the right time, -

---AKA Gavin Christopher Newsom
Born: 10-Oct-1967
Birthplace: San Francisco, CA

Roman Catholic - <https://www.nndb.com/lists/758/000094476/>

University: BA Political Science, Jesuit Santa Clara University (1989)

<https://www.nndb.com/edu/559/000068355/>

Party Affiliation: Democratic

<https://www.nndb.com/people/720/000026642/>

Wife: Kimberly Guilfoyle (Fox News) (m. 8-Dec-2001, div. 28-Feb-2005)

Newsom's aunt was married to Ron Pelosi, the brother-in-law of Speaker of the United States House of Representatives Nancy Pelosi.

Newsom declared a state of emergency on March 4, 2020, after the first death in California attributable to coronavirus. His stated intention was to help California prepare for and contain the spread of the coronavirus. The emergency declaration allows state agencies to more easily procure equipment and services, share information on patients and alleviates restrictions on the use of state-owned properties and facilities. Newsom also announced that mitigation policies for the state's estimated 108,000 unsheltered homeless people would be prioritized with a significant push to move them indoors.

Newsom issued an executive order that allows the state to commandeer hotels and medical facilities to treat coronavirus patients and permits government officials to hold teleconferences in private without violating open meeting laws

To combat Corona Virus Tents could be allowed on Sidewalk all day

Bill de Blasio

AKA Warren Wilhelm, Jr.

Born: 8-May-1961

Birthplace: Manhattan, NY

Party Affiliation: Democratic

Executive summary: Mayor of New York City

Italian Ancestry

<https://www.nndb.com/lists/347/000043218/>

As Mayor-elect Bill de Blasio ascends to City Hall, Archbishop Timothy Dolan is hoping the most powerful pol in New York City gives a lot more thought to an even higher power.

Mr. Dolan, the loquacious leader of the Roman Catholic Archdiocese of New York, told ABC7's Up Close program yesterday that he would like to see the relatively non-religious Mr. de Blasio embrace his Catholic roots.

"When I met him, however briefly, he told me he had been baptized and raised a Catholic and he was very proud of the fact that he had an uncle, a priest.

<https://observer.com/2013/12/archbishop-dolan-wants-to-make-bill-de-blasio-a-better-catholic/>

NEW YORK - New York's mayor called on U.S. President Donald Trump to deploy military personnel to his city, which he said is the front line in the country's war against the coronavirus.

"The great irony [is] the fate of New York City rests in the hands of one man and he is a New Yorker, and right now he is betraying the city he comes from — we are the front line," an angry Mayor Bill de Blasio said at a news conference Thursday evening. "How on Earth is the president sitting idly by and not activating the forces that could help us?"

THANK GOD FOR PRESIDENT TRUMP that he doesn't order the military in, and do a national lock down.

What is it with these Democratic Roman Catholic foot soldiers , we don't want another Inquisition, thanks anyway.!

<https://www.voanews.com/science-health/coronavirus-outbreak/ny-mayor-urges-president-deploy-military-city>

and another one in New Jersey

New Jersey Governor Phil Murphy said he would issue an order Saturday to close most businesses and potentially drop the 50-person limit on gatherings or perhaps ban them outright. to flatten the curve,”

Philip Dunton Murphy
56th Governor of New Jersey

Assumed office

January 16, 2018

Irish , Roman Catholic

Murphy's position at Goldman Sachs when the firm had its IPO brought his net worth above \$50 million. By one estimate, reported in Der Spiegel in 2009, his wealth after leaving the firm was in the range of several hundred million dollars.

Democratic Party finance chair

After leaving Goldman Sachs, Murphy served from 2006 to 2009 as the National Finance Chair of the Democratic National Committee (DNC), where he worked with DNC Chair Howard Dean.

During this time and making reference to Christie's presidential campaign and his subsequent support and travel on behalf of Donald Trump's presidential campaign, Murphy implored Christie, "Do your job or quit." Murphy supported Hillary Clinton in the 2016 Democratic primary and fundraised for her.

at the right place at the right time

Boris Johnson has become the first baptised Catholic to occupy 10 Downing Street. The 55-year-old, whose mother Charlotte Fawcett is Catholic, was baptised as a child. His godmother is Lady Rachel Billington – daughter of the devoutly Catholic Lord Longford. Although the Prime Minister himself is a believer in a legal right to abortion, he has consistently abstained from voting on pro-life matters. It may be significant also that he has said that abortion should not be imposed on Northern Ireland against the wishes of the populace. Jacob Rees-Mogg, the Leader of the House of Commons, is the single conspicuous Catholic in the Cabinet. Rees-Mogg grew up attending weekly mass and occasionally Sunday school at the Roman Catholic Church of the Holy Ghost, Midsomer Norton. Here he started catechism in 1975 under his governess and attended mass in the ordinary form
https://en.wikipedia.org/wiki/Jacob_Rees-Mogg
Alexander Boris de Pfeffel Johnson https://en.wikipedia.org/wiki/Boris_Johnson
Johnson was born on 19 June 1964 in the Upper East Side of Manhattan, New York City, to 23 year-old Stanley Johnson, an Englishman, then studying economics at Columbia University, and his 22-year-old wife of one year Charlotte Fawcett, an artist from a family of liberal intellectuals and a daughter of Sir James Fawcett, a barrister.
Spouse:- Marina Wheeler - https://en.wikipedia.org/wiki/Marina_Wheeler
Boris's parents had married in 1963, before moving to the US where they lived opposite the Chelsea Hotel; in September 1964 they returned to England so that Charlotte could study at the University of Oxford. In September 1967, Stanley then gained employment with a policy panel on population control and in June moved the family to Norwalk, Connecticut.

Operation 'Granite Shadow' – The US Military's Above-To-Secret Plans If COVID-19 Cripples Government |

<https://thewatchtowers.org/wp-content/uploads/2020/03/Screenshot-at-2020-03-16-00-21-38.png>

Obama's executive order also made public for the first time the existence of a previously unknown secret policy directive he signed on July 15. Presidential Policy Directive 40 established a new national continuity policy that defined the "national essential functions" of the federal government. Such directives, known as PPDs, are an often secret form of executive order in the realm of national security.

In July 2016, Barack Obama signed the classified Presidential Policy Directive 40 on "National Continuity Policy," establishing "essential functions" that government agencies were tasked to protect and retain. At the highest level were the National Essential Functions, those that posit "the continued functioning" of government under the Constitution. In order to preserve Constitutional rule, agencies were ordered to have not just a line of succession but also one of "devolution," a duplicate chain of individuals secreted outside Washington available in a catastrophic emergency. Federal Continuity Directive 1, issued just days before Donald Trump became president, says that devolution has to establish "procedures to transfer statutory authority and responsibilities" to this secondary designated staff to sustain essential functions.

"Devolution may be temporary, or may endure for an extended period," the directive states. And it further directs that the devolution staff be located at "a geographically dispersed location unaffected by the incident." Except that in the case of coronavirus, there may be no such location. This places the plans for the extraordinary into completely uncharted territory, planners not just considering how devolution or martial law might work in a nationwide disaster but also how those earmarked to implement these very plans have to be sequestered and made ready, even while they are equally vulnerable.

<https://www.newsweek.com/exclusive-inside-militarys-top-secret-plans-if-coronavirus-cripples-government-1492878>

Wonder what you think about this predicted scenario, rom ing the web? @Laura, Maria?

Warning: This news may indicate that the coup is imminent...

Senator Rand Paul 
@RandPaul

Senator Rand Paul has tested positive for COVID-19. He is feeling fine and is in quarantine. He is asymptomatic and was tested out of an abundance of caution due to his extensive travel and events. He was not aware of any direct contact with any infected person.

12:36 PM · Mar 22, 2020 · [Twitter for iPhone](#)

If the globalists proceed with their lockdown plans, the NWO narrative will say this about Rand Paul's quarantine: *"The White Hats, sensing that a coup against Trump was imminent, moved Rand Paul to a secure location under the cover story of a COVID-19 quarantine."*

After the coup and mass arrests, watch for the rise of **President Rand Paul** and **Vice President Tulsi Gabbard**.

he plans state that the government continues essential functions under all circumstances, even if that is with the devolved second string or under temporary military command. **One of the “national essential functions”, according to Federal Continuity Directive 1 is that the government “provid[e] leadership visible to the Nation and the world ... [while] maintaining the trust and confidence of the American people”** The question is whether a faceless elite could ever provide that confidence, preserving government command but also adding to **public panic**. That could be a virus too. So whom could the military put forward as visible leadership that would maintain the trust and confidence of ALL the American people, both Republican and Democrat? Well these two faces would do quite nicely, wouldn't they?...

Obama the Asian, meets his dad Bhumibol Adulyadej, , People's King of Thailand
<https://www.youtube.com/watch?v=iX5Z8Mxe1MM>

The eerie resemblance of the Thai King and 'Obama' is frightening. The Dumbo ears, the small forehead, the Asian eyes, the small lips, the bulb on the end of the nose, similar skin color, BUT at 81 looks younger than Obama who claims age 49 while photo comparsion analysis shows him at age 60.

http://www.hoaxofthecentury.com/ObamaBornThailand1_files/ObamaKingVisit.jpg

Meeting the King Bhumibol Adulyadej talking to Obama along with the Secretary of State Hillary Clinton.

The resemblance is eerie. Purple lips, nose with prominent drop lobe, dumbo ears, oriental eyes, olive skin, full eyebrows, head shape. Obama always has the close cut Negroid haircut. Only person in the world who imposes a Black. Absolutely no Negroid features:

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_22

April 22, 2020 at 2:19 PM EDT

To: david.postman@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 22, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical

distributors in various locations across the U.S. through [Project Airbridge](#).

- The U.S. has now processed 4.4 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

Subject: Call with Governor Inslee and FEMA Administrator Gaynor

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

Hello John and Brian,

Governor Inslee would like to speak with Administrator Gaynor today following up on yesterday's commitment of field hospitals for Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.968.9255 with any questions.

Thank you,

Morgan

Decisive action taken today will protect Americans

March 21, 2020 at 11:01 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

US-Mexico-Canada Travel Restrictions

Decisive action taken today will protect Americans, slow the spread of the virus, and help save lives:

- The United States is cooperating closely with Canada and Mexico to ensure that North America has a coordinated approach to combating the pandemic caused by the coronavirus.
- The United States and Canada have agreed to restrict travel at our land border to essential travel only.
- Similarly, the United States and Mexico are finalizing an agreement that will facilitate only essential travel at our southern border.

We are maintaining cross-border activities with Canada and Mexico that support health security, trade, commerce, supply security, and other essential activities while taking critical steps to protect our citizens and to curb spread of the virus.

For more information on these measures please visit the [White House fact sheet](#).

Ryan:

Adding you back, as I see you may have been inadvertently left off the below message.

Either Morgan Wilson or I will be available to join this call from the Governor's Office. Can you confirm if it's still on for 11am (pacific?) on Tues? And any call-in information we should have.

Casey

Thank you Ryan,

I can coordinate the EMD Director. Our federal POC at the Governor's office (D.C.) currently is Morgan Wilson 202.624.3691 and Casey Katims 202.624.3546 | Cell: 360-999-0155. I am also cc'ing Jim Baumgart for Governor's Office in Washington State and our Communications Director Karina Shagren. I'd be happy to be on the call. Sending also to EMD Response and Recovery.

I can confirm my availability and am working on Robert but anticipate no issues. Sanura - I talked with Robert. Can you please put on his calendar?

Sincerely,

Nancy

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Hey Nancy.

Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Ryan Ike

Director | External Affairs Division | Region 10

Office: (425) 487-4767 | Mobile: (425) 213-9496

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and

Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but we've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene

<https://idahosbdc.org/>

- Â• SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
- Â• We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>

- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting

April 23, 2020 at 10:15 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the announcement below, and attached, fact sheet from our partners in Federal Emergency Management Agency (FEMA) regarding Addressing PPE Needs in Non-Healthcare Setting.

FEMA has published the attached Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting. This guidance summarizes how organizations should consider and manage their personal protective equipment (PPE) needs while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response, including how to preserve limited supplies of PPE, how to consider need during periods of shortages, and how to acquire and request PPE (i.e., in the face of critical shortages and whereas normal supply chain allocation cannot meet operational requirements).

The attached fact sheet may also be found on the FEMA website [here](#).

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_21

April 21, 2020 at 1:28 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 21, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million

surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Follow Us

Follow FEMA on social media at: [FEMA online](#), on Twitter [@FEMA](#) or [@FEMAEspanol](#), on [FEMA Facebook page](#) or [FEMA Espanol page](#) and at [FEMA YouTube channel](#).

Also, follow Administrator Pete Gaynor on Twitter [@FEMA_Pete](#).

FEMA Mission

To help people before, during, and after disasters.

Subject: RE: Grocery supply chain FEMA call

Jaime

Some comments about the grocery industry and supply chain might be a good inclusion for a future press event if there is one scheduled soon.

Is there any benefit to coordinate the message with FEMA or do something jointly as far as a press event?

The FEMA Regional Administrator, Mike O'Hare, is the designated Federal Coordinating Officer (FCO), not sure if there is any benefit to doing something with the feds or just keeping it to messaging from our state's executives.

We do have FEMA staff and the HHS rep working out of BLDG 20 working the Federal Coordination pieces with our State Coordinating Officer (SCO) and staff, so that happened immediately in part because we have a FEMA Integration Team that works fulltime out of our facility and they immediately transitioned from their normal work to COVID response – good news story there on the responsiveness of the federal government.

We've placed our first resources requests already with them:

- to receive an embedded CISA PSA (Protective Security Advisor) – to assist us in looking at

infrastructure advance planning

- a National Incident Management Organization (NIMO) team to come in and conduct a complexity analysis of our incident management structure at the state level to help us identify what staffing gaps or process gaps we may have and make recommendations on how to improve our operations

- Federal Medical Stations (FMS) - some equipment is enroute – deployable healthcare facilities that provide us a medical surge capacity

Do we want to consider a press event with the governor, grocers and providers? JIC issued a release today on this topic that is already being picked up and we're ready to get a drumbeat of "save some for your neighbors" going. I'm happy to make an ask to the gov office if this feels like an important enough ask and effective use of his time.

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

REMINDER - INVITATION: FEMA Region 10 and Partners Congressional Briefing on COVID-19 -- March 31, 2020, at 10:00 AM PDT / 1:00 PM EDT

March 31, 2020 at 11:57 AM EDT

To: Undisclosed recipients:

Dear Congressional Colleagues:

FEMA would like to remind you of our invitation to Members and Staff of the Washington Delegation to join us **TODAY, March 31st at 10:00 am PDT / 1:00 pm EDT**, for an update on COVID-19 response efforts. After receiving an operational update, Members and Staff will have the opportunity to ask questions. The call will be led by FEMA in coordination with our state and interagency partners. Members are encouraged to join.

The agenda for today's call is below.

Dial-in Information:

Conference Call for Washington Delegation Members and Staff

Date: Tuesday, March 31st at 10:00 am PDT / 1:00 pm EDT

Dial-in Number: 1-866-575-6539

Participant Code: 9767813

We encourage you to dial-in at least 5 minutes prior to the call start time to be placed into the conference call.

**FEMA REGION 10 AND PARTNERS CONGRESSIONAL BRIEFING FOR
WASHINGTON MEMBERS AND STAFF**

AGENDA

Welcome and Roll Call (2 min)

- FEMA Region 10 Congressional Affairs Cam Rossie

Opening remarks (5 min)

- FEMA Region 10 Administrator Mike O'Hare

Partner Reports: (5 min each)

- Washington Emergency Management Division Director – Robert Ezelle
- Department of Health and Human Services – Capt. John Smart
- U.S. Small Business Administration – Cynthia Cowell
- Department of Defense – Col. Heath Roscoe
- FEMA Private Sector – Brett Holt
- FEMA Response Division – Lon Biasco
- FEMA Recovery Division – Lisa Davidson

Q&A (15 min)

Closing remarks – (1 min)

- HHS
- SBA
- EMD Director Ezelle
- Region 10 Administrator O'Hare

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

March 30, 2020 at 1:00 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 30, 2020

FEMA Advisory

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

“This response isn’t just about delivering food or supporting COVID test centers. It’s about protecting our children, parents, and grandparents. Our Nation is looking to the National Guard to help them and we can’t let them down.” – Air Force Gen. Joseph Lengyel, Chief of the National Guard Bureau

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people. The latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates

\$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA, for some states' use of their National Guard forces. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32.

FEMA coordinated an air bridge for flights from Asia beginning on Sunday, March 29, with the first delivery of 80 tons of much needed PPE supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 10.3 million gloves and thousands of thermometers for New York, New Jersey and Connecticut. Additional flights are contracted to go to Illinois today and to Ohio tomorrow. FEMA has scheduled additional flights and is adding more daily.

Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (180) and Connecticut (50).

Twenty-seven states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), the Strategic National Stockpile, Ventilator Guidance, CDC Respirator Guidance, Defense Production Act, CDC Public Guidance, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

Good evening, Stephanie.

Thanks for the details. Mike is set to attend to discuss FEMA's role. Made a few edits to his info below. A couple questions: will there be an ASL interpreter for the event? Is the event inside or outside?

Thanks

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photogs.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry

to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.

- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

Subject: RE: Press Conference Tomorrow at 1:30 pm

Draft release below. I will hit send as soon as we get confirmation of TV pool.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) – Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike O’Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital at Fort Carson, Colorado who have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via [WebEx](#). It will also be streamed live on Seattle Channel.

Seattle Times will serve as the print pool, KUOW will serve as radio pool (debwang@kuow.org, eoneill@kuow.org), and **XX** will serve as the TV pool.

WHO: Governor Jay Inslee, King County Executive Dow Constantine, Mayor Jenny A. Durkan, FEMA Region 10 Administrator Mike Oâ€™Hare, and Brigadier General Doug Cherry

WHEN: Saturday, March 28, 1:30 p.m.

WHERE: CenturyLink Field Event Center, 800 Occidental Ave S. in Seattle, WA

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photogs.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.
- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike O'Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) – Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike O'Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via WebEx [LINK].

TBD will serve as the print pool and TBD will serve as the TV pool.

Subject: Press Conference Tomorrow at 1:30 pm

Hi all – Thanks for everyone’s help to get the release out earlier. I wanted to loop back on logistics for tomorrow’s press conference.

Time

- Press Conference: 1:30 pm at the CenturyLink Event Center, 800 Occidental Ave S. in Seattle, WA

Attendees/Speakers

- Governor Jay Inslee
- King County Executive Dow Constantine
- Seattle Mayor Jenny Durkan
- FEMA Region 10 Administrator Mike O’Hare
- TBD Army
- Q&A

Advisory

- See below. We will send at 9:00 am on Saturday, March 28

On Site:

- Podium/Flags will be provided by the City.
- DOD – Let us know if there may be any supplies that may be able to be moved on site.

Pool: City will organize a pool

- Print Pool (ST/AP)
- Still photog (ST)
- TV Pool (Will work with News Directors)
- Seattle Channel (to cross post w/ TVW)

Technology

- WebEx: City and Governor’s Office are connecting to provide Q&A for reporters not in the pool

Key Messages

- Important Resources for Our Hospitals – Partnership to make this a reality
- Staffed with Army doctors and nurses for Non-COVID-19 with ER, X-Ray, and other medical uses
- Construction will begin soon + Seattle may see additional US Army personnel in the area

Staff:

- MO: Anthony Derrick: 260-247-2741

- Stephanie: 206-247-0475

Subject: FOOD SECURITY Coordination Team conference call / twice weekly check-in

When: Occurs every Monday and Thursday effective 03/19/2020 until 07/02/2020 from 14:00 to 15:30 Pacific Standard Time.

Where: 888-287-7315 Mtg Id: 315-5376 Host (JT or Katie Raines if JT unavailable) 2929#

Hello Team,

Please note Coordinate Team name change (need all the positive framing we can get these days). Let me know if you have a strong objection to the change.

Please continue to send me suggestions for team member additions so that I may add accordingly. Continue to forward to staff leads, as you deem appropriate until I get the list updated.

These meetings are scheduled twice a week, Mondays and Thursdays, through the end of June. The situation, as you well know, is fluid so the team makeup and team outcomes may change over the course of time and as per direction of Incident Command.

Please send agenda items by noon the day before each conference call.

Please contact me directly in between conference calls to highlight and discuss Hot Button issues that require elevation and/or immediate attention.

Your input on how these coordination calls go, the content, follow up, membership, etc., is extremely valuable. Please send concerns, ideas, and feedback to me directly.

Take good care. Talk soon.

Hello Team,

Please forward this conference call to appropriate state leads and staff.

I have been asked to serve as the Governor's office Coordinator for Food Insecurity/Hunger Issues.

Please note I have had to push this conference back to 1 PM as I have a meeting with our Chief of Staff at 12 noon on a related food/ag issue.

I look forward to meeting you all and doing good work!

Best,

JT

AGENDA

Welcome and Introductions

Identification of Agency Leads and Additional Partners Discuss "Chain of Command" and Points of Contact Identification of Immediate Actions, assign leads
Identification of Longer-Term Actions, assign leads Establish Daily Coordination Calls

DRAFT List of Issues for Discussion (will be edited as we go)

Mobilize Large-scale Restaurant Food Rescue Operation: assign small ad-hoc team, discuss coordination with hospitality association, county EDC's, transportation, communications

Repack household size food items, deliver to local hunger relief organizations

COVID-19 SNAP Requests

Get purchasing power to low income people on SNAP so they can purchase food and acquire rations during quarantine

Suspend implementation of ABAWD rule that is scheduled to go into effect 4/1

Provide additional months benefit early to allow for additional purchases

Increase the monthly benefit and expand eligibility to reduce reliance on overwhelmed food banks FUNDING Funding for temporary staffing to a) offset a depleted volunteer base (hunger relief significantly relies on senior volunteers who are showing up in reduced numbers due to their vulnerability to COVID-19) b) begin providing mobile market and home delivery for low-income infected and/or otherwise quarantined people unable to access food through other means; Funding for packing and re-packing supplies to a) pack food into self-contained boxes to give clients in open air environments to reduce person-to-person contact and b) to repack bulk commodities from OSPI/USDA for distribution in household sizes.

* Anecdotal - the largest food bank in Snohomish Count spent \$5,000 on 3/12 to purchase thousands of bags so that they could maintain food distribution with pre-packed food bags. Many other large food banks are making similar purchases to keep food flowing to low-income people; most of these organizations have reserves that can support these purchases for a short-time, but this pandemic is expected to take a huge toll on businesses, including the nonprofit sector, and government support will be needed to ensure that food continues to flow in the coming weeks and months.

Funding for sanitation supplies* - hand sanitizer, disinfectant wipes, increased professional cleaning services, hand washing stations, gloves, etc.

Funding for distribution costs - including leasing refrigerated vehicles, fuel, insurance, etc. to enable more food-safe home deliveries and mobile distribution units.

Additional funding to purchase food as donations dwindle due to social distancing and an increased number of quarantined people.

How National Declaration impacts funding and actions

Coordination call to establish information sharing and reporting across all lines of effort currently working on food security and food supply chain issues.

DRAFT AGENDA for MARCH 30, 2020

I. Roll Call

II. Updates from Unified Command Group (UGC) – JT & Derek

III. Fiscal Updates –

- a. OFM – State Funding Picture and Next Steps
- b. OFM – Private Funding Picture and Next Steps
- c. OFM/Gov Office request to NGOs

IV. Waivers, Federal Relief and/or COVID-19 Response Operations Status – Please include any current federal requests/needs, including from USDA

- a. OSPI
- b. DSHS
- c. WSDA
- d. DOH
- e. Governor's DC office
- f. NGOs

g. Food Policy Forum: WSDA and WSCC

h. state Legislators

V. Gap Analysis & Mapping –

a. Needs Assessment – baseline November 2019 data; monitor updates monthly or more frequently if we can develop real time reporting mechanism

i. Food insecure people seeking services at food bank (was 1.12 million in 2019; current estimate 1.5 million with possible peak at 2.5 million)

ii. Children enrolled in free and reduced lunch

iii. Seniors enrolled in meals on wheels

iv. Families enrolled in WIC

v. Households enrolled in SNAP, including legal immigrants funded by state SNAP program

b. Asset Inventory –

i. Availability and enrollment in Pandemic SNAP

ii. Access to and amounts of other food benefit programs like WIC and Fruit and Vegetable incentive programs administered by DOH

iii. Hunger Relief Organizations – must include cost analysis for each category

1. Food

2. Supplies – includes packing materials and sanitation

3. Human Resources – volunteer workforce and national guard deployments

4. Distribution – storage, transportation, and distribution points (aka food pantries)

c. Need minus Asset = GAP

i. Striving to develop a system that enables us to predict gaps so we can minimize interruptions in service and unmet need

ii. WSDA and WSU conversation scheduled this afternoon

VI. Communications –

a. Move to participant written reporting so meetings are assessment & future action oriented

i. JT/Katie to send out template for email reporting by COB 3/31 – response requested by 7PM 4/1; include congressional asks

b. Governor’s website status and input

DHS_Announcement:_Important_Message_on_Essential_Financial_Services_Sector_Workers_-_From_
U.S._Treasury_Secretary_Mnuchin

March 22, 2020 at 7:13 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

On behalf of U.S. Treasury Secretary Mnuchin, please see an important message regarding financial service sector guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

A message from U.S. Treasury Deputy Assistant Secretary for Cybersecurity and Critical Infrastructure Protection David B. Lacquement:

Workers across the financial services sector play an important role in supporting the American people and our Nation's economy. Consistent with the need to ensure access for essential financial services workers, Secretary Mnuchin issued the attached memorandum. This memorandum points to guidelines from the President and the Department of Homeland Security, which provides guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

Everyone should follow guidance from the Centers for Disease Control and Prevention as well as State and local officials regarding strategies to limit disease spread. We are dedicated to working closely with all of you to ensure the safety of the workforce and ensure the continued operations of the financial services sector in support of our Nation's economy.

Thank you for your continued support.

Coyle, Erin (AGR)

RE: Hunger Task Force inquiry

March 19, 2020 at 5:52 PM EDT

To: Granum, Nicolas

Cc: Linares-Hengen, Travis (MIL), Riedy, Michael J - APHIS, Treadwell, Randy (AGR), Austin, JT (GOV), Allen, Tristan (COM)

Hi Nicolas,

The Governor's Office has organized a Hunger Relief Task Force/COVID-19 Food Security Coordination Team. Members on this bi-weekly call include Governor's Office, WSDA, DSHS, OSPI, OFM, DOH, Commerce, EMD among others as needed. WSDA ESF 11 leads (myself and Randy Treadwell) have been coordinating with the WSDA liaisons on the task force to share pertinent tactics and updates around food assistance and hunger relief efforts to assist in a common operating picture and reduce potential duplication of efforts.

However, as the SEOC moves to a Unified Area Command, ESF 11 will be capturing Governor's Office Hunger Relief Task Force efforts for SEOC operations to coordinate with the broader response structure. This coordination piece is currently underway with WSDA Food Assistance representation, WSDA State Agency Liaisons (myself and Randy Treadwell) and the SEOC – Tristan Allen with Commerce/Business and Infrastructure Branch has been our point person for this.

The organizer of the call is JT Austin, Senior Policy Advisor – Natural Resources for the Office of Governor. Her contact number is 360-628-7440 and her e-mail is jt.austin@gov.wa.gov.

She would best for you to connect with regarding FEMA Region 10 – Recovery Division representation on the call. Both Tristan Allen and JT Austin are included on this e-mail for the benefit of their situational awareness.

Please let us know if you have any additional questions!

Erin Coyle

CISA Advisory

CISA releases Version 2.0 of the Essential Critical Infrastructure Worker Guidance originally published on March 19, 2020

As the Nation comes together to slow the spread of COVID-19, on March 16th the President issued updated Coronavirus Guidance for America that highlighted the importance of the critical infrastructure workforce.

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's authorities to secure critical infrastructure. Consistent with these authorities, CISA has developed, in collaboration with other federal agencies, State and local governments, and the private sector, an "Essential Critical Infrastructure Workforce" advisory list. This list is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. Decisions informed by this list should also take into consideration additional public health considerations based on the specific COVID-19-related concerns of particular jurisdictions.

This list is advisory in nature. It is not, nor should it be considered, a federal directive or standard. Additionally, this advisory list is not intended to be the exclusive list of critical infrastructure sectors, workers, and functions that should continue during the COVID-19 response across all jurisdictions.

Individual jurisdictions should add or subtract essential workforce categories based on their own requirements and discretion.

The advisory list identifies workers who conduct a range of operations and services that are typically essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing operational functions, among others. It also includes workers who support crucial supply chains and enable functions for critical infrastructure. The industries they support represent, but are not limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

State, local, tribal, and territorial governments are responsible for implementing and executing response activities, including decisions about access and reentry, in their communities, while the Federal Government is in a supporting role. Officials should use their own judgment in issuing implementation directives and guidance. Similarly, while adhering to relevant public health guidance, critical infrastructure owners and operators are expected to use their own judgement on issues of the prioritization of business processes and workforce allocation to best ensure continuity of the essential goods and services they support. All decisions should appropriately balance public safety, the health and safety of the workforce, and the continued delivery of essential critical infrastructure services and functions. While this advisory list is meant to help public officials and employers identify essential work functions, it allows for the reality that some workers engaged in activity determined to be essential may be unable to perform those functions because of health-related concerns.

CISA will continue to work with our partners in the critical infrastructure community to update this advisory list if necessary as the Nation's response to COVID-19 evolves. You can find the attached guidance as well as other COVID related information at cisa.gov.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

Lofy, Kathy H (DOH)

RE: Clark and Cowlitz counties - SW WA

April 08, 2020 at 1:40 AM EDT

To: JHB, seoc122 (MIL), Ezelle, Robert (MIL), Davis, Jerrod (DOH)

Cc: O'Hare, Michael, Peiper, Pam, Bowman, Casey, Evich, Jordan, Katims, Casey (GOV)

Hi Jaime,

I'm very sorry to hear that Clark and Cowlitz Counties have not received any PPE. As I told you on the phone, I have never ordered a PPE shipment to be pulled back, particularly a shipment that had been packed up to be delivered.

Unfortunately, our statewide demand for PPE still greatly exceeds our supply and as a result we still have many facilities in dire need of PPE. Since your region has not received any significant amount of PPE and you have outbreaks in your long term care facilities, I feel strongly that your orders (see below) should be pushed to the top of the list.

I have cc'd the logistics section chief, the director of the state emergency management division (Robert Ezelle) and our agency area commander (Jerrod Davis).

Jerrod, can you please check on this order and give Jaime a call tomorrow to update her on the status? Jerrod should also be able to help you get some testing supplies since we acquired 15,000 swabs today.

Thanks,
Kathy

From: JHB [mailto:JHB@mail.house.gov]

To: Lofy, Kathy H (DOH) <Kathy.Lofy@DOH.WA.GOV>

Cc: O'Hare, Michael <michael.ohare@fema.dhs.gov>; Peiper, Pam <Pam.Peiper@mail.house.gov>; Bowman, Casey <Casey.Bowman@mail.house.gov>; Evich, Jordan <Jordan.Evich@mail.house.gov>; Katims, Casey (GOV) <casey.katims@gov.wa.gov>

Subject: Clark and Cowlitz counties - SW WA

Kathy,

I'm following up on the voicemail I left you earlier today. On April 1, I was told by FEMA Administrator O'Hare that Clark and Cowlitz Counties would be receiving the PPE detailed below. When I followed up yesterday to see why it was not delivered, I was informed that it was packaged for shipment, and then was pulled back by you. It was explained that the materials were needed for long term care facilities elsewhere in the state. However, in Clark County we have outbreaks in nine long term care facilities, and there have been deaths and yet we don't have the supplies to test there. In the community the percentage of positive tests has doubled and the weekly percentage of hospital admissions with COVID-19-like illnesses has also doubled.

Cowlitz County reported Friday that they are down to one gown in their efforts to

treat patients. Not one box, one gown, which I am sure is gone by this point. Cowlitz fire does not have supplies to serve residents or emergency calls. They were counting on help from the public health department. As I'm sure you know, normal supply chain operations simply are not working for smaller providers or municipalities. Our larger hospitals are able to get some supplies through, but if you're small, isolated or rural you're out of luck.

I have worked tirelessly at the federal level to get PPE to the state, only to witness the state deliver nothing to most of my counties and less than 1% of what Clark County requested. I did not expect to get all that we asked for, but given our needs, I certainly expected something - and definitely expected what was told me. Can you please apprise me of your plans with regard to the order below?

Thank you for your time and attention. I realize it is a difficult situation for everyone right now.

Jaime Herrera Beutler
Member of Congress, WA 03
C: 360-609-0435

Clark County is getting:
Face Shield: 14500
Procedure Mask: 25200
Respirator: 5000
Sanitizing: 5509

Cowlitz:
Gown: 7500

FW: I&Q Plans

March 25, 2020 at 1:14 PM EDT

To: Baumgart, Jim (GOV), Linares-Hengen, Travis (MIL)

Cc: seoc84 (MIL), DOH-IC2 (DOH), DOH-OSC2 (DOH), Csernak, David (OS/ASPR/EMMO), Jennifer.Cockrill@hhs.gov, Davidson, Lisa, seoc44 (MIL), seoc43 (MIL)

Jim and Travis,

Here are the plans that DOH currently has in regards to Isolation and Quarantine Facilities. Attached is the original ConOps from 2016. I have also provided the current versions that we created for Shoreline's Quarantine mission, Maple Lane's I&Q mission, and an operational template that was made available for LHJ/Tribal partners to adapt.

Additionally, here is the link to the guidance for facilities that we have on our website: <https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/ConsidsforAssessAndRecLocs.pdf>

I don't have contact info for everyone, so please share this with your teams for their awareness of what DOH has in regards to I&Q.

My hopes of sharing everything in a consolidated manner is to get some better clarity on what is in place so that we can community and coordinate more effectively moving forward.

Jen and Dave, I'm Cc'ing you for your situational awareness.

Please send responses and inquiries related to I&Q to the seoc44 and seoc43 email boxes so that ESF-8 can better support you as I transition out of the ESF-8 desk.

Best,

Matthew Zimmerman
IMT Command Branch Director

Canceled: WA Congressional Call with Members and Staff

March 30, 2020 at 9:28 PM EDT

Cc: Katims, Casey (GOV), Baumgart, Jim (GOV)

All,

Providing dial-in information and the agenda. **Presenters should dial in for the event 15 minutes prior to the scheduled start time.** That number is **1-888-278-8469**. When prompted, provide the confirmation code **9767813** and state that you are a presenter. If you are supporting a presenter, I would say that so you have a line in case you do need to speak.

**BM__Hlk35860859 FEMA REGION 10 AND PARTNERS CONGRESSIONAL BRIEFING
FOR WASHINGTON MEMBERS AND STAFF**

AGENDA

Welcome and Roll Call (2 min)

- FEMA Region 10 Congressional Affairs Cam Rossie

Opening remarks (5 min)

- FEMA Region 10 Administrator Mike O'Hare

Partner Reports: (5 min each)

- Washington Emergency Management Division Director – Robert Ezelle
- Department of Health and Human Services – Capt. John Smart
- U.S. Small Business Administration – Cynthia Cowell
- Department of Defense – Col. Heath Roscoe
- FEMA Private Sector – Brett Holt
- FEMA Response Division – Lon Biasco
- FEMA Recovery Division – Lisa Davidson

Q&A (15 min)

Closing remarks – (1 min)

- HHS
- SBA
- EMD Director Ezelle
- Region 10 Administrator O'Hare

Thanks again!

Thank you all for sharing your valuable time to participate in yesterday's call. It went very well, though I will improve the technical side for next Tuesday's call – and am arranging an operator assisted line. Call-in information is coming. We will follow the same agenda. I hope to do these regularly at 10 am our time. Thank you all!

Cam Rossie

Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA for the states of California, New York and Washington, for states’ use

of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132,000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 27, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 26**, CDC and the Occupational Safety and Health Administration (OSHA) [released targeted guidance](#) to help meat and poultry processing facilities implement infection control practices to reduce the risk of transmission and illness from COVID-19 in these facilities.
 - Meat and poultry processing facilities present unique challenges for the prevention and control of COVID-19 transmission among workers.
 - Meat and poultry processing employers should implement a combination of

- engineering controls, cleaning and disinfection, social distancing, work practice controls, administrative controls, and use of personal protective equipment.
- Basic worker infection prevention information and training should be provided to all workers in a clear and accessible manner, including training on social distancing and ways to reduce the spread of infection. To ensure accessibility, multi-lingual materials should be considered and made available, as appropriate.
- FEMA, HHS and the Cybersecurity Infrastructure and Security Agency (CISA) along with other federal agencies are distributing cloth face coverings as part of a multi-prong approach to re-open American economic activity while continuing to limit spread of COVID-19.
 - As of **April 26**, 32.5 million cloth face coverings are being processed and distributed to state, local, tribal, private sector, and federal entities.
 - The facial coverings are being delivered in a phased approach for infrastructure workers, first responders and food producers who do not need medical-grade personal protective equipment (PPE) for their daily work. Distribution is based on CISA's analysis of priority infrastructure sectors.
 - The federal government will provide additional face coverings in production to states, territories and tribes for distribution, with priority to emergency services, food production and distribution, and other sectors that support community lifelines.
 - FEMA and HHS are also providing face coverings to federal departments and agencies with mission essential functions to promote health and safety in the workplace and in their execution of public-facing missions
 - As of **April 26**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 74.7 million N95 respirators, 104.8 million surgical masks, 7.2 million face shields, 15 million surgical gowns, 798 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
 - The U.S. has now processed 5.2 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following

the event, the video will be available for download via the [King County TV streaming page](#).

Subject: FEMA Region 10 Weekly Grocer Supply Chain Call

When: Occurs every Wednesday effective 3/25/2020 until 6/3/2020 from 11:00 AM to 12:00 PM
Pacific Standard Time.

Where: 888-270-9936 #7144951 | Adobe Connect: [HYPERLINK](#)

["https://fema.connectsolutions.com/femar10grocer/"](https://fema.connectsolutions.com/femar10grocer/)

<https://fema.connectsolutions.com/femar10grocer/>

This is the standing weekly meeting between local/state/federal emergency management and members of the grocery industry to coordinate operations and communicate issues relevant to the AK, ID, OR, and WA response to COVID-19.

This replaces the Washington only and Oregon only grocer calls.

Call In Information

Phone: 888-270-9936 #7144951

Adobe Connect: [HYPERLINK](#) ["https://fema.connectsolutions.com/femar10grocer/"](https://fema.connectsolutions.com/femar10grocer/)

<https://fema.connectsolutions.com/femar10grocer/>

BM__InsertRtfSavedPosition Due to the potential size of the audience, we will not take roll call on the phone.
Log-in to Adobe Connect with your name and company. You will still need to dial in on the phone.

If you have never used Adobe Connect, be sure to [HYPERLINK](#)

["https://fema.connectsolutions.com/common/help/en/support/meeting_test.htm"](https://fema.connectsolutions.com/common/help/en/support/meeting_test.htm) test your Adobe Connect connection
prior to the webinar.

COVID-19 FEMA National Hot Issues and Social Listening Reports - 4/11/20

April 11, 2020 at 6:09 PM EDT

To: Undisclosed recipients:

Good afternoon,

We are not producing a social listening and media analysis report out of Region 10 this weekend. We have included the national hot issues and national social listening reports. If you don't want to open the documents attached, we would like to bring to your attention the Region 10 section from the national social listening report below.

Region 10

Alaska

- The mayor of Anchorage [requested an extension of his emergency powers](#) from the city council.
- Major private land owners criticized state officials for using the pandemic as a justification to approve [construction of a 200 mile road](#) through private property.
- The [Salvation Army Alaska Division](#) is struggling to keep up with demand for food services.

Idaho

- Idaho's new [COVID-19 cases dropped by about 55%](#) from last week.
- [Boise State University](#) will open student housing for local healthcare workers.
- Hailey City Council voted to [extend the city stay-home orders](#), which are more strict than existing state orders.
- [Two Boys and Girls Clubs locations](#) received a \$25,000 donation to support children and their families.

Oregon

- A [federal shipment of PPE arrived in Oregon](#) just as the state's reserves of N95 masks and face shields had dropped to zero.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_14

April 14, 2020 at 4:24 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- HHS announced five new contracts for ventilator production rated under the Defense Production Act (DPA), to General Electric, Hill-Rom, Medtronic, ResMed, and Vyaire, as well as two other contracts for ventilator production, to Hamilton and Zoll.
 - In total, combined with contracts with [General Motors](#) and [Philips](#) rated under the DPA issued last week, HHS has finalized contracts to supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
 - The seven new ventilator contracts announced by HHS this month will provide

a total of 137,431 ventilators by the end of 2020.

- The thousands of ventilators delivered to the Strategic National Stockpile starting this month, continuing through the spring and summer, will provide more capacity to respond to the pandemic as it evolves.
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
- On **April 13**, The Department of Homeland Security and FEMA announced the funding notice for an additional \$100 million in supplemental Emergency Management Performance Grant Program funds.
 - The money is available to all 56 states and territories as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. All applications must be submitted on [Grants.gov](https://www.grants.gov) by April 28.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.
- FEMA [issued guidance](#) on the framework, policy details and requirements for determining the eligibility for FEMA reimbursement of states purchasing and distributing food to meet the immediate needs of those who do not have access to food as a result of COVID-19 and to protect the public from the spread of the virus.
 - State, local, tribal, and territorial governments with the legal responsibility for protecting life, public health and safety are eligible applicants under emergency and major disaster declarations for the COVID-19 pandemic.
 - Applicants may enter into formal agreements or contracts with private

organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the pandemic.

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

April 14, 2020 at 7:31 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding eligibility requirements for expenses incurred from the purchasing and distribution of food relating to COVID-19 response operations.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA [issued a new policy](#) that addresses the purchase and distribution of food eligible for Public Assistance funding under emergency and major disaster declarations for the COVID-19 pandemic.

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following

the event, the video will be available for download via the [King County TV streaming page](#).
Media questions: [Chase Gallagher](#), King County, 206.263.8537

FEMA Region 10 Private Sector COVID-19 Update for April 24

April 24, 2020 at 1:29 PM EDT

To: Undisclosed recipients:

FEMA REGION 10 PRIVATE SECTOR COVID-19 UPDATE

APRIL 24, 2020

Good Morning Region 10 Partners

The FEMA National Business EOC call will be today at 12pm PST. Details below in the meeting section. We've included updates about dashboards, messages, state re-opening plans, and calls.

Continue to contact me for questions, comments, or be added to the distribution list. Feel free to distribute.

Updates noted in blue.

FEMA Fact Sheets/Messages

Fact Sheet: Coronavirus Pandemic: Additional \$100 million available to Firefighters [see attached]

- Fire service organizations nationwide with membership on the front lines in the fight against the coronavirus (COVID-19) pandemic will soon be able to apply for a share of \$100 million in funding to purchase personal protective equipment and supplies. The funding is part of the Coronavirus Aid Relief and Economic Security (CARES) Act through FEMA Assistance for Firefighters Grant Program (AFGP).

FEMA will begin accepting applications for the Fiscal Year 2020 Assistance to Firefighters Grant - COVID-19 Supplemental Program (AFG-S) on Tuesday, April 28. The deadline for applications is May 15. AFG-S provides direct financial assistance to eligible fire departments, nonaffiliated emergency medical service organizations and state fire training academies. Those who would like to start planning their application before the application period can access the Notice of Funding Opportunity and technical assistance tools on the [FEMA website](#). The online AFG-S Grant Program application is available through the AFGP [FEMA Grants Outcomes \(GO\) application portal](#).

Fact Sheet: FEMA Implementation of Allocation Order on Exports of Scarce PPE and Notice on Exemptions

- FEMA published a Temporary Final Rule and subsequent notice in the Federal Register on April 10 and April 17, 2020, outlining implementation of the President's Memorandum, "Allocating Certain Scarce or Threatened Health and Medical Resource to Domestic Use." The Temporary Final Rule is an allocation order issued by the FEMA Administrator to review exports of five types of Personal Protective Equipment (PPE), also referred to as "covered materials," needed to respond to the coronavirus (COVID-19) pandemic. The second notice provides guidance on the implementation of the allocation order and includes several types of shipments that will generally be exempted from hold by U.S. Customs and Border Protection (CBP).

Trends and Analysis

National Business Emergency Operations Center (NBEOC) Snapshot (see attached)

The NBEOC produces a daily Snapshot on business and industry domestic supply chains. You can find these each morning on the [NBEOC Dashboard](#) in the 'Snapshot' pod. I attached today's Snapshot for your review.

Key Highlights for April 24

- Jobless claims for the week ending April 18th was 4.4 million.
- Analysts suggest that unemployment could exceed 32.1% in the second quarter with Gross Domestic Product expected to drop by 30-50%
- More meat and slaughter plant closures are increasing volatility in food markets with significant regional and national implications for animal protein supply.
- With recent Tyson closures, about 18% of hog slaughtering capacity is off-line.

Google Mobility Reports (updated)

Google is producing [Public Community Mobility Reports](#). The reports chart movement trends over time across the US and the world, so you can see how movement has changed at retail, parks, workplaces, grocery stores and the like in your state during the pandemic; down in some instances to the county level. Below are links to current reports for Region 10 states (unsure on frequency of change).

- [Alaska \(updated 4/11\)](#)
- [Idaho \(updated 4/11\)](#)
- [Oregon \(updated 4/11\)](#)
- [Washington \(updated 4/11\)](#)

Data dashboard: How coronavirus / COVID-19 is impacting local business revenue across the U.S.

- [Tracking the impact](#) of coronavirus on revenue at small, local businesses across the country.

PPE Exchange

The [Private Sector PPE Exchange Dashboard](#) is now live.

The PPE Exchange is a simple to use Dashboard to connect private sector sellers with private sector buyers. The users enter their own information and update as needed.

PPE (focus is on these products)

- N95 Masks
- Surgical Masks
- Non-surgical Masks
- Gloves
- Gowns
- Booties

It's Simple to Connect

1. Log-in with your name and company on the [dashboard](#)
2. Follow instructions on completing either the need or sell section.
3. Contact individuals via their provided contact information.
4. When you log out of the Dashboard, your information remains, but no one can connect with you in the Dashboard. Providing your contact information is important.
5. The *dashboard clears each weekend* to ensure information is up-to-date

FEMA does not endorse any vendors. This dashboard is not for government contracting.

COVID-19 FEMA Social Listening Reports April 12, 2020

April 12, 2020 at 4:46 PM EDT

To: Undisclosed recipients:

Good afternoon.

Happy Easter and Passover.

We are on break from our reporting schedule this weekend of regional social listening in the region, and will be back at it starting tomorrow morning. Attached are the national hot issues and national social listening reports.

Below, you will find the section from the national listening report on observations for Alaska, Idaho, Oregon, and Washington.

Region 10**Alaska**

- A recent [plane crash investigation](#) was delayed due to COVID-19 concerns, and investigators are pending permission from supervisors to visit the crash site.

Idaho

- The Idaho National Guard has deployed [45 soldiers and airmen](#) to assist overwhelmed staff at food banks and pantries.
- A county chairman is asking the governor to [list lottery tickets as non-essential](#). His county borders Utah, which bans gambling and does not currently have a shelter-in-place order. He is concerned that too many people are crossing the state border to buy lottery tickets.
- Small Idaho businesses are [reporting to depend on the Small Business Administration's loans](#) to be able to withstand the economic hit from COVID-19.
- The [Coeur d'Alene beach will remain open](#) as long as people follow social distancing guidelines on the terrain.
- The state's superintendent reported that [schools might remain closed](#) until there is a vaccine available within 12 months.

Oregon

- Local media reported that [social distancing is working in Oregon](#) as the number of new confirmed positive cases give indication that social distancing prevented tens of thousands of cases initially projected.
- The state's self-service rule was [extended through April 25th](#).
- According to the Oregon Association of Hospitals and Health Systems some rural hospitals in Oregon are reporting up to a [60% revenue loss](#) over the past month resulting in layoffs.
- Dutch Bros. Coffee will donate [100% of its April profits](#) to First Responders First which provides equipment and resources to medical workers on the front lines.

Washington

- Local news reports the isolation, quarantine site at the Angel of the Winds Arena is [going largely unused](#). Most are glad to hear that it has been available but has not been needed, a smaller number feel it is a waste of resources.
- Olympic National Park has [closed beaches and coastal areas](#). The National Park Service will notify the public when it resumes full operations at these recreation sites through the Olympic National Park website and social media.

Thank you for all of your efforts to flatten (or crush) the curve, and help us navigate through these challenging times.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 18, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing

resources to reopen safely and responsibly.

- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

Administrator_Gaynor_Sends_Letter_to_Emergency_Managers

March 27, 2020 at 1:31 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on COVID-19.

FEMA

March 27, 2020

Administrator Gaynor Sends Letter to Emergency Managers

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. Today, Administrator Gaynor sent the following letter to emergency managers outlining critical steps to help the nation respond to COVID-19:

Fellow Emergency Managers,

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. I thank you for your tireless efforts under these unprecedented and very demanding circumstances.

I write to you today as the Administrator of FEMA and a former state and local emergency manager. Now more than ever, we must work as a team to deliver locally executed, state-managed, and federally supported solutions on behalf of the American people. The best and the brightest emergency managers, public health officials, private industry partners, scientists, and medical doctors and nurses are assembling at FEMA Headquarters and in our regional offices; in your state and local emergency operations centers; and in hospital operations centers across the country. This is truly a whole-of-nation response. Rest assured, the full weight of our Nation is supporting all of us to overcome the pandemic and I have no doubt that we will be successful in defeating the spread of COVID-19.

To be successful across the nation – from the smallest town, tribal nation, island, and to the largest city – we must act decisively and immediately. Today, many of you are at the center of the battle, in places like New York, Washington, California, and Louisiana. Others of you may only have a few cases. It is our collective responsibility to do our very best today, so we can continue to blunt the spread of COVID-19. If you have excess capacity, please consider using EMAC to offer resources that your peers from around the country may need.

As the Nation's lead emergency manager, I want to be completely transparent about our national response and your responsibility to respond proactively and aggressively. To that point, I would like to share seven critical steps that I ask you to **immediately** consider and act upon.

First, mitigation works. Ensure you preserve your “force” while maintaining the ability to respond in a COVID-19 degraded environment without access to the tools typically used in an emergency or disaster like mutual aid and EMAC. Ensure that your communities, small or large embrace mitigation efforts. Every American has a role to play in defeating COVID-19, including good hygiene and social distancing. Follow the President's [15 Days to Slow the Spread](#).

Second, integrate all emergency management and public health operations. Identify and integrate your leading health official into your Emergency Operations Center and Unified Command Group at every level of government. You must form a unified Emergency Management – Public Health Team. Ensure that the entire state political leadership team understand the emergency management process. All requests to the Federal government must be formally communicated by the state's emergency manager to the FEMA Regional Administrator. This is the same process as natural disasters.

Third, collect public, private, and government hospital bed capacity data, if you haven't already – total beds, acute care beds, normal occupancy, predicted surge occupancy. This data will assist you in crafting requests for high demand, low density critical resources should the time come that you may need it. We must use all data wherever possible to allocate scarce resources, including consideration of population size, demographics, and vulnerability.

Fourth, actively plan to stand-up Alternate Care Sites. Be creative in identifying facilities that can support low acuity patients and require a minimal amount of medical staff, already in short supply. Consider locations such as convention centers, hotels, shuttered hospitals, college or university dormitories, or vacant open space in commercial buildings. Ask your FEMA Regional Administrator to brief you on the US Army Corps of Engineers “Hotel to Healthcare” initiative. If you need a plan, here is a [link](#) to a plan.

Fifth, maintain situational awareness of ventilators that may be used across your area. Check hospitals, acute care sites, outpatient locations, and any other location that may use these devices, especially those that may be a source for reallocation to an area of greater need. Like hospital bed capacity, this data will help you understand what you have and what you may need, informing your resource management strategy for these high

demand, low density critical resources should the time come that you may need it. Just as we are moving resources nationally, you should also be moving resources within your state.

Sixth, identify all sources to surge medical professionals. Look for retirees, medical contract services, nurses, respiratory therapists, medical students, and emergency medical technicians or local equivalents. You will need them to support the increased hospital surge and management of patients on ventilators and you should be cataloging and training them now, as appropriate.

Seventh, manage Personal Protective Equipment (PPE) carefully. We have stood-up the *Supply Chain Stabilization Task Force* within FEMA with the purpose of increasing the flow of critical medical supplies such as N95 masks, surgical masks, and ventilators. We are using four guiding principles: 1) preserve what we have; 2) locate medical stockpile around the globe; 3) distribute them to locations most in need; and 4) build capacity in America through partners with industry. While some of these strategies will yield near-term benefits, it must be your highest priority to carefully manage what you have available to you now.

To help you with this, the CDC produced a [Personal Protective Equipment \(PPE\) Burn Rate Calculator](#). This spreadsheet-based model provides information for healthcare facilities to plan and optimize the use of PPE for response to COVID-19. Similarly, non-healthcare facilities (e.g., correctional facilities) may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

FEMA will reimburse all eligible expenses for emergency protective measures under the Stafford Act; however, do not wait for the PPE from the Federal government to show-up. Take aggressive action now to source your own. Because of the actions the Administration and federal government is taking, you will begin to see PPE supplies come online in the weeks ahead as the commercial distribution chain adapts as well as the quantities of shipments from the Strategic National Stockpile continue to move. Continue to be resourceful, ask the building trades to donate PPE or that they allow you access to their supplier; and, ask dental and outpatient offices that are closed to donate PPE to local hospitals and care critical care sites. And finally, I ask you to review and utilize the guidance the *Supply Chain Stabilization Task Force* released regarding guidance for PPE.

Lastly, some [external communication](#) resources that may be helpful:

- **[Best Practices](#):** This page provides a platform for sharing best practices and lessons learned by the government, private sector, academic institutions, professional associations, and other organizations to support the whole of community response.
- **[Rumor Control](#):** This page is to help the public distinguish between rumors and facts regarding the response to COVID-19.
- **[How to Help](#):** This page provides guidance on how to **donate** critical resources & supplies; how to **do business** with FEMA; and, how to **volunteer**.

These are unprecedented times and many lives are potentially at stake. We are doing things many of us have never imagined, especially at this scale. As professional emergency managers, we are built for this – this is what we do best; coordinate, problem-solve, and act. I ask all of you to lead, innovate, and be resourceful. This is a whole of nation response and I need every emergency manager to be an active participant.

We are emergency managers and America needs us at our best.

Respectfully,

Pete Gaynor
Administrator

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

March 30, 2020 at 1:00 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 30, 2020

FEMA Advisory

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

“This response isn’t just about delivering food or supporting COVID test centers. It’s about protecting our children, parents, and grandparents. Our Nation is looking to the National Guard to help them and we can’t let them down.” – Air Force Gen. Joseph Lengyel, Chief of the National Guard Bureau

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people. The latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates

\$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA, for some states' use of their National Guard forces. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32.

FEMA coordinated an air bridge for flights from Asia beginning on Sunday, March 29, with the first delivery of 80 tons of much needed PPE supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 10.3 million gloves and thousands of thermometers for New York, New Jersey and Connecticut. Additional flights are contracted to go to Illinois today and to Ohio tomorrow. FEMA has scheduled additional flights and is adding more daily.

Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (180) and Connecticut (50).

Twenty-seven states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), the Strategic National Stockpile, Ventilator Guidance, CDC Respirator Guidance, Defense Production Act, CDC Public Guidance, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

Davidson, Lisa

RE: WASOC Isolation & Quarantine Coordination Call

March 30, 2020 at 9:39 PM EDT

To: SEOC44@mil.wa.gov, IMT7 Operations (OS/ASPR), Granum, Nicolas, jim.baumgart@gov.wa.gov, tedd.kelleher@commerce.wa.gov, Urbas, Gary, Bova, Rebecca, Clayton, David, matthew.zimmerman@doh.wa.gov, DOH-IC2 (DOH), DOH-PSC2 (DOH), Davis, Jerrod (DOH), seoc84 (MIL), McClung, Timothy (DOH), Linares-Hengen, Travis (MIL), DOH-AreaCommand, DOH-OSC2 (DOH), FEMA-R10-PA-ESF-COVID19, Chang, Jennifer C NWD, Henderson, John M CIV USARMY CEMVK (USA), Long, Scott W CIV USARMY CENWS (USA), seoc90@mil.wa.gov, seoc100@mil.wa.gov, Harris, Gary, Lujan, Lewis (MIL), seoc44 (MIL), seoc43 (MIL), frank.schitoskey@doh.wa.gov, seoc.intelsectchief@mil.wa.gov

Cc: McClain, Stacey, Schitoskey, Frank C (DOH), Stanley, Trevor, DOH-SOFR2 (DOH)

Thank you all for joining the call today. Here is a brief summary of the call and some documents that were provided to the workgroup previously.

Structure:

- Tumwater IMT will lead this workgroup
- First meeting Wednesday Morning at 10am

Guidance:

- State DOH has provided this link and the attached guidance:
<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/ConsidsforAssessAndRecLocs.pdf>

Reporting:

- Tumwater IMT has access to Commerce data through basecamp
 - First commerce requested reports due on 3/31
- State PA (Gary Urbas) will notify Tumwater IMT of non-congregate sheltering approvals received through the PA program
- Unclear if IMT has DOH/HHS ESF8 data that was gathered last week (to Lisa for action)
- Reporting structure needs to be established to share info in IAP/SitRep and other leadership briefs
 - Location, capacity, occupancy, shortfalls

Resources:

- Tumwater IMT will identify logistics support requests during its data collection
- Logistics support requests that cannot be filled by IMT will be processed through WAEMD RRF process
- IMT looking for demographics on homelessness, vulnerable populations, dialysis, etc. in counties

-----Original Appointment-----

FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Service created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

The task force's primary effort is the sourcing of personal protective equipment (PPE), ventilators and other critical resources requested by states, tribes and territories. By using the structure of FEMA's NRCC, the task force is finding and executing solutions to meet urgent demand and enable the U.S. Government to surge support to COVID-19 "hot spots" as they arise.

The strategy is executed through a four-pronged approach: Preservation, Acceleration, Allocation and Expansion to accelerate and expand the pipeline of medical supplies and equipment.

The first prong represents a critical whole of America effort: **Preservation** of current supplies. The reuse of PPE can quickly expand the capacity to meet the existing needs. It's important that the medical community follows Centers for Disease Control guidelines for the proper use of PPE including reuse guidance. The task force is in the process of developing and verifying techniques to clean and recycle PPE.

Second, **Acceleration** of industrial manufacturing is required to meet the urgent market demand. Manufacturers are ramping up production of critical resources and have extended operating hours to increase production above their standard levels. A rapid acquisition process by the joint FEMA-HHS contracting team was established to evaluate and act on solicitations. FEMA is also expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.

Third, **Expansion** of the industry is also taking place in manufacturing. Manufacturers are enhancing production capacity with additional machinery or re-tooling assembly lines to produce new products needed in the fight against the virus. The task force is engaging manufacturers, distributors and healthcare networks to build the next phase of supply chain stabilization.

Fourth, **Allocation** of critical resources focuses on ensuring the right quantities of supplies get to the right place, at the right time. Using a data-driven distribution approach that considers demand and supply ensures resources go where they are most needed. FEMA is focusing allocation of critical resources to areas experiencing the greatest increase in COVID-19 cases with the largest forecast capacity shortfalls. This approach also considers the at-risk population distribution across the Nation.

To make effective decisions about resources, a National Resource Prioritization Cell was established to unify government and private industry prioritization recommendations. These recommendations will further inform federal, state and private sector operations.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_13

April 13, 2020 at 3:03 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators

to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.

- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

Coronavirus_(COVID-19)_Pandemic_Community-Based_Testing_Sites_Transition

April 10, 2020 at 8:48 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Community-Based Testing Sites.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Community-Based Testing Sites Transition

The Department of Health and Human Services and the FEMA worked with state and local partners to establish Community-Based Testing Sites (CBTS) in CDC-prioritized locations across the country. The CBTS model was developed for states, local public health agencies, healthcare systems, and commercial partners as they work together to stop the spread of coronavirus (COVID-19) in their communities, focusing initially on healthcare facility workers and first responders.

The CBTS model has been a profound success, screening over 84,800 individuals; testing over 77,000 individuals; and having a COVID positive rate of approximately 20% - meaning that the CBTS are testing the right individuals at the right time. Since the onset, we have also led technological advances, such as the validation of nasal self-swabbing, which has minimized the need for trained health professionals and personal protective equipment.

As a result of these advances, many states have indicated that they want to fully transition the CBTS to state control, allowing more flexibility in testing and reporting. Many states have already begun transitioning these programs, and other states have implemented testing sites based on the CBTS model.

Therefore, the federal CBTS Task Force is working with states to clarify whether sites want to continue as they are now, or transition to full state control. Under state control, CBTS sites would still receive technical assistance from the federal government and be able to

request supplies through the normal FEMA systems.

The CBTS Task Force will continue to work closely with the states and FEMA Regions to ensure a successful transition and ensure that each state has the flexibility and autonomy to manage and operate testing sites within the needs of their specific community.

Transition Plan

The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.

Potential advantages of a fully state-managed site include:

- The opportunity for the states to better serve their own communities, while leveraging federal support to augment their state's success.
- The potential to expand patient throughput to >250 per day, use a credentialed provider of their choice, and route patient samples to a lab of their choice.
- The ability to use a locally run call center or the regular state notification processes for public health results.

Responsibilities

The USPHS Commissioned Corps officers onsite (1-3 per location) will work with the site manager to plan for and complete the transition checklist and will verify that the site is ready for transition to the state. Once the sites are transitioned to the states, each state will be responsible for:

- Assuming responsibility for staffing their sites to ensure quality control, safety, biohazard waste management, and security;
- Assuming responsibility for the credentialed provider to order the labs;
- Procuring and managing their own cadre of supplies (e.g., personal protective equipment, test kits, etc.); requests for continued federal support should be made through the normal FEMA process;
- Contracting for lab testing; and
- Managing patient notification process for results, while maintaining patient privacy under the [Health Insurance Portability and Accountability Act of 1996 \(HIPAA\)](#).

After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.

Eligibility for Reimbursement under FEMA's Public Assistance Program

States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share. Costs should be reasonable and necessary to address the public health needs of the event and all costs incurred should be documented. More information on what COVID-19 activities are eligible for reimbursement under the Public Assistance Program can be found in the [COVID-19 Pandemic: Eligible Emergency Protective Measures fact sheet](#) and the [COVID-19 Pandemic: Emergency Medical Care fact sheet](#). Information on how to apply is available in the [COVID-19 Pandemic: Public Assistance Simplified Application fact sheet](#). More information on contracting and procurement can be found in the [Procurement Under Grants: Under Exigent or Emergency Circumstances fact sheet](#).

FEMA_Stakeholder_Advisory:_State-Managed,_Federally-Supported_COVID-19_Response_Continues

March 24, 2020 at 12:13 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 24, 2020

FEMA Advisory

State-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

CISA_and_NCSC_Joint_Activity_Alert_-_COV ID-19_Exploited_by_Malicious_Cyber_Actors

April 08, 2020 at 11:29 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding a joint activity alert on COVID-19 exploitations by malicious cyber actors, found [here](#).

April 8 2020

CISA Alert

CISA and NCSC Joint Activity Alert - COVID-19 Exploited by Malicious Cyber Actors

Partners,

As the nation and the world continues to fight against this newest coronavirus, COVID-19 — the Cybersecurity and Infrastructure Security Agency (CISA) continues to monitor how the crisis is affecting the American public on the cybersecurity and infrastructure security front.

Today, CISA and United Kingdom's National Cyber Security Centre issued an activity alert titled, *COVID-19 Exploited by Malicious Cyber Actors*. This joint alert seeks to address the growing use of COVID-19-related themes by malicious cyber actors and it can be found here: <https://www.us-cert.gov/ncas/alerts/aa20-099a>.

CISA and NCSC see the surge of reporting about malicious cyber activity using COVID-19 to prey on people's goodwill, curiosity and concern, and exploit organizations that establish remote work options. Specifically, this alert discusses the exploitation of virtual private networks, phishing email and text messages about COVID-19, and websites deceptively advertised as COVID 19 sites.

We are sharing this information to help you and your team effectively assess your cybersecurity posture and ensure appropriate mitigation is in place. The alert provides many

resources to help detect and prevent COVID-19 malicious activity on your networks. Industry partners played a key role in helping CISA and NCSC teams determine which IOCs to include in this alert and they continue to be integral to CISA's mission as the nation's risk advisor.

We encourage you to share this alert with anyone who might be able to use it. We will continue to keep you updated as more information becomes available.

For authoritative information and resources on COVID-19 -- including situation reports, guidance, and more, visit the CDC's website and [CISA.gov/coronavirus](https://www.cisa.gov/coronavirus).

Thank you,
CISA

FEMA_and_Our_Partners_Remain_Actively_Engaged_to_Support_State-Managed_Coronavirus_Response

March 28, 2020 at 1:56 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 28, 2020

FEMA Advisory

FEMA and Our Partners Remain Actively Engaged to Support State-Managed Coronavirus Response

“I can tell you this weekend, we will be reporting on aggressive efforts that our supply stabilization task force at FEMA is taking to import medical supplies from around the world.” – Vice President Mike Pence

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- Apple and CDC, together with the White House and FEMA, launched a [new website](#) and app with a COVID-19 screening tool and resources to help people protect their health.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is

shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. We are sending more every day, and we are working nonstop to acquire or produce even more.

Today, the US-NS *Comfort* will be underway today from Norfolk, VA to New York, NY.

- The *Comfort* will arrive at Pier 90 in Manhattan on Monday – only approximately a mile away from the Javits Convention Center where the U.S. Army Corps of Engineers are actively constructing a 2,910-bed alternate care facility.
- The *Comfort* is equipped with 12 operating rooms, 1,000 hospital beds, a medical laboratory, a pharmacy, an optometry lab, digital radiology services, a CAT-scan, two oxygen producing plants, a helicopter deck and a crew of nearly 1,200 U.S. military personnel.
- The crew onboard the *Comfort* will provide critically needed medical surge capacity for New York Metropolitan area. Their mission will be to care for New Yorkers who do not have COVID-19, but who require urgent medical care.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.

- This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
- Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act to avoid governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Michigan, Missouri, South Carolina, Texas, Washington, the commonwealth of Puerto Rico, and the territory of Guam were approved for major disaster declarations to assist with additional needs identified in these states. Seventeen states and four tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

Subject: RE: Hunger Task Force inquiry

Hi Nicolas,

The Governor's Office has organized a Hunger Relief Task Force/COVID-19 Food Security Coordination Team. Members on this bi-weekly call include Governor's Office, WSDA, DSHS, OSPI, OFM, DOH, Commerce, EMD among others as needed. WSDA ESF 11 leads (myself and Randy Treadwell) have been coordinating with the WSDA liaisons on the task force to share pertinent tactics and updates around food assistance and hunger relief efforts to assist in a common operating picture and reduce potential duplication of efforts.

However, as the SEOC moves to a Unified Area Command, ESF 11 will be capturing Governor's Office Hunger Relief Task Force efforts for SEOC operations to coordinate with the broader response structure. This coordination piece is currently underway with WSDA Food Assistance representation, WSDA State Agency Liaisons (myself and Randy Treadwell) and the SEOC – Tristan Allen with Commerce/Business and Infrastructure Branch has been our point person for this.

The organizer of the call is JT Austin, Senior Policy Advisor – Natural Resources for the Office of Governor. Her contact number is 360-628-7440 and her e-mail is jt.austin@gov.wa.gov.

She would best for you to connect with regarding FEMA Region 10 – Recovery Division representation on the call. Both Tristan Allen and JT Austin are included on this e-mail for the benefit of their situational awareness.

Please let us know if you have any additional questions!

Decisive action taken today will protect Americans

March 21, 2020 at 11:01 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

US-Mexico-Canada Travel Restrictions

Decisive action taken today will protect Americans, slow the spread of the virus, and help save lives:

- The United States is cooperating closely with Canada and Mexico to ensure that North America has a coordinated approach to combating the pandemic caused by the coronavirus.
- The United States and Canada have agreed to restrict travel at our land border to essential travel only.
- Similarly, the United States and Mexico are finalizing an agreement that will facilitate only essential travel at our southern border.

We are maintaining cross-border activities with Canada and Mexico that support health security, trade, commerce, supply security, and other essential activities while taking critical steps to protect our citizens and to curb spread of the virus.

For more information on these measures please visit the [White House fact sheet](#).

Hi all,

apologies for the churn. Sending the updated advisory below in 10.

UPDATED WITH WEBEX INSTRUCTIONS AND NEW RADIO POOL LEAD.

**HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive
Constantine join FEMA Region 10 Administrator Mike
Oâ€™Hare and Brigadier General Doug Cherry To Discuss
Deployment of Field Hospital at CenturyLink Field Event Center**

Seattle (March 28, 2020) â€” Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital at Fort Carson, Colorado who have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via [WebEx](#). It will also be streamed live on Seattle Channel.

Seattle Times will serve as the print pool, **KIRO Radio will serve as radio pool**

(hscott@bonneville.com), and KIRO will serve as the TV pool.

WHO: Governor Jay Inslee, King County Executive Dow Constantine, Mayor Jenny A. Durkan, FEMA Region 10 Administrator Mike Oâ€™Hare, and Brigadier General Doug Cherry

WHEN: Saturday, March 28, 1:30 p.m.

WHERE: CenturyLink Field Event Center, 800 Occidental Ave S. in Seattle, WA

Instructions for WebEx

- Register here:
<https://stateofwashington.webex.com/stateofwashington/onstage/g.php?MTID=ec0d68604c42d99978b3f447d6b238b8b>
- Please provide: Name, E-mail address, phone number, news organization.
- The conference will start at 1:30 PM.
- Press, please join the call at 1:15 PM. We will run through procedure and test the system to ensure we can answer your questions without technical issues.

Instructions for Q&A

- If you would like to ask a question, you must log in to the teleconference via WebEx. We will not be taking questions via phone.
- If you would like to ask a question, please RSVP. Email: ([INNERST EMAIL ADDRESS HERE](#)) Please include your name, news organization and if you want to ask a question.
- We will control muting from our system. You do not need to mute yourself.
- When we call on you, announce your name and news organization. Please do not ask if we can hear you. If your question is for a specific person, please include that information, as well.
- For ideal audio and video quality download the Webex Meetings Application.
- If you are unable to join through WebEx, you may listen in via phone: +1-408-418-9388, Access code: 263 676 232.

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photogs.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has

flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.

- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Re: ADVISORY: Inslee to join federal and local leaders at Century Link Events Center, site of new field hospital.

To: Brehmer, Savannah

Not 100% sure, but here are two contacts. One of them should be able to help you.

Rob Kaseberg - rkaseberg@kiro7.com
Essex Porter - eporter@kiro7.com

Also, sounds like they are sending out an updated advisory soon.

Re: Impacts to WA Family Potato Farms Regarding COVID-19

April 17, 2020 at 2:58 PM EDT

To: Ike, Ryan, Kraft, Rep. Vicki, Bickford, Nancy (MIL), Austin, JT (GOV)

Cc: Daniells, Patty, partnerships@usda.gov, FEMA-IGA, Granum, Nicolas

Hello Rep. Kraft and Ike,

Thank you so much for bringing the State Emergency Operations Center - Human Services Branch into the conversation.

I can share with you that we hear daily from counties agencies, food banks, the deployed National Guard and service agencies staffing food banks that they are indeed struggling to keep up food stock with the double and triple visitor rates they are experiencing across the state. Regular grocery store donations have also dwindled and they are working miracles to source food daily, from the big distributors to the small pantries.

are sharing WSDA information (see newly release attached info sheet) and WA Food Fund information (second attachment) on food supply as we have it available. We are keeping close partnership with Food Security Coordination Team to support and share information on their incredible efforts.

Our branch and the SEOC is currently best supporting food banks via counties with staffing resources, such as National Guard, Red Cross, AmeriCorps, Washington Conservation Corps, WA VOAD and Team Rubicon.

We would love to partner, share information and support food banks and their counties on supply solutions as they become available.

Please let me how our branch might support these important efforts.

Best, Sara McCaslin

Good afternoon, Rep. Kraft.

Following up on your original inquiry, I'd like to connect you with Nancy Bickford, WA Mil Dept Intergovernmental Affairs and Policy Director; Sara McCaslin with WA EMD Human Services Branch; and, JT Austin with Gov. Inslee's office working on coordinating a Food Security Team. I believe they would be your best coordination point(s) moving forward.

Should you have any additional questions, please let me know.

Regards,

Ryan

Subject: FW: Impacts to WA Family Potato Farms Regarding COVID-19

Dear FEMA and USDA team members,

Thank you for all your efforts to assist people and our farming community, especially during this very challenging time.

Please see my email below, just sent to our WA State Department of Agriculture and our Governor's office.

I would appreciate your response, even briefly, as to if and how FEMA / USDA are actively engaging our U.S. farmers to purchase their excess crops that they can no longer sell as a result of Covid-19 to utilize these foods for our / other countries' food sustainability needs during this season where many additional people will be in need.

In WA as a major Ag production center for our nation, we have lots of opportunities to help not only food recipients but impacted farmers as well.

Thank you in advance for your response.

Best,

Vicki

Cc: david.postman@gov.wa.gov; Fenton, Lisa ; Daniells, Patty

Subject: FW: Impacts to WA Family Potato Farms Regarding COVID-19

Importance: High

Drew and Kelly,

Is the State / WSDA working actively with WA farmers to purchase their excess crops that they can no longer sell on the regular open market, due to Covid-19 shutdowns (e.g. food processors/restaurants)? See email below/attachments.

I know the Governor has a Food Sustainability taskforce in place but would hope they're utilizing our farmers' crops first for foodbanks/similar to get food to those in need now and in the coming months.

I'm aware of: "a document developed by WSDA Food Assistance Program that summarizes various food assistance programs and resources available to Tribal partners. A similar document will be

developed to increase awareness of WSDA managed food assistance programs for counties to address ongoing questions and requests related to WSDA directly providing food to banks/pantries.” - noted by our County.

I want to be sure this stream of food supply is utilizing our WA farmers’ crops first and foremost wherever possible. I know many of these are perishable foods. But it would also make sense to have food processing plants function for the purpose of converting fresh crops into a more long-term edible format (e.g. Wheels on Meals, etc.)

Please advise on efforts being done to work with WA farmers for this purpose. Thank you.

Best,

Vicki

Subject: Impacts to WA Family Potato Farms Regarding COVID-19

Importance: High

State Senators & Representatives,

We wanted to share three real grower stories of how COVID-19 has impacted family potato farms in Washington State. Their names have been changed to keep their financial information private. Prior to March of 2020, our growers were optimistic as we geared up for a new planting and growing season. International and domestic demand for potatoes and potato products was the strongest we've had in over two decades. Our potato processors were expanding capacity to meet the anticipated growth as markets continued to show strength. We were on track to plant 170,000 acres of potatoes with the vast majority being grown for the frozen potato processors in Washington and Oregon.

And then coronavirus appeared in the US and orders were given to "Stay Home, Stay Safe" and all non-essential businesses closed. This was a necessary step to protect life. This was a huge blow to the food service industry in the US. Washington State family potato farms were disproportionately affected because the majority of what we grow is consumed in restaurants and other foodservice establishments. Farming and food processing have been labelled "essential businesses" and potato farmers are still being disproportionately impacted because foodservice businesses are closed, impacting food processors, impacting growers. Ninety percent all of potatoes grown in Washington State are dedicated to processed potato products. We have the highest concentration of potato processors in the world due to our ideal growing conditions and consistent quality. Our potato growers have been hit hard as potato processors told growers that their contracted volumes will be cut. We expect further cuts to acres and potato volume as the home isolation regulations continue.

Our current market is saturated. We have billions of pounds of potatoes currently in storage. Potato processors are having a difficult time utilizing those potatoes because of a lack of demand and nowhere to put them once they are made into frozen french fries. Cold storage is nonexistent because the supply of potato products has backed up and filled our freezers due to the loss of food service sales. Some of the potatoes destined for processing have been diverted to the fresh potato market but that was short lived as the fresh market has also been overwhelmed with an oversupply of potatoes, again from the lack of food service sales. Grower returns for fresh potatoes have dramatically dropped as the market has become flooded with excess supply. This oversupply situation will continue for over a year as the new crop of potatoes will enter a market that is still trying to sell the old crop.

We are hoping USDA can immediately implement Section 32 Bonus Buys of all potatoes and potato products, fresh, frozen, and dehydrated. Food banks are in great need as the ranks of unemployed citizens grow. It's with great urgency that we work quickly to move the 2019 crop out of storage to prepare for the new crop that will begin to be harvested in July. We are also hoping USDA can take immediate action to provide direct assistance to our growers for losses they are experiencing on those cut acres. There will be many Washington farm families that will not survive this economic crisis without intervention by USDA. We are working closely with WSDA Director Sandison and his team and wanted to provide this update to you. We appreciate all your help and continued assistance through these troubling times.

Sincerely,

Matt Harris

Director of Governmental Affairs

Washington State Potato Commission

RE: Press Conference Tomorrow at 1:30 pm
March 28, 2020 at 12:54 PM EDT

Hi everyone, Kiro agreed to be the pool camera. Final version of the advisory which just went out is below.

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photos.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.
- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW)

beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) â€” Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via WebEx [LINK].

TBD will serve as the print pool and TBD will serve as the TV pool.

WHO: Governor Jay Inslee, King County Executive Dow Constantine, Mayor Jenny A. Durkan, FEMA Region 10 Administrator Mike Oâ€™Hare, and Brigadier General Doug Cherry

WHEN: Saturday, March 28, 1:30 p.m.

WHERE: CenturyLink Field Event Center, 800 Occidental Ave S. in Seattle, WA

CAUTION: External Email

Good evening, Stephanie.

Thanks for the details. Mike is set to attend to discuss FEMAâ€™s role. Made a few edits to his info

below. A couple questions: will there be an ASL interpreter for the event? Is the event inside or outside?

Thanks

Ryan

Subject: Press Conference Tomorrow at 1:30 pm

Hi all – Thanks for everyone’s help to get the release out earlier. I wanted to loop back on logistics for tomorrow’s press conference.

Time

- Press Conference: 1:30 pm at the CenturyLink Event Center, 800 Occidental Ave S. in Seattle, WA

Attendees/Speakers

- Governor Jay Inslee
- King County Executive Dow Constantine
- Seattle Mayor Jenny Durkan
- FEMA Region 10 Administrator Mike O’Hare
- TBD Army
- Q&A

Advisory

- See below. We will send at 9:00 am on Saturday, March 28

On Site:

- Podium/Flags will be provided by the City.
- DOD “ Let us know if there may be any supplies that may be able to be moved on site.

Pool: City will organize a pool

- Print Pool (ST/AP)
- Still photog (ST)
- TV Pool (Will work with News Directors)
- Seattle Channel (to cross post w/ TVW)

Technology

- WebEx: City and Governor’s Office are connecting to provide Q&A for reporters not in the pool

Key Messages

- Important Resources for Our Hospitals “ Partnership to make this a reality
- Staffed with Army doctors and nurses for Non-COVID-19 with ER, X-Ray, and other medical uses
- Construction will begin soon + Seattle may see additional US Army personnel in the area

Staff:

- MO: Anthony Derrick: 260-247-2741
- Stephanie: 206-247-0475

Subject: RE: Food Banks

Hi Gene,

Thank you so much for reaching out and you are surfacing the exact concern that JT Austin (Sr. Policy Advisory to Governor Inslee and convener of the Governor's COVID-19 Food Security Coordination Team since 3/16/20) and I have been discussing in the food bank side of hunger response. Your message below indicates concerns about Seattle Food Banks, but I'm getting reports that due to increased demand across the state, our major NGO food warehouses statewide are moving through their food supply rapidly and we anticipate significant shortages as soon as 4/10.

I'm going to start a separate email thread with just you and JT and you can share with whomever is needed. I know that Paul and Leanne and Babs are getting plenty of emails these days so I'm going to spare them a few.

Teammates,

I am Gene Shearer the FEMA HQ Supply Chain Advisor here is DC. I had the pleasure of working with Taylor and Tristan early on in your epi curve and would like to commend you on the job you have done

in the Seattle Region. I am the PM for the Supply Chain Analysis Network (SCAN) that is trying to provide advice to FEMA Leadership on what can be done to sure up grocery supply chains during this pandemic.

SCAN is in the process of doing a second look at Seattle this week and one of the areas we are interested in is your approach to the Seattle Food Banks given the decreases in their normal contribution flows.

Any summary of your efforts in this area would be helpful and could save lives.

Thankyou for your service to the people of the great state of Washington and the City of Seattle!

Question about Q and I team in Shoreline

March 25, 2020 at 1:00 PM EDT

To: Baumgart, Jim (GOV)

Cc: matthew.zimmerman@doh.wa.gov, Davidson, Lisa

Jim,

Matt and I were hoping to clarify if the team in Shoreline working on Q and I is Health Care Authority (HCA). If so, Matt said DOH has no authority over them. Regardless, I know Stacey intends for them to be plugged in with Lisa's taskforce. Any chance they can be invited to the 1100 TF kickoff meeting?

Thank you,

Toby Rice

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 10, 2020)

April 10, 2020 at 4:08 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 10, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Air Bridge](#).
- Beginning **April 10**, HHS and FEMA will work with states with federal Community-Based Testing Sites to clarify whether sites want to continue as they are now, or transition to full state control.
 - Under state control, CBTS sites would still receive technical assistance from the federal government and be able to request supplies through the normal FEMA systems.
 - Leadership at both HHS and FEMA will consider approving extension requests by states that need additional federal assistance to manage and operate sites. A formal notice to continue must be submitted to the CBTS Task Force Leader, by either the state's Governor or his or her representative, no later than April 9.
 - The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.
 - After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard

Resource Request Process through the appropriate FEMA Region.

- States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share.
- To date, Community Based Testing Sites have screened over 85,000 individuals.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- On **April 8**, HHS, through the Health Resources and Services Administration awarded more than \$1.3 billion to 1,387 health centers. These centers will help communities across the country detect coronavirus; prevent, diagnose, and treat COVID-19; and maintain or increase health capacity and staffing levels to address this public health emergency.
- On April 3, President Trump issued "[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

Ezelle, Robert (MIL)

RE: Clark and Cowlitz counties - SW WA

April 08, 2020 at 1:42 PM EDT

To: JHB, Lofy, Kathy H (DOH)

Cc: seoc122 (MIL), Davis, Jerrod (DOH), O'Hare, Michael, Peiper, Pam, Bowman, Casey, Evich, Jordan, Katims, Casey (GOV)

Congresswoman,

I tried calling you just now to brief you on our immediate plans for PPE distribution statewide to include the counties in your district. We have limited supplies on hand, but will be able to provide a small amount of relief in critical items such as gowns and masks. I have asked the logistics team to focus on Cowlitz county and try to get them some gowns today if at all possible. It won't be a large amount but it should help for a few more days.

Looking forward, I anticipate getting in approximately 6 million N95 masks, 2 million surgical masks, and 1 million gowns over the next two weeks. This won't go far toward meeting the total statewide need, but will help counties a little with meeting their tier one needs.

We appreciate your advocacy in bringing in desperately-needed help from our federal partners.

If you would like to speak with me further, I'm available most of the day.

Robert Ezelle

Hi Jaime,

I'm very sorry to hear that Clark and Cowlitz Counties have not received any PPE. As I told you on the phone, I have never ordered a PPE shipment to be pulled back, particularly a shipment that had been packed up to be delivered.

Unfortunately, our statewide demand for PPE still greatly exceeds our supply and as a result we still have many facilities in dire need of PPE. Since your region has not received any significant amount of PPE and you have outbreaks in your long term care facilities, I feel strongly that your orders (see below) should be pushed to the top of the list.

I have ccd the logistics section chief, the director of the state emergency management division (Robert Ezelle) and our agency area commander (Jerrod Davis).

Jerrod, can you please check on this order and give Jaime a call tomorrow to update her on the status? Jerrod should also be able to help you get some testing supplies since we acquired 15,000 swabs today.

Thanks,
Kathy

Subject: Clark and Cowlitz counties - SW WA

Kathy,

I'm following up on the voicemail I left you earlier today. On April 1, I was told by FEMA Administrator O'Hare that Clark and Cowlitz Counties would be receiving the PPE detailed below. When I followed up yesterday to see why it was not delivered, I was informed that it was packaged for shipment, and then was pulled back by you. It was explained that the materials were needed for long term care facilities elsewhere in the state. However, in Clark County we have outbreaks in

nine long term care facilities, and there have been deaths and yet we don't have the supplies to test there. In the community the percentage of positive tests has doubled and the weekly percentage of hospital admissions with COVID-19-like illnesses has also doubled.

Cowlitz County reported Friday that they are down to one gown in their efforts to treat patients. Not one box, one gown, which I am sure is gone by this point. Cowlitz fire does not have supplies to serve residents or emergency calls. They were counting on help from the public health department. As I'm sure you know, normal supply chain operations simply are not working for smaller providers or municipalities. Our larger hospitals are able to get some supplies through, but if you're small, isolated or rural you're out of luck.

I have worked tirelessly at the federal level to get PPE to the state, only to witness the state deliver nothing to most of my counties and less than 1% of what Clark County requested. I did not expect to get all that we asked for, but given our needs, I certainly expected something - and definitely expected what was told me. Can you please apprise me of your plans with regard to the order below?

Thank you for your time and attention. I realize it is a difficult situation for everyone right now.

Jaime Herrera Beutler
Member of Congress, WA 03
C: 360-609-0435

Clark County is getting:
Face Shield: 14500
Procedure Mask: 25200
Respirator: 5000
Sanitizing: 5509

Cowlitz:
Gown: 7500

Tristan and Taylor,

I am getting this product to you for review as I am reviewing it myself . . . there will be a complimentary SCAN Ecosystem Assessment document also released this evening.

I have reviewed this once and will several more times. From a quick first read, I gather that the measures put in place in the Seattle region have not, for the most part, adversely impacted freight flows. Is this what you are seeing? This should indicate a relatively strong grocery sector and pharma supply chain that is demonstrating a good amount of resilience.

Is this the case?

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 3, 2020)

April 03, 2020 at 3:09 PM EDT

Cc: FEMA-IGA

FEMA ADVISORY – APRIL 3, 2020

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in

various locations across the U.S.

- FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
 - Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
 - FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
 - Thirty-one states and 12 tribes have issued stay at home orders.

Baumgart, Jim (GOV)

RE: Food bank box locations and supply order

To: McClain, Stacey (MIL)

Cc: Snell, Nona (OFM), Hesse, Regan (MIL), laura.goudreau@fema.dhs.gov

Yes, I am in the loop on this.

As you and I discussed on Friday, this is a bit of a hybrid model. Traditionally, we would request counties to determine the need, resource internally, and then request state support as necessary. Regrettably, this model doesn't really work in food distribution without getting a checkerboard across the state. As WSDA runs the statewide program to county food banks, they are requesting a statewide solution. The congressional delegation unanimously supported this with a hard push on USDA to supply food.

I'm not certain we need a DOH or HCA approval of a necessary public health measure for food distribution; however, it is a good idea to ask FEMA their thoughts if this is an expense that can be cost shared as part of a federally declared disaster in response to COVID as a result of the "stay home, stay safe" orders as well as previous social distancing measures.

Laura Goudreau is checking with Region X about how this fits in costs sharing models.

Sincerely,

Jim

Randy,

We are currently looking over these requests as we get guidance from our policy group. Before we can proceed we either the Health Care Authority or the Department of Health to determine that the mission of the food banks fill an immediate and pressing public health need. We will ask DOH to make this decision, although we will need you to clarify that all the food banks are either non-profit or local government entities. As I understand it, if the food banks that will be receiving the supplies are non-profit entities this may fall under that category of reimbursable expenses (75% Federal, 25% State), if this is determined to not be a reimbursable expense due to federal guidelines then OFM would need to make a determination as to whether or not the State wants to assume this expense.

Subject: RE: Box Needs for Food Security Request

Good Evening,

We are seeking to close the communication loop on the resource request submitted by the Governor's Office on 3/25 for 300,000 boxes. State Tracking number is WA-202032516598.

Earlier today, WSDA liaison to the Governor's Office Food Security Coordination Team, Katie Rains, contacted Todd Cunningham – Correctional Industries Asst. Director to verify drop site for this resource request. ESF 11 pushed forward confirmation to Operations Section that Correctional Industries may be able facilitate two drop locations. The following two locations for a 50/50 split of the 300,000 boxes were then provided to Operations Section. If one drop location remains a limiting factor for this resource request, the Seattle location is to be the single drop site.

Please advise if two drop sites can be met by Correctional Industries for this resource request and if Operations Section is need of additional information to supplement the existing 213RR.

West Side drop site:

815 S. 96th st.

Seattle, Wa 98108

Food Lifeline Contact: Amythst Shipman, direct line 206-432-3604, warehouse line for delivery coordination 206-492-5524 [HYPERLINK "mailto:amythsts@foodlifeline.org"](mailto:amythsts@foodlifeline.org)
amythsts@foodlifeline.org

East side drop site:

Second Harvest Inland Northwest

5825 Burlington Loop
WA 99301

Facility Contact: Chelsea Armstrong, Regional Executive Director, main line 509-545-0787
[HYPERLINK "mailto:Chelsea.armstrong@2-harvest.org"](mailto:Chelsea.armstrong@2-harvest.org) Chelsea.armstrong@2-harvest.org

Subject: FW: Box Needs for Food Security Request

Ken,

Thank you for talking with me this morning regarding the request for boxes to be made for WA Dept. of Agriculture to help with the state's food banks. I've attached a copy of Agriculture's request and CC'ed Erin Coyle one of the Emergency Managers with Dept. of Agriculture who initially made the request., she has also been helping navigate the needs, information, and communications with the foodbanks.

Below, is the e-mail chain between the Governor's office and the State EOC, containing the order we processed. Right, now I'm looking to close all the loops and make sure we can successfully complete the request. Feel free to ask Erin or I questions and we will do our best to help.

Thank you,

Geoff Phillips, MS, AEM

Subject: Box Needs for Food Security Request
Importance: High

Jim,

Do I have to put this through State EOC or may I simply email Secretary Sinclair to expedite?

Specs for boxes:

Of the box types they manufacture, the archive boxes with or without lids would work best.
[HYPERLINK "https://www.washingtonci.com/products-services/cardboard-boxes.html"](https://www.washingtonci.com/products-services/cardboard-boxes.html)
<https://www.washingtonci.com/products-services/cardboard-boxes.html>

NOTE: We need folding boxes that do NOT require tape to reduce future logistics issues.
Recommend archive style boxes for this purpose.

Current request – 300,000 boxes for 2 week distribution period based on EOC request last week (request was for 250,000 for anticipated 3 week period – we’re adding a buffer). Demand will grow.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so we'll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Good afternoon, all, and thanks very much for your assistance.

Congresswoman Jayapal is free all morning, but I know several other members of the WA delegation are eager to participate as well but I know at least Reps. Larsen and Heck have conflicts in the late morning. If you have flexibility and

can arrange for one tour in the 9-10:30 am window, I know their teams would appreciate it.

Best,
Gautam

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available?
Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that's easier.

Best,
Stephanie

FEMA_Supply_Chain_Task_Force_Leads_Four-Pronged_Approach_to_Securing_Needed_Supplies_and_Equipment_in_COVID-19_Fight

March 31, 2020 at 10:39 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the fact sheet below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Supply Chain Task Force for COVID-19 response.

March 31, 2020

FEMA Fact Sheet

FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Service created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

The task force's primary effort is the sourcing of personal protective equipment (PPE), ventilators and other critical resources requested by states, tribes and territories. By using the structure of FEMA's NRCC, the task force is finding and executing solutions to meet urgent demand and enable the U.S. Government to surge support to COVID-19 "hot spots" as they arise.

The Supply Chain Stabilization Task Force is executing a whole-of-America approach to address limited supply of critical protective and life-saving equipment. Through a four-prong approach of *Preservation, Acceleration, Expansion and Allocation*, FEMA is bringing the full capacity of the Federal government to bear to find solutions to protect the American people and defeat COVID-19.

Locating Available Critical Resources

The task force's primary effort is the sourcing of personal protective equipment, ventilators and other critical resources to respond to requests by states, tribes and territories. Through the National Response Coordination Center, the task force is working to find critical resources to meet urgent demand and enable the U.S. Government to surge support to "hot spots" as they arise. In addition, the task force is engaging manufacturers, distributors and healthcare networks to build the next phase of supply chain stabilization.

Increasing Availability of Critical Resources

The task force is developing a strategy to increase availability of critical resources through four primary efforts:

Preservation

Preservation to limit unnecessary use of PPE and other supplies. Developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs are critical components of this strategy.

- The task force is in the process of developing and verifying techniques to clean and recycle products.
- This line of effort also includes developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs, critical components of this strategy.
- The task force is also working to expand equipment resources through the Preservation line of effort. The FDA issued an Emergency Use Authorization (EUA) for ventilators on March 24, which allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The new guidance will also assist health care personnel on how to use other ventilators, like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

Acceleration

Acceleration of industrial manufacturing is required to help meet the urgent demand placed on the market. Manufacturers are ramping up production of critical resources and have extended operating hours to increase production well above pre-COVID-19 levels.

- To expedite purchasing, FEMA issued a request for quotation for vendors who have needed medical equipment and supplies to sell to the agency.
- FEMA is also expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- As an example of this effort, FEMA coordinated an air bridge for flights from Asia

beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- The second flight landed in Chicago this morning. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical PPE (gloves, gowns, goggles, and masks) in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Additionally, in some cases, the federal government may purchase some of the supplies to be used to replenish the Strategic National Stockpile (SNS) or to provide to states with any identified and unmet needs.
- To address the anticipated ventilator shortage across the nation, the task force has implemented a similar strategy, leveraging the strengths of the commercial industry. Including numerous vendors, such as General Electric, Phillips, Medtronic, Hamilton, Zoll, ResMed, Hillrom and Vyair, to produce 20,000 ventilators over the next two months with the potential to add 100,000 by end of June. This represents a significant increase in velocity as the normal annual market is 30,000 per year.

Expansion

Expansion of the industry is also taking place. Manufacturers are enhancing production capacity with additional machinery, and in some cases re-tooling assembly lines to produce new products needed.

- As an example of this work, the Food and Drug Administration (FDA) is providing information for manufacturers on adding production lines or alternative sites, like automobile manufacturers, for making more ventilators during the COVID-19 public health emergency.
- In addition, the task force is working through over 350 leads to match American businesses who have excess raw materials, workforce or factory production capacity combined with an overwhelming desire to provide their support to the national response effort.
 - Task force members are actively working to facilitate the creation of private sector partnerships to pair companies that have volunteered excess factory production capacity, the talents of their workforce and access to their raw material supply chains with critical supply manufacturers who have the expertise in producing PPE, ventilator and other needed equipment.
 - The creation of these partnerships to align capacity with know-how will

unleash the potential engine of our national private sector and help overcome the supply shortfalls.

Allocation

Allocation of critical resources based on data-informed decisions. These decisions will be coordinated between the U.S. Government and the private sector.

- FEMA is focusing its allocation of critical resources to highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls, with consideration to the at-risk population distribution across the Nation.
- To more effectively adjudicate resources throughout the nation and private industry, a National Resource Prioritization Cell was established to unify government and private industry prioritization recommendations which will inform federal, state and private sector operations.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Weekly Update: DHS Response to COVID-19

WASHINGTON – The Department of Homeland Security and its dedicated workforce across more than a dozen offices and components are working diligently with the White House to execute an unprecedented, whole-of America response to the COVID-19 pandemic. These strategic and tactical efforts range from coordinating critical air transportation to addressing medical supply shortages to expediting the inspection of vital goods at our borders, ensuring that our national supply chains remain abundant, accessible, and reliable.

“Everything we have done to this point has been unprecedented and everything we do in the coming weeks and months ahead focuses on life-safety and reducing suffering,” said FEMA Administrator Pete Gaynor. “It is absolutely critical that we maintain our response efforts alongside our federal, state, local, tribal, and industry partners to ensure the virus’s spread is contained and human life is preserved.”

Below is a list of some of DHS’s efforts against COVID-19 last week:

Federal Emergency Management Agency (FEMA)

Deploying Federal Funds in Support of State Response Efforts. Federal funds are being deployed to help ensure that health care providers have the critical resources they need to provide rapid care and treatment to COVID-19 patients in hard-hit areas across the U.S. As of April 12th, FEMA has obligated \$5.2 billion in support of state response efforts.

Increasing Availability of Critical Resources. As a part of the Supply Chain Stabilization Task Force, FEMA is executing a whole-of- America approach to address the limited supply of critical and life-saving equipment. As of April 12th, FEMA has coordinated the delivery of the following to areas in greatest need : 38 million N95 respirators, 32.6 million surgical masks, 5.5 million face shields, 4.7 million surgical gowns, 30.3 million gloves, 212,000 coveralls, and 10,448 ventilators.

Expanding Surge Capacity in Highly-Impacted Areas. FEMA is focusing its allocation of resources in highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls.

- On April 6th, FEMA and the U.S. Army Corps of Engineers announced plans to convert three convention centers in Virginia into temporary hospital facilities. The facilities – the Dulles Expo Center in Northern Virginia and the Richmond and Hampton Roads convention centers – will be able to provide beds for 1,107 acute patients or 1,848 non-acute patients. The conversion is expected to be complete within six weeks.
- On April 8th, FEMA and HHS delivered 80,000 nasopharyngeal swabs to various federal Community-Based Testing Sites (CBTS) locations to help surge testing capacity nationwide.
- As of April 12th, FEMA has delivered 8,600 medical beds to surge capacity and care for an increased volume of COVID-19 patients across the U.S.

Coordinating Air Flights to Address Medical Supply Shortages. FEMA is expediting movement of critical supplies including masks, respirators, gloves, goggles and surgical gowns, from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge. As of April 12th, 28 international flights have arrived in the U.S. with critical medical supplies. An additional 28 flights are scheduled over the next three weeks.

Countering Weapons of Mass Destruction (CWMD)

Administering Medical Screenings at Airports. CWMD contract personnel are continuing to support the CDC with enhanced medical screenings for travelers through 13 specially designated airports. As of April 12th, CWMD has processed approximately 271,529 travelers for enhanced screening, including 1,491 who were referred to CDC for further medical evaluation.

CUSTOMS AND BORDER PROTECTION (CBP)

Maintaining Domestic Supply of Critical Medical Equipment. On April 8th, CBP and FEMA announced that the federal government will begin restricting exports of PPE to ensure that critical supplies stay in the country to fight COVID-19.

Securing U.S. Borders. On April 9th, CBP provided an operational update on activities for the month of March. Total Border Patrol encounters have declined 7% total in March from February, and 76% since the height of the crisis last May. In addition, 80% of the people who CBP encountered since the March 21 enactment of Title 42 are being returned to the

Cybersecurity and Infrastructure Security Agency (CISA)

- On April 6th, CISA updated its list of essential businesses. To date, 45 states and territories have published Essential Business Designations, 20 of them are referencing this list in their essential business designations, while 14 states or territories have incorporated CISA guidance fully into their own lists.
- On April 8th, CISA and CDC issued new guidelines aimed at getting workers in critical infrastructure who may have been exposed to COVID-19 back to work faster. It also calls on employers to take steps to ensure workplace safety, like sending workers home immediately if they are sick and increasing air exchange in the workplace.

Protecting Networks and Cloud Environment. On April 9th, CISA released interim Trusted Internet Connections (TIC) guidance to aid agencies in securing their network and cloud environments. This guidance supports the current surge in teleworking and use of collaboration tools amongst the federal workforce during the COVID-19 pandemic.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

& ANALYSIS (I & A)

United States Coast Guard (USCG)

Keeping the U.S. Maritime Supply Chain Open and Viable. As of April 12th, USCG is monitoring 38 commercial vessels with crew or passengers that have embarked from a coronavirus port of interest in the last 14 days.

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 19, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing resources to reopen safely and responsibly.
- As of April 18, FEMA, HHS, and the private sector combined have coordinated the

delivery of or are currently shipping: 55.8 million N95 respirators, 77.1 million surgical masks, 6.1 million face shields, 11.4 million surgical gowns, 564 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On April 17, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- The U.S. Department of Agriculture announced the [Coronavirus Food Assistance Program \(CFAP\)](#), an immediate relief program that provides \$19 billion in support to farmers and ranchers, maintains the integrity of our food supply chain and ensures access to food for those in need.
 - Direct support to farmers and ranchers provides \$16 billion based on actual losses for agricultural producers.
 - USDA will partner with regional and local distributors to purchase \$3 billion in fresh produce, dairy and meat products. The distributors and wholesalers will provide these items to food banks, community and faith-based organizations and other non-profits serving people in need.

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 19**, FEMA, HHS, and the private sector combined have coordinated the delivery of, or are currently shipping: 57.4 million N95 respirators, 77.9 million surgical masks, 6.2 million face shields, 11.9 million surgical gowns, 587 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and

- commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA from April 1st – 14th through Project Airbridge and the commercial supply network.
 - The U.S. has now tested 4.18 million people, which is more total tests than the following nations combined: France, the United Kingdom, South Korea, Japan, Singapore, India, Austria, Australia, Sweden, and Canada.
 - As conveyed by Dr. Anthony Fauci and Admiral Brett Giroir, there is enough testing capacity for states to move into phase one of reopening when they choose to do so.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - President Trump and Vice President Pence are working closely with Governors to review what more they can do to develop locally tailored testing strategies.
 - HHS and FEMA continue to provide federal support to state run testing.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - FEMA and HHS have centralized best practices and lessons learned to help medical practitioners, emergency managers, and other stakeholders learn from each other's approaches.
 - The [FEMA Coronavirus Emergency Management Best Practices](#) page contains resources for all levels of government, private sector, academic institutions, professional associations, and other organizations responding to the pandemic.
 - HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 10, 2020

SUMMARY

- Alaska's schools will be closed through the end of the school year, and the governor extended social distancing mandates to April 21.
- Oregon ramps up testing but claims the number of test kits received from the federal government are not nearly enough.
- Following a "disturbance" at Monroe Correctional Complex, Governor Inslee announced he is looking into releasing some nonviolent inmates from Washington prisons to make more room for social distancing.
- Governors across the region are working to address food supply shortages at food banks.
- Seattle Mayor orders weekend closure of Seattle's major parks and beaches.
- The Washington state Nurses Association is calling for hospitals, lawmakers, and federal leaders to provide nurses with hazard pay as they continue their work on the front lines of the pandemic.
- In national news, headlines point to federal support being taken away for CBTSS. Regional headlines on the topic are expected. FEMA has issued an advisory addressing that states have the option to continue with federal support, or transition to locally run sites as they see fit.

Public Sentiment

- While many Alaskans continue to support the governor's mitigation measures, others are increasingly upset at losing their right to move and conduct business freely.
- There is worry across the region for how the stay-at-home orders are impacting people's ability to pay their day-to-day bills. Experience is mixed for businesses that have applied for economic assistance.
- Washingtonians react negatively news of possible releases of nonviolent inmates from Washington prisons.

Washington

Federal and State Response

- Governors Consider Consortium to Skirt FEMA Dysfunction ([Bloomberg](#))
 - Washington Governor Jay Inslee and California Governor Gavin Newsom started having conversations about collaborating on procuring and distributing personal protective equipment about two weeks ago, according to Mike Faulk, a spokesman for Inslee.
- With 'unsatisfactory' help from White House, Inslee looks elsewhere for COVID-19 tests ([My Northwest](#))
- The Trump administration is pulling back federal support of testing sites by the end of the week, according to FEMA, amid ongoing concerns over testing shortages nationwide. Washington state also expects to continue to support operations at community-based testing sites "to the greatest extent possible with the supplies that we have," according to Casey Katims, a federal liaison for Washington state, who underscored that the state has been providing personnel and locations for testing. ([CNN](#))

Social Distancing

- Seattle Mayor orders weekend closure of Seattle's major parks and beaches. ([KOMO](#), [KIRO](#), [Q13](#), [The Stranger](#))
 - On [Facebook](#), people are largely supportive of this decision but many feel it should have already been made or should extend past the weekend.
- Seattle area used early social distancing and testing, to help begin flattening the curve ([Washington Post](#))
- 1-on-1 with Gov. Inslee: Washington's coronavirus outlook and decision to close schools ([KREM](#))

Inmates

- Washington prisons consider early release of inmates to curb COVID-19 spread. ([KING 5](#), [Q13](#))
 - On [Facebook](#), people react very negatively to this. Many wonder how this would help curb the spread of the virus given that, in their view, prisoners are already quarantined and isolated. People also wonder where the inmates would go, and if they would be kept up with social distancing while on release. Furthermore, people worry about the message this would send about deterring others from committing crimes.

Hospital Capacity

- Central Washington Hospital has been a much-less busy place during the COVID-19 pandemic. ([NCW LIFE](#))
 - Several nurses have responded that this article does not paint the full picture; resources are stretched thin. Some feel that the area has yet to peak. Others hope that this trend continues. ([Facebook](#))

Healthcare Workers

- Washington state nurses union demand hazard pay for nurses, healthcare workers. ([KAPP-KVEW](#), [YakTriNews](#))
 - Responses are mixed. Some feel that enough is already being done to support them. Others feel that having to reuse PPE isn't what healthcare workers signed up for, and additional pay is justified. Others liken this to a form of price gouging. ([Facebook](#))
- Costco to allow first responders, healthcare workers to skip lines to enter stores ([KATU](#))

Medicine

- Experimental drug, Actemra, helped critically ill emergency room doctor recover from COVID-19. ([KOMO](#))
- Malaria drug maker donating 100 million doses to treat coronavirus. President Trump has pushed for more use of hydroxychloroquine, but the drug maker warns there are still questions about its safety and effectiveness. ([KREM](#))

PPE

- Nurses demand better protective gear as new mask sterilization system arrives in Washington. The company says FDA-approved technology can decontaminate 80,000 masks a day. But nurses say they need more gear and new masks. ([KING 5](#))
- Have unused masks from a project or wildfire season? Seattle Mask Brigade will pick them up ([KIRO 7](#))

Business and Economy

- Around half a billion people could be pushed into poverty as a result of the economic fallout from the coronavirus pandemic unless richer countries take "urgent action" to help developing nations, a leading aid organization warned Thursday. ([Seattle Times](#))

Oregon

Economy

- Columbia Sportswear has put 3,500 retail workers on furlough and cut their pay by 75 percent. ([The Oregonian](#)) [Reaction](#) is mostly negative toward the company, blaming greed for the decision, not just the pandemic.
- Oregon layoffs hit another record: 1 in 8 workers have lost their jobs during the pandemic. ([The Oregonian](#), [KGW8](#)) Residents [are worried](#) about the individual and statewide economic impact of the pandemic.
- The Oregon Clinic furloughs 820 employees during COVID-19 outbreak. ([KATU2](#), [KGW8](#))

- Oregon will be providing an extra \$60 million in food stamp benefits for some homes. ([KATU](#))
- Flatten the Curve
- Officials urge caution as Oregonians continue to flock to hiking trails. ([KOIN](#))
 - Governor Brown is mulling the release of certain inmates from Oregon's prisons to slow virus spread. ([KOIN](#))
 - Oregon will limit hunting, fishing to state residents starting this weekend. ([The Oregonian](#))
 - Rogue Valley Transportation District, in southern Oregon, is requiring passengers to wear masks. ([KDRV](#))
- New Cases
- Officials report six new deaths as cases reach 1,321. ([KGW8](#), [KATU2](#), [KOIN](#), [KPTV12](#), [The Oregonian](#))
 - 7 food services employees at Oregon Health and Sciences University (OHSU) are infected with COVID-19. ([The Oregonian](#)) Employees were encouraged to keep on working at the open cafeteria, staff were forced to huddle for meetings, cooks were crowded in the kitchen, and nothing was done to limit group size in the dining room, the union reports. "There was no extra cleaning for the cooks in the kitchen, either."
 - Portland shootings increase despite stay at home order. Early evidence suggests the drop in crime may not carry over to gun violence. ([OPB](#))
- Testing
- Gov. Brown announces distribution of Rapid Testing Instruments in Rural Oregon. ([My Elkhorn](#)) Tests will be distributed to areas of greatest need, [as state reports not enough test kits were received](#) along with the Abbott testing instruments.
 - Legacy Health is now able to run more than 650 COVID-19 tests per day ([FOX 12](#))

Idaho

- Federal Response
- President Trump approves a major disaster declaration for Idaho. ([East Idaho News](#), [Idaho Public Radio](#))
 - Senator Crapo recognizes the [resources this will provide](#) the state in the fight against COVID-19.
- Stay-at-Home Order
- Idaho Gov. Little: 'We have really flattened the curve.' The governor will decide next week whether to extend the stay-home order. ([East Idaho News](#))
 - Popular responses request more testing, and ask point to further delayed economic activity leading to permanent damage. ([Facebook](#))
 - Social distancing violations among top complaint, reports to Ada County Dispatch ([ABC 2](#))
- Emotional Impact
- Isolation puts some Idahoans in worst-case scenario. "We're seeing an increase in the number of suicides and of people falling into relapse," one treatment center reports. ([CBS 2](#))
 - There is worry for loved ones who don't have as much social interaction as usual. A woman's mother said she'd rather get coronavirus than continue to be isolated. ([Facebook](#))
- Transportation
- Idaho Transportation Department increases cleaning at major rest stops. ([ABC 6](#))
- Economic impact
- Boise eatery shares experience of getting a small business loan to keep doors open—"It was really quick." ([KTVB](#)) Many [people comment in response](#) that their experience applying for a loan was not as positive.

Alaska

- Updates from Governor Dunleavy
- Gov. Dunleavy [announced](#) Thursday [schools will be closed](#) through the end of the school year. ([Alaska Public Media](#))
 - The [social distancing mandate](#) which also closes all non-essential businesses, and the [mandate](#)

[restricting intrastate travel](#), are both extended through April 21. ([KTVA](#))

- The governor's [mandate to postpone elective oral health procedures](#) was extended until further notice.
- The governor said the state plans next week to lay out some ideas for getting society and businesses running again. ([KTVA](#))
- Reaction: Many voice their understanding and support for continuing the mandates. However, the majority of voices on Facebook decry the loss of their freedom, question the constitutionality, and want an end to the restrictions. ([example 1](#), [example 2](#), [example 3](#)). Some say that [the language needs to be more clear](#); that as long as people can defy the mandate if they have a 'personal need' to travel, people will abuse it.

Declaration

- President Trump approves Alaska disaster declaration. ([KTUU](#)) People [reacted positively to the news](#), with several commenting that the federal government is providing more economic support than the state.

Rumors

- An Anchorage restaurant's Facebook post claiming COVID-19 is a conspiracy spurs social media backlash. The post generated nearly 2,000 angry comments. ([KTUU](#))

Prisons

- A Dept. of Corrections employee tests positive for COVID-19. The person staffed a corrections facility in Juneau. ([KTUU](#))

Stop the spread

- Retailer in Bethel, Alaska Commercial, is requiring its customers to wear masks. This comes after six major Bethel organizations, including school districts and tribal health groups, sent a letter to stores asking them to require masks. ([KYUK](#))

Re: Grocery supply chain FEMA call

March 14, 2020 at 9:51 PM EDT

To: Marquiss, Jason (MIL)

Cc: Ezelle, Robert (MIL), Baumgart, Jim (GOV), Buchholz, Brian E. (ATG), Lang, Robert (MIL), Shagren, Karina L. (MIL), Foster, Sarah (MIL), Hennessee, Taylor (MIL), Allen, Tristan (COM), Richeson, Jonathan, Knutson, Charles (GOV)

Do we want to consider a press event with the governor, grocers and providers? JIC issued a release today on this topic that is already being picked up and we're ready to get a drumbeat of "save some for your neighbors" going. I'm happy to make an ask to the gov office if this feels like an important enough ask and effective use of his time.

Jaime

On Mar 14, 2020, at 4:26 PM, Marquiss, Jason (MIL) wrote:

Robert and others.....see the notes below from our FEMA Team, based on a supply chain FEMA conf call.

The grocery supply chain looks like it is now or is going to be our 2nd biggest issue behind Hospitals and First Responders running out of PPE.....

FYSA for future long term planning.

This was a national level call that took place at noon today amongst the FEMA supply chain personnel, FEMA regions, and some of the large private grocery suppliers (CVS, Target, etc.).

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed.

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

Lloyd Kimball

To: Nick.King@wsp.wa.gov

DO NOT DELETE THIS EMAIL

Dear NICHOLAS KING:

Congratulations! You have successfully passed the Independent Study Course

"IS-00100.c" entitled "Introduction to Incident Command System, ICS-100 ".

Please retain this email for your records, as this is the only way to access your certificate. ***You will not receive a certificate in the mail.***

To access your certificate of completion, select the link below. If you cannot select the link, please copy and paste the link into your address line in your internet browser.

Adobe Reader is required to open the certificate. If you do not have this software, it can be obtained as a free download at <http://www.adobe.com>

Certificate of Completion link:

<https://emilms.fema.gov/ecert/cert.asp?ID=193-d%7Efp%16%1A%7F%19%0E%1Bx%0A%03%01%7E%02%7C%0B%1Ew%02%1D%01%28q%07VB%25R64R%3FBPU%13H%24%08%04%3D0DW%>

To print this certificate, select the "Print" icon on the PDF Menu displayed in the new PDF window. This icon looks like a little printer.

To save this certificate, select the "Save" icon on the PDF Menu displayed in the new PDF window. This icon looks like a floppy disk. When you select this icon, a dialog box will appear where you can specify the location on your computer to save the file as well as the file name.

Due to a situation with Office 365 where a service titled Safe Link may have been enabled by your Office 365 administrator, you could receive a certificate link that will not function properly. If the link you see in your email from EMI contains text similar to "https://na01.safelinks.protection.outlook.com/?url=", please contact your local technical department and ask that they allow links from EMI to pass through your email system unchanged.

If your organization is using Office 365, please reach out to your IT department and ask that they allow links from EMI to pass through unchanged.

The pattern required will be <http://emilms.fema.gov/ecert/cert.asp>.

More information regarding correcting this issue can be found at these links* <https://blogs.perficient.com/microsoft/2015/12/office-365-using-the-new-advanced-threat-protection-feature/> and <https://support.office.com/en-us/article/Office-365-ATP-safe-links-dd6a1fef-ec4a-4cf4-a25a-bb591c5811e3>.

Attached are today's nation hot issues social listening report and yesterday's national social listening report for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 30, 2020

SUMMARY

- Officials in Washington State see evidence that containment strategies have lowered the rate of virus transmission -- including that deaths are not rising as fast as they are in other states, hospitals have so far not been overwhelmed, and preliminary statistical models suggest that the spread has slowed in the Seattle area in recent days. The progress is precarious, and expansive social distancing policies will remain a part of daily life for weeks to come.
- Sixty-nine new cases of COVID-19 bring the Oregon total to 548, as state leaders thank the president for Oregon's disaster declaration.
- As cases in Idaho continue to rise, a Target employee in Boise has tested positive for COVID-19. The employee is currently at home recovering, but the company did not state if they were working prior to getting the positive test results.
- Twelve new cases of COVID-19 in Alaska include cluster at Fairbanks medical facility, and second in-state death.

Public Sentiment

- As President Trump and Governor Inslee clash over the federal government's role in Washington's COVID-19 response, so do Washingtonians. Some argue that the Governor should own his role and not need the President to lead, while others are frustrated by the President's comments.
- Oregonians are frustrated with both the state and federal level responses to the COVID-19 outbreak, calling it too little too late. Debate over self-service at gas stations continues.
- In Idaho, the primary concern from the public focuses on businesses that are considered essential, remaining open, and therefore putting the public at greater risk. This feeling is counterbalanced by those who would like to get back to work.
- Alaskans appreciate the leadership and direct updates from Alaskan health officials, and remain frustrated at the lack of individual economic support from the legislature.

Washington

Federal Response

- President Trump bashes Inslee as 'nasty person' during coronavirus briefing; says he won't call him. "No, I don't call the governor of Washington now. But Mike Pence calls, and the head of FEMA calls. I don't stop them." ([Seattle Times](#))
 - Comments on the [Seattle Times Facebook Post](#) center on President Trump and Governor Inslee -- with some comments defending Governor Inslee's action, including those who say they do not typically like him but want to give "credit" regarding his handling of Washington's response ([example 1](#)). Many critique the President's "childish" response

([example 2](#), [example 3](#), [example 4](#)), and some say that both Trump and Inslee need to stop calling each other names because we all need to "come together" to fight this virus ([example 5](#)).

- Gov. Jay Inslee appeared on CNN Sunday and said our state needs the federal government to step up to provide much-needed supplies. ([KIRO 7](#), [The Olympian](#), [Tri City Herald](#))
 - Comments on [KIRO 7 News Facebook post](#) are very critical of Governor Inslee, with some using President Trump's moniker "snake" for him and making reference to Washington offering "sanctuary" status when it comes to immigration and saying the Governor should utilize funds they say he diverts to sanctuary cities ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#)).
 - Some comments say that Governor Inslee needs to be reminded that it's his job to lead the state of Washington, not the federal government. ([example 1](#), [example 2](#)) and saying that they do not see the governor doing anything innovative to solve this problem ([example 3](#)). Another person points out that it is up to the state and local governments to be prepared for emergencies of all varieties, and it is the federal government's role to back those local plans, not to make them ([example 4](#)).
 - Another comment argues that the President should use the Defense Production Act to force "big pharma" to accelerate the production of medicines that people need while on ventilators, saying we are weeks away from having to make horrible decisions about which sick people live and die because of drug shortages ([example 1](#)).
- "I want to THANK the so many incredible men and women on the front lines here in the wonderful USA, working day & night to see to it that those sick with COVID-19 are getting the best care possible. First responders, doctors, nurses, our local, state & federal government." ([KOMO Reporter](#))

Flattening the Curve

- Coronavirus Slowdown in Seattle Suggests Restrictions are Working. Officials in Washington State worry that their gains are precarious, but they see evidence that containment strategies have lowered the rate of virus transmission. ([New York Times](#))
- People with coronavirus in King Co. could face legal action if they refuse to isolate. King County's leading health official issued a new order Saturday that threatens involuntary detention for those who refuse to isolate after testing positive for the coronavirus. ([KIRO 7](#))
- As the novel coronavirus continues to spread, Amazon said it would begin screening employees for elevated temperatures each day, starting at sites in Seattle and New York City, as "an additional preventive measure." ([Seattle Times](#))

New Cases and Fatalities

- Washington's coronavirus deaths rise to 200 with fatalities in King, Spokane, Whatcom ([KEPR](#), [KATU](#), [KOMO](#))
 - On [KEPR's Facebook post](#) people comment wanting to know how many people survived the illness ([example 1](#), [example 2](#)).
 - One person says she is trying not to panic, but says she has a baby to protect and is contemplating leaving the country for her national origin which has fewer confirmed cases ([example 1](#))
 - Comments are critical of the media coverage of the fatalities - critiquing the use of the word "milestone" ([example 1](#)) and saying that it is "sad" the media is treating this like a "score card" ([example 2](#))
 - On Oregon-based outlet [KATU News' Facebook post](#) of the same story, people comment that everyone in Washington's King, Spokane, and Whatcom Counties need to say in those counties ([example 1](#)) and that Oregonians should stay out of Washington state ([example 2](#)). Some ask for more posts about recoveries ([example 4](#)) and for some positive news ([example 5](#)).
- Third & fourth COVID-19 related deaths reported in Spokane County; 115 total cases confirmed. ([KHQ](#))
- 59 cases in Grant County, Warden reports its first ([Columbia Basin Herald](#))
 - First Responders in Seattle hit by COVID19 with a dozen testing positive, forcing 200 others to

isolate or quarantine. ([KOMO Reporter](#))

PPE

- Hockey equipment manufacturer Bauer has shifted from making visors for helmets to medical visors for those fighting the coronavirus pandemic. ([YakTriNews](#))

Community Impact

- Spokane property owners face string of break-ins amid coronavirus shutdown. Spokane Police have responded to three separate break-ins at the new South Hill complex since work on the building stopped. ([KREM](#))

Donations

- A couple whose wedding party was canceled amid the coronavirus outbreak donated the reception meals to feed 400 hospital workers. ([KIRO 7](#))

Oregon

- President Approves Major Disaster Declaration for Oregon ([KQEN](#))
 - [Representative Greg Walden](#): Thank you President Donald J. Trump for approving Oregon's disaster declaration. ([Rep. Walden Statement on Oregon Disaster Declaration](#)). Most responses on Facebook are frustrated with Rep. Walden's expressions of gratitude to the president. ([example](#))
 - Governor calls federal disaster declaration for Oregon a 'first step.' ([The Oregonian](#)) Reacting on Facebook, some debated whether it is Governor Brown's or the Federal government's job to fix problems with the pandemic response ([example](#)), and others criticized the Governor's actions for being too late. ([example 1](#), [example 2](#))

New Cases

- 69 cases of COVID-19 have now been confirmed in CTUIR ceded territory. ([Confederated Tribes of Umatilla Indian Reservation](#)). This brings the [statewide total](#) to 548.
 - As the case number rises, Oregonians debate whether people are following the stay-at-home order, with many saying they are not. ([example 1](#), [example 2](#))

Gas Stations

- Oregon clarifies temporary suspension of self-service gas ban. ([The Oregonian](#)) Explains self-service is not mandatory and will only happen when a gas station owner exhausts staffing options. In response people passionately debated the decision ([example 1](#), [example 2](#), [example 3](#)), and several people reported that many gas stations are making it mandatory ([example 4](#)).
 - A trending [NBC 5 article](#) pointed out gas attendants are being repurposed to "clean these now public interfacing machines, the pumps and the key pads, it's going to be cleaner than most door handles, door knobs that you interact with in the public."

Social Distancing

- Beaches, coastal cities empty as Oregon's stay-home order takes hold ([KGW](#))
- Madras couple has a 'socially distant' wedding ([KTVZ](#))
- Portland nurse borrows RV through Nextdoor app to protect family from exposure ([Fox 12](#))

Humanity

- Oregonians celebrate "National Doctors Day" ([Fox 12 Facebook](#))

Idaho

New Cases

- Idaho coronavirus updates: 6 deaths, 325 cases ([KTVB](#)) There is concern that people are not heeding social distance warnings. ([example 1](#), [example 2](#)) Several ask why KTVB isn't highlighting people who recover. ([example 1](#), [example 2](#))
- Boise Target employee tests positive for the coronavirus ([KTVB](#)) This has sparked worry among people who have shopped there to potential exposure. ([example 1](#), [example 2](#), [example 3](#))
- Panhandle Health District announces 16 additional cases of COVID-19 in North Idaho ([Coeur d'Alene/Post Falls Press](#))

Community Impact

- A woman who works at a grocery store has been turned out by her family for fear of exposing family members to COVID19 from her job. She called United Way for help, but their shelters are full. ([United Way of Southeastern Idaho Facebook](#))

Business

- The Pocatello Greenhouse once again open for business ([Idaho State Journal](#)) Many do not feel that greenhouses are essential, ([example 1](#), [example 2](#)) others do ([example 3](#), [example 4](#)).

Reactions

- In response to the President's extension of social distance guidelines through ([KIFI](#), [KTVB](#), [Idaho News](#)) The main concern from Idahoans is businesses remaining open that the public do not feel are essential. ([example 1](#), [example 2](#), [example 3](#)) Many worry about being out of work for an extended period. ([example 1](#), [example 2](#), [example 3](#))

Alaska

New Cases

- Twelve new cases of COVID-19 detected in six Alaska communities; third Alaska death (second in-state death). ([Alaska DHSS](#))
 - [Dr. Zink's video](#) solemnly reporting the new cases and new death remains among the most engaging posts on coronavirus in Alaska. People remain very grateful for Dr. Zink's leadership and her direct yet empathetic updates ([example 1](#), [example 2](#), [example 3](#)).
 - The Tananan Chiefs Conference [posted on Facebook](#) about receiving a teleconference update from Dr. Zink and received positive response. ([example 1](#), [example 2](#))
 - In response to the [Alaska DHSS Facebook post](#) Alaskan's continue to request more context for the numbers, such as number of tests given, number of recovered, etc. ([example](#))
 - State Epidemiologist Dr. Joe McLaughlin has a video series on [Testing](#), [Viral Shedding](#), and [Treatment Options](#) that Alaskans find engaging.
- Cluster of COVID-19 cases associated with Fairbanks medical building. ([KTVF](#)) In reaction some people who had contact with the facility wondered why they found out via Facebook rather than contacted directly ([example](#)).

Economy

- Sweeping law promises Alaskans coronavirus economic relief and earmarks money to fight pandemic. ([Anchorage Daily News](#)) The measure includes provisions blocking foreclosures, evictions and utility cut-offs, cracks down on price-gouging and moves back the PFD application deadline.
 - In response, people continue to focus on the lack of PFD ([example 1](#)), and others saying that this is the year Alaskans need the PFD most ([example 2](#), [example 3](#))
- Governor Feels Legislature 'Missed The Mark' By Not Including Cash Infusion In Budget ([KSRM](#)) In response some praise the governor's leadership. ([example 1](#), [example 2](#)) Many expressed outrage at the legislature and specific legislators. ([example 1](#), [example 2](#), [example 3](#))

Food for the vulnerable

- Food Bank partners with businesses to help deliver food to Alaska seniors ([Anchorage Daily News](#))
- Caribou musher delivers groceries and medication to people vulnerable to coronavirus ([Bangor Daily News](#))

ADDING TODAY's AGENDA

AGENDA –

- I. Roll Call
- II. Leadership Updates – JT & Derek
- III. Funding Updates
 - a. FEMA
 - b. CARES Discretionary Funding Discussion – soon to be available through local jurisdictions and OFM for state agencies
 - 1. What are agencies and partners considering requesting for their funding priorities and strategies?
- IV. Action Team Report Backs
 - a. Food Procurement Team
 - b. Gap Analysis Team
 - c. Coordinated Community Response Team
- V. Communications
 - a. JIC Reporting – Chris
 - b. Other communication needs?

- VI. Partner Updates or Concerns for the Week Ahead
- VII. Adjourn

Coordination call to establish information sharing and reporting across all lines of effort currently working on food security and food supply chain issues.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report March 28, 2020

March 28, 2020 at 10:46 AM EDT

To: Undisclosed recipients:

Good morning.

We will now be sending this report out daily. Please let us know if there's anyone who needs to be added to the distribution list or if there are any topics that should be included in the report.

Thank you.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 28, 2020

SUMMARY

- The Department of Defense will deploy a military field hospital to Seattle's CenturyLink Field Event Center in response to the anticipated surge in COVID-19 cases that threatens to overwhelm Washington's health care system.
- Washington County leads Oregon in coronavirus cases with 122 patients.
- Statewide shelter in place, travel ban, ordered in Alaska as the state sees its first in-state COVID-19 death.

Public Sentiment

- While most Alaskans continue to embrace social distancing measures, many bristled in reaction to the news on Friday that a travel ban and greater social distancing is now mandated by the government.
- Washingtonians continue to mostly support the measures being taken to curb the spread of the COVID-19 epidemic – even though these measures disrupt virtually all aspects of daily life and recreation. Some struggle to say goodbye to trails in the national forest and adjust to the thought of CenturyLink Field Center, normally home to concerts and fun activities, being transformed into a field hospital so that local hospitals can treat the growing number of COVID-19 patients.
- As the number of positive cases climb, Idahoans point out that test results are taking many days to come back, and that the reported number could not reflect the number of actual cases.
- Oregonians express understanding for restrictions on outdoor recreation, continue to praise private sector efforts to meet PPE demand, and remain focused on economic concerns.

Washington

CenturyLink Field Event Center, home to boat shows and concerts, will become a field hospital during coronavirus pandemic. The goal of the field hospital is to lessen the burden on local hospitals so that the local hospitals can focus on treating patients with COVID-19. ([KIRO 7](#), [KOMO](#), [Q13](#))

- Mike O'Hare, a FEMA coordinating officer, said on Friday that FEMA remains focused. "Together with our local, state and federal partners, the private sector is playing a critical role in our united effort to respond to the COVID-19 pandemic," O'Hare said in a prepared statement. ([Seattle Times](#))
- [Governor Jay Inslee](#) shared the article "Army to bring field hospital to CenturyLink Field Event

Center" ([KIRO 7](#)) on Twitter and said: "We need to increase the capacity of our health care delivery system. This new field hospital will do that. Thanks to the Army Corps of Engineers ([@USACEHQ](#)), [@USArmy](#), and [@fema](#) for these resources, and to [@MayorJenny](#) for her leadership. [#WeGotThisWA](#)."

- [Mayor Jenny Durkan](#) shared the press release "U.S. Army Brings Field Hospital to Seattle to Help Reduce Burden on Local Hospitals" ([Office of the Mayor](#)) on Twitter and said: "I appreciate the advocacy of [@GovInslee](#), quick work of [@VulcanInc](#), the [@Seahawks](#), and [@CenturyLink_Fld](#) to allow the deployment of this field hospital, and extend my deepest gratitude to the men of women of the [@USArmy](#) who will be doing life saving work." ([@MayorJenny](#))
 - In the Mayor's [Facebook post](#) on the same topic, comments are mixed. Some people praise the leadership of Washington State ([example 1](#), [example 2](#)) and the President ([example 3](#), [example 4](#)). Others are critical - pointing out that Kirkland, not King County, was the epicenter of Washington's COVID-19 outbreak ([example 5](#)). One person mentions the FEMA Camps conspiracy theory ([example 5](#)).
 - Three hundred soldiers from Colorado were deployed to Seattle to staff a field hospital at CenturyLink Field Event Center. In comments across two different [KIRO 7 News Facebook](#) posts ([post 1](#), [post 2](#)) and on [Q13 FOX's Facebook post](#) about the field hospital, people wonder about the logistics of this move -- should they have picked a different stadium? Will there be a roof? Should the city use the convention center? Won't it be difficult to adequately heat this large stadium? The FEMA Camp conspiracy theory also comes up with relation to Century Link ([example 1](#), [example 2](#), [example 3](#))

PPE

- An ER physician who made pleas for more safety equipment and more urgent measures to protect staff at PeaceHealth St. Joseph Medical Center was fired on Friday. ([Seattle Times](#))

Testing

- COVID-19 drive-thru testing in Shoreline starts Monday, March 30. ([Shoreline Area News](#))

Business

- Despite the coronavirus crisis, some Washington state landlords are steadfastly insisting that rent is still due in full, or even raising rents. ([Seattle Times](#))
 - People on the [Seattle Times Facebook post](#) comment on the fact that landlords have mortgages to pay, but many agree that raising the rent in this time is harsh ([example 1](#), [example 2](#), [example 3](#))
- Multinational Boeing supplier furloughs hundreds without pay. Safran Cabin, which has suspended production that employs 1,500 workers, will not pay employees regular wages during the break. Instead, it told employees to either take state unemployment benefits or use vacation time. ([Seattle Times](#))

Homeless Population

- Kitsap County sets up two 'recovery centers' as it prepares for COVID-19 to hit the homeless. ([Kitsap Sun](#)). Comments on the [Kitsap Sun Facebook post](#) are complimentary of this action ([example 1](#), [example 2](#)), and some suggest other locations that could be used -- vacant church buildings ([example 3](#)) and schools ([example 4](#)).

New Cases

- 16 coronavirus cases at Yakima nursing home. ([YakTriNews](#))

Community Impact

- Oregon, Washington close all national forest sites, trails across 24M acres. The closures cover around 24 million acres of forest, mountains and coast spread across 17 national forests. ([KGW](#)) Comments on the [KGW-TV Facebook post](#) largely support this decision, with some understanding *why* these measures are being taken but still wishing they weren't ([example 1](#), [example 2](#))

Oregon

Hot Spot

- Washington Co. leads Oregon in coronavirus cases with 122 patients ([KATU](#))

PPE

- Oregon Humane Society donates 18,000 face masks to local health care workers ([KATU](#))

Business and Economy

- Rogue Credit Union helping members amid coronavirus pandemic. ([KOBI-TV NBC5](#)) Reactions

praised the organization. ([example 1](#), [example 2](#))

- Evictions halted, but concerns of paying rent remain. Some people are worried they won't be able to pay back the rent that accrues under the eviction moratorium. ([KOIN 6](#)) Many responded to this article which was sympathetic to renters by saying COVID-19 should not be used as an excuse not to pay rent. ([example 1](#), [example 2](#), [example 3](#))

Social Distancing

- Oregon, Washington close all national forest sites, trails across 24M acres. ([KGW 8](#)) Reaction is generally positive, with people sad to lose the recreation but supporting the reasoning behind the move. ([example 1](#), [example 2](#), [example 3](#))
- Dispatch recordings show confusion at TriMet in coronavirus response. The transit agency has struggled to deal with overcrowded buses and possible contamination. One passenger reported another "spit all over his hands and just started touching every single part of the bus." ([KGW 8](#))
- Individuals in Albany [wonder if police are stopping](#) people who are out and about. The response is overwhelmingly no. ([example 1](#), [example 2](#))
- 25 photos of Oregon in spring, for a virtual spring break vacation ([Oregonian](#))

Rumor Control

- SCAM ALERT: Fake coronavirus stimulus checks are already hitting mailboxes. ([Fox 12](#))

Idaho

Tracking Cases

- Ski vacation hot spot becomes virus ground zero in Idaho ([Idaho News](#))
- A conversation in a Facebook group [Idaho Covid 19 Mutual Aid Group](#) looks for confirmation that test results are taking a while, therefore current data indicate that [positive cases are much higher](#). Responses are generally all affirmative, with one person responding that [they have been waiting for 11 days](#).

Personal Experience

- 'You can't cheat the virus': Boise man details what is like to have the coronavirus and recover from it ([KTVB](#))

New Cases

- East Idaho county reports first confirmed coronavirus case ([Idaho State Journal](#))
- First COVID-19 case confirmed in Bonneville County ([Local News 8](#))

Mass Care

- School District 25 to begin emergency food service program on Monday ([Idaho State Journal](#))

Donations

- Idaho Chinese Organization donates goods to hospitals, shelters ([Idaho News](#))
- Local restaurant donates food to homeless shelter before closing due to COVID-19 outbreak ([KPVI](#))

Alaska

Social Distancing

- [Governor Dunleavy](#) issued [two new health mandates](#) to maintain social distancing and intrastate travel ban ordered as Alaska sees first in-state COVID-19 death. ([Alaska Daily News](#))
 - Reaction is mixed with some people intending to defy the order ([example 1](#), [example 2](#), [example 3](#)), some requests for clarity on what is allowed ([example 1](#), [example 2](#), [example 3](#)), and some—even critics of the governor—supporting the decision ([example 1](#), [example 2](#)).

New Cases

- As of 3 p.m. March 27, DHSS reported 16 new cases over the past 24 hours bringing Alaska's total case count to 85. ([Alaska DHSS Facebook](#)) Some comments expressed stress over the continually rising numbers, asked for more context to be reported along with them such as recovery numbers and clarity on symptoms. ([example 1](#), [example 2](#))

PPE

- Local Palmer company produces swabs to increase COVID 19 testing capacity. Swabs have been a key limiting factor according to Alaska's Chief Medical Officer. ([Frontiersman](#)) Alaskan's [praise](#) and [take pride in](#) these local efforts.

Business/Community Impact

- Golden Valley Electric Association (GVEA) makes changes in response to coronavirus, delaying late fees and service disconnects. ([KTVE](#))
- Alaska utility to reconnect water customers during outbreak ([KTVA](#))
- Seward fisherman hopes to fill freezers for the needy impacted by COVID-19. ([KTUU](#))
- Blood donation centers feeling the effects of COVID-19 ([KTUU](#))

Politics/Government

- Amid criticism and the coronavirus pandemic, Alaska investment board approves \$35 million for Ambler Road. The project is one of a series of economic-aid measures intended to address the effects of the COVID-19 pandemic. ([Anchorage Daily News](#)) Reaction on Facebook continues to be critical, some accusing the board of using the pandemic as a smokescreen behind which to accomplish their agenda. ([example 1](#), [example 2](#))

FW: Grocery supply chain FEMA call

March 14, 2020 at 7:26 PM EDT

To: Ezelle, Robert (MIL), Baumgart, Jim (GOV), Buchholz, Brian E. (ATG), Lang, Robert (MIL)

Cc: Shagren, Karina L. (MIL), Foster, Sarah (MIL), Smith, Jaime (GOV), Hennessee, Taylor (MIL), Allen, Tristan (COM), Richeson, Jonathan, Knutson, Charles (GOV)

Robert and others.....see the notes below from our FEMA Team, based on a supply chain FEMA conf call.

The grocery supply chain looks like it is now or is going to be our 2nd biggest issue behind Hospitals and First Responders running out of PPE.....

Jason

Cc: Fordice, Justin <justin.fordice@fema.dhs.gov>; Carey, Joshua <Joshua.Carey@fema.dhs.gov>

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center.

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed.

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 9, 2020

SUMMARY

- Washington Governor Inslee announced that the alternate care site at the CenturyLink event center is needed more elsewhere and is returning it to FEMA.
- Bothell-based Ventec Life Systems saw the biggest single order for its portable ventilator Wednesday when the federal government requested 30,000 of the life-sustaining machines for \$489.4 million.
- Washington State Patrol says over 100 inmates at the Monroe Corrections Complex started a "disturbance" on Wednesday evening over the complex's six coronavirus cases.
- Oregon Governor Brown ordered school buildings closed for the rest of the school year.
- Alaska's biggest oil producer, ConocoPhillips, will halt drilling in the North Slope.
- Idaho Governor Little signed an executive order to oversee the approximately \$1.25 billion in federal funds the state will receive to fight the COVID-19 pandemic.

Public Sentiment

- The economic realities have some people in Washington and Alaska feeling desperate.
- Food banks are low on donations. In Seattle, a non-profit was robbed for its food and hygiene supplies, with thieves leaving behind high-value office equipment.
- Seattle-area small businesses applying for SBA loans see both potential and problems with the process.
- In reaction to the field hospital at CenturyLink being redeployed, people are glad that Washington was prepared and grateful it was not needed. They credit social distancing with helping to avert the worst of this crisis.
- The Alaskan people are distressed about the economy in the wake of news that ConocoPhillips is cutting oil production, given that Alaska's tourism industry is already struggling.
- There are rising concerns about the impact of COVID-19 on vulnerable populations.

Washington

CenturyLink Field Hospital Redeployed

- After consulting with other officials, Gov. Jay Inslee's office announced the hospital is being returned to FEMA so it can be used in a state with a more "significant need." ([KIRO 7](#), [KING 5](#), [KOMO](#), [Q13 FOX](#), [Seattle Times](#), [KHQ Local News](#), [KUOW](#), [The Hill](#), [Spokesman-Review](#), [Seattle Journal of Daily Commerce](#))
- Gov. Inslee: Today we're returning the field hospital stationed at CenturyLink to @FEMA so it can be redeployed to a state with a more significant need. I'm proud that our diligence has saved lives across the state, and am even more proud that we can now help save lives across the country. [Full Statement](#) (@GovInslee Twitter)
- In reaction to the news, the majority of people are grateful that Washington was prepared and grateful it was not needed. They urge each other to not to think that Governor and scientists exaggerated, but to realize that social distancing has helped to avert a much-worse crisis. A small minority of people claim that the hospital was an overreaction in the first place, or are

worried that Washington may still need it. ([example 1](#), [example 2](#), [example 3](#))

Medical Equipment

- Bothell-based Ventec Life Systems saw the biggest single order for its portable ventilator Wednesday when the federal government requested 30,000 of the life-sustaining machines for \$489.4 million. ([Seattle Times](#))
- Mukilteo company creates portable handwashing station. ([KIRO 7](#))

Food and Essentials

- Thieves target Seattle non-profit, stealing food and hygiene supplies. The thieves did not take computers or other high-value office equipment, just food and grocery store items. ([KING 5](#))
 - Comments on the [KING 5](#) Facebook page speak to the desperation people are feeling, and some mention that local food banks need donations.
- Washington National Guard supports Second Harvest with food distributions. Before the coronavirus, Second Harvest typically distributed about 150,000 pounds of food each week. Meuer said last week, it distributed 600,000 pounds. ([KREM](#))
- See price gouging during coronavirus crisis? Here's how to report it in Washington. Attorney General Bob Ferguson says his office has received more than 500 complaints about price gouging for items since February. ([KING 5](#))

Inmates

- Washington State Patrol says over 100 inmates at the Monroe Corrections Complex started a "disturbance" on Wednesday evening over six coronavirus cases at the complex, causing a large law enforcement response. ([KING 5](#))
 - National media quickly picked up the story, including [CNN](#), [Newsweek](#), [CBS](#), and [NPR](#).

Testing

- Confluence Health opens drive-thru testing site in Omak. ([Wenatchee World](#))

Isolation and Quarantine

- The Wenatchee Valley's first COVID-19 isolation shelter opened Tuesday. ([Wenatchee World](#))

Long-Term Care

- At least 137 long-term-care facilities in Washington state had confirmed cases of the disease caused by novel coronavirus as of Wednesday, and 221 deaths have been linked to them, according to state officials. ([Seattle Times](#))

Education

- University of Washington cancels in-person commencement ceremonies. Commencement for the Seattle, Bothell and Tacoma campuses now will be held virtually because of the area's ongoing spread of coronavirus. ([KING 5](#))

Business and Economy

- Seattle-area small businesses applying for federal coronavirus loans see potential and problems ([Seattle Times](#))

Donations

- Seahawks wide receiver D.K. Metcalf donates \$50K for coronavirus relief-- half of the money will go to a Seattle hospital and the other half will go to Metcalf's hometown of Oxford, Mississippi. ([KING 5](#))
- Allstate customers to receive 'Shelter-In-Place' payback due to traveling less. Another national insurer, USAA, has also announced plans to [provide refunds](#) to some of its customers. ([KOMO](#))

Federal Response

- US coronavirus cases hit 400k as more Americans question federal response, polls show. ([Tacoma News Tribune](#)) Comments on the [Tacoma News Tribune Facebook](#) debate the president's handling of COVID-19 and are divided in their opinion of the federal response.

Oregon

Flatten the Curve

- 'Stay home, stay local': Oregon trails, beaches off-limits. ([KOIN](#), [KATU2](#))
 - [Mayor of Newport](#), a coastal town, says 'I have been getting concerns all week about an uptick in tourists returning to Newport due to the nice weather.' Residents are telling visitors to '[stay out!](#)'
- Portland Parks & Recreation will have greeters at some popular parks to make sure people are following social distancing rules. ([FOX 12](#))
- Washington, Oregon show promising coronavirus trends. ([The Hill](#))

- OHA promotes safe sex in the time of COVID-19. ([KOIN](#), [Portland Mercury](#))

Education

- Gov. Brown extends school closure order through 2019 - 20 academic year. ([KGW8](#), [KVAL13](#), [The Oregonian](#), [Willamette Week](#))
 - Residents understand the logic behind the decision, but are grappling with grief of missing important events with their high school seniors, and the stress of managing work from home while supervising their children's education. ([example 1](#), [example 2](#), [example 3](#))
- High school seniors face unanswered questions. ([The World](#))

Community Impact

- Oregon's Latino population is disproportionately affected by coronavirus cases. Though Latinos make up 13% of the state's population, they represent at least 18% of all positive cases, potentially more. ([KGW](#))
 - Comments on [KQW's Facebook page](#) speculate about why this might be -- with ideas ranging from more Latinos being essential workers, Latinos generally being family-oriented and still seeing family despite social distancing or living many family members under one roof, to systemic health and income inequality that disproportionately affect people of color.

Business

- Oregon Employment Department is hiring ([KATU2](#)), while facing the continued problems and new pressures from claims of laid-off workers. ([The Oregonian](#))

New Cases

- Five new COVID-19 deaths, 58 new cases in Oregon. ([KGW8](#), [KATU2](#), [KOIN](#), [KPTV12](#), [The Oregonian](#))
- COVID-19 will strain Oregon's capacity for dealing with the dead. ([Willamette Weekly](#))
- Oregon prepares for coronavirus surge: New online tool will help track its spread, direct sick to open hospital beds. ([The Oregonian](#))

Testing

- Oregon got half the 20,000 coronavirus tests the governor touted. ([The Oregonian](#), [KGW8](#), [KATU](#))

PPE

- Oregon National Guard soldiers are making 1,000 masks and 1,000 face shields to support fellow National Guard members, avoiding using PPE from National Emergency Stockpile. ([@OregonGuard](#))

Idaho

Federal Support

- The governor signed an [executive order](#), forming his new Coronavirus Financial Advisory Committee to oversee the approximately \$1.25 billion in federal funds that Idaho will receive to fight the COVID-19 pandemic.
- Feds supply Idaho with 600,000 items to protect front-line workers from the coronavirus. ([Magic Valley](#))

Economic Recovery

- City of Boise financial experts don't expect a sudden recovery. There's no clear timeline for when Idaho's economy will recover from coronavirus pandemic. ([KTVB](#))

Stay-at-Home order protest

- Ammon Bundy, health freedom group organize events to protest stay-home order. ([Idaho State Journal](#)) A [letter to the Magic Valley](#) editor responds that his actions are a shame.

WHO

- Idaho senator calls for investigation into the WHO over how it handled the COVID-19 pandemic. ([KTVB](#)) The overall [reaction to this move is dismissive](#), while some voice support for the senator.

Alaska

Economy

- Alaska's largest oil producer, ConocoPhillips, will halt North Slope drilling to protect workers amid coronavirus crisis. ([Anchorage Daily News](#), [KTUU](#), [Alaska Public Media](#), [KTOO](#)) In its announcement the company cited the "remoteness and complexity of operating on the North Slope during the COVID pandemic." This follows news last week that [BP would limit all](#)

[nonessential activity](#) in the North Slope.

- One subcontractor, said the impact of the decision will be “severely felt” by all of its employees and Alaskans ([Alaska Daily News](#))
- On Facebook, people are very disheartened by the news, and wonder how Alaska's economy will fare without oil or tourism. Several comment that low oil prices are the real reason for the shutdown of operations. ([example 1](#), [example 2](#))
- Profile: Businessowner watches his Anchorage cafe crumble under the weight of the coronavirus crisis, one quiet day at a time. ([Anchorage Daily News](#))

Updates from Governor Dunleavy

- PPE is still a problem, the state has requested much more than it has received. ([KTUU](#))
- Gov. Dunleavy addressed the mandate issued Tuesday which extended the suspension of non-elective surgeries, including abortion: '[No, we are not being political.](#)' He says they are trying to conserve PPE.
- The state is '[moving on this as fast as we can](#)' to get unemployment benefits distributed to Alaskans.

PPE

- Anchorage Daily News published [a story by Los Angeles Times](#) claiming the federal government is seizing medical supplies that was enroute to hospitals in Washington, Oregon and Alaska.
 - The reaction on [Facebook](#) is frustration with the federal response, with many saying that this is what people should have expected since they asked for the federal government to take over. Many people are confused by the situation, for example wondering whether the seized goods were paid for by the states or the federal government.

Austin, JT (GOV)

FOOD SECURITY Coordination Team conference call / twice weekly check-in

To: nicolas.granum@fema.dhs.gov

Hello Team,

Please note Coordinate Team name change (need all the positive framing we can get these days). Let me know if you have a strong objection to the change.

Please continue to send me suggestions for team member additions so that I may add accordingly. Continue to forward to staff leads, as you deem appropriate until I get the list updated.

These meetings are scheduled twice a week, Mondays and Thursdays, through the end of June. The situation, as you well know, is fluid so the team makeup and team outcomes may change over the course of time and as per direction of Incident Command.

Please send agenda items by noon the day before each conference call.

Please contact me directly in between conference calls to highlight and discuss Hot Button issues that require elevation and/or immediate attention.

Your input on how these coordination calls go, the content, follow up, membership, etc., is extremely valuable. Please send concerns, ideas, and feedback to me directly.

Take good care. Talk soon.

Subject: COVID-19 Food Insecurity/Hunger Coordination Conference Call

When: Monday, March 16, 2020 1:00 PM-3:00 PM (UTC-08:00) Pacific Time (US & Canada).

Where: 888-287-7315 Mtg ID: 3155376 Host(JT) 2929#

Importance: High

Hello Team,

Please forward this conference call to appropriate state leads and staff.

I have been asked to serve as the Governor's office Coordinator for Food Insecurity/Hunger Issues.

Please note I have had to push this conference back to 1 PM as I have a meeting with our Chief of Staff at 12 noon on a related food/ag issue.

I look forward to meeting you all and doing good work!

Best,

JT

AGENDA

Welcome and Introductions

Identification of Agency Leads and Additional Partners Discuss "Chain of Command" and Points of Contact Identification of Immediate Actions, assign leads
Identification of Longer-Term Actions, assign leads Establish Daily Coordination Calls

DRAFT List of Issues for Discussion (will be edited as we go)

Mobilize Large-scale Restaurant Food Rescue Operation: assign small ad-hoc team, discuss coordination with hospitality association, county EDC's, transportation, communications

Repack household size food items, deliver to local hunger relief organizations

COVID-19 SNAP Requests

Get purchasing power to low income people on SNAP so they can purchase food and acquire rations during quarantine

Suspend implementation of ABAWD rule that is scheduled to go into effect 4/1

Provide additional months benefit early to allow for additional purchases

Increase the monthly benefit and expand eligibility to reduce reliance on overwhelmed food banks FUNDING Funding for temporary staffing to a) offset a depleted volunteer base (hunger relief significantly relies on senior volunteers who are showing up in reduced numbers due to their vulnerability to COVID-19) b) begin providing mobile market and home delivery for low-income infected and/or otherwise quarantined people unable to access food through other means; Funding for packing and re-packing supplies to a) pack food into self-contained boxes to give clients in open air environments to reduce person-to-person contact and b) to repack bulk commodities from OSPI/USDA for distribution in household sizes.

* Anecdotal – the largest food bank in Snohomish Count spent \$5,000 on 3/12 to purchase thousands of bags so that they could maintain food distribution with pre-packed food bags. Many other large food banks are making similar purchases to keep food flowing to low-income people; most of these organizations have reserves that can support these purchases for a short-time, but this pandemic is expected to take a huge toll on businesses, including the nonprofit sector, and government support will be needed to ensure that food continues to flow in the coming weeks and months.

Funding for sanitation supplies* – hand sanitizer, disinfectant wipes, increased professional cleaning services, hand washing stations, gloves, etc.

Funding for distribution costs – including leasing refrigerated vehicles, fuel, insurance, etc. to enable more food-safe home deliveries and mobile distribution units.

Additional funding to purchase food as donations dwindle due to social distancing and an increased number of quarantined people.

How National Declaration impacts funding and actions

DHS_Announces_\$10_Million_in_FY20_Funding_Availability_for
_Targeted_Violence_and_Terrorism_Prevention_Grant_Programs

April 21, 2020 at 9:47 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

**DHS Makes \$10 Million in Funding Available for
Targeted Violence and Terrorism Prevention Grants**

WASHINGTON – The Department of Homeland Security (DHS) is making \$10 million available to help local communities more effectively combat terrorism and targeted violence across the United States. The \$10 million appropriated by Congress under the Fiscal Year 2020 Targeted Violence and Terrorism Prevention (TVTP) Grant Program will support the development of a nationwide terrorism and targeted violence prevention framework. DHS strongly encourages all eligible entities to apply for this funding opportunity to build capabilities in their communities and online.

“Attacks by domestic terrorists, those inspired by foreign terrorist organizations, and acts committed by violent individuals with no clear ideological motivation have occurred in communities across America with tragic outcomes,” said Acting Secretary of Homeland Security Chad F. Wolf. “These grants will improve local communities’ ability to prevent individuals from mobilizing or radicalizing to violence and create locally-based prevention frameworks to address these emerging threats.”

The TVTP Grant Program helps DHS to fulfill its commitment to addressing the threat posed by terrorism and targeted violence at home and builds on the promising practices identified in previous grant programs. It is the only federal grant program dedicated to enhancing prevention capabilities in local communities. In its first year, the TVTP Grant Program has three priorities: (1) establishing and enhancing local prevention frameworks with an emphasis on threat assessment and management capabilities; (2) preventing domestic terrorism; and (3) finding innovative solutions for preventing targeted violence and terrorism.

“I want to thank Congress for funding for this mission in a bipartisan way over the last few years, most recently and most significantly, in the Fiscal Year 2020 Appropriations Act. We look forward to working with Congress to continue to advance this effort.” Wolf continued.

Eligible activities under the TVTP Grant Program cover all aspects of prevention, including building resilience, intervention, recidivism prevention, and reintegration programs at the local level. The program directly supports the objectives of the [DHS Strategic Framework for Countering Terrorism and Targeted Violence](#), which DHS released in September 2019. Making these funds available for local prevention partners is a key milestone in the implementation of the Strategic Framework.

TVTP Grant Program funds will support the development of local prevention capabilities at a time when DHS is observing an uptick in online efforts for terrorism recruitment and

radicalization from a variety of sectors. DHS is committed to expanding the program and the President has requested an additional \$20 million for TVTP grant funds next fiscal year.

The application period will close on May 29, 2020. Applicants should consult the [Notice of Funding Opportunity](#) for more specific information about the process. Applying for this grant is a multi-step process and it is recommended that applicants begin that process early in order to allow sufficient time to complete the interim steps.

For more information, please see the TVTP Grant Program site at <https://www.dhs.gov/tvtpgrants>.

RE: Seattle Times inquiry: Gov. Newsom's Project Room Key

To: Klontz, Diane (COM), Faulk, Mike (GOV), Flanagan, John (GOV), Vasavada, Jasmine (COM), Leaders, Amber (GOV)

Cc: Kelleher, Tedd (COM), McMurtry, Martin (COM)

Mike,

Several counties have applied to FEMA for reimbursement of non-congregate sheltering. Those activities can include the use of hotels for individuals who are unhoused due to the COVID virus.

Subject: RE: Seattle Times inquiry: Gov. Newsom's Project Room Key

Hello Mike~ I have attached the media release from March 19th that gives the most concise version of the \$30M grants. The funds were directly allocated to Commerce from OFM and were part of the \$200M.

If you need more info, I can be reached at 360-701-2732.

~Diane

Commerce announces new emergency housing grant for counties

- March 19, 2020

Funds are available immediately

OLYMPIA, Wash. – The Washington State Department of Commerce is making \$30 million in funding immediately accessible to every county under a new grant. This funding will help local governments create housing necessary for quarantine, isolation, and additional sanitation to address the COVID-19 pandemic.

“Upfront, the requirement is simple: coordinate with your local public health department and cities, and get going,” said Lisa Brown, Department of Commerce director. “This grant is designed to get the money out into the communities so we can make a difference immediately. Please work closely with your local public health jurisdiction to deploy these funds quickly.”

Each county will receive a minimum of \$250,000, with the rest distributed based on the number of homeless persons as measured by the annual Point-In-Time Count.

The funding will address the quarantine and isolation needs for people experiencing homelessness and other people who cannot isolate at home, including:

- Create isolation and quarantine housing.
- Create additional emergency shelter capacity for people experiencing homelessness to replace shelter capacity lost when the state required increased social distancing.
- Increase sanitation in existing homeless housing.
- Other costs associated with addressing the public health needs of people experiencing homelessness or displaced from their former housing due to the COVID-19 outbreak.

The ultimate goal is to have facilities available as quickly as possible for those in need.

“This initial funding amount will help every community take immediate steps to help their residents,” Brown said. “We are aware that more funding from other sources will be essential as we move forward through the COVID-19 pandemic.”

The amounts distributed to each county, and more information about the new COVID-19 emergency housing grant requirements are [HYPERLINK "https://www.commerce.wa.gov/serving-communities/homelessness/"](https://www.commerce.wa.gov/serving-communities/homelessness/) available here.

Hi Tara,

I'm reaching out with a question with a deadline of **1pm tomorrow, April 10:**

1. Has Gov. Inslee launched any effort, similar to Gov. Newsom's Project Room Key, to move homeless people into hotels with federal funding? If so, how many? If not, why not?

Reach me at 610-247-9636.

Thank you,

Sydney

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_3

April 03, 2020 at 3:43 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 3, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty-one states and 12 tribes have issued stay at home orders.

Misspellings sent from my iPhone

On Apr 7, 2020, at 10:41 PM, Lofy, Kathy H (DOH) <Kathy.Lofy@doh.wa.gov> wrote:

Hi Jaime,

I'm very sorry to hear that Clark and Cowlitz Counties have not received any PPE. As I told you on the phone, I have never ordered a PPE shipment to be pulled back, particularly a shipment that had been packed up to be delivered.

Unfortunately, our statewide demand for PPE still greatly exceeds our supply and as a result we still have many facilities in dire need of PPE. Since your region has not received any significant amount of PPE and you have outbreaks in your long term care facilities, I feel strongly that your orders (see below) should be pushed to the top of the list.

I have cc'd the logistics section chief, the director of the state emergency management division (Robert Ezelle) and our agency area commander (Jerrod Davis).

Jerrod, can you please check on this order and give Jaime a call tomorrow to update her on the status? Jerrod should also be able to help you get some testing supplies since we acquired 15,000 swabs today.

Thanks,
Kathy

Subject: Clark and Cowlitz counties - SW WA

Kathy,

I'm following up on the voicemail I left you earlier today. On April 1, I was told by FEMA Administrator O'Hare that Clark and Cowlitz Counties would be receiving the PPE detailed below. When I followed up yesterday to see why it was not delivered, I was informed that it was packaged for shipment, and then was pulled back by you. It was explained that the materials were needed for long term care facilities elsewhere in the state. However, in Clark County we have outbreaks in nine long term care facilities, and there have been deaths and yet we don't have the supplies to test there. In the community the percentage of positive tests has doubled and the weekly percentage of hospital admissions with COVID-19-like illnesses has also doubled.

Cowlitz County reported Friday that they are down to one gown in their efforts to treat patients. Not one box, one gown, which I am sure is gone by this point. Cowlitz fire does not have supplies to serve residents or emergency calls. They were counting on help from the public health department. As I'm sure you know, normal supply chain operations simply are not working for smaller providers or municipalities. Our larger hospitals are able to get some supplies through, but if you're small, isolated or rural you're out of luck.

I have worked tirelessly at the federal level to get PPE to the state, only to witness the state deliver nothing to most of my counties and less than 1% of what Clark County requested. I did not expect to get all that we asked for, but given our needs, I certainly expected something - and definitely expected what was told me. Can you please apprise me of your plans with regard to the order below?

Thank you for your time and attention. I realize it is a difficult situation for everyone right now.

Jaime Herrera Beutler
Member of Congress, WA 03
C: 360-609-0435

Clark County is getting:
Face Shield: 14500
Procedure Mask: 25200
Respirator: 5000
Sanitizing: 5509

Cowlitz:
Gown: 7500

Office of Intergovernmental Affairs (IGA)

Fact Sheet: DHS Measures on the Border to Limit the Further Spread of Coronavirus

March 23, 2020 at 12:23 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Release Date:

March 23, 2020

<https://www.dhs.gov/news/2020/03/23/fact-sheet-dhs-measures-border-limit-further-spread-coronavirus>

In order to limit the further spread of coronavirus, the U.S. has reached agreements with both Canada and Mexico to limit all non-essential travel across borders. Working closely and collaboratively, the Department of Homeland Security is part of a North American approach to stop the spread of the virus.

Additionally, CBP will no longer detain illegal immigrants in our holding facilities and will immediately return these aliens to the country they entered from – Canada or Mexico. Where such a return is not possible, CBP will return these aliens to their country of origin.

These measures will be implemented on March 21, 2020 and will be in place for 30 days, at which point they will be reviewed by both parties.

The U.S., Mexican, and Canadian governments are taking necessary action to fight against this pandemic together.

Northern Border

- March 20, 2020: [Joint Statement on US-Canada Joint Initiative: Temporary Restriction of Traveler Crossing the US-Canada Land Border for Non-Essential Purposes](#)

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars daily cross-border trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries.

supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Southern Border

- March 20, 2020: [Joint Statement on US-Mexico Joint Initiative to Combat the COVID-19 Pandemic](#)

The strong partnership and close cooperation between the United States and Mexico has allowed us to maintain a productive border environment. We value the health and safety of our citizens and keep that at the forefront of joint decisions made by our respective leaders regarding cross-border operations.

Recognizing the robust trade relationship between the United States and Mexico, we agree our two countries' response to the ongoing global and regional health situation, require particular measures both to protect border trade and our countries' economies and ensure the health of our nations' citizens. We agree to the need for a dedicated joint effort to prevent spread of the COVID-19 virus and address the economic effects resulting from reduced mobility along our shared border.

The U.S. and Mexican governments further recognize critical services such as food, fuel, healthcare and life-saving medicines must reach people on both sides of the border every day. Essential travel must therefore continue unimpeded during this time. In order to ensure that essential travel can continue, the United States and Mexico are also temporarily restricting all non-essential travel across its borders.

"Non-essential" travel includes travel that is considered tourism or recreational in nature. Additionally, we are encouraging people to exercise caution by avoiding unnecessary contact with others.

This collaborative and reciprocal initiative is an extension of our nations' prudent approach that values the health and safety of our citizens in the joint decisions made by our respective leaders regarding cross-border operations.

This joint initiative will commence at 00:01 Saturday March 21 throughout the US-Mexico land border for a period of 30 days subject to extension upon review.

Detention Facilities

CBP is the first line of defense of our nation's borders. To help prevent the introduction of COVID-19 into

border facilities and into our country, aliens subject to the order will not be held in congregate areas for processing by CBP and instead will immediately be turned away from ports of entry.

Those encountered between ports of entry after illegally crossing the border similarly will not be held in congregate areas for processing and instead, to the maximum extent feasible, will immediately be returned to their country of last transit. These aliens are processed in stations designed for short-term processing, where distancing is not a viable option, creating a serious danger of an outbreak.

The Centers for Disease Control and Prevention (CDC) has determined that these conditions present a serious infection control challenge and are a risk to public health. Should an outbreak occur at these facilities, local medical facilities would be forced to devote extensive resources and may become overwhelmed.

This action will also protect the health of our country's dedicated border agents and other law enforcement personnel, who are vital to the security of our Nation.

Apprehension of illegal immigrants along both borders between POEs:

- *Migrants from Coronavirus Impacted Areas:* Since the beginning of the FY20 fiscal year in October through the end of February 2020 (over the period of October 1, 2019 to February 29, 2020), foreign nationals from 122 separate countries have been apprehended or denied entry (inadmissible) at the Southwest border, for a total of over 190,000 apprehended or inadmissible migrants from countries currently with confirmed COVID cases.
- *Size and Scale:* Every week, CBP apprehends between 7,000 – 9,000 individuals between ports of entry —the equivalent of 2.5 Diamond Princess cruise ships per week.
- *Human-to-human Spread:* The spread of coronavirus is exacerbated by human-to-human transmission and the need for detention. CBP law enforcement facilities are for short-term holding and do not provide for needed large-scale isolation, diagnosis, or treatment of such a novel disease.
- *CBP Facilities:* CBP facilities are not structured or equipped to effectively quarantine an infected population. CBP would be forced to rely on state and local hospitals to provide longer-term medical care for individuals who fall ill, further burdening our strained healthcare system and depriving American citizens of key medical resources.

Although CBP has policies and procedures in place to handle transmittable diseases, COVID-19 will impact already strained holding capacities and place an extreme burden on what is forecasted to be a stretched healthcare system and the nation's critical medical professionals who are needed to attend to U.S. citizens and legal residents.

Migrants should shelter-in-place in their homes and communities, rather than attempting a long and dangerous journey to the United States borders at the hands of traffickers and smugglers.

U.S. Citizens:

U.S. citizens, lawful permanent residents and certain other travelers are exempt from this action. They will receive the same processing, evaluation and potential CDC medical screening that all entrants undergo at Ports of Entry.

Authority:

Effective at March 21, 2020 at 12:00 a.m. EDT, CBP will, as authorized, implement CDC authority under U.S.C. § 265 to prohibit entry of certain persons into the United States. CBP will assist the Department of Health and Human Services' (HHS) and U.S. Centers for Disease Control and Prevention (CDC) to protect against the spread of the novel coronavirus (COVID-19) by implementing the emergency authorities under U.S.C. § 265 at the nation's land borders to prohibit the introduction of certain persons in the interest of public health.

Additional Information

<https://twitter.com/CBP/status/1241866251145752577>

“Essential travel,” which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the US;
- Individuals traveling for medical purposes (e.g., to receive medical treatment in the US);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (e.g., individuals working in the farming or agriculture industry who must travel between the US and Canada or the US and Mexico in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (e.g., government officials or emergency responders entering the US to support Federal, state, local, tribal, or territorial government efforts to respond to COVID-19 or other emergencies);
- Individuals engaged in lawful cross-border trade (e.g., truck drivers supporting the movement of cargo between the US and Canada or the US and Mexico);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the US; and
- Individuals engaged in military-related travel or operations.

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 9, 2020)

April 09, 2020 at 4:22 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 9, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - **As of April 8**, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
 - An additional 49 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of

ventilators are shipped to the to the right states to sustain life within a 72-hour window.

- Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.
- On **April 8**, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - On April 3, President Trump issued "[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.
- On **April 8**, CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.
 - The guidance covers essential health care workers who've been exposed to the coronavirus.
 - Essential workers can, under certain circumstances, go back to work, if they're asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they're at work.

Subject: FOOD SECURITY Coordination Team conference call / twice weekly check-in

When: Occurs every Monday and Thursday effective 03/19/2020 until 07/02/2020 from 14:00 to 15:30 Pacific Standard Time.

Where: 888-287-7315 Mtg Id: 315-5376 Host (JT or Katie Raines if JT unavailable) 2929#

Hello Team,

Please note Coordinate Team name change (need all the positive framing we can get these days). Let me know if you have a strong objection to the change.

Please continue to send me suggestions for team member additions so that I may add accordingly. Continue to forward to staff leads, as you deem appropriate until I get the list updated.

These meetings are scheduled twice a week, Mondays and Thursdays, through the end of June. The situation, as you well know, is fluid so the team makeup and team outcomes may change over the course of time and as per direction of Incident Command.

Please send agenda items by noon the day before each conference call.

Please contact me directly in between conference calls to highlight and discuss Hot Button issues that require elevation and/or immediate attention.

Your input on how these coordination calls go, the content, follow up, membership, etc., is extremely valuable. Please send concerns, ideas, and feedback to me directly.

Take good care. Talk soon.

AGENDA

Welcome and Introductions

Identification of Agency Leads and Additional Partners Discuss "Chain of Command" and Points of Contact Identification of Immediate Actions, assign leads
Identification of Longer-Term Actions, assign leads Establish Daily Coordination Calls

DRAFT List of Issues for Discussion (will be edited as we go)

Mobilize Large-scale Restaurant Food Rescue Operation: assign small ad-hoc team, discuss coordination with hospitality association, county EDC's, transportation, communications

Repack household size food items, deliver to local hunger relief organizations

COVID-19 SNAP Requests

Get purchasing power to low income people on SNAP so they can purchase food and acquire rations during quarantine

Suspend implementation of ABAWD rule that is scheduled to go into effect 4/1

Provide additional months benefit early to allow for additional purchases

Increase the monthly benefit and expand eligibility to reduce reliance on overwhelmed food banks FUNDING Funding for temporary staffing to a) offset a depleted volunteer base (hunger relief significantly relies on senior volunteers who are showing up in reduced numbers due to their vulnerability to COVID-19) b) begin providing mobile market and home delivery for low-income infected and/or otherwise quarantined people unable to

access food through other means; Funding for packing and re-packing supplies to a) pack food into self-contained boxes to give clients in open air environments to reduce person-to-person contact and b) to repack bulk commodities from OSPI/USDA for distribution in household sizes.

* Anecdotal - the largest food bank in Snohomish Count spent \$5,000 on 3/12 to purchase thousands of bags so that they could maintain food distribution with pre-packed food bags. Many other large food banks are making similar purchases to keep food flowing to low-income people; most of these organizations have reserves that can support these purchases for a short-time, but this pandemic is expected to take a huge toll on businesses, including the nonprofit sector, and government support will be needed to ensure that food continues to flow in the coming weeks and months.

Funding for sanitation supplies* - hand sanitizer, disinfectant wipes, increased professional cleaning services, hand washing stations, gloves, etc.

Funding for distribution costs - including leasing refrigerated vehicles, fuel, insurance, etc. to enable more food-safe home deliveries and mobile distribution units.

Additional funding to purchase food as donations dwindle due to social distancing and an increased number of quarantined people.

How National Declaration impacts funding and actions

RE: Food Banks

April 01, 2020 at 1:03 PM EDT

To: Shearer, Eugene, Throne, Paul (DOH), Eads, Kim (AGR), Roberts, Babette (DSHS), leanne.eko@k12.wa.us, Austin, JT (GOV)

Cc: Allen, Tristan (COM), Hennessee, Taylor (MIL), Philip Palin, Hanson, Lars

Hi Gene,

Thank you so much for reaching out and you are surfacing the exact concern that JT Austin (Sr. Policy Advisory to Governor Inslee and convener of the Governor's COVID-19 Food Security Coordination Team since 3/16/20) and I have been discussing in the food bank side of hunger response. Your message below indicates concerns about Seattle Food Banks, but I'm getting reports that due to increased demand across the state, our major NGO food warehouses statewide are moving through their food supply rapidly and we anticipate significant shortages as soon as 4/10.

I'm going to start a separate email thread with just you and JT and you can share with whomever is needed. I know that Paul and Leanne and Babs are getting plenty of emails these days so I'm going to spare them a few.

Subject: FW: Food Banks

Teammates,

I am Gene Shearer the FEMA HQ Supply Chain Advisor here in DC. I had the pleasure of working with Taylor and Tristan early on in your epi curve and would like to commend you on the job you have done in the Seattle Region. I am the PM for the Supply Chain Analysis Network (SCAN) that is trying to provide advice to FEMA Leadership on what can be done to shore up grocery supply chains during this pandemic.

SCAN is in the process of doing a second look at Seattle this week and one of the areas we are interested in is your approach to the Seattle Food Banks given the decreases in their normal contribution flows.

Any summary of your efforts in this area would be helpful and could save lives.

Thankyou for your service to the people of the great state of Washington and the City of Seattle!

Gene Shearer, PMP

Supply Chain Advisor

FEMA Region 10 Private Sector COVID-19 Update for April 21

April 21, 2020 at 12:14 PM EDT

To: Undisclosed recipients:

FEMA REGION 10 PRIVATE SECTOR COVID-19 UPDATE

APRIL 21, 2020

Good Morning Region 10 Partners

The CISA call will be today at 12pm PST. Details below in the meeting section. We've included updates on importing/exporting, critical industry guidance, and CISA's updated Version 3.0 of *Guidance on Essential Critical Infrastructure Workers During COVID-19*.

Continue to contact me for questions, comments, or be added to the distribution list. Feel free to distribute.

Updates noted in **blue**.

PPE Exchange

The [Private Sector PPE Exchange Dashboard](#) is now live.

The PPE Exchange is a simple to use Dashboard to connect private sector sellers with private sector buyers. The users enter their own information and update as needed.

PPE (focus is on these products)

- N95 Masks
- Surgical Masks
- Non-surgical Masks
- Gloves
- Gowns
- Booties

It's Simple to Connect

1. Log-in with your name and company on the [dashboard](#)
2. Follow instructions on completing either the need or sell section.
3. Contact individuals via their provided contact information.
4. When you log out of the Dashboard, your information remains, but no one can connect with you in the Dashboard. Providing your contact information is important.

FEMA does not endorse any vendors. This dashboard is not for government contracting.

FEMA Advisories

COVID-9 Best Practices (see attached)

The [FEMA Coronavirus Emergency Management Best Practices](#) page provides a one-stop shop to explore

best practices and lessons learned across all levels of government, private sector, academic institutions, professional associations, and other organizations. HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

Best practices are organized around five themes:

- *Helping People*, which includes best practices on topics such as crisis counseling resources and anticipating and attending to civil rights;
- *Government Operations* best practices such as public information and continuity of operations considerations;
- *Private Sector and Infrastructure*, which includes best practices for commercial trucking and food stores;
- *Recovery Planning and Implementation*, to include the newly released FEMA Disaster Financial Management Guide and economic recovery considerations; and
- *Medical Supplies and Equipment*, including best practices for the preservation of personal protective equipment while ensuring workers are protected.

Trends and Analysis

National Business Emergency Operations Center (NBEOC) Snapshot (see attached)

The NBEOC produces a daily Snapshot on business and industry domestic supply chains. You can find these each morning on the [NBEOC Dashboard](#) in the 'Snapshot' pod. I attached today's Snapshot for your review.

Key Highlights

- 94% of Americans are still under shelter-in-place orders significantly impacting consumer spending.
- Retail sales came down 8.7% for March –the largest one-month drop in history. This number under-represents the actual decline in consumer spending due to its lagging nature.
- National outbound freight volumes have continued declines for the third straight week. Since the peak on March 23rd, the truckload tender volumes decreased by 35%.
- Groceries volume is still high relative to other products but is expected to significantly soften throughout April.
- Rail volumes have sunk to near 10-year lows due to lack of overseas imports and could cost the railroads \$9 billion dollars.
- More meat and slaughter plant closures are increasing volatility in food markets with significant regional and national implications for animal protein supply. If there are prolonged plant closures, consumers may see higher prices and short term stockouts of certain proteins.

Google Mobility Reports (updated links)

Google is producing [Public Community Mobility Reports](#). The reports chart movement trends over time across the US and the world, so you can see how movement has changed at retail, parks, workplaces, grocery stores and the like in your state during the pandemic; down in some instances to the county level. Below are links to current reports for Region 10 states (unsure on frequency of change).

[Ernesto Apreza](#), Office of Mayor Jenny Durkan

[Tara Lee](#), Office of Gov. Jay Inslee

ADVISORY: Inslee to join federal and local leaders at Century Link Events Center, site of new field hospital

Gov. Jay Inslee will join Seattle Mayor Jenny Durkan, King County Executive Dow Constantine, FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry today to discuss deployment of a new field hospital at CenturyLink Field Event Center.

The field hospital will include 300 soldiers from the 627th Army Hospital at Fort Carson, Colorado who have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Saturday, March 28

1:30 PM - State, local and federal leaders at site of new field hospital

Location: CenturyLink Field Event Center, 800 Occidental Ave S., Seattle

**Please note: in order to accommodate social distancing, the Seattle Mayor's office has decided that Seattle Times will serve as the print pool and KIRO will serve as the TV pool.*

Other reporters can attend via [WebEx](#). It will also be streamed live on [Seattle Channel](#).

***Mayor Durkan's office is handling logistics for the event, media questions should be directed to: Ernesto.Apreza@seattle.gov.**

The latest FEMA News Releases, Fact Sheets and Frequently Asked Questions

March 31, 2020 at 5:26 PM EDT

To: Undisclosed recipients:

Below and attached you will find the latest information shared from FEMA's National News Desk.

News Release

- 3/30 [FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight](#)

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Services created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

Fact Sheets

- 3/31 [Coronavirus \(COVID-19\) Pandemic: Emergency Medical Care](#)
The FEMA COVID-19 Emergency Protective Measures Fact Sheet included a list of eligible emergency medical care activities. This fact sheet provides additional guidance related to the eligibility of emergency medical care activities as an emergency protective measure under the Emergency Declaration and any Major Disaster Declaration authorizing Public Assistance (PA) for COVID-19.
- 3/30 [Coronavirus \(COVID-19\) Pandemic: Supply Chain Stabilization Task Force](#)
The Supply Chain Stabilization Task Force is executing a whole-of-America approach to address limited supply of critical protective and life-saving equipment. Through a four-prong approach of Preservation, Acceleration, Expansion and Allocation, FEMA is bringing the full capacity of the Federal government to bear to find solutions to protect the American people and defeat COVID-19.

FAQ

- 3/31 [Coronavirus \(COVID-19\) Pandemic: Non-Congregate Sheltering](#)
Subsequent to President Trump's March 13, 2020, Nationwide Emergency Declaration for Coronavirus 2019 (COVID-19), the U.S. Department of Homeland Security's Federal Emergency Management Agency (FEMA) recognizes that non-congregate sheltering may be necessary in this Public Health Emergency to protect public health and save lives. This link provides answers to frequently asked questions about non-congregate sheltering during the Secretary of Health and Human Services' (HHS') declaration of a Public Health Emergency for COVID-19.

Cc: Derrick, Anthony <Anthony.Derrick@seattle.gov>; Apreza, Ernesto <Ernesto.Apreza@seattle.gov>

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photogs.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.

- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) – Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via WebEx [LINK].

TBD will serve as the print pool and TBD will serve as the TV pool.

WHO: Governor Jay Inslee, King County Executive Dow Constantine, Mayor Jenny A. Durkan, FEMA Region 10 Administrator Mike Oâ€™Hare, and Brigadier General Doug Cherry

WHEN: Saturday, March 28, 1:30 p.m.

WHERE: CenturyLink Field Event Center, 800 Occidental Ave S. in Seattle, WA

CAUTION: External Email

Good evening, Stephanie.

Thanks for the details. Mike is set to attend to discuss FEMA's role. Made a few edits to his info below. A couple questions: will there be an ASL interpreter for the event? Is the event inside or outside?

Thanks

Ryan

Subject: Press Conference Tomorrow at 1:30 pm

Hi all – Thanks for everyone's help to get the release out earlier. I wanted to loop back on logistics for tomorrow's press conference.

Time

- Press Conference: 1:30 pm at the CenturyLink Event Center, 800 Occidental Ave S. in Seattle, WA

Attendees/Speakers

- Governor Jay Inslee
- King County Executive Dow Constantine
- Seattle Mayor Jenny Durkan
- FEMA Region 10 Administrator Mike O'Hare
- TBD Army
- Q&A

Advisory

- See below. We will send at 9:00 am on Saturday, March 28

On Site:

- Podium/Flags will be provided by the City.
- DOD “ Let us know if there may be any supplies that may be able to be moved on site.

Pool: City will organize a pool

- Print Pool (ST/AP)
- Still photog (ST)
- TV Pool (Will work with News Directors)
- Seattle Channel (to cross post w/ TVW)

Technology

- WebEx: City and Governor’s Office are connecting to provide Q&A for reporters not in the pool

Key Messages

- Important Resources for Our Hospitals “ Partnership to make this a reality
- Staffed with Army doctors and nurses for Non-COVID-19 with ER, X-Ray, and other medical uses
- Construction will begin soon + Seattle may see additional US Army personnel in the area

Staff:

- MO: Anthony Derrick: 260-247-2741
- Stephanie: 206-247-0475

Acting_Secretary_Chad_Wolf_Statement_on_the-REAL_ID_Enforcement_Deadline

March 26, 2020 at 11:21 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the REAL ID Enforcement Deadline

“Due to circumstances resulting from the COVID-19 pandemic and the national emergency declaration, the Department of Homeland Security, as directed by President Donald J. Trump, is extending the REAL ID enforcement deadline beyond the current October 1, 2020 deadline. I have determined that states require a twelve-month delay and that the new deadline for REAL ID enforcement is October 1, 2021. DHS will publish a notice of the new deadline in the Federal Register in the coming days.

“The federal, state and local response to the spread of the Coronavirus here in the United States necessitates a delay in this deadline. Our state and local partners are working tirelessly with the Administration to flatten the curve and, therefore, we want to remove any impediments to response and recovery efforts. States across the country are temporarily closing or restricting access to DMVs. This action will preclude millions of people from applying for and receiving their REAL ID. Extending the deadline will also allow the Department to work with Congress to implement needed changes to expedite the issuance of REAL IDs once the current health crisis concludes.

“Protecting both the health and national security of the American people continues to be the top priority for the President of the United States and the Department of Homeland Security.”

RE: FEMA Region 10 Weekly Grocer Supply Chain Call - Food Bank Box Donation

April 01, 2020 at 1:48 PM EDT

To: McBurney, Brandon J

Cc: Temple, Jeffery P, Hoffmann, Matt R, Potter, Thomas A, Coine, Jerad I, Allen, Tristan (COM), Holt, Brett, Hennessee, Taylor (MIL), Austin, JT (GOV), Sandison, Derek (AGR), Eads, Kim (AGR), Rains, Katie (AGR), Capper, Patrick (AGR), Ferrante, Jason (AGR), Sheffels, Evan (AGR), Coyle, Erin (AGR), MIL COVID Help

Morning Brandon,

Thanks again for the follow-up and for your continued offer to assist. I appreciate you including the Gov's Office Food Security Team on this so they are able to weigh in regarding any immediate food bank box needs they are aware of.

If there are not any immediate food bank needs at this time based on the above feedback, I would suggest that your donation be shared with the larger state COVID response through the State Emergency Operations Center. They have set up an email address to collect and track offers for donations and services so they can be allocated to possible needs across the entire response (if the donor is interested). The email address is COVIDHELP@mil.wa.gov and I've included that email on this response for their situational awareness.

Thanks again Brandon for your generous offer, it's very much appreciated.

[EXTERNAL EMAIL]: Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Brandon,

Thanks so much for reaching out and for your extremely generous offer. I am including on this email members of the Food Security Coordination Team which is co-chaired by JT Austin with the Governor's Office and Katie Rains with WA Dept. of Agriculture Food Assistance Program. The WSDA Food Assistance Program is managed by Kim Eads, who I have also included on this email for her awareness. The Food Security Coordination Team is coordinating donation of goods and services related to the support of food assistance and security and will be able to provide further guidance as to the logistics around areas of need, delivery, etc.

Once again, thank you for reaching out so proactively on this and your willingness to support this important effort.

Subject: FEMA Region 10 Weekly Grocer Supply Chain Call - Food Bank Box Donation

Randy/Erin,

Following up from today's FEMA Region 10 call, there was a request for boxes to support the Washington Food Banks. Kroger and Fred Meyer are happy to help assist the local food banks with a solution for their needs.

We have plastic totes that are utilized for piece pick and smaller items that can be totes and sent to the stores. The stores unload the product and send the totes back to the DC. Over time they get worn and no longer are within the life cycle. They may have a crack in them or the tote lid won't close or you can't zip tie it, etc. We normally send these to a grind facility but we would be more than happy to donate these totes for use at our Food Banks.

We have a total of 60 pallets around 3000 totes. 2 truckloads. How would you like proceed on getting these to the food bank? If need be, we can transport these to a central location? Just let us know when and where and we can make this happen quickly.

Thank you,

Brandon McBurney

Subject: FOOD SECURITY Coordination Team conference call / twice weekly check-in

Hello Team,

Please note Coordinate Team name change (need all the positive framing we can get these days). Let me know if you have a strong objection to the change.

Please continue to send me suggestions for team member additions so that I may add accordingly. Continue to forward to staff leads, as you deem appropriate until I get the list updated.

These meetings are scheduled twice a week, Mondays and Thursdays, through the end of June. The situation, as you well know, is fluid so the team makeup and team outcomes may change over the course of time and as per direction of Incident Command.

Please send agenda items by noon the day before each conference call.

Please contact me directly in between conference calls to highlight and discuss Hot Button issues that require elevation and/or immediate attention.

Your input on how these coordination calls go, the content, follow up, membership, etc., is extremely valuable. Please send concerns, ideas, and feedback to me directly.

Take good care. Talk soon.

AGENDA

Welcome and Introductions

Identification of Agency Leads and Additional Partners Discuss "Chain of Command" and Points of Contact Identification of Immediate Actions, assign leads
Identification of Longer-Term Actions, assign leads Establish Daily Coordination Calls

DRAFT List of Issues for Discussion (will be edited as we go)

Mobilize Large-scale Restaurant Food Rescue Operation: assign small ad-hoc team, discuss coordination with hospitality association, county EDC's, transportation, communications

Repack household size food items, deliver to local hunger relief organizations

COVID-19 SNAP Requests

Get purchasing power to low income people on SNAP so they can purchase food and acquire rations during quarantine

Suspend implementation of ABAWD rule that is scheduled to go into effect 4/1

Provide additional months benefit early to allow for additional purchases

Increase the monthly benefit and expand eligibility to reduce reliance on overwhelmed food banks FUNDING Funding for temporary staffing to a) offset a depleted volunteer base (hunger relief significantly relies on senior volunteers who are showing up in reduced numbers due to their vulnerability to COVID-19) b) begin providing mobile market and home delivery for low-income infected and/or otherwise quarantined people unable to access food through other means; Funding for packing and re-packing supplies to a) pack food into self-contained boxes to give clients in open air environments to reduce person-to-person contact and b) to repack bulk commodities from OSPI/USDA for distribution in household sizes.

* Anecdotal - the largest food bank in Snohomish Count spent \$5,000 on 3/12 to purchase thousands of bags so that they could maintain food distribution with pre-packed food bags. Many other large food banks are making similar purchases to keep food flowing to low-income people; most of these organizations have reserves that can support these purchases for a short-time, but this pandemic is expected to take a huge toll on businesses, including the nonprofit sector, and government support will be needed to ensure that food continues to flow in the coming weeks and months.

Funding for sanitation supplies* - hand sanitizer, disinfectant wipes, increased professional cleaning services, hand washing stations, gloves, etc.

Funding for distribution costs - including leasing refrigerated vehicles, fuel, insurance, etc. to enable more food-safe home deliveries and mobile distribution units.

Additional funding to purchase food as donations dwindle due to social distancing and an increased number of quarantined people.

How National Declaration impacts funding and actions

Hi All – Thanks for participating in today’s initial planning meeting.

Please send your replies to [HYPERLINK "mailto:lisa.davidson@fema.dhs.gov"](mailto:lisa.davidson@fema.dhs.gov) lisa.davidson@fema.dhs.gov . A consolidated list will be provided prior to tomorrow's meeting.

Here are the RFIs and due outs for the Friday 3/20/20 12pm PST follow-up call:

Requests for Information (RFI) to State:

- **Regional vs. Individual Jurisdiction Approach** – is the State’s intent to continue with processing this RRF for King County or does it intend to address these needs in its regional planning approach?
- **Medical Team Capability** – what is the capability that needs to be supported by the RRF? Specifically, what is the anticipated number of patients and acuity? This information will help inform the staffing needs vs. the current list of #'s by position
- **Quantity of Centers** – given limitation on resources, what options are there to pursue a single facility vs. six?
- **Type of Center** – fixed facility vs. soft sided structure
- **Status of Centers** and requested line items:

Center	Location (Address and/or local jurisdiction)	Status (contracted, in negotiations, etc.)	Facility type (fixed, land, soft- sided)	Capacity	Operating Status (date open or required, current occupancy, etc.)	Remaining Requirements (are the needs identified in the RRF current)
1						
2						
3						
4						
5						
6						

- **Feeding** – specific requirements, i.e. is the need delivery of resources, food preparations,

volunteers/staff?

- **Associated needs** – what is the plan for:
 - access and functional needs
 - mental health support in the centers
 - pet support (comfort/service/household)
 - security – of facility, for staff/patient safety, quarantine enforcement; is there a need for ESF13 support?

Due Outs for Federal Partners

- Description of Agency/Program Capability to support – specific line items vs. entire mission
- Estimated Timeline for execution

Office_of_Intergovernmental_Affairs_(IGA)

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_9,_2020

April 09, 2020 at 4:37 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - As of April 8, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
 - An additional 49 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not

- mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.
- On April 8, the Department of Health and Human Services announced the first contract for ventilator production rated under the Defense Production Act, to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - On April 3, President Trump issued "Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.
- On April 8, CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.
 - The guidance covers essential health care workers who've been exposed to the coronavirus.
 - Essential workers can, under certain circumstances, go back to work, if they're

asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they're at work.

Hi,
Congresswoman,

I tried calling you just now to brief you on our immediate plans for PPE distribution statewide to include the counties in your district. We have limited supplies on hand, but will be able to provide a small amount of relief in critical items such as gowns and masks. I have asked the logistics team to focus on Cowlitz county and try to get them some gowns today if at all possible. It won't be a large amount but it should help for a few more days.

Looking forward, I anticipate getting in approximately 6 million N95 masks, 2 million surgical masks, and 1 million gowns over the next two weeks. This won't go far toward meeting the total statewide need, but will help counties a little with meeting their tier one needs.

We appreciate your advocacy in bringing in desperately-needed help from our federal partners.

If you would like to speak with me further, I'm available most of the day.

Hi Jaime,

I'm very sorry to hear that Clark and Cowlitz Counties have not received any PPE. As I told you on the phone, I have never ordered a PPE shipment to be pulled back, particularly a shipment that had been packed up to be delivered.

Unfortunately, our statewide demand for PPE still greatly exceeds our supply and as a result we still have many facilities in dire need of PPE. Since your region has not received any significant amount of PPE and you have outbreaks in your long term care facilities, I feel strongly that your orders (see below) should be pushed to the top of the list.

I have ccd the logistics section chief, the director of the state emergency management division (Robert Ezelle) and our agency area commander (Jerrod Davis).

Jerrod, can you please check on this order and give Jaime a call tomorrow to update her on the status? Jerrod should also be able to help you get some

testing supplies since we acquired 15,000 swabs today.

Thanks,
Kathy

Subject: Clark and Cowlitz counties - SW WA

Kathy,

I'm following up on the voicemail I left you earlier today.

On April 1, I was told by FEMA Administrator O'Hare that Clark and Cowlitz Counties would be receiving the PPE detailed below. When I followed up yesterday to see why it was not delivered, I was informed that it was packaged for shipment, and then was pulled back by you. It was explained that the materials were needed for long term care facilities elsewhere in the state. However, in Clark County we have outbreaks in nine long term care facilities, and there have been deaths and yet we don't have the supplies to test there. In the community the percentage of positive tests has doubled and the weekly percentage of hospital admissions with COVID-19-like illnesses has also doubled.

Cowlitz County reported Friday that they are down to one gown in their efforts to treat patients. Not one box, one gown, which I am sure is gone by this point. Cowlitz fire does not have supplies to serve residents or emergency calls. They were counting on help from the public health department. As I'm sure you know, normal supply chain operations simply are not working for smaller providers or municipalities. Our larger hospitals are able to get some supplies through, but if you're small, isolated or rural you're out of luck.

I have worked tirelessly at the federal level to get PPE to the state, only to witness the state deliver nothing to most of my counties and less than 1% of what Clark County requested. I did not expect to get all that we asked for, but given our needs, I certainly expected something - and definitely expected what was told me. Can you please

apprise me of your plans with regard to the order below?

Thank you for your time and attention. I realize it is a difficult situation for everyone right now.

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_3

April 03, 2020 at 3:43 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 3, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty-one states and 12 tribes have issued stay at home orders.

[EXTERNAL Email Notice!] External communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so we'll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials to do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options

available? Potentially from 10:45 -11:30 and 11:30
â€” 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if thatâ€™s easier.

Best,
Stephanie

Federal_Partners_Bring_Additional_Resources_to_US_for_COVID-19_Response

March 29, 2020 at 12:53 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 29, 2020

FEMA Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal

reimbursement, by FEMA for the states of California, New York and Washington, for states' use of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

FEMA Stakeholder Advisory: FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

March 30, 2020 at 12:43 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 30, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

“This response isn’t just about delivering food or supporting COVID test centers. It’s about protecting our children, parents, and grandparents. Our Nation is looking to the National Guard to help them and we can’t let them down.” – Air Force Gen. Joseph Lengyel, Chief of the National Guard Bureau

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people. The latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA, for some states' use of their National Guard forces. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32.

FEMA coordinated an air bridge for flights from Asia beginning on Sunday, March 29, with the first delivery of 80 tons of much needed PPE supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 10.3 million gloves and thousands of thermometers for New York, New Jersey and Connecticut. Additional flights are contracted to go to Illinois today and to Ohio tomorrow. FEMA has scheduled additional flights and is adding more daily.

Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (180) and Connecticut (50).

Twenty-seven states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), the Strategic National Stockpile, Ventilator Guidance, CDC Respirator Guidance, Defense Production Act, CDC Public Guidance, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

If you have any questions, please contact FEMA Tribal Affairs at (202) 646-3444 or at FEMA-Tribal@fema.dhs.gov.

FEMA Advisory: COVID-19 Daily Briefing Points (April 18, 2020)

April 18, 2020 at 12:20 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 18, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing resources to reopen safely and responsibly.
- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 8, 2020

April 08, 2020 at 10:57 AM EDT

To: Undisclosed recipients:

Today's national social media hot issues and yesterday's national social listening report are attached for greater context.

Update: as of today and moving forward, any references to sentiment will link to the original posts from elected officials, news sources and reporters.

Please let us know if there is anyone who should be added to the distro list for this report.

Thank you.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 8, 2020

SUMMARY

- In Washington, legislators ask for more testing kits.
- Donors, including Bezos, Ballmer and Allen families, give \$20 million for coronavirus testing and research at University of Washington.
- Oregon Governor has extended the ban on in-person dining indefinitely.
- Alaska Governor announced several updates last night: delaying all elective surgeries, the arrival of testing supplies from FEMA, plan to increase testing in remote communities and guidance on religious services in the wake of the biggest rise of COVID-19 cases to date.
- A new "crush the curve" initiative in Idaho is aimed at increasing access to testing for essential employees.
- Dairy farmers in Idaho and Oregon look to other states as indicators for how their production may be impacted locally – they aren't dumping surplus yet.

Public Sentiment

- In Idaho, there is a call to get folks back to work, countered by individuals valuing the stay-at-home order to reduce the spread of COVID-19.
- Oregonians are worried about the economic impact of extended ban on in-person dining.
- Alaskans are upset with the mandatory delay in some elective procedures and celebrate the news that remote communities are getting more testing support.
- In response to the crush the curve initiative, Idahoans fear they will be forced to get tested.

Washington

Response

- Washington seeing massive decline in COVID-19 related hospitalizations since mid-March. ([KXLY](#))
- Vice President Pence calls Oregon and Washington's decisions to send ventilators to more needy states "keeping with the highest tradition of the American spirit" and their work with the administration and FEMA to make that happen "really inspiring." ([White House](#))
- [Congresswoman Pramila Jayapal](#): Proud to lead colleagues from #WA in urging FEMA and HHS

to provide additional sample testing kits and swabs, continue support for drive-thru test clinics and ensure that rural areas get enough supplies. We urgently need this critical support in #WA to fight #COVID19. ([@RepJayapal Facebook](#))

Alternate Care Sites

- Whatcom asks FEMA for \$1.34 million for Motel 6 coronavirus quarantine site ([Bellingham Herald](#)) On [Facebook](#), many feel that the cost is high, others are curious what the response from FEMA will be.
- Seahawks quarterback and Seattle superstar Russell Wilson says his mom is helping build field hospitals in Seattle ([YakTriNews](#)).

PPE

- Washington grocery store workers want better access to personal protection equipment. ([KING 5](#))
- States competing in 'global jungle' for PPE. Gov. Jay Inslee of Washington announced on Sunday that his state would return more than 400 ventilators from the Strategic National Stockpile, and Oregon Gov. Katie Brown on Saturday said her state would send more than 100 ventilators to New York "because Oregon is in a better position right now." ([U.S. News and World Report](#))

Disability Integration

- Parents across Washington watch their special needs children unravel during COVID-19 school closures. ([Q13 FOX](#)) On [Facebook](#), people share stories of their loved ones with special needs who are struggling and others extend empathy.

Business and Economy

- Gov. Inslee announced an emergency \$5 million grant program to help small businesses. Companies with fewer than 10 employees may qualify for \$10,000. ([KING 5](#))

Donations

- Donors, including Bezos, Ballmer and Allen families, give \$20 million for coronavirus testing and research at UW ([Seattle Times](#))
- 48,000+ Dick's burgers donated to hospital staff, first responders ([Seattle Refined](#))

Stay-at-Home

- Gun stores still open during coronavirus pandemic. ([KIRO 7](#)) On [Facebook](#), people debate what should be considered an essential business. Many bring up the second amendment and feel that gun stores are essential.
- Fishing and hunting bans extended another month in Washington because of coronavirus. ([The Olympian](#)) On [Facebook](#), people point out with frustration that they are still able to go to crowded grocery stores but not to the woods to fish.
- Concerns over black market beauty salons still operating amid Washington's coronavirus closures. Some small businesses are operating despite the Stay Home, Stay Healthy order to stop the spread of coronavirus, prompting concerns of copycats. ([KING 5](#))

New Cases

- Washington mom delivers baby while battling COVID-19 in medically induced coma. The baby was born six weeks early but tested negative for the coronavirus. The mother is improving and was taken off a ventilator Monday night. ([KING 5](#))
- Staff member at Airway Heights Corrections Center tests positive for COVID-19. ([KXLY](#)) On [Facebook](#), people are concerned about the potential for COVID-19 to spread and ask what precautions are being taken to contain it.

Community

- Amid the coronavirus outbreak, window lights create hearts on the sides of the Hyatt Regency Seattle during sunset. ([Seattle Times](#))

Oregon

Flattening the Curve

- Oregon emergency management officials project that Oregon hospitals will see an influx of patients in the coming weeks if infection rates follow their current rates and urge residents to stay inside. ([KTVL](#), [@OregonOEM](#))
- Model predicts Oregon coronavirus cases will peak April 21. ([KATU2](#), [KVAL13](#))
- British town uses Oregon's 'exploding whale' fiasco to teach coronavirus social distancing lesson. ([FOX News](#)) The city of Florence [emphasizes the point](#).
- Gov. Kate Brown considering early release of Oregon prisoners amid coronavirus spread. ([The](#)

[Oregonian](#)) Reactions on [Facebook](#) are mostly negative, some saying that it would be an unnecessary or ineffective move, and others saying it would be unjust.

PPE

- Nike announces it will start producing PPE to help in the COVID-19 fight. ([NIKE NEWS](#))

Business

- Gov. Brown extended the ban on in-person dining indefinitely. ([KGW8](#)) In response, many people are very worried over the impact this will have on Oregon's economy. ([KWG8 Facebook](#))
- How Oregon dairies are handling COVID crisis. ([KOIN](#)) Other states have been dumping surplus, which is not yet the case in Oregon, but could be in the near future.
- Dutch Bros Coffee to donate 100% of April profits to medical first responders. ([The Oregonian](#))

New Cases

- 4 more deaths, 49 new cases reported. ([KGW8](#), [KATU2](#), [KOIN](#), [KPTV12](#), [The Oregonian](#))
- Multnomah County sees first positive COVID-19 cases in region's homeless population. ([OPB](#))

Testing

- Asante Rogue Regional Medical Center offers new on-site COVID-19 testing with results within 24 hours in Medford. ([NBC 5](#))

Idaho

Grocery Supply

- 'Dairymen are really struggling': Pandemic forcing some Idaho dairy producers to dump milk. ([KTVB](#)) On [Facebook](#), people want to know why milk shelves are empty, or that stores are limiting milk purchases to one per customer.

Crush the Curve - New Testing Initiative

- New 'crush the curve' effort launches to get Idaho's essential workers coronavirus tests. More than 1,000 more people can be tested per day, starting Wednesday. ([Idaho Statesman](#), [KTVB](#)) Many conclude that [testing will be forced on them](#). The article discusses access to testing, not required testing.

Stay-at-Home Orders

- Gov. Little on what's next for Idahoans: 'We will not return to normal April 16' ([CBS 2](#)) A popular response on [Facebook](#) is that the Governor needs to get people back to work, while others accept that his actions are for the greater good.

Economic Impact

- Governor Brad Little signed an [executive order](#) Tuesday, forming his new Coronavirus Financial Advisory Committee to oversee the approximately \$1.25 billion in federal funds that Idaho will receive to fight the COVID-19 pandemic.

PPE

- Bureau of Land Management (BLM) firefighters—normally busy preparing their firefighting gear—pivot to sew masks for healthcare workers. ([ABC 6](#))

New Case

- Boise State football coach describes having COVID-19: The healthy 26-year-old coach said having coronavirus was "one of the worst pains I've ever felt in my life... Every breath was like taking a knife and sticking it through your ribs." ([KING 5](#))

Alaska

Updates from Governor Dunleavy

- Governor Dunleavy announced Tuesday that he is altering several mitigation mandates, as

COVID-19 case count sees biggest rise to date. ([KTUU](#))

- Gov. Dunleavy updated the mandate that medical providers delay all elective surgeries, by releasing list of what counts as 'elective'. ([KTOO](#), [KTUU](#), [Alaska Public Media](#), [Alaska DHSS website](#))
 - Much of the news coverage highlights the fact that elective abortions are on the list of surgeries that should be suspended '[for a few weeks](#),' though the governor is leaving the exact timeline up to medical providers.
 - Many people are upset but the news, some seeing it as overreaching by a government that is against abortions. Some point out this will be a particular burden for economically disadvantaged women who will not be able to keep their jobs if they are pregnant, and are concerned that this comes at a time when domestic abuse may be on the rise. Others—including some self-described pro-choice individuals—are understanding of the decision.
 - There is concern over the impacts of delaying cancer surgery, as well.
- Gov. Dunleavy announced the arrival of more testine supplies from FEMA and increased rapid testing in rural Alaskan communities. ([KTUU](#), [ANTHC website](#), [The Cordova Times](#))
 - The [Alaska Native Tribal Health Consortium \(ANTHC\)](#) will distribute [40 Abbot rapid testing machines](#) and 2,400 test kits throughout 20 remote communities, to address accessibility issues amid increasingly limited air service. Reactions on Facebook [celebrated the news](#).
 - Announced 50 additional machines with 5,016 tests [arrived from FEMA](#).
- Alaska's Health and Social Services Commissioner formalized guidance around religious gatherings. Live-streaming of religious services is allowed so long as groups do not exceed 10 people and social distancing is observed. ([KTUU](#))
- Officials explained in the briefing that they are following guidance from FEMA in making decisions about mitigation measures. "Orders are coming in from the Federal Emergency Management Agency, officials said, but 'taking longer than we'd hoped.'" ([KTUU](#))

Economy

- Dunleavy vetoes millions in programs, but says federal stimulus funds will make up for most cuts. ([Alaska Public Media](#))
- North Slope Borough 'commandeers' Ravn's North Slope assets. ([KTOO](#))
- Alaska's cannabis industry looking for financial relief, but there is none in sight. ([KTUU](#))

Social Distancing

- Dillingham urges Governor Dunleavy to close Bristol Bay fishery, to avoid an influx of fishing industry workers. The state has designated fishermen as 'critical infrastructure.' ([Alaska Public Media](#))

Wildfire Preparedness

- The Alaska Division of Forestry will suspend all burn permits in anticipation of the impacts of COVID-19 on firefighter resources. ([Alaska Division of Forestry website](#))

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

ADDING TODAY's AGENDA

AGENDA –

- I. Roll Call
- II. Leadership Updates – JT & Derek
- III. Funding Updates
 - a. FEMA
 - b. CARES Discretionary Funding Discussion – soon to be available through local jurisdictions and OFM for state agencies
 - 1. What are agencies and partners considering requesting for their funding priorities and strategies?
- IV. Action Team Report Backs
 - a. Food Procurement Team
 - b. Gap Analysis Team
 - c. Coordinated Community Response Team
- V. Communications
 - a. JIC Reporting – Chris
 - b. Other communication needs?

- VI. Partner Updates or Concerns for the Week Ahead
- VII. Adjourn

Coordination call to establish information sharing and reporting across all lines of effort currently working on food security and food supply chain issues.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 13, 2020

SUMMARY

- Washington governor announces Astria Regional Medical Center will not reopen as an alternative care site right now; reinforcement medical staff will go to nursing homes instead.
- Oregon received thousands of medical masks from the federal government helping to offset a dwindling state supply.
- Alaska says social distancing has significantly slowed the virus; Anchorage mayor says businesses should get used to staying closed.
- Several counties in Idaho celebrate no new cases reported over the weekend, and the city of Sun Valley relaxes its isolation order.

Public Sentiment

- The top conversation among the public is the reopening of the economy. This conversation has increased in recent days due in part to comments from government officials and public health experts offering varying opinions. Most people want to see things return to normal, but want it done safely. They want to be assured by testing data that the timing is right.
- Idaho residents are especially vocal that enough damage has been done to the economy, and they are ready to get back to work.
- People are skeptical that testing is adequate and accurate in Idaho.
- In Oregon, people are upset by the challenges they are facing to gain access to unemployment benefits.
- In Washington, people have mixed reactions to closed parks – some feel that outdoor activity is vital, while others are willing to make sacrifices for the greater good.

Washington

Alternative Care Sites

- Governor Inslee announces Astria Regional Medical Center will not reopen as an alternative care site right now; reinforcement medical staff to go to nursing homes instead. ([Yakima Herald, KIMA, KAPP-KVEW](#)) Media coverage has been light so far, and concentrated to local Yakima outlets. In [reaction on Facebook](#), some people are grateful the site is not needed, though several others are upset about state money being spent on a site that is not being used.

Disease Modeling

- New University of Washington data predicts coronavirus cases could peak in late April. ([KING 5](#))

Social Distancing

- Inslee says more restrictions could be needed beyond the May 4 stay-home order to battle coronavirus. ([The Seattle Times](#), [The Daily Chronicle](#)) In areas of the state with lower cases of coronavirus, [reactions are that mitigation measures have been too extreme](#).

- Seattle's parks are quiet during coronavirus closures, though some residents still break the rules. ([Seattle Times](#))
 - Reactions are mixed. Many are frustrated with individuals not heeding stay-at-home orders, or keeping six feet when out. Others feel that stay-at-home orders do not restrict movement outdoors, and find that being out in a park is a healthy choice. ([Facebook](#))
 - Many feel describe people who are going out as entitled. ([Facebook](#))
- State superintendent says even fall may be too soon to return to school. ([The Spokesman-Review](#), [The Daily Chronicle](#))
- Progress being made, but now's not the time to stop social distancing, officials say. ([My Edmonds News](#))
- King County Health officials: Relaxing social distancing now could result in surge of cases later. ([KING 5](#))
- Thurston commissioners vote to officially reopen county trails during COVID-19 shutdown. ([The Daily Chronicle](#)) Many people say this is a dangerous move, while some others say that outdoors activities should not be restricted. ([Facebook](#))

Farming

- As farm work carries on, some worry about becoming Washington state's new coronavirus epicenter. ([Seattle Times](#)) There is a debate over whether or not farm work can lead to better health and therefore greater immunity to COVID-19. ([Facebook](#))

Testing

- Editorial: Everett testing site's closure means less certainty ([Everett Herald](#))

New Cases

- Washington's death toll passes 500, with more than 10,000 cases. ([KIRO 7](#), [KOMO](#))
 - Many feel that these numbers do not justify stay-at-home orders. ([Facebook](#))
 - Some fear what the numbers could have been without stay-at-home orders. They are worried about that cases will go up when activity returns to normal. ([Facebook](#))
- Dozens of coronavirus cases are linked to a Tyson Fresh Meats processing facility. ([KEPR](#)) 35 people who work at the meat packing plant, have tested positive for coronavirus. In reaction, people feel that the company places profits over worker safety. Some fear it's worse than reported. ([Facebook](#))
- Ten veterans at Spokane Veterans Home test positive for coronavirus. ([KREM 2](#))

Prisons

- Since social-distancing measures were implemented, the Spokane County Jail population has shrunk by about 400 people. ([The Spokesman](#)) The discovery prompts some to [consider this an experiment in jail reform](#).

PPE

- A group of Port Townsend volunteers are making face shields for medical professionals; recently delivered 150 to a hospital. ([Peninsula Daily News](#))
- Battelle system decontaminates Washington state masks for reuse during coronavirus outbreak. ([Tri-City Herald](#))

Treatments

- Kirkland doctor who nearly died from COVID-19 recovers after experimental treatment. ([KIRO 7](#)) The drug, currently FDA-approved for treating rheumatoid arthritis, has been used on about 40 patients there so far at Swedish Hospital.
 - Some people feel that the current outbreak of coronavirus is going to be used for greater degrees of government control. Others feel that the media is over-hyping the situation. ([Facebook](#))

Food Supply

- Many in the Pacific Northwest are turning to gardening for self-sustaining means of producing food during the pandemic—reviving a wartime practice. ([Thurston Talk](#))
- As more of them die, grocery workers increasingly fear showing up at work. ([The Washington Post](#))

Survivors

- 99-year-old Mill Creek man survives coronavirus with only mild symptoms ([KING 5](#))

Oregon

PPE

- Feds send thousands of medical masks to Oregon as supplies dwindle, coronavirus spreads ([Oregonian](#))
 - Several people ask if these were diverted from elsewhere, or if they will be shipped away like the ventilators. ([Facebook](#))

New Cases

- Dozens have died from the virus in Oregon's long-term care homes. ([FOX 12](#))
- A second case involving a long-term care facility in Eugene reported over the weekend. ([KEZI](#))

Unemployment

- Oregon unemployment claims system suffers another breakdown, tells laid-off workers to start over ([Oregonian](#))
 - People report their own challenges trying to navigate through the process, struggling to talk to someone at the Oregon Employment Department. People are feeling squeezed without access to financial resources. ([Facebook](#))

Stop the Spread

- Oregon Governor: Thank you for your sacrifices, please keep staying home to save lives. ([KXL](#))
- Oregon self-service option at gas stations extended through April 25. ([KATU](#), [The Oregonian](#)) Many [people continue to believe](#) that this policy will contribute to spreading germs among people drivers.
- People are asking why employees at some Portland grocery stores aren't wearing masks and gloves. The answer is that masks are not required. ([KATU](#)) In reaction, [there was strong debate](#) over whether store employees should wear masks, with some defending workers saying masks are difficult and expensive to find, and others saying that hand washing is more important.

Healthcare Capacity

- La Pine and Prineville health centers receive \$1.5 million for coronavirus response. ([KTVZ](#))

Food Supply

- Pearl District restaurant serves more than 6,000 free or reduced cost meals during COVID-19 outbreak. ([KGW](#))

Idaho

New Cases

- On Sunday Idaho officials reported a small uptick in COVID-19 cases. ([Idaho Statesman](#)) With exception of a continued [hotspot in Ada County](#), traditional media celebrated the lack of new cases in many parts of the state. ([Idaho Statesman](#), [Coeur d'Alene/Post Falls Press](#), [example 3](#), [example 4](#)) Many people responded to these positive reports with skepticism, particularly due to a perception that there is inadequate testing. ([example 4](#), [example 5](#), [example 6](#))
- No new COVID-19 cases were reported in north central Idaho or southeastern Washington Saturday, according to public health officials ([Lewiston Tribune](#))
 - People wonder if this may be due to a lack of testing. Others feel this is an indication that it is safe to start returning to work. ([Facebook](#))

Testing

- False negatives in coronavirus tests 'uncomfortably common,' doctors say. ([Idaho Statesman](#)) Reactions say this justifies people going back to work. ([Facebook](#))

Social Distancing

- Construction to resume in Sun Valley on Monday. ([Idaho Mountain Express](#)) The mayor announced that he'll allow the city's enhanced COVID-19 isolation order to expire on April 12.
 - [Reaction on Facebook is mixed](#), with some applauding the move, but most disapproving it as dangerous to construction workers and the state as a whole.

Food Supply

- Idaho National Guard deploys to help overwhelmed food banks in Pocatello, elsewhere. ([Idaho State Journal](#))

Economic Impact

'We're losing money:' Small Idaho businesses grasp at lifelines to survive coronavirus ([Idaho Statesman](#))

Alaska

Flattening the Curve

- Alaska's chief medical officer, Dr. Zink, said that Alaskans have significantly slowed the virus during the last few weeks. There could have been around 11,000 deaths, she said, had Alaskan's not adhered to social distancing. ([Anchorage Daily News](#))
 - In reaction, people continue to [thank Dr. Zink for her leadership](#). People are also expressing a lot of worry in response to the daily updates, with concern about the economy, vulnerable populations getting exposed as the pandemic progresses, hospital capacity, and the lack of contact tracing. ([example 1](#), [example 2](#))
- President Donald J. Trump approves Alaska disaster declaration. ([Alaska Native News](#))

Social Distancing

- Anchorage mayor tells businesses: We must adapt to operate while closed, not reopen. ([KTVA](#))
The mayor says he plans to ask the Anchorage Assembly to reauthorize his emergency powers so he can extend his "hunker down" order beyond its April 14 expiration date. People [reacted to the news](#) with sadness and frustration. Some debate whether it is better to go hungry or get the virus.
- Three more tribes call on Dunleavy to close Bristol Bay fishery. ([KTOO](#)) During the summer, the fish industry brings in thousands of employees and fishermen.

PPE

- Alaska Native Tribal Health Consortium (ANTHC) has built a mobile PPE sanitation unit, which uses heat to inactivate the coronavirus so face masks can be safely reused. ([Alaska DHSS Facebook](#))

Food Supply

- Talkeetna pizza maker bakes bread for local food pantry. ([KTUU](#))

[Gov Jay Inslee]

March 16, 2020

Public and constituent inquiries | 360.902.4111

Press inquiries | 360.902.4136

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslée declared a state of emergency<<https://lnks.gd/l/eYJhbGciOiJIUzI1NiJ9.eyJidWxsZXRpbHsaW5rX2lkLjoxMDEsInVyaSI6ImJwMjpjbGljayIsImJlbnNpdGluX2kldoiMjAyMDAzMTB>> in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. To receive the call-in information please RSVP here<<https://lnks.gd/l/eyJhbGciOiJIUzI1NiJ9.eyJidWxsZXRpbl9saW5rX2lkIjoxMDIsInVyaSI6ImJwMjpbGjIj01bGxldGluX2lkIjo1MjAyMDAzMTYuMTI9>>. Call-in information will be distributed by 9:45 a.m.

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County
livestream<page<

Media questions: Chase Gallagher<<mailto:chase.gallagher@kingcounty.gov>>, King County, 206.263.8537

Subject: FW: Seattle Highway Network Traffic and Freight Trucking Assesment

Tristan and Taylor,

I am getting this product to you for review as I am reviewing it myself . . . there will be a complimentary SCAN Ecosystem Assessment document also released this evening.

I have reviewed this once and will several more times. From a quick first read, I gather that the measures put in place in the Seattle region have not, for the most part, adversely impacted freight flows. Is this what you are seeing? This should indicate a relatively strong grocery sector and pharma supply chain that is demonstrating a good amount of resilience.

Is this the case?

Gene Shearer, PMP

Supply Chain Advisor

ADDING TODAY's AGENDA

AGENDA –

- I. Roll Call
- II. Leadership Updates – JT & Derek
- III. Funding Updates
 - a. FEMA
 - b. CARES Discretionary Funding Discussion – soon to be available through local jurisdictions and OFM for state agencies
 - 1. What are agencies and partners considering requesting for their funding priorities and strategies?
- IV. Action Team Report Backs
 - a. Food Procurement Team
 - b. Gap Analysis Team
 - c. Coordinated Community Response Team
- V. Communications
 - a. JIC Reporting – Chris
 - b. Other communication needs?

- VI. Partner Updates or Concerns for the Week Ahead
- VII. Adjourn

Coordination call to establish information sharing and reporting across all lines of effort currently working on food security and food supply chain issues.

LATEST COVID-19 UPDATES & RESOURCES: <https://coronavirus.wa.gov/>

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 14, 2020

SUMMARY

- Washington, Oregon, and California announce a Western States Pact, agreeing to a shared approach for reopening state economies.
- Idaho's Governor will announce his decision on whether to extend the stay-at-home order on Wednesday, April 15.
- Anchorage is looking to possibly extend their order which expires today; Alaska will consider its statewide order which expires April 21.
- Washington's governor announces 950 nonviolent offenders will get early release to fight spread of coronavirus in state prisons.
- Alaska's Governor issues a non-congregate sheltering order—a plan is to use hotels to quarantine health care workers and homeless families.
- Oregon's Governor released \$8 million to food banks to help respond to increased demand; says FEMA will reimburse the state for 75%.
- Traditional media is strongly focused on yesterday's White House presser, specifically comments on reopening the economy. There is additional interest in the food supply chain, and how COVID-19 could complicate natural disaster response efforts.

Public Sentiment

- In Idaho, fears over economic ruin and—in contrast—that the disease will surge again, each loom large as people await the governor's decision on the stay-home order.
- Reaction to the Western States Pact is largely positive, with people in Oregon and Washington grateful for strong, unified state leadership. Many Oregon residents are also concerned about being swept up with larger states that have more COVID-19 cases.
- In response to the release of 950 prisoners in Washington, reactions vary with some seeing this as a positive action, and others fearing for their safety.
- As discussions continue about reopening the economy at federal, state, and local levels, people wonder if the administration can overrule state decisions, and are concerned that using antibody testing to reopen may impose on citizen's rights.

Washington

Western States Pact

- Washington, Oregon and California announce a [Western States Pact](#). Governors of the three states say they'll work together on a shared approach for reopening state economies. ([Seattle Times](#), [KOMO](#), [KIRO 7](#), [NBC Right Now Tri-Cities](#), [KRDV NewsWatch 12](#), [FOX Q13](#))

- Reaction in Washington is largely positive, grateful for the Governor's leadership in this. Still, there are some who say that the West Coast governors are inconsistent, wanting more federal support and then defying federal leadership. Some others are concerned that this means more individual rights will be taken away. ([example 1](#), [example 2](#), [example 3](#))

Prisoner announcement

- Inslee: 950 nonviolent offenders will get early release to fight spread of coronavirus in state prisons ([FOX Q13](#), [KIMA](#), [KATU](#), [KING 5](#), [KIRO 7](#), [Spokesman-Review](#))
 - Responses are mixed. Some feel that this is a good thing. Others feel that this means they should be concerned for their safety as a result. ([Facebook](#))
 - Some feel that they would be safer from COVID-19 in prison than out. ([Facebook](#))

Employment proclamation

- The governor issued a proclamation today giving high-risk workers the right to protect themselves from COVID-19 without jeopardizing their employment. ([WA EMD Facebook](#))

Hand Sanitizer

- Duvall Distillery makes hand sanitizer for hospitals, post offices, and other organizations for free. ([King County TV](#))
- Dozens of Tri-Citians sick with coronavirus from outbreak linked to beef plant ([Tri City Herald](#), [Yakima Herald](#), [Walla Walla Union Bulletin](#), [YakTriNews](#))
 - Many are upset that this information wasn't shared sooner. There are calls to test every worker there (the article states they are checking all employee's temperatures), and all workers in the food industry. ([Facebook](#))

Testing

- Harborview, UW medical centers to test all incoming patients for COVID-19. ([KUOW](#))
- Merkley, Wyden push for more info, transparency on virus testing. ([KTVZ](#))

Flattening the Curve

- Feds: Washington leads the way when it comes to flattening the curve. ([KIRO 7](#)) In reaction to this article, many people applaud Governor Inslee and Washington residents for making tough decisions. ([example](#))
- Number of COVID-19 cases in Seattle hospitals flat, city leaders told. ([KOMO](#))

Private Sector

- Coronavirus: Microsoft to give 12 weeks of parental leave ([KIRO 7](#))
- Amazon hired 100,000 people in less than a month to bolster its novel coronavirus response and said Monday it is planning to add 75,000 more jobs in its warehouses, grocery stores and delivery network. ([Seattle Times](#))
 - Reaction is mostly positive, with some people concerned over whether the influx of new employees will be able to maintain distance, and others concerned that the pandemic is strengthening Amazon's advantage over other retailers. ([example](#))

Food Security

- State Sen. Hobbs to oversee National Guard support of food banks. The National Guard officer will command a task force in response to COVID-19 in western Washington. ([Herald Net](#))
- Feds: Washington leads the way when it comes to flattening the curve. ([KIRO 7](#)) In reaction to this article, many people applaud Governor Inslee and Washington residents for making tough decisions. ([example](#))

Census

- Mayor Jenny Durkan Commends Census Bureau's Proposal to Extend the Census Deadline, Calls on Trump Administration to Swiftly Provide Transparent Report to Congress ([City of Seattle](#))

Oregon

Western States Pact

- Governor Brown [announces Western States Pact](#). ([Willamette Week](#), [The Oregonian](#), [KRDV](#)) In reaction, Oregon residents are largely grateful to see the governors taking leadership of this decision. However, there is concern that Oregon will get swept up in decisions by the larger two states that have worse outbreaks than Oregon. ([example 1](#), [example 2](#), [example 3](#))

Economy and Food Supply

- Gov. Brown released \$8 million to food banks to help respond to increased demand related to

COVID-19. ([Associated Press](#), [KATU2](#), [KGW8](#)) Gov. Brown stated FEMA will reimburse the state for 75%, with reactions critical of the decision. ([Governor Kate Brown's Facebook Page](#)) People respond that if the economy weren't shut down, or if unemployment assistance were more accessible (many are struggling to access it), then food bank assistance wouldn't be necessary.

- The University of Oregon will cut off pay to 282 classified staff members in response to a projected loss of \$25 million in net revenue due to coronavirus closures. ([Daily Emerald](#))
- Oregon farmers dump produce as COVID-19 shuts down big customers. ([KGW](#))

New Cases

- 3 Hillsboro Police employees test positive for coronavirus. The police department said all three employees had been wearing personal protective equipment while working, and none are believed to have had significant direct contact with members of the public. ([Oregonian](#), [KATU2](#), [KPTV12](#))
- One death, 57 new COVID-19 cases reported in Oregon. ([KGW8](#), [KATU2](#), [KOIN](#), [Statesman Journal](#))

Long-term care

- Health officials confirm nearly half of Oregon's COVID-19 deaths, or 24 of state's 53, were people working or living in assisted living or long-term care facilities. ([KGW](#))

Idaho

Stay-at-Home Order

- In advance of Governor Little's press conference Wednesday, people speculate whether he will extend Idaho's 21-day stay-home order. ([Idaho Statesman](#), [Idaho News 6](#)) Some people fear that COVID-19 cases will surge if the governor ends the stay-home order. The majority appear to want steps to be taken now to open up the economy. Some suggest an in-between approach, such as only allowing free movement within counties, or waiting until May 1st to rescind the order. ([example 1](#), [example 2](#))
- In Idaho, Far-Right Republicans Defy Coronavirus Health Restrictions ([KUOW](#))
 - Public response overwhelmingly refutes the group's right to defy Idaho's stay-at-home order. ([Facebook](#))

Stories of Recovery

- St. Luke's Nampa has first COVID-19 recovery. ([Idaho News 6](#), [CBS 2](#))
- Nampa woman survives COVID-19 after being on a ventilator for two weeks. ([KTVB](#))

Inmates

- Inmates at the Idaho State Correctional Center volunteer to make cloth masks to help slow spread of virus. ([Idaho State Journal](#))

Food Supply

- Meals on the bus: Jerome schools deliver free lunch to area students. ([Times-News](#))

Alaska

Updates from Governor Dunleavy

- The governor announced a [Non-Congregate Sheltering Order](#), his fourteenth health mandate, to prevent the spread of COVID-19. The plan is to use hotels, dorms to quarantine health care workers and homeless families. ([Alaska Public Media](#), [Daily News-Miner](#))
- Gov. Dunleavy says he is monitoring the state's COVID-19 cases to determine when to restart sectors of Alaska's economy. "This is going to be the week that we're going to start talking about the economy." ([Alaska Public Media](#))

Testing

- Alaska's Chief Medical Officer says testing is key to reopening the economy. Alaska will need enough tests to test all Alaskan's multiple times, she said, and one of the greatest obstacles is the availability of the chemicals—or reagents—needed for the testing. ([KTVA](#), [Alaska Public Media](#))
- Chief Andrew Isaac Health Center receives three Abbot testing machines. ([KTVE](#))

Social Distancing

- Alaska Fish and Game Department [clarifies in a statement](#) that travel is allowed for sport and personal use fishing, as long as guidelines are followed. ([KTUU](#), [Anchorage Daily News](#)) The statement reads, "Although travel between communities is prohibited under the issued health

mandates, the public may still travel to fishing locations.”

- There was an [initial uproar](#) when news outlets initially reported that residents were not allowed to travel for fishing. There remains some confusion about whether personal use fishing is or is not considered essential infrastructure, with media outlets conflicting. ([KTUU](#), [Anchorage Daily News](#))
- Anchorage Assembly will vote whether to extend Mayor's coronavirus emergency orders past April 14. ([KTUU](#)) Reaction is split, with many people urging the assembly to heed the caution of health experts. Other people want to move on with their lives and worry about paying their bills if the orders are extended. ([example](#))

Prisons

- Four Juneau correctional employees test positive for COVID-19. ([KTUU](#), [KTOO](#))
 - There is concern for those employees and inmates in response to the news. ([example](#))

Food Supply

- Emergency SNAP benefits approved in Alaska due to COVID-19. ([KTVA](#))
 - Reactions range from gratitude, to challenges faced trying to enroll for the program, to calling the public assistance office and being told that this is not correct. ([Facebook](#))

Plasma Donations

- The Blood Bank of Alaska is looking for recovered COVID-19 patients to donate plasma. ([KTVA](#), [Anchorage Daily News](#))
 - People are curious in response to the article if it's [possible to test people who have recovered](#).

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

Good morning.

Today's national social listening hot issues and yesterday's national social listening report are attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 7, 2020

SUMMARY

- Idaho and Washington school buildings are closed for the remainder of the school year. Alaska, Idaho, Oregon and Washington are implementing distance learning where possible.
- Governors in Alaska, Oregon and Washington are encouraged by recent data indicating that social distancing is working and worst-case-scenarios could be avoided.
- Grocery stores are adjusting practices to encourage social distancing as workers are at greater risk for contracting COVID-19.

Public Sentiment

- Oregonians are concerned over accuracy of new optimistic projections, given low testing.
- With news that the mitigation measures are working, many Alaskans want social distancing mandates to continue.
- While some agree with calls from local officials to defy stay-at-home orders in northern Idaho and eastern Washington, most of the public reaction supports measures to slow the spread.
- The public continues to experience fatigue and struggle emotionally but seem to be seeking support from their loved ones and social media networks.

Washington

Schools

- Gov. Inslee: Washington schools will remain closed through end of school year in June. ([Q13 FOX](#), [Seattle Times](#), [KING 5](#), [The Columbian](#), [YakTriNews](#), [KNKX](#))
 - Many people express sadness over this despite an overall understanding that this measure is the right one to take ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#)). ([FOX Q13 Facebook](#), [KAPP-KVEW News Facebook](#))
 - One person wonders what distance learning means for kids with special needs and with Individualized Education Programs or 504 Plans ([example 8](#)). ([KING 5 Facebook](#))
- Amazon donates 8,200 laptops to elementary school students of Seattle Public Schools. ([Q13](#))

Flattening-the-Curve

- Gov. Inslee says he is confident the state has enough ventilators for COVID-19 patients and thus could send 400 ventilators to other locales. ([Seattle Times](#))
- New UW analysis lowers coronavirus death projections, saying the state can expect roughly 632 deaths, compared to an estimate 10 days ago of more than 1,400 fatal cases of COVID-19. ([Seattle Times](#))
- Projection: If Washington maintains social distancing, state has passed worst of coronavirus outbreak. ([KXLY](#))

- Washington may start flattening the curve, but Spokane County still seeing increase. New numbers suggest the worst of the coronavirus pandemic may be behind Washington statewide, but health experts in Spokane county say things look a little different there. ([KXLY](#), [KHQ](#))
 - Comments on the [KXLY News Facebook post](#) speculate about different causes for Spokane's higher infection rate including people not wearing masks at the grocery store ([example 1](#)), a long turnaround time for COVID test results ([example 2](#)), people bringing COVID from Seattle ([example 3](#)), too many people not staying home ([example 4](#)), and people generally not taking this seriously enough ([example 5](#)).

PPE

- States, hospitals say they're still not getting vital supplies to fight COVID-19. Gov. Inslee says it's not enough for the White House to merely pressure companies. ([NPR](#))
- [Washington Emergency Management Division](#): The [Battelle Critical Care Decontamination Systems](#) recently underwent a dry run and is expected to be operational to clean used N95 masks this week. Tens of thousands of N95 masks will be cleaned per day so they can be reused. ([WA EMD Facebook](#))
- Alaska Airlines teams up with Providence hospitals to get masks to healthcare workers. ([KTUU](#))
- Joann Fabric is offering free face mask materials in response to high demand. ([The Daily News](#))

Resistance to Stay-at-Home

- Yakima City Councilmember, Jason White, has been posting to social media, downplaying the effects and seriousness of COVID-19. A local medical doctor responds. ([KIMA](#)) The public reaction largely supports the doctor's rebuttal. ([example 1](#), [example 2](#), [example 3](#))

Grocery

- Major supermarket chains are beginning to report their first coronavirus-related employee deaths, leading to store closures and increasing anxiety among grocery workers as the pandemic intensifies across the country. ([Seattle Times](#), [News Tribune](#))
- QFC stores will set customer limits and test one-way aisles in bid to slow virus spread. Under the new measures, QFC stores will limit the number of customers to 50% of the building code's calculated capacity at any given time. ([KOMO](#))
- Fred Meyer will start limiting number of people inside stores. ([YakTriNews](#), [KGW](#))

Domestic Violence

- U.N. warns that global lockdowns are resulting in 'horrifying surge' in domestic violence. United Nations Secretary-General António Guterres said in some countries "the number of women calling support services has doubled" while "healthcare providers and police are overwhelmed and understaffed." ([KUOW](#))

Testing

- New drive-thru testing site for COVID-19 opening at State Fair Park. ([YakTriNews](#))
- A new drive-thru COVID-19 testing site opens in Yakima Tuesday. ([1280 AM KIT](#))
- New COVID-19 drive-thru testing site coming to Bremerton. ([Kitsap Sun](#))
 - Some comments on the [Kitsap Sun Facebook post](#) express that this is about time ([example 1](#), [example 2](#)) and that Kitsap County has had a "pathetic" number of residents tested so far ([example 3](#)).
 - One person wonders about what the Puget Sound area is doing to better serve people who are blind, physically disabled, elderly, or do not have a car and still need access to healthcare in this time ([example 4](#)).

Fatality

- Beloved Seattle-area taco truck owner dies from the coronavirus at age 44. ([Seattle Times](#)) Residents [share fond memories](#) and [their sadness](#) in reaction to the news.

Economic Impact

- REI says it will keep its 162 retail locations closed and furlough some of its roughly 14,000 employees without pay for 90 days. ([KOMO](#))

Oregon

Flattening the Curve

- Updated projections show Oregon's coronavirus may come in two weeks, avoiding worst-case scenario. ([The Oregonian](#), [KGW](#))
 - In response, people are still concerned that testing is too low to accurately predict the curve. ([example 1](#), [example 2](#), [example 3](#)) Some are confused by the changing projections,

and how to interpret this report against national news saying to brace for the peak this week. ([example 4](#), [example 5](#), [example 6](#))

Ventilators

- "To all in New York, Oregon is keeping you in our hearts." Gov. Brown sent 140 ventilators provided from the strategic national stockpile to New York. ([@oregongovbrown](#)) Some people [support the move](#), while others are worried Oregon will need them. ([example 1](#), [example 2](#))

PPE

- Inmates in Oregon could be one solution to the face mask shortage. ([Statesman Journal](#), [KGW8](#))
- Grants Pass teachers use 3D printers to make PPE for local hospitals. ([NewsWatch 12](#))

Business

- Businesses forced to shut down because of coronavirus find new ways to serve customers via deliveries, virtual appointments. ([KATU2](#))

New Cases

- 29 now dead as known cases top 1,100, health officials say. ([KGW8](#), [KATU2](#), [KPTV12](#), [The Oregonian](#))
- 3 Oregon WinCo workers test positive for coronavirus. ([The Oregonian](#), [KGW8](#))
- An outbreak of COVID-19 shut down the entire pharmacy at Kaiser Permanente's Westside Medical Center. ([FOX 12](#))

Education

- Oregon school districts have distributed thousands of tech devices to students, but concerns remain over equity and access to distance learning. ([OPB](#))

Idaho

School Closure

- Idaho schools vote to extend closure through end of school year, with local flexibility. ([CBS 2](#), [KTVB](#), [Times-News](#)) Overall, responses to the closure are understanding.
 - There is [a sense of loss](#) for defining adolescent moments like prom.
 - Parents are feeling strained. ([example 1](#), [example 2](#))

Donation

- Gritman Medical Center in Moscow receives \$200K in donations for COVID-19 response. ([Pullman Radio](#))

Flattening the Curve

- One doctor's opinion: St. Luke's doctor says social distancing is paying off. ([ABC 6](#))
 - Observations point to people not social distancing. ([example 1](#), [example 2](#))
 - There's a call for the healthy to be able to [go back to work](#), contrasted with worry that people are going to let [their guards down and the spread will speed up](#).

Stay-at-Home order

- Member of Idaho's Coronavirus Task Force predicts the stay-at-home order will be extended 'longer than most people think.' ([KTVB](#))
 - As the two week mark approaches for the stay at home order, the response to an extension from many is that of government overreach. ([example 1](#), [example 2](#), [example 3](#))
 - Many are worried about the economic impact that a continued shutdown will have. ([example 1](#), [example 2](#), [example 3](#))
 - Others would appreciate compliance to reduce the spread. ([example 1](#), [example 2](#), [example 3](#))
- A 'Liberty' Rebellion in Idaho Threatens to Undermine Coronavirus Orders ([New York Times](#)) Many of the latest claims about the Constitution have come from Idaho's northern panhandle, where vaccination rates for other diseases have always been low and where wariness of government is high.

Alaska

Governor's Presser

- Alaska efforts are helping slow the spread of COVID-19, governor says. He will review mitigation measures later this week to determine if there should be changes. ([Alaska Public Media](#)) In response, some people are asking the governor not to lessen social distancing measures too soon, ([example 1](#), [example 2](#)) and several call for essential workers to be given masks. ([example](#)

3)

New case

- A person in Bethel has tested positive for COVID-19. It is the first confirmed case of the new coronavirus in the Yukon–Kuskokwim Delta. ([KTVA](#)) People respond with [concern for the villages](#).

Economy

- Alaska Airlines works to hire laid off Ravn employees in Kodiak. ([KMXT](#))
- North Slope Borough “commandeers” Ravn’s North Slope assets. In an emergency order, borough mayor they will take possession of all of RavnAir Group’s planes and other property within the borough’s boundaries in order to guarantee continued air service to the region. ([Alaska Public Media](#))

PPE

- Governor Dunleavy thanks Samaritan's purse for DC-8 aircraft, carrying nearly 18,000 pounds of critical medical supplies ([Governor's Facebook](#))
- Bartlett Regional Hospital adopts universal masking; visitors will be required to wear one at all times. ([Juneau Empire](#))
- U.S. Army Alaska announced the Army will allow soldiers to wear masks while in uniform, if they want to. ([U.S. Army Alaska Facebook](#))

Correction - FEMA Advisory: COVID-19 Daily Briefing Points (April 21, 2020)

April 21, 2020 at 1:29 PM EDT

To: FEMA-IGA

CORRECTION – Attachments included.

FEMA ADVISORY – APRIL 21, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and

commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

April 17, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to

- local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
- Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.
 - Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state's entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

Follow Us

FEMA_Supply_Chain_Task_Force_Leads_Four-Pronged_Approach_to_Securing_Needed_Supplies_and_Equipment_in_COVID-19_Fight

March 31, 2020 at 10:39 AM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the fact sheet below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Supply Chain Task Force for COVID-19 response.

March 31, 2020

FEMA Fact Sheet

FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Service created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

The task force's primary effort is the sourcing of personal protective equipment (PPE), ventilators and other critical resources requested by states, tribes and territories. By using the structure of FEMA's NRCC, the task force is finding and executing solutions to meet urgent demand and enable the U.S. Government to surge support to COVID-19 "hot spots" as they arise.

The Supply Chain Stabilization Task Force is executing a whole-of-America approach to address limited supply of critical protective and life-saving equipment. Through a four-prong approach of *Preservation, Acceleration, Expansion and Allocation*, FEMA is bringing the full capacity of the Federal government to bear to find solutions to protect the American people and defeat COVID-19.

Locating Available Critical Resources

The task force's primary effort is the sourcing of personal protective equipment, ventilators and other critical resources to respond to requests by states, tribes and territories. Through the National Response Coordination Center, the task force is working to find critical resources to meet urgent demand and enable the U.S. Government to surge support to "hot spots" as they arise. In addition, the task force is engaging manufacturers, distributors and healthcare networks to build the next phase of supply chain stabilization.

Increasing Availability of Critical Resources

The task force is developing a strategy to increase availability of critical resources through four primary efforts:

Preservation

Preservation to limit unnecessary use of PPE and other supplies. Developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs are critical components of this strategy.

- The task force is in the process of developing and verifying techniques to clean and recycle products.
- This line of effort also includes developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs, critical components of this strategy.
- The task force is also working to expand equipment resources through the Preservation line of effort. The FDA issued an Emergency Use Authorization (EUA) for ventilators on March 24, which allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The new guidance will also assist health care personnel on how to use other ventilators, like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

Acceleration

Acceleration of industrial manufacturing is required to help meet the urgent demand placed on the market. Manufacturers are ramping up production of critical resources and have extended operating hours to increase production well above pre-COVID-19 levels.

- To expedite purchasing, FEMA issued a request for quotation for vendors who have needed medical equipment and supplies to sell to the agency.
- FEMA is also expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- As an example of this effort, FEMA coordinated an air bridge for flights from Asia

beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- The second flight landed in Chicago this morning. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical PPE (gloves, gowns, goggles, and masks) in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Additionally, in some cases, the federal government may purchase some of the supplies to be used to replenish the Strategic National Stockpile (SNS) or to provide to states with any identified and unmet needs.
- To address the anticipated ventilator shortage across the nation, the task force has implemented a similar strategy, leveraging the strengths of the commercial industry. Including numerous vendors, such as General Electric, Phillips, Medtronic, Hamilton, Zoll, ResMed, Hillrom and Vyair, to produce 20,000 ventilators over the next two months with the potential to add 100,000 by end of June. This represents a significant increase in velocity as the normal annual market is 30,000 per year.

Expansion

Expansion of the industry is also taking place. Manufacturers are enhancing production capacity with additional machinery, and in some cases re-tooling assembly lines to produce new products needed.

- As an example of this work, the Food and Drug Administration (FDA) is providing information for manufacturers on adding production lines or alternative sites, like automobile manufacturers, for making more ventilators during the COVID-19 public health emergency.
- In addition, the task force is working through over 350 leads to match American businesses who have excess raw materials, workforce or factory production capacity combined with an overwhelming desire to provide their support to the national response effort.
 - Task force members are actively working to facilitate the creation of private sector partnerships to pair companies that have volunteered excess factory production capacity, the talents of their workforce and access to their raw material supply chains with critical supply manufacturers who have the expertise in producing PPE, ventilator and other needed equipment.
 - The creation of these partnerships to align capacity with know-how will

unleash the potential engine of our national private sector and help overcome the supply shortfalls.

Allocation

Allocation of critical resources based on data-informed decisions. These decisions will be coordinated between the U.S. Government and the private sector.

- FEMA is focusing its allocation of critical resources to highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls, with consideration to the at-risk population distribution across the Nation.
- To more effectively adjudicate resources throughout the nation and private industry, a National Resource Prioritization Cell was established to unify government and private industry prioritization recommendations which will inform federal, state and private sector operations.

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

March 30, 2020 at 1:00 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 30, 2020

FEMA Advisory

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

“This response isn’t just about delivering food or supporting COVID test centers. It’s about protecting our children, parents, and grandparents. Our Nation is looking to the National Guard to help them and we can’t let them down.” – Air Force Gen. Joseph Lengyel, Chief of the National Guard Bureau

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people. The latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates

\$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA, for some states' use of their National Guard forces. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32.

FEMA coordinated an air bridge for flights from Asia beginning on Sunday, March 29, with the first delivery of 80 tons of much needed PPE supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 10.3 million gloves and thousands of thermometers for New York, New Jersey and Connecticut. Additional flights are contracted to go to Illinois today and to Ohio tomorrow. FEMA has scheduled additional flights and is adding more daily.

Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (180) and Connecticut (50).

Twenty-seven states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), the Strategic National Stockpile, Ventilator Guidance, CDC Respirator Guidance, Defense Production Act, CDC Public Guidance, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

[EXTERNAL Email Notice!] External communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so we’ll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Good afternoon, all, and thanks very much for your assistance.

Congresswoman Jayapal is free all morning, but I know several other members of the WA delegation are eager to participate as well but I know at least Reps. Larsen and Heck have conflicts in the late morning. If you have flexibility and can arrange for one tour in the 9-10:30 am window, I know their teams would appreciate it.

Best,
Gautam

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials to do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available? Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that’s easier.

Best,
Stephanie

Isolation and Quarantine Sites

April 04, 2020 at 8:43 PM EDT

To: Baumgart, Jim (GOV), travis.linares-hengen@mil.wa.gov, Lujan, Lewis (MIL), Schitoskey, Frank C (DOH), DOH-ISOTF (DOH), SEOC44@mil.wa.gov, Zimmerman, Matthew S (DOH), Simons, Matt C (DOH)

Cc: Goudreau, Laura, Rice, Toby

Hi All,

I had some time to pull together various sources today and digest some of the available information. While there may be a need to provide additional guidance, based on what I'm seeing I believe it may be in the taskforces best interest to focus on getting a handle on the sites that are already in progress. It appears that there are thousands of beds being planned and/or operated already regardless of completed guidance. The clear gap is that we don't know the status of each site.

Here's a quick summary from the PA non-congregate approval and WA Dept of Commerce info:

- 2,684 beds planned across Snohomish, King, Pierce, and Spokane County (PA)
- 1,170 beds ready by 3/31 statewide (Commerce)
- 3,041 (cumulative) beds planned statewide by 4/15 (Commerce)

What we need validity on is:

- Operating status
 - Open, scheduled opening, planning in progress, etc.
 - Capacity
 - Occupancy
- Staffing
- Wrap around services
- Shortfalls

Once we have a handle on the status of these sites we can then coordinate across the spectrum of care to identify solutions and options for addressing shortfalls.

Thank you,

Lisa Davidson

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_7,_2020

April 07, 2020 at 4:56 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 7, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services (HHS) Response; FEMA Response Capacity; Strategic National Stockpile; CDC Public Guidance; CDC Respirator Guidance; Hydroxychloroquine/ Chloroquine; FDA Ventilator Guidance; National Guard Activation (Title 32); Community-Based Testing Sites; Defense Production Act; and Other Federal Response.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On **March 31**, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people are critical in the campaign to slow the virus' spread and keep high-risk populations safe.
 - For updates and information on how to protect yourself, visit www.coronavirus.gov.

- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - While FEMA schedules daily flights, it does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 6**, 13 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Seven flights are scheduled to arrive today, 6 in Chicago and 1 in Los Angeles. This is the greatest number of air bridge flights in a single day since the start of the program.
 - An additional 72 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.
- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- As of **April 6**, FEMA and HHS have provided or are currently shipping, 8,920 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (1,350), New York (4,400), Oregon (140), and Washington (500).
 - Governor Brown of Oregon sent the state's 140 ventilators directly to New York.
 - Governor Inslee of Washington is returning 400 of the state's 500 ventilators to

- the SNS to be deployed to areas of greatest need.
 - Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 250-bed Federal Medical Station for the Metro D.C. area.
- Forty states, four territories and 24 tribes have issued stay-at-home orders.

FEMA ADVISORY – APRIL 8, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into

distributors' normal supply chain to their customers in other areas nationwide.

- HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
- This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

CONOPS Briefing on Coordination Task Force

To: Davidson, Lisa, Linares-Hengen, Travis (MIL), Lujan, Lewis (MIL), Bailey, Danielle, Baumgart, Jim (GOV), nicole.benardo@mil.wa.gov, Zerbe, Kevin (MIL), Laughlin, Brian N (MIL), Hennessee, Taylor (MIL), Holt, Brett, lori.shultz@fema.dhs.gov, Stanley, Trevor, Jennifer.C.Chang@usace.army.mil, Granum, Nicolas, Giles, Terri, Zimmerman, Matthew S (DOH), Cockrill, Jennifer (OS/ASPR/EMMO), Treadwell, Randy (AGR), Michael.Riedy@usda.gov, Meghan.OHara@redcross.org, Rice, Toby, seoc42 (MIL), Dance, Rebecca, Harris, Gary, Allen, Tristan (COM), Richeson, Jonathan, Miller, Clayton, Bova, Rebecca, Lofaro, Daniel, Abel, Bethny, McClain, Stacey (MIL), Ellis, Edward D, Wood, Teresa, Everson, Suzanne (ACF), Simmons, T (DCYF)

Hi All – Sending on behalf of Travis Linares-Hengen, WAEMD Human Services Program Supervisor.

Please join us for a concept of operations briefing on a taskforce in development. Tentatively named the Washington Spectrum of Care (WASOC) Taskforce (taking nominations on alternate names) the taskforce aims to:

MISSION The WASOC Multi-Agency Taskforce provides a structure for enhanced collaboration and communication between agencies and ESFs supporting the State's efforts to save and sustain lives impacted by COVID-19.

OBJECTIVES

- Provide consolidated information gathering and reporting on past, current, and future efforts.
- Provide subject matter expert technical assistance to working groups.
- Leverage resources and expertise in the delivery of care.
- Support strategic planning and establish priorities for the WASOC.
- Share best practices, lessons learned, and resources across workgroups, ESFs, and agencies.

A very rough draft of the conops is attached.

Thank you,

Lisa Davidson

RFIs and Courses of Action: WA Isolation and Quarantine Support Resource Request

To: Davidson, Lisa, Manner, Timothy, Daggett, Anna, Lofaro, Daniel, Giles, Terri, Abel, Bethny, Granum, Nicolas, Stanley, Trevor, Miller, Clayton, Bicanovsky, David, Holt, Brett, Fordice, Justin, D W (MIL), Linares-Hengen, Travis (MIL), Baumgart, Jim (GOV), kandi.petorak@gsa.gov, Cockrill, Jennifer (OS/ASPR/EMMO), Smart, John (DOH), Riedy, Michael J - APHIS
Cc: Keller, Charissa, Brockett, Michael, Goudreau, Laura, McClain, Stacey (MIL), Dance, Rebecca, john.fitzgibbon@gsa.gov, Everson, Suzanne (ACF), Weber, Douglas T NWS, John.K.Leighow@usace.army.mil, Thomas.M.Brady@usace.army.mil, Williams, Roger D Jr CIV USARMY CENWS (USA), Jones, Sidney T III CIV USARMY CENWS (USA), Bailey, Danielle, Chang, Chia Pei J (Jennifer) CIV USARMY CENWD (USA), Parker, Angela M, Prediger, G Brian CIV USARMY CEHNC (USA), Royer, Corey, IMT7 Operations (OS/ASPR), Kerschke, William, Rice, Toby, Harris, Gary, DOH-OSC2 (DOH)

Hi All – Thanks for participating in today’s initial planning meeting.

Please send your replies to [HYPERLINK "mailto:lisa.davidson@fema.dhs.gov" lisa.davidson@fema.dhs.gov](mailto:lisa.davidson@fema.dhs.gov) . A consolidated list will be provided prior to tomorrows meeting.

Here are the RFIs and due outs for the Friday 3/20/20 12pm PST follow-up call:

Requests for Information (RFI) to State:

- **Regional vs. Individual Jurisdiction Approach** – is the State’s intent to continue with processing this RRF for King County or does it intend to address these needs in its regional planning approach?
- **Medical Team Capability** – what is the capability that needs to be support by the RRF? Specifically, what is the anticipated number of patients and acuity? This information will help inform the staffing needs vs. the current list of #'s by position
- **Quantity of Centers** – given limitation on resources, what options are there to pursue a single facility vs. six?
- **Type of Center** – fixed facility vs. soft sided structure
- **Status of Centers** and requested line items:

Center	Location (Address and/or local jurisdiction)	Status (contracted, in negotiations, etc.)	Facility type (fixed, land, soft-sided)	Capacity	Operating Status (date open or required, current occupancy, etc.)	Remaining Requirements (are the needs identified in the RRF current)
1						
2						
3						
4						
5						
6						

- **Feeding** – specific requirements, i.e. is the need delivery of resources, food preparations, volunteers/staff?
- **Associated needs** – what is the plan for:
 - access and functional needs
 - mental health support in the centers
 - pet support (comfort/service/household)
 - security – of facility, for staff/patient safety, quarantine enforcement; is there a need for ESF13 support?

Due Outs for Federal Partners

- Description of Agency/Program Capability to support – specific line items vs. entire mission
- Estimated Timeline for execution

Austin, JT (GOV)

Food Security Coordination Team conf call tomorrow

To: nicolas.granum@fema.dhs.gov

Hi Nicolas,

Would you be able to speak to what FEMA is able to provide with regards to food security?

Procurement, funding, reimbursement...? On the FSCT call tomorrow?

And, I was able to listen in to the last 15 mins of the grocer call today and am super interested in listening in on as many of those calls.

Thanks,

JT

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) weâ€™re hosting a Congressional Briefing for the WA delegation. From the feds, weâ€™ll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). Weâ€™d like to also include WA EMD (Dir Ezelle) and, if appropriate, the Govâ€™s office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Sent: Monday, March 16, 2020 3:19 PM
Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBAâ€™s Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but we've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater

Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>

Â• We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>

- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

RE: Press Conference Tomorrow at 1:30 pm

March 28, 2020 at 12:31 AM EDT

To: Ike, Ryan, Holman, Sam (GOV), Lee, Tara (GOV), bruce.k.anderson.civ@mail.mil, Powell, Brent C SFC USARMY 76 ORC (USA), Shagren, Karina L. (MIL), Munoz, Andrew S CIV USARMY CENWS (USA), Ward, Erin, Fryer, Alex, Pearson, Dave, Vila, Simon (GOV), Garza, Jeff

Cc: Derrick, Anthony, Apreza, Ernesto

Thanks all â€” Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. Iâ€™ll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photogs.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.
- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) â€” Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via WebEx [LINK].

TBD will serve as the print pool and TBD will serve as the TV pool.

Subject: Press Conference Tomorrow at 1:30 pm

Hi all – Thanks for everyone’s help to get the release out earlier. I wanted to loop back on logistics for tomorrow’s press conference.

Time

- Press Conference: 1:30 pm at the CenturyLink Event Center, 800 Occidental Ave S. in Seattle, WA

Attendees/Speakers

- Governor Jay Inslee
- King County Executive Dow Constantine
- Seattle Mayor Jenny Durkan
- FEMA Region 10 Administrator Mike O’Hare
- TBD Army
- Q&A

Advisory

- See below. We will send at 9:00 am on Saturday, March 28

On Site:

- Podium/Flags will be provided by the City.
- DOD – Let us know if there may be any supplies that may be able to be moved on site.

Pool: City will organize a pool

- Print Pool (ST/AP)
- Still photog (ST)
- TV Pool (Will work with News Directors)
- Seattle Channel (to cross post w/ TVW)

Technology

- WebEx: City and Governor’s Office are connecting to provide Q&A for reporters not in the pool

Key Messages

- Important Resources for Our Hospitals – Partnership to make this a reality
- Staffed with Army doctors and nurses for Non-COVID-19 with ER, X-Ray, and other medical uses
- Construction will begin soon + Seattle may see additional US Army personnel in the area

Staff:

- MO: Anthony Derrick: 260-247-2741
- Stephanie: 206-247-0475

Hi team,

Had to be pretty focused on yesterday's address the last couple days, but ready to get this PSA off the ground here. An update:

- 1) I've sent a script option to get Macklemore's sign off. (His team will be the one's we hire to produce this, so wanted to make sure they are good with direction first.
- 2) His people didn't think the "Dance off" idea was going to fly, so I sent an alternate idea. We may update some language based on yesterday's announcement and the "Stay Home. Stay Healthy." branding. That script is linked here: [HYPERLINK](https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing) ["https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing"](https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing) PSA script google doc if you want to make comments. I've also attached as a PDF. (Note: For clarity in the script, Macklemore's first name is Ben)
- 3) Once we have script close to signed off, I will start recruiting people to participate. My plan is to get each influencer to run through a version of the script that works for them. The only thing that will change are the person they are "staying home for" and any personal flare they add. The rest should be identical, which will give us a stand alone product for each person, but also allow us to create single video with many speakers cut together.

Our targeted influencers:

- Macklemore (Ben Haggerdy)
- Russell Wilson (and Ciara?)
- Pete Carroll
- Megan Rapino (and Sue Bird?)
- Brandi Carlyle
- Pearl Jam
- Ken Griffey Jr.
- Jordan Morris and or Steven Frei (Seattle Sounders)
- Mark Few (Gonzaga's basketball coach)

We have direct or one bounce connections to everyone on this list.

- 4) We will hopefully shoot these by late this week/early next week.

WHAT I NEED FROM YOU:

- 1) Feedback on script - especially the recommended steps.

2) Additional content asks we can try to produce with our influencers. What else would be useful?

If we move forward with this script concept, I plan to ask for stills of each participant holding up their video chat system and one of just them.

Thanks all,

Sam Holman

Hi all,

Quick update – we’ve revised the language to remove the “stay happy” message. Because this is a stressful time for many folks, we didn’t want to come off as out-of-touch or even condescending. The key messages now are: “Stay home. Stay healthy. Stay informed.”

Next steps – Laura Blaske and I are working with the ad agency that is leading Spread the Facts, and we will incorporate the “stay home” messaging into that campaign.

Help stop the spread of COVID-19.

Spread the facts.

Stay home. Everyone should stay home except to get food, care for a relative or friend, get necessary health care, or go to an essential job. (LINK HERE TO MORE INFO.)

Stay healthy. If you must go out, keep at least 6 feet of distance from other people. (LINK HERE FOR MORE INFO.)

Stay informed. Stay up to date on what is happening in Washington State; visit this website often.

Thanks!

–Kennedy

Subject: Please review: Stay home campaign drafts

Importance: High

Hi all,

Please review the attached DRAFT materials and track any edits/suggestions **by COB Monday, March 23** . Other materials, including a tip sheet for caregivers, are in the works.

Laura and I are working with the agency heading up the Spread the Facts campaign to infuse this messaging into the overall campaign. More to come on that.

These materials serve as the basis and main key messages for:

- Infographics
- Digital ads
- Partner toolkit resources
- Talking points
- TV, radio, digital advertising

Best,

Kennedy

Austin, JT (GOV)

FOOD SECURITY Coordination Team conference call / twice weekly check-in

To: nicolas.granum@fema.dhs.gov

Hello Team,

Please note Coordinate Team name change (need all the positive framing we can get these days). Let me know if you have a strong objection to the change.

Please continue to send me suggestions for team member additions so that I may add accordingly. Continue to forward to staff leads, as you deem appropriate until I get the list updated.

These meetings are scheduled twice a week, Mondays and Thursdays, through the end of June. The situation, as you well know, is fluid so the team makeup and team outcomes may change over the course of time and as per direction of Incident Command.

Please send agenda items by noon the day before each conference call.

Please contact me directly in between conference calls to highlight and discuss Hot Button issues that require elevation and/or immediate attention.

Your input on how these coordination calls go, the content, follow up, membership, etc., is extremely valuable. Please send concerns, ideas, and feedback to me directly.

Take good care. Talk soon.

Hello Team,

Please forward this conference call to appropriate state leads and staff.

I have been asked to serve as the Governor's office Coordinator for Food Insecurity/Hunger Issues.

Please note I have had to push this conference back to 1 PM as I have a meeting with our Chief of Staff at 12 noon on a related food/ag issue.

I look forward to meeting you all and doing good work!

Best,

JT

AGENDA

Welcome and Introductions

Identification of Agency Leads and Additional Partners Discuss "Chain of Command" and Points of Contact Identification of Immediate Actions, assign leads
Identification of Longer-Term Actions, assign leads Establish Daily Coordination Calls

DRAFT List of Issues for Discussion (will be edited as we go)

Mobilize Large-scale Restaurant Food Rescue Operation: assign small ad-hoc team, discuss coordination with hospitality association, county EDC's, transportation, communications

Repack household size food items, deliver to local hunger relief organizations

COVID-19 SNAP Requests

Get purchasing power to low income people on SNAP so they can purchase food and acquire rations during quarantine

Suspend implementation of ABAWD rule that is scheduled to go into effect 4/1

Provide additional months benefit early to allow for additional purchases

Increase the monthly benefit and expand eligibility to reduce reliance on overwhelmed food banks FUNDING Funding for temporary staffing to a) offset a depleted volunteer base (hunger relief significantly relies on senior volunteers who are showing up in reduced numbers due to their vulnerability to COVID-19) b) begin providing mobile market and home delivery for low-income infected and/or otherwise quarantined people unable to access food through other means; Funding for packing and re-packing supplies to a) pack food into self-contained boxes to give clients in open air environments to reduce person-to-person contact and b) to repack bulk commodities from OSPI/USDA for distribution in household sizes.

* Anecdotal – the largest food bank in Snohomish Count spent \$5,000 on 3/12 to purchase thousands of bags so that they could maintain food distribution with pre-packed food bags. Many other large food banks are making similar purchases to keep food flowing to low-income people; most of these organizations have reserves that can support these purchases for a short-time, but this pandemic is expected to take a huge toll on businesses, including the nonprofit sector, and government support will be needed to ensure that food continues to flow in the coming weeks and months.

Funding for sanitation supplies* – hand sanitizer, disinfectant wipes, increased professional cleaning services, hand washing stations, gloves, etc.

Funding for distribution costs – including leasing refrigerated vehicles, fuel, insurance, etc. to enable more food-safe home deliveries and mobile distribution units.

Additional funding to purchase food as donations dwindle due to social distancing and an increased number of quarantined people.

How National Declaration impacts funding and actions

Communications with USDA

[EXTERNAL EMAIL]: Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Brandon,

Thanks so much for reaching out and for your extremely generous offer. I am including on this email members of the Food Security Coordination Team which is co-chaired by JT Austin with the Governor's Office and Katie Rains with WA Dept. of Agriculture Food Assistance Program. The WSDA Food Assistance Program is managed by Kim Eads, who I have also included on this email for her awareness. The Food Security Coordination Team is coordinating donation of goods and services related to the support of food assistance and security and will be able to provide further guidance as to the logistics

around areas of need, delivery, etc.

Once again, thank you for reaching out so proactively on this and your willingness to support this important effort.

-Randy -Erin

Subject: FEMA Region 10 Weekly Grocer Supply Chain Call - Food Bank Box Donation

Randy/Erin,

Following up from today's FEMA Region 10 call, there was a request for boxes to support the Washington Food Banks. Kroger and Fred Meyer are happy to help assist the local food banks with a solution for their needs.

We have plastic totes that are utilized for piece pick and smaller items that can be totes and sent to the stores. The stores unload the product and send the totes back to the DC. Over time they get worn and no longer are within the life cycle. They may have a crack in them or the tote lid won't close or you can't zip tie it, etc. We normally send these to a grind facility but we would be more than happy to donate these totes for use at our Food Banks.

We have a total of 60 pallets around 3000 totes. 2 truckloads. How would you like proceed on getting these to the food bank? If need be, we can transport these to a central location? Just let us know when and where and we can make this happen quickly.

Thank you,

Brandon McBurney

U.S. DEPARTMENT OF HOMELAND SECURITY
Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 26, 2020

FEMA Advisory

COVID-19 Federal Response Efforts Continue

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

Sixteen states and 4 tribes have issued full stay-at-home orders; in addition to eight states that have issued partial or localized orders, and one state that has issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to

support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Iowa, Louisiana, New York, North Carolina, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves. Many supplies have already arrived and additional supplies are en route to these designated areas. The U.S. Navy hospital ship Mercy is en route and expected to be operational by April 1 to support Los Angeles with additional hospital beds and medical staff. The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

FEMA Advisory: COVID-19 Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

April 14, 2020 at 6:28 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 14, 2020

Coronavirus (COVID-19) Pandemic:

Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA [issued a new policy](#) that addresses the purchase and distribution of food eligible for Public Assistance [funding under emergency and major disaster declarations for the COVID-19 pandemic](#).

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

Joint FEMA-CBP Statement on Export of Critical PPE

April 08, 2020 at 3:28 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the statement below from our partners in the Federal Emergency Management Agency (FEMA) and U.S. Customs and Border Protection (CBP) regarding a statement on the export of critical Personal Protective Equipment (PPE).

April 8, 2020

COVID-19 Update

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and U.S. Customs and Border Protection (CBP) are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported.

DHS_Announcement:_Important_Message_on_Essential_Financial_Services_Sector_Workers_-_From_
U.S._Treasury_Secretary_Mnuchin

March 22, 2020 at 7:13 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

On behalf of U.S. Treasury Secretary Mnuchin, please see an important message regarding financial service sector guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

A message from U.S. Treasury Deputy Assistant Secretary for Cybersecurity and Critical Infrastructure Protection David B. Lacquement:

Workers across the financial services sector play an important role in supporting the American people and our Nation's economy. Consistent with the need to ensure access for essential financial services workers, Secretary Mnuchin issued the attached memorandum. This memorandum points to guidelines from the President and the Department of Homeland Security, which provides guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

Everyone should follow guidance from the Centers for Disease Control and Prevention as well as State and local officials regarding strategies to limit disease spread. We are dedicated to working closely with all of you to ensure the safety of the workforce and ensure the continued operations of the financial services sector in support of our Nation's economy.

Thank you for your continued support.

Where: Conference Line (720) 279-0026 PIN 786305

Hi All – Sending on behalf of Travis Linares-Hengen, WAEMD Human Services Program Supervisor.

Please join us for a concept of operations briefing on a taskforce in development. Tentatively named the Washington Spectrum of Care (WASOC) Taskforce (taking nominations on alternate names) the taskforce aims to:

MISSION The WASOC Multi-Agency Taskforce provides a structure for enhanced

collaboration and communication between agencies and ESFs supporting the State's efforts to save and sustain lives impacted by COVID-19.

OBJECTIVES

- Provide consolidated information gathering and reporting on past, current, and future efforts.
- Provide subject matter expert technical assistance to working groups.
- Leverage resources and expertise in the delivery of care.
- Support strategic planning and establish priorities for the WASOC.
- Share best practices, lessons learned, and resources across workgroups, ESFs, and agencies.

A very rough draft of the conops is attached.

Thank you,

Lisa Davidson

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the update below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19.

April 9, 2020

CISA Update

Interim Guidance for Critical Infrastructure Workers Who May Have Had Exposure to COVID-19

Partners,

Please find below an important update from the Centers for Disease Control and Prevention (CDC) and the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19. These two important informational products include *Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19* and a quick reference of the Do's and Don'ts for employers and employees related to COVID-19 exposures.

While the [Interim Guidance](#) specifically calls attention to critical infrastructure workers serving in the specific capacities and functions, as below, the guidance can apply to all critical infrastructure workers with the exception of Healthcare Providers who are covered under [separate guidance](#).

- Federal, state, & local law enforcement
- 911 call center employees

- Fusion Center employees
- Hazardous material responders from the government and the private sector
- Janitorial staff and other custodial staff
- Workers – including contracted vendors – in food and agriculture, critical manufacturing, informational technology, transportation, energy and government facilities

Employers should implement the recommendations in the [Interim Guidance](#) for Businesses and Employers, to Plan and Respond to Coronavirus Disease 2019, to help prevent and slow the spread of COVID-19 in the workplace.

Please continue to monitor the CDC website for the most current medical [guidance](#).

Federal_Partners_Bring_Additional_Resources_to_US_for_COVID-19_Response

March 29, 2020 at 12:53 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 29, 2020

FEMA Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal

reimbursement, by FEMA for the states of California, New York and Washington, for states' use of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

Thanks â€” Mayor is likely not able to attend either. I will defer to others in attendance coordinating press w/ the Army if appropriate.

Please send Sierra and Lily you list of RSVPS by 9 pm this evening.

The initial arriving instructions will to park on the 2nd Floor of

CenturyLink Field Events Center parking garage located at 330S S Royal Brougham Way, Seattle, WA 98134. Please note that you are with the Elected Officials Tour. Proceed to the glass doors and staff will greet you. Please no staff or limited staff.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so we'll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Subject: Tour with Local,

State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials to do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available? Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that's easier.

Best,
Stephanie

Subject: RE: PA - Question on reimbursable costs

Hi Laura,

I got a response back regarding the staffing and materials costs for the meal distribution. Unfortunately, unless a jurisdiction has a legal responsibility to provide food under limited Category B measures, we consider these costs as ineligible. This includes the costs of the work being performed by title 32, DOC, or otherwise. Food banks are typically under the jurisdiction of certain Private Non-profits and a restocking of their food supply is not eligible. At the moment grocery stores are open with no shortage in food supply.

Please let me know if you have any questions.

Subject: PA - Question on reimbursable costs

Good morning Rebecca,

Question posed by the state re: reimbursable costs under emergency protective measures. Looking for guidance regarding corrections and national guard being utilized for assisting with food distribution. I've included the background in the email below for additional information. They will be putting together boxes of food and providing to food banks for further distribution into the community due to the increase from the shelter in place order.

Thanks,

Laura

Cc: Snell, Nona (OFM) ; Hesse, Regan (MIL) ; Goudreau, Laura
Subject: RE: Food bank box locations and supply order

Yes, I am in the loop on this.

As you and I discussed on Friday, this is a bit of a hybrid model. Traditionally, we would request counties to determine the need, resource internally, and then request state support as necessary. Regrettably, this model doesn't really work in food distribution without getting a checkerboard across the state. As WSDA runs the statewide program to county food banks, they are requesting a statewide solution. The congressional delegation unanimously supported this with a hard push on USDA to supply food.

I'm not certain we need a DOH or HCA approval of a necessary public health measure for food distribution; however, it is a good idea to ask FEMA their thoughts if this is an expense that can be cost shared as part of a federally declared disaster in response to COVID as a result of the "stay

home, stay safe” orders as well as previous social distancing measures.

Laura Goudreau is checking with Region X about how this fits in costs sharing models.

Sincerely,

Jim

Importance: High

Randy,

We are currently looking over these requests as we get guidance from our policy group. Before we can proceed we either the Health Care Authority or the Department of Health to determine that the mission of the food banks fill an immediate and pressing public health need. We will ask DOH to make this decision, although we will need you to clarify that all the food banks are either non-profit or local government entities. As I understand it, if the food banks that will be receiving the supplies are non-profit entities this may fall under that category of reimbursable expenses (75% Federal, 25% State), if this is determined to not be a reimbursable expense due to federal guidelines then OFM would need to make a determination as to whether or not the State wants to assume this expense.

Subject: RE: Box Needs for Food Security Request

Good Evening,

We are seeking to close the communication loop on the resource request submitted by the Governor's Office on 3/25 for 300,000 boxes. State Tracking number is WA-202032516598.

Earlier today, WSDA liaison to the Governor's Office Food Security Coordination Team, Katie Rains, contacted Todd Cunningham – Correctional Industries Asst. Director to verify drop site for this resource request. ESF 11 pushed forward confirmation to Operations Section that Correctional Industries may be able facilitate two drop locations. The following two locations for a 50/50 split of the 300,000 boxes were then provided to Operations Section. If one drop location remains a limiting factor for this resource request, the Seattle location is to be the single drop site.

Please advise if two drop sites can be met by Correctional Industries for this resource request and if Operations Section is need of additional information to supplement the existing 213RR.

West Side drop site:

815 S. 96th st.

Ken,

Thank you for talking with me this morning regarding the request for boxes to be made for WA Dept. of Agriculture to help with the state's food banks. I've attached a copy of Agriculture's request and CC'ed Erin Coyle one of the Emergency Managers with Dept. of Agriculture who initially made the request., she has also been helping navigate the needs, information, and communications with the foodbanks.

Below, is the e-mail chain between the Governor's office and the State EOC, containing the order we processed. Right, now I'm looking to close all the loops and make sure we can successfully complete the request. Feel free to ask Erin or I questions and we will do our best to help.

Subject: Box Needs for Food Security Request

Importance: High

Jim,

Do I have to put this through State EOC or may I simply email Secretary Sinclair to expedite?

Specs for boxes:

Of the box types they manufacture, the archive boxes with or without lids would work best.

[HYPERLINK "https://www.washingtonci.com/products-services/cardboard-boxes.html"](https://www.washingtonci.com/products-services/cardboard-boxes.html)
<https://www.washingtonci.com/products-services/cardboard-boxes.html>

NOTE: We need folding boxes that do NOT require tape to reduce future logistics issues. Recommend archive style boxes for this purpose.

Current request – 300,000 boxes for 2 week distribution period based on EOC request last week (request was for 250,000 for anticipated 3 week period – we’re adding a buffer). Demand will grow.

Jim,

As we discussed on the phone Pierce County has done a great deal of work in identifying three sites, working with community leaders to ensure a positive level of engagement and have real-estate lawyers working the negotiations with the sites. We are also working through the FEMA reimbursement guidelines. I would like to have the Pierce County lead be included in the workgroup you announced on the 7:00 am conference call.

Could you please provide the meeting information.

Thank you,

Amy

Subject: preferred sites for isolation centers

Good morning,

As the Unified Area Command and federal agencies move forward on isolation facilities as part of a broader alternate care site model, it is critical that we recognize the work already done at the local government level. Each of counties expressed concern about making sure any effort done at the state and federal level is well coordinated and supports . Please send your preferred isolation sites along with the level of coordination already completed so that the team working on this at the state level can work closely with you about securing facilities. From our perspective these are the site requirements we are looking at:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - Select rooms with individual ventilation system or a room with a non-recirculating air
 - If recirculation of air from isolations rooms to other rooms in unavoidable, HEPA filters

should be installed in the exhaust ducts.

- If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal
- Access and functional needs
- Space considerations for staff
 - PPE donning/doffing space or area.
 - Space for light nursing care
 - Administrative space for medical records processing
 - Areas or rooms for housing staff staying overnight with bathroom facilities.
 - Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support areas
- Mental health support areas

[EXTERNAL Email Notice!] External communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so weâ€™ll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available?
Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that’s easier.

Best,
Stephanie

CISA_releases_Version_3.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance

April 17, 2020 at 3:17 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the release of Version 3.0 of the Essential Critical Infrastructure Worker Guidance, found [here](#).

April 17, 2020

CISA Advisory

CISA releases Version 3.0 of the Essential Critical Infrastructure Worker Guidance

The Cybersecurity and Infrastructure Security Agency (CISA) has released [Version 3.0 of the Essential Critical Infrastructure Workers list](#). Version 3.0 provides clarity around a range of positions needed to support the critical infrastructure functions laid out in the original guidance and Version 2.0. This iteration includes a reorganization of the section around Healthcare and Public Health and more detail to clarify essential workers; emphasis for Emergency Medical Services workers; and adds lawyers and legal aid workers. Also included is language focused on sustained access and freedom of movement; a reference to the CDC guidance on safety for critical infrastructure workers; and a statement saying sick employees should avoid the workplace and the workforce. In worker categories, all references to “employees” or “contractors” have been changed to “workers.” Other additions include a reference to the USCG Marine Safety Information Bulletin on essential maritime workers; clarified language including vehicle manufacture; and many other small changes to clarify language.

CISA issued initial guidance on Essential Critical Infrastructure Workers on March 19, which was developed to help state, local, tribal, and territorial authorities as they decide who to allow freedom of movement in areas that are under restrictions such as shelter-in-place or quarantine. That initial guidance was developed with input from our government and industry partners, on the assumption that we would need to update the guidance as we received additional feedback from stakeholders.

CISA moved quickly to incorporate feedback to update the list of Essential Critical Infrastructure Workers to expand and specify additional categories of essential workers who are key to maintaining a community’s safety, public health, and economy. These changes

were included in Version 2.0 of this guidance, released March 28, generally represented minor clarifications or additions that did not shift the overall scoping of critical infrastructure activity as highlighted in the initial release. Specifically, clarity was provided around a range of supporting and enabling activity for infrastructure resilience – the commodity, services, and logistical supply chains of other infrastructure functions. This included more direct call outs for essential sanitation and hygiene production and services, as well as manufacturing of critical products.

The Guide continues to be a resource for state and local decision makers and is in no way a binding document. Ultimately, all final decisions rest with state and local authorities, who must use their own judgment to balance public health and safety with the need to maintain critical infrastructure.

The degree to which state and local orders have leveraged our guidance when defining essential workers is encouraging. A common national picture will ultimately benefit us all. We hope this updated Guide helps as your communities grapple with the impacts of COVID-19. Please direct any questions to CISA.CAT@cisa.dhs.gov.

FEMA Advisory: Coronavirus Pandemic: Additional \$100 million available to Firefighters

April 24, 2020 at 12:07 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY “ APRIL 24, 2020

Coronavirus Pandemic: Additional \$100 million available to Firefighters

Fire service organizations nationwide with membership on the front lines in the fight against the coronavirus (COVID-19) pandemic will soon be able to apply for a share of \$100 million in funding to purchase personal protective equipment and supplies. The funding is part of the Coronavirus Aid Relief and Economic Security (CARES) Act through FEMA Assistance for Firefighters Grant Program (AFGP).

FEMA will begin accepting applications for the Fiscal Year 2020 Assistance to Firefighters Grant - COVID-19 Supplemental Program (AFG-S) on Tuesday, April 28. The deadline for applications is May 15. AFG-S provides direct financial assistance to eligible fire departments, nonaffiliated emergency medical service organizations and state fire training academies. Those who would like to start planning their application before the application period can access the Notice of Funding Opportunity and technical assistance tools on the [FEMA website](#). The online AFG-S Grant Program application is available through the AFGP [FEMA Grants Outcomes \(GO\) application portal](#).

Contact Us

If you have questions about the technical assistance tools, e-mail the [AFG Grants Help Desk](#) or call at (866) 274-0960. The AFG Help Desk is open from 8 a.m. to 5 p.m. EDT, Monday “ Friday.

RE: Grocery supply chain FEMA call

March 14, 2020 at 10:12 PM EDT

To: Smith, Jaime (GOV)

Cc: Ezelle, Robert (MIL), Baumgart, Jim (GOV), Buchholz, Brian E. (ATG), Lang, Robert (MIL), Shagren, Karina L. (MIL), Foster, Sarah (MIL), Hennessee, Taylor (MIL), Allen, Tristan (COM), Richeson, Jonathan, Knutson, Charles (GOV), McClain, Stacey (MIL)

Jaime

Some comments about the grocery industry and supply chain might be a good inclusion for a future press event if there is one scheduled soon.

Is there any benefit to coordinate the message with FEMA or do something jointly as far as a press event?

The FEMA Regional Administrator, Mike O'Hare, is the designated Federal Coordinating Officer (FCO), not sure if there is any benefit to doing something with the feds or just keeping it to messaging from our state's executives.

We do have FEMA staff and the HHS rep working out of BLDG 20 working the Federal Coordination pieces with our State Coordinating Officer (SCO) and staff, so that happened immediately in part because we have a FEMA Integration Team that works fulltime out of our facility and they immediately transitioned from their normal work to COVID response – good news story there on the responsiveness of the federal government.

We've placed our first resources requests already with them:

- to receive an embedded CISA PSA (Protective Security Advisor) – to assist us in looking at infrastructure advance planning
- a National Incident Management Organization (NIMO) team to come in and conduct a complexity analysis of our incident management structure at the state level to help us identify what staffing gaps or process gaps we may have and make recommendations on how to improve our operations
- Federal Medical Stations (FMS) - some equipment is enroute – deployable healthcare facilities that provide us a medical surge capacity

Subject: Re: Grocery supply chain FEMA call

Do we want to consider a press event with the governor, grocers and providers? JIC issued a release today on this topic that is already being picked up and we're ready to get a drumbeat of "save some for your neighbors" going. I'm happy to make an ask to the gov office if this feels like an important enough ask and effective use of his time.

Jaime

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed.

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 16, 2020

April 16, 2020 at 10:58 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 16, 2020

SUMMARY

- Washington's governor says the state is 'not close' to restarting the economy; it will be a phased approach, and the stay-at-home order may extend beyond May 4.
- Alaska's governor issued a fifteenth health mandate, which eases restrictions on health care providers: doctors, naturopaths, acupuncturists, physical therapists, psychologists, veterinarians and others can resume services that require minimal PPE.
- Idaho Governor Brad Little extends stay-at-home order through April 30 while lifting restrictions on some businesses.
- In Oregon and Washington, COVID-19 patients receive experimental plasma from recovered donors.

Public Sentiment

- In reaction to headlines coming from the Washington governor's press conference, an increased number of people are resolved to defy stay-home orders—and call for businesses to do the same—if they extend beyond May 4th.
- Many Idahoans support the Governor's extension of the stay-at-home order. Some feel people that at essential businesses, people aren't following distancing guidelines. Some call for all business to resume as soon as possible.
- In Alaska, people are increasingly frustrated that some service providers and companies are now allowed to resume, but other businesses involving equal or lower risk of disease transmission are not.

Washington

Stay-at-Home

- Inslee: 'We're not close' to restarting the economy in Wash. State ([KOMO](#), [KEPR](#), [KIMA](#))
 - Inslee: Social distancing is working, but stay-at-home order may go past May 4 ([Q13](#))
 - Gov. Inslee says reopening of Washington's economy will be a 'phased approach' ([YakTriNews](#))
 - Gov. Inslee said the first things that shut down during his emergency declaration will likely

be the last to reopen under a phased-in reopening of Washington's economy. ([Seattle Times](#))

- In reaction, people continue to be very divided as to whether social distancing orders are essential or whether it is time to get back to work. An increasing number of people are calling for citizens to defy the social distancing orders, especially if they extend beyond May 4. Some express strong frustration at seeing others go about their business while they themselves stay home. Others blame the lack of urgency in restarting the economy on the fact that leaders and most tech workers still receive their salaries. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))
- Some politicians denounce government's COVID-19 response in Washington, Idaho. The police chief in Republic, Washington, has called Gov. Jay Inslee a "would-be dictator." A Spokane Valley lawmaker has asserted the new coronavirus is a "Chinese Communist Party bioweapon." And a Yakima city councilman has told constituents to ignore public health advice and return to work. ([Reflector](#), [The Daily Chronicle](#))
 - Some reactions to this news point out that there are areas of the state with very few or no cases, and call for more regional approaches to addressing the pandemic. ([Facebook](#))

Social Distancing

- Another sign the curve is bending: Positive coronavirus tests at UW peaked March 28 ([Seattle Times](#))
- Grocery workers and customers say social distancing inside stores is difficult amid coronavirus pandemic. During recent visits to several grocery stores, The Seattle Times witnessed customers going the wrong direction down one-way aisles, ignoring distancing stickers in checkout lines or brushing past other shoppers. Not all workers wore masks or gloves, even those serving unpackaged counter food. ([Seattle Times](#))
- In a step toward normalcy, two popular Seattle farmers markets — in the University District and Ballard — will reopen this weekend despite the coronavirus. Here's what's being done to protect people and what you need to know. U District, Ballard farmers markets will reopen this weekend despite coronavirus. ([Seattle Times](#)) In response, people are sharply divided as to whether this makes sense since farmers markets are outdoors, or whether this will expose people to unnecessary risks. ([Facebook](#))

Politicians

- "We need testing to be fast, free and everywhere," Sen. Patty Murray said during a press briefing with other Democratic senators on Wednesday, 12 weeks after a Snohomish County man was the first person in the United States to test positive for COVID-19. Sen. Murray and other Democrats push White House to make coronavirus testing available nationwide. ([Seattle Times](#))
- [Senator Maria Cantwell](#): Washington state is still facing a lack of COVID-19 testing kits and supplies - including PPE and testing swabs - needed to conduct adequate tests. I urged the Trump Administration to develop a national, real-time, public-facing inventory of COVID-19 diagnostic tests and results. We need this transparency to anticipate problems in the national testing supply chain and help the federal government address potential testing shortages. ([Senator Cantwell's website](#))

Medical Research

- Coronavirus destroys lungs. But doctors are finding its damage in kidneys, hearts and elsewhere. Clinicians around the world are seeing evidence that suggests the coronavirus is also causing heart inflammation, acute kidney disease, neurological malfunction, blood clots, intestinal damage and liver problems. ([Seattle Times](#))

Economy

- Relief fund for undocumented workers in Washington state sees big demand. If undocumented workers are not working — because they're sick, caring for someone who is ill, or laid off — they don't have many options to deal with the sudden loss of income. ([Yakima Herald](#)) While opinions are divided, most people reacting on Facebook are sympathetic to the workers and call for more support to be directed their way. ([Facebook](#))
- State orders Tacoma apartment complex to stop eviction notices. ([The News Tribune](#)) Even if they are not evicted, people continue to worry about credit damage and falling deeper in debt. ([Facebook](#))

Donations and Community Support

- Gates Foundation boosts funding for coronavirus response to \$250 million. ([Seattle Times](#), [KIRO 7](#))
- Relief fund for undocumented workers in Washington state sees big demand. If undocumented workers are not working — because they're sick, caring for someone who is ill, or laid off — they don't have many options to deal with the sudden loss of income. ([Yakima Herald](#)) While opinions are divided, most people reacting on Facebook are sympathetic to the workers and call for more support to be directed their way. ([Facebook](#))
- Hoping To Save The Postal Service, People Rush To Buy Stamps ([KUOW](#))

Prisoner release

Gov. Jay Inslee signed a new proclamation, which was accompanied by a commutation order to release some inmates early to stop the spread of the coronavirus among the prison population. ([KIRO 7](#))

- Many [do not agree with the move](#). Some think that inmates would be safer from coronavirus in prison. Others feel that releasing them into an economy with few job opportunities isn't going to help the situation.

Treatment

- First Seattle COVID patients treated with survivor plasma at Swedish. ([KIRO7](#))

Oregon

Business and Unemployment

- A Portland coffeehouse has used an SBA loan program to rehire its workforce. ([KOIN](#))
- Oregon's congressional delegation urges governor to waive waiting week for unemployment benefits. ([The Oregonian](#))
- Oregon's antiquated computers could cost laid-off workers more than \$100 million in benefits. ([KGW8](#))
- PDX, SEA to get \$264 million from federal CARES act to keep operations running. ([KATU2](#))

Flattening the Curve

- Oregonians bypass outdoor closures with 'creative parking' sparking COVID-19 concerns. ([Statesman Journal](#))
- Masks are still voluntary as other states increasingly require them to slow the pandemic. ([The Oregonian](#))
- Southern Oregon bar has license suspended for violating coronavirus executive order, officials say. Cave Junction's Sportsman Tavern is the first Oregon establishment to have its license suspended for allegedly defying Gov. Brown's executive order. ([KGW8](#))
- TriMet driver who installed shower curtain to protect himself from passengers told to remove it ([Oregonian](#))

Treatment

- Oregon nurse with coronavirus receives possible life-saving plasma donation ([Oregonian](#))

Testing

- OSU and Oregon lab team up to run thousands of COVID-19 tests. ([KATU2](#))

New Cases

- 3 more deaths, 33 new coronavirus cases. ([KGW8](#), [KPTV12](#), [The Oregonian](#))

Idaho

- Gov. Little extends stay-home order to April 30, with looser guidelines. ([Idaho News 6](#), [Idaho State Journal](#), [KIFI](#), [Idaho Statesman](#), [KEZI](#), [Times News](#)) He said some businesses that were not previously classified as essential, such as retailers, will be allowed to operate if they can offer curbside service.
 - The decision is welcomed even by those hurt by the move as their businesses remain closed. There is recognition for how this can have [a positive, long-term impact](#).
 - Many feel that [people weren't heeding the order](#) before the extension.
 - People ask for [physical distance enforcement at essential businesses](#) to help slow the spread of coronavirus.
 - Many agree with the order, with [some calls to open more businesses](#).

Donations

- Idaho farm gave away potatoes for free so they wouldn't go to waste. Cranney Farms in Oakley has thousands of potatoes they were expecting to sell. Instead of dumping them, they gave them away. ([KGW](#))
- Idaho Diaper Bank holds distribution event for families in need of diapers, other paper goods. ([KTVB](#)) Many [refer people they know to this article](#) in case they need it.

PPE

- Saint Alphonsus doctor partners with Boise company to print 3D masks for healthcare workers ([KTVB](#))

Healthcare Capacity

- Hospitals hurting: Local medical centers are not immune to financial hardships amid pandemic. ([Idaho State Journal](#))

Alaska

Updates from Governor Dunleavy

- In his Wednesday night briefing, the [governor issued a fifteenth health mandate](#), which eases restrictions on health care providers and procedures over the next 3 weeks. ([Anchorage Daily News](#), [Must Read Alaska](#)) Starting next week a long list of health care providers—including doctors, naturopaths, acupuncturists, physical therapists, psychologists, veterinarians and religious healers—can resume services that require minimal personal protective equipment. Restrictions on non-urgent medical procedures will be further relaxed in May.
 - In reaction, some wondered why other professions, such as barbers and retailers, cannot resume since high-exposure services provided by massage therapists and dentists are now permitted. ([example 1](#), [example 2](#))
- The governor expects more restrictions to be relaxed—such as those on retail stores and state fisheries—if Alaska continues to limit the spread of COVID-19. His goal is to “reopen the life we’re used to and the life we want to get back to.” ([Anchorage Daily News](#))
 - Debate continues between those who advocate for reopening the economy and letting people make their own choices about taking personal risks, versus those who say it is too soon to do so.
 - One comment claimed that FEMA seized a test order intended for Anchorage Providence hospital on Wednesday. ([Facebook](#))

Social Distancing Orders

- The Sitka Assembly has passed a controversial ordinance that would quarantine incoming seasonal workers. Sitka has no COVID-19 cases to date. ([KCAW](#))
- Anchorage medical leaders endorse mayor’s ‘hunker down’ order and ask the public to stay the course. ([Anchorage Daily News](#))
 - Reaction is split between those who applaud the mayor's decision and those who want the right to go back to work. One person who owns a dog grooming business expressed frustration that Petco is still allowed to operate and provide grooming services. ([Facebook](#))

New Cases

- More than 100 people have recovered from COVID-19 in Alaska, as case tally rises to 293. ([KTUU](#), [Anchorage Daily News](#)) Many people credit the social distancing with slowing the spread, and urge people to continue to stay home. Others are saying that there must be a better way; one that doesn't have such a harsh economic and psychological toll. ([Facebook](#))
- Kodiak Island has its first case of coronavirus. ([Alaska Public Media](#), [KMXT](#))
- Fairbanks goes three days without a new COVID case. ([Daily News-Miner](#)) Alaska's Chief Medical Officer praised the borough for early detection, contact tracing and isolation of its 79 positive cases.

Economy

- Senators Dan Sullivan and Lisa Murkowski are hosting a virtual Small Business Town Hall with local Alaskan leaders to discuss challenges facing small business and CARES Act relief opportunities. ([@SenDanSullivan](#))

National Guard

- Anchorage’s request for National Guard help with homeless camps is rejected. ([Anchorage Daily News](#)) Most [people on Facebook agree](#) that cleaning up the camps is not a job for the National

Guard.

Law Enforcement

- Woman arrested, charged with terroristic threatening in the second degree, after coughing on people and claiming she has coronavirus. ([KTUU](#))

LATEST COVID-19 UPDATES & RESOURCES: <https://coronavirus.wa.gov/>

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 15, 2020

SUMMARY

- The spread of COVID-19 is slowing much faster than expected in Washington, but 'We can't let up our guard' says the Washington State Health Officer.
- Oregon Governor Kate Brown has five key metrics that will help determine when the state can reopen.
- Gas prices are down and liquor sales are up in Oregon as public habits are altered by stay-at-home orders.
- Idaho Governor Brad Little will make an announcement today as his stay-at-home order is set to expire.
- Anchorage plans to extend a "hunker down" order until May 5.
- Princess Cruises and Holland America cancel Alaska operations for 2020 season.

Public Sentiment

- Oregonians would like more details about the Governor's plans and indicators for what it will take to ease current restrictions.
- In Idaho, the public weigh economic fears and whether the disease will surge if stay-home order is lifted.
- With the news that two major cruise lines have canceled their 2020 Alaska routes, local destinations worry about the economic impacts.
- The theme that government restrictions infringe upon rights continues, counterbalanced by a willingness from others to make sacrifices to slow the spread of the virus.
- There are mixed reactions to news that the US will be cutting funding for the WHO. While most feel the organization should have been more transparent, there is also a desire to continue to engage international health experts.

Washington

Testing

- Everett COVID-19 drive-in testing site to demobilize after losing federal funding. ([KOMO](#)) The reaction to this news is mostly negative, with many blaming the governor and wondering how this correlates to his statements that Washington needs to ramp up testing. ([Facebook](#))

Social Distancing

- Coronavirus: Distancing efforts must remain in place to prevent rebound in cases, report says ([KIRO 7](#))
 - Most people are saying in response that the stay-at-home order should not be extended

beyond May 4th. Reasons given are that the goal of flattening the curve was achieved, that people will violate the order anyway, and that the challenges of continuing to be homebound are too much. Others call to extend the order, or say to leave it up to the experts to decide. ([Facebook](#))

- Spread of Covid-19 is slowing much faster than expected in Washington, but 'We can't let up our guard' says the Washington State Health Officer. ([KUOW](#))
- Far-right U.S. politicians label lockdowns anti-constitutional. Matt Shea says stay-at-home order 'creeping into martial law territory.' ([The Columbian](#))
- Tri-Citians protesting ban against recreational fishing. ([KEPR](#)) Many [people on Facebook](#) agree that fishing should be a protected right, and that it is safer than many other permitted activities.
- Visiting even 'just one friend' puts everyone at higher risk for coronavirus. University of Washington researchers studied what can happen if someone forgoes social distancing and visits just one friend, and the result can be a major problem. ([KING 5](#), [The Olympian](#)) Some on [Facebook](#) are calling these messages 'fear mongering' and say it is not working anymore. Some point out that visiting a friend is safer than visiting a pot shop or grocery store—both permitted activities.

Elected Officials

- Trump directs halt to payments to WHO during virus pandemic. President Donald Trump said Tuesday that he was cutting off U.S. payments to the World Health Organization during the coronavirus pandemic, saying the organization of failing to do enough to stop the virus from spreading when it first surfaced in China. ([Seattle Times](#))
- Rep. McMorris Rodgers sides with decision to investigate World Health Organization. ([KXLY](#))
- Rep. Derek Kilmer of Washington, chairman of the New Democrat Coalition, will soon release legislation proposing an automatic stabilizer for the popular Paycheck Protection Program, which provides loans to small businesses that will be fully forgiven if the companies keep a majority of their employees on the payroll. ([Roll Call](#))

PPE

- General Motors and Ventec to deliver first batch of ventilators ahead of schedule ([NBC](#))

Food Security

- Seattle is giving \$800 in grocery vouchers to 1,000 recently-displaced workers. ([KIRO7](#))
- Washington National Guard and Northwest Harvest team up to fill emergency food boxes. ([KING5](#))
- Farmers are throwing out food that could go to food banks. American Farm Bureau and Feeding America want to change that ([YakTriNews](#))

Hispanic Impact

- In the cases where ethnicity is known, 24 percent of people infected are Hispanic, but people of Hispanic heritage only makeup 13 percent of Washington's total population. ([KIMA](#))

Tribal

- Suquamish members can request rental relief online. ([Facebook](#))

Business and Economy

- Spokane is working on 10-month grace period for renters, mortgage holders impacted by COVID-19 ([KHQ](#))
- \$35,000 donation will aid Spokane community college students impacted by the pandemic. ([The Spokesman-Review](#))

Oregon

Updates from Governor Brown

- Gov. Brown gave guidance on how COVID-19 restrictions will be eased. ([KGW8](#), [KPTV12](#))
 - The five key metrics that will inform the state's decisions are slowed infection rates, adequate PPE, capacity to conduct testing, ability to conduct contact tracing, and having an effective program for isolation/quarantine of the ill. ([KVAL13](#))
 - In reaction, people are asking for more details and speculating about what will or should happen next. Some call for a regional, county-by-county approach, and many ask that Oregon not tag along with Washington and California's decisions. ([example 1](#), [example 2](#), [example 3](#))

Business and Economy

- S. Oregon bar defied coronavirus order to serve drinks, authorities say; now, its license is suspended. ([The Oregonian](#)) Some on [Facebook](#) say this is a fair consequence; others say it is government overreach.
- Portland announces city employee furloughs, pay raise freeze, mayor salary cut amid coronavirus pandemic. All non-union Portland city employees must take 10 days of unpaid leave by October, raises will be temporarily halted and Mayor Ted Wheeler will go without a salary for the rest of the year, the city announced Tuesday. ([Oregonian](#))
- Oregon liquor stores sold at 'record level' in March, OLCC says. ([KDRV12](#), [Oregonian](#))
- Gas prices keep dropping as coronavirus brings low demand for fuel. ([KATU](#))

New Cases

- 2 more people die from coronavirus in Oregon and 49 new cases are reported. ([KGW8](#), [KATU 2](#))
- Health care leaders launch campaign 'Be Prepared: Take Control'. ([KOIN](#))

Social Distancing

- Coastal residents ask out-of-towners to stay home. ([KOIN6](#))
- Hikers asked to get off Pacific Crest Trail to help stop COVID-19 spread. ([FOX12](#))

Idaho

Stay-at-home order

- Top Idaho house Republicans tell Gov. Little to hand over control of coronavirus response to local officials. ([Boise State Public Radio](#)) "Let's continue informing our citizens about the health risks and then, to the greatest degree possible, let them govern themselves," the house leader wrote. Reactions are [generally dismayed](#).
- Idaho's Republican party chairman says the decision to reopen Idaho must be based on economy, too — not just COVID-19 models. ([Idaho Statesman](#)) Many responses [disagree with the representative's opinion](#), but others agree that the economy may be hurting more than it should.

Sanitation

- Nampa company cleans first responder vehicles for free. They can clean vehicles in two hours. Their marketing staff has joined the effort to "keep them busy." ([KIVI](#))

Blood donations

- Gov. Little donates blood in light of nationwide shortage ([KIVI](#))

New cases

- Woman dies from coronavirus at Boise skilled care facility; 14 others also likely positive. ([Idaho News](#)) Public reaction asks people to take care when going to the facility to help keep healthcare workers safe. Others suggest the timing of this news will lead to extending the stay-at-home order. Others ask why there isn't more reporting on people who have recovered from COVID-19. ([Facebook](#))

Economy

- Senator Mike Crapo (R-Idaho) joined a letter led by U.S. Senator Jim Risch (R-Idaho) to call for dairy farmer assistance. ([Senator Crapo website](#))
- Cranney Farms in West Oakley is offering free potatoes due to the impacts to the supply chain as they would otherwise be discarded. ([Facebook](#))
- Gas prices in Coeur d'Alene have been falling in Idaho to their lowest levels in years. ([Coeur d'Alene Press](#))

Alaska

Economy

- Princess Cruises and Holland America cancel Alaska operations for 2020 season. ([Daily News-Miner](#), [Anchorage Daily News](#), [Alaska Public Media](#), [KTOO](#)) Alaska's Travel Industry Association President and CEO calls the news "[devastating](#)" for hundreds of businesses and communities that rely on tourism revenue.
 - Response from people on Facebook is mostly sadness, and worry over the impact on Alaska's economy, workers. ([example 1](#), [example 2](#))

Unemployment

- Alaska begins paying \$600-per-week federal boost in unemployment benefits. ([Anchorage Daily News](#)) In reaction, some people are frustrated that unemployment benefits are greater than the income of many essential workers. ([Facebook](#))

Anchorage 'Hunker Down' Order

- Anchorage Mayor announces he will extend 'hunker down' order to May 5. ([Anchorage Daily News](#)) The Anchorage Assembly extended the mayors emergency declaration powers through June 5.
 - [In reaction](#), many people believe that the extension is difficult but necessary to stop the pandemic. Others express frustration and say their jobs or businesses will not recover from this shut down.

Governor's Health Mandates

- Governor Dunleavy announced he will rescind a temporary ban on elective medical procedures as the first step in his plan to restart Alaska's economy; also announced he will lift the ban on restaurants selling to-go alcohol. ([Anchorage Daily News](#), [KTVA](#))
 - The governor said he will work with communities and industry leaders on decisions, and reiterated that the economy won't be put ahead of Alaskans' health. ([KTVA](#))
 - In response, residents continue to debate the health mandates; some saying that citizens can conduct business and stay safe at the same time, others saying continued observance of social distance mandates is crucial. ([Facebook](#))
- Health experts warn that lifting health mandates could lead to virus 'rebound'. ([Juneau Empire](#))

Alternative Care Site

- Alaska Airlines Center turning into a COVID-19 care facility. ([KTUU](#), [KTVA](#)) Some people are calling this a waste of money, saying it could have been done cheaper or will not be used. One person blamed FEMA for the high cost of the site, and one other compared it to the CenturyLink site in Seattle. Other people say the site is necessary. ([Facebook](#))

[Gov Jay Inslee]

March 16, 2020

Public and constituent inquiries | 360.902.4111

Press inquiries | 360.902.4136

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

Inslee declared a state of emergency<<https://lnks.gd/1/eyJhbGciOiJIUzI1NiJ9.eyJidWxsZXRpbl9saW5rX2lkIjoxMDEsInVyaSI6ImJwMjpbGljayIsImJ1bGxldGluX2lkIjoiaWMDAzM>> in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

10:30 AM - Press conference on COVID-19

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. To receive the call-in information please RSVP here<<https://lnks.gd/l/eyJhbGciOiJIUzI1NiJ9.eyJidWxsZXRpbl9saW5rX2lkIjoxMDIsInVyaSI6ImJwMjpbGljayIsImJ1bGxldGluX2lkIjoimjAyMDAzMTYuMTBz>>. Call-in information will be distributed by 9:45 a.m.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

Live video will also be available through the King County
livestream <<https://lnks.gd//eyJhbGciOiJIUzI1NiJ9.eyJidWxsZXRpb19saW5rX2lkIjoxMDMsInVyaSI6ImJwMjpbGjJyIsImJ1bGxldGluX2lkIjoIMjAyMDAzMTU0bUUr-4G7SZyX28ir22cJujlZ8sqAVP9coJLrznIlg/br/76163007488-l-> page and

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_21

April 21, 2020 at 1:28 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 21, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million

surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

DOH-AreaCommand

Tasking: Isolation and Quarantine

March 29, 2020 at 9:44 PM EDT

To: DOH-OSC2 (DOH)

Cc: DOH-IC2 (DOH), DOH-PSC2 (DOH), Davis, Jerrod (DOH), seoc84 (MIL), McClung, Timothy (DOH), Linares-Hengen, Travis (MIL), Davidson, Lisa, Goudreau, Laura, Rice, Toby, Baumgart, Jim (GOV)

Matt,

I know I'm jumping the structure but I also know that Shawn had to leave early today and I want to get this out tonight.

Bottom Line Up Front: We need to connect the Tumwater I&Q effort to the broader statewide I&Q work that is being developed at the SEOC. Can you reach out to the group of military department and FEMA colleagues copied on this email (the multi-agency WA Spectrum of Care Taskforce (WASOC)) to begin looking at I&Q more comprehensively?

Timeline: Please make contact with this group and schedule an initial meeting by COB 3/30/2020.

Background: Over the course of the COVID-19 event, we have built structures for Isolation and Quarantine (I&Q) within the Department of Health (DOH) structure. Simultaneously, the Emergency Management Division, other state agencies (Healthcare Authority, Department of Social and Health Services, and Others have done considerable work to plan for larger scale isolation facilities. In this, there is even some agreement that hotels could be used as an option and that we could license these facilities as medical respite centers, allowing providers to bill Medicaid for services provided.

If you have any questions or feedback for how I can better communicate this type of thing, please let me know.

Respectfully,

Nate

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so weâ€™ll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Good afternoon, all, and thanks very much for your assistance.

Congresswoman Jayapal is free all morning, but I know several other members of the WA delegation are eager to participate as well but I know at least Reps. Larsen and Heck have conflicts in the late morning. If you have flexibility and can arrange for one tour in the 9-10:30 am window, I know their teams would appreciate it.

Best,
Gautam

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell â€” I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available? Potentially from 10:45 -11:30 and 11:30 â€” 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if thatâ€™s easier.

Best,
Stephanie

Thanks â€” Mayor is likely not able to attend either. I will defer to others in attendance coordinating press w/ the Army if appropriate.

Please send Sierra and Lily you list of RSVPS by 9 pm this evening.

The initial arriving instructions will to park on the 2nd Floor of CenturyLink Field Events Center parking garage located at 330S S Royal Brougham Way, Seattle, WA 98134. Please note that you are with the Elected Officials Tour. Proceed to the glass doors and staff will greet you. Please no staff or limited staff.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am

- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so weâ€™ll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Subject: Tour with Local,
State and Federal
Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could

make two tour options available? Potentially from 10:45 -11:30 and 11:30 -12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that's easier.

Best,
Stephanie

FEMA Stakeholder Advisory: Federal Partners Bring Additional Resources to US for COVID-19 Response

March 29, 2020 at 12:37 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 29, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA for the states of California, New York and Washington, for states’ use

of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132,000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Subject: RE: Question about Q and I team in Shoreline

There's nothing out of the normal going on in Shoreline. I checked in with my IC there and I followed up with his Ops folks.

Our operations are following basic duty epi protocols (think 24/7 Duty Officer but for Communicable Diseases), they've had, in typical fashion, a couple of folks that need some sort of isolation. But they connect them to the appropriate counties for follow-up.

An issue that they're experiencing is not in regards to I&Q only, but in the broad sense of not having SA of what is going on in other counties to help their on-call staff connect people to resources more effectively.

The long short is there is no I&Q going on in Shoreline DOH ops

FEMA

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding stabilize the supply chain in response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Supply Chain Stabilization

The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and enable domestic production of critical resources to increase supply long-term.

The **preservation** line of effort focuses on providing federal guidance to responders and the non-medical sector public service (police, fire, EMT), energy distribution and the food industry on how to preserve supplies when they reduce impact on the medical supply chain.

The **acceleration** line of effort provides direct results to help meet the demand for personal protective equipment through the industry to allow responders to get supplies they need as fast as possible.

The **expansion** line of effort is charged with generating capacity with both traditional and non-traditional means such as adding machinery or by re-tooling assembly lines to produce new products.

The **allocation** of supplies facilitates the distribution of critically needed PPE to "hot spots" for immediate resupply. Distributors report on supplies and can request assistance when they experience a shortage.

The Supply Chain Task Force is working with the major commercial distributors to facilitate the rapid distribution of resources in short supply to locations where they are needed most. This partnership enables FEMA and its federal partners to take a whole-of-America approach to combatting COVID-19. The task force is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. The distributors have agreed to focus portions of their distributions on these areas in order to alleviate the suffering of American people.

A key example of this partnership in action is Project Airbridge. The airbridge was created to reduce the time it takes for U.S. medical supply distributors to receive PPE and other critical supplies into the country for their respective customers. FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks

Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations. Per agreement with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical need. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide. FEMA determines hotspot areas based on CDC data.

Working together, we can efficiently distribute these vital resources to hospitals, nursing homes, long-term care facilities, pre-hospital medical services, state and local governments, and other facilities critical to caring for the American people during this pandemic.

FEMA Advisory: Joint FEMA-CBP Statement on Export of Critical PPE

April 08, 2020 at 3:09 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 8, 2020

Coronavirus (COVID-19) Pandemic

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and CBP are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported

FEMA Advisory: COVID-19 Pandemic: Mass Casualty Management Best Practices

April 14, 2020 at 6:20 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 14, 2020

Coronavirus (COVID-19) Pandemic: Mass Casualty Management Best Practices

As countries around the world battle the coronavirus disease (COVID-19) pandemic responders, medical professionals, public health professionals and others are managing thousands of fatalities per day. Due to the population of our country, the U.S. anticipates managing significant numbers of fatalities. Our country has experienced mass casualty events in Hurricanes Maria, Sandy, and Katrina, and after the September 11th attacks. Each of these were localized that resulted in up to 3,000 deaths.

The Fact Sheet identified key findings as they relate to ongoing COVID-19 operations across the country. These are potential best practices that are provided for consideration and do not constitute and should not be considered as guidance in any way.

Hello Casey,

Thanks for reaching out regarding our staff-level congressional call for Tuesday. I've been a bit slow getting out the invitation while I nail down a solid conference line.

I do expect to send out the agenda and invitation today, so great timing! Please let me know if you or Morgan would like to make opening remarks and I'll place you on the agenda.

Thanks so much,

Cam Rossie

Ryan:

Adding you back, as I see you may have been inadvertently left off the below message.

Either Morgan Wilson or I will be available to join this call from the Governor's Office. Can you confirm if it's still on for 11am (pacific?) on Tues? And any call-in information we should have.

Casey

Hey Nancy.
Hope all is well and yesterdayâ€™s SBA question is resolved.

Next Tue at 11:00 (planned time) weâ€™re hosting a Congressional Briefing for the WA delegation. From the feds, weâ€™ll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). Weâ€™d like to also include WA EMD (Dir Ezelle) and, if appropriate, the Govâ€™s office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but I've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.

- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
 - We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>
- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

Rains, Katie (AGR)

FEMA Food Resources for Food Banks in WA

April 01, 2020 at 1:17 PM EDT

To: Shearer, Eugene, Austin, JT (GOV)

Hi Gene,

Thanks again for reaching out today.Â

JT and I are working closely together to monitor hunger, needs and the nonprofit food banks and food pantries that low income and food insecure families rely on.Â

As of November 2019, there were 851,000 people in need of food assistance from food banks.Â Based on enrollment in food programs like SNAP, WIC, Child nutrition, senior nutrition, and the newly unemployed in WA, we estimate that number has surged to 1.5 million people and may grow up to a peak or 2-2.5 million people.Â

Food banks in most communities are seeing a huge uptick in client visits, and are working as hard as they can to dramatically change their distribution model and procure unprecedented levels of shelf stable food.Â The Governor's Food Security Coordination Team has brought together state agency partners as well as the 3 largest NGOs and we're working to develop wholesale and bulk procurement systems for the state as quickly as possible to ensure that the hunger relief network doesn't dry up on food starting 4/10.Â

How can FEMA help us by directing shelf stable foods into the network that we're developing to augment and relieve some of the burden on these nonprofit organizations?

Thank you!

Katie Rains

Cc: Temple, Jeffery P, Hoffmann, Matt R, Potter, Thomas A, Coine, Jerad I, Allen, Tristan (COM), Holt, Brett, Hennessee, Taylor (MIL), Austin, JT (GOV), Sandison, Derek (AGR), Eads, Kim (AGR), Rains, Katie (AGR), Capper, Patrick (AGR), Ferrante, Jason (AGR), Sheffels, Evan (AGR), Coyle, Erin (AGR)

Hi Brandon,

Thanks so much for reaching out and for your extremely generous offer. I am including on this email members of the Food Security Coordination Team which is co-chaired by JT Austin with the Governor's Office and Katie Rains with WA Dept. of Agriculture Food Assistance Program. The WSDA Food Assistance Program is managed by Kim Eads, who I have also included on this email for her awareness. The Food Security Coordination Team is coordinating donation of goods and services related to the support of food assistance and security and will be able to provide further guidance as to the logistics around areas of need, delivery, etc.

Once again, thank you for reaching out so proactively on this and your willingness to support this important effort.

Subject: FEMA Region 10 Weekly Grocer Supply Chain Call - Food Bank Box Donation

Randy/Erin,

Following up from today's FEMA Region 10 call, there was a request for boxes to support the Washington Food Banks. Kroger and Fred Meyer are happy to help assist the local food banks with a solution for their needs.

We have plastic totes that are utilized for piece pick and smaller items that can be totes and sent to the stores. The stores unload the product and send the totes back to the DC. Over time they get worn and no longer are within the life cycle. They may have a crack in them or the tote lid won't close or you can't zip tie it, etc. We normally send these to a grind facility but we would be more than happy to donate these totes for use at our Food Banks.

We have a total of 60 pallets around 3000 totes. 2 truckloads. How would you like proceed on getting these to the food bank? If need be, we can transport these to a central location? Just let us know when and where and we can make this happen quickly.

Thank you,

Brandon McBurney

Senior Supply Chain Manager Chehalis

Re: Press Conference Tomorrow at 1:30 pm

March 28, 2020 at 1:17 AM EDT

To: Formas, Stephanie

Cc: Ike, Ryan, Tara Lee, bruce.k.anderson.civ@mail.mil, Powell, Brent C SFC USARMY 76 ORC (USA), Karina L. Shagren, Munoz, Andrew S CIV USARMY CENWS (USA), Ward, Erin, Fryer, Alex, Pearson, Dave, Simon Vila, Garza, Jeff, Derrick, Anthony, Apreza, Ernesto

Hi all,

Here is the WebEx link to include in the advisory:

<https://stateofwashington.webex.com/stateofwashington/onstage/g.php?MTID=ec0d68604c42d99978b3f447d6b238b8b>

There is also a phone number. However, we have not been accepting questions from people who call in vs. join from the WebEx event. We cannot tell who they are if they call in and don't have an account.

Number for tomorrow:

+1-408-418-9388

Access code: 263 676 232

To make sure the WebEx system runs smoothly, we put some language in our advisory about the process. I've included a sample and highlighted the elements directly related to the WebEx experience.

Saturday, March 28

1:30 PM - Press Conference To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

****NOTICE: To prevent the spread of COVID-19, we are implementing a new remote access system. We strongly request that media participate through that system.**

Registering for the event:

Register here:

<https://stateofwashington.webex.com/stateofwashington/onstage/g.php?MTID=ec0d68604c42d99978b3f447d6b238b8b>

Please provide: Name, E-mail address, phone number, news organization.

The conference will start at 1:30 PM.

Press, please join the call at 1:15 PM. We will run through procedure and test the system to ensure we can answer your questions without technical issues.

Q&A instructions:

If you would like to ask a question, you must log in to the teleconference via WebEx. We will not be taking questions via phone.

If you would like to ask a question, please RSVP. Email: (INERST EMAIL ADDRESS HERE) Please include your name, news organization and if you want to ask a question.

Question order:

We will prioritize

- (The Olympia press corps)
- Local and national press who join through WebEx

We will control muting from our system. **You do not need to mute yourself.**

When we call on you, announce your name and news organization. Please do not ask if we can hear you. If your question is for a specific person, please include that information, as well.

For ideal audio and video quality [download](#) the Webex Meetings Application.

Thank you for your flexibility as we transition temporarily to this remote system. We will continue to refine the process moving forward to make it as seamless as possible.

If you are unable to join through WebEx, you may listen in via phone:

+1-408-418-9388

Access code: 263 676 232

We have done a few things to make Q&A smoother.

- 1) Require press to RSVP and let us know they want to ask a question
- 2) Require press to use the WebEx app vs a call in number if they want to ask a question
- 3) Create a question order before the event starts

I am happy to work with your team on moderation. If you follow these steps, I'd ask that you manage the RSVPs and question order.

I'll be onsite at 12:15 tomorrow with a tech rep to setup the WebEx Room Kit.

Thanks all,

Sam Holman
Digital Media Manager
Office of Governor Inslee

sam.holman@gov.wa.gov

On Mar 27, 2020, at 9:31 PM, Formas, Stephanie <Stephanie.Formas@seattle.gov> wrote:

Thanks all – Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. I'll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photos.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.
- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) â€” Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via WebEx [LINK].

TBD will serve as the print pool and TBD will serve as the TV pool.

Hi all – Thanks for everyone’s help to get the release out earlier. I wanted to loop back on logistics for tomorrow’s press conference.

Time

- Press Conference: 1:30 pm at the CenturyLink Event Center, 800 Occidental Ave S. in Seattle, WA

Attendees/Speakers

- Governor Jay Inslee
- King County Executive Dow Constantine
- Seattle Mayor Jenny Durkan
- FEMA Region 10 Administrator Mike O’Hare
- TBD Army
- Q&A

Advisory

- See below. We will send at 9:00 am on Saturday, March 28

On Site:

- Podium/Flags will be provided by the City.
- DOD – Let us know if there may be any supplies that may be able to be moved on site.

Pool: City will organize a pool

- Print Pool (ST/AP)
- Still photog (ST)
- TV Pool (Will work with News Directors)
- Seattle Channel (to cross post w/ TVW)

Technology

- WebEx: City and Governor’s Office are connecting to provide Q&A for reporters not in the pool

Key Messages

- Important Resources for Our Hospitals – Partnership to make this a reality
- Staffed with Army doctors and nurses for Non-COVID-19 with ER, X-Ray, and other medical uses
- Construction will begin soon + Seattle may see additional US Army personnel in the area

Staff:

- MO: Anthony Derrick: 260-247-2741
- Stephanie: 206-247-0475

FEMA ADVISORY – April 14, 2020

Coronavirus (COVID-19) Pandemic: Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are [executing a four-pronged approach](#) to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation.**

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19

response, please review the attached fact sheet.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 23, 2020 PM

SUMMARY

- Oregon Governor Kate Brown has issued a stay-at-home order, with anyone violating the order facing a class C misdemeanor. Businesses are working to adjust their operations to comply.
- Washington Governor Jay Inslee will be making a statement tonight at 5:30 p.m. as reported COVID-19 cases have now climbed to over 2,000 in Washington.
- Idaho Governor Brad Little made a statement this afternoon extending the state tax deadline to June 15.
- The Alaska Legislature is considering a bill to delay foreclosures and evictions and stop utilities from being disconnected.

Public Sentiment

- While the stay-at-home order brings relief to many Oregonians, many ask for greater clarity on just what businesses can stay open or not. There is much worry over how this will impact people's ability to pay their bills.
- Mentions of FEMA recently have focused on the rumor control page – the page is mostly welcome, but has been met with skepticism by others.
- There is interest in economic injury loans for small businesses from SBA in Idaho, though some feel that loans aren't going to help the situation.

Washington

- Gov. Jay Inslee plans to give a statewide address at 5:30 tonight on the ongoing coronavirus outbreak, which continues to spread in Washington state. ([FOX Q13](#), [KING 5](#))

New Cases and Fatalities

- Coronavirus cases are now over 2,000 in Washington. There are now 110 deaths in the Evergreen State. ([KOMO](#))
- A least 32 people have tested positive for COVID-19 in Yakima County. Many are relatively young. ([KIMA](#))
- Ferndale School District says service provider tests positive for coronavirus. The service provider was in Ferndale school buildings on a "semi-regular" basis. ([Bellingham Herald](#))
- More than 30 residents and staff have tested positive for COVID-19 at Shuksan Healthcare Center in Bellingham. Officials say the facility is prepared to prevent an outbreak as devastating as the one at Kirkland's Life Care Center, which has been cited by federal inspectors for "immediate jeopardy." ([KNKX](#))

Rumor Control

- Rumor Control: FEMA creates page busting coronavirus myths. ([KHQ](#), [FOX 28](#), [FOX 41](#), [KISS 98.1](#))

- KHQ Local News also shared their article about FEMA's page on [Facebook](#), where comments

say not to trust the media ([example 1](#), [example 2](#)) or politicians ([example 3](#)) and also reference numerous conspiracy theories including FEMA camps ([example 4](#)) and that COVID-19 is a Chinese biological agent ([example 5](#)).

- One person expressed they are “sad” that FEMA needs to provide this ([example 6](#)), while another calls out KHQ and other local media for their responsibility to help control these rumors by monitoring these comment sections and removing "ignorant" and "dangerous" comments ([example 7](#))

Closures

- Boeing plans to temporarily suspend production operations at its Puget Sound facilities due to the coronavirus outbreak in Washington state. ([KING 5](#))
- Capital Mall in west Olympia will close because of coronavirus ([The Olympian](#))
- Several retailers at Walla Walla Town Center have instituted two-week closures to help prevent the spread of the COVID-19 coronavirus. ([Walla Walla Union Bulletin](#))

Medicine

- Military field hospitals heading to New York City and Seattle this week to fight coronavirus ([Washington Times](#)). “My aim is to get the (field hospitals) out this week,” Secretary of Defense Mark Esper told reporters at the Pentagon. He said Seattle and New York City seem to be the most likely spots to send the military field hospitals but ultimately, the decision is up to FEMA. “We just need FEMA to validate that,” Mr. Esper said.
- Malaria drugs' promise for coronavirus spurs hope, shortages ([KIMA](#))
- The Seattle Flu Study has officially partnered with [Public Health - Seattle & King County](#) to launch the greater Seattle Coronavirus Assessment Network—or SCAN for short. ([Seattle and King County Public Health Blog](#)).

Testing and Mitigation

- Lacey now has a drive-thru coronavirus testing site. ([KING 5](#))
- “Everyone needs to act as if they have the virus right now. So, test or no test, we need you to understand you could be spreading it to someone else. Or you could be getting it from someone else. Stay at home,” Surgeon General Dr. Jerome Adams said. ([KING 5](#))
- King County jails reducing inmates, prioritizing space for violent offenders to curb COVID-19 ([Bothell-Kenmore Reporter](#))

PPE

- A Mukilteo furniture factory has stepped up to make surgical masks and face shields for Providence health care workers on the front lines of the coronavirus pandemic. The medical provider had asked the public to help produce protective equipment due to a global shortage of protective gear. ([KUOW](#), [The Evergrey](#))

Business

- When confronting a shortage of hand sanitizer, Puget Sound Naval Shipyard decided to take it in-house. Containers of shipyard-produced sanitizer are now on turnstiles and headed to piers. ([Kitsap Sun](#))
- Seattle distilleries, such as Letterpress and Batch 206, are part of the group effort ([Seattle Eater](#))

Community Response

- The Thurston County COVID-19 Community Response Fund is now accepting requests from Thurston County residents who are being severely affected by the economic impacts of the COVID-19 virus. ([Thurston Talk](#))
- Vancouver-area school district offers free childcare for kids of first responders ([FOX 12](#))
- Grays Harbor Public Health has opened a call center to help residents of Grays Harbor get answers to questions they may have about COVID-19. ([Greys Harbor Talk](#))

Oregon

Government Response

- Gov. Brown has issued a stay at home order that is more strict than earlier guidance, in part a response to an increase of visitors to popular Oregon coastal and mountain destinations. ([KGW 8](#), [OPB](#), [KOIN](#), [KATU 2](#), [KPTV 12](#)). She is also posting information with the theme *Stay Home, Save Lives*. ([Twitter](#), [Instagram](#), [Facebook](#))
- While many are grateful for the measure, many feel that the guidance is unclear. ([example 1](#),

[example 2\)](#)

- People are concerned about what this means for employers and their businesses and the larger economic impacts. ([example 1](#), [example 2](#), [example 3](#))

- National Guard says it will not impose state lockdowns ([KTVL](#))

New Cases

- 30 new COVID-19 cases confirmed by OHA, total now 191 in Oregon ([FOX 12](#))
- Clatsop County reports first coronavirus case ([The Astorian](#))

Business

- Tips For Buying Groceries During Pandemic: Keep Your Distance, Don't Hoard ([OPB](#))
- Oregon businesses continue to adjust based on COVID-19 safe-guarding measures. ([The Oregonian](#), [The Bulletin](#))
- Fred Meyer announces appreciation bonus and insurance for workers during COVID-19 outbreak. Frontline grocery, supply chain, manufacturing and customer service associates will receive a one-time bonus ([KREM](#))

PPE

- 3 M CEO: Our medical masks should not be showing up in stores. Hospitals nationwide are facing an acute shortage of PPE (personal protective equipment) such as N95 masks, gloves and surgical gowns amid the coronavirus pandemic. ([KDRV NewsWatch 12](#))
- Oregon Gas Station Owners Want Gov. Kate Brown to OK Self-Service Gas. Organized Labor Does Not. ([Willamette Week](#))

Government Workforce Adjustment

- As Multnomah County officials work to slow the spread of COVID-19, county employees outside of the medical, public health, and first responder departments are being asked to volunteer at emergency homeless shelters. Some employees say they're happy to help. But others are finding it difficult to weigh their public duty with their desire to protect their own health, and that of their families. They're also worried about what workplace repercussions they will face if they decline. ([Portland Mercury](#))

Alaska

- Joint Base Elmendorf-Richardson declares emergency after seven test positive for COVID-19 ([Alaska Public Media](#))

Community Impact

- Anchorage is rushing to open a new emergency shelter to try and curb the spread of the coronavirus among the homeless. Individuals are being moved away from facilities downtown and into new accommodations officials believe will better protect public health. ([Alaska Public Media](#))
- [Alaska Health and Social Services](#): As confusing and alarming as the news about COVID-19 can be for adults, can you imagine how it must feel to children?...Read more on [Alaska's Play Every Day blog](#) and on the [CDC website](#).

Donations

- General Communication Inc. (GCI) says until May 31, 2020, it's offering free internet service or upgrades to Alaskans being affected by the coronavirus. ([KTUU](#))

Government

- Sen. Lisa Murkowski says at least 19 Alaskans are stuck in Peru, a country that according to the [U.S. Embassy](#), has closed all international travel due to the COVID-19 crisis. Sen. Murkowski says it is important for travelers or their families to register with the State Department [Smart Travelers Enrollment Program](#) in order for officials to help bring them home. ([KTVA](#))
- Alaska Democrats cancel in-person primary voting, extend mail-in deadline. Originally, ballots were to be postmarked by Tuesday. The party now says they must be received in Anchorage no later than April 10 to be counted. ([Anchorage Daily News](#))
- Local governments, clinics, and tribal organizations signed onto a letter Monday urging Gov. Mike Dunleavy to order the closure of non-essential businesses in Interior Alaska, including Fairbanks and the surrounding villages, and to "issue a strong urgency to Interior residents to stay at home." ([Daily News-Miner](#))
- Alaska State House of Representatives considers bill to delay foreclosures and evictions. The bill introduced by Ivy Sponholz would also prevent the disconnection of utilities during the

coronavirus pandemic. ([KINY](#))

Idaho

- Gov. Little announces Idaho tax filing extension, updates measures to handle COVID-19. ([KMVT](#))
- Following Idaho Gov. Brad Little's request, the SBA is offering low-interest federal disaster loans for working capital to Idaho small businesses suffering substantial economic injury as a result of the 2019 novel coronavirus (COVID-19). ([Bonner County Daily Bee Facebook](#), [Daily Fly Facebook](#))
- There are at least 65 people confirmed to have COVID-19 statewide. ([CBS 2](#))
- Pocatello US District Courthouse to close two weeks after positive COVID-19 test. ([KIDK 3](#))
- I'm an ER doctor in Ketchum, and I have coronavirus. Here's how we beat this. ([Idaho Statesman](#))

FEMA_Stakeholder_Advisory:_State-Managed,_Federally-Supported_COVID-19_Response_Continues

March 24, 2020 at 12:13 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 24, 2020

FEMA Advisory

State-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

RE: Food Security Coordination Team conf call tomorrow

April 01, 2020 at 7:44 PM EDT

To: Austin, JT (GOV)

This document helps show the strategy (if you haven't seen it, apologies for any duplication). Given that, in this current environment there may be unique needs and unique solutions that need to be pursued as the pandemic unfolds.

<https://nationalmasscarestrategy.org>

Let me know if that's along the lines of what you're hoping for, or if there are specific things that have come up I can make sure to address.

Hi JT,

Sure thing, will gather some materials that might be relevant to share and give a quick overview. It will be good to be able to re-emphasize the roll of the state EOC in fielding and validating local requests, since we're supporting them.

I may need to defer some questions if I don't have the answer, but I will try to gauge the audience and can definitely commit to finding the correct answer for you or the group if I don't have it tomorrow.

US-Canada_Joint_Initiative:_Temporary_Restriction_of_Travelers_Crossing_the_US-Canada_Land_Border_for_Non-Essential_Purposes

March 20, 2020 at 1:17 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

US-Canada Joint Initiative: Temporary Restriction of Travelers Crossing the US-Canada Land Border for Non-Essential Purposes

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars in trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people to exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries. These supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

FEMA Advisory

Coronavirus (COVID-19) Pandemic: HHS Letter to Hospital Administrators

To follow-up on his letter from March 29, 2020, Secretary Azar just sent the attached letter and Frequently Asked Questions (FAQ) to hospital administrators across the country. Today's letter underscores the importance of data-sharing and highlights that hospitals are key partners with the Federal Government as we work to ensure that the Whole of America response to COVID-19. The data requested included daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.

The FAQ attachment to the letter details the federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information. Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them. These FAQs will be updated if additional data delivery methods become available.

It remains critical that all requested information listed in the FAQ is provided daily to the federal government to facilitate planning, monitoring, and resource allocation in response to COVID-19.

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 14, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- HHS announced five new contracts for ventilator production rated under the Defense Production Act (DPA), to General Electric, Hill-Rom, Medtronic, ResMed, and Vyaire, as well as two other contracts for ventilator production, to Hamilton and Zoll.
 - In total, combined with contracts with [General Motors](#) and [Philips](#) rated under the DPA issued last week, HHS has finalized contracts to supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
 - The seven new ventilator contracts announced by HHS this month will provide a total of 137,431 ventilators by the end of 2020.
 - The thousands of ventilators delivered to the Strategic National Stockpile starting this month, continuing through the spring and summer, will provide more capacity to respond to the pandemic as it evolves.
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.

- Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
- On **April 13**, The Department of Homeland Security and FEMA announced the funding notice for an additional \$100 million in supplemental Emergency Management Performance Grant Program funds.
 - The money is available to all 56 states and territories as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. All applications must be submitted on [Grants.gov](https://www.grants.gov) by April 28.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.
- FEMA [issued guidance](#) on the framework, policy details and requirements for determining the eligibility for FEMA reimbursement of states purchasing and distributing food to meet the immediate needs of those who do not have access to food as a result of COVID-19 and to protect the public from the spread of the virus.
 - State, local, tribal, and territorial governments with the legal responsibility for protecting life, public health and safety are eligible applicants under emergency and major disaster declarations for the COVID-19 pandemic.
 - Applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the pandemic.

Hello Casey,

Thanks for reaching out regarding our staff-level congressional call for Tuesday. I've been a bit slow getting out the invitation while I nail down a solid conference line.

I do expect to send out the agenda and invitation today, so great timing! Please let me know if you or Morgan would like to make opening remarks and I'll place you on the agenda.

Thanks so much,

Cam Rossie

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Ryan Ike

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but we've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

1. [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
2. If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
3. In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
4. SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
 - We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>
5. Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd
District Director
Seattle District Office
U.S. Small Business Administration

FEMA-IGA

FEMA Advisory: Coronavirus (COVID-19) Pandemic Supply Chain Stabilization (April 8, 2020)

April 08, 2020 at 8:09 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 8, 2020

Coronavirus (COVID-19) Pandemic Supply Chain Stabilization

The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective and lifesaving resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a four-prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and expand domestic production of critical resources to increase supply long-term.

The **preservation** line of effort focuses on providing federal guidance to responders and the non-medical sector, such as public service (police, fire, EMT), energy distribution and the food industry on how to preserve supplies when possible, to reduce impact on the medical supply chain.

The **acceleration** line of effort provides direct results to help meet the demand for personal protective equipment PPE through the industry to allow responders to get supplies they need as fast as possible.

The **expansion** line of effort is charged with generating capacity with both traditional and non-traditional manufacturers, such as adding machinery or by re-tooling assembly lines to produce new products.

The **allocation** of supplies facilitates the distribution of critically needed PPE to "hot spots" for immediate resupply. States report on supplies and can request assistance when they experience a shortage.

The Supply Chain Task Force is working with the major commercial distributors to facilitate the rapid distribution of critical resources in short supply to locations where they are needed most. This partnership enables FEMA

and its federal partners to take a whole-of-America approach to combatting COVID-19. The task force is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. The distributors have agreed to focus portions of their distributions on these areas in order to alleviate the suffering of the American people.

A key example of this partnership in action is Project Airbridge. The airbridge was created to reduce the time it takes for U.S. medical supply distributors to receive PPE and other critical supplies into the country for their respective customers. FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.

Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations. Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide. HHS and FEMA determine hotspot areas based on CDC data.

Working together, we can efficiently distribute these vital resources to hospitals, nursing homes, long-term care facilities, pre-hospital medical services, state and local governments, and other facilities critical to caring for the American people during this pandemic.

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_6

April 06, 2020 at 4:41 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 6, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; Hydroxychloroquine/Chloroquine; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The latest updates and information on how to protect yourself and what to do if you think you are sick are available at www.coronavirus.gov.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
 - Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.
 - Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
 - The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
 - As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
 - The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
- The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
 - Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19

- patients.
 - The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
 - 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and 300 additional ventilators to New Jersey.
- Forty states, four territories and 23 tribes have issued stay at home orders.

FEMA Advisory: Coronavirus (COVID-19) Pandemic Daily Briefing Points (April 1, 2020)

April 01, 2020 at 7:47 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 1, 2020

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the All-of-America response to coronavirus (COVID-19) pandemic.

These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people is our top priority.
- On March 31, the president extended the nation's Slow the Spread campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut (50) and Louisiana (150).
- Thirty states and 12 tribes have issued stay at home orders.

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_8,_2020

April 08, 2020 at 5:47 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 8, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is

loaded.

- **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
 - Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
 - This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

CISA_releases_Version_2.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance_originally_published_on_March_19,_2020

March 28, 2020 at 6:01 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding an update to the Essential Critical Infrastructure Worker Guidance, found [here](#).

March 28, 2020

CISA Advisory

CISA releases Version 2.0 of the Essential Critical Infrastructure Worker Guidance originally published on March 19, 2020

As the Nation comes together to slow the spread of COVID-19, on March 16th the President issued updated Coronavirus Guidance for America that highlighted the importance of the critical infrastructure workforce.

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's authorities to secure critical infrastructure. Consistent with these authorities, CISA has developed, in collaboration with other federal agencies, State and local governments, and the private sector, an "Essential Critical Infrastructure Workforce" advisory list. This list is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. Decisions informed by this list should also take into consideration additional public health considerations based on the specific COVID-19-related concerns of particular jurisdictions.

This list is advisory in nature. It is not, nor should it be considered, a federal directive or standard. Additionally, this advisory list is not intended to be the exclusive list of critical infrastructure sectors, workers, and functions that should continue during the COVID-19 response across all jurisdictions.

Individual jurisdictions should add or subtract essential workforce categories based on their own requirements and discretion.

The advisory list identifies workers who conduct a range of operations and services that are typically essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing operational functions, among others. It also includes workers who support crucial supply chains and enable functions for critical infrastructure. The industries they support represent, but are not limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

State, local, tribal, and territorial governments are responsible for implementing and executing response activities, including decisions about access and reentry, in their communities, while the Federal Government is in a supporting role. Officials should use their own judgment in issuing implementation directives and guidance. Similarly, while adhering to relevant public health guidance, critical infrastructure owners and operators are expected to use their own judgement on issues of the prioritization of business processes and workforce allocation to best ensure continuity of the essential goods and services they support. All decisions should appropriately balance public safety, the health and safety of the workforce, and the continued delivery of essential critical infrastructure services and functions. While this advisory list is meant to help public officials and employers identify essential work functions, it allows for the reality that some workers engaged in activity determined to be essential may be unable to perform those functions because of health-related concerns.

CISA will continue to work with our partners in the critical infrastructure community to update this advisory list if necessary as the Nation's response to COVID-19 evolves. You can find the attached guidance as well as other COVID related information at cisa.gov.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

U.S. DEPARTMENT OF HOMELAND SECURITY
Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 26, 2020

FEMA Advisory

COVID-19 Federal Response Efforts Continue

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

Sixteen states and 4 tribes have issued full stay-at-home orders; in addition to eight states that have issued partial or localized orders, and one state that has issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to

support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Iowa, Louisiana, New York, North Carolina, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves. Many supplies have already arrived and additional supplies are en route to these designated areas. The U.S. Navy hospital ship Mercy is en route and expected to be operational by April 1 to support Los Angeles with additional hospital beds and medical staff. The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

[EXTERNAL Email Notice!] External communication is important to us. Be cautious of phishing attempts. Do not click or open suspicious links or attachments.

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so weâ€™ll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available? Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that's easier.

Best,
Stephanie

FEMA Advisory: COVID-19 Daily Briefing Points (April 24, 2020)

April 24, 2020 at 1:46 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 24, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 22**, HHS launched [Telehealth.hhs.gov](https://telehealth.hhs.gov). The site is a central source of information on telehealth resources and tools for patients and providers.
 - In his blog post "[Health Providers: Join the Telehealth Revolution](#)," the Surgeon General of the United States, Vice Admiral Jerome M. Adams M.D., M.P.H., outlines the benefits of using telemedicine tools.
 - Working from the safety of home, these tools allow clinicians to perform virtual visits, refill and adjust essential medications, and modify treatments that will preserve and improve conditions that if left untreated, put patients at risk.

- As of **April 23**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 105 million surgical masks, 6.7 million face shields, 14.9 million surgical gowns, 747 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.9 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

April 23, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- In order to help Americans, return to work, the federal government will distribute cloth facial coverings for critical infrastructure workers who do not need medical-grade personal protective equipment (PPE) for their daily work.
 - The facial coverings will be delivered in a phased approach for infrastructure workers, first responders and food producers. Prioritization will also be to areas with the highest COVID-19 infection rates.

- Distribution will be based on the Cybersecurity and Infrastructure Security Agency's analysis of priority infrastructure sectors and will include food production and distribution, energy, water and wastewater treatment, essential transportation and logistics, first responders, communications, hazardous materials management, manufacturing of medical supplies, and sanitation and disinfection supplies.
 - The first phase includes distribution of more than 19 million facial coverings.
 - HHS anticipates production of 6.5 million facial coverings each week for the next month.
- As of **April 22**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 96.9 million surgical masks, 6.6 million face shields, 13.8 million surgical gowns, 727 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.69 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 6, 2020

SUMMARY

- Gov. Jay Inslee announced on Sunday that Washington will return more than 400 ventilators to the SNS inventory to help states facing higher numbers of COVID-19 cases.
- Boeing indefinitely extends production shutdown at Washington plants due to coronavirus.
- Alaska's largest rural airline carrier plans to end all service and file for Chapter 11 bankruptcy.
- Health officials in Oregon and Idaho shared optimism that the infection rate may be slowing, the curve flattening.
- Idaho and Washington are working on plans to guide medical decisions in worst-case scenario.

Public Sentiment

- Many Washingtonians praise the governor's decision to return ventilators back to the SNS in order to help states in more dire situations. Some take this announcement as confirmation that the curve is flattening in their state.
- In Oregon and Idaho, excitement over the news that the curve is flattening is tempered by worry that not enough people are being tested.
- In Alaska, Ravn Air's bankruptcy announcement fuels complaints that small businesses are in crisis and the state's economic relief measure were not enough.

Washington

Governor Inslee – ventilators and the federal response

- Governor's office [press release](#): We're in this together – Washington state to send ventilators. ([KOMO](#), [KIRO](#))
 - [Gov. Inslee](#): "Every state in America is united in the fight to save the lives of our people. Though our mission is the same, our needs are different. Today, Washington is returning 400 ventilators so states like New York and others can have them. [#WeGotThisWA](#) [#StayHomeStayHealthy](#)" ([@GovInslee](#))
 - On [KIRO 7's Facebook post](#), many comments praise the governor's decision and are happy to see states helping each other out. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#), [example 8](#))
 - Some take this as good news that the curve is beginning to flatten in Washington. ([example 1](#), [example 2](#))
 - Some worry about Washington not having enough ventilators when the state hits its peak and wonder if the state needs to be looking out for itself more. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#))

- One person feels that since New York got "the ship," Washington should keep these ventilators - referring to the fact that the USNS Comfort was sent to be a field hospital in New York, while the USNS Mercy was sent to Los Angeles over Seattle. ([example](#))
- Inslee: 'Ludicrous that we do not have a national effort' against coronavirus. ([KING 5](#), [KREM](#), [KXLY](#)) There is agreement from many that [governors should band](#) together to pick up where the federal government will not. The counterargument is that [too much federal control is a bad thing](#).
- Wash. state's rising virus infection rate a 'cause for concern,' Inslee says. ([KOMO](#))

Business and Economy

- Boeing indefinitely extends production shutdown at Washington state plants due to coronavirus. ([Seattle Times](#))
 - Many comments on the [Seattle Times Facebook post](#) are from Boeing employees and their family members who express sadness and frustration. Evidently the news came via email and many employees don't have access to their work equipment or email right now. Many comments say they found out on Facebook or through the news. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#), [example 8](#), [example 9](#), [example 10](#))

Disability Integration

- As state settles on guidelines about who would get care in worst-case scenario, disability advocates raise flags ([The Spokesman Review](#)) A popular response points out that this is why [it's important that people heed stay-at-home orders](#). Another points out that the emphasis should be on [who has the best chances of survival](#). The conversation overall is highly charged with domestic and international politics. ([example 1](#), [example 2](#), [example 3](#))

Testing

- Yakima Health District opens new drive-thru testing site ([KIMA Action News](#), [Yakima Herald-Republic](#))

PPE

- Seattle manufacturer answers the call to make personal protective equipment. GM Nameplate has answered Gov. Inslee's call, even before he made it, to make face shields for healthcare workers on the frontlines of the coronavirus fight. ([KING 5](#))
- Boy Scouts, volunteers making thousands of face masks to donate to local hospitals ([PPE](#))

Community Impact

- King County allowing online protection orders for domestic abuse amid coronavirus crisis. The governor's Stay Home, Stay Healthy order may not be safe for survivors of abuse. King County has launched a new online tool to request protection orders. ([KING 5](#))
- Seattle's Chinese American community is here to help fight the coronavirus: 'We are all together' ([Seattle Times](#))

Oregon

Flattening the Curve

- Oregon health officials are hoping the numbers here are on the downward trend. Models continue to project that the situation appears to be leveling out to some extent. ([KOIN](#))
 - People remain concerned that the low numbers are influenced by low testing, and that Oregon only tests people who need hospitalization or are over a certain age. ([example 1](#), [example 2](#))
- Oregon health officials express cautious optimism about state's readiness for coronavirus surge. ([East Oregonian](#))

PPE

- COVID-19 spread slowing but PPE still desperately needed in Oregon. ([FOX 12](#))

Business

- More closures, cancellations along the Oregon and Washington coasts. ([Beach Connection](#))
- Oregon gun shops not on the list of businesses that must close. ([Willamette Week](#))

New Cases

- 1 new death as known cases pass 1,000. ([KGW8](#), [KATU2](#), [KOIN](#), [KPTV12](#), [The Oregonian](#))

Testing

- Jackson County's coronavirus test rate tops the state, among highest per capita in country. ([The](#)

[Oregonian](#))

Community Support

- City of Gresham checks in on seniors, vulnerable residents. ([KGW8](#))

Idaho

Healthcare Capacity

- More than 380 people have signed up for temporary Idaho nursing licenses to fight COVID-19. ([KTVB](#))
- Idaho is working on a plan to guide medical decisions in worst-case scenario; to possibly ration COVID-19 medical care. ([Idaho Statesman](#))
 - In response, several people reacted to the timeline, wondering why the plan would not be reviewed until [later this month](#). While some people [explained why the plan was needed](#), a few comments worried about 'death panels' ([example 1](#), [example 2](#)) and one calls the news "[chilling](#)."

Stay-at-Home Order

- Mountain Home mayor apologizes for the frustration that led him to say he would shut the city down. ([KTVB](#)) Concerned that people are not staying home, many people said he shouldn't apologize. ([example 1](#), [example 2](#), [example 3](#))

Flattening the Curve

Coronavirus update: For third day in a row, Idaho reports decline in new COVID-19 cases ([Idaho Statesman](#)) In response, people are skeptical, indicating that if there were more testing, the numbers would be higher. ([example 1](#), [example 2](#), [example 3](#))

Humanity

- In response to a KTVB report on Saturday of [a pregnant mother of six with COVID-19](#) has resulted in an outpouring of [donations of food and gifts left at the family's doorstep](#). The public response to this story is overwhelmingly positive.
- Good news: Stories that warmed our hearts this week ([KTVB](#))

Alaska

Economy

- Ravn Air, Alaska's largest rural carrier, plans to end all service, layoff all staff, and file for Chapter 11 bankruptcy. ([KTVE](#), [KTOO](#))
 - People are [very sad to see this happen](#), and [hope service returns](#) after the pandemic.
 - Many people expressed [concern for the survival of all small businesses](#), and comment that state's plan to offer [loans is not the answer](#).
- Bethel restaurant owners consider closing down, returning to Korea. ([Alaska Public Media](#)) Limited to delivery and takeout, restaurants report that their sales are a fraction of what they are normally.

PPE

- Alaskans making thousands of homemade masks for healthcare providers ([KTUU](#))

State Response

- Alaska's chief medical officer earns praise for coronavirus leadership. ([KTVA](#), [Anchorage Daily News](#)) This coverage in traditional media echoes what many people have been saying on social for weeks. ([example 1](#), [example 2](#))
- Coronavirus concerns lead to Anchorage playground closures. ([KTUU](#))

Community Support

- Wasilla Pizzeria delivering free pizzas and burgers to healthcare workers, community invited pitch in. ([KTUU](#))

FEMA_and_Our_Partners_Continue_to_Support_State-Managed_Coronavirus_Response

March 27, 2020 at 12:15 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of

California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

Department of Homeland Security _Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

March 13, 2020 at 4:14 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a [Notice of Arrival Restrictions](#) outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best

practices.

“While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.,” said Acting Secretary Wolf. “To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them.”

Wolf continued: “I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities.”

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th [presidential proclamation](#) which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

For further information, please visit [Coronavirus.gov](#) or [DHS.gov/Coronavirus](#).

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 25, 2020 PM

SUMMARY

- Idaho has reached 100 coronavirus cases, and Governor Little issued a Stay-at-Home order to limit movement around the state to essential activity.
- The Bill & Melinda Gates Foundation will spend \$3.7 million on Seattle-area coronavirus response, and Starbucks will give free coffee to first responders, healthcare workers nationwide.
- Gov. Brown requests open enrollment through Healthcare.gov amid coronavirus pandemic and urges Oregonians to report employers not enforcing social distancing guidelines.
- Port of Seattle suspends 2020 Alaska cruise season indefinitely.

Public Sentiment

- Following Idaho Governor Little's Stay-at-Home mandate, Idahoans are concerned about the economic impacts and how to cover their expenses; many feel they are already doing what it requires.
- Seattleites are grateful that Bill & Melinda Gates Foundation \$3.7 million donation will be for local coronavirus response efforts, and many hope to receive help in their communities.
- Some support the Port of Seattle's decision to suspend the 2020 Alaska cruise season, while others are concerned that this will devastate Alaskan workers and tourism.
- Oregonians are pleased with Governor Brown's calls for transparency and directive that OHA disclose more detailed numbers on the COVID-19 response.

Washington

FEMA

- Washington state lawmakers plead with FEMA for more medical personnel and equipment. ([News Tribune](#))
 - [Rep. Adam Smith](#): "Washington state is overwhelmed by the exponential growth of COVID-19 hospitalizations we need additional beds, federal medical personnel, and equipment. Proud to write with the entire Washington state congressional delegation to FEMA [urging them to support](#) our health care system to meet the needs of our communities."
 - Only one comment on [Rep. Adam Smith](#)'s Facebook post mentions FEMA directly by citing numbers from President Trump regarding PPE gear and N95 masks that FEMA is providing ([example](#)).
- [Congresswoman Suzan DelBene](#) shared FEMA's [How to Help](#) page saying "If you or your company are interested in donating supplies or volunteering during this pandemic, check out [FEMA Federal Emergency Management Agency](#)'s page with information on how you can best help."

✂ [Malheur County Sheriff's Office](#) shared FEMA's [Coronavirus Rumor Control](#) page.

Donations

- ✂ How Bill & Melinda Gates Foundation will spend \$3.7 million on Seattle-area coronavirus response. "By supporting local community response efforts, we can help make sure that, in this moment of crisis, we're not leaving the most vulnerable behind." Melinda Gates on funding efforts that help people affected by the novel coronavirus pandemic in the greater Seattle area. ([Seattle Times](#))
 - Comments on the [Seattle Times Facebook page](#) are largely grateful for this action, and some people call out their specific counties -- including Yakima ([example 1](#)) and Whatcom County ([example 2](#))-- where they would love to see this help.
- ✂ Starbucks giving free coffee to first responders, healthcare workers nationwide. ([KING 5](#))
 - Many comments on the [KING 5 Facebook page](#) mention other groups that they wish they were included like day care workers ([example 1](#)), child care providers ([example 2](#)), transportation workers ([example 3](#)), truck drivers ([example 4](#)), janitors ([example 5](#)), pharmacy staff ([example 6](#)), grocery workers and gas station attendants ([example 7](#)). Several people are frustrated by the other comments and say that people should be happy for a good deed from Starbucks instead of listing all the ways they could be doing more ([example 1](#), [example 2](#), [example 3](#), [example 4](#))

Stay-at-Home

- ✂ Immediately after Gov. Jay Inslee announced his "stay at home" order Monday night, Mason County 911 dispatchers started to field calls about confusion over the governor's order. ([Spokesman-Review](#))
- ✂ In coronavirus closures, Washington state pot and liquor stores can stay open; sales have spiked for a while. ([Seattle Times](#), [KING 5](#), [KIRO 7](#)) On the Seattle Times Facebook post, some commenters marvel how these industries could be deemed "essential" ([example 1](#), [example 2](#)).
- ✂ Bottles of booze can be delivered in Washington state under temporary coronavirus rule. ([The News Tribune](#))

New Cases and Fatalities

- ✂ As Boeing shuts down, an employee's family is left to grieve. For 27 years, Elton Washington worked for Boeing. On Sunday, he died after contracting the new coronavirus. To his family, Washington was much more than a statistic in the growing COVID-19 pandemic. ([Herald Net](#))
- ✂ Amazon employees test positive for coronavirus at 6 US warehouses. The U.S. coronavirus outbreak has spread to at least six Amazon warehouses, infecting workers racing to deliver massive volumes of packages. ([FOX Q13](#))

Health

- ✂ Virus knocks thousands of health workers out of action in Europe. Extraordinary numbers of health workers are catching the coronavirus and getting sick and the thinning ranks of doctors and nurses, particularly in Spain, are hampering the ability to fight the epidemic. ([Seattle Times](#)) Comments on the Seattle Times Facebook page are concerned about the same thing happening in the U.S. ([example 1](#), [example 2](#))
- ✂ Sneeze guards: coming to a Safeway, Walmart, Target and Fred Meyer near you. ([FOX Q13](#))
- ✂ Data-driven former admiral heads state COVID-19 response. Retired Admiral Raquel Bono, named recently by Gov. Jay Inslee as the state director for COVID-19 response, told reporters Tuesday she's still gathering some of that data in her first week on the job. ([Spokesman-Review](#))

Economic Impact

- ✂ The Senate has struck a \$2 trillion deal on the coronavirus stimulus. Here's what's in it. ([Vox](#), [KIRO 7](#))
- ✂ Seattle giving \$5 million in grocery vouchers to help families impacted by coronavirus. ([KIRO 7](#))
- ✂ Annual Skagit Valley Tulip Festival canceled amid coronavirus outbreak. The cancellation will be a significant economic and emotional blow to the Skagit Valley area, both in lost tourism dollars and lost revenue for the fields themselves. ([KOMO](#))

Oregon

- Gov. Brown requests open enrollment through Healthcare.gov amid coronavirus pandemic ([KATU2](#)), while urging residents to report employers who are not enforcing social distancing guidelines. ([@OregonGovBrown](#))
- During a media call Wednesday, Gov. Brown criticized federal COVID-19 relief efforts "C citing its failure to provide companies that want to make respirator masks and ventilators with a guarantee of liability protection," and saying lives are at stake ([KOIN](#), [KPTV12](#), [OPB](#)). She has directed OHA to disclose more detailed numbers ([@Oregonian](#)), resulting in positive feedback from the public ([@Oregonian](#))

Business

- Businesses continue to adjust operations in response to COVID-19, with various types of aid available ([Oregon Business](#), [The Oregonian](#), [JPR](#), [KVAL13](#)). The travel and hospitality industry has been particularly hard hit ([NYT](#), [Oregon Business](#), [Malheur Enterprise](#), [@PDXBIZJournal](#))

New Cases

- Portland postal worker tests positive for coronavirus ([KGW8](#), [KATU2](#)).

Donations

- The Castle Rock Bakery & Espresso held a sale on Tuesday allowing customers to pay whatever they could, "even nothing," for the 278 loaves of white bread staff baked over 10 hours on Monday. ([The Daily News](#))
- Walden announces emergency funds for Oregon community health centers ([KTVZ](#))

Idaho

Stay-at-Home

- Governor Little has issued an executive order for Idahoans to stay at home and limit movement around the state to essential activity. Pharmacies, grocery stores, restaurants with curbside pick-up and delivery can remain open (among other businesses). The order is in place for the next 21 days. ([KIVI](#), [Moscow-Pullman News](#), [Lewiston Tribune](#), [Idaho State Journal](#), [KTVB](#))
 - People are concerned about the economic impacts and how to cover their expenses. ([example 1](#), [example 2](#), [example 3](#))
 - Many feel that they have already been doing this. ([example 1](#), [example 2](#), [example 3](#))

New Cases

- Coronavirus update: Idaho hits 100 cases, has protective equipment needs. Idaho's 100th case of confirmed coronavirus came out of Kootenai County on Wednesday afternoon. The latest case was the ninth confirmed case in that county. ([Idaho Statesman](#), [Coeur D'Alene Press](#))

Donations

- Oak On Main provided free meals during the Feeding Our Friends community dinner Tuesday in Pullman. The restaurant organized the event as a way to help the community during the COVID-19 coronavirus outbreak. ([Moscow-Pullman News](#))
- Twin Falls company helps employees with childcare amid the COVID-19 pandemic. ([KMTV](#))
- Keeping renters in affordable housing is going to be crucial. City of Boise leads by example by forgiving rent for the month of April for people in city-owned affordable housing. ([Idaho Statesman](#))

Alaska

New Cases

- Fairbanks hospital employee tests positive for COVID-19 ([Daily News-Miner](#))

Government

- Legislature Passes Unemployment Benefits. The bill allows immediate relief for those who lost employment income due to the coronavirus emergency. ([Your Alaska Link](#), [Alaska Public Media](#), [KTVA](#))
- Congressman Don Young Leads House Colleagues on Effort to Strengthen Medical Supply Chain and Streamline COVID-19 Vaccine Development. ([donyoung.house.gov](#))
 - The Congressman received negative feedback stating leadership in combatting the pandemic

is too late and contradicts previous statements. (

- [example 1](#), [example 2](#))

Movement Restrictions

- Villages across Alaska are closing to outsiders and limiting the movements of villagers, as the call to limit travel statewide grows. ([Alaska Public Media](#))

Business

- Port of Seattle suspends 2020 Alaska cruise season indefinitely. People are responding with concern that this will devastate Alaskan workers and tourism, as well as some support for the decision ([example 1](#), [example 2](#), [example 3](#)). ([KINY](#), [Puget Sound Business Journal](#))

Latest on this below and attached. Our state has had a strong response to grocery supply chain, and numerous federal and private entities have commended our state administration's thoughtful implementation of non-pharmaceutical interventions (NPIs). Something to keep in mind as others lob criticism for not doing enough.

Subject: SCAN Ecosystem Assessment Puget Sound (March 21, 2020)

Leaders,

Provided is the FEMA Supply Chain Analysis Network () Ecosystem Assessment of the Greater Seattle Area. This report is focused on the grocery supply chain.

Key Takeaway: This region's *targeted implementation* of Non-Pharmaceutical Interventions (school closings, gathering prohibitions, business closings, Shelter in Place, etc.) . . . **SEEM TO BE . . . contributing to supply chain resilience in comparison to more restrictive policies.** SCAN's mandate is to answer two fundamental questions:

1. Are key demand and supply networks failing (in the focus region) ?
2. If so, when, where, why – and with whom can FEMA engage to be most effective in reversing failure?

Key Findings:

1. Grocery demand and supply networks in the Puget Sound region are not failing; but these networks are experiencing significant stress.
2. After several weeks of demand of up to 300% of normal seasonal maximums (Thanksgiving and the Super Bowl), supply chains are under duress – but are displaying surprising levels of resilience.
3. Based on early indicators from the San Francisco Bay Area, there is cause for concern that the Puget Sound grocery supply chain will be disrupted by implementation of mandatory, wide-area Shelter-In-Place restrictions in neighboring states substantially contribute to Seattle area supply chains.
4. It would be helpful for to **discourage implementation of additional mandatory wide-area Shelter in Place (SIP) declarations** and to work with state and local colleagues to mitigate unnecessary constriction of supply chains within SIP areas.

Tristan and Taylor,

I am getting this product to you for review as I am reviewing it myself . . . there will be a complimentary SCAN Ecosystem Assessment document also released this evening.

I have reviewed this once and will several more times. From a quick first read, I gather that the measures put in place in the Seattle region have not, for the most part, adversely impacted freight flows. Is this what you are seeing? This should indicate a relatively strong grocery sector and pharma supply chain that is demonstrating a good amount of resilience.

Is this the case?

Offers of Volunteering - How to Help

March 25, 2020 at 3:15 PM EDT

To: Undisclosed recipients:

Good morning/afternoon,

I know some of you have already stood up websites at your state level to coordinate volunteers and donations. If you are looking for additional resources and where we are routing those requests at the national level, the information below is from our Private Sector Liaison Brett Holt:

Please pass this on to interested individuals. This is the guidance we are pushing on How To Help

FEMA How To Help: <https://www.fema.gov/coronavirus/how-to-help>

Donations

- Cash donations to the non-profit of your choice IS THE BEST donation.
- You can find vetted non-profit organizations supporting COVID-19 response efforts at www.NVOAD.org.
- Don't collect or make donations until you are sure it is needed, who will accept it and how it will get there is worked out.
- If you have **medical supplies or equipment to donate**, please [provide us details](#) on what you are offering.

Volunteering

- Licensed Healthcare professionals that want to volunteer can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.
- Trained medical volunteers can offer their services by registering with a National VOAD member on www.NVOAD.org. Please do not begin operations without contacting NVOAD first. You will be contacted once resources are matched with unmet needs.
- [Medical Reserve Corps \(MRC\)](#) volunteers can help in different ways in their communities (call centers, drive through clinics, and more). Contact an MRC unit in your area to find out how you can help. For more information visit mrc.hhs.gov/HomePage.
- Adequate supplies of blood are needed to treat patients in hospitals, but many blood drives have been cancelled. Donating blood is a safe process, and blood donation centers have the highest standards of safety and infection control. To find where you can donate blood, visit redcross.org.

Private Sector

- To **sell medical supplies** or equipment to the federal government, please email specifics to covidsupplies@fema.dhs.gov.
- If you have **medical supplies or equipment to donate**, please [provide us details](#) on what you are offering.
- If you are a private company that wants to **produce a product related** to the COVID response "email nbeoc@max.gov.
- If you are a hospital and other companies in need of medical supplies, contact your state Department of Public Health and/or Emergency Management.
- For **non-medical** supplies, services or equipment, if you are interested in doing business with FEMA, visit our [Industry Liaison Program](#).

FEMA

Good morning. The National Hot Issues report is attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 5, 2020

SUMMARY

- Across the region, communities continue to grapple with the economic impacts of COVID-19.
- The alternative care site at CenturyLink Field is expected to open next week in Washington.
- Social distancing enforcement remains a topic of debate, including whether local leaders have the authority to close gun shops, and "shut down" entire cities.
- More people in the region are choosing to wear face masks after new CDC recommendations.

Public Sentiment

- People are taking social distancing very seriously, and vent frustrations at those who take risks. At the same time, there is debate over whether strict enforcement is appropriate.
- Oregon residents are proud of the Governor's move to send ventilators to NY, while some worry it will leave Oregon unprepared and many say the federal government should be doing more to meet equipment shortfalls.
- With Washington's declining infection rate, some residents support the president's announcement of moving medical beds out of the state and wonder whether Washington even needs alternative care sites. Others are concerned that the state only looks like it is stabilizing because of low testing.

Washington

Response

- "The situation in Washington state continues to stabilize," President Trump said during a press briefing. "We are returning a 300-bed federal medical station to a different location where we will need it. They won't be needing it." ([KATU](#))
 - Reports on the president's statement prompted some confusion among people speculating whether alternative care sites [at CenturyLink](#), [in Shoreline](#) might be moved.
 - KIRO 7 clarifies that Trump says he's 'returning' medical station from Washington, but really meant hospital beds ([KIRO 7](#)). In response, many people criticized the news outlet for misinterpreting the president's words. ([example 1](#), [example 2](#))
 - Some Washington residents say the move makes sense, ([example 1](#), [example 2](#)) while others are concerned that Washington only looks like it is stabilizing because of low testing. ([example 3](#), [example 4](#))
- Army field hospital at CenturyLink Field Event Center expected to open next week. ([KIRO](#))
 - Some comments on [KIRO 7's Facebook page](#) do not register that this hospital is for non-COVID patients and wonder about the many surfaces the virus will be on ([example 1](#)). Some comments wonder if a field hospital is necessary with Washington's declining infection rate ([example 2](#), [example 3](#)).
 - There is some confusion about the opening of the CenturyLink Field alternative care site

following news coverage of the president's remarks. One person comments that they thought the field hospital was being dismantled and moved to another site ([example 1](#)) and another replies that the hospital was never used now being moved ([example 2](#)).

- At local COVID-19 command center, virus has a formidable foe. "We're working Oso hours": big, urgent decisions begin at Snohomish County's Emergency Coordination Center. ([Herald Net](#))

Business

- The owner of a Benton County gun shop says things are still running smoothly despite not being listed on the State of Washington's list of "essential businesses." ([KEPR](#))
 - Comments on [KEPR's Facebook post](#) are overwhelmingly supportive of the business' decision to stay open and their second amendment right to do so ([example 1](#), [example 2](#), [example 3](#), [example 4](#)). There is discussion about other essential businesses and how guns shops should be essential with reports of prisoners being released from jails and trails are being delayed due to the pandemic ([example 5](#)).
- Seattle businesses vandalized while closed under Gov. Inslee's stay-at-home order ([KING 5](#))

PPE

- Nintendo donates 9,500 N95 masks to Eastside Fire and Rescue ([Shoreline Area News](#))
- Sumner plastic company starts making medical face shields for coronavirus crisis ([News Tribune](#))
- More shoppers, grocery store employees wearing face masks after CDC recommendations. ([KOMO](#))

Healthcare Capacity

- The former Walla Walla General Hospital, purchased by Providence just over two years ago and renamed Providence Southgate Medical Park, is getting upgraded and outfitted to be used as an extension of St. Mary's coronavirus care. ([Walla Walla Union-Bulletin](#))
- Sixty beds for coronavirus isolation and quarantine could cost Whatcom \$4 million ([Bellingham Herald](#))

Social Distancing

- Data shows residents of Washington and Oregon are spending more time at home, less time elsewhere. ([KATU](#))
- In age of coronavirus and social distancing, states looking to Washington's vote-by-mail system ([Seattle Times](#))

Testing

- Drive-thru coronavirus testing site could soon close. The federal government is "moving on" from the Everett location after next week, officials say. ([HeraldNet](#))
- Confluence Health expanding ICU capacity, reopening drive-thru testing site ([Wenatchee World](#))

Tribal

- Yakama Nation members cope with loss of communal ceremonies during coronavirus outbreak ([Yakima Herald](#))

New Cases

- The Washington Department of Health confirmed 7,591 total COVID-19 cases in the state and 310 deaths Saturday, up from 296 the day before. ([KOMO](#))

Oregon

PPE

- Oregon sends 140 ventilators to New York. ([The Oregonian](#), [NPR](#), [Politico](#), [KGW8](#), [KOIN](#))
Reactions in Oregon are mixed, with most residents proud of the move but some concerned that it may leave Oregon underprepared ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#))
 - Many people called on the federal government to follow Oregon's lead and help with equipment shortages, ([example 1](#), [example 2](#), [example 3](#)) though some pointed out that Oregon's donated ventilators originally came from the SNS. ([example 4](#))
- Oregon officials: Wear cloth face mask when out in public. ([KOIN](#), [KPTV12](#))
- Community comes together to make more than 10,000 masks for healthcare workers ([KEZI](#))

Business

- Oregon circulates advice for small business owners as social distancing measures rattle the state's economic foundations. ([The Oregonian](#))

- Oregon art galleries struggle amid the coronavirus pandemic. ([OPB](#))
- Four Oregon distilleries team up to make hand sanitizer for healthcare professionals ([KGW](#))

Charity

- Great Salt Lick contest's future dashed. ([Baker City Herald](#))
- Sunshine Division sees spike in food requests amid COVID-19. ([KOIN](#))

Idaho

Social Distancing

- Mountain Home mayor threatens to shut down the city—with police enforcement—for not following the governor's stay-home order. ([KTVB](#))
 - In reaction, some residents agree that the city needs to be shut down, ([example 1](#)) while many criticize the mayor for overstepping his authority. ([example 2](#), [example 3](#), [example 4](#))
- Two ER doctors shared their story of fighting to recover from COVID-19 so they could get back to work. ([KTVB](#)) The story prompted people to decry the [selfishness](#) and [irresponsibility](#) of residents who do not follow the stay-home order.

Education

- Idaho Board of Education will not hold students back due to extended closures ([East Idaho News](#))

Alaska

Social Distancing

- Alaska's Chief Medical Officer, Dr. Zink, posted an advice video featuring her meeting two friends outdoors for a run with a homemade mask. ([Alaska DHSS Facebook](#))
 - Some people were surprised and critical that Dr. Zink would encourage people to run with friends, even if they keep distance. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#))

PPE

- Fairbanks volunteers use 3D printing to produce 267 masks. ([Daily News-Miner](#))

Economy

- Economic impacts of COVID-19 are hitting Alaska's Kenai Peninsula, as one food bank reports the need has tripled in their community. ([Peninsula Clarion](#))

FEMA_Stakeholder_Advisory:_State-Managed,_Federally-Supported_COVID-19_Response_Continues

March 24, 2020 at 12:13 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 24, 2020

FEMA Advisory

State-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 22, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical

distributors in various locations across the U.S. through [Project Airbridge](#).

- The U.S. has now processed 4.4 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

DHS_Announcement:_CISA_Releases_Guidance_on_Essential_Critical_Infrastructure_Workers_During_COVID-19

March 19, 2020 at 4:08 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from Christopher Krebs, Director of the Cybersecurity and Infrastructure Security Agency (CISA), regarding the Identification of Essential Critical Infrastructure Workers During COVID-19, found [here](#).

March 19, 2020

CISA Releases Guidance on Essential Critical Infrastructure Workers During COVID-19

As the Nation comes together to slow the spread of COVID-19, on March 16, the President issued updated Coronavirus Guidance for America. This guidance states that:

“If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule.”

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security’s responsibilities as assigned under the Homeland Security Act of 2002 to provide strategic guidance, promote a national unity of effort, and coordinate the overall federal effort to ensure the security and resilience of the Nation's critical infrastructure. CISA uses trusted partnerships with both the public and private sectors to deliver infrastructure resilience assistance and guidance to a broad range of partners.

In accordance with this mandate, and in collaboration with other federal agencies and the private sector, CISA developed an initial list of “Essential Critical Infrastructure Workers” to help State and local officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list can also inform critical infrastructure community decision-making to determine the sectors, sub-sectors, segments, or critical functions that should continue normal operations, appropriately modified to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

The list identifies workers who conduct a range of operations and services that are essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing management functions, among others. The industries they support represent, but are not

necessarily limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

We recognize that State, local, tribal, and territorial governments are ultimately in charge of implementing and executing response activities in communities under their jurisdiction, while the Federal Government is in a supporting role. As State and local communities consider COVID-19-related restrictions, CISA is offering this list to assist prioritizing activities related to continuity of operations and incident response, including the appropriate movement of critical infrastructure workers within and between jurisdictions.

Accordingly, this list is advisory in nature. It is not, nor should it be considered to be, a federal directive or standard in and of itself.

In addition, these identified sectors and workers are not intended to be the authoritative or exhaustive list of critical infrastructure sectors and functions that should continue during the COVID-19 response. Instead, State and local officials should use their own judgment in using their authorities and issuing implementation directives and guidance. Similarly, critical infrastructure industry partners will use their own judgment, informed by this list, to ensure continued operations of critical infrastructure services and functions. All decisions should appropriately balance public safety while ensuring the continued delivery of critical infrastructure services and functions.

CISA will continue to work with you and our partners in the critical infrastructure community to update this list as the Nation's response to COVID-19 evolves. We also encourage you to submit how you might use this list so that we can develop a repository of use cases for broad sharing across the country.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

For further information on the federal government's response to COVID-19,
please visit [Coronavirus.gov](https://www.coronavirus.gov).

FEMA Stakeholder Advisory: COVID-19 Federal Response Efforts Continue

March 26, 2020 at 1:43 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 26, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

COVID-19 Federal Response Efforts Continue

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

Sixteen states and 4 tribes have issued full stay-at-home orders; in addition to eight states that have issued partial or localized orders, and one state that has issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those

requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Iowa, Louisiana, New York, North Carolina, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves. Many supplies have already arrived and additional supplies are en route to these designated areas. The U.S. Navy hospital ship Mercy is en route and expected to be operational by April 1 to support Los Angeles with additional hospital beds and medical staff. The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Joint FEMA-CBP Statement on Export of Critical PPE

April 08, 2020 at 3:28 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the statement below from our partners in the Federal Emergency Management Agency (FEMA) and U.S. Customs and Border Protection (CBP) regarding a statement on the export of critical Personal Protective Equipment (PPE).

April 8, 2020

COVID-19 Update

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and U.S. Customs and Border Protection (CBP) are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 28, 2020

FEMA Advisory

FEMA and Our Partners Remain Actively Engaged to Support State-Managed Coronavirus Response

“I can tell you this weekend, we will be reporting on aggressive efforts that our supply stabilization task force at FEMA is taking to import medical supplies from around the world.” – Vice President Mike Pence

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- Apple and CDC, together with the White House and FEMA, launched a [new website](#) and app with a COVID-19 screening tool and resources to help people protect their health.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is

shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. We are sending more every day, and we are working nonstop to acquire or produce even more.

Today, the US-NS *Comfort* will be underway today from Norfolk, VA to New York, NY.

- The *Comfort* will arrive at Pier 90 in Manhattan on Monday – only approximately a mile away from the Javits Convention Center where the U.S. Army Corps of Engineers are actively constructing a 2,910-bed alternate care facility.
- The *Comfort* is equipped with 12 operating rooms, 1,000 hospital beds, a medical laboratory, a pharmacy, an optometry lab, digital radiology services, a CAT-scan, two oxygen producing plants, a helicopter deck and a crew of nearly 1,200 U.S. military personnel.
- The crew onboard the *Comfort* will provide critically needed medical surge capacity for New York Metropolitan area. Their mission will be to care for New Yorkers who do not have COVID-19, but who require urgent medical care.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.

- This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
- Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act to avoid governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Michigan, Missouri, South Carolina, Texas, Washington, the commonwealth of Puerto Rico, and the territory of Guam were approved for major disaster declarations to assist with additional needs identified in these states. Seventeen states and four tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

April 01, 2020 at 8:26 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic.

These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people is our top priority.
- On March 31, the president extended the nation's Slow the Spread campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut

(50) and Louisiana (150).

- Thirty states and 12 tribes have issued stay at home orders.

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 7, 2020)

April 07, 2020 at 4:31 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 7, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services (HHS) Response; FEMA Response Capacity; Strategic National Stockpile; CDC Public Guidance; CDC Respirator Guidance; Hydroxychloroquine/ Chloroquine; FDA Ventilator Guidance; National Guard Activation (Title 32); Community-Based Testing Sites; Defense Production Act; and Other Federal Response.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On **March 31**, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people are critical in the campaign to slow the virus' spread and keep high-risk populations safe.
 - For updates and information on how to protect yourself, visit www.coronavirus.gov.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - While FEMA schedules daily flights, it does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 6**, 13 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Seven flights are scheduled to arrive today, 6 in Chicago and 1 in Los Angeles. This is the greatest number of air bridge flights in a single day since the start of the program.

- An additional 72 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.
- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- As of **April 6**, FEMA and HHS have provided or are currently shipping, 8,920 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (1,350), New York (4,400), Oregon (140), and Washington (500).
 - Governor Brown of Oregon sent the state's 140 ventilators directly to New York; and,
 - Governor Inslee of Washington is returning 400 of the state's 500 ventilators to the SNS to be deployed to areas of greatest need.
 - Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 250-bed Federal Medical Station for the Metro D.C. area.
- Forty states, four territories and 24 tribes have issued stay-at-home orders.

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is

loaded.

- **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
 - Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
 - This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding strategies for addressing Personal Protective Equipment (PPE) shortages.

April 14, 2020

CISA Advisory

Strategies for Addressing Personal Protective Equipment (PPE) Shortage

The U.S. government's strategy for addressing COVID-19 personal protective equipment (PPE) shortages relies on three pillars of practice to ensure continued availability of protective gear: reduce – reuse – repurpose. In this time of the COVID-19 pandemic and the associated PPE shortages, implementation of contingency plans across all sectors are necessary to ensure continued availability of protective gear. In support of this strategy, the U.S. government has recently released two documents that will be of assistance to all infrastructure sectors.

FEMA has published the attached *COVID-19 Pandemic: Personal Protective Equipment Preservation Best Practices*. This document summarizes government guidance and best practices currently being implemented across the United States for COVID-19 response has been released. While tailored to the Healthcare Sector, many of these strategies can be applied to other sectors with similar PPE requirements.

NIOSH has recently issued [Interim Guidance for Conserving and Extending Filtering Facepiece Respirator Supply in Non-Healthcare Sectors](#). That document offers strategies to conserve, extend, and respond to shortages in the supply of NIOSH-approved filtering facepiece respirators (FFRs) used in non-healthcare worksites such as manufacturing and construction. Employers should implement alternative controls to reduce, as much as possible, their reliance on PPE, particularly FFRs.

Please continue to refer to CDC for updates to posted guidance for businesses and employers to plan and respond to COVID-19: <https://www.cdc.gov/coronavirus/2019->

[ncov/guidance-business-response.html](https://www.fda.gov/ncov/guidance-business-response.html). For general and other useful information regarding COVID-19, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. Information on FEMA's efforts to stabilize the PPE supply chain can be found at: <https://www.fema.gov/news-release/2020/04/08/fema-covid-19-supply-chain-task-force-supply-chain-stabilization>.

Respectfully,
Cybersecurity and Infrastructure Security Agency

Hello Casey,

Thanks for reaching out regarding our staff-level congressional call for Tuesday. I've been a bit slow getting out the invitation while I nail down a solid conference line.

I do expect to send out the agenda and invitation today, so great timing! Please let me know if you or Morgan would like to make opening remarks and I'll place you on the agenda.

Thanks so much,

Cam Rossie

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) weâ€™re hosting a Congressional Briefing for the WA delegation. From the feds, weâ€™ll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). Weâ€™d like to also include WA EMD (Dir Ezelle) and, if appropriate, the Govâ€™s office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Ryan Ike
Director | External Affairs Division | Region 10

From: Costello, Mark F. <mark.costello@sba.gov>
Sent: Monday, March 16, 2020 3:19 PM
Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBAâ€™s Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience,

weâ€™ve attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but Iâ€™ve attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBAâ€™s regular loan programs

1. [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
2. If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBAâ€™s regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. Itâ€™s also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
3. In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
4. SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDCâ€™s located in Lewiston and Coeur dâ€™Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis,

Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>

- We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>

5. Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

FEMA-IGA

FEMA Advisory: FY2020 Homeland Security Grant Program Notice of Funding Opportunity Modifications (April 10, 2020)

April 10, 2020 at 8:03 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 10, 2020

FY2020 Homeland Security Grant Program Notice of Funding Opportunity Modifications

The Department of Homeland Security (DHS), Federal Emergency Management Agency (FEMA) is announcing modifications to the Fiscal Year (FY) 2020 Homeland Security Grant Program (HSGP) Notice of Funding Opportunity (NOFO) application submission requirements as a result of the ongoing coronavirus (COVID-19) pandemic.

FEMA recognizes that state, local, tribal, and territorial partners have reprioritized scarce resources to the COVID-19 pandemic response, reducing their ability to fulfill existing application submission requirements before the application deadline on April 30, 2020. As a result, DHS/FEMA is providing the following relief: First, DHS/FEMA will award recipients FY 2020 SHSP and UASI grants at the “high end” of their target allocations. Second, if not included in the application due April 30, 2020, SHSP and UASI recipients must submit complete project-level information for each SHSP and UASI IJ as part of the December 2020 Biannual Strategy Implementation Report (BSIR). This includes IJs for the four (4) National Priority areas and the two (2) required election security projects (one [1] each in the Cybersecurity IJ and the Soft Targets /Crowded Places IJ).

FEMA will evaluate the effectiveness of the projects submitted in the December 2020 BSIR but will not reduce FY 2020 HSGP awards based on this effectiveness review. FEMA will work with recipients to ensure compliance with the National Priority area requirements based on the results of the effectiveness review.

Recipients and subrecipients will not be permitted to expend funding under the four (4) National Priority areas until the effectiveness of the proposed projects has been reviewed and confirmed by FEMA.

Although we are disappointed that we could not institute the National Priorities as envisioned, we feel this is a reasonable compromise until we can fully implement the competitive effectiveness strategy in FY 2021.

See attached Grant Programs Directorate Information Bulletin No. 447 for full details.

Contact Us

Any questions regarding the NOFO modification can be directed to FEMA Headquarters Preparedness Officers or the Centralized Scheduling and Information Desk (CSID) at askcsid@fema.dhs.gov or (800) 368-6498, Monday through Friday, 9:00 a.m. – 5:00 p.m. ET.

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

March 27, 2020 at 12:14 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of

California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

Absolutely. Thanks for helping us document the State's request, Stacey. We're tracking this request to assist King County and USACE will continue to be available as the State and it's local jurisdictions need them, using this current MATO for planning. If King County needs USACE assistance for facility conversion, we will need those requests as well and we'll track them via a separate MATO. If/when that time comes, we will help you write that MATO for facility conversion.

Please let us know if you'd like site assessment/locating/planning assistance with any other jurisdictions and we'll add them to the list.

Thanks,
Trevor

RE: Food Security Coordination Team conf call tomorrow

April 01, 2020 at 7:35 PM EDT

To: Austin, JT (GOV)

Hi JT,

Sure thing, will gather some materials that might be relevant to share and give a quick overview. It will be good to be able to re-emphasize the roll of the state EOC in fielding and validating local requests, since we're supporting them.

I may need to defer some questions if I don't have the answer, but I will try to gauge the audience and can definitely commit to finding the correct answer for you or the group if I don't have it tomorrow.

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 25, 2020

FEMA Advisory

Federal Partners Continue Providing Resources for COVID-19 Response Efforts

The federal government continues to take aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, more than 9,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington, California, Iowa and Louisiana were approved for major disaster declarations to assist with additional needs identified in these states.

11 states and 4 tribes have issued full stay-at-home orders; in addition, 5 states have issued partial or localized orders.

Medical supplies are en route to states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington, New York and California. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff and is expected to arrive by March 27. The U.S. Navy hospital ship Comfort is scheduled to arrive in New York on April 7. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

MARCH 25, 2020 AM

SUMMARY

- Confirmed COVID-19 cases in Idaho reach 91, and Ada County has its first case of community spread coronavirus.
- Governor Dunleavy announced the first death of an Alaskan from coronavirus. Another confirmed coronavirus case from Ketchikan brings total to 43 from the state.
- As PPE shortages continue to be a concern, companies large and small are contributing items like medical masks and sanitizer, and individuals continue to produce masks themselves.
- Communities have set up donations of medical supplies, meals, diapers, and other necessities.
- Shortages of inhalers are reported in Idaho and Washington.
- Public transit in Washington, Oregon, and Idaho grapple with drop in ridership; some stop collecting fares and others plan to institute service reductions.

Public Sentiment

- In Washington and Oregon, the public works through what businesses are essential under the stay-at-home orders.
- Idahoans and Alaskans feel that testing is inadequate.
- In Idaho, calls to the governor continue for stricter measures to reduce the rapid spread.
- Across the region, people applaud opportunities to help with donations, provide meals for truckers, and deliver flowers to seniors.

Washington

PPE

- In arguably the most ambitious and unique procurement effort in company history, Microsoft is leveraging its global supply chain to bring tens of thousands of badly-needed medical supplies — including 240,000 N-95 surgical masks — to the Puget Sound in anticipation of coronavirus hospitalizations. Supplies began arriving on Monday. ([Seattle Times](#))
 - In [The Seattle Times Facebook post](#), the comments are overwhelmingly positive and grateful to Microsoft and other private sector contributions to the coronavirus fight. Some wonder about PPE shortages in East Washington ([example 1](#)) and other small towns across the country ([example 2](#)), asking who will step in to ensure their doctors and nurses have what they need.
- Shoreline 3D printing expert making face shields for healthcare workers. A Western Washington YouTuber is channeling his skills to help fight the spread of coronavirus — and to influence others to do the same. ([KING 5](#))

Business

- Up to 335 employees have been laid off at Port Angeles-based Westport LLC, a luxury yacht-maker fallen victim to the COVID-19 pandemic. The economic blow of Westport shutting down

was compounded by the ninth reported case of the coronavirus in a Jefferson County resident, which was reported Tuesday. ([Peninsula Daily News](#))

Supply Chain

- To help the hard-working truck drivers, a high school along I-5 is opening up to offer meals, showers, and a place to park and rest. ([KEPR](#))

Transportation

- Sea-Tac Airport TSA employee tests positive for coronavirus. The officer last worked the morning of March 21. ([Tacoma News Tribune](#))
- STA to stop collecting fares, offer free door-to-door rides to seniors. The Spokane Transit Authority will suspend fare collection, board most passengers by the rear doors of buses and offer free van rides to people age 60 and over traveling to essential destinations in an effort to boost safety on the bus and paratransit system during the coronavirus pandemic. ([Spokesman-Review](#))

Escaped Inmates

- Inmates who escaped jail may have been running because of coronavirus fears. They were concerned after the governor's order, and are worried they could get infected. ([KIMA](#))
 - Comments on the [KIMA Action News Facebook page](#) are overwhelmingly skeptical and unsympathetic to these "excuses" from escaped inmates ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#)). One commenter does say that a crowded jail is the last place she would want to be during this outbreak ([example 8](#))

Medical Supplies

- Inhalers used to treat coronavirus causing shortage for asthma sufferers, experts say. ([Tacoma News Tribune](#))

Fatalities

- Husband and wife diagnosed with coronavirus die hours apart at Peacehealth Southwest Medical Center in Vancouver, Washington. Neither traveled, nor did they go out much, leaving their family at a loss of how they got the virus. ([KTVL](#), [KATU](#), [KEPR](#))
- Does the flu kill more people than coronavirus? In Washington, stats say 'no.' For weeks, people have been comparing coronavirus with the flu in terms of how deadly they are. ([KING 5](#), [KREM](#)) Some comments on the [KING 5 Facebook post](#) say that these numbers could be skewed given the lack of access to testing for COVID-19 ([example 1](#), [example 2](#), [example 3](#))

Opinion: Re-open schools

- Op-Ed: Speaking as a dad and a doctor, we should rethink coronavirus school closures. I believe schools can take several steps that will allow our students to continue their education while maintaining equity and relieving the burden on working families, writes Seattle Dr. Chetan Seshadri. ([Seattle Times](#))
 - Comments on the [The Seattle Times Facebook post](#) are largely critical of this Op-Ed, saying sending children to schools where the adults are vulnerable to COVID-19 would be irresponsible ([example 1](#), [example 2](#), [example 3](#), [example 4](#)). Some point out parents have incentives to send their kids to school while sick ([example 5](#), [example 6](#)) and that it is unfair to expect school teachers to be on the front lines in this fight ([example 7](#)).

Donations

- Communities across the country have set up diaper banks to help those who may not be able to find or afford diapers during the outbreak, get the diapers that children have to have. ([KIRO 7](#))

Tribal

- As a coronavirus pandemic sweeps the world, American Indian communities turn to one another, teachings. "We are incredibly resilient. We have our own way of caring for our relatives and our most vulnerable populations," said Esther Lucero, a Dine' tribal member. ([Seattle Times](#)) Comments on the [Seattle Times Facebook post](#) express inspiration and admiration for the resilience of American Indian communities ([example 1](#), [example 2](#)).

Pets

- All but one foster dog was housed before the shelter shut down as a coronavirus precaution. ([KREM](#))

Business

- Oregon workers can report businesses' 'stay home' coronavirus violations to the state. Oregon established a mechanism Tuesday for employees to report instances when businesses aren't following health advisories for maintaining a safe environment amid the coronavirus outbreak. ([Oregonian](#))
- A Eugene Distillery volunteered to begin making hand sanitizer to supply Lane County first responders and other critical public and private entities. ([The Register-Guard](#))

Supply Chain

- Gov. Kate Brown said she is "gravely concerned" about Oregon's ability to deliver basic services over the next six months to a year because of the economic fallout from statewide closures, massive lay-offs by affected businesses and stay-at-home orders aimed at slowing the spread of the coronavirus. ([The Register-Guard](#)) Comments on the [The Register-Guard's Facebook post](#) are very critical of Oregon's governor ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#))
- Woodburn Tulip Farm spreads kindness with flower deliveries to seniors. For just \$15, customers can send a tulip or daffodil to a senior citizen of their choice, the note included right to their doorstep. ([KVAL](#))

Meals for kids

- Schools expand food pick-up sites. Mid-valley school districts have announced a number of new places for kids to pick up free meals while the novel coronavirus outbreak keeps classrooms shuttered. ([Corvallis Gazette-Times](#))

Donations

- Asante asking for donations for healthcare workers. ([KOBI](#))

Healthcare Workers

- 'I've never felt more vulnerable': An Oregon nurse pulls back the curtain and describes what life is like for front-line health care workers during the coronavirus pandemic. ([KGW](#)) In comments on the [KGW-TV Facebook post](#), people are outraged at the lack of proper PPE to protect health care workers ([example 1](#), [example 2](#), [example 3](#), [example 4](#)).

New Case

- Jackson County Public Health announces 3rd case of coronavirus. ([KOBI](#))

Transportation

- TriMet service to continue, but reductions coming. Ridership is projected to have fallen 45% before the Stay at Home order, which will cause more reductions. ([Portland Tribune](#))

Alaska

First Alaskan Fatality

- Governor Dunleavy announced the first death of an Alaskan from coronavirus. ([KTVA 11 Facebook](#), [KTVF 11](#), [KSRM](#), [Alaska Public Media](#)) The person passed away in Washington.

Scams

- Alaska Health and Social Services warns Alaskans of potential scams for people who use the SNAP program. ([Facebook](#))

New Case

- Another confirmed coronavirus case from Ketchikan brings total to 43 from the state ([Web Center 11](#))

Idaho

Coronavirus case count

- 91 total Idaho cases, confirmed community spread in Ada County ([KTVB 7](#), [Idaho Statesman](#), [Idaho News 2](#))
 - People are calling for stricter measures to slow the spread ([example 1](#), [example 2](#)) and better testing capability ([example 3](#), [example 4](#)).
 - Many respond that there are not enough tests to be able to trace the origin of the spread. ([example 1](#), [example 2](#), [example 3](#))
 - People speculate or ask if there will be a shelter-at-home order to go into effect today. ([example 1](#), [example 2](#), [example 3](#))
- A new case has been confirmed in Nez Perce County. ([Lewiston Tribune](#)) In response to the

announcement from Public Health Idaho North Central District, many people want to know where the person lives in Nez Perce. ([example 1](#), [example 2](#), [example 3](#)) Many respond that precautions are necessary to stop the spread such as staying home and washing your hands. ([example 1](#), [example 2](#), [example 3](#))

- A CWI student says they have tested positive for coronavirus. ([KIVI Facebook](#))
- The Western Treasure Valley has received its first case of the novel coronavirus COVID-19. According to Southwest District Health, a female in her 20s tested positive for COVID-19 in Payette. ([Argus Observer](#))

Business

- Fred Meyer installing plexiglass at registers, allowing employees to wear masks ([KTVB 7](#))

Medical Supplies

- Inhalers used to treat coronavirus causing shortage for asthma sufferers, experts say ([Idaho Statesman](#))

Transportation

- STA to stop collecting fares, offer free door-to-door rides to seniors ([Idaho Statesman](#)) While this is welcome to some degree, it's pointed out that movement of any kind, including on a bus, [can continue the spread of coronavirus](#).

DHS FEMA Region X News Desk

News Desk: 425.487.4610 | [FEMA-R10-NewsDesk](#) | [@FEMARegion10](#)

Federal Emergency Management Agency (FEMA), Region 10 is committed to providing access, equal opportunity and reasonable accommodation in its services, programs, activities, education and employment for individuals with disabilities. To request a disability accommodation contact the News Desk at least five (5) working days in advance at 425.487.4610 or email at fema-r10-newsdesk@fema.dhs.gov.

The national social listening hot issues report is attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 24, 2020 AM

SUMMARY

- Alaska and Washington Governors have issued orders to restrict movement across the two states to only essential activity.
- Business impacts include Alaska Airlines reducing flights to meet the drop in passengers.
- Testing capacity is prioritized for people who show symptoms, have a higher risk for exposure, and healthcare workers.
- Medical supplies are running low in Oregon where nurses are reusing supplies that have otherwise run out.

Public Sentiment

- Washingtonians are largely grateful to Governor Inslee for his stay-at-home order, but many have questions about which businesses are considered essential and how this is different from prior mandates.
- Oregonians are concerned about limited access to testing in their state, and there is confusion around COVID-19 testing and how testing impacts treatment.
- While many Alaskans welcome the new mandated quarantine for visitors to Alaska and movement restrictions, there are worries about the economic impacts.
- People in Idaho fear state government is not doing enough to reduce the spread of the virus.

Washington

Stay-At-Home Order

- Inslee announces mandatory statewide stay-at-home order ([KIRO 7](#)). On the [KIRO 7 News Facebook page](#), some comments are grateful to see this order finally passed ([example 1](#)) and some wonder how this will be enforced and how this is different from previous orders ([example 2](#)). There are many questions and comments surrounding which businesses are essential -- including people wondering about coffee stands ([example 3](#)), hotel staff ([example 4](#)), teachers ([example 5](#)), marijuana dispensaries ([example 6](#), [example 7](#)), Amazon distribution centers ([example 8](#)), furniture stores ([example 9](#)), and construction companies ([example 10](#)). One person addresses supply-chain issues, saying she has a family of four and buying a lot of food in her case is not panic buying, it's just feeding her hungry family ([example 11](#)).
- 'Stay-at-home' violators face \$500 maximum fine in Edmonds ([KING 5](#))

Schools

- Washington education officials: school must continue, even during coronavirus closures ([Seattle Times](#))

Business

- Amazon suspends 3,900 accounts accused of price gouging ([KIRO 7](#), [KOMO](#))
- Alaska Airlines is cutting 200 flights a day, parking 30 jets, as coronavirus reduces air travel.

([Seattle Times](#)) Employees are asked to take voluntary leave, which is described as optically the right thing to do, but [leaves employees without pay](#).

- Economic injury loans from the US Small Business Administration are available in Washington. ([Shoreline Area News](#), [Thurston Talk](#), [The News Tribune](#)) There are a few reactions to the news, but one comment suggests that this is [only available if a bill passes the senate](#).

Health

- 90-year-old Kirkland woman survives coronavirus, reunites with family. ([My Northwest](#))

Oregon

Testing

- Coronavirus testing still limited in Oregon, even if you have symptoms. ([KATU](#)). On [KATU's Facebook post](#), comments are very frustrated:
 - One person says she has COVID-19 symptoms, and had tested negative for strep and flu, but said she was unable to get tested in Oregon. She ended up being driven 3 hours by her partner over to Washington state to get tested ([example 1](#)).
 - Another person says she has been self-quarantining but is confused whether a positive test would change her treatment. She says if the test is not going to help her get better, she does not want to pay for it ([example 2](#)).
 - One comment says that at this point testing is just a number and won't help you get well since the treatment to stay home and rest is the same ([example 3](#)).
 - Another person points out that some people need a positive test result to get paid time off of work ([example 4](#)).
 - Another person comments on the inequity of test access by referencing that Senator Rand Paul (who has since tested positive) was able to get a test without showing symptoms-- simply from having been exposed to someone who tested positive--and continued on with his life while waiting for his results ([example 5](#)).
- Providence has already tested 1,430 people for coronavirus. Those five-day totals, from Wednesday through Sunday, represent a major increase in the amount of testing capacity within Oregon. ([Oregonian](#)) The majority of the comments are from people with more questions including: when will other hospitals have more testing, how many positives are they seeing in their tests, are they testing their healthcare professionals, is there a test you can take to see if you *already* had COVID-19, are hospitals and university labs sharing resources, etc. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))

Business & Economy

- Agriculture still open for business during virus outbreak. ([Capital Press](#))
- Intel says it will send cleanroom attire from its computer chip factories to protect healthcare workers from the coronavirus. ([KGW 8](#))
- Bonuses and pay hikes: How grocery stores keep workers on the front lines ([FOX 12](#))

Hospital Capacity

- Coronavirus model sees Oregon hospitals overwhelmed by mid-April; 'point of no return' for intervention to work: March 24-29. The new website [Covid Act Now](#) offers a visualization of what Oregon could be facing very soon. And it's not encouraging. ([KGW 8](#))
- Providence and Asante say emergency rooms not overwhelmed, for now. ([KOBI](#)) Many comments on the [KOBI-TV NBC5 Facebook page](#) are from people who have received some care via phone or video conference and are largely happy with it ([example 1](#), [example 2](#), [example 3](#), [example 4](#)).

Donations

- Portland Trail Blazers establish coronavirus relief fund. Money raised will go to nonprofit organizations affected by the coronavirus crisis and will help support the Oregon Community Foundation's COVID-19 Pooled Fund, the team said. That fund assists organizations on the front lines of the outbreak in Oregon. ([Oregonian](#))

Enforcement

- How law enforcement agencies in Oregon say they'll enforce stay-at-home order. ([KATU 2](#))
- Starting Wednesday, March 25, Forest Grove police officers will begin picking up and delivering prescription medication to vulnerable citizens within Forest Grove. ([KATU 2](#))

PPE

- 'Nurses wore swim goggles': Oregon nurses union says protective gear could run out by Tuesday. Nurses at hospitals and facilities on the front lines of Oregon's battle with COVID-19 are in danger of running out of personal protective equipment as early as Tuesday morning. ([KGW 8](#))

Closures

- Lincoln County officials, with support of local mayors, have passed an ordinance halting the use of vacation rentals until the state of emergency is lifted. Coastal towns Seaside and Warrenton declared a state of emergency over the weekend. ([KOIN 6](#), [Statesman Journal](#)) Comments on [KOIN 6's Facebook page](#) center on the selfishness vacationers for crowding out these towns ([example 1](#), [example 2](#)) - with one person mentioning that Clatsop County now has its first reported case of COVID-19 and asks if that was "worth it" to those who did not stay home ([example 3](#)).
- The Historic Columbia River Highway Is Now Closed, Along With Every Waterfall on the Route. Popular sites along the corridor include Angels Rest, Wahkeena Falls and Horsetail Falls. ([Willamette Week](#))

Economy

- Sen. Wyden supports proposal canceling student loan payments during coronavirus pandemic. ([The World Link](#))
- President Trump says he'll reopen country in weeks, not months. If the U.S. stops social distancing too soon, "you will have more deaths and more dives in the stock market," warned Lawrence Gostin of Georgetown University, a lawyer with extensive public health expertise. ([Oregonian](#), [KOIN](#), [KTVL](#), [KTVZ](#))

Alaska

- State mandates quarantine for visitors to Alaska, business closures ([KINY](#), [KTVA Facebook Live Broadcast of Gov announcement](#), [Juneau Empire](#), [KTVE](#)) While many welcome the move ([example 1](#), [example 2](#)), there are worries about the economic impacts ([example 3](#)).
- New study suggests how long coronavirus can stay on surfaces ([KTUU 2](#))

Idaho

Government Response

- Gov. Little leaves dining regulations up to local officials. ([Idaho News](#)) Reactions feel state government isn't reacting doing enough to reduce the spread of the virus. ([example 1](#), [example 2](#), [example 3](#))
- Study: Idaho is the 4th least-aggressive state when it comes to COVID-19. ([Idaho News](#)) In response, an individual [posted a definition of martial law](#), indicating that people should be more afraid of that than coronavirus. Replies do not want to be forced to remain at home, and don't think that the coronavirus is that bad. ([example 1](#), [example 2](#)) There are other reactions that would like to see more aggressive actions being taken in Idaho to reduce the spread of the virus. ([example 1](#), [example 2](#), [example 3](#))

New Cases

- Idaho now up to 77 confirmed Coronavirus cases. ([Idaho 2 News](#)) This provides a readout of cases by health district, showing a dramatic increase of cases in the Blaine County area, for a total of 36.
- The first two cases have been confirmed in Bannock County. ([Idaho State Journal](#), [Idaho Statesman Journal](#))

School Closure

- Idaho Board of Education orders schools closed statewide. ([Magic Valley](#), [KIVI 6](#))

Cc: Daniells, Patty, partnerships@usda.gov, FEMA-IGA, Granum, Nicolas

Good afternoon, Rep. Kraft.

Following up on your original inquiry, I'd like to connect you with Nancy Bickford, WA Mil Dept Intergovernmental Affairs and Policy Director; Sara McCaslin with WA EMD Human Services Branch; and, JT Austin with Gov. Inslee's office working on coordinating a Food Security Team. I believe they would be your best coordination point(s) moving forward.

Should you have any additional questions, please let me know.

Regards,

Ryan

Subject: INQ: Impacts to WA Family Potato Farms Regarding COVID-19

Rep. Kraft,

Thank you so much for your email and support for the farming community during the COVID-19 pandemic. Please allow me to introduce you to my FEMA Region X colleague Ryan Ike for assistance regarding FEMA's work with Washington State.

For additional context, attached is a FEMA Advisory describing **state/local government** eligibility for reimbursement of formal agreements/contracts to **purchase/distribute food** necessary as an emergency protective measure in response to the COVID-19 pandemic.

(Additional details on this specific [FEMA Policy FP 104-010-03](#) are available online).

Below are some additional web references where federal partners are regularly posting updates, to ensure you have the most current information possible.

- White House Coronavirus (COVID-19) Task Force (www.coronavirus.gov)
- U.S. Government (www.usa.gov/coronavirus)
- FEMA (www.fema.gov/coronavirus)
- USDA (www.usda.gov/coronavirus)

I hope this information is helpful. Stay safe and healthy, and thanks for all you are doing.

In service,
Sarah

Subject: FW: Impacts to WA Family Potato Farms Regarding COVID-19

Dear FEMA and USDA team members,
Thank you for all your efforts to assist people and our farming community, especially during this very challenging time.

Please see my email below, just sent to our WA State Department of Agriculture and our Governor's office.

I would appreciate your response, even briefly, as to if and how FEMA / USDA are actively engaging our U.S. farmers to purchase their excess crops that they can no longer sell as a result of Covid-19 to utilize these foods for our / other countries' food sustainability needs during this season where many additional people will be in need.

In WA as a major Ag production center for our nation, we have lots of opportunities to help not only food recipients but impacted farmers as well.

Thank you in advance for your response.

Best,
Vicki

Subject: FW: Impacts to WA Family Potato Farms Regarding COVID-19
Importance: High

Drew and Kelly,
Is the State / WSDA working actively with WA farmers to purchase their excess crops that they can no longer sell on the regular open market, due to Covid-19 shutdowns (e.g. food processors/restaurants)? See email below/attachments.

I know the Governor has a Food Sustainability taskforce in place but would hope they're utilizing our farmers' crops first for foodbanks/similar to get food to those in need now and in the coming months.

I'm aware of: "a document developed by WSDA Food Assistance Program that summarizes various food assistance programs and resources available to Tribal partners. A similar document will be developed to increase awareness of WSDA managed food assistance programs for counties to address ongoing questions and requests related to WSDA directly providing food to banks/pantries." - noted by our County.

I want to be sure this stream of food supply is utilizing our WA farmers' crops first and foremost

wherever possible. I know many of these are perishable foods. But it would also make sense to have food processing plants function for the purpose of converting fresh crops into a more long-term edible format (e.g. Wheels on Meals, etc.)

Please advise on efforts being done to work with WA farmers for this purpose. Thank you.

Best,
Vicki

Subject: Impacts to WA Family Potato Farms Regarding COVID-19

Importance: High

State Senators & Representatives,

We wanted to share three real grower stories of how COVID-19 has impacted family potato farms in Washington State. Their names have been changed to keep their financial information private. Prior to March of 2020, our growers were optimistic as we geared up for a new planting and growing season. International and domestic demand for potatoes and potato products was the strongest we've had in over two decades. Our potato processors were expanding capacity to meet the anticipated growth as markets continued to show strength. We were on track to plant 170,000 acres of potatoes with the vast majority being grown for the frozen potato processors in Washington and Oregon.

And then coronavirus appeared in the US and orders were given to "Stay Home, Stay Safe" and all non-essential businesses closed. This was a necessary step to protect life. This was a huge blow to the food service industry in the US. Washington State family potato farms were disproportionately affected because the majority of what we grow is consumed in restaurants and other foodservice establishments. Farming and food processing have been labelled "essential businesses" and potato farmers are still being disproportionately impacted because foodservice businesses are closed, impacting food processors, impacting growers. Ninety percent all of potatoes grown in Washington State are dedicated to processed potato products. We have the highest concentration of potato processors in the world due to our ideal growing conditions and consistent quality. Our potato growers have been hit hard as potato processors told growers that their contracted volumes will be cut. We expect further cuts to acres and potato volume as the home isolation regulations continue.

Our current market is saturated. We have billions of pounds of potatoes currently in storage. Potato processors are having a difficult time utilizing those potatoes because of a lack of demand and nowhere to put them once they are made into frozen french fries. Cold storage is nonexistent because the supply of potato products has backed up and filled our freezers due to the loss of food service sales. Some of the potatoes destined for processing have been diverted to the fresh potato market but that was short lived as the fresh market has also been overwhelmed with an oversupply of potatoes, again from the lack of food service sales. Grower returns for fresh potatoes have dramatically dropped as the market has become flooded with excess supply. This oversupply situation will continue for over a year as the new crop of potatoes will enter a market that is still trying to sell the old crop.

We are hoping USDA can immediately implement Section 32 Bonus Buys of all potatoes and potato products, fresh, frozen, and dehydrated. Food banks are in great need as the ranks of unemployed citizens grow. It's with great urgency that we work quickly to move the 2019 crop out of storage to prepare for the new crop that will begin to be harvested in July. We are also hoping USDA can take

immediate action to provide direct assistance to our growers for losses they are experiencing on those cut acres. There will be many Washington farm families that will not survive this economic crisis without intervention by USDA. We are working closely with WSDA Director Sandison and his team and wanted to provide this update to you. We appreciate all your help and continued assistance through these troubling times.

Sincerely,

Matt Harris
Director of Governmental Affairs
Washington State Potato Commission

Holt, Brett

FEMA Region 10 Private Sector COVID-19 Update for April 14

April 14, 2020 at 1:08 PM EDT

To: Undisclosed recipients:

FEMA REGION 10 PRIVATE SECTOR COVID-19 UPDATE

APRIL 10, 2020

Good Morning Region 10 Partners

A reminder that today is the CISA ESF 14 Cross-Sector Business and Infrastructure (information below). This email has been reorganized to group relevant information. We added information about the PPE Exchange [Dashboard](#), resources for the deaf and hard of hearing community, updated state sections, and included updated links for critical industries.

Continue to contact me for questions, comments, or be added to the distribution list. Feel free to distribute.

Updates noted in [blue](#).

FEMA FACT SHEETS/ADVISORIES/MESSAGES

FEMA Project Airbridge (see attachment)

- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC data.

A brief video on Project Airbridge is available on [FEMA Website](#) and on all FEMA social media accounts.

Personal Protective Equipment Preservation Best Practices (see attachment)

- This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19

pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

FEMA Supply Chain Task Force (see attachment)

- The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective and lifesaving resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a four-prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and expand domestic production of critical resources to increase supply long-term.

FEMA and CBP Helping to Reduce Fraud

- FEMA and Customs Border Patrol (CBP) are working together to prevent fraud when PPE and medical supplies enter the United States from overseas. PPE being distributed internally within the United States is not being seized or re-routed by FEMA. Reports of FEMA seizing or re-routing supplies are FALSE.

To report hoarding or price gouging of PPE report it immediately to the National Center for Disaster Fraud calling 866-720-5721 or disaster@leo.gov.

Trends and Analysis

National Business Emergency Operations Center (NBEOC) Snapshot (see attached)

The NBEOC produces a daily Snapshot on business and industry domestic supply chains. You can find these each morning on the [NBEOC Dashboard](#) in the 'Snapshot' pod. I attached today's Snapshot for your review.

Key Highlights

Food

- The fresh produce industry is struggling from the closure of food service and commercial markets. Analysts estimate that produce growers, shippers and wholesalers have lost \$5 billion in sales since the start of the pandemic.
- It is estimated that these markets account for approximately 40% of all produce consumed in the US and that the industry is seeing more than \$500 million dollars a week in lost sales

Transportation

- A sharp and sustained drop in trucking volume as a result of declining demand could have significant effects on the industry as in certain markets there are more drivers available than freight to haul.
- As drivers exit the market due to lack of work, when demand returns, the driver pool will be smaller which could lead to longer lead times, less freight volume, and prolonged stockouts.

Google Mobility Reports (updated)

- Google is producing [Public Community Mobility Reports](#). The reports chart movement trends over time across the US and the world, so you can see how movement has changed at retail, parks, workplaces, grocery stores and the like in your state during the pandemic; down in some instances to the county level. Below are links to current reports for Region 10 states (unsure on frequency of change).

Interim Guidance for Critical Infrastructure Workers Who May Have Had Exposure to COVID-19

- Please find below an important update from the Centers for Disease Control and Prevention (CDC) and the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19. These two important informational products include *Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19* and a quick reference of the Do's and Don'ts for employers and employees related to COVID-19 exposures.
 - [CDC CISA Flyer Essential Critical Workers Dos and Donts COVID19.pdf](#)
 - [CDC CISA Interim Guidance Critical Workers Safety Practices COVID19.pdf](#)

While the [Interim Guidance](#) specifically calls attention to critical infrastructure workers serving in the specific capacities and functions, as below, the guidance can apply to all critical infrastructure workers with the exception of Healthcare Providers who are covered under [separate guidance](#).

- Federal, state, & local law enforcement
- 911 call center employees
- Fusion Center employees
- Hazardous material responders from the government and the private sector
- Janitorial staff and other custodial staff
- Workers – including contracted vendors – in food and agriculture, critical manufacturing, informational technology, transportation, energy and government facilities

Employers should implement the recommendations in the [Interim Guidance](#) for Businesses and

Employers, to Plan and Respond to Coronavirus Disease 2019, to help prevent and slow the spread of COVID-19 in the workplace.

Please continue to monitor the CDC website for the most current medical [guidance](#).

Subject: Call with Governor Inslee and FEMA Administrator Gaynor

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

Hello John and Brian,

Governor Inslee would like to speak with Administrator Gaynor today following up on yesterday's commitment of field hospitals for Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.968.9255 with any questions.

Thank you,

Morgan

Administrator_Gaynor_Sends_Letter_to_Emergency_Managers

March 27, 2020 at 1:31 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on COVID-19.

FEMA

March 27, 2020

Administrator Gaynor Sends Letter to Emergency Managers

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. Today, Administrator Gaynor sent the following letter to emergency managers outlining critical steps to help the nation respond to COVID-19:

Fellow Emergency Managers,

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. I thank you for your tireless efforts under these unprecedented and very demanding circumstances.

I write to you today as the Administrator of FEMA and a former state and local emergency manager. Now more than ever, we must work as a team to deliver locally executed, state-managed, and federally supported solutions on behalf of the American people. The best and the brightest emergency managers, public health officials, private industry partners, scientists, and medical doctors and nurses are assembling at FEMA Headquarters and in our regional offices; in your state and local emergency operations centers; and in hospital operations centers across the country. This is truly a whole-of-nation response. Rest assured, the full weight of our Nation is supporting all of us to overcome the pandemic and I have no doubt that we will be successful in defeating the spread of COVID-19.

To be successful across the nation – from the smallest town, tribal nation, island, and to the largest city – we must act decisively and immediately. Today, many of you are at the center of the battle, in places like New York, Washington, California, and Louisiana. Others of you may only have a few cases. It is our collective responsibility to do our very best today, so we can continue to blunt the spread of COVID-19. If you have excess capacity, please consider using EMAC to offer resources that your peers from around the country may need.

As the Nation's lead emergency manager, I want to be completely transparent about our national response and your responsibility to respond proactively and aggressively. To that point, I would like to share seven critical steps that I ask you to **immediately** consider and act upon.

First, mitigation works. Ensure you preserve your “force” while maintaining the ability to respond in a COVID-19 degraded environment without access to the tools typically used in an emergency or disaster like mutual aid and EMAC. Ensure that your communities, small or large embrace mitigation efforts. Every American has a role to play in defeating COVID-19, including good hygiene and social distancing. Follow the President's [15 Days to Slow the Spread](#).

Second, integrate all emergency management and public health operations. Identify and integrate your leading health official into your Emergency Operations Center and Unified Command Group at every level of government. You must form a unified Emergency Management – Public Health Team. Ensure that the entire state political leadership team understand the emergency management process. All requests to the Federal government must be formally communicated by the state's emergency manager to the FEMA Regional Administrator. This is the same process as natural disasters.

Third, collect public, private, and government hospital bed capacity data, if you haven't already – total beds, acute care beds, normal occupancy, predicted surge occupancy. This data will assist you in crafting requests for high demand, low density critical resources should the time come that you may need it. We must use all data wherever possible to allocate scarce resources, including consideration of population size, demographics, and vulnerability.

Fourth, actively plan to stand-up Alternate Care Sites. Be creative in identifying facilities that can support low acuity patients and require a minimal amount of medical staff, already in short supply. Consider locations such as convention centers, hotels, shuttered hospitals, college or university dormitories, or vacant open space in commercial buildings. Ask your FEMA Regional Administrator to brief you on the US Army Corps of Engineers “Hotel to Healthcare” initiative. If you need a plan, here is a [link](#) to a plan.

Fifth, maintain situational awareness of ventilators that may be used across your area. Check hospitals, acute care sites, outpatient locations, and any other location that may use these devices, especially those that may be a source for reallocation to an area of greater need. Like hospital bed capacity, this data will help you understand what you have and what you may need, informing your resource management strategy for these high

demand, low density critical resources should the time come that you may need it. Just as we are moving resources nationally, you should also be moving resources within your state.

Sixth, identify all sources to surge medical professionals. Look for retirees, medical contract services, nurses, respiratory therapists, medical students, and emergency medical technicians or local equivalents. You will need them to support the increased hospital surge and management of patients on ventilators and you should be cataloging and training them now, as appropriate.

Seventh, manage Personal Protective Equipment (PPE) carefully. We have stood-up the *Supply Chain Stabilization Task Force* within FEMA with the purpose of increasing the flow of critical medical supplies such as N95 masks, surgical masks, and ventilators. We are using four guiding principles: 1) preserve what we have; 2) locate medical stockpile around the globe; 3) distribute them to locations most in need; and 4) build capacity in America through partners with industry. While some of these strategies will yield near-term benefits, it must be your highest priority to carefully manage what you have available to you now.

To help you with this, the CDC produced a [Personal Protective Equipment \(PPE\) Burn Rate Calculator](#). This spreadsheet-based model provides information for healthcare facilities to plan and optimize the use of PPE for response to COVID-19. Similarly, non-healthcare facilities (e.g., correctional facilities) may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

FEMA will reimburse all eligible expenses for emergency protective measures under the Stafford Act; however, do not wait for the PPE from the Federal government to show-up. Take aggressive action now to source your own. Because of the actions the Administration and federal government is taking, you will begin to see PPE supplies come online in the weeks ahead as the commercial distribution chain adapts as well as the quantities of shipments from the Strategic National Stockpile continue to move. Continue to be resourceful, ask the building trades to donate PPE or that they allow you access to their supplier; and, ask dental and outpatient offices that are closed to donate PPE to local hospitals and care critical care sites. And finally, I ask you to review and utilize the guidance the *Supply Chain Stabilization Task Force* released regarding guidance for PPE.

Lastly, some [external communication](#) resources that may be helpful:

- **[Best Practices](#):** This page provides a platform for sharing best practices and lessons learned by the government, private sector, academic institutions, professional associations, and other organizations to support the whole of community response.
- **[Rumor Control](#):** This page is to help the public distinguish between rumors and facts regarding the response to COVID-19.
- **[How to Help](#):** This page provides guidance on how to **donate** critical resources & supplies; how to **do business** with FEMA; and, how to **volunteer**.

These are unprecedented times and many lives are potentially at stake. We are doing things many of us have never imagined, especially at this scale. As professional emergency managers, we are built for this – this is what we do best; coordinate, problem-solve, and act. I ask all of you to lead, innovate, and be resourceful. This is a whole of nation response and I need every emergency manager to be an active participant.

We are emergency managers and America needs us at our best.

Respectfully,

Pete Gaynor
Administrator

Acting_Secretary_Chad_Wolf_Statement_on_the-REAL_ID_Enforcement_Deadline

March 26, 2020 at 11:21 AM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the REAL ID Enforcement Deadline

“Due to circumstances resulting from the COVID-19 pandemic and the national emergency declaration, the Department of Homeland Security, as directed by President Donald J. Trump, is extending the REAL ID enforcement deadline beyond the current October 1, 2020 deadline. I have determined that states require a twelve-month delay and that the new deadline for REAL ID enforcement is October 1, 2021. DHS will publish a notice of the new deadline in the Federal Register in the coming days.

“The federal, state and local response to the spread of the Coronavirus here in the United States necessitates a delay in this deadline. Our state and local partners are working tirelessly with the Administration to flatten the curve and, therefore, we want to remove any impediments to response and recovery efforts. States across the country are temporarily closing or restricting access to DMVs. This action will preclude millions of people from applying for and receiving their REAL ID. Extending the deadline will also allow the Department to work with Congress to implement needed changes to expedite the issuance of REAL IDs once the current health crisis concludes.

“Protecting both the health and national security of the American people continues to be the top priority for the President of the United States and the Department of Homeland Security.”

Decisive action taken today will protect Americans

March 21, 2020 at 11:01 AM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

US-Mexico-Canada Travel Restrictions

Decisive action taken today will protect Americans, slow the spread of the virus, and help save lives:

- The United States is cooperating closely with Canada and Mexico to ensure that North America has a coordinated approach to combating the pandemic caused by the coronavirus.
- The United States and Canada have agreed to restrict travel at our land border to essential travel only.
- Similarly, the United States and Mexico are finalizing an agreement that will facilitate only essential travel at our southern border.

We are maintaining cross-border activities with Canada and Mexico that support health security, trade, commerce, supply security, and other essential activities while taking critical steps to protect our citizens and to curb spread of the virus.

For more information on these measures please visit the [White House fact sheet](#).

Combating Disinformation on COVID-19

Acting Secretary Chad...

@DHS_Wolf

Follow

Hearing a lot about texts from "friends at DHS" or "friends with connections at DHS" that say DHS is planning a national lock down.

THIS IS NOT TRUE.

Do not believe the disinformation campaigns. Please do not pass it along. Use trusted local and federal government sources.

FEMA Advisory: COVID19 Pandemic: Applying the Defense Production Act

April 14, 2020 at 5:20 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 14, 2020

Coronavirus (COVID-19) Pandemic:

Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are executing a four-pronged approach to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation**.

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19 response, please review the attached fact sheet.

FEMA-IGA

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 11, 2020)

April 11, 2020 at 12:23 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 11, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Air Bridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

- On April 10, HHS Secretary Azar sent a follow up letter to hospital administrators, reinforcing the need for this data to be provided daily to facilitate planning, monitoring, and resource allocation in response to COVID-19.
 - Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them.
 - The letter included a set of frequently asked questions that details federal government’s data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information.
 - These FAQs will be updated if additional data delivery methods become available.
 - The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.
- On April 10, HHS began delivering the initial \$30 billion in relief funding to providers in support of the national response to COVID-19, with \$26 of the \$30 billion expected to be delivered to providers’ bank accounts the same day.
 - The payments are part of the distribution of the \$100 billion provider relief fund included in the CARES Act.
 - To expedite providers getting money as quickly as possible, the initial funding was distributed immediately proportionate to providers’ share of Medicare fee-for-service reimbursements in 2019.
 - The Administration is rapidly working on future targeted distributions to hospitals and providers that will focus on providers in areas particularly impacted by COVID-19, rural providers, and providers with lower shares of Medicare reimbursement or who predominantly serve the Medicaid population.
- On **April 8**, HHS announced the first contract for ventilator production rated under the Defense Production Act, to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM’s contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
- On April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators,

and a variety of other respirators; surgical masks; and, surgical gloves.

DHS_Announcement:_CISA_Releases_Guidance_on_Essential_Critical_Infrastructure_Workers_During_COVID-19

March 19, 2020 at 4:08 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from Christopher Krebs, Director of the Cybersecurity and Infrastructure Security Agency (CISA), regarding the Identification of Essential Critical Infrastructure Workers During COVID-19, found [here](#).

March 19, 2020

CISA Releases Guidance on Essential Critical Infrastructure Workers During COVID-19

As the Nation comes together to slow the spread of COVID-19, on March 16, the President issued updated Coronavirus Guidance for America. This guidance states that:

“If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule.”

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security’s responsibilities as assigned under the Homeland Security Act of 2002 to provide strategic guidance, promote a national unity of effort, and coordinate the overall federal effort to ensure the security and resilience of the Nation's critical infrastructure. CISA uses trusted partnerships with both the public and private sectors to deliver infrastructure resilience assistance and guidance to a broad range of partners.

In accordance with this mandate, and in collaboration with other federal agencies and the private sector, CISA developed an initial list of “Essential Critical Infrastructure Workers” to help State and local officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list can also inform critical infrastructure community decision-making to determine the sectors, sub-sectors, segments, or critical functions that should continue normal operations, appropriately modified to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

The list identifies workers who conduct a range of operations and services that are essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing management functions, among others. The industries they support represent, but are not

necessarily limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

We recognize that State, local, tribal, and territorial governments are ultimately in charge of implementing and executing response activities in communities under their jurisdiction, while the Federal Government is in a supporting role. As State and local communities consider COVID-19-related restrictions, CISA is offering this list to assist prioritizing activities related to continuity of operations and incident response, including the appropriate movement of critical infrastructure workers within and between jurisdictions.

Accordingly, this list is advisory in nature. It is not, nor should it be considered to be, a federal directive or standard in and of itself.

In addition, these identified sectors and workers are not intended to be the authoritative or exhaustive list of critical infrastructure sectors and functions that should continue during the COVID-19 response. Instead, State and local officials should use their own judgment in using their authorities and issuing implementation directives and guidance. Similarly, critical infrastructure industry partners will use their own judgment, informed by this list, to ensure continued operations of critical infrastructure services and functions. All decisions should appropriately balance public safety while ensuring the continued delivery of critical infrastructure services and functions.

CISA will continue to work with you and our partners in the critical infrastructure community to update this list as the Nation's response to COVID-19 evolves. We also encourage you to submit how you might use this list so that we can develop a repository of use cases for broad sharing across the country.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

For further information on the federal government's response to COVID-19,
please visit [Coronavirus.gov](https://www.coronavirus.gov).

WASOC Isolation and Quarantine Workgroup Draft

March 25, 2020 at 9:54 PM EDT

To: SEOC44@mil.wa.gov, IMT7 Operations (OS/ASPR), Granum, Nicolas, jim.baumgart@gov.wa.gov, tedd.kelleher@commerce.wa.gov, Urbas, Gary, Bova, Rebecca, matthew.zimmerman@doh.wa.gov

Hi All,

Not sure if you were able to join our call earlier, but we kicked off the Spectrum of Care Taskforce today. You have been identified as points of contact for the Isolation and Quarantine workgroup. This workgroup is not intended to replace or duplicate the work that you are already undertaking, but provide a means of collaboration, coordination, and situational awareness across all levels of care that are ongoing during this response.

Please review the draft conops and workgroup documents. We put some thoughts and ideas down as a starting point, but ask that you review the workgroup draft and update it with contact information for additional members of your workgroup, EEI/CIRS, and other recommended changes.

Please provide your feedback by COB Friday, 3/27/20.

Let me know if you want to set up a time to discuss.

Thank you,

Lisa Davidson

Acting Division Director

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic - Ventilator Request

Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted the process below to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis. In the case of ventilators, immediate is defined as requirements necessary to sustain life within a 72-hour window.

To submit a request, states and tribes will work through their FEMA/ HHS regional leadership. In order for a request to be processed, the state/tribe must provide detailed responses to the following five questions:

1. How many usable ventilators, ICU beds, and convertible ventilators are currently available within the state or tribe?
2. What is the current hospital bed and ICU bed occupancy rate in the state/tribe?
3. How many new ICU beds does the state/tribe estimate it can stand-up **and** the number of ventilators, or FDA-approved [ventilator alternatives](#), it can or is standing up?
4. What is the decompression ability of hospitals in the state/tribe (i.e.: are there currently field hospitals or alternate care facilities established)?
5. How many anesthesia machines are in the state/tribe **and** have they been converted?

Once the requesting state or tribe provides the FEMA/ HHS Region with the answers to these five questions, then the requirement is validated at the Regional level and forwarded to FEMA's National Response Coordination Center (NRCC) for processing.

At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.

In addition to submitting requests through this process, state, and tribal officials are encouraged to share the FDA's [Emergency Use Authorization \(EUA\) for Ventilators](#) issued on March 24. The EUA allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The EUA also provides guidance to assist health care personnel on use of other ventilators like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 6, 2020)

April 06, 2020 at 3:37 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 6, 2020

Coronavirus (COVID-19) Pandemic

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; Hydroxychloroquine/Chloroquine; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The latest updates and information on how to protect yourself and what to do if you think you are sick are available at www.coronavirus.gov.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
 - Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.

- Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
 - The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
 - As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
 - The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
- The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
 - Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19 patients.
 - The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
 - 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and 300 additional ventilators to New Jersey.
- Forty states, four territories and 23 tribes have issued stay at home orders.

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_2

April 02, 2020 at 6:57 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 2, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).

- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

Colorado's_Request_for_a_Major_Disaster_Declaration_(I A,_PA,_&_HM)

March 26, 2020 at 2:47 PM EDT

To: William Kirkland, Crozer, William (who.eop.gov), SHORT, CHERIE, Harper, Jay

Cc: Greff, Stacie, FEMA-IGA

Good Afternoon,

Please find attached Governor Polis' request for a major disaster declaration for the State of Colorado as a result of the COVID-19 Pandemic beginning on January 27, 2020, and continuing.

The Governor is specifically requesting Individual Assistance (all programs) statewide; Public Assistance (Categories A – G) statewide; and Hazard Mitigation statewide.

For your reference, I have also attached a comprehensive Stafford Act Declaration Process Fact Sheet.

We will notify you as soon as a determination is made. Should you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-4500.

Respectfully,

Jacob Spell

FEMA Stakeholder Advisory: FEMA Announces Free Access to Software Solutions and Licensed Datasets to Aid Non-Federal Governmental Entities in Response to COVID-19

March 29, 2020 at 10:16 AM EDT

To: FEMA-IGA

Office of External Affairs
U.S. Department of Homeland Security
Washington, DC 20472

FEMA

March 29, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

FEMA Announces Free Access to Software Solutions and Licensed Datasets to Aid Non-Federal Governmental Entities in Response to COVID-19

The Department of Homeland Security has an Enterprise License Agreement with the Environmental Systems Research Institute (Esri) that allows DHS/FEMA the ability to extend that agreement to our governmental partners during an “incident of national significance.” Therefore, state, local, tribal and territorial governmental entities can now obtain free access to Esri software solutions for up to six months to help them respond to COVID-19. Esri provides geographic information system (GIS) software, web GIS and geodatabase management applications.

For those who would like to take advantage of this opportunity, choose “[Request Assistance](#)” in the red banner, and then select “COVID-19 Response Package” within “support options.” The package contains software, templates and suggested data schemas. For current Esri customers, you can also access [free templates](#) specific for the COVID-19 response.

Additionally, Esri is offering free GIS technology and on-call technical expert help for organizations that have exceeded their GIS capacity and need emergency support. Esri is also providing data, software, configuration and technical support for applications.

Homeland Infrastructure Foundation-Level Data

The National Geospatial Intelligence Agency (NGA) has released all applicable licensed datasets to local, state, tribal, and territorial users with COVID-19 operational needs. NGA is providing access to non-federal governmental disaster/emergency response security agencies and personnel who are supporting Homeland Security/Homeland Defense missions per the current Homeland

Infrastructure Foundation-Level Data (HIFLD) Data Use Agreement. **Please note** this expanded access will expire once the current declaration of a national emergency ends.

This expanded access covers these additional data products:

- Licensed Parcel Data
- 2020 Roads and Routing Dataset
- Dun & Bradstreet Business Points Data

For current users: NGA has automatically adjusted access for mission partners with a signed Data Use Agreement in place and no further action is needed. Please visit the [Geospatial Information Infrastructure](#) to interact with this data. Contact DHS_GCOE@hq.dhs.gov should you need assistance.

For first-time users: Go to the [HIFLD Subcommittee Home Page](#) and choose “Request Licensed Data.” Complete the Disaster Use Agreement using “COVID-19” as the reference number. Once approved by NGA, you will receive access within 24 hours. Please note, before you can complete a Data User Agreement and access this data, you must have valid [Homeland Security Information Network credentials](#). Should you have questions, please contact HIFLD@hq.dhs.gov.

DISCLAIMER: Reference to any commercial products or services in this announcement is not an endorsement or Government sanction of those non-Federal entities, its services or products.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Subject: Task force schedules

Taskforce members and colleagues,
I am putting together an operational rhythm based on you schedules. I am concerned if we go to 5 on 2 off wont work and we wont stay coordinated unless we are all on that schedule. I may the to do a staggered schedule. So I respectfully ask what your individual work schedule is for your respective agencies and I will develop the rhythm based on the result. As this taskforce is forming and developing and I may have indadvertantly missed someone, please feel free to forward this message, Please email your responses to the new Isolation Taskforce email at doh-isotf.imt@doh.wa.gov.

Thank you in advance for your help, support, and advise.
We ARE saving lives.

US-Canada_Joint_Initiative:_Temporary_Restriction_of_Travelers_Crossing_the_US-Canada_Land_Border_for_Non-Essential_Purposes

March 20, 2020 at 1:17 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

US-Canada Joint Initiative: Temporary Restriction of Travelers Crossing the US-Canada Land Border for Non-Essential Purposes

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars in trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people to exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries. These supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Importance: High

STATE OF WASHINGTON

FEDERAL DISASTER DECLARATION FACT SHEET

APRIL 23, 2020

Today, April 23, 2020, President Donald J. Trump granted a Major Disaster Declaration for the State of Washington triggering the release of Federal funds to help communities recover from Severe Storms, Flooding, Landslides, and Mudslides that occurred January 20 to February 10, 2020. Details of the disaster declaration and assistance programs are as follows:

Declaration Number:	FEMA-4539-DR
Incident: and Mudslides	Severe Storms, Flooding, Landslides,
Incident Period:	January 20 to February 10, 2020
Federal Coordinating Officer:	Timothy B. Manner National FCO Program
Individual Assistance (IA): households):	(Assistance to individuals and
IA-Designated Areas:	Under Review.
Public Assistance (PA):	(Assistance for emergency work and the repair or replacement of disaster-damaged facilities):
PA-Designated Areas:	Columbia, Garfield, Grays Harbor, Island, King, Lewis, Mason, Pacific, San Juan, Skagit, Snohomish, Thurston, Wahkiakum, Walla Walla, and Whatcom Counties.
Hazard Mitigation (HM):	(Assistance for actions taken to prevent or reduce long term risk to life and property from natural hazards):
HM-Designated Areas:	All areas in the State of Washington are eligible for assistance under the Hazard Mitigation Grant Program.
OTHER:	Additional designations may be made at

a later date if requested by the State and warranted by the results of further assessments.

For your reference, I have attached fact sheets on the Public Assistance and Hazard Mitigation Grant programs.

If you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

FEMA

The national social listening hot issues report is attached for greater context.

Corrected for previously inaccurate summary of Alaska status, please disregard previous copy.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 24, 2020 AM

SUMMARY

- Washington Governor Inslee has issued a proclamation to restrict movement across the state to only essential activity.
- In Alaska, Governor Dunleavy has issued a quarantine to visitors to Alaska for 14 days.
- Business impacts include Alaska Airlines reducing flights to meet the drop in passengers.
- Testing capacity is prioritized for people who show symptoms, have a higher risk for exposure, and healthcare workers.
- Medical supplies are running low in Oregon where nurses are reusing supplies that have otherwise run out.

Public Sentiment

- Washingtonians are largely grateful to Governor Inslee for his stay-at-home order, but many have questions about which businesses are considered essential and how this is different from prior mandates.
- Oregonians are concerned about limited access to testing in their state, and there is confusion including about how testing impacts treatment.
- While many Alaskans welcome the new mandated quarantine for visitors to Alaska and movement restrictions, there are worries about the economic impacts.
- People in Idaho fear state government is not doing enough to reduce the spread of the virus.

Washington

Stay-At-Home Order

- Inslee announces mandatory statewide stay-at-home order ([KIRO 7](#)). On the [KIRO 7 News Facebook page](#), some comments are grateful to see this order finally passed ([example 1](#)) and some wonder how this will be enforced and how this is different from previous orders ([example 2](#)). There are many questions and comments surrounding which businesses are essential -- including people wondering about coffee stands ([example 3](#)), hotel staff ([example 4](#)), teachers ([example 5](#)), marijuana dispensaries ([example 6](#), [example 7](#)), Amazon distribution centers ([example 8](#)), furniture stores ([example 9](#)), and construction companies ([example 10](#)). One person addresses supply-chain issues, saying she has a family of four and buying a lot of food in her case is not panic buying, it's just feeding her hungry family ([example 11](#)).
- 'Stay-at-home' violators face \$500 maximum fine in Edmonds ([KING 5](#))

Schools

- Washington education officials: school must continue, even during coronavirus closures ([Seattle Times](#))

Business

- Amazon suspends 3,900 accounts accused of price gouging ([KIRO 7](#), [KOMO](#))
- Alaska Airlines is cutting 200 flights a day, parking 30 jets, as coronavirus reduces air travel. ([Seattle Times](#)) Employees are asked to take voluntary leave, which is described as optically the right thing to do, but [leaves employees without pay](#).
- Economic injury loans from the US Small Business Administration are available in Washington. ([Shoreline Area News](#), [Thurston Talk](#), [The News Tribune](#)) There are a few reactions to the news, but one comment suggests that this is [only available if a bill passes the senate](#).

Health

- 90-year-old Kirkland woman survives coronavirus, reunites with family. ([My Northwest](#))

Oregon

Testing

- Coronavirus testing still limited in Oregon, even if you have symptoms. ([KATU](#)). On [KATU's Facebook post](#), comments are very frustrated:
 - One person says she has COVID-19 symptoms, and had tested negative for strep and flu, but said she was unable to get tested in Oregon. She ended up being driven 3 hours by her partner over to Washington state to get tested ([example 1](#)).
 - Another person says she has been self-quarantining but is confused whether a positive test would change her treatment. She says if the test is not going to help her get better, she does not want to pay for it ([example 2](#)).
 - One comment says that at this point testing is just a number and won't help you get well since the treatment to stay home and rest is the same ([example 3](#)).
 - Another person points out that some people need a positive test result to get paid time off of work ([example 4](#)).
 - Another person comments on the inequity of test access by referencing that Senator Rand Paul (who has since tested positive) was able to get a test without showing symptoms--simply from having been exposed to someone who tested positive--and continued on with his life while waiting for his results ([example 5](#)).
- Providence has already tested 1,430 people for coronavirus. Those five-day totals, from Wednesday through Sunday, represent a major increase in the amount of testing capacity within Oregon. ([Oregonian](#)) The majority of the comments are from people with more questions including: when will other hospitals have more testing, how many positives are they seeing in their tests, are they testing their healthcare professionals, is there a test you can take to see if you *already* had COVID-19, are hospitals and university labs sharing resources, etc. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))

Business & Economy

- Agriculture still open for business during virus outbreak. ([Capital Press](#))
- Intel says it will send cleanroom attire from its computer chip factories to protect healthcare workers from the coronavirus. ([KGW 8](#))
- Bonuses and pay hikes: How grocery stores keep workers on the front lines ([FOX 12](#))

Hospital Capacity

- Coronavirus model sees Oregon hospitals overwhelmed by mid-April; 'point of no return' for intervention to work: March 24-29. The new website [Covid Act Now](#) offers a visualization of what Oregon could be facing very soon. And it's not encouraging. ([KGW 8](#))
- Providence and Asante say emergency rooms not overwhelmed, for now. ([KOB](#)) Many comments on the [KOB-TV NBC5 Facebook page](#) are from people who have received some care via phone or video conference and are largely happy with it ([example 1](#), [example 2](#), [example 3](#), [example 4](#)).

Donations

- Portland Trail Blazers establish coronavirus relief fund. Money raised will go to nonprofit organizations affected by the coronavirus crisis and will help support the Oregon Community Foundation's COVID-19 Pooled Fund, the team said. That fund assists organizations on the front lines of the outbreak in Oregon. ([Oregonian](#))

Enforcement

- How law enforcement agencies in Oregon say they'll enforce stay-at-home order. ([KATU 2](#))

<p>PPE</p>	<ul style="list-style-type: none"> Starting Wednesday, March 25, Forest Grove police officers will begin picking up and delivering prescription medication to vulnerable citizens within Forest Grove. (KATU 2) 'Nurses wore swim goggles': Oregon nurses union says protective gear could run out by Tuesday. Nurses at hospitals and facilities on the front lines of Oregon's battle with COVID-19 are in danger of running out of personal protective equipment as early as Tuesday morning. (KGW 8)
<p>Closures</p>	<ul style="list-style-type: none"> Lincoln County officials, with support of local mayors, have passed an ordinance halting the use of vacation rentals until the state of emergency is lifted. Coastal towns Seaside and Warrenton declared a state of emergency over the weekend. (KOIN 6, Statesman Journal) Comments on KOIN 6's Facebook page center on the selfishness vacationers for crowding out these towns (example 1, example 2) - with one person mentioning that Clatsop County now has its first reported case of COVID-19 and asks if that was "worth it" to those who did not stay home (example 3). The Historic Columbia River Highway Is Now Closed, Along With Every Waterfall on the Route. Popular sites along the corridor include Angels Rest, Wahkeena Falls and Horsetail Falls. (Willamette Week)
<p>Economy</p>	<ul style="list-style-type: none"> Sen. Wyden supports proposal canceling student loan payments during coronavirus pandemic. (The World Link) President Trump says he'll reopen country in weeks, not months. If the U.S. stops social distancing too soon, "you will have more deaths and more dives in the stock market," warned Lawrence Gostin of Georgetown University, a lawyer with extensive public health expertise. (Oregonian, KOIN, KTVL, KTVZ)
<h2>Alaska</h2>	
<ul style="list-style-type: none"> State mandates quarantine for visitors to Alaska, business closures (KINY, KTVA Facebook Live Broadcast of Gov announcement, Juneau Empire, KTVE) While many welcome the move (example 1, example 2), there are worries about the economic impacts (example 3). New study suggests how long coronavirus can stay on surfaces (KTUU 2) 	
<h2>Idaho</h2>	
<p>Government Response</p>	<ul style="list-style-type: none"> Gov. Little leaves dining regulations up to local officials. (Idaho News) Reactions feel state government isn't doing enough to reduce the spread of the virus. (example 1, example 2, example 3) Study: Idaho is the 4th least-aggressive state when it comes to COVID-19. (Idaho News) In response, an individual posted a definition of martial law, indicating that people should be more afraid of that than coronavirus. Replies do not want to be forced to remain at home, and don't think that the coronavirus is that bad. (example 1, example 2) There are other reactions that would like to see more aggressive actions being taken in Idaho to reduce the spread of the virus. (example 1, example 2, example 3)
<p>New Cases</p>	<ul style="list-style-type: none"> Idaho now up to 77 confirmed Coronavirus cases. (Idaho 2 News) This provides a readout of cases by health district, showing a dramatic increase of cases in the Blaine County area, for a total of 36. The first two cases have been confirmed in Bannock County. (Idaho State Journal, Idaho Statesman Journal)
<p>School Closure</p>	<ul style="list-style-type: none"> Idaho Board of Education orders schools closed statewide. (Magic Valley, KIVI 6)

Please review: Stay home campaign drafts

March 20, 2020 at 7:46 PM EDT

To: Smith, Jaime (GOV), Kopriva, James (DSHS/ALTSA), Marchand, Michael (HBE), Crume-Bruce, Shawna, Holman, Sam (GOV), danielle.bailey@fema.dhs.gov

Cc: Blaske, Laura A (DOH)

Hi all,

Please review the attached DRAFT materials and track any edits/suggestions **by COB Monday, March 23**. Other materials, including a tip sheet for caregivers, are in the works. Laura and I are working with the agency heading up the Spread the Facts campaign to infuse this messaging into the overall campaign. More to come on that.

These materials serve as the basis and main key messages for:

- Infographics
- Digital ads
- Partner toolkit resources
- Talking points
- TV, radio, digital advertising

Best,
Kennedy

Office of Intergovernmental Affairs

Please see the announcement below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on COVID-19.

FEMA

March 27, 2020

Administrator Gaynor Sends Letter to Emergency Managers

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. Today, Administrator Gaynor sent the following letter to emergency managers outlining critical steps to help the nation respond to COVID-19:

Fellow Emergency Managers,

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. I thank you for your tireless efforts under these unprecedented and very demanding circumstances.

I write to you today as the Administrator of FEMA and a former state and local emergency manager. Now more than ever, we must work as a team to deliver locally executed, state-managed, and federally supported solutions on behalf of the American people. The best and the brightest emergency managers, public health officials, private industry partners, scientists, and medical doctors and nurses are assembling at FEMA Headquarters and in our regional offices; in your state and local emergency operations centers; and in hospital operations centers across the country. This is truly a whole-of-nation response. Rest assured, the full weight of our Nation is supporting all of us to overcome the pandemic and I have no doubt that we will be successful in defeating the spread of COVID-19.

To be successful across the nation – from the smallest town, tribal nation, island, and to the largest city – we must act decisively and immediately. Today, many of you are at the center of the battle, in places like New York, Washington, California, and Louisiana. Others of you may only have a few cases. It is our collective responsibility to do our very best today, so we can continue to blunt the spread of COVID-19. If you have excess capacity, please consider using EMAC to offer resources that your peers from around the country may need.

As the Nation's lead emergency manager, I want to be completely transparent about our national response and your responsibility to respond proactively and aggressively. To that point, I would like to share seven critical steps that I ask you to **immediately** consider and act upon.

First, mitigation works. Ensure you preserve your “force” while maintaining the ability to respond in a COVID-19 degraded environment without access to the tools typically used in an emergency or disaster like mutual aid and EMAC. Ensure that your communities, small or large embrace mitigation efforts. Every American has a role to play in defeating COVID-19, including good hygiene and social distancing. Follow the President's [15 Days to Slow the Spread](#).

Second, integrate all emergency management and public health operations. Identify and integrate your leading health official into your Emergency Operations Center and Unified Command Group at every level of government. You must form a unified Emergency Management – Public Health Team. Ensure that the entire state political leadership team understand the emergency management process. All requests to the Federal government must be formally communicated by the state's emergency manager to the FEMA Regional Administrator. This is the same process as natural disasters.

Third, collect public, private, and government hospital bed capacity data, if you haven't already – total beds, acute care beds, normal occupancy, predicted surge occupancy. This data will assist you in crafting requests for high demand, low density critical resources should the time come that you may need it. We must use all data wherever possible to allocate scarce resources, including consideration of population size, demographics, and vulnerability.

Fourth, actively plan to stand-up Alternate Care Sites. Be creative in identifying facilities that can support low acuity patients and require a minimal amount of medical staff, already in short supply. Consider locations such as convention centers, hotels, shuttered hospitals, college or university dormitories, or vacant open space in commercial buildings. Ask your FEMA Regional Administrator to brief you on the US Army Corps of Engineers “Hotel to Healthcare” initiative. If you need a plan, here is a [link](#) to a plan.

Fifth, maintain situational awareness of ventilators that may be used across your area. Check hospitals, acute care sites, outpatient locations, and any other location that may use these devices, especially those that may be a source for reallocation to an area of greater need. Like hospital bed capacity, this data will help you understand what you have and what you may need, informing your resource management strategy for these high

demand, low density critical resources should the time come that you may need it. Just as we are moving resources nationally, you should also be moving resources within your state.

Sixth, identify all sources to surge medical professionals. Look for retirees, medical contract services, nurses, respiratory therapists, medical students, and emergency medical technicians or local equivalents. You will need them to support the increased hospital surge and management of patients on ventilators and you should be cataloging and training them now, as appropriate.

Seventh, manage Personal Protective Equipment (PPE) carefully. We have stood-up the *Supply Chain Stabilization Task Force* within FEMA with the purpose of increasing the flow of critical medical supplies such as N95 masks, surgical masks, and ventilators. We are using four guiding principles: 1) preserve what we have; 2) locate medical stockpile around the globe; 3) distribute them to locations most in need; and 4) build capacity in America through partners with industry. While some of these strategies will yield near-term benefits, it must be your highest priority to carefully manage what you have available to you now.

To help you with this, the CDC produced a [Personal Protective Equipment \(PPE\) Burn Rate Calculator](#). This spreadsheet-based model provides information for healthcare facilities to plan and optimize the use of PPE for response to COVID-19. Similarly, non-healthcare facilities (e.g., correctional facilities) may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

FEMA will reimburse all eligible expenses for emergency protective measures under the Stafford Act; however, do not wait for the PPE from the Federal government to show-up. Take aggressive action now to source your own. Because of the actions the Administration and federal government is taking, you will begin to see PPE supplies come online in the weeks ahead as the commercial distribution chain adapts as well as the quantities of shipments from the Strategic National Stockpile continue to move. Continue to be resourceful, ask the building trades to donate PPE or that they allow you access to their supplier; and, ask dental and outpatient offices that are closed to donate PPE to local hospitals and care critical care sites. And finally, I ask you to review and utilize the guidance the *Supply Chain Stabilization Task Force* released regarding guidance for PPE.

Lastly, some [external communication](#) resources that may be helpful:

- **[Best Practices](#):** This page provides a platform for sharing best practices and lessons learned by the government, private sector, academic institutions, professional associations, and other organizations to support the whole of community response.
- **[Rumor Control](#):** This page is to help the public distinguish between rumors and facts regarding the response to COVID-19.
- **[How to Help](#):** This page provides guidance on how to **donate** critical resources & supplies; how to **do business** with FEMA; and, how to **volunteer**.

These are unprecedented times and many lives are potentially at stake. We are doing things many of us have never imagined, especially at this scale. As professional emergency managers, we are built for this – this is what we do best; coordinate, problem-solve, and act. I ask all of you to lead, innovate, and be resourceful. This is a whole of nation response and I need every emergency manager to be an active participant.

We are emergency managers and America needs us at our best.

Respectfully,

Pete Gaynor
Administrator

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 1, 2020

April 01, 2020 at 10:39 AM EDT

To: Undisclosed recipients:

Good morning,

The national social media hot issues report from today and yesterday evening's national social listening report are attached for greater context. Please send us an e-mail to flag any hot topics for inclusion, topics to focus on, or e-mail additions for our distribution list.

Thank you.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 1, 2020

SUMMARY

- Washington may not get all the ventilators it requested from the federal government's national stockpile of medical supplies, Gov. Jay Inslee's chief of staff said Tuesday.
- As many as 140 National Guard members could be deployed soon to help area food banks pack and distribute food in Washington.
- Alaska's governor addresses the unfolding 'economic disaster' in the state, announcing new steps to stabilize the economy with more to come.
 - A spike in the number of healthcare workers and first responders testing positive highlights Oregon's struggle to supply PPE.
 - Idaho had a 6.6 earthquake yesterday evening followed by several smaller aftershocks. There are no reports of injury or damage.

Public Sentiment

- Across the region, some feel that media reporting of the pandemic is blowing the situation out of proportion.
- Many comments continue to point out that reports of data may not tell the full picture due to limited testing.
- Washingtonians are angry with a delay from the Washington State Department of Health in posting COVID-19 data.
- Washingtonians are grateful for the National Guard members who will be deployed soon to help area food banks pack and distribute food and for the new CenturyLink field hospital for non-COVID patients.
- Support grows in Alaska for increased and enforceable travel restrictions out of concern for vulnerable, remote villages.
- Oregonians are frustrated over government handling of the PPE supply, scarcity and equity in testing.

Washington

PPE

- Washington may not get all the ventilators it requested from the federal government to fight the coronavirus ([Seattle Times](#))

- On the [Seattle Times Facebook post](#), many comments are political in nature and critical of the President ([example 1](#), [example 2](#), [example 3](#), [example 4](#)). Someone says that Governor Inslee should call the Pentagon directly to work out logistics of where to send ventilators ([example 5](#)), and another says that Seattle's tech industry should be leading the charge to make the necessary PPE and equipment that the city needs ([example 6](#)).

Data

- Statement on Delay in COVID-19 Data Posting ([Washington State Department of Health](#)).
 - On [Washington State Department of Health's Facebook post](#), while one comment is glad to finally have an explanation for the delay ([example 1](#)), the majority of comments are frustrated and call this unacceptable ([example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#)). One person says the state and federal government are ill-prepared for this national emergency and 200,000 lives might be lost because of it ([example 7](#)).

Alternative Care Site

- CenturyLink Field gets ready to host new field hospital amid COVID-19 crisis ([KOMO Q13](#))
 - On the [KOMO News Facebook post](#), many express gratitude over the field hospital ([example 1](#), [example 2](#), [example 3](#), [example 4](#)). One person says they still have hope but that this field hospital should have been set up weeks ago ([example 5](#)).
- Astria Hospital in Yakima to reopen, WA state taking possession ([KIMA](#))

Fatalities

- COVID-19 death toll may be higher than first projected, UW researchers warn ([KOMO](#))
 - Comments on [KOMO's Facebook post](#) are critical of the outlet for spreading panic and profiting off of fear in this time ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#)), and one person says it's hard to know what to believe with so much conflicting news on this ([example 7](#))

Business/Economic Impact

- QFC and Fred Meyer will pay all its grocery workers, including supply chain, manufacturing, pharmacy and call center associates, a "hero bonus" for working on the frontlines of the crisis. ([KOMO](#))
 - In the comments on [KOMO News' Facebook post](#), most agree that grocery store workers deserve this bonus ([example 1](#), [example 2](#), [example 3](#), [example 4](#)). Others point out that a \$2 "bonus" is not nearly enough with one person even calling it "insulting" ([example 5](#), [example 6](#), [example 7](#), [example 8](#), [example 9](#), [example 10](#)).
- Spokane-area banks offering unemployed workers mortgage, loan payment deferments ([Spokesman-Review](#))
- Gov. Jay Inslee and Charlie Clark, director of the Washington State Department of Financial Institutions (DFI) announced the state is taking steps to assist distressed Washington homeowners who are unable to make their mortgage payments due to COVID-19 restrictions. ([NBC Right Now](#))

Community Impact

- Seattle residents stranded at sea on cruise ships during coronavirus crisis ([KING 5](#))
- Seattle police chief, former KING 5 journalist urge hate crime victims to call 911 ([KING 5](#))
- With COVID-19 on our minds, Seattle firefighters have created a tiktok video for a #flattenthecurvechallenge. ([@SeattleFire](#))

Rumor Control

- Washington National Guard called up to help with COVID-19 response. ([KOMO](#))
 - [Governor Jay Inslee](#): "This week, [@WANationalGuard](#) will provide important help to our communities to ensure our critical food banks remain stocked and operational. They're filling an important need and I ask that you welcome them in your communities as they process, package and distribute meals." ([@GovInslee](#))
 - Some responses to [@GovInslee](#)'s Tweet applaud this, even asking how they can support the National Guard soldiers ([example 1](#)). However, some call this move "tyranny" and equate it to 1930s Germany ([example 2](#), [example 3](#), [example 4](#)). Some commenters are frustrated by the conspiracy theorists, saying there is a large difference between trying to prevent the spread of a deadly virus and committing genocide ([example 5](#)). A few comments center around prisons with one person wondering if the National Guard will be emptying prisons

- and detention centers ([example 6](#)), and another telling the governor to stop letting King County release prisoners with violent crimes and saying the governor should instead send national guard to the prison to help and send medicine to their medical facility ([example 7](#)).
- On the [KOMO Facebook post](#), some commenters try to control rumors, saying this is not martial law ([example 1](#), [example 2](#)) and trying to encourage people to actually read the article and to be thankful for the National Guard's help ([example 3](#), [example 4](#), [example 5](#)).

Oregon

PPE

- Oregon awaits shipment of PPE from FEMA for delivery to local front-line workers ([KQEN](#), [Daily Emerald](#), [KDRV](#))
- Oregon mortuary workers are bracing for possible PPE shortages. ([KOIN](#))
- 'The push for PPE should have been three weeks ago': Health care workers now testing positive for COVID-19 ([FOX 12](#)) Some react to this news with confusion as to why the PPE is running out before the pandemic has even '[hit that hard](#)' in Oregon. People are [frustrated over the situation](#), with many [blaming the governor](#).
- Gov. Kate Brown is posting about PPE donations and deliveries, but the public reactions are critical of high concern issues such as the stay at home order, testing, and school closures. ([example1](#), [example2](#))

Federal Response

- The Oregon disaster declaration for COVID-19 is still receiving some media attention. ([Gales Creek Journal](#), [The Register Guard](#))

Flatten the Curve

- Gov. Kate Brown tests negative for COVID-19 ([The Oregonian](#), [KOIN](#), [KPTV12](#), [OPB](#)), with public comments complaining about lack of testing. ([example1](#), [example2](#))
- COVID-19 projections improve for Oregon, not for Washington. ([KOIN](#))

Education

- Oregon schools are likely closed for the remaining academic year, with a shift to distance learning. ([OPB](#), [KATU2](#), [KGW8](#)) People responded with sadness for the students ([example 1](#)), concern over equal access to education ([example 2](#), [example 3](#)) and some frustration with the cancellation decision ([example 3](#)).

New Cases

- Two additional COVID-19 deaths, 84 more diagnosed cases reported in Oregon. ([KGW8](#), [KPTV12](#), [KATU2](#), [KOIN](#))
- Firefighters in Portland, Gresham, Nehalem test positive for COVID-19. ([KATU2](#), [@GFD1062](#))
- Pink eye now linked as possible symptom of coronavirus. ([KATU2](#), [KMTR16](#))
- 31 Portland-area health care workers test positive for coronavirus. ([KGW](#))

Humanity

- OHSU doctor dancing in hospital corridors earns social-media fame, respect of Janet Jackson ([The Oregonian](#))

Idaho

New Cases

- Ada, Blaine near 200 coronavirus cases each as Idaho's total climbs to 524, with 9 deaths ([Idaho Statesman](#))
- Idaho's coronavirus cases have quadrupled in less than one week; Trump warns of 'rough two-week period' ([Idaho State Journal](#)) Calls for more testing from the public continue. ([example](#))
- Caldwell family of 7 recovering from coronavirus: 'I would not wish it on anybody' ([KTVB](#)) As one member tested positive, the family was told to assume that everyone got it. In response, comments point out that this counts as [only one positive case in the official tally](#).

What do the numbers mean?

- Viewer question: Why don't we report on the number of Idahoans who have recovered from coronavirus? ([KTVB](#)) In the video segment, the reporter answers that we can't know how many people have recovered if we aren't testing to know how many people have had coronavirus. Public reaction is critical of the reporting quality. ([example 1](#), [example 2](#))

Earthquake

- Earthquake shakes Boise with 6.5 magnitude that could be Idaho's second-strongest ever ([Idaho Statesman](#), [Idaho Press](#))

Alaska

New Cases

- New coronavirus cases push statewide number up to 133, with two more hospitalized ([KTUU](#)) In reaction, people continue to ask for more context such as number of recovered ([example 1](#), [example 2](#)) and how many have been tested. Many are frustrated that people are not taking the threat seriously, and call for more movement restrictions ([example 3](#), [example 4](#), [example 5](#)).
 - In [her video update](#), Chief Medical Officer Dr. Anne Zink mentioned working with FEMA to get additional testing in Alaska, and congratulated Alaskans for reducing movement by 45%.
- BP confirms positive COVID-19 case in Prudhoe Bay. ([KTVA](#)) In response, BP is planning to [eliminate all non-essential activity](#) on the North Slope, Alaska's massive northern oil field. The person returned to Alaska before the governor's mandate limiting travel within the state, but traveled to the North Slope after the mandate was released ([KSRM](#)).
 - People responded with anger toward the individual and oil company for defying the mandate and the government for failing to enforce it ([example 1](#), [example 2](#), [example 3](#)), with some calls to '[start shutting things down for real](#).'

Economy

- Governor Dunleavy focused his [daily COVID-19 briefing](#) on the 'economic disaster' caused by the pandemic. He announced new regulatory suspensions (on various license renewals and fees) as 'just the beginning' of a plan to stabilize the economy. ([Anchorage Daily News](#)) In response, many people [thanked the governor](#) for fighting Alaska's legislature for stimulus in the form of more Permanent Fund Dividend payments, and [urged him to continue](#).

Stop the Spread

- Alaska's Remote Villages Are Cutting Themselves Off to Avoid Even 'One Single Case' of Coronavirus ([TIME](#)) People are praising the move. ([example 1](#), [example 2](#))

Enforcement

- Lying about having novel coronavirus could lead to 5 years in jail and a \$50,000 fine ([KTVF](#)) The warning from state troopers came after an incident on Friday with a drunk driver claiming to have COVID-19.

COVID-19 FEMA Social Listening Reports April 18, 2020

April 18, 2020 at 6:53 PM EDT

To: Undisclosed recipients:

Good Morning.

We are on break from our reporting schedule this weekend of social listening in the region, and will be back at it starting Monday morning. Attached is today's national hot issues and national social listening reports.

Below, you will find the section from the national listening report on observations for Alaska, Idaho, Oregon, and Washington.

Region 10

Alaska

- In a record surge, data shows that the state of Alaska [received more than 32,000 unemployment claims](#) in the month of March.
- [Residents in Anchorage protested](#) about a homeless camp, which is raising health concerns among them.
- [An Anchorage school district](#) is completing many improvements while students aren't there, which they would have otherwise had to delay.

Idaho

- Individuals protested the [extension of COVID-19 related closures](#) outside a county courthouse.

Oregon

- The governor issued an order to [prevent debt collectors](#) from going after residents' stimulus checks.
- Yesterday afternoon, [dozens of people protested](#) the state's stay-at-home order by driving around the state capitol.
- A homeless community for [LGBTQ+ individuals](#) has opened in Portland. It includes hygiene facilities and platforms for tents spaced ten feet apart.
 - Two additional campsites will open in the next few days, one will be dedicated to BIPOC residents.

Washington

- The latest University of Washington projections show it could be safe for the state to begin easing stay at home orders the [week of May 18th](#).
- Hundreds gathered at Columbia Point Marina today to [protest the state's ban on fishing](#).
- In the coming weeks, the Seattle Department of Transportation [plans to close about 15 miles of streets](#) across Seattle to nonessential vehicle traffic so pedestrians and bicyclists can have more space to maintain social distancing.
- [Seattle parks will stay open this weekend](#) with new guidelines to prevent spread of COVID-19.

CISA_releases_Version_2.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance_originally_published_on_March_19,_2020

March 28, 2020 at 6:01 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding an update to the Essential Critical Infrastructure Worker Guidance, found [here](#).

March 28, 2020

CISA Advisory

CISA releases Version 2.0 of the Essential Critical Infrastructure Worker Guidance originally published on March 19, 2020

As the Nation comes together to slow the spread of COVID-19, on March 16th the President issued updated Coronavirus Guidance for America that highlighted the importance of the critical infrastructure workforce.

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's authorities to secure critical infrastructure. Consistent with these authorities, CISA has developed, in collaboration with other federal agencies, State and local governments, and the private sector, an "Essential Critical Infrastructure Workforce" advisory list. This list is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. Decisions informed by this list should also take into consideration additional public health considerations based on the specific COVID-19-related concerns of particular jurisdictions.

This list is advisory in nature. It is not, nor should it be considered, a federal directive or standard. Additionally, this advisory list is not intended to be the exclusive list of critical infrastructure sectors, workers, and functions that should continue during the COVID-19 response across all jurisdictions.

Individual jurisdictions should add or subtract essential workforce categories based on their own requirements and discretion.

The advisory list identifies workers who conduct a range of operations and services that are typically essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing operational functions, among others. It also includes workers who support crucial supply chains and enable functions for critical infrastructure. The industries they support represent, but are not limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.
