State, local, tribal, and territorial governments are responsible for implementing and executing response activities, including decisions about access and reentry, in their communities, while the Federal Government is in a supporting role. Officials should use their own judgment in issuing implementation directives and guidance. Similarly, while adhering to relevant public health guidance, critical infrastructure owners and operators are expected to use their own judgement on issues of the prioritization of business processes and workforce allocation to best ensure continuity of the essential goods and services they support. All decisions should appropriately balance public safety, the health and safety of the workforce, and the continued delivery of essential critical infrastructure services and functions. While this advisory list is meant to help public officials and employers identify essential work functions, it allows for the reality that some workers engaged in activity determined to be essential may be unable to perform those functions because of health-related concerns.

CISA will continue to work with our partners in the critical infrastructure community to update this advisory list if necessary as the Nation's response to COVID-19 evolves. You can find the attached guidance as well as other COVID related information at cisa.gov.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

Good morning. Yesterday's national social listening report and today's hot issues social listening report are attached for greater context. Thank you.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 4, 2020

SUMMARY

- Governor Brown announced Saturday morning that the state will send 140 ventilators to New York to support COVID-19 response.
- Washington measures to stop elective surgeries and limit outpatient procedures have put financial strain on hospitals.
- Washington mental health officials plan to discharge or transfer as many as 60 patients from the state's largest psychiatric hospital in order to reduce stress that COVID-19 has placed on staff at the 850-bed facility.
- Oregon reports faulty, expired masks in SNS delivery. In Washington, Department of Corrections staff are being issued expired masks to wear on a voluntary basis.
- In Alaska, airlines step in to fill the gap left by RavnAir.
- Fairbanks arena is currently being converted to an alternative care site.
- Stories continue about some officials in Northern Idaho telling the public to defy Governor Little's order to stay-at-home.

Public Sentiment

- People across the region are anxious about economic safety nets for small businesses and unemployed individuals.
- Mental health concerns continue. People are increasingly affected by news coverage of the pandemic and as the virus spreads, more of them have personal connections to those who become infected or pass away.
- There has been an increase in people sharing information on how to create your own masks at home.
- Online discussion is heavily focused on the federal government's role in distributing PPE to states and locals.

Washington

Healthcare Capacity

- Washington mental health officials plan to discharge or transfer as many as 60 patients from Western State Hospital, the state's largest psychiatric hospital, in order to reduce some of the stress that the virus has placed on staff at the 850-bed facility. Sixteen of their workers and six patients have tested positive for COVID-19 and one patient died. ([KIRO 7](#), [KOMO](#))
 - Comments on [KOMO's Facebook post](#) express annoyance at KOMO's headline which implied that these patients were all being discharged, rather than discharged or transferred. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))
 - Comments on the [KIRO 7 News Facebook post](#) draw parallels between this decision and the reported releases of prison inmates ([example 1](#), [example 2](#), [example 3](#), [example 4](#))

- Shuttered Yakima hospital to reopen; pandemic strains hospital finances in Pullman and Wenatchee. ([Northwest Public Broadcasting](#))
- Push is on to build more ventilators, find substitute machines for COVID-19. ([KIRO 7](#))
 - [Rep. Susan Del Bene](#): I joined my colleagues in calling on the administration to fulfill Governor Inslee's request for 1,000 ventilators and to establish a national ventilator strategy. We must guarantee every region receives the necessary amount of life-saving equipment.
- Three of Washington's largest health insurers have waived any out-of-pocket payments for medical treatments related to COVID-19. ([Seattle Times](#))

PPE

- Prison Staff in Washington State Given 'Expired' Face Masks to Reduce Spread of Coronavirus— But Use is Voluntary. ([Newsweek](#))
- Washington state tribes, allies mobilize to gather medical protection needed in coronavirus fight. ([Seattle Times](#))
- Seattle is one of first in nation to receive powerful new mask decontamination system. ([KATU](#))

Business and Economy

- SBA's \$349B Paycheck Protection Program rolled out Friday. Some experts believe that money will go far too quickly to satisfy the massive demand by small businesses that need help. ([Puget Sound Business Journal](#))
- Judging by the more than 12,000 seeking an exemption from Gov. Jay Inslee's "Stay Home, Stay Healthy" order — and the more than 7,000 complaints logged with the state alleging violations — there's not wide agreement on what businesses are "essential." ([Everett Herald](#))
- Shoppers make run on chicks, deplete Spokane farm supply stores. ([Spokesman-Review](#))

Treatment

- Coronavirus vaccine trials poised to go worldwide. The rush is on around the world to be first to develop a vaccine to fight the coronavirus. A Bothell man is one of 45 people taking part in the first human vaccine trials. ([KIRO 7](#))

Rumors and Misinformation

- Washington state nonprofit files lawsuit saying Fox News misled viewers about COVID-19. ([Seattle Times](#))
- [Lebanon Fire District](#) shared the [FEMA Rumor Control page](#) to protect against fraud and scams.

Oregon

PPE

- Governor Brown announced Saturday morning that the state will send 140 ventilators to New York to support COVID-19 response. ([Governor's Facebook](#), [Governor's Twitter](#)) Initial reactions have praised the move. ([example 1](#), [example 2](#), [example 3](#))
- Oregon gets old, faulty masks; other states get flawed equipment from national stockpile. ([KATU](#)) A spokesman for Oregon's governor reported masks with faulty elastic and PPE past the expiration date. In reaction people debate whether this is a serious concern or another example of ingratitude and negative reporting. ([example 1](#), [example 1](#), [example 3](#))
- Oregon residents assemble nearly 11,000 masks for health care workers. ([KATU 2](#))

Flattening the Curve

- A look inside the Oregon Office of Emergency Management's command center in Salem. ([KPTV12](#))
- There is growing optimism about Oregon's readiness for COVID-19 surge. ([OPB](#))

Business

- Laid-off workers are confounded by Oregon's overwhelmed jobless claims system. ([The Oregonian](#))
- Oregon small businesses may apply for federal coronavirus disaster loans. ([The Bulletin](#))
- Where unemployment is hitting Oregon the hardest. ([Portland Business Journal](#))
- Oregon hotel owner receives \$10k to keep doors open amid coronavirus pandemic. ([KATU2](#))

New Cases

- 13 people have recovered from coronavirus at Oregon veterans' home. ([KGW8](#), [KATU2](#)) People are celebrating and [grateful to receive some good news](#).

- Petitioners [call for release of some prisoners](#) amid COVID-19.

Idaho

- Idaho considers [closing schools for rest of the academic year](#). Decision will come Monday.
- Northwest Nazarene University [makes face masks for hospitals](#) using 3D printer.
- North Idaho state Representative, pastor, sheriff push back against Little's stay-at-home order. ([The Spokesman-Review](#), [KTVB](#))
 - The majority of reactions continue to strongly criticize the leaders for putting their personal freedoms ahead of people's lives, with some calling for the Representative to be held legally responsible for any constituent deaths caused by COVID-19. ([example 1](#), [example 2](#), [example 3](#)) A small minority of people agree with the North Idaho leaders. ([example 4](#))

Alaska

Response

- Alaskan interior's unified incident command prepares Fairbanks arena as alternate care site in case of patient surge. ([KTVF](#), [Daily News-Miner](#))
- Gov. Dunleavy issued a new health alert asking residents to wear masks in public settings. ([KTVF](#)) In response, residents are concerned that people are not staying home. ([example 1](#), [example 2](#)) People continue to praise the governor and Chief Medical Officer Zink for their leadership during the pandemic. ([example 3](#), [example 4](#))

Economy

- Airlines step in to fill the gap left by RavnAir—and they need workers. ([KYUK](#)) People [thanked](#) and [celebrated](#) the airlines.
- Faced with a 76% increase in unemployment applications in a week's time, Alaska expands Small Business Administration paycheck protection program. More economic stability measures to come next week. ([KTVA](#), [KTUU](#)) Residents continue to [blame state legislature](#) for insufficient economic support and remain [stressed over challenges accessing unemployment](#).

Tribal

- Tlingit & Haida Launches [Tribal Emergency Operations Center](#).

Subject: Please review: Stay home campaign drafts

Importance: High

Hi all,

Please review the attached DRAFT materials and track any edits/suggestions **by COB Monday, March 23**. Other materials, including a tip sheet for caregivers, are in the works. Laura and I are working with the agency heading up the Spread the Facts campaign to infuse this messaging into the overall campaign. More to come on that.

These materials serve as the basis and main key messages for:

- Infographics
- Digital ads
- Partner toolkit resources
- Talking points
- TV, radio, digital advertising

Best,
Kennedy

Please find the national social listening report attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 24, 2020 PM

SUMMARY

- Sheriffs' offices, police departments, and State Departments of Commerce in both Washington and Oregon work to dispel rumors stemming from their states' new Stay-at-Home orders.
- Personal protective equipment shortages in Oregon are covered by various media outlets, and Oregon Emergency Management has set up a website for donations of services and supplies.
- Idaho Board of Education orders schools closed statewide.
- In-person voting in the democratic primaries today in Alaska has been cancelled, replaced with mostly drop boxes and mail-in ballots with a new extended April 10th deadline.
- Businesses continue to be impacted and unemployment websites are crashing as the number of claims in the U.S. skyrocket.

Public Sentiment

- People continue to be confused by the nuances around Stay-at-Home mandates in Washington and Oregon and how they will be enforced.
- Idaho sees its largest one-day increase in coronavirus cases up to 77 total confirmed cases, and many continue to be critical of the Governor's response.

Washington

Rumor Control

- [Grant County Sheriff's Office](#): "Law enforcement is not being asked to detain, arrest, ticket or establish checkpoints for compliance. Rumors of strict law enforcement or 'martial law' are simply not true."
 - Comments on the [Grant County Sheriff's Office Facebook post](#) are overwhelmingly grateful for this information and clarification.
 - [One comment](#) asked about Governor Inslee's Stay-at-Home order and requests a full list of which businesses are essential or non-essential. To this, the Sheriff's Office [replied](#) that it would have to come from the Governor's Office and "we have not yet seen such a document."
- Ferndale Police respond to stay-at-home order. In a [Facebook post](#) Tuesday, the PD said they are not being asked to detain, arrest, or ticket those who don't comply with Inslee's stay-at-home order, and rumors of martial law are not true. ([KGMI](#))
- [Washington State Department of Commerce](#): Let's smash this myth: There is NOT a pass or letter required for "essential" workers to prove it's okay to go to work right now. ([West Seattle Blog](#))

Testing

- Spokane's drive-thru testing site relaxes requirements, but patients still need to have symptoms. Patients allowed to self-refer to the site now should have a fever and at least one

of the other two major symptoms: dry cough or difficulty breathing. They should also fall into a high-risk category. ([Inlander](#), [Tulalip News](#), [Snohomish Health District](#))

Stay-At-Home Order

- This is how Washington's stay-at-home order addresses people experiencing homelessness ([Seattle Times](#))

Medicine

- States say doctors are stockpiling trial coronavirus drugs — for themselves. Doctors are hoarding medications touted as possible coronavirus treatments by writing prescriptions for themselves and family members, according to pharmacy boards in states across the country. ([Seattle Times](#))
- Blood donations drop due to school closures of colleges and high schools due to the coronavirus. Bloodworks Northwest requires 1,000 donations a day to maintain a stable blood supply. ([Issaquah Reporter](#))

New Cases and Fatalities

- Clark County reports 3 new cases of coronavirus. The three were all people in their 40s -- two women recovering at home and a man who has been hospitalized. ([Oregonian](#))
- COVID-19 leads to death of Wenatchee care facility resident. The death is the second coronavirus-related fatality in the Wenatchee Valley, which so far has seen a total of nine positive cases of COVID-19. ([NCW Life](#))

Business

- Skagit County's two flour mills have increased production to ensure there is enough to feed the community. The mills have been selling directly to customers. ([Go Skagit](#))
- Domino's Pizza is looking to hire about 1,000 new employees in the Seattle area to meet increased demand. ([The News Tribune](#))
- WA distilleries convert operations, begin producing hand sanitizer ([KATU](#))
- Dry Fly Distilling is making and distributing a hand sanitizer – “Spokanitizer” – to the community. ([The Spokesman-Review](#))

Closures

- Mount Rainier National Park closed to the public to help slow spread of coronavirus. ([News Tribune](#))
- Bainbridge parks no longer allowing vehicle access. ([Bainbridge Island Review](#))

Shortages

- Bullets are joining toilet paper, hand sanitizer, and rice as another item in short supply on store shelves because of the COVID-19 outbreak. ([Tri-City Herald](#))

Oregon

PPE

- Oregon health centers receiving nearly \$1.9 M from HHS ([KATU2](#)).
- Personal protective equipment (PPE) shortages are being covered by various media outlets. ([Portland Business Journal](#), [OPB](#), [Portland Mercury](#))
- A fabric chain in Oregon shares resources to help with face mask shortage. ([FOX 12](#))
- Oregon Emergency Management has set up a website for donations of services or supplies. ([OEM](#), [City of Tualatin](#))
- Drop sites to donate PPE have been set up Bend High and La Pine High with more sites expected to open next week. ([The Source Weekly](#))

Rumor Control

- [Malheur County Sheriff's Office](#): "The following should address any of the rumors that are going around about the State and local response to the COVID-19 outbreak. Based on the Governor's press release, she is only asking 'Stay Home, Save Lives.' She will NOT call this a 'Shelter in Place' order."
 - Comments on the [Malheur County Sheriff's Office Facebook post](#) are overwhelmingly appreciative of this clarification. One person calls the Governor's mandate “moot” given that the county has several state border crossings and Idaho’s response is not as strict. ([example](#))

Business

- Businesses and residents are still trying to understand what the Stay-at-Home order from Gov. Brown means ([Statesman Journal](#), [The Oregonian](#), [NYT](#), [KOIN](#)), particularly in rural parts of the state ([KGW8](#), [The Oregonian](#)).
- Portland Mayor Ted Wheeler held a press conference with the latest information on the city's coronavirus response. On the [KATU News](#) livestream on Facebook, reactions were mixed about the response and the state's Stay-at-Home mandate ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#)).
- Coronavirus in Oregon: Independent contractors barred from working have few options for financial relief ([Oregonian](#))
- Unemployment websites are crashing as the number of claims in the U.S. skyrocket because of the coronavirus outbreak. The high volume of traffic has caused interruptions in service in several states including Oregon. ([Newsweek](#))
- Companies seek thousands of new employees amid the coronavirus pandemic ([My Central Oregon](#))
- Lane Transit District buses remain in service despite new executive order ([KEZI](#))
- Local distilleries pivot to making hand sanitizer during coronavirus pandemic. ([KDRV](#))

New Cases and Fatalities

- Three more COVID-19 related deaths, total cases at 209. ([KATU2](#), [KDRV 12](#), [KPTV12](#), [KGW8](#))

Alaska

New Cases

- Alaska's total number of positive COVID-19 cases is now at 39 after Ketchikan announced two new cases Tuesday. The Kenai Peninsula Borough had announced one new case in Sterling on Monday night. ([Homer News](#))

Testing and Health Services

- Capstone Clinic off Seward Meridian recently opened a special COVID-19 testing unit in their parking lot for Mat-Su Valley residents. It's open seven days a week offering drive-through testing for coronavirus. ([Mat-Su Valley Frontiersman](#))
- Legislature expands Alaskans' access to mental health services. ([KINY](#))

Schools

- 'There's sunshine again': Thousands of meals delivered daily to Anchorage students as coronavirus closes classrooms. An ASD bus filled with hundreds of bagged meals, dozens of milk cartons, a school nurse and two cafeteria employees is making food deliveries in Anchorage. ([Alaska Public Media](#))
- ASD confirms Chugiak High staffer tested positive for COVID-19. Staff members at two Anchorage high schools were sent home Monday morning after an employee at one of them tested positive for coronavirus, ASD officials said. ([KTUU](#))
- Pack up and go: Boarding school seniors finish amidst uncertainty. ([The Arctic Sounder](#))

Business

- Red Dog Mine restricts worker travel to keep COVID-19 out of mine site and nearby villages. ([Anchorage Daily News](#))

Social Distancing

- [Alaska Health and Social Services](#): Alaska kids can still get out and play during social distancing, but they should avoid indoor play dates. Communities across Alaska are now recommending hunker-down and shelter-in-place guidelines. ([Play Every Day Blog](#))
- Bethel City Council can't restrict travel or issue Stay-at-Home mandate because it's a second class city ([KYUK](#))

Closures and Postponements

- In-person voting in the democratic primaries today has been cancelled, replaced with mostly drop boxes and mail-in ballots with a new extended April 10th deadline. ([CNN](#)) The [Anchorage Ombudsman](#) announced that 5 out of 6 accessible voting centers will not open today.
- The Trump Administration has postponed the REAL ID deadline, but not yet announced a new date. The previous [deadline for Alaskans to get a Real ID was Oct. 1](#), other identification cards can be used before and after that date to fly including passports, military IDs and tribal IDs. ([KTUU](#))

Idaho

Government Response

- Op-Ed: Idaho Gov. Brad Little is blowing it with his response to our coronavirus outbreak ([Idaho Statesman](#)).
 - Comments on the [Idaho Statesman's Facebook post](#) are divided with some feeling that the Governor is being rational and reacting proportionally given Iowa's relatively low case numbers ([example 1](#), [example 2](#), [example 3](#), [example 4](#)) and others argue this is an opportunity to flatten the curve and take more proactive measures ([example 5](#), [example 6](#), [example 7](#), [example 8](#), [example 9](#), [example 10](#)).
- Despite big jump, Little resists calls for stricter measures. Idaho sees its largest one-day increase in coronavirus cases. ([The Lewiston Tribune](#))
 - Comments are skeptical of social distancing ([example 1](#)) with one person saying that people who want to stay home can do so, but he can't afford not to work when things aren't "that bad" in Idaho ([example 2](#)).

New Cases

- Idaho now up to 77 confirmed Coronavirus cases. ([Idaho News](#))
- First cases of novel coronavirus reported in Jefferson County ([East Idaho News](#))

Schools

- Idaho Board of Education orders schools closed statewide. Until Monday evening, Idaho was one of just a few states still leaving the decision of school closures up to local officials. ([Coeur d'Alene Press](#))

Donations

- The Salvation Army Kroc Center in Coeur d'Alene has created a drop-off and distribution center to collect community donations to support local law enforcement agencies, as well as fire and emergency medical services. ([Coeur d'Alene Press](#))
- Saint Alphonsus hospital workers help with critically-low blood shortage. ([KIVI](#))

Business

- Silver Valley businesses embrace alternative methods. ([Shoshone News Press](#))

Housing

- Apartment landlords have a plan that could help renters affected by COVID-19 pandemic. ([KIDK 3](#))
- Another Possible Victim Of COVID-19: Renters Facing Eviction. Housing experts say that, come April 1, they're expecting a rising tide of renters facing possible eviction. ([Boise State Public Radio](#))

Coronavirus_(COVID-19)_Pandemic:_W hole-of-America_Response_-_April_24

April 24, 2020 at 2:15 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 24, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 22**, HHS launched [Telehealth.hhs.gov](#). The site is a central source of information on telehealth resources and tools for patients and providers.
 - In his blog post "[Health Providers: Join the Telehealth Revolution](#)," the Surgeon General of the United States, Vice Admiral Jerome M. Adams M.D.,

- M.P.H., outlines the benefits of using telemedicine tools.
- Working from the safety of home, these tools allow clinicians to perform virtual visits, refill and adjust essential medications, and modify treatments that will preserve and improve conditions that if left untreated, put patients at risk.
- As of **April 23**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 105 million surgical masks, 6.7 million face shields, 14.9 million surgical gowns, 747 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - The U.S. has now processed 4.9 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Subject: Notification of a Major Disaster Declaration for the State of Washington (FEMA-4539-DR-WA)

Importance: High

STATE OF WASHINGTON

FEDERAL DISASTER DECLARATION FACT SHEET

APRIL 23, 2020

Today, April 23, 2020, President Donald J. Trump granted a Major Disaster Declaration for the State of Washington triggering the release of Federal funds to help communities recover from Severe Storms, Flooding, Landslides, and Mudslides that occurred January 20 to February 10, 2020. Details of the disaster declaration and assistance programs are as follows:

Declaration Number:	FEMA-4539-DR
Incident: and Mudslides	Severe Storms, Flooding, Landslides,
Incident Period:	January 20 to February 10, 2020
Federal Coordinating Officer:	Timothy B. Manner National FCO Program
Individual Assistance (IA):	(Assistance to individuals and

households):

IA-Designated Areas:

Under Review.

Public Assistance (PA):

(Assistance for emergency work and the repair or replacement of disaster-damaged facilities):

PA-Designated Areas:

Columbia, Garfield, Grays Harbor, Island, King, Lewis, Mason, Pacific, San Juan, Skagit, Snohomish, Thurston, Wahkiakum, Walla Walla, and Whatcom Counties.

Hazard Mitigation (HM):

(Assistance for actions taken to prevent or reduce long term risk to life and property from natural hazards):

HM-Designated Areas:

All areas in the State of Washington are eligible for assistance under the Hazard Mitigation Grant Program.

OTHER:

Additional designations may be made at a later date if requested by the State and warranted by the results of further assessments.

For your reference, I have attached fact sheets on the Public Assistance and Hazard Mitigation Grant programs.

If you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

In service,

Sarah

Department of Homeland Security _Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

March 13, 2020 at 4:14 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a [Notice of Arrival Restrictions](#) outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best

practices.

“While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.,” said Acting Secretary Wolf. “To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them.”

Wolf continued: “I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities.”

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th [presidential proclamation](#) which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

FYI - Information on the Commerce Grants

April 01, 2020 at 4:16 PM EDT

To: Schitoskey, Frank C (DOH), Scarlett, Kevin A (DOH), Clifford, Wayne (DOH), Frank, Dan (DOH), DOH-ISOTF (DOH), Baumgart, Jim (GOV), Urbas, Gary (MIL), Slusher, Theresa M, Dave.csernak@hhs.wa.gov, lisa.davidson@fema.dhs.gov

Commerce COVID-19 Emergency Housing Grant

The Department of Commerce released contracts for signature to all 39 counties on March, 16. Some counties opted-out of receiving the funds directly; in those cases Commerce contracted with another local government (cities) or a non-profit organization. All counties have fully executed contracts containing this funding.

\$30 million in total funding was awarded using a formula that gave each county at least \$250,000, with the balance distributed based on the number of people who are homeless in each county.

The funding has a primary focus of giving counties capacity to create Quarantine and Isolation beds.

Funding can also be used to increase sanitation in shelters, add shelter capacity to replace beds lost when beds were separated by six feet, and "other costs."

"Other costs" is very broad: "[contract language]...other costs associated with addressing the public health needs of people experiencing homelessness, living in subsidized housing, or displaced from their former housing due to the COVID-19 outbreak."

Allowable uses of the funds are very broad: operating, capital construction, land acquisition, staffing, food, etc., etc.,

Who can served with the funds is broad:

[Contract language] The primary purpose of this grant is addressing the health needs of people unsheltered or living in homeless housing, or who are in need of isolation or quarantine housing due to the COVID-19 outbreak. Documentation of the housing status of people housed or served by these funds is not necessary. Funds can be used to provide housing and other services to people who are not living unsheltered or in homeless housing, as long as the expenditures are in good faith realistically available to people who are unsheltered or living in homeless housing.

Commerce can unilaterally amend contract language to clarify allowable uses in less than 24 hours if necessary.

Activities funded by the grant must be approved in writing by the local public health officer.

More details can be found at the following link, including contract language, award amounts, FAQ's, etc. Look for "COVID-19 Emergency Housing Grants to Counties" about halfway down the page:

<https://www.commerce.wa.gov/covid-19-homeless-services/>

County reporting and plans can be found here (private group, do not share widely):

FEMA Stakeholder Advisory: FEMA Announces Free Access to Software Solutions and Licensed Datasets to Aid Non-Federal Governmental Entities in Response to COVID-19

March 29, 2020 at 10:21 AM EDT

To: Undisclosed recipients:

Office of External Affairs
U.S. Department of Homeland Security
Washington, DC 20472

FEMA

March 28, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

FEMA Announces Free Access to Software Solutions and Licensed Datasets to Aid Non-Federal Governmental Entities in Response to COVID-19

The Department of Homeland Security has an Enterprise License Agreement with the Environmental Systems Research Institute (Esri) that allows DHS/FEMA the ability to extend that agreement to our governmental partners during an “incident of national significance.” Therefore, state, local, tribal and territorial governmental entities can now obtain free access to Esri software solutions for up to six months to help them respond to COVID-19. Esri provides geographic information system (GIS) software, web GIS and geodatabase management applications.

For those who would like to take advantage of this opportunity, choose “[Request Assistance](#)” in the red banner, and then select “COVID-19 Response Package” within “support options.” The package contains software, templates and suggested data schemas. For current Esri customers, you can also access [free templates](#) specific for the COVID-19 response.

Additionally, Esri is offering free GIS technology and on-call technical expert help for organizations that have exceeded their GIS capacity and need emergency support. Esri is also providing data, software, configuration and technical support for applications.

Homeland Infrastructure Foundation-Level Data

The National Geospatial Intelligence Agency (NGA) has released all applicable licensed datasets to local, state, tribal, and territorial users with COVID-19 operational needs. NGA is providing access to non-federal governmental disaster/emergency response security agencies and personnel who are supporting Homeland Security/Homeland Defense missions per the current Homeland

Infrastructure Foundation-Level Data (HIFLD) Data Use Agreement. **Please note** this expanded access will expire once the current declaration of a national emergency ends.

This expanded access covers these additional data products:

- Licensed Parcel Data
- 2020 Roads and Routing Dataset
- Dun & Bradstreet Business Points Data

For current users: NGA has automatically adjusted access for mission partners with a signed Data Use Agreement in place and no further action is needed. Please visit the [Geospatial Information Infrastructure](#) to interact with this data. Contact DHS_GCOE@hq.dhs.gov should you need assistance.

For first-time users: Go to the [HIFLD Subcommittee Home Page](#) and choose “Request Licensed Data.” Complete the Disaster Use Agreement using “COVID-19” as the reference number. Once approved by NGA, you will receive access within 24 hours. Please note, before you can complete a Data User Agreement and access this data, you must have valid [Homeland Security Information Network credentials](#). Should you have questions, please contact HIFLD@hq.dhs.gov.

DISCLAIMER: Reference to any commercial products or services in this announcement is not an endorsement or Government sanction of those non-Federal entities, its services or products.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Taskforce DRAFT documents

April 02, 2020 at 7:09 PM EDT

To: DOH-ISOTF (DOH), Scarlett, Kevin A (DOH), Clifford, Wayne (DOH), Frank, Dan (DOH), David.Csernak@hhs.gov, Carrell, Rebecca S (HCA), Rector, Bea-Alise (DSHS/ALTSA), Kelleher, Tedd (COM), seoc43 (MIL), seoc44 (MIL)

Cc: nicolas.granum@fema.dhs.gov, Baumgart, Jim (GOV), Urbas, Gary (MIL), Rebecca.bova@fema.dhs.gov, David.Clayton@fema.dhs.gov, Simons, Matt C (DOH), Zimmerman, Matthew S (DOH), Lisa.davidson@fema.dhs.gov, Linares-Hengen, Travis (MIL), Lujan, Lewis (MIL), seoc90 (MIL), seoc100 (MIL), Schmitz, Lou (DOHi), Covington, Trevor N (DOH)

Taskforce members,

Teammates and colleagues. As you are aware we are assisting in a rapidly evolving situation. Some are new to this group so please excuse me if I seem redundant. As you can see we are a diverse group each with their own critical expertise and we are all critical in facilitating the success of local health jurisdiction. Key points to remember as we go forward.

- Isolation Center is a clinical facility that normally does not exist
- Our role is to facilitate the success and provide resources for decision making
- What we do needs to be applicable all over the state. There are 100s of right answers, we need to help the

I wanted to relay our task and purpose:

Mission

The Statewide Isolation Task Force will expand the capacity in Washington State to conduct isolation operations in support of non-pharmaceutical intervention mitigation strategies in response to the COVID-19 pandemic.

KEY TASKS

- Identify existing local isolation capacity **Raw Commerce data has been received. Projects 7410 Isolation bed need state-wide, Current capability is 3041 isolation bed need.**
- Determine requirement for isolation capability **Projects 7410 Isolation bed need state-wide,**
- Identify gaps in the current local partners isolation capabilities **Current shortage of 4369 beds**
- Enable local partners to create isolation facilities . **Guidebook and checklist in progress**
- As needed, establish WA State run isolation facilities in areas where local partners are unable to **We have the capability but would need to use the protocol ourselves**

Tasks underdevelopment

- Isolation guidebook (draft enclosed)
- Pre-execution checklist/support request (draft included)
- Quarantine Guidebook
- Reporting requirements from the health jurisdiction
- Tools to prioritize support
 - Epidemiological data

- Time to be up and running
- Thresholds for reporting need before a facility is saturated

What I need from everyone

Please critique the enclosed documents for content. (don't be kind) I need to know if we are missing anything. If you are tasked with a section or have completed a task in the section check it for consistency or inspiration (no one is late, just. I have a chapter called "operational considerations". These are thoughts I had as I was writing that need to be addressed and may be in your individual taskings. This is a dialog. I intend to have a meeting tomorrow if I can to go over the product and set deadlines and perhaps different taskings. I am not concerned with formatting at this point.

Let me end by saying everyone has been awesome to work with. What we are doing WILL SAVE LIVES and we will never know how many and few will know of our efforts if we do it right. I will and I am excited to be working with you all.

I look forward to your feedback

Frank C. Schitoskey, RN, BSN, MN

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

WEEKLY UPDATE: DHS RESPONSE TO COVID-19

WASHINGTON - The Department of Homeland Security's efforts across its components last week have facilitated a speedy, whole-of-government response to confronting COVID-19 and slowing the spread to keep Americans safe. FEMA is leading the way by carrying out an approach that is locally executed, state managed, and federally supported.

"Protecting both the health and national security of the American people continues to be the top priority for the Department of Homeland Security," said Acting Secretary Chad F. Wolf. "I want to thank the men and women of the DHS workforce for their resilience as they put themselves at risk every day to protect the American people."

Below is a list of some of DHS's efforts against COVID-19 last week:

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

Total Obligations to States. As of April 5th, FEMA has obligated nearly \$4.1 billion in support of COVID-19 response efforts.

Project Air-Bridge. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge:

- From March 30th to April 5th, 10 flights arrived to the U.S with critical supplies.
- The cargo moved so far totals almost 83.5 million gloves, almost 5 million surgical masks, and 1.2 million gowns.
- Upon arrival, the PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization is given to hospitals, health care facilities, and nursing homes around the country.
- 23 additional flights are currently scheduled through April 18.

Ventilator Distribution. FEMA is distributing ventilators to hard hit states. From March 30th to April 4th, FEMA and HHS delivered ventilators from the Strategic National Stockpile to Michigan, New Jersey, Illinois, Connecticut, and Louisiana.

CUSTOMS AND BORDER PROTECTION (CBP)

Keeping Critical Cargo and Trade Moving. CBP continues to process commercial cargo. Approximately \$21B worth of goods crossed back and forth over the borders of U.S, Mexico, and Canada from March 30th to April 5th .

Working to Reduce Illegal Entries. CBP agents encountered nearly 4,200 migrants crossing illegally at the U.S. Southern border daily, compared to nearly 10,000 encounters daily prior to the current containment efforts.

Facilitating Critical PPE Deliveries. CBP lifted a Withhold Release Order that had barred importation of disposable rubber gloves which our health care workers and law enforcement personnel so desperately need right now.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Working with the Department of State, ICE continues to bring Americans home on the return leg of removal flights to Central America. As of April 5th, ICE has flown 853 U.S. citizens and legal permanent residents home on removal flights from Colombia, El Salvador, Honduras, and Nicaragua since the first flight on March 22.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Air Travelers Secure. Due to the pandemic and travel restrictions, TSA continues to screen a significantly reduced number of passengers. From March 27th to April 2nd, TSA successfully screened 1,124,145 travelers ensuring individuals reached their destinations safely.

CYBERSECURITY AND INFRASTRUCTURE SECURITY AGENCY (CISA)

Essential Critical Infrastructure Workers. CISA recently updated its list of essential critical infrastructure workers. As of April 5th, 20 states and territories have published Essential Business Designations.

Election Security Work Continues. CISA coordinated calls between the election community and the United States Postal Service (USPS) and Centers for Disease Control (CDC) to ensure that election officials have the most up to date information and advice from the experts at these agencies regarding COVID-19.

Helping the Private Sector Assess Risk. CISA released a guide titled Risk Management for Novel Coronavirus to assist executives in thinking through physical, supply chain, and cybersecurity issues that may arise from the spread of COVID-19.

UNITED STATES COAST GUARD (USCG)

Facilitating the Offload of Cruise Ships. On April 2nd, the Coast Guard facilitated the offload of more than 1,200 passengers from cruise ships Zaandam and Rotterdam in Port Everglade, FL after it was reported that crewmembers and passengers were infected with COVID-19.

U.S. CITIZENSHIP AND IMMIGRATION SERVICES (USCIS)

Making Extensions for Employment Authorization Easier. On March 30th , U.S. Citizenship and Immigration Services announced that it will reuse previously submitted biometrics

in order to process valid Form I-765, Application for Employment Authorization, extension requests due to the temporary closure of Application Support Centers (ASC) to the public.

Target Date to Reopen Offices. On April 1st, USCIS announced offices temporarily suspended will begin to reopen on May 4th unless the public closures are extended further to help slow the spread of COVID-19.

COUNTERING WEAPONS OF MASS DESTRUCTION (CWMD)

Medical Screening at Airports. CWMD contract personnel are continuing to support CDC with enhanced screening at 13 airports. From March 29th to April 5th, CBP referred 7,565 travelers to CWMD for enhanced screening. As of April 5th, over 265,647 travelers have been referred to CWMD for screening.

SCIENCE AND TECHNOLOGY (S&T)

Coronavirus Research. S&T's National Biodefense Analysis and Countermeasures Center (NBACC) continued researching the impact of environmental conditions, such as temperature and humidity, to determine the virus's survivability in the air, in respiratory fluids, and on various types of surfaces. Additional research includes decontamination methods to determine the most effective materials to clean and disinfect surfaces to rid them of the virus.

Consolidating COVID-19 Data for Government Officials. On April 1st, the NBACC updated the Master Question List (MQL), a compilation of available research and information on operationally-relevant questions.

Phone: 202-646-3444

Advisory

Coronavirus (COVID-19) Pandemic - Ventilator Request

Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted the process below to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis. In the case of ventilators, immediate is defined as requirements necessary to sustain life within a 72-hour window.

To submit a request, states and tribes will work through their FEMA/ HHS regional leadership. In order for a request to be processed, the state/tribe must provide detailed responses to the following five questions:

1. How many usable ventilators, ICU beds, and convertible ventilators are currently available within the state or tribe?
2. What is the current hospital bed and ICU bed occupancy rate in the state/tribe?
3. How many new ICU beds does the state/tribe estimate it can stand-up **and** the number of ventilators, or FDA-approved [ventilator alternatives](#), it can or is standing up?
4. What is the decompression ability of hospitals in the state/tribe (i.e.: are there currently field hospitals or alternate care facilities established)?
5. How many anesthesia machines are in the state/tribe **and** have they been converted?

Once the requesting state or tribe provides the FEMA/ HHS Region with the answers to these five questions, then the requirement is validated at the Regional level and forwarded to FEMA's National Response Coordination Center (NRCC) for processing.

At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.

In addition to submitting requests through this process, state, and tribal officials are encouraged to

share the FDA's [Emergency Use Authorization \(EUA\) for Ventilators](#) issued on March 24. The EUA allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The EUA also provides guidance to assist health care personnel on use of other ventilators like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_11

April 11, 2020 at 2:36 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 11, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and

- number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - On April 10, HHS Secretary Azar sent a follow up letter to hospital administrators, reinforcing the need for this data to be provided daily to facilitate planning, monitoring, and resource allocation in response to COVID-19.
 - Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them.
 - The letter included a set of frequently asked questions that details federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information.
 - These FAQs will be updated if additional data delivery methods become available.
 - The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.
- On April 10, HHS began delivering the initial \$30 billion in relief funding to providers in support of the national response to COVID-19, with \$26 of the \$30 billion expected to be delivered to providers' bank accounts the same day.
 - The payments are part of the distribution of the \$100 billion provider relief fund included in the CARES Act.
 - To expedite providers getting money as quickly as possible, the initial funding was distributed immediately proportionate to providers' share of Medicare fee-for-service reimbursements in 2019.
 - The Administration is rapidly working on future targeted distributions to hospitals and providers that will focus on providers in areas particularly impacted by COVID-19, rural providers, and providers with lower shares of Medicare reimbursement or who predominantly serve the Medicaid population.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132

ventilators by June 1.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

Hi All – Thanks for participating in today’s initial planning meeting.

Please send your replies to lisa.davidson@fema.dhs.gov. A consolidated list will be provided prior to tomorrow's meeting.

Here are the RFIs and due outs for the Friday 3/20/20 12pm PST follow-up call:

Requests for Information (RFI) to State:

- **Regional vs. Individual Jurisdiction Approach** – is the State’s intent to continue with processing this RRF for King County or does it intend to address these needs in its regional planning approach?
- **Medical Team Capability** – what is the capability that needs to be support by the RRF? Specifically, what is the anticipated number of patients and acuity? This information will help inform the staffing needs vs. the current list of #'s by position
- **Quantity of Centers** – given limitation on resources, what options are there to pursue a single facility vs. six?
- **Type of Center** – fixed facility vs. soft sided structure
- **Status of Centers** and requested line items:

Center	Location (Address and/or local jurisdiction)	Status (contracted, in negotiations, etc.)	Facility type (fixed, land, soft- sided)	Capacity	Operating Status (date open or required, current occupancy, etc.)	Remaining Requirements (are the needs identified in the RRF current)
1						
2						
3						
4						
5						
6						

- **Feeding** – specific requirements, i.e. is the need delivery of resources, food preparations,

volunteers/staff?

- **Associated needs** – what is the plan for:
 - access and functional needs
 - mental health support in the centers
 - pet support (comfort/service/household)
 - security – of facility, for staff/patient safety, quarantine enforcement; is there a need for ESF13 support?

Due Outs for Federal Partners

- Description of Agency/Program Capability to support – specific line items vs. entire mission
- Estimated Timeline for execution

Thank you,

Lisa Davidson

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton,

Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but I've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-

lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).

- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDCs located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
 - We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>
- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

Coronavirus_(COVID-19)_Pandemic:_A_pplying_the_Defense_Production_Act

April 14, 2020 at 6:01 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below, and attached fact sheet, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Defense Production Act.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are [executing a four-pronged approach](#) to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation**.

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19 response, please review the attached fact sheet.

Subject: Master Lease - Alternate Care Facilities (isolation)

Chris,

In speaking with the executive team and the Unified Area Command leadership, I'd like to move forward on securing facilities for use as isolation centers. We have concurrence from CDC, HHS, DOH, and EMD regarding the site requirements for isolation facilities. These include:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - o Select rooms with individual ventilation system or a room with a non-recirculating air
 - o If recirculation of air from isolations rooms to other rooms in unavoidable, HEPA filters should be installed in the exhaust ducts.
 - o If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal
- Access and functional needs
- Space considerations for staff
 - o PPE donning/doffing space or area.
 - o Space for light nursing care
 - o Administrative space for medical records processing
 - o Areas or rooms for housing staff staying overnight with bathroom facilities.

- Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support
- Mental health support

Mr Stacey McClain from Emergency Management is coordinating the multi-agency site survey teams. These teams could have representatives from DOH, EMD, USACE, HHS, FEMA based on needs. Please let Stacey know if you need assistance in site survey.

Size is scalable; however, we are looking at capacity within Snohomish, King, Pierce and Thurston counties. Total capacity across those counties should be 2,250 – 5,000.

Health Care Authority is still examining if licensing the facility is required and what possible reimbursement beyond HHS and FEMA authorities is available.

DOH is still discussing what they staffing model for this will look like; however, I suspect it will have some facility operations staff supported with light nursing.

Sincerely,
Jim

RE: WASOC Isolation and Quarantine Workgroup Draft

March 27, 2020 at 12:53 PM EDT

To: Davidson, Lisa, seoc44 (MIL), IMT7 Operations (OS/ASPR), Granum, Nicolas, Baumgart, Jim (GOV), Kelleher, Tedd (COM), Urbas, Gary (MIL), Bova, Rebecca

Hi Lisa,

Attached are some edits from DOH's perspective. Your team has done great work. My edits are pretty simple, I just included these points under the Mission section:

Task Force Members will ensure that the:

- Mission is conducted in a manner that accounts for HIPAA compliance.
- Captured and displayed data should ensure the protection of Personally Identifiable Information (PII) of individuals utilizing these I&Q services.
- Communications and engagement of stakeholders will be conducted in a manner that is equitable.
- Data gathered will be analyzed and consolidated in a manner that will ensure sensitive information is shared on an as needed basis.

Since this work will need to live through staff rotations, I want to make sure that we are writing down our common understanding around handling data and information with care. We are all wanting to support people and help alleviate the burden of what can be someone's worst experience in their lives. In our urgency I want to make sure that we are methodical and maintaining awareness on these above items.

Matthew

Subject: WASOC Isolation and Quarantine Workgroup Draft

Hi All,

Not sure if you were able to join our call earlier, but we kicked off the Spectrum of Care Taskforce today. You have been identified as points of contact for the Isolation and Quarantine workgroup. This workgroup is not intended to replace or duplicate the work that you are already undertaking, but provide a means of collaboration, coordination, and situational awareness across all levels of care that are ongoing during this response.

Please review the draft conops and workgroup documents. We put some thoughts and ideas down as a starting point, but ask that you review the workgroup draft and update it with contact information for additional members of your workgroup, EEI/CIRS, and other recommended changes.

Please provide your feedback by COB Friday, 3/27/20.

Let me know if you want to set up a time to discuss.

Thank you,

Lisa Davidson

Office of Intergovernmental Affairs (IGA)

Fact Sheet: DHS Measures on the Border to Limit the Further Spread of Coronavirus

March 23, 2020 at 12:23 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Release Date:

March 23, 2020

<https://www.dhs.gov/news/2020/03/23/fact-sheet-dhs-measures-border-limit-further-spread-coronavirus>

In order to limit the further spread of coronavirus, the U.S. has reached agreements with both Canada and Mexico to limit all non-essential travel across borders. Working closely and collaboratively, the Department of Homeland Security is part of a North American approach to stop the spread of the virus.

Additionally, CBP will no longer detain illegal immigrants in our holding facilities and will immediately return these aliens to the country they entered from – Canada or Mexico. Where such a return is not possible, CBP will return these aliens to their country of origin.

These measures will be implemented on March 21, 2020 and will be in place for 30 days, at which point they will be reviewed by both parties.

The U.S., Mexican, and Canadian governments are taking necessary action to fight against this pandemic together.

Northern Border

- March 20, 2020: [Joint Statement on US-Canada Joint Initiative: Temporary Restriction of Traveler Crossing the US-Canada Land Border for Non-Essential Purposes](#)

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars daily cross-border trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries.

supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Southern Border

- March 20, 2020: [Joint Statement on US-Mexico Joint Initiative to Combat the COVID-19 Pandemic](#)

The strong partnership and close cooperation between the United States and Mexico has allowed us to maintain a productive border environment. We value the health and safety of our citizens and keep that at the forefront of joint decisions made by our respective leaders regarding cross-border operations.

Recognizing the robust trade relationship between the United States and Mexico, we agree our two countries' response to the ongoing global and regional health situation, require particular measures both to protect border trade and our countries' economies and ensure the health of our nations' citizens. We agree to the need for a dedicated joint effort to prevent spread of the COVID-19 virus and address the economic effects resulting from reduced mobility along our shared border.

The U.S. and Mexican governments further recognize critical services such as food, fuel, healthcare and life-saving medicines must reach people on both sides of the border every day. Essential travel must therefore continue unimpeded during this time. In order to ensure that essential travel can continue, the United States and Mexico are also temporarily restricting all non-essential travel across its borders.

"Non-essential" travel includes travel that is considered tourism or recreational in nature. Additionally, we are encouraging people to exercise caution by avoiding unnecessary contact with others.

This collaborative and reciprocal initiative is an extension of our nations' prudent approach that values the health and safety of our citizens in the joint decisions made by our respective leaders regarding cross-border operations.

This joint initiative will commence at 00:01 Saturday March 21 throughout the US-Mexico land border for a period of 30 days subject to extension upon review.

Detention Facilities

CBP is the first line of defense of our nation's borders. To help prevent the introduction of COVID-19 into

border facilities and into our country, aliens subject to the order will not be held in congregate areas for processing by CBP and instead will immediately be turned away from ports of entry.

Those encountered between ports of entry after illegally crossing the border similarly will not be held in congregate areas for processing and instead, to the maximum extent feasible, will immediately be returned to their country of last transit. These aliens are processed in stations designed for short-term processing, where distancing is not a viable option, creating a serious danger of an outbreak.

The Centers for Disease Control and Prevention (CDC) has determined that these conditions present a serious infection control challenge and are a risk to public health. Should an outbreak occur at these facilities, local medical facilities would be forced to devote extensive resources and may become overwhelmed.

This action will also protect the health of our country's dedicated border agents and other law enforcement personnel, who are vital to the security of our Nation.

Apprehension of illegal immigrants along both borders between POEs:

- *Migrants from Coronavirus Impacted Areas:* Since the beginning of the FY20 fiscal year in October through the end of February 2020 (over the period of October 1, 2019 to February 29, 2020), foreign nationals from 122 separate countries have been apprehended or denied entry (inadmissible) at the Southwest border, for a total of over 190,000 apprehended or inadmissible migrants from countries currently with confirmed COVID cases.
- *Size and Scale:* Every week, CBP apprehends between 7,000 – 9,000 individuals between ports of entry —the equivalent of 2.5 Diamond Princess cruise ships per week.
- *Human-to-human Spread:* The spread of coronavirus is exacerbated by human-to-human transmission and the need for detention. CBP law enforcement facilities are for short-term holding and do not provide for needed large-scale isolation, diagnosis, or treatment of such a novel disease.
- *CBP Facilities:* CBP facilities are not structured or equipped to effectively quarantine an infected population. CBP would be forced to rely on state and local hospitals to provide longer-term medical care for individuals who fall ill, further burdening our strained healthcare system and depriving American citizens of key medical resources.

Although CBP has policies and procedures in place to handle transmittable diseases, COVID-19 will impact already strained holding capacities and place an extreme burden on what is forecasted to be a stretched healthcare system and the nation's critical medical professionals who are needed to attend to U.S. citizens and legal residents.

Migrants should shelter-in-place in their homes and communities, rather than attempting a long and dangerous journey to the United States borders at the hands of traffickers and smugglers.

U.S. Citizens:

U.S. citizens, lawful permanent residents and certain other travelers are exempt from this action. They will receive the same processing, evaluation and potential CDC medical screening that all entrants undergo at Ports of Entry.

Authority:

Effective at March 21, 2020 at 12:00 a.m. EDT, CBP will, as authorized, implement CDC authority under U.S.C. § 265 to prohibit entry of certain persons into the United States. CBP will assist the Department of Health and Human Services' (HHS) and U.S. Centers for Disease Control and Prevention (CDC) to protect against the spread of the novel coronavirus (COVID-19) by implementing the emergency authorities under U.S.C. § 265 at the nation's land borders to prohibit the introduction of certain persons in the interest of public health.

“Essential travel,” which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the US;
- Individuals traveling for medical purposes (e.g., to receive medical treatment in the US);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (e.g., individuals working in the farming or agriculture industry who must travel between the US and Canada or the US and Mexico in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (e.g., government officials or emergency responders entering the US to support Federal, state, local, tribal, or territorial government efforts to respond to COVID-19 or other emergencies);
- Individuals engaged in lawful cross-border trade (e.g., truck drivers supporting the movement of cargo between the US and Canada or the US and Mexico);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the US; and
- Individuals engaged in military-related travel or operations.

Good afternoon, all, and thanks very much for your assistance.

Congresswoman Jayapal is free all morning, but I know several other members of the WA delegation are eager to participate as well but I know at least Reps. Larsen and Heck have conflicts in the late morning. If you have flexibility and can arrange for one tour in the 9-10:30 am window, I know their teams would appreciate it.

Best,
Gautam

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell – I appreciate all your support over the last few days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available?
Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that's easier.

Best,
Stephanie

Cc: Thomas, Ralph (OFM)

Good afternoon,

Thank you for your time today. To reiterate, we will be meeting just once weekly, on Thursdays from 2-3:30PM and will move toward a brief written situation report structure to keep the group informed. Details are below. In addition, here is a link to the food and housing support webpage - <https://covid19.wa.gov/you-and-your-family#foodhousing>, and a how you can help page - <https://coronavirus.wa.gov/how-you-can-help>. If you'd like to send in proposed updates, please contact Chris McGann at CMcGann@agr.wa.gov.

In order to clarify and streamline communication, please note the following:

- **As Needed:** Please send state and federal policy and funding requests, concerns and considerations to JT and Katie. JT will evaluate your request and Katie will support her in preparing talking points as needed. This may include federal agency waiver requests, new relief package requests for consideration, and more.
- **As Needed:** While the gap analysis data collection and monitoring system is under development, please email funding and resource needs to JT and Katie. JT will evaluate your request, and Katie will support with specific resource procurement efforts, including procurement of supplies and mobilization of National Guard as necessary. Please note: All food security agencies are encouraged to submit requests directly through their local emergency operations center **FIRST**, and to communicate needs through the FSCT as a back-up. Additional resource procurement and mobilization processes are under development through the FSCT to ensure that hunger relief efforts remain operational.
- **Fridays COB:**
 - Using the short template below, please send a situation report email to JT and Katie. Katie will compile responses and we will share a written report with the FSCT participant list early the following week.
 - If your agency is able to provide weekly data, please ensure that the Qualtrix survey is completed by Friday COB so the Gap Analysis can be updated the following week. Note we expect to begin the first gap analysis survey process on Friday 4/17 and that the first few weeks will be a learning curve for everyone. Feedback is welcome.

Weekly Food Security Coordination Team Situation Report – please copy the section below into an email and fill in updates to the best of your ability. Brevity is preferred and appreciated. Please send this email to krains@agr.wa.gov before you leave work on Fridays until further notice. We can refine this process, but the goal is the gather information from all Food

Security Coordination team partners, provide an aggregated situation report to the team early in the week, and focus our meeting time on discussion of strategic questions and next steps.

- 1) Which Food Security sector are you responding on behalf of “ (please write in: SNAP, WIC, Fruit & Veg Nutrition Incentives, Food Assistance programs, child nutrition programs, senior nutrition programs, NGO Hunger Relief, OFM, other “ please specify)
- 2) WEEKLY RECAP - Looking back on the past week:
 - a. Executive summary - What has happened in your sector this week? (please provide a short high level narrative; 2-3 sentences)
 - b. Program administration or initiative updates (bulleted list; please include key dates)
 - c. Federal or state policy or funding decisions that have impacted your sector (bulleted list; please include key dates)
 - d. Important communications or events (bulleted list; please include key dates)
- 3) OUTLOOK - Looking ahead for the next 2 weeks:
 - a. What challenges are you anticipating in this sector over the next two weeks? (bulleted list; please describe the challenge, where/who you think it is most likely to affect vs. statewide, and as much detail as you wish to share)
 - b. Identify specific requests for support or decision from FSCT (bulleted list; please describe your specific request for resource, action, or decision, including What/By Whom/When)
 - c. Observation of trends (please provide a bulleted list of any trends you are observing anecdotally among hunger relief and food benefit service providers or food insecure populations. Too chaotic to estimate? getting worse? Getting better? Gaps widening in some places, narrowing in others?)
 - d. Planned actions, initiatives, service changes, communications or other key dates
- 4) OVERARCHING ISSUES & NEEDS:
 - a. Service delivery gaps or concerns
 - b. Funding needs or concerns
 - c. Policy needs or concerns

Thank you for taking a few moments to send in your first situation report email on Friday 4/10 before you turn in for the day. Brief and complete is preferred over comprehensive and not sent in. Your tireless efforts are greatly appreciated!

Katie Rains

Subject: RE: Please review: Stay home campaign drafts

Only suggestions for future planning for people with disabilities/older adults:

*Need to define using plain language “shelter in place” and potential impacts to a person’s ability to access goods and services.

Suggested bullets:

- Know who to contact. Call your emergency contacts to develop a plan: self-advocacy group, friends, case manager, family, neighbors, church group to develop a plan to provide ongoing support.
- Call the services you rely on to understand their plan to continue service?
- Know where to get more information or request services.
- Cancel any non-critical appointments. Make a plan for how you will stay safe when you do have to leave the house for important appointments only.
- Contact your healthcare provider to ask about obtaining extra necessary medications to have on hand to stay home for a prolonged period of time.
- Call your pharmacy, can medications be delivered by mail or can a neighbor/family member pick them up?
- Be sure you have over-the-counter medicines and medical supplies to treat fever and other symptoms.
- Do you have a backup if your personal care assistant gets sick?
- Have enough household items and groceries on hand so that you will be prepared to stay at home.
 - Who can go food shopping for you? Can you coordinate meal delivery?
- Do you have enough supplies for personal care (oxygen, adult under garments, dialysis, wound care)?
- Are their family, friends, case managers, who can provide daily check ins?
- Who can you call if feeling sick?

Family and Caregiver Support

- Know what medications your loved one is taking and see if you can help them have extra on hand.
- Monitor food and other medical supplies (oxygen, incontinence, dialysis, wound care) needed and create a back-up plan.
- Stock up on non-perishable food items to have on hand in your home to minimize trips to stores.
- If you care for a loved one living in a care facility, monitor the situation, ask about the health of the other residents frequently and know the protocol if there is an outbreak.

Neighbor Helping Neighbor

- Neighbors helping neighbors is critical during times when federal, state, and local government are overwhelmed.
- Talk with your neighbors about emergency planning.
- Share with neighbors regarding the help you may need as well as help can offer.
- Consider using the Nextdoor app, social networking platform for local communities and neighborhoods. Nextdoor app users can support each other in a safe way to share online the kinds of things you share with your neighbors in person. Nextdoor is securely encrypted using the HTTPS Internet protocol. Every neighbor must verify their address in the neighborhood and use their real name. This app is one way to communicate with neighbors during emergencies, as well as provide and get help with such items as food, household supplies, water, vitamins, and medications.

Thanks

Importance: High

Hi all,

Please review the attached DRAFT materials and track any edits/suggestions **by COB Monday, March 23**. Other materials, including a tip sheet for caregivers, are in the works. Laura and I are working with the agency heading up the Spread the Facts campaign to infuse this messaging into the overall campaign. More to come on that.

These materials serve as the basis and main key messages for:

- Infographics
- Digital ads
- Partner toolkit resources
- Talking points
- TV, radio, digital advertising

Best,
Kennedy

FEMA Advisory: Administrator Gaynor Second Letter to Emergency Managers

April 16, 2020 at 12:14 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 16, 2020

Coronavirus (COVID-19) Pandemic: Administrator Letter to Emergency Managers

Attached is FEMA Administrator Pete Gaynor's April 15, 2020 letter to the Nation's Emergency Managers, which outlines lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic. In this letter, Administrator Gaynor addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations (FMS) and Large-Format Alternative Care Sites (ACS); Mitigation efforts to flatten the curve; strengthening the supply chain; as well as importance of busting myths.

Administrator Gaynor's guidance is a follow-on to his first letter to emergency managers, dated March 27, 2020, which requested key actions and outlined critical steps for the initial COVID-19 response.

The letter is available on the [FEMA website](#), as well

RE: Food Security Coordination Team conf call tomorrow

April 01, 2020 at 7:54 PM EDT

To: Austin, JT (GOV)

The other major piece of related direct federal assistance is Category B funding for Public Assistance authority to fund Non-Congregate sheltering. There *could* be a feeding component to that, but the local public health authority has the lead on articulating the need. I would like to loop in my Public Assistance counterparts if there are specific questions on that, but this may not be the right forum since it is also being discussed in other workgroups.

Hi JT,

Sure thing, will gather some materials that might be relevant to share and give a quick overview. It will be good to be able to re-emphasize the roll of the state EOC in fielding and validating local requests, since we're supporting them.

I may need to defer some questions if I don't have the answer, but I will try to gauge the audience and can definitely commit to finding the correct answer for you or the group if I don't have it tomorrow.

Thank you for your partnership. You will find new CDC resources, links to COVID-19 sites, OSHA Guidance on Preparing the Workforce for COVID-19, SBA's new program information, upcoming business continuity training, the call-in information for the NBOEC call, and more.

Continue to forward this email, ask to be added to the distribution list, or reach back for questions or comments.

Rumor Control

The link [here](#) is CDC's current Myth/Fact page. Additionally, for the most up-to-date information, CDC has started a [What is New page](#) – this includes the latest fact sheets and external communications materials on COVID-19.

Translations

CDC's website and communications resources can be found [here](#) in Spanish. Content is continuing to be updated daily.

National Emergency Declaration (see attached email)

On March 13, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford

Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the “Stafford Act”). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President’s decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. Today’s declaration does not make direct financial assistance available to individuals.

OSHA Guidance on Preparing the Workforce for COVID-19 (see attached PDF)

The Occupational Safety and Health Administration (OSHA) developed this COVID-19 planning guidance based on traditional infection prevention and industrial hygiene practices. It focuses on the need for employers to implement engineering, administrative, and work practice controls and personal protective equipment (PPE), as well as considerations for doing so.

Small Business Administration Resources (see attached PDF)

The U.S. Small Business Administration is offering designated states and territories low-interest federal disaster loans for working capital to small businesses suffering substantial economic injury as a result of the Coronavirus (COVID-19). Upon a request received from a state’s or territory’s Governor, SBA will issue under its own authority, as provided by the Coronavirus Preparedness and Response Supplemental Appropriations Act that was recently signed by the President, an Economic Injury Disaster Loan declaration.

Update on the Coronavirus Disease 2019 (COVID-19) Response

Please join us for an update on the COVID-19 response.

Date: Wednesday, March 19, 2020

Time: 3:00 p.m. ET

Presenter: Dr. Nancy Messonnier (Director of the National Center for Immunization and Respiratory Diseases)

Dr. Messonnier will share guidance for the private sector, including what CDC knows at this point and what CDC is doing in response to this outbreak. We will also have time for questions and answers. Please email

eocevent337@cdc.gov to submit questions in advance. Register at

Subject: Call with Governor Inslee and FEMA Administrator Gaynor

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

Hello John and Brian,

Governor Inslee would like to speak with Administrator Gaynor today following up on yesterday's commitment of field hospitals for Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.968.9255 with any questions.

Thank you,

Morgan

FEMA_Offers_Ways_for_Private_Sector_to_Help_Fight_COVID-19

March 27, 2020 at 4:08 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA Offers Ways for Private Sector to Help Fight COVID-19

Under the White House Coronavirus Task Force's direction, FEMA, HHS and our federal partners continue to work closely with state, local, tribal and territorial governments in executing a whole-of-government response to fight the COVID-19 pandemic and protect the public. The outpouring of support from the private sector to provide medical supplies and equipment has been tremendous. To help us match the many offers of assistance to the right place, at the right time, and in the right quantity, we ask for your help in ensuring partners know how to connect.

To **sell medical supplies** or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Updated Notice ID 70FA2020R00000011](#)). This solicitation requires registration with the System for Award Management (SAM) in order to be considered for award, pursuant to applicable regulations and guidelines. Registration information can be found at www.sam.gov. Registration must be "ACTIVE" at the time of award.

If you have **medical supplies or equipment to donate**, please provide us details on what you are offering through our online medical supplies and equipment form at <https://www.fema.gov/covid19offers>.

If you are interested in **doing business with FEMA** and supporting the response to COVID-19 with your company's **non-medical** goods and/or services, please submit your inquiry to the Department of Homeland Security's Procurement Action Innovative

Response (PAIR) team at DHSIndustryLiaison@hq.dhs.gov.

In addition to these avenues to help, **licensed healthcare professionals that want to volunteer** can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.

If you are a hospital or healthcare provider in need of medical supplies, please contact your state, local, tribal or territory department of public health and/or emergency management agency. Any needs that cannot be met by the state or tribe are then sent to the respective FEMA regional office who are coordinating requirements through the FEMA National Response Coordination Center. FEMA is working with the Department of Health and Human Services and other federal agencies to fulfill requests and ship supplies as quickly as possible.

Additional ways to help can be found at www.fema.gov/coronavirus/how-to-help.

Zimmerman, Matthew S (DOH)

Guidance for I&Q/Assessment and Recovery Locations

March 24, 2020 at 8:21 PM EDT

To: Baumgart, Jim (GOV), Davidson, Lisa, Linares-Hengen, Travis (MIL), Rice, Toby

Cc: seoc44 (MIL), seoc43 (MIL)

Team,

Here is the link with language that can be sent out regarding the I&Q facilities and what guidance is available. This guidance was updated on 3/22 and has been on our website in multiple versions since early February. We update this version each time guidance is updated.

We sent this out broadly on Monday last week (3/16) when it was last updated, but we will work with the JIC and LOFR to distribute again.

Tumwater IMT is working to streamline our collective awareness of what and where guidance is located so that we can quickly attain it when needed.

Best,

Matthew Zimmerman

Hello,

We have received a lot of questions surrounding Isolation and Quarantine or Assessment and Recovery Locations support and resources in response to the COVID-19 Pandemic. Guidance for local governments to support local planning for these facilities can be found on the DOH website under Local Health Jurisdiction Resources and Recommendations here:

<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/ConsidsforAssessAndRecLocs.pdf>

The communities within Washington State have unique considerations specific to individual needs and demands that differ between the geographic areas. Therefore, the guidance found on the DOH webpage provides multiple options regarding isolation and quarantine. Adapting guidance with the appropriate Subject Matter Experts in your communities is a key aspect to ensuring an effective solution that supports your community members.

It is imperative that you work closely with your local health jurisdiction when it comes to planning for, setting up, and conducting these operations within your communities. They will be able to ensure that these facilities best support the unique needs within your jurisdictions.

FEMA-IGA

FEMA Advisory: FY2020 Emergency Management Performance Grant Program Supplemental Funding

April 13, 2020 at 8:54 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 13, 2020

FEMA FY2020 Emergency Management Performance Grant Program Supplemental Funding

The Department of Homeland Security (DHS) and FEMA are announcing the release of the Notice of Funding Opportunity and Final Allocations for the \$100 million in supplemental funding made available to the Emergency Management Performance Grant Program (EMPG) under the Coronavirus Aid, Relief, and Economic Security (CARES) Act.

Topline messaging includes:

- The EMPG Supplemental, (or EMPG-S), program is authorized by CARES Act, Div. B (Pub. L. No. 116-136) and the Robert T. Stafford Disaster Relief and Emergency Assistance Act, Pub. L. No. 93-288. Under the EMPG Program FEMA is authorized to make grants for the purpose of providing a system of emergency preparedness for the protection of life and property in the United States from hazards and to vest responsibility for emergency preparedness jointly in the federal government and the states and their political subdivisions. Under EMPG, grants are awarded to the 56 states and territories. The states and territories make subawards to local and tribal governments.
- The FY 2020 EMPG-S program assists states, local governments, tribes and territories with their public health and emergency management activities supporting the prevention of, preparation for and response to the ongoing Coronavirus Disease 2019 (COVID-19) public health emergency. Through this funding opportunity, FEMA will award funding to support planning and operational readiness for COVID-19 preparedness and response, as well as the development of tools and strategies for prevention, preparedness, and response, and ensure ongoing communication and coordination among federal, state, local, tribal and territorial partners throughout the response.
- Funding awarded under the EMPG-S program is separate and distinct from any funding that will be awarded under the FY 2020 EMPG Program NOFO published on Feb. 14, 2020.
- The attached Information Bulletin and Fact Sheet provide further details as well as final

allocations for the 56 states and territories.

Hey Nancy.

Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard-of-hearing may call (800) 877-8339.

Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but we've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington

<https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene
<https://idahosbdc.org/>

- Â• SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
- Â• We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>

- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd
District Director
Seattle District Office

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 13, 2020)

April 13, 2020 at 2:25 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 13, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

Using Autodialers for COVID-19 Related Public Service Announcements

April 02, 2020 at 11:51 AM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the guidance below, and attached, from our partners in the Communications Sector Coordinating Council regarding autodialers and how to ensure that legitimate COVID-related public service announcements are not inadvertently blocked.

April 2, 2020

Using Autodialers for COVID-19 Related Public Service Announcements

If your organization uses, or expects to use, automated dialing technology to make large numbers of voice telephone calls to citizens about COVID-19, there are measures you are advised to take to help ensure that those calls are not inadvertently blocked by service providers or other entities.

What You Should Know

Many telephone service and app providers offer services that consumers can use to block unwanted and illegal robocalls. While those services can protect citizens from illegal fraudulent robocallers (including ones taking advantage of the public's anxiety about COVID-19), there is some risk that legitimate calls made using automated dialing technology might inadvertently be identified as "spam" and blocked.

Calling patterns associated with legitimate, important public service telephone calls might in some instances be similar to those associated with unwanted (and often illegal) robocalls, so the algorithms used to identify and block unwanted robocalls could potentially be triggered.

What You Should Do

Any public service entity that uses an autodialer to contact its citizens can minimize the risk that its calls are incorrectly blocked (or labeled as "spam") by registering its telephone numbers with the companies that offer the blocking tools. Each has a procedure through which legitimate callers can register their numbers and report any instance(s) of incorrect blocking or labeling.

Telephone Service Providers' Portals for Registering Numbers

Legitimate callers can go the web sites below to register legitimate numbers and also address any incorrect labeling or call blocking.

- **AT&T:** <https://hiyahelp.zendesk.com/hc/en-us/requests/new>
 - Analytics Provider: Hiya
- **Sprint, Verizon, U.S. Cellular:** <http://Reportarobocall.com>
 - Analytics Provider: TNS
- **T Mobile:** <http://www.calltransparency.com>
 - Analytics Provider: First Orion

Third-Party App Providers

Legitimate callers can email these companies about their planned autodialing calls:

- **Nomorobo:** reports@nomorobo.com
- **YouMail:** TNissues@youmail.com

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 4, 2020)

April 04, 2020 at 1:13 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 4, 2020

Coronavirus (COVID-19) Pandemic:

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed

Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
 - As of April 3, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
 - On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
 - Forty states, four territories and 12 tribes have issued stay at home orders.

FEMA_and_Our_Partners_Continue_to_Support_State-Managed_Coronavirus_Response

March 27, 2020 at 12:14 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of

California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_9,_2020

April 09, 2020 at 4:37 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - As of April 8, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
 - An additional 49 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not

- mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.
- On April 8, the Department of Health and Human Services announced the first contract for ventilator production rated under the Defense Production Act, to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - On April 3, President Trump issued "Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.
- On April 8, CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.
 - The guidance covers essential health care workers who've been exposed to the coronavirus.
 - Essential workers can, under certain circumstances, go back to work, if they're

asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they're at work.

Advisory

FEMA and Our Partners Remain Actively Engaged to Support State-Managed Coronavirus Response

“I CAN TELL YOU THIS WEEKEND, WE WILL BE REPORTING ON AGGRESSIVE EFFORTS THAT OUR SUPPLY STABILIZATION TASK FORCE AT FEMA IS TAKING TO IMPORT MEDICAL SUPPLIES FROM AROUND THE WORLD.”

– VICE PRESIDENT MIKE PENCE

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- Apple and CDC, together with the White House and FEMA, launched a [new website](#) and app with a COVID-19 screening tool and resources to help people protect their health.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. We are sending more every day, and we are working nonstop to acquire or produce even more.

Today, the US-NS *Comfort* will be underway today from Norfolk, VA to New York, NY.

- The *Comfort* will arrive at Pier 90 in Manhattan on Monday – only approximately a mile away from the Javits Convention Center where the U.S. Army Corps of Engineers are actively constructing a 2,910-bed alternate care facility.
- The *Comfort* is equipped with 12 operating rooms, 1,000 hospital beds, a medical laboratory, a pharmacy, an optometry lab, digital radiology services, a CAT-scan, two oxygen producing plants, a helicopter deck and a crew of nearly 1,200 U.S. military personnel.
- The crew onboard the *Comfort* will provide critically needed medical surge capacity for New York Metropolitan area. Their mission will be to care for New Yorkers who do not have COVID-19, but who require urgent medical care.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.

- This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
- Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act to avoid governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Michigan, Missouri, South Carolina, Texas, Washington, the commonwealth of Puerto Rico, and the territory of Guam were approved for major disaster declarations to assist with additional needs identified in these states. Seventeen states and four tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

FEMA Advisory: COVID-19 Addressing PPE Needs in Non-Healthcare Settings (April 23, 2020)

April 23, 2020 at 1:16 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 23, 2020

Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting

The attached Fact Sheet summarizes how organizations should consider and manage their personal protective equipment (PPE) needs while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The COVID-19 National Strategy for Addressing Personal Protective Equipment (PPE) Shortage seeks to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: reduce, reuse and repurpose. Industries that use similar PPE (e.g., N95 respirators) as part of their normal duties will be challenged in obtaining PPE while available supply is prioritized for healthcare workers and first responders. Industries whose essential critical infrastructure workers need PPE to perform their duties should continue working with suppliers to acquire needed PPE, but should expect shortages to continue. All industries should immediately implement strategies to preserve existing supplies of PPE and find alternative work methods to address shortfalls. A critical component in implementing PPE preservation strategies is determining the appropriate level of PPE for use. Non-healthcare industries should carefully consider whether PPE is required by law or regulation as part of their routine duties, or whether it is needed for mitigating employee exposure to COVID-19.

FEMA Advisory: COVID-19 Daily Briefing Points (April 26, 2020)

April 26, 2020 at 12:34 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 26, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 25**, FEMA announced that more than \$5.1 million dollars in crisis counseling service grants have been made available to five states.
 - The grants, made to Massachusetts, Michigan, New Jersey, New York and Washington, will support programs providing free, confidential counseling to assist individuals through community-based outreach and educational services.
 - Due to the COVID-19 nationwide emergency and the need to protect the safety and health of all Americans, the crisis counseling will be delivered by phone, internet and the media (including social media).

- As of **April 25**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.7 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.7 million surgical gowns, 793.8 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Subject: Transition in Federal POC - 3/14-3/22

Importance: High

Darcie and Nic:

I am writing to inform you that we will be temporarily transitioning the Federal Point of Contact (POC) role for the rapidly evolving COVID-19 response in Washington State.

Timing is not ideal but my brother is getting married in Mexico next week, and I will be traveling out of the country for his wedding. During that time, the governor's DC

deputy director Morgan Wilson (Morgan.Wilson@gov.wa.gov) will serve as the primary Federal POC for the coronavirus response. After that time I will resume my post as Federal POC for our state.

Federal POC for Washington's COVID-19 Response: March 14 - March 22

Morgan Wilson

Deputy Director of Gov. Inslee's DC Office

Morgan.Wilson@gov.wa.gov

Cell: 360.968.9255

Although I'll be traveling I expect to have cell service and will remain as available as possible to assist. If you need to reach me for any reason, you may try my work cell (360.999.0155) or my personal cell (206.459.9520).

Thanks for all you're doing to support Washington during this challenging time.

Casey

Peck@co. benton. wa. us Caleb, Rochleau, Cindy, Wheeler David

Good Morning,

As of today, all SARC staff is working remotely from home. We have also made the difficult decision to discontinue in-person medical advocacy at the hospitals. I understand closing our physical doors may be upsetting to some of you, please know this was not an easy decision and was not made lightly. As everyone is doing, we had to weigh the interests of many and feel this was the best decision in light of the current environment.

I want to assure you that we are all actively working, responding to crisis calls, and following up with our clients. This past week we worked together a great deal to prepare for this. It is important to know that when calls first come into SARC our answering service, Kelly's, will answer and send the message to our on line system. We have staff monitoring the messages coming in and forwarding to the appropriate staff member who will then respond. All calls are important, please leave a message for whatever reason you called, and you will receive a timely response. If you do not, please email me.

Our team is amazing, it is our absolute mission to continue to provide the best services possible. Please reach out to me with any concerns you may have.

Actionable coronavirus observation from Italy

March 28, 2020 at 5:44 PM EDT

To: Hoss, Schuyler (GOV), Jehlik, Stacey, Holt, Brett

Cc: Alessandro Giacobbe, Wechsler Benedikt EDA WEC

I am sure our public health professionals already know but this information has been circulation in the Italian press in the Italian language. I simply pass this along in case you think this may be helpful.

FACT: The hardest hit victims and biggest spreaders in Lombardy, Italy were primary care physicians (family doctors) most of whom were asymptomatic. They spread it very fast because they see many more patients than other health professionals. The point is that a latent way in which the virus spreads exponentially is through family doctors who don't know they have it.

DATA: In all of Italy 51 doctors died so far but a much larger number is infected and many are asymptomatic. Of those 51, 19 so 37%, were family doctors. Of the last 5 doctors who died 2 were family doctors, one podiatrist, one cardiologist and one internist. So again, 40% were family doctors.

IMPLICATION: Primary care physicians should get PPE first.

The National Social Listening Report is attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 26, 2020 PM

SUMMARY

- Idaho reports its first three deaths related to COVID-19.
- Washington's statewide stay-at-home order to slow the spread of coronavirus may need to be extended beyond its initial two-week period, says Gov. Jay Inslee.
- Nearly 3.3 million Americans applied for unemployment benefits last week. As coronavirus continues to hammer the economy, Idaho unemployment insurance claims rose by 1,200% in one week, Oregon is reporting record unemployment, and Washington's jobless claims jumped more than nine-fold.

Public Sentiment

- Oregon, Washington, and Idaho residents are confused about the Stay-at-Home orders in their respective states.
- People continue to praise private companies that are helping meet the demand for essential items—from a Spokane bridal store giving away garment bags for people to make masks, the 3D printing of protective masks in Anchorage, and a Juneau distillery making hand sanitizer.
- Rumors and suspicion about a military-enforced national lockdown continue.
- Interest continues in the stimulus bill and how it will benefit people across the region who are impacted.
- Oregonians remain concerned about testing issues after increased transparency from Oregon Health Authority.
- In response to the rising number of cases in Idaho, people point to the rising number of tests.

Washington

Flatten the Curve

- Governor Jay Inslee hosted a press conference today to update media and the public on the current status of the COVID-19 response in Washington.
 - There was both praise for the coordination so far with FEMA Region 10 and resources that have come and are on their way ([NW News Reporter](#)), but also a request for more federal support with the national-level supply challenges ([@GovInslee](#)).
 - Gov. Inslee said the infection rate from coronavirus in Washington is slowing compared to other states, a sign that restrictions put in place over the past few weeks may be working. ([KREM](#))
 - Gov. Inslee also said Washington's statewide stay-at-home order to slow the spread of coronavirus may need to be extended beyond its initial two-week period. ([KOMO](#), [KEPR](#))

Business and Economy

- More than 133,000 Washington residents filed for jobless benefits last week — a jump of more than ninefold from a week earlier — as government efforts to halt the coronavirus outbreak continued to slow the state's economy. ([Seattle Times](#), [FOX Q13](#)). Nationwide jobless claims hit 3.3 million, quadruple previous record ([KHQ](#))
- As advertising dries up amid coronavirus shutdown, Washington news outlets lay off staff ([Seattle Times](#))

Rumor Control

- Rumors of a military-enforced national lockdown have been debunked repeatedly by authorities who say their recurrence shows just how persistent false claims can be during an emergency, and why it's vital to find reliable sources of information. ([Seattle Times](#))
 - In the comments on the [Seattle Times Facebook post](#), some people still say they believe a military-enforced national lockdown will be coming "eventually" ([example 1](#), [example 2](#)).
- [Clallam County Sheriff's Office](#): Rumors of individuals or businesses needing "passes" or "licenses" to conduct essential services are not true. We are not conducting random stops, or checkpoints, of citizens as they go about their daily business in a lawful manner. In doing so, we would be significantly infringing upon the Constitutional Rights we value and protect.
 - While many comments on the [Clallam County Sheriff's Office Facebook post](#) are grateful for this clarification, others express confusion-- one person wonders how businesses are deciding who is essential ([example 1](#)) and another says the virus is a "distraction" because the flu kills more people ([example 2](#)).

New Cases and Fatalities

- Clark County more than doubles COVID-19 cases, reports fifth death. Public Health confirms 28 new cases. ([The Columbian](#))
- Out of the 16 confirmed cases of the novel coronavirus in Quincy reported as of Wednesday afternoon, three have come from inside Quincy High School, including one staff member and two students. ([Wenatchee World](#))
- Two Whatcom residents die from coronavirus, 20 more test positive Thursday. ([Bellingham Herald](#))
- Third Case of Coronavirus Diagnosed In Whitman County ([Pullman Radio](#))

Testing

- Clallam County received 600 new COVID-19 test kits Wednesday. ([Peninsula Daily News](#))

PPE

- A Spokane Valley bridal store gives away garment bags for people to make masks ([KXLY](#))

Response

- Federal Regulators Find Kirkland Nursing Home Failed to Quickly Respond to Coronavirus Outbreak ([Daily Chronicle](#))

Tribal

- Helping Those on the Front Lines, Stitch by Stitch ([Kalispel Tribe of Indians](#))
- Community amid coronavirus: 5,000 pounds of food given away to the Tulalip tribal members and elders in an hour ([Tulalip News](#))

Stigma

- 'It bothers me to my core': Bellevue PD says COVID-19 is fueling racist threats. From death threats to racial slurs, Asian-Americans are living in fear as the coronavirus takes its toll on the world. ([FOX Q13](#))

Community Impact

- Pierce County Humane Society trying to find homes for 170 pets during coronavirus outbreak. Overcrowding could become a problem at the shelter, and officials are hoping families will consider adopting or fostering an animal. ([News Tribune](#))
- Washington State Department of Emergency Services received a shipment of supplies. ([Vice President Mike Pence Twitter](#))

Oregon

Medical Supply

- OSU donates more than 12 pallets of personal protective equipment to health care workers. ([KATU2](#))
- Oregon National Guard delivering medical supplies for coronavirus response. ([KATU2](#))
- Oregon is burning through PPE, putting health workers treating COVID-19 at risk. ([OPB](#))

Testing

- Surge in Oregon's COVID-19 testing capacity expected this week. ([OPB](#))
- Want to get tested for coronavirus? Here's Oregon's latest guidance about who is eligible. ([The Oregonian](#))

Legislative

- Federal coronavirus stimulus package covers 7 major areas. ([The Scanner](#))
- Oregon Attorney General Orders Convenience Stores to Stop Hiking Prices on Face Masks and Toilet Paper. ([Willamette Weekly](#))
- Are you a small businesses owner who has been affected by the Coronavirus and need help accessing an SBA loan? ([@RepSchrader](#))
- Coronavirus stimulus package to bring economic, housing aid to Oregonians, senators say. ([East Oregonian](#), [The Oregonian](#))
- Lawmakers grapple with whether to delay collection of a new billion-dollar business tax. ([Willamette Weekly](#))

New Cases

- Regional COVID-19 updates: 50 new cases in Oregon, one more death. ([KOIN](#), [KATU2](#), [KGW8](#))
- We want to keep you informed about COVID-19 in Oregon. Data are provisional and change frequently. ([@OregonHealthAuthority](#))

Economic Impact

- Jobless claims have significantly increased due to COVID-19 pandemic. ([OPB](#), [The Oregonian](#), [KOIN](#))
- What Oregon anglers, hunters, birders should know amid coronavirus pandemic. ([The Oregonian](#))
- The number of applications for SNAP benefits has nearly quadrupled in last week. ([KPTV12](#))

Food Supply

- Eastern Oregon farmers double efforts to aid COVID-19 afflicted families. ([East Oregonian](#))
- Be 'food-prepared' without panic. ([Siuslaw News](#))

Idaho

- [@FEMA Pete](#): Yesterday (3/25), local officials at [@IDHW](#) received their first shipment from our Strategic National Supply. Supplies include goggles, N95 masks, face shields, gloves & surgical masks. This delivery was sent to emergency management divisions across the state.

New Cases and Fatalities

- Three fatalities have been reported from Idaho – the first for the state. The first death occurred on Monday. ([KIVI](#), [Idaho Statesman](#), [KTVB](#), [CBS 2](#)) Reactions vary from [sadness](#), diminishing the number in [comparison to other fatalities](#), and finding that this is an excuse for [government control](#).
- Idaho's confirmed coronavirus cases jump by more than 50% ([Local News 8](#), [Idaho News](#))
 - People see a correlation between the increase in testing and the increase in reported cases. ([example 1](#), [example 2](#)) One individual comments on the [time it has taken to get results](#).
 - Some feel that the reporting is more a scare tactic. ([example 1](#), [example 2](#))
- A TSA agent in Boise has tested positive for coronavirus. The agent worked in baggage screening, and stopped working on the 19th. Nationwide, there have been 28 TSA officers who have [tested positive](#). ([Idaho News](#), [IDHW Twitter](#), [CBS 2](#))
- Coronavirus: Blaine County count increases to 66. What made Blaine County Idaho's coronavirus hot spot? Wealthy visitors and recreation. ([KIVI](#), [Idaho Statesman](#))
 - One comment on the [Idaho Statesman's Facebook post](#) says that rather than point fingers, Idaho needs to focus on the solution as a community ([example 1](#)), but another says the state should have done something about outside travel long ago, and more people will die now as a result of that inaction ([example](#)).

- With hundreds of snowbirds expected to be returning to North Idaho soon, many from Arizona, some have expressed concern about whether they might be bringing the coronavirus with them. ([Coeur d'Alene Press](#))
 - Comments on the [Coeur d'Alene Press Facebook post](#) emphasize that maybe people should stay put in order to flatten the curve and stop the spread of the virus.

Economy

- Unemployment claims have risen by 1,200% in Idaho in one week. Idaho workers laid off due to the coronavirus filed 13,341 new claims for unemployment insurance benefits. ([CBS 2](#))
 - An individual said that they have been [trying to call for the past three days](#) without being able to get through to the Idaho Department of Labor, another responded that their [chat is responsive](#).

Alaska

Social Distancing

- News circulates that Anchorage marijuana dispensaries made the list of 'critical' businesses, escaping the mayor's 'hunker down' order, due to its use for medical purposes. Many responses to this story highlighted the fact that liquor stores also remain open, some expressing [concern in light of AA meetings being cancelled](#) and [domestic violence issues](#). ([KTUU](#))
- Conversation around the mandatory 14 day self-quarantine for anyone arriving in Alaska centered on concern over the government's inability to enforce the '[honor system](#)' rule ([example 1](#), [example 2](#)). ([@alaska.dhss](#))

Community Impact

- Alaska Health and Social Services posted a Disaster Distress Helpline which is being widely shared with people urging fellow Alaskans to call if needed ([example 1](#), [example 2](#)). ([@alaska.dhss](#))

Political

- Response to Congressman Don Young's video post that he "did not fully grasp severity of this crisis" previously and urges Alaskans to take precautions now is receiving mixed responses. Most commenters feel this statement is too late and does little to make up for previous lack of leadership on the crisis ([example 1](#), [example 2](#), [example 3](#)). ([@RepDonYoung](#), [KTUU](#))

Business and Economy

- Articles detailing the stimulus bill benefits continue to get [significant traction](#). ([KTUU](#))
- Praise continues for private companies that get involved in meeting demand for essential items, such as [3D printing of protective masks](#) ([example 1](#), [example 2](#)), and a [Juneau distillery making hand sanitizer](#) ([example](#)). ([@AnchorageMakerSpace](#), [Alaska Public Media](#), [KYYN](#))
- Some grocery stores have temporarily boosted pay and increased benefits to support workers amid union demands that they be treated as 'first responders.' People are generally responding with consensus and gratitude to grocery workers ([example](#)). ([Anchorage Daily News](#))

DHS FEMA Region X News Desk

News Desk: 425.487.4610 | [FEMA-R10-NewsDesk](#) | [@FEMARegion10](#)

Federal Emergency Management Agency (FEMA), Region 10 is committed to providing access, equal opportunity and reasonable accommodation in its services, programs, activities, education and employment for individuals with disabilities. Good morning.

Today's national social media hot issues and yesterday's national social media listening report are attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 31, 2020

SUMMARY

- Hospitalizations for patients with symptoms of COVID-19-like illnesses in Washington declined last week by more than 20%, a hopeful sign for the region.
- Three new COVID-19 deaths in Oregon and 58 additional cases reported statewide, as state leaders plead for more federal support.
- Idaho residents are working through the impacts of coronavirus on their daily lives, from personal stories about having COVID-19, to more employees at essential businesses testing positive.
- New research in Alaska suggests social distancing has reduced the infection rate, while predicting thousands of deaths without continued adherence to mitigation measures.

Public Sentiment

- Washingtonians feel hopeful as hospitalizations for COVID-19-like illnesses decline. As grateful as they are for this good news, they are determined to continue practicing social distancing so as not to squander these gains.
- Oregonians celebrate community-sourced solutions to supply shortages, remain concerned over supply of PPE in the state.
- Idahoans are getting into the details of impacts from the stay-at-home order, as they worry about community spread with reports of cases of employees at essential businesses and other activity.
- Alaskans reject what they consider 'fear mongering' reports of worst-case scenarios, and continue to pressure state leadership for more economic relief.
- Across the region, people continue to worry about a balance between enforcing stay-at-home orders and government overreach.

Washington

Flatten-the-Curve

- Hospitalizations for novel coronavirus-like illness declined last week in Washington, offering a glimmer of hope. A 20% reduction in hospitalizations for people with coronavirus-like symptoms in Washington, once the epicenter of the U.S. coronavirus epidemic, offers a glimmer of hope for the region and nation. ([Seattle Times](#))
 - Comments on the [Seattle Times Facebook post](#) are grateful for the positive news and determined to keep staying home to continue moving these numbers in the right direction and keep leading the nation ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#), [example 8](#), [example 9](#), [example 10](#)).

- People say they eagerly await the following week's numbers, hoping this downturn continues and that things can reopen soon ([example 1](#), [example 2](#))
- Comments also applaud essential workers and medical professionals ([example 1](#), [example 2](#)).
- Worldwide cases exceed 800,000 as global death toll nears 39,000. The United States recorded its deadliest day Monday with at least 574 COVID-19 fatalities confirmed, marking the nation's highest single-day death toll since the novel coronavirus pandemic began. ([KIRO 7](#))

Stay-at-Home and Rumor Control

- Gov. Jay Inslee and state leaders issued new guidance Monday on how Washingtonians can report people and businesses violating the "stay-at-home" [order](#) that's in effect statewide. ([Q13 FOX](#), [My Northwest](#))
 - Comments on [MyNorthwest.com](#)'s Facebook page are mixed. One person wonders about the state of hospitals, PPE supply, and how overwhelmed they are at this time ([example 1](#)). Others bring up the release of "criminals" -- saying that the state is letting its prisoners out and instead cracking down on law-abiding citizens and putting them on "house arrest" ([example 2](#), [example 3](#)). One person equates this with 1984 and calls it a "police state" ([example 4](#)).

Community Impact

- Coronavirus: Firefighters ask public to be honest if they're sick ([KIRO 7](#))
- Gun shops join alcohol, pot stores as 'essential' businesses in coronavirus pandemic. ([The Columbian](#), [News Tribune](#), [Bellingham Herald](#), [TriCityHerald](#), [The Olympian](#))
- Thieves target Federal Way salon already closed by statewide coronavirus order. Shear Magic Hair Design in Federal Way now must deal with lost inventory along with lost revenue after being closed in the state's efforts to slow coronavirus. ([KING 5](#))
- All Washington's drivers licensing offices are closed to the public. Renewals are available online. ([Q13 FOX](#), [KING 5](#))
- A Vincent van Gogh painting on loan to a Dutch museum that is closed because of coronavirus was stolen overnight in a raid. ([Q 13](#))

Medicine and PPE

- The novel coronavirus is mutating, as viruses do, and eight strains are now making the rounds globally, medical experts say. ([Seattle Times](#))
- Drugs touted by Trump, blood from recovered patients: Seattle scientists seek coronavirus cures. Researchers around the globe and in Seattle are investigating dozens of promising ideas for treating COVID-19, from repurposing old drugs to designing new ones. And they're doing it at unprecedented speeds.' ([Seattle Times](#))
- Astria Health filed a [notice](#) Sunday with the U.S. Bankruptcy Court, requesting approval to lease Astria Regional Medical Center for use as a field hospital as part of Washington's coronavirus response efforts. ([Yakima Herald](#))
- Battelle machine able to clean 80,000 surgical masks per day receiving FDA approval ([KOMO](#))

Testing

- Northwest Laboratory in Bellingham now able to test for coronavirus, should speed tests. Northwest Laboratory will only be doing the testing of samples, collections will still come through a doctor or healthcare provider. ([Bellingham Herald](#))

New Cases

- A coronavirus outbreak has infected dozens of Marine recruits and staff members at the service's East Coast recruit training center, prompting the suspension of additional arrivals for the foreseeable future, defense officials said Monday. ([Spokesman Review](#))
- A Mount Vernon choir went ahead with rehearsal. Now dozens have coronavirus and 2 are dead. The outbreak has stunned county health officials, who have concluded that the virus was almost certainly transmitted through the air from one or more people without symptoms. ([Seattle Times](#), [Q13](#), [KING 5](#))
- Yakima Coronavirus cases more than double during weekend, now 3 dead. According to the Yakima Health District there are now at least 147 positive cases of COVID-19 in Yakima County. ([KIMA](#))
- Clark County continues coronavirus rise: 20 more cases confirmed ([The Columbian](#))
- Coronavirus: 139 cases in Tri-Cities area, nearly double since Friday ([YakTriNews](#))
- Another Whatcom nursing home says 2 healthcare workers, 2 residents have coronavirus

([Bellingham Herald](#))

- Second case of COVID-19 confirmed in Grays Harbor County ([KBKW](#))
- Coronavirus outbreak at Marine Corps boot camp infects dozens of recruits, staff members

Tribal

- Nooksack Indian Tribe Ahead of Many Communities in the COVID-19 Pandemic. The Nooksack Tribe was noted for its commendable efforts in pandemic preparation, distribution of food and supplies to its members, and being proactive in mental health outreach to existing clients. Within a month the Nooksack Tribal government has rapidly mobilized to provide innovative solutions to services such as the delivery of over 300 meals, preparation of 200 of the planned 400 isolation kits, and 150 care packages for elders. ([Nooksack Indian Tribe](#))

Donations and Other Feel-Good Stories

- Mobile home park landlord in Seattle reduces rent amid coronavirus crisis: 'It was the right thing to do'. Yacov Sinai reduced rents by \$225 for one month at Bella-B Mobile Home Park and says "I will continue to help as much as I can." ([Seattle Times](#))
- Fuzzy feeling: Seattle neighborhoods create teddy bear scavenger hunt during coronavirus isolation. Sometimes, an act of kindness can be as small as a smile. If you take a walk on a residential street around town these days, you might find some unexpected new neighbors: stuffed bears, or other animals, gazing out from windows all over the neighborhood. ([Seattle Times](#))
- Artist Lizzo sent lunch to the UW Medical Center - Montlake Emergency Department, the hospital shared on Monday. [See the photos here](#) and [see Lizzo's message to the health care workers](#). ([KING 5](#))
- Photos of 89 year old Howard Stiles meeting with his wife Lillian for the first time since beating the Coronavirus last week: Lillian wasn't sure she would ever see him again when he entered the hospital 3/15. ([KIRO Radio 97.3 FM Facebook](#))

Oregon

Federal Response

- Major disaster declared in Oregon, releasing federal aid. ([The Oregonian](#), [OPB](#))

PPE

- Oregon leaders, workers want fed help for masks, testing. ([KOIN](#), [KATU2](#), [KPTV12](#))
- Mask crafters in Oregon team up to help medical workers. ([OPB](#))

Business

- Business owners in Portland can apply for help through \$2M small business relief fund. ([KGW8](#), [KOIN](#), [KATU2](#), [@propserportland](#))
- Rogue distillery shifts to hand sanitizer production ([KOIN](#)), an approach that has been well received by the public. ([Rogue Brewery Newport Facebook](#))
- Southern Oregon for Southern Oregon: connecting customers to local businesses. ([KDRV](#))
- Univ. of Oregon hosts coronavirus town hall to address school's response to COVID-19. ([KATU2](#), [@uoregon](#))

New Cases

- Three new COVID-19 deaths in Oregon, 58 additional cases reported statewide. ([KPTV12](#), [KATU2](#), [KVAL](#))
- 12 OHSU staff test positive for coronavirus, with more tests pending. ([KGW8](#), [KOIN](#))
- Intel reports first coronavirus case among Oregon employees. ([The Oregonian](#))
- Washington County has more COVID-19 cases than most of Oregon ([OPB](#)), and county officials have tried to explain why. ([@WashcoOregon](#))
- A TriMet operator has tested positive for COVID-19. The person works at the Merlo facility in Beaverton. TriMet believes the operator is its first to be a confirmed case of COVID-19. ([KGW](#))

Idaho

New Cases

- Idaho now reporting more than 400 coronavirus cases, 7 deaths. ([CBS 2](#), [East Idaho News](#)) The report on Monday afternoon prompted some Idahoans [to urge each other to stay home](#), and others to [ask for reports to include the number of people who have recovered](#) as well.
 - First coronavirus death reported in Cassia County; first cases reported in Jerome and

- Minidoka counties ([Times-News](#))
- Meridian Dutch Bros worker tests positive for COVID-19 ([CBS 2](#))
- Five Newly Confirmed Cases of Novel Coronavirus in Nez Perce County ([Lewis Clark Valley Community](#))
- Boise Flying Pie Pizzeria worker tests positive for COVID-19 ([CBS 2](#))
- Idahoans feel that there is a lack of testing to truly capture the scope of the outbreak and slow the spread. ([example 1](#), [example 2](#), [example 3](#))

Social Distancing

- Idaho lawmaker flouts stay-at-home order with church service ([Idaho State Journal](#), [KTVB](#)) A police officer viewed a video of the service and felt that congregants were adhering to social distance recommendations.
- Idaho medical workers are taking precautions when they come home from work to keep their families safe or seeking other housing options. ([example 1](#), [example 2](#), [example 3](#))

Private Sector

- Boise bar gets creative, hosts daily 'virtual happy hour' during coronavirus shutdown ([KTVB](#))
- Sunrise Cafe shifts to selling groceries to stay afloat during coronavirus pandemic ([KTVB 7](#))
- Idaho has a giant toilet-paper factory — an essential business amid coronavirus hoarding ([Idaho Statesman](#))
 - Governor Little's [post praising the company](#) Monday prompted some people to suggest issues they would rather the governor focus on, such as [challenges accessing unemployment](#) and [non-essential businesses remaining open](#).

Testing

- Homeless Idahoans can now be tested for COVID-19 at Interfaith Sanctuary -- with fast results ([KIVI](#)) A few reactions are frustrated that homeless people have access to testing with faster results. ([example 1](#), [example 2](#))

Community and economic impact

- Many Boise renters out of work due to COVID-19 as rent payments loom ([KTVB](#))
- Idaho man went from being sick to being on a ventilator 'within hours' ([CBS 2](#))
- The Wood River Valley Howls In Appreciation Of COVID-19 Frontline Workers ([Boise State Public Radio](#))

Rumor Control

- No, you won't be pulled over for not staying home ([East Idaho News](#)) People have several videos and anecdotes that make them leery. ([example 1](#), [example 2](#), [example 3](#))

Alaska

New Cases

- Alaska's COVID-19 case tally notches up 5; Delegation explains new federal relief measures ([Alaska Public Media](#)) Governor Mike Dunleavy was joined by Congressman Don Young, Senator Lisa Murkowski, and Senator Dan Sullivan brief Alaskans on coordinated efforts to address the coronavirus.
 - The congressional delegation praised the features of the CARES Act. "It's a good package for Alaska," Congressman Don Young said.
 - By video message, Alaskan Chief Medical Officer Dr. Anne Zink provided context to the new cases, including the total number of people tested—3,713—and a detailed update on ongoing efforts to build up healthcare capacity. She reported a delivery of 60 vents from federal partners.
 - In reaction to the briefing, many people agreed that they would have [preferred hearing from only the Governor, Dr. Zink, and Social Services Commissioner](#) without the federal delegation, and many others continued to express frustration with state legislature for the limited economic support ([example 1](#), [example 2](#)). [Dr. Zink's video updates](#) continue to receive the most positive response ([example 3](#)).
- Fairbanks emerges as hot spot for coronavirus in Alaska ([Anchorage Daily News](#)) Alaska officials Monday reported two clusters of COVID-19 cases: 15 at two clinics, and at least six at a senior center with more tests pending.
 - In response, people in Fairbanks [urge each other to stay home](#).

- Comments on the [City of Ketchikan's update](#) asked for reports on new cases to include the number of people recovered. ([example 1](#), [example 2](#))

Flattening the Curve

- New report the University of Alaska Anchorage offers mix of encouragement and warning to Alaskans.
 - The report suggests social distancing, closures have reduced COVID-19 infection rate in Alaska. ([KTVA](#))
 - The research also predicts 7,400 hospitalizations and 5,800 deaths related to COVID-19 in Anchorage and the Mat-Su Valley combined, and 13,700 hospitalizations and 11,000 deaths statewide without physical distancing mitigation efforts. ([KTUU](#))
 - Most people criticized the KTUU reporting of these research findings for 'fear mongering' and 'trying to instill fear in people,' while [some took the information as a warning](#) for everyone to do their part to slow the spread.

PPE

- South Central Public Health Districts asks for donations of personal protective equipment ([Times-News](#))

Enforcement

- Alaska U.S. Attorney forms task force to prosecute COVID-19 related hoarding, price gouging ([KTUU](#))
- Anchorage mayor threatens to fine businesses violating 'hunker down' order, but holds off from harsher restrictions ([Anchorage Daily News](#))
- Fairbanks man arrested for DUI, charged with terroristic threatening for claiming he had COVID-19 ([KTVF](#))

Humanity

- Native Healing Dance Offers Comfort During Crisis ([KTUU](#))
- Happy National Doctors' Day from Dr. Anne Zink ([Alaska DHSS Facebook](#))

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 3, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty-one states and 12 tribes have issued stay at home orders.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 29, 2020

SUMMARY

- A joint press conference with Department of Defense, Washington Governor Inslee, King County Executive Dow Constantine, Seattle Mayor Jenny Durkan, and FEMA Region 10 Administrator Mike O'Hare announced the conversion of the CenturyLink Event Center into a field hospital.
- Washington continues to make efforts to surge its medical capacity: in addition to the field hospital at CenturyLink Field with its beds for non-COVID-19 patients, an Everett arena will become a COVID-19 quarantine site, and worldwide supply chain is helping Bothell-based Ventec Life Systems and General Motors rapidly find parts to build thousands of ventilators for COVID-19 patients.
- Coronavirus death toll climbs to 13 in Oregon, with 65 new cases announced.
- Total number of COVID-19 cases rises to at least 102 in Alaska, as the state announces it has about 200 ventilators and 160 ICU beds statewide.
- The new number of cases in Idaho has climbed to 261.

Public Sentiment

- Washingtonians remain concerned about access to testing for COVID-19. They continue to largely support measures to enforce social distancing, but some feel that these measures are overblown and a disproportionate reaction to the virus.
- Alaskans mourn the first in-state COVID-19 death, and express frustration over shortfalls in the state Coronavirus relief package
- Oregonians are very concerned that the new allowances for self-service at gas stations will lead to more germ spread, and that people are not heading the governor's stay-at-home orders.
- In Idaho, residents debate what level of enforcement is necessary to stop the spread of coronavirus.

Washington

CenturyLink Field Hospital

- CenturyLink Field event center readies switch to become field hospital. The Army is deploying 300 soldiers to Seattle to staff a field hospital next to CenturyLink Field with at least 148 beds. ([Seattle Times](#), [KIRO 7](#), [KOMO](#), [Puget Sound Business Journal](#), [KTVZ](#))
 - "Mike O'Hare thanked those in the private sector, including CenturyLink and others who have reached out to share resources. FEMA has designated \$100 million to the military to boost medical services in Washington in response to the outbreak. ([KTVZ](#), [The Mercury News](#))
 - "This is a whole-of-government response and FEMA remains focused on taking bold action to provide life-sustaining resources," Mike O'Hare, FEMA federal coordinating officer, said in a statement. "Together with our local, state and federal partners, the private sector is playing a critical role in our united effort to respond to the COVID-19

- pandemic.” ([Puget Sound Business Journal](#))
- “The health and safety of the American people and especially the people of Washington state are my top priority,” Mike O’Hare said. “I’ve told Gov. Inslee and Mayor Durkan and many others in no uncertain terms, ‘If you need something, tell us.’” ([Seattle Times](#), [Herald Media](#), [Walla Walla Union Bulletin](#))
- On the [KOMO News Facebook post](#), one person says that they do not want to get sick but that if they do, it would be an honor to be hospitalized at the field hospital ([example 1](#)). Another person, likely not realizing that this field hospital is for non-COVID patients, calls the need for this field hospital “nonsense” since the vast number of COVID-19 patients are sent home to recover ([example 2](#)). On the [Seattle Times Facebook post](#), some wonder whether the stadium is the best location for this -- arguing that churches could be a better fit ([example 3](#)). Some comments are appreciative of the Governor’s action ([example 4](#)) while others complain about his recent clashing with the President ([example 5](#)). One person says that hospitals in Washington have “begged” their state for years for more beds in their hospitals, and now they need federal assistance ([example 6](#)).

Testing

- The lost month: How a failure to test blinded the U.S. to COVID-19. In March, the world’s richest country — armed with some of the most highly trained scientists and infectious disease specialists — squandered its best chance of containing the virus’ spread. Instead, Americans were left largely blind to the scale of a looming public health catastrophe. ([Seattle Times](#))

Ventilators

- GM and Ventec relying on Woodinville supplier in venture to rapidly make more ventilators for coronavirus patients. ([Seattle Times](#))

Fatalities and New Cases

- First federal inmate from FCC Oakdale in LA. dies from virus. ([KIRO 7](#))
- There are now 100 people who have tested positive for the coronavirus in Yakima County, according to the state Department of Health. ([Yakima Herald](#))
 - Comments on the [Yakima Herald Republic's Facebook post](#) reflect concerns about access to testing, saying there are probably many more cases that are not yet confirmed ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#))
- Amazon employee in Kent tests positive for coronavirus. An Amazon fulfillment center worker in Kent has tested positive for the coronavirus. ([KIRO 7](#))
- American Airlines flight attendant dies due to coronavirus, officials say. American Airlines flight attendants are sharing their concerns after one of their co-workers tested positive for the coronavirus and then died. ([KIRO 7](#))
 - Comments on the [KIRO 7 News Facebook post](#) urge people to stay home, wondering why anyone is flying right now ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))
- King County Metro to temporarily reduce transit services beginning Monday; driver tests positive for coronavirus ([KIRO 7](#))

Quarantine and Social Distancing

- Everett arena to become coronavirus quarantine site. “This facility will provide a site for temporary isolation and quarantine for those who may not be able to recover in their own home or who are among the county’s unsheltered population,” Kent Patton, spokesperson for Snohomish County, wrote in a press release. ([KOMO](#))
 - Comments on the [KOMO News Facebook post](#) worry this plan is not thought out ([example 1](#))--thinking this means the arena will need to be torn down ([example 2](#)), and likening it to a homeless shelter ([example 3](#)) or a morgue ([example 4](#))
- King Co: People with COVID-19 must isolate or face involuntary detention. With the coronavirus outbreak continuing to spread in King County, the county’s lead health official issued a new order Saturday that says legal action for involuntary detention is possible for those who have tested positive for the virus, yet refuse to isolate on their own. ([KOMO](#))
 - People on the [KOMO News Facebook page](#) say that from looking at the fairly small numbers of deaths, they don’t understand why this virus warrants forced isolation ([example 1](#)). People compare numbers of the death tolls from the seasonal flu, and one person says argues the country cannot “hide forever” - pointing out that there are

"worse" things that don't shut down the country ([example 2](#)). Some wonder if this will lead to martial law ([example 3](#), [example 4](#))

- Bill Gates: Complete US shutdown is only way to beat coronavirus. Bill Gates is sounding the alarm, saying a full country shutdown like we have seen in India, China, and Ital, is the only way to beat the coronavirus. ([My Northwest](#))
- Experts Say The U.S. Needs A National Shutdown Now — But Differ On What Comes Next. ([KUOW](#))

Gun Sales

- Gun sales soar during coronavirus pandemic. The director of sales for the Range said the overwhelming majority of their sales are coming from first time buyers. ([KIMA](#))
- US agency includes gun sellers as "critical" infrastructure. A gun rights group is cheering the Trump administration's designation of the firearms industry, including retailers, as part of the nation's critical infrastructure during the coronavirus emergency. ([Seattle Times](#))

Oregon

New Cases

- Coronavirus death toll climbs to 13 in Oregon, with 65 new cases announced ([KATU2](#), [KGW8](#), [KPTV12](#), [KOIN](#), [The Oregonian](#))
- An employee at Brookdale Beaverton, a senior living facility, tested positive for the coronavirus Friday. ([KATU](#))

Flattening the Curve

- Gov. Brown launched a new *Stay Home, Save Lives* ad campaign to address the COVID-19 pandemic. ([KATU2](#), [The Register Guard](#), [The Oregonian](#), [KPTV12](#)) Responses echo confusion similar to the stay at home order. ([example 1](#), [example 2](#))
- Salem Police: Education comes first in enforcing stay-at-home orders amid COVID-19 pandemic. ([Statesman Journal](#), [@SalemPoliceDept](#))

Business

- Self service will be allowed at Oregon gas stations during COVID-19 outbreak. ([KGW8](#), [The Oregonian](#), [The Register Guard](#)) Reactions are mostly negative, with commenters expressing concern over the number of people handling the pumps. ([example 1](#), [example 2](#), [example 3](#))
- Evictions halted, but concerns of paying rent remain. ([KOIN](#))
- Coronavirus disrupts supply chains, but toilet paper should be back soon. ([OPB](#))

Idaho

New Cases

- The Idaho Department of Health and Welfare declared 16 more cases of coronavirus in Blaine County on Saturday, bringing the local total to 114. ([Idaho Mountain Express](#)) A person [weighs out enforcement](#) of the stay-at-home order - the better the order is enforced, the less the virus will spread. Replies push down the scales on the side of [constitutionality](#) for freedom of choice, others [appreciate the government response](#).

Fatalities

- Tri-State Memorial Hospital confirms two COVID-19 related deaths there ([Lewiston Tribune](#))
- Ada County reports first two deaths from coronavirus; Blaine County cases top 100 ([KIVI](#)) One comment expresses that too many businesses have been deemed essential, and the stay-at-home order is not doing enough to stop the spread of coronavirus. The conversation turns to [Staples](#), [landscaping](#) and [pawn shops](#) - which one person points out serve as [financial institutions](#).

Enforcement

- Ketchum, Bellevue, Blaine County adopt new restrictions ([Idaho Mountain Express](#))

School

- With schools closed by coronavirus, West Ada announces start date for online learning ([Idaho Statesman](#))

Donations

- Barrie's Ski and Sports giving away 5,000 pounds of potatoes for free to public ([Idaho State Journal](#)) Reactions are largely positive, but some worry about the physical distance between people when coming to pick up the potatoes. ([example 1](#), [example 2](#)) An individual explains

that the [potatoes are loaded into the trunk for you.](#)

Alaska

New Cases

- Total number of COVID-19 cases rises to at least 102 in Alaska. ([KTUU](#))
 - This was the overwhelming story of the past 24 hours with the top trending post on the subject was the [video message](#) from Alaska's Chief Medical Officer, Dr. Zink. People loved the video approach ([example 1](#)) and responded with gratitude for all of Dr. Zink's hard work ([example 1](#), [example 2](#)).
 - Trending news around the announcement focuses on the local impacts, highlighting that [Anchorage saw the largest jump in cases](#), [Fairbanks now has 16 confirmed cases while the North Pole has 7](#), and a [second case in Homer](#).
 - Among the new cases is a resident of a Fairbanks care facility, and [Anchorage Daily News reports](#) all residents and staff are now being tested.

PPE

- Alaska has about 200 ventilators and 160 ICU beds statewide, state says. This is the first time Alaska health care officials are publicly estimating the number of ventilators and ICU beds in the state — but they caution those numbers are in flux. ([Anchorage Daily News](#)) People responded with dismay over the low numbers and urged each other to stay home. ([example 1](#), [example 2](#), [example 3](#))
- Anchorage officials: We need your COVID-19 protective gear, including homemade masks, “immediately” ([Alaska Public Media](#))
- Community-Wide Effort To Sew Masks Starts with YKHC Dental Assistants. ([KYUK](#))

Economy

- Coronavirus relief package passes through Alaska Legislature. ([KTUU](#)) The legislation would prevent utilities from disconnecting service and prevent eviction of renters and foreclosures. Response from people continues to ask about PFD payments ([example 1](#), [example 2](#)), and there is concern over the amount of debt Alaskans will be in if they delay utility or rent payments during the outbreak ([example 1](#), [example 2](#)).
 - There is also frustration over the [removal of a \\$1,000 stimulus check from the Alaska budget](#), with one person [calling for a lawsuit against](#) the state, and many others calling to vote against the responsible legislators in future elections ([example 1](#), [example 2](#), [example 3](#))
- Tribes say persistent efforts pay off in massive federal stimulus ([KTVA](#))

Community Impact

- ASD and Alaska Public Media join forces to help students learn. Alaska Public Media will offer 12 hours of educational programming every Monday through Friday to help supplement students' education while schools are closed. ([KTVA](#))
- Family of Anchorage woman who died from COVID-19 remember an adventurous, ‘beautiful soul’ ([KTUU](#)) The identity of Alaska's first in-state death was revealed on Saturday, and it was reported family couldn't be at her bedside during her final days. People responded with sadness, condolences, and horror the idea of having to die alone. ([example 1](#), [example 2](#), [example 3](#))

Social Distancing

- New apparel embracing social distancing: "Alaskans are used to being pushed to the side of the map. Social distancing for us is nothing new." ([Alaska Daily News Facebook](#))

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 2, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).

- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

All

I have gotten a few follow up questions about this request. I would like to try my best to clarify. For most if not all of you, the NPI operational and impact reduction plans have major COOP considerations associated with them. This email is related to particular challenges you may have in implementing your COOP, how those challenges will affect your customers/stakeholders and when those challenges are likely to occur. Finally, we are interested in understanding what steps may need to be taken to help your agency to serve the residents and visitors to the state.

This email was generated based upon a conversation with the Governor's Office related to one agency's concerns that the lack of disinfectant products could make difficult to maintain locations open to the public. I am not sure that this type of issue is being captured in the NPI operational and impact reduction plans. If I am wrong about that please feel free to highlight the answer to those questions in your response to the NPI request. If not then I would ask that you take some time to provide answers to those questions. If time is an issue due to the work you are doing on the NPI plans, please contact me about extending the deadline beyond Monday COB.

Regards

Michael Roberson
Planning Supervisor
Washington Military Department
Emergency Management Division

Dear State Agency Liaisons

As we continue to plan for the impacts unfolding around the COVID19 Pandemic, we are looking to better understand your agency's outlook related to the potential activation of your COOP plan. Expect a similar email to be sent to your agency heads shortly, but I wanted to give you all a heads up and a head start on answering the questions listed below. Please send your answers to AVDPLNG@MIL.WA.GOV by COB on Monday, March 16, 2020

- 1. Do you have any known challenges to meeting the Mission Essential Functions (MEFs) outlined in your agency's COOP?**
- 2. How will those challenges disrupt the services you provide to your customers and stakeholders?**
- 3. What is the approximate timeframe you expect those disruptions to begin and for how long do you expect the disruption to continue?**
- 4. What strategies have you developed to mitigate potential disruptions to customers and stakeholders, based upon your agency's authorities?**
- 5. Are there any mitigation strategies for the continuation of Mission Essential Functions that would require the use of the Governor's emergency powers?**
- 6. What services that you provide to your customers and stakeholders will be disrupted due to the activation of your COOP because those services are not considered Mission Essential Functions?**

Please send responses to AVDPLNG@MIL.WA.GOV

Regards

Michael Roberson
Planning Section Chief
SEOC

The National Hot Issues Listening Report is attached for greater context.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 26, 2020 AM

SUMMARY

- Oregon is seeking a major disaster declaration to include disaster unemployment assistance.
- Businesses continue to be severely impacted by Stay-at-Home orders and social distancing measures, including Seattle-based Alaska Airlines which cut their flight schedule by 70% for coming months.
- Across the region, businesses and residents grapple with what is classified as an “essential” business as officials work to provide clarification with graphics; in Oregon, there is three-question quiz business owners can take.
- Registrations for unemployment spike sharply across the region and the nation.
- Idahoans impacted by the outbreak are struggling to figure out how to afford their rent. Some landlords in Washington and Oregon decide to waive rents this month.
- Oregon has depleted its stockpile of hospital safety gear. Governor Brown is in a bidding war with other states, the federal government, and other countries all trying to purchase personal protective equipment for hospitals.
- On Wednesday, Alaska’s confirmed COVID-19 cases jumped up by 17 since Tuesday--reaching a total of 59 in Alaska – with largest increase in Anchorage.

Public Sentiment

- There is interest across the region in the economic stimulus bill and how people can access it. The economic impacts have people worried about how to pay bills, including rent.
- Stay-at-home orders are having an effect of people’s mental and physical well-being. Suicide hotlines are seeing a spike in calls, and domestic violence is increasing.
- People continue to rally to support those in need by organizing meals and other services for children, seniors and people isolating themselves to stop the spread.

Washington

Social Distancing

- New Inslee edict: Most construction work is not authorized during coronavirus shutdown. In a major clarification to the statewide stay-at-home order, Gov. Jay Inslee's office said Wednesday evening that workers on most commercial and residential construction sites should stay home to combat the spread of the novel coronavirus. ([Seattle Times](#))
 - Comments on [The Seattle Times Facebook post](#) largely debate which businesses should be considered “essential,” with some arguing that it would be a perfect time to fix roads and bridges while others are home ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))
- Fishing temporarily banned in Washington state over coronavirus and crowded docks ([Tri-City Herald](#), [News Tribune](#), [Spokesman-Review](#), [Yakima Herald](#))

- Comments on both the [Tri-City Herald](#) and [The News Tribune Facebook posts](#) are overwhelmingly negative, with some saying this affects their ability to eat or feed their family and others pointing out that this makes little sense given that hiking is still allowed ([example 1](#), [example 2](#), [example 3](#), [example 4](#)).
- Not everyone changed behavior because of coronavirus; here are a Seattle poll's findings. How many people aren't social-distancing? FYI Guy digs into the small percentage (which translates into a big number) of Seattleites who said they hadn't changed their behavior, and the sizable chunk of people who did it only "some of the time." ([Seattle Times](#))

Medicine and Testing

- COVID-19 home test kits launch in King County. A new group called the [Seattle Coronavirus Assessment Network](#) is mailing out 300 kits every day – and it isn't only testing people who are sick. ([KIRO 7](#))
 - Comments on the [KIRO 7 Facebook post](#) wonder if people will be able to give themselves these tests because sticking the test up your nose is fairly painful ([example 1](#), [example 2](#), [example 3](#)).
 - One commenter says she has used this type of test before (mid-turbinate) and people still have trouble but it does not go as deep as current testing (nasopharyngeal) but is still accurate. ([example 4](#))
- New antibody test for coronavirus workers sent to Washington, Florida, California ([Tri-City Herald](#))

New Cases

- Spokane County's confirmed COVID-19 cases nearly double in 2 days; lack of supplies still limiting case counts. ([Spokesman-Review](#)) In response, an individual expects the number of [cases to rise with faster testing](#). Another points out that because [access to testing has increased](#), the number of cases will rise.
- 2 workers at a Kennewick nursing home have coronavirus. Seniors and staff being tested. ([Tri-City Herald](#))

Business

- Landlord gives free April rent to 22 businesses to help during pandemic. ([Sequim Gazette](#))
 - Comments on [The Sequim Gazette Facebook post](#) are overwhelmingly positive with people saying we are all in this together and these are the kinds of landlords we need now ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#)).
- Alaska Airlines slashes flight schedule by 70% for coming months due to coronavirus crisis. Seattle-based Alaska Airlines cited the "historic and unprecedented falloff in demand related to the COVID-19 outbreak across the U.S. and beyond" for the huge cuts. ([Seattle Times](#))

Community Impact

- Columbia Basin College shuts down Tri-Cities campuses because of coronavirus, moving most classes online ([Tri-City Herald](#))
- Suicide hotline calls soar as coronavirus spreads. 'There is a flood coming' ([News Tribune](#))
 - Comments on the [News Tribune's Facebook post](#) are critical of the media for their promotion of the virus as a "death sentence." ([example 1](#), [example 2](#))
- Inmates Afraid of Coronavirus Break Out of Washington State Prison; 6 Still at Large ([KXL](#))

Government

- After the Senate passed the CARES ACT, Washington Senator Patty Murray says Hanford workers who can't telework during the coronavirus outbreak will still receive a paycheck. ([NBC Right Now](#))
- Sen. Cantwell: Boeing may not like strings attached to U.S. help for aviation in coronavirus crisis ([Seattle Times](#))

Oregon

Disaster Declaration Request

- Oregon delegation seeks federal disaster declaration for state. Oregon's congressional delegation in a letter Wednesday to the White House supported Oregon Gov. Kate Brown's request for a major disaster declaration for the entire state as a result of the COVID-19 pandemic. ([KTVZ](#), [KEZI](#))

PPE

- Oregon is embroiled in a brutal bidding war, battling other states, the feds and other countries to purchase needed personal protective equipment for its hospitals, Governor Kate Brown said.

([KGW](#))

- Oregon's stockpile of hospital safety gear depleted before coronavirus surge has begun. The state has already handed over 100% of the gowns, 95% of the face shields and more than 80% of the sought-after N-95 respirators it had saved in state warehouses. ([KGW](#), [The Oregonian](#))
- Salem Health seeks volunteers to make 10,000 masks for its medical staff. Facing critical shortages, the hospital will be giving away mask-making kits starting Thursday afternoon at locations in Salem and Dallas. ([KGW](#), [FOX 12](#))

New Cases

- Amid push toward transparency, several Portland-area hospitals won't disclose coronavirus patient tallies. Several Portland-area hospital systems have said they have no plans to publicly disclose data about hospitalized patients, even those with COVID-19. ([KGW](#))

Donations

- UO asking for donations to help students affected by COVID-19 ([KEZI](#))

Supply Chain

- Lincoln City businesses cook, deliver meals to those who can't leave their homes ([KATU](#))

Social Impact

- Across the state, house-bound do-it-yourselfers and kids released from schools because of the coronavirus have been swarming retailers. Some people come to buy vital cleaning supplies or other urgent needs, while others are casually shopping for long-delayed home improvement projects. ([Oregonian](#))
- Should I sanitize my groceries? Some health experts say it's an important step to protect yourself from coronavirus ([Oregonian](#))
- Clark County grandma with COVID-19: 'That was miserable' ([KOIN](#))

Stimulus Package

- Senator Jeff Merkley's [Facebook posts](#) from the Capital during negotiations over the stimulus bill received an outpouring of positive reactions and continued pleas for support to fight the outbreak in Oregon. ([@jeffmerkley](#))

Domestic Violence

- The Portland Police Bureau reports spike in domestic violence arrests amid pandemic. "Because we are requiring people to stay at home, they are essentially confined to a space with somebody who is their abuser," said Multnomah County Commissioner Susheela Jayapal. ([KOIN](#))

Economic Impact

- Portland landlord cuts rent to help tenants during coronavirus pandemic uncertainty ([KVAL](#))

Idaho

Stay-at-Home/ Executive Order

- What's an 'essential' business under the Idaho stay-home order? The latest from the governor's office ([KTVB](#))
- In response to [a post from the Boise Police Department](#) on the new guidelines for the stay-at-home order, an individual asks if this is an effort to [get the population used to greater restrictions in the future](#). Another individual wants to know [what the penalty is](#) for violating the order, questioning that without one, wanting to know why people will comply.

Economic Impact

- Paying rent in the time of COVID-19 — communication is key ([KIVI](#)) With rent due in a week, a lot of Idahoans impacted by the outbreak are struggling to figure out how to afford it. ([example 1](#), [example 2](#))
- We talked to Senator Jim Risch about what this means for you and your family, that's coming up in minutes on KTVB. How much money is coming your way? ([KTVB reporter Maggie O'Mara](#)) People want to know how the money will be delivered. ([example 1](#), [example 2](#))
- 'Claim volume has exploded': Idaho unemployment claims skyrocket amid coronavirus outbreak ([KTVB](#))

Closures

- LDS Church closes all temples ([East Idaho News](#))
- Idaho state park campgrounds to close until May 15 ([Idaho News](#)) Many are upset by the move as debate is sparked over how the virus spreads. ([example 1](#), [example 2](#), [example 3](#))

Donations

- Micron dedicates \$35 million to support global communities, provide financial relief ([Idaho News](#))
- 'Help your neighbor campaign' Facebook group helps the community ([KMTV 11](#))

Testing

- Drive-up coronavirus testing to start in Twin Falls ([Magic Valley Times-News](#)) There is concern about [how much the test costs](#) – people reply that it is [free](#). There is a call to [get test results faster](#).
- Idaho health districts reporting 133 cases of coronavirus ([Idaho News](#))

Mental Health

- Suicide hotline calls soar as coronavirus spreads. 'There is a flood coming' ([Idaho Statesman](#))

Department of Corrections

- Eight people in IDOC custody have been tested for COVID-19. the Idaho Department of Correction has extended the suspension of visitation and volunteer programs to April 15, 2020. ([Idaho Department of Corrections](#))

Alaska

Health Expert Panel

- Governor Mike Dunleavy's press briefing and COVID-19 update yesterday evening received mixed reactions with most people calling for more individual responsibility ([example](#)) and many calling for more severe measures such as a shelter-in-place order ([example](#)) and offering economic support to Alaskan ([example](#)). There are also calls for increased transparency on the current vulnerabilities of Alaska's healthcare system ([example 1](#), [example 2](#)). ([KATU](#), [KTVA](#))

New Cases

- The news yesterday evening that the number of positive tests jumped 17 since Tuesday reaching a total of 59 in Alaska – with largest increase in Anchorage and including a second Fairbanks Hospital Employee – received a lot of traction with people trying to understand the big leap within context of more testing ([example 1](#), [example 2](#)) and many calls for people to stay home ([example 1](#), [example 2](#), [example 3](#)). ([Alaska Public Media](#), [KTVA](#), [Daily News-Miner](#), [Anchorage Daily News](#))

Business

- News is trending about the announcement by the Municipality of Anchorage that it is suspending the 10-cent fee for paper bags at Anchorage grocery stores. ([Anchorage Daily News](#), [KTVA](#))

Humanity

- One of the top trending stories on Facebook since last is about two Alaskans spreading positivity and "cheering us on" wearing costumes around Anchorage ([Anchorage Daily News](#))

Our court has suspended jury trials at least until April 10.

We were set 3/31. So sorry for the delay; I know we were all looking forward to getting this case done and this date looked like a good chance to do so.

I will send new subs when we get new dates, but wanted to give you all as much notice as possible.

If you send me unavailable dates for the next few months, I will do my best to find a realistic date.

Thank you; I hope you and your families are all well.

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 26, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 25**, FEMA announced that more than \$5.1 million dollars in crisis counseling service grants have been made available to five states.
 - The grants, made to Massachusetts, Michigan, New Jersey, New York and Washington, will support programs providing free, confidential counseling to assist individuals through community-based outreach and educational services.
 - Due to the COVID-19 nationwide emergency and the need to protect the safety and health of all Americans, the crisis counseling will be delivered by phone,

internet and the media (including social media).

- As of **April 25**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.7 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.7 million surgical gowns, 793.8 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

FEMA Stakeholder Advisory: FEMA Extends Grace Period for Flood Insurance Renewal Premiums

March 28, 2020 at 11:51 AM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 28, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

FEMA Extends Grace Period for Flood Insurance Renewal Premiums

FEMA continues to take proactive steps to address the COVID-19 pandemic and to help serve its National Flood Insurance Program (NFIP) customers who may be experiencing financial hardships, the agency is extending the grace period to renew flood insurance policies from 30 to 120 days.

To avoid a lapse in coverage, there is typically a 30-day grace period to renew National Flood Insurance Program policies. However, due to the widespread economic disruption arising from this pandemic, FEMA recognizes that policyholders may not meet the standard deadline.

This extension will allow additional time for policyholders who may be struggling financially to pay insurance premiums and ensure their policies are not cancelled for nonpayment of premium due to circumstances beyond their control.

If a policy has an expiration date between February 13, 2020 and June 15, 2020, then the NFIP insurer must receive the appropriate renewal premium within 120 days of the expiration date to avoid a lapse in coverage. Likewise, if a policyholder receives an underpayment notice dated between February 13, 2020, and June 15, 2020, then the NFIP insurer must receive the additional premium amount requested within 120 days of the date of the notice.

Policyholders who need additional time to pay their premiums, beyond the 120-day extension, should contact their agent or insurer to inquire about other options the insurer may offer for premium payment.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

FEMA-IGA

FEMA Stakeholder Advisory: FEMA and Our Partners Continue to Support State-Managed Coronavirus Response
March 27, 2020 at 12:02 PM EDT

Cc: FEMA-IGA

Office of External Affairs
U.S. Department of Homeland Security
Washington, DC 20472

FEMA

March 27, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Task force schedules

April 01, 2020 at 12:48 PM EDT

To: Scarlett, Kevin A (DOH), Clifford, Wayne (DOH), Frank, Dan (DOH), DOH-ISOTF (DOH), Baumgart, Jim (GOV), Kelleher, Tedd (COM), Urbas, Gary (MIL), Slusher, Theresa M, Dave.csernak@hhs.wa.gov, lisa.davidson@fema.dhs.gov

Cc: DOH-LOFR (DOH)

Taskforce members and colleagues,

I am putting together an operational rhythm based on you schedules. I am concerned if we go to 5 on 2 off wont work and we wont stay coordinated unless we are all on that schedule. I may the to do a staggered schedule. So I respectfully ask what your individual work schedule is for your respective agencies and I will develop the rhythm based on the result. As this taskforce is forming and developing and I may have indadvertantly missed someone, please feel free to forward this message, Please email your responses to the new Isolation Taskforce email at doh-isotf.imt@doh.wa.gov.

Thank you in advance for your help, support, and advise.
We ARE saving lives.

Jim,

As we discussed on the phone Pierce County has done a great deal of work in identifying three sites, working with community leaders to ensure a positive level of engagement and have real-estate lawyers working the negotiations with the sites. We are also working through the FEMA reimbursement guidelines. I would like to have the Pierce County lead be included in the workgroup you announced on the 7:00 am conference call.

Could you please provide the meeting information.

Thank you,

Amy

Subject: preferred sites for isolation centers

Good morning,

As the Unified Area Command and federal agencies move forward on isolation facilities as part of a broader alternate care site model, it is critical that we recognize the work already done at the local government level. Each of counties expressed concern about making sure any effort done at the state and federal level is well coordinated and supports . Please send your preferred isolation sites along with the level of coordination already completed so that the team working on this at the state level can work closely with you about securing facilities. From our perspective these are the site requirements we are looking at:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - Select rooms with individual ventilation system or a room with a non-recirculating air
 - If recirculation of air from isolations rooms to other rooms in unavoidable, HEPA filters should be installed in the exhaust ducts.
 - If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal

- Access and functional needs
- Space considerations for staff
 - PPE donning/doffing space or area.
 - Space for light nursing care
 - Administrative space for medical records processing
 - Areas or rooms for housing staff staying overnight with bathroom facilities.
 - Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support areas
- Mental health support areas

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_4

April 04, 2020 at 1:25 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 4, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement

- actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- As of April 3, FEMA and HHS have delivered ventilators from the Strategic National

Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).

- Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
- On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
- Forty states, four territories and 12 tribes have issued stay at home orders.

Bickford, Nancy (MIL)

SBA

March 18, 2020 at 7:01 PM EDT

To: Wilson, Morgan (GOV), Ike, Ryan, Baumgart, Jim (GOV)

Cc: Linares-Hengen, Travis (MIL), Shagren, Karina L. (MIL)

Our External affairs forwarded a tweet from Senator Cantwell stating that SBA assistance is available to all counties. This, however, is incorrect.

Yesterday, the governor forwarded a request to add on counties to the current SBA declaration, which when approved by SBA would cover the entire state. SBA has not approved that request yet.

In the meantime an email from Seattle SBA went out stating all counties would automatically be included and that the SBA website needs to catch up (see emails below). I spoke to the SBA regional office in California a couple times today and there is misinformation going around their own agency.

Since WA already applied to add on counties, they are processing that application and we are not part of the automatic inclusion.

They (SBA) are hoping that the SBA HQ will approve our add on counties very soon, but can't guarantee when that will be.

For situational awareness --

FEMA Advisory: Coronavirus (COVID-19) Pandemic Whole-of-America Response

April 13, 2020 at 7:24 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 13, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

In support of the coronavirus (COVID-19) pandemic response, FEMA provides the following: FEMA Project Airbridge video Advisory; Personal Protective Equipment (PPE) Preservation Best Practices Advisory and Fact Sheet, and a Resource Requests from the International Reagent Resource (IRR) Advisory and Fact Sheet.

FEMA Project Airbridge

To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC data.

A brief video on Project Airbridge is available on [FEMA Website](#) and on all FEMA social media accounts.

Project Airbridge Advisory: Attachment [1]

Personal Protective Equipment Preservation Best Practices

This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective

equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19 pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

Preserving Personal Protective Equipment Best Practices Advisory: Attachment [2]

Preserving Personal Protective Equipment Best Practices Fact Sheet: Attachment [3]

Resource Requests from the International Reagent Resource

The International Reagent Resource (IRR), established by the Centers for Disease Control and Prevention (CDC), acquires, authenticates, and produces reagents that scientists need to carry out basic research and develop improved diagnostic tests, vaccines, and detection methods.

The (IRR) Fact Sheet (attached) outlines a simplified process for states and territories to make resource requests from the IRR. Consolidating testing supplies under the IRR alleviates burden on public health labs, which increases efficiency and reduces need to work with separate, individual suppliers for swabs, reagents, and other diagnostic testing supplies.

International Reagent Resource Advisory: Attachment [4]

International Reagent Resource Fact Sheet: Attachment [5]

Hello Casey,

Thanks for reaching out regarding our staff-level congressional call for Tuesday. I've been a bit slow getting out the invitation while I nail down a solid conference line.

I do expect to send out the agenda and invitation today, so great timing! Please let me know if you or Morgan would like to make opening remarks and I'll place you on the agenda.

Thanks so much,

Cam Rossie

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

From: Costello, Mark F. <mark.costello@sba.gov>
Sent: Monday, March 16, 2020 3:19 PM
Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but we've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

1. [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
2. If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
3. In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
4. SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
 - We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>
5. Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

As discussed Commerce has asked each county as part of the *COVID-19 Emergency Housing Grant* to:

- *Estimate the total need for Isolation and Quarantine beds*
- *Develop a plan to implement beds, approved in writing by the local public health officer*

We are reviewing plans and asking for updates, and sharing the reports with count EM. Status information can be accessed by joining the Basecamp team using this link:

<https://3.basecamp.com/3601595/join/a25XHNFerHyD>

The report linked to above will be updated daily. I have attached the report from today.

More information on the grant awarded to all 39 counties can be found here:

<https://www.commerce.wa.gov/covid-19-homeless-services/>

Letter from Governor Inslee re: NWDC

March 23, 2020 at 4:09 PM EDT

To: Carina.G.Benito@ice.dhs.gov

Cc: Tim.A.Petrie@ice.dhs.gov

Hello, Assistant Director Benito:

My name is Alejandro Sanchez, and I am hoping to direct this email to the right person. Recently, Governor Inslee sent a letter to ICE and GEO leadership, requesting information about COVID-19 planning at the Northwest Detention Center. I have attached that letter here.

I originally sent the letter to Director Asher, but when she was unavailable, I forwarded it to Assistant Director Lawrence. As per Director Lawrence's away message, I am now forwarding this inquiry to you. Do you know whether your agency or GEO leadership intend to provide us information about COVID-19 planning at the Northwest Detention Center? If a response has been issued, could you forward it to me?

Thank you for your attention to this matter,
Alejandro

Subject: COVID-19 Distribution Coordinator Update 26 MAR

Team, here's my summary for tomorrow's UCG meeting. Please let me know if any concerns.

Distro Coord updates last 24 hours:

1. Reviewing DOH Allocation/Distribution Guidance for PPE

- Providing feedback to Kathy Lofy's newly drafted (today) PPE allocation/distribution guidance, in follow-on meeting 9am Friday.

2. Manpower augmentation to EOC cell (update from 26 MAR)

- DOH (Kathy Lohy) extended offer to provide medical experts available to assist with EOC allocation decisions alongside Tammi Leclerc. Fully supportive of collocating this expertise, as EOC logistics has a previous EMT on the team but no one with current knowledge.

3. Focus Area: Overland Hospital PPE Critical Shortage

- Pending receipt of additional needs request info, EOC Logistics cell is prepared to drop ship PPE distribution to support Overlake hospital, with high density of ICU COVID patients.

4. Department of Corrections - PPE Gown Manufacture distro will flow to DES Tumwater.

- Confirmed Ken Nigh (DOC) and DES have coordinated to receive inflow of the thousands of manufactured PPE gowns routed directly into the Tumwater Warehouse, for subsequent distribution.

5. Connection made with Amazon B2B Procurement Team

- Met the Amazon team (Kelly M. Gegich) that is working to centrally source PPE through Amazon channels for Public use, restricted from private purchases.
- Public marketplace goes live Friday 27 March with first offers to the State of Washington. Their team is synced with Jamie Rossman.
- Bulk Amazon purchase (Qty 1M) PPE mask donation o/a 1 April, with DES prepared to receive directly into Tumwater warehouse.

6. King County consideration of request for WA ARNG support withdrawn.

- Decision to not submit yet while they leverage other resources; TAG aware.

7. Contingency Aviation transport options:

- Consolidating [Auxiliary Transpo Options](#) offers of support with Reed Schuler. Have begun reaching out to establish relationships to compress reaction time when auxiliary transport resources are needed.
- Next meeting today with Delta Airlines' Shawn Cole to further develop their offer of support for China flights; no specific cargo yet identified.

Call with Governor Inslee and FEMA Administrator Gaynor

To: Brian Hyer (brian.hyer@hq.dhs.gov), john.h.hill@hq.dhs.gov

Cc: Katims, Casey (GOV), Tichenor, Stacey (GOV)

Hello John and Brian,

Governor Inslee would like to speak with Administrator Gaynor today following up on yesterday's commitment of field hospitals for Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.968.9255 with any questions.

Thank you,

Morgan

Food Security Coordination Team 2PM - Agenda & SitRep

April 16, 2020 at 3:45 PM EDT

To: Austin, JT (GOV), Baumgart, Jim (GOV), Eads, Kim (AGR), Connelly, Leslie (OFM), Gregerson, Mia, Warnick, Judy, Kumara, Yoshi, Voris, Molly (GOV), leanne.eko@k12.wa.us, Roberts, Babette (DSHS), Sheffels, Evan (AGR), Wilson, Morgan (GOV), Laxson, Joe D (DOH), Barkley, Wendy, Emmans, Gene (AGR), Sandison, Derek (AGR), Fuller, Steve (AGR), Thompson, Maddy (GOV), Orr, Daisye (DOH), Katims, Casey (GOV), Hovis, Emily S (DOH), Rains, Katie (AGR), Butler, Laura (AGR), Evans, Rayanna (OFM), Bailey, Sami, Way, Bryan (OFM), nicolas.granum@fema.dhs.gov, McGann, Chris (AGR), Andersen, Bryce (OFM), Throne, Paul (DOH), Thomas Reynolds, Biggins, Rosemary (DSHS/AL TSA/HCS), Ellsworth, Michael L (DOH), Cooper, Kelly (DOH), Black, Ryan (DOH), Tiffani Kaech, Clark, Jason (WaTech), Linda Nageotte, Tybo, Brittany M (DOH), Phillips, Todd J (DOH), drew.meuer@2-harvest.org, Graham, Joe M (DOH), Banuelos, Cynthia, Ellings, Amy (DOH), Auvinen, Alyssa A (DOH), Aaron Czyzewski, Richartz, Sandra

Good afternoon,

I'm writing to share a rough compilation of the situation reports that we received on Friday and over the past few days. Please note the format will get cleaned up moving forward as we build more staff capacity to support our team. The current assumption at this point is that it's better to share information even if in messy format than to hold information. Â Â Â

Also, please note that Derek and JT have been pulled into another call at our usual time, so I will be working us through the agenda. We will be sure that they receive detailed updates. Â

1. Roll Call
2. OFM/Financial Updates " Leslie
 - a. FEMA Funding
3. Action Team Report Out "
 - a. Food Procurement Action Team
 - b. Coordinated Community Response Action Team
 - c. Gap Analysis Action Team
 - d. Any additional teams forming? Â
4. Resource Procurement Discussion
 - a. How are various sectors meeting needs for procurement of food, PPE, packaging supplies, and human resources? Is there a need to coordinate these efforts here?
5. Are there gaps in Food Security that need attention or documentation?
 - a. Meal Programs
 - b. Tribal Food Security
 - c. Houseless Populations
 - d. Children unable to get to schools to pick-up meals
6. Agency Updates
 - a. Governor's Office
 - b. Department of Commerce
 - c. WSDA
 - d. DOH
 - e. DSHS
 - f. OSPI
 - g. Legislators
 - h. Food Lifeline
 - i. Northwest Harvest

- j. Second Harvest
- k. FEMA
- 7. Strategic Issues for Next Agenda?
- 8. Adjourn

Please don't forget to send in your Situation Report for the week of 4/13 by COB Friday 4/17.Â
Thank you!

Weekly Food Security Coordination Team Situation Report – please copy the section below into an email and fill in updates to the best of your ability. Brevity is preferred and appreciated. Please send this email to krains@agr.wa.gov before you leave work on Fridays until further notice. We can refine this process, but the goal is the gather information from all Food Security Coordination team partners, provide an aggregated situation report to the team early in the week, and focus our meeting time on discussion of strategic questions and next steps.

Which Food Security sector are you responding on behalf of – (please write in: SNAP, WIC, Fruit & Veg Nutrition Incentives, Food Assistance programs, child nutrition programs, senior nutrition programs, NGO Hunger Relief, OFM, other – please specify)

WEEKLY RECAP - Looking back on the past week:

- a. Executive summary - What has happened in your sector this week? (please provide a short high level narrative; 2-3 sentences)
- b. Program administration or initiative updates (bulleted list; please include key dates)
- c. Federal or state policy or funding decisions that have impacted your sector (bulleted list; please include key dates)
- d. Important communications or events (bulleted list; please include key dates)

OUTLOOK - Looking ahead for the next 2 weeks:

- a. What challenges are you anticipating in this sector over the next two weeks? (bulleted list; please describe the challenge, where/who you think it is most likely to affect vs. statewide, and as much detail as you wish to share)
- b. Identify specific requests for support or decision from FSCT (bulleted list; please describe your specific request for resource, action, or decision, including What/By Whom/When)
- c. Observation of trends (please provide a bulleted list of any trends you are observing anecdotally among hunger relief and food benefit service providers or food insecure populations. Too chaotic to estimate? getting worse? Getting better? Gaps widening in some places, narrowing in others?)
- d. Planned actions, initiatives, service changes, communications or other key dates

OVERARCHING ISSUES & NEEDS:

- a. Service delivery gaps or concerns
- b. Funding needs or concerns
- c. Policy needs or concerns

Katie Rains

RE: Please review: Stay home campaign drafts

March 23, 2020 at 12:41 PM EDT

To: Smith, Jaime (GOV), Kopriva, James (DSHS/ALTSA), Marchand, Michael (HBE), Crume-Bruce, Shawna, Holman, Sam (GOV), danielle.bailey@fema.dhs.gov

Cc: Blaske, Laura A (DOH)

Hi all,

Quick update – we’ve revised the language to remove the “stay happy” message. Because this is a stressful time for many folks, we didn’t want to come off as out-of-touch or even condescending. The key messages now are: “Stay home. Stay healthy. Stay informed.”

Next steps – Laura Blaske and I are working with the ad agency that is leading Spread the Facts, and we will incorporate the “stay home” messaging into that campaign.

Help stop the spread of COVID-19. Spread the facts.

Stay home. Everyone should stay home except to get food, care for a relative or friend, get necessary health care, or go to an essential job. (LINK HERE TO MORE INFO.)

Stay healthy. If you must go out, keep at least 6 feet of distance from other people. (LINK HERE FOR MORE INFO.)

Stay informed. Stay up to date on what is happening in Washington State; visit this website often.

Thanks!

–Kennedy

Subject: Please review: Stay home campaign drafts

Importance: High

Hi all,

Please review the attached DRAFT materials and track any edits/suggestions **by COB Monday, March 23**. Other materials, including a tip sheet for caregivers, are in the works. Laura and I are working with the agency heading up the Spread the Facts campaign to infuse this messaging into the overall campaign. More to come on that.

These materials serve as the basis and main key messages for:

- Infographics
- Digital ads
- Partner toolkit resources
- Talking points
- TV, radio, digital advertising

Best,
Kennedy

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 23, 2020 AM

SUMMARY

- A major disaster declaration has been issued for Washington bringing Public Assistance Category B and the Crisis Counseling Program to the state.
- The Navy's 1,000-bed hospital ship Mercy will be headed to California, not Washington.
- Oregon's Governor Kate Brown is expected to announce a stay-at-home order today.
- With a rising number of cases in Idaho, anyone who has been to Blaine County is asked to shelter in place to try to contain the virus.
- As cases rise in Alaska, physicians are calling for stricter measures to keep COVID-19 from spreading.

Public Sentiment

- Calls continue to leaders to contain coronavirus across the region.
- Concern remains over social interaction that may further spread coronavirus.
- In response to the disaster declaration in Washington, people question what it means for citizens – will there be hoops to jump through for access? Does it mean there will be unemployment assistance? Is Public Assistance for the public?

Washington

Major Disaster Declaration

- Washington receives a major disaster declarations providing crisis counseling and Category B Public Assistance ([KXLY](#), [KIRO 7](#), [NBC Right Now Tri-Cities](#), [KEPR](#), [KHQ](#))
 - In response to the FEMA disaster declaration, people continue to feel that greater measures are needed from the governor to reduce the spread of coronavirus. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#)) There are questions as to what this means for Washingtonians. ([example 1](#), [example 2](#), [example 3](#))
 - Governor Jay Inslee points out that not all the assistance he requested was granted. ([Facebook](#)) People continue to demand a stay-at-home order. ([example 1](#), [example 2](#))

The Mercy

- Governor Jay Inslee is disappointed to learn that the 1,000-bed hospital ship the Mercy will be going to California, and not Washington, but grateful for other federal resources that are on their way. ([Twitter](#))
- Will 1,000-bed hospital ship sail for Seattle or Los Angeles? ([Kitsap Sun](#)) [Representative Derek Kilner supports Governor Jay Inslee's request](#) for the ship to come to Puget Sound. The article quotes Military Sealift Command spokeswoman Sarah Burford stating that the ship is intended to treat trauma victims, not infectious disease, Carnival Corporation has offered cruise ships to support the response.
- Just Kidding, Seattle: Trump Will Send the USNS Mercy to Los Angeles ([The Stranger](#))

National Guard

- Trump activates National Guard in California, New York and Washington state: 'This is a war.' ([CNBC](#))

- Navy hospital ship to L.A. as Trump activates National Guard in Calif, Washington, NY ([Bellingham Herald](#))

Closures

- The coastal towns of Long Beach and Westport have closed to visitors. ([North Coast News Facebook](#), [City of Long Beach Facebook](#))
- Washington campgrounds are closed. ([Washington State Parks Twitter](#), [Spokesman-Review](#))

Business

- Jeff Bezos posted a letter on Instagram to Amazonians saying they have taken measures to ensure that essential items in the supply chain can still be delivered while caring for the workforce. ([Instagram](#))
- A Boeing employee has died from coronavirus. ([Seattle Times](#)) Many are upset by the news, and feel that the company has not taken enough measures to stop the spread of the virus. ([example 1](#), [example 2](#))
- Most Hanford workers to stay home over coronavirus concerns. No word on for how long ([Tri City Herald](#))

PPE

- FEMA director won't say how many N95 coronavirus masks have been ordered ([Walla-Walla Union Bulletin](#))
- Tesla donated 50,000 N95 medical masks on Sunday to UW Medicine. The masks will to help local health care workers on the front line of fighting the coronavirus outbreak in Washington state. ([KATU 2](#))

Testing

- COVID-19 testing begins Saturday at Tacoma Dome for at-risk population, healthcare workers ([Seattle PI](#))
- New drive-thru COVID-19 testing option opening March 23 for high-risk Snohomish County residents ([My Edmonds News](#))
- Anosmia, the loss of sense of smell, and ageusia, an accompanying diminished sense of taste, have emerged as peculiar telltale signs of COVID-19, the disease caused by the coronavirus, and possible markers of infection. ([Seattle Times](#))

Stay-at-Home

- The mayor of Edmonds is asking people to stay home, the second city in the state after Everett, to do so. ([City of Edmonds](#))
- The Yakima Health District is ordering county residents to stay home. As of Sunday, Yakima County had 24 confirmed cases of COVID-19 and 8 presumptive positive cases. ([YakTriNews](#))
- The Lummi Nation joins the Makah to become the second Northwest tribe to shelter in place. ([Seattle Times](#)) People may still travel from their homes to assist family, visit doctors, shop for groceries and medications, fish, hunt or gather. ([Bellingham Herald](#))

New Cases

- One new COVID-19 death was reported Sunday in Washington state as the total number of cases approaches 2,000, according to the state Department of Health. ([Q 13 FOX](#))
- COVID-19 reaches Anacortes retirement community ([KOMO](#))
- 29-year-old Chelan County man learns a painful lesson: Youth doesn't mean you're immune to coronavirus. ([Coronavirus](#))

Economic Impact

- Due to the rise in unemployment during the coronavirus outbreak, the Washington State Employment Security Department has waived the one-week waiting period to receive unemployment insurance benefits. ([KXLY](#))
- Will you get a \$1,000 check from the coronavirus stimulus package? Breaking down the proposal to provide cash payments to help people through the coronavirus crisis. ([KING 5](#))

Community Impact

- Washington ban on funerals means Spokane-area funeral homes struggle to help families grieve. Another sign of the times in Washington state, funeral homes have had to cancel graveside ceremonies in an effort to keep more people from contracting the coronavirus. ([Spokesman-Review](#)). While some on the [Spokesman-Review Facebook post](#) wish there was an exception to this ([example 1](#)), others point out that if we don't all follow these restrictions there will be many more dead ([example 2](#)).
- King County Metro and Sound Transit go fare-free amid coronavirus pandemic ([KING 5](#))

- Tips for hiking in the time of the coronavirus ([KIMA](#))

Oregon

Executive Orders

- Gov. Brown is expected to order many Oregonians to stay home, with violators facing a fine and or jail time today. People would still be allowed outside for recreation, with some restraints. Those who don't comply face a Class C misdemeanor crime. ([KGW 8](#)) The majority of comments on [KGW-TV's](#) Facebook post are happy to see this ([example 1](#), [example 2](#)). Some call the beach towns culpable for waiting until they were crowded for spring break before closing ([example 3](#)), and others wonder how this order will affect homeless populations ([example 4](#)).
- On Sunday, the Portland Mayor asked Governor Kate Brown to put a stay-at-home order in place state-wide. ([Twitter](#)) If she did not, the mayor said he would enact one for the city.
- Governor Kate Brown has issued an order to halt evictions for the next 90 days. ([KTVZ](#))

Closures

- Warrenton, Manzanita, Astoria, and Seaside had a message for visitors and tourists on Sunday: vacate the area within 24 hours. ([KOMO](#), [KGW 8](#), [KATU 2](#))
- In Rockaway Beach, the public wayside, playgrounds, and main beach accesses are reported as closed. ([Facebook](#))
- Multnomah Falls is closing to the public. ([KATU 2](#))

PPE

- Portland police recovered thousands of stolen respirator masks following a theft of more than 20 boxes. They are now on their way to hospitals to help amid the coronavirus pandemic. ([KEPR](#))

Alaska

New Cases

- There are now a total of 32 cases of coronavirus in Alaska. ([KTVA](#))
 - Many see air travel as one of the culprits for the spread of COVID-19, and would like flights to cease. ([example 1](#), [example 2](#)) A person reports that a cashier at Fred Meyer's said they are [not allowed to wear masks](#), though they are wiping down customers' purchases.
- Juneau has its first reported case of coronavirus. ([Juneau Empire](#), [KINY radio](#))

Protective Measures

- Physicians are calling on Governor Dunleavy to halt all air travel in the state. ([Anchorage Daily News](#)) Many from the public, with some asking for exceptions to get back home to Alaska, support this call to action. ([example 1](#), [example 2](#), [example 3](#))

Business

- Stop hoarding: Anchorage mayor, shipping companies assure Alaskans the supply chain is intact ([Anchorage Daily News](#), [Alaska Public Media](#))

Idaho

Rumor Control

- Governor Brad Little shared FEMA's Rumor Control page to help quell misinformation. ([Facebook](#))
- Scammers are using robocalls that spread disinformation about the coronavirus pandemic and lying about offering low-priced health insurance and free coronavirus test kits. ([KIDK 3](#))

Shelter-In-Place

- Visitors to Blaine County told to shelter in place amid coronavirus outbreak. ([Magic Valley](#)) The request comes after three Ada County residents and one Valley County resident tested positive for COVID-19 after traveling and spending time in Blaine County. ([KTVB](#))

New Cases

- There are now 47 confirmed cases of the coronavirus in Idaho, according to the state's [official website](#) on COVID-19. ([CBS 2](#))
- Recent coronavirus cases in Ada and Valley County are likely connected to Blaine County, officials say. ([KMVT](#))

Health

- Medical clinic director helps to keep homeless shelter coronavirus free. On Monday morning, Milan, who was named medical director of Pocatello Free Clinic in January, offered to perform

weekly health screenings of homeless people housed in tight quarters at the local Aid for Friends shelter. ([Idaho State Journal](#))

Testing

- Community urged to reserve coronavirus testing for sickest patients ([Idaho State Journal](#))

Business

- Concerned Idaho business owner wants people to take the coronavirus more seriously. People were out enjoying the weather this weekend, however, there were also several instances where good social distancing practices weren't being followed. ([KIVI](#))

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report March 27, 2020 AM

March 27, 2020 at 10:43 AM EDT

To: Undisclosed recipients:

The national hot issues listening report is attached for greater context.

Starting this tomorrow, we will be reporting on what's on social and in the media on a daily basis. Please let us know if there are any topics for us to watch for, or if there is anyone who should be added to this distribution list.

Thank you.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

MARCH 27, 2020 AM

SUMMARY

In Idaho, with the recent stay-at-home order, residents are working through the definition of essential. During a conference call between President Trump and governors on Thursday, Washington Gov. Jay Inslee urged the President to take more dramatic federal action to secure medical supplies for his state.

New data from the Institute for Disease Modeling show best- and worst-case scenarios for disease spread in Oregon, depending on Oregonian adherence to social distancing measures.

Public Sentiment

Seattleites, as with many city residents around the world have done, have taken to their balconies, this time to applaud healthcare workers, which they did last night at 8 p.m.

Alaskans are calling on Governor Dunleavy to put measures in to place to reduce community spread of coronavirus.

Economic worry is pervasive across the region as people take stock of their finances as people stay to reduce the spread – they are interested in the economic stimulus bill, unemployment, and how to pay their bills.

Washington

U.S. Army Corps of Engineers surveys CenturyLink Field, fairgrounds for temporary hospital. ([KIRO 7, KING 5](#))

Governors frustrated with offer of 'backup' Gov. Jay Inslee clashed with President Donald Trump during a conference call with governors, pleading with him to take more dramatic action to secure medical supplies for his state as it suffers from the coronavirus pandemic, according to four people familiar with the call. ([Seattle Times](#), [KUOW KATU](#))

- o [@GovInslee](#): We need a national mobilization of the industrial base in this country. That's how we won WWII. To get that, we need a president to lead. Washingtonians' lives depend on it.
- o A comment on the [Seattle Times Facebook post](#) argues that while Gov Inslee has the power and authority to acquire equipment for Washington State, it is also his responsibility to request assistance from the federal government when it is beyond his state's ability to acquire needed supplies locally ([example](#)).

Medical Supplies

Trump administration backs off a deal for Bothell's Ventec and GM to produce 'up to 20,000' ventilators a month amid coronavirus crisis. ([Seattle Times](#))

Business and Economy

Struggling laid off local workers desperate for government relief to kick in ([FOX Q13](#))

The U.S. Postal Service has been in money trouble for years. Now, coronavirus is forcing the quasi-governmental agency into a fight for its life. ([Seattle Times](#))

The West End of the Olympic Peninsula has lost its only local newspaper reporter and its only local paper, the Forks Forum, has suspended print publication. The paper, published since 1931, has converted to an online-only edition as the novel coronavirus reaps another victim among the state's print media. ([Seattle Times](#))

New Cases and Fatalities

Just two months after America's first confirmed case, the country is grappling with a lethal reality: The coronavirus has killed more than 1,000 people in the United States, a toll that is increasing at an alarming rate. ([Seattle Times](#))

- A comment on the [Seattle Times Facebook post](#) compares the U.S. to South Korea since both countries had their first COVID-19 cases around the same time. This person blames "denial, distortions, and delusion" in the U.S. for why we were unable to contain the spread of the virus as successfully as South Korea ([example](#))

The Yakima Health District says a patient in their 30's with several chronic conditions has died as a result of the Coronavirus. ([KIMA](#))

- Comments on the [KIMA Action News Facebook page](#) express sadness and worry over this tragedy.
- One person expresses confusion over how the hospital could be running out of supplies if according to [www.doh.wa.gov](#), only 3 people are even hospitalized in all of Yakima ([example 1](#)). Others explain that health care workers need to different gowns, gloves, and masks throughout the day so as not to spread the disease ([example 2](#)). Despite this explanation, comments say that this supply shortage must be from "mass hysteria" because given that it is flu season, hospitals should have already been prepared with enough supplies ([example 3](#))

Worker at Puget Sound Naval Shipyard tests positive for coronavirus. It's the first positive test for a worker at Kitsap County's largest employer. ([Kitsap Sun](#))

Disability and Integration

Op-Ed: Remember Students with Disabilities in a Time of Crisis. For students with disabilities, school is often where they have access to critical services including nursing and physical, speech, mental-health and other therapies. But as schools around the nation are closing, students with disabilities and their families are being left without supports, writes Anna Zivarts, program director of Rooted in Rights, a part of Disability Rights Washington. ([Seattle Times](#))

Donations and Volunteers

Healthcare workers will now get access to free parking near hospitals and coronavirus testing sites as part of a new permit program announced by the City of Seattle. ([FOX Q13](#))

Food banks need younger volunteers, more donations as unemployment skyrockets ([Spokesman-Review](#))

Nurses volunteer for Bellingham nursing home hit by coronavirus. Dozens of people have tested positive at Bellingham's Shuksan Healthcare, including caregivers. ([KING 5](#))

Measures to Flatten the Curve

Gun shops in Washington have been shut down during Governor Inslee's order, but just 20 miles to the east of Spokane in Idaho, gun shops are open for business. ([KHQ](#))

Lake Stevens assigns shopping days by last names to curb the spread of coronavirus. ([KING 5](#))

Canada attacks 'damaging' Trump plan to deploy troops at border ([Vancouver Sun](#))

Community Impact

America's truckers face increasing challenges on front lines in war against coronavirus ([Tri-City Herald](#))

Seattle residents [#MakeAJoyfulNoise](#) for health care workers ([example](#)). Seattleites were encouraged to go outside and make some noise as a show of support for health care workers treating coronavirus. ([KING 5](#))

Flattening the Curve

- Newly released data from the Institute for Disease Modeling show best and worst case scenarios, depending on Oregonian adherence to mitigation measures.
 - Based on estimates, 15,000 people would be infected by the new coronavirus by May 8 if Oregon didn't take measures to slow the spread of the disease. ([KATU](#))
 - If Oregonians stay home, state hospitals appear capable of handling coronavirus burden ([Oregonian](#))

Community Spread

- A Medford father of four says he's Jackson County's first case of community spread coronavirus. ([KOBI](#))

PPE

- Portland manufacturer pivots to produce face shields, to resounding [praise on Facebook](#) ([KPTV](#)). 'Our intention is not to freak anyone out': Portland firefighters wear hazmat suits to medical calls ([KGW](#), [@KGWNews](#))

People in Salem flock to pick up mask sewing kits to help during coronavirus pandemic ([KATU](#))

Business

- Woodland company works to keep up with toilet paper demand. ([KOIN 6](#))

Idaho

Public Information

- Idaho Reports special features Governor Brad Little, Idaho Department of Health and Welfare director Dave Jeppesen, and state epidemiologist Dr. Christine Hahn ([Idaho Public Television Facebook Live](#))
- What's an 'essential' business under the Idaho stay-home order? Gov. Little answers your questions ([KTVB](#)) In response, many are dissatisfied by the list of essential businesses. ([example 1](#), [example 2](#), [example 3](#))

PPE

- St. Luke's Boise receiving face shields from SmileDirectClub ([KIVI](#))

Testing

- Drive-up COVID-19 testing opens in Twin Falls ([Magic Valley Times-News](#))

Medical Capacity

- EIRMC planning for worst-case scenario should coronavirus surge in eastern Idaho ([East Idaho News](#)) In response, individuals find that [the headline is misleading](#) and that the medical center is underprepared given the lack of test availability.

Alaska

New Cases

- On Thursday afternoon Alaska DHSS reported 10 new cases over the previous 24 hours bringing Alaska's total case count to 69. ([Alaska DHSS](#))
 - Initial comments on the Alaska DHSS Facebook post ask for clarifying details on the exact sources of the cases and express concern that the public is not being told the true extent of the spread due to inadequate testing or withholding of information ([example 1](#), [example 1](#), [example 3](#)).
 - Reaction on the KTVA Facebook post was dominated by those calling for more mandated social distancing, even a "total lockdown" ([example 1](#), [example 2](#), [example 3](#)), with some pushback from others saying not to panic ([example](#)).
- In reaction to Governor Dunleavy's briefing on the new cases ([KTVA Facebook](#)), many people also responded with calls for more mandated social distancing measures ([example 1](#)).
- 'Numerous' health care workers among Alaska's confirmed COVID-19 cases ([Anchorage Daily News](#), [KTVF](#))

Social Distancing

- North Slope Mayor shuts down travel to region to prevent COVID-19 spread to the isolated network of communities. ([The Arctic Sounder](#)) Reactions are positive. ([example 1](#), [example 2](#)).

Testing

- SEARHC relaxes testing criteria as virus spreads in Southeast communities. ([KCAW](#)) People are spreading the word [on Facebook](#).

Hi all, apologies for the churn. Sending the updated advisory below in 10.

UPDATED WITH WEBEX INSTRUCTIONS AND NEW RADIO POOL LEAD.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) â€” Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital at Fort Carson, Colorado who have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Reporters can attend via [WebEx](#). It will also be streamed live on Seattle Channel.

Seattle Times will serve as the print pool, **KIRO Radio will serve as radio pool (hscott@bonneville.com)**, and KIRO will serve as the TV pool.

WHO: Governor Jay Inslee, King County Executive Dow Constantine, Mayor Jenny A. Durkan, FEMA Region 10 Administrator Mike Oâ€™Hare, and Brigadier General Doug Cherry

WHEN: Saturday, March 28, 1:30 p.m.

WHERE: CenturyLink Field Event Center, 800 Occidental Ave S. in Seattle, WAâ€”

Instructions for WebEx

- Register here: <https://stateofwashington.webex.com/stateofwashington/onstage/g.php?MTID=ec0d68604c42d99978b3f447d6b238b8b>
- Please provide: Name, E-mail address, phone number, news organization.
- The conference will start at 1:30 PM.
- Press, please join the call at 1:15 PM. We will run through procedure and test the system to ensure we can answer your questions without technical issues.

Instructions for Q&A

- If you would like to ask a question, you must log in to the teleconference via WebEx. We will not be taking questions via phone.
- If you would like to ask a question, please RSVP. Email: (INERST EMAIL ADDRESS HERE) Please include your name, news organization and if you want to ask a question.
- We will control muting from our system. You do not need to mute yourself.
- When we call on you, announce your name and news organization. Please do not ask if we can hear you. If your question is for a specific person, please include that information, as well.
- For ideal audio and video quality download the Webex Meetings Application.
- If you are unable to join through WebEx, you may listen in via phone: +1-408-418-9388, Access code: 263 676 232.

Subject: RE: Press Conference Tomorrow at 1:30 pm

Thanks all â€œ Updated advisory below w/ updates from FEMA + US Army.

- I know Sam w/ Team Inslee is working on the WebEx for reporters/advisory.
- City of Seattle is responsible for podium, flags, Seattle Channel, and ASL. Iâ€™ll let Anthony or Ernie jump in if we have any logistical issues. We will also share the link for the live feed ASAP.
- City of Seattle has reached out for pool tomorrow w/ TV + print + still photos.
- The event will be in the West Hall of the Event Center. Jeff w/ the Seahawks has flagged that it is best for everyone to park on the 2nd floor of the garage toward the south end. There is an entry to the event center concourse there with a stairwell that leads to the West Hall floor. City of Seattle team will be on site at 12:15 pm.
- Some additional background on site: The field hospital will have at least 148 (48 ICU, 100 ICW) beds. It can provide emergency medicine, pharmacy, clinical laboratory services, limited microbiology capability, surgical services, and radiological services. Timeline for establishment of the 148 bed capability will be based on conditions on the ground. However, hospital officials anticipate being able to provide care within 72 hours of all of the equipment arriving and should be fully operational within a week of getting the equipment.

HAPPENING AT 1:30: Governor Inslee, Mayor Durkan, Executive Constantine join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry To Discuss Deployment of Field Hospital at CenturyLink Field Event Center

Seattle (March 28, 2020) â€œ Today at 1:30 p.m., Governor Inslee, Mayor Durkan, King County Executive Dow Constantine will join FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry to discuss the deployment of a field hospital at CenturyLink Field Event Center. This field hospital will include 300 soldiers from the 627th Army Hospital from Fort Carson, Colorado have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Baumgart, Jim (GOV)

Master Lease - Alternate Care Facilities (isolation)

To: Liu, Chris (DES), Covington, Bob (DES), Larson, Ann (DES), McClain, Stacey (MIL)

Cc: Davidson, Lisa, Zimmerman, Matthew S (DOH), Robert Ezelle (Robert.Ezelle@mil.wa.gov), Daugherty, Bret D. (MIL) (Bret.Daugherty@mil.wa.gov), Phillips, Keith (GOV), Postman, David (GOV), McGill, Jason T (HCA)

Chris,

In speaking with the executive team and the Unified Area Command leadership, I'd like to move forward on securing facilities for use as isolation centers. We have concurrence from CDC, HHS, DOH, and EMD regarding the site requirements for isolation facilities. These include:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - o Select rooms with individual ventilation system or a room with a non-recirculating air
 - o If recirculation of air from isolations rooms to other rooms is unavoidable, HEPA filters should be installed in the exhaust ducts.
 - o If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal
- Access and functional needs
- Space considerations for staff
 - o PPE donning/doffing space or area.
 - o Space for light nursing care
 - o Administrative space for medical records processing
 - o Areas or rooms for housing staff staying overnight with bathroom facilities.
 - o Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support
- Mental health support

Mr Stacey McClain from Emergency Management is coordinating the multi-agency site survey teams. These teams could have representatives from DOH, EMD, USACE, HHS, FEMA based on needs. Please let Stacey know if you need assistance in site survey.

Size is scalable; however, we are looking at capacity within Snohomish, King, Pierce and Thurston counties. Total capacity across those counties should be 2,250 – 5,000.

Health Care Authority is still examining if licensing the facility is required and what possible reimbursement beyond HHS and FEMA authorities is available.

DOH is still discussing what their staffing model for this will look like; however, I suspect it will have some facility operations staff supported with light nursing.

Sincerely,
Jim

Subject: preferred sites for isolation centers

Good morning,

As the Unified Area Command and federal agencies move forward on isolation facilities as part of a broader alternate care site model, it is critical that we recognize the work already done at the local government level. Each of counties expressed concern about making sure any effort done at the state and federal level is well coordinated and supports . Please send your preferred isolation sites along with the level of coordination already completed so that the team working on this at the state level can work closely with you about securing facilities. From our perspective these are the site requirements we are looking at:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - Select rooms with individual ventilation system or a room with a non-recirculating air
 - If recirculation of air from isolations rooms to other rooms in unavoidable, HEPA filters should be installed in the exhaust ducts.
 - If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal
- Access and functional needs
- Space considerations for staff
 - PPE donning/doffing space or area.
 - Space for light nursing care
 - Administrative space for medical records processing
 - Areas or rooms for housing staff staying overnight with bathroom facilities.
 - Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support areas

- Mental health support areas

Office of Intergovernmental Affairs (IGA)

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_10

April 10, 2020 at 5:16 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Beginning **April 10**, HHS and FEMA will work with states with federal Community-Based Testing Sites to clarify whether sites want to continue as they are now, or transition to full state control.
 - Under state control, CBTS sites would still receive technical assistance from the federal government and be able to request supplies through the normal FEMA systems.
 - Leadership at both HHS and FEMA will consider approving extension requests by states that need additional federal assistance to manage and operate sites. A formal notice to continue must be submitted to the CBTS Task Force Leader,

- by either the state's Governor or his or her representative, no later than April 9.
 - The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.
 - After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.
 - States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share.
 - To date, Community Based Testing Sites have screened over 85,000 individuals.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- On **April 8**, HHS, through the Health Resources and Services Administration awarded more than \$1.3 billion to 1,387 health centers. These centers will help communities across the country detect coronavirus; prevent, diagnose, and treat COVID-19; and maintain or increase health capacity and staffing levels to address this public health emergency.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

Importance: High

Thank you Ryan,

I can coordinate the EMD Director. Our federal POC at the Governor's office (D.C.) currently is Morgan Wilson 202.624.3691 and Casey Katims 202.624.3546 | Cell: 360-999-0155. I am also cc'ing Jim Baumgart for Governor's Office in Washington State and our Communications Director Karina Shagren. I'd be happy to be on the call. Sending also to EMD Response and Recovery.

I can confirm my availability and am working on Robert but anticipate no issues. Sanura "I talked with Robert. Can you please put on his calendar?"

Sincerely,
Nancy

Nancy A. Bickford

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Hey Nancy.

Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Ryan Ike
Director | External Affairs Division | Region 10

Office: (425) 487-4767 | Mobile: (425) 213-9496

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas, Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but I've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax

returns for the applicant business; an explanation if not available

- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

1. [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
2. If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
3. In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).
4. SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
 - Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDC's located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
 - We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>
5. Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd
District Director

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Weekly Update: DHS Response to COVID-19

WASHINGTON – The Department of Homeland Security and its dedicated workforce across more than a dozen offices and components are working diligently with the White House to execute an unprecedented, whole-of America response to the COVID-19 pandemic. These strategic and tactical efforts range from coordinating critical air transportation to addressing medical supply shortages to expediting the inspection of vital goods at our borders, ensuring that our national supply chains remain abundant, accessible, and reliable.

“Everything we have done to this point has been unprecedented and everything we do in the coming weeks and months ahead focuses on life-safety and reducing suffering,” said FEMA Administrator Pete Gaynor. “It is absolutely critical that we maintain our response efforts alongside our federal, state, local, tribal, and industry partners to ensure the virus’s spread is contained and human life is preserved.”

Below is a list of some of DHS’s efforts against COVID-19 last week:

Federal Emergency Management Agency (FEMA)

Deploying Federal Funds in Support of State Response Efforts. Federal funds are being deployed to help ensure that health care providers have the critical resources they need to provide rapid care and treatment to COVID-19 patients in hard-hit areas across the U.S. As of April 12th, FEMA has obligated \$5.2 billion in support of state response efforts.

Increasing Availability of Critical Resources. As a part of the Supply Chain Stabilization Task Force, FEMA is executing a whole-of- America approach to address the limited supply of critical and life-saving equipment. As of April 12th, FEMA has coordinated the delivery of the following to areas in greatest need : 38 million N95 respirators, 32.6 million surgical masks, 5.5 million face shields, 4.7 million surgical gowns, 30.3 million gloves, 212,000 coveralls, and 10,448 ventilators.

Expanding Surge Capacity in Highly-Impacted Areas. FEMA is focusing its allocation of resources in highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls.

- On April 6th, FEMA and the U.S. Army Corps of Engineers announced plans to convert three convention centers in Virginia into temporary hospital facilities. The facilities – the Dulles Expo Center in Northern Virginia and the Richmond and Hampton Roads convention centers – will be able to provide beds for 1,107 acute patients or 1,848 non-acute patients. The conversion is expected to be complete within six weeks.
- On April 8th, FEMA and HHS delivered 80,000 nasopharyngeal swabs to various federal Community-Based Testing Sites (CBTS) locations to help surge testing capacity nationwide.
- As of April 12th, FEMA has delivered 8,600 medical beds to surge capacity and care for an increased volume of COVID-19 patients across the U.S.

Coordinating Air Flights to Address Medical Supply Shortages. FEMA is expediting movement of critical supplies including masks, respirators, gloves, goggles and surgical gowns, from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge. As of April 12th, 28 international flights have arrived in the U.S. with critical medical supplies. An additional 28 flights are scheduled over the next three weeks.

Countering Weapons of Mass Destruction (CWMD)

Administering Medical Screenings at Airports. CWMD contract personnel are continuing to support the CDC with enhanced medical screenings for travelers through 13 specially designated airports. As of April 12th, CWMD has processed approximately 271,529 travelers for enhanced screening, including 1,491 who were referred to CDC for further medical evaluation.

CUSTOMS AND BORDER PROTECTION (CBP)

Maintaining Domestic Supply of Critical Medical Equipment. On April 8th, CBP and FEMA announced that the federal government will begin restricting exports of PPE to ensure that critical supplies stay in the country to fight COVID-19.

Securing U.S. Borders. On April 9th, CBP provided an operational update on activities for the month of March. Total Border Patrol encounters have declined 7% total in March from February, and 76% since the height of the crisis last May. In addition, 80% of the people who CBP encountered since the March 21 enactment of Title 42 are being returned to the

Cybersecurity and Infrastructure Security Agency (CISA)

- On April 6th, CISA updated its list of essential businesses. To date, 45 states and territories have published Essential Business Designations, 20 of them are referencing this list in their essential business designations, while 14 states or territories have incorporated CISA guidance fully into their own lists.
- On April 8th, CISA and CDC issued new guidelines aimed at getting workers in critical infrastructure who may have been exposed to COVID-19 back to work faster. It also calls on employers to take steps to ensure workplace safety, like sending workers home immediately if they are sick and increasing air exchange in the workplace.

Protecting Networks and Cloud Environment. On April 9th, CISA released interim Trusted Internet Connections (TIC) guidance to aid agencies in securing their network and cloud environments. This guidance supports the current surge in teleworking and use of collaboration tools amongst the federal workforce during the COVID-19 pandemic.

Keeping Americans Safe While Ensuring Continuity of U.S. Travel: TSA continues to follow CDC guidance to protect its workers and the nation's transportation system, while ensuring the freedom of movement for people and commerce will not be impeded during the pandemic. Between April 5th and April 12th, TSA has screened more than 729,000 travelers who have all reached their destinations safely.

Bringing Americans Home. Immigration and Customs Enforcement, in close coordination with the State Department, continues to bring stranded Americans home on the return leg of removal flights to Central America. Between March 22nd and April 10th, ICE has flown 1,037 individuals back to the U.S. from Columbia, El Salvador, Honduras, and Nicaragua.

Keeping the Homeland Safe, Secure and Resilient. On April 8th, DHS Intelligence and Analysis (I&A) published information to federal, state, local, tribal and territorial counterterrorism and law enforcement officials on the potential for COVID-19-related cyber threats and fraud. These threat-monitoring activities ensure the homeland is safe, secure, and resilient from hostile actors who might otherwise attempt to exploit the crisis to harm American lives.

Facilitating the Offload of Cruise Ships. The U.S. Coast Guard is working non-stop to protect the health and safety of Americans inbound to the U.S. while helping slow the spread of COVID-19. Between April 5th and April 10th, USCG facilitated the offload of 100 passengers and 881 crew members from one cruise ship in Florida and helped transfer 7 crew members from a second cruise ship to local hospitals. In Louisiana, the USCG worked with state and local authorities to disembark several healthy crew members after determining they were not infected with COVID-19.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 5, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - On April 3, CDC issued a recommendation to the public to use cloth face

coverings in community settings to help prevent the spread of COVID-19 by people are infected and do not know it.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- HHS will be providing state, territory and tribal Public Health departments with a one-time shipment of Abbott COVID-19 rapid tests.
 - Shipments are expected to arrive at the 70 identified locations by April.
 - The tests allow for immediate, on-site testing at the point-of-care.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - DOD will deliver 300 ventilators from its supply to New Jersey today, April 5.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and an additional 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 30 ventilators for Guam; an additional 200 ventilators for Louisiana; an additional 200 ventilators to New Jersey; and 100 ventilators for Massachusetts.

- Forty states, four territories and 12 tribes have issued stay at home orders.

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).

- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

Subject: update from CDC

Hi Casey and Morgan-

Here is an update from CDC that I got yesterday on the status of Washington State's lab order.

Washington

CDC is actively working to make CDC's COVID-19 testing kits available to public health laboratories. All requests for these reagents are being filled by the IRR as quickly as possible. Due to the volume of requests and order processing constraints, labs may anticipate at least 2 business days between CDC's receipt of a new order and shipping to their facility. All reagents are shipped by FedEx Priority for next day delivery, however destinations outside the continental US may experience longer transit times due to airline flight limitations.

Please also note that there are broad, national and global supply chain shortages for many of commercial ancillary reagents required for COVID-19 testing that are impacting the ability of not only the IRR, but all purchasers, international and domestic, to immediately fill orders for these additional items. We certainly understand the frustration states are experiencing and want to be as supportive as possible during these challenging circumstances. Every effort is being made to ensure that requests are filled as soon as CDC receives additional inventory of these items from their commercial manufacturers.

Our CDC Lab Task Force just checked on requests specifically from Washington. Since early February, IRR has filled 32 orders and shipped 161 components. In the last few days, IRR received an additional request for the ER-25 MagNA Pure 96 DNA and Viral NA Small Volume Kit. IRR is working diligently process and ship out all orders as soon as possible

Advisory

FEMA Offers Ways for Private Sector to Help Fight COVID-19

Under the White House Coronavirus Task Force's direction, FEMA, HHS and our federal partners continue to work closely with state, local, tribal and territorial governments in executing a whole-of-government response to fight the COVID-19 pandemic and protect the public. The outpouring of support from the private sector to provide medical supplies and equipment has been tremendous. To help us match the many offers of assistance to the right place, at the right time, and in the right quantity, we ask for your help in ensuring partners know how to connect.

To **sell medical supplies** or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Updated Notice ID 70FA2020R00000011](#)). This solicitation requires registration with the System for Award Management (SAM) in order to be considered for award, pursuant to applicable regulations and guidelines. Registration information can be found at www.sam.gov. Registration must be "ACTIVE" at the time of award.

If you have **medical supplies or equipment to donate**, please provide us details on what you are offering through our online medical supplies and equipment form at <https://www.fema.gov/covid19offers>.

If you are interested in **doing business with FEMA** and supporting the response to COVID-19 with your company's **non-medical** goods and/or services, please submit your inquiry to the Department of Homeland Security's Procurement Action Innovative Response (PAIR) team at DHSIndustryLiaison@hq.dhs.gov.

In addition to these avenues to help, **licensed healthcare professionals that want to volunteer** can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.

If you are a hospital or healthcare provider in need of medical supplies, please contact your state, local, tribal or territory department of public health and/or emergency management agency. Any needs that cannot be met by the state or tribe are then sent to the respective FEMA regional office who are coordinating requirements through the FEMA National Response Coordination Center. FEMA is working with the Department of Health and Human Services and other federal agencies to fulfill requests and ship supplies as quickly as possible.

Additional ways to help can be found at www.fema.gov/coronavirus/how-to-help.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Cc: Thomas, Ralph (OFM)

Good afternoon,

Thank you for your time today. To reiterate, we will be meeting just once weekly, on Thursdays from 2-3:30PM and will move toward a brief written situation report structure to keep the group informed. Details are below. In addition, here is a link to the food and housing support webpage - <https://covid19.wa.gov/you-and-your-family#foodhousing>, and a how you can help page - <https://coronavirus.wa.gov/how-you-can-help>. If you'd like to send in proposed updates, please contact Chris McGann at CMcGann@agr.wa.gov.

In order to clarify and streamline communication, please note the following:

- **As Needed:** Please send state and federal policy and funding requests, concerns and considerations to JT and Katie. JT will evaluate your request and Katie will support her in preparing talking points as needed. This may include federal agency waiver requests, new relief package requests for consideration, and more.
- **As Needed:** While the gap analysis data collection and monitoring system is under development, please email funding and resource needs to JT and Katie. JT will evaluate your request, and Katie will support with specific resource procurement efforts, including procurement of supplies and mobilization of National Guard as necessary. Please note: All food security agencies are encouraged to submit requests directly through their local emergency operations center **FIRST**, and to communicate needs through the FSCT as a back-up. Additional resource procurement and mobilization processes are under development through the FSCT to ensure that hunger relief efforts remain operational.
- **Fridays COB:**
 - Using the short template below, please send a situation report email to JT and Katie. Katie will compile responses and we will share a written report with the FSCT participant list early the following week.
 - If your agency is able to provide weekly data, please ensure that the Qualtrix survey is completed by Friday COB so the Gap Analysis can be updated the following week. Note we expect to begin the first gap analysis survey process on Friday 4/17 and that the first few weeks will be a learning curve for everyone. Feedback is welcome.

Weekly Food Security Coordination Team Situation Report – please copy the section below into an email and fill in updates to the best of your ability. Brevity is preferred and appreciated. Please send this email to krains@agr.wa.gov before you leave work on Fridays until further notice. We can refine this process, but the goal is the gather information from all Food

Security Coordination team partners, provide an aggregated situation report to the team early in the week, and focus our meeting time on discussion of strategic questions and next steps.

- 1) Which Food Security sector are you responding on behalf of “ (please write in: SNAP, WIC, Fruit & Veg Nutrition Incentives, Food Assistance programs, child nutrition programs, senior nutrition programs, NGO Hunger Relief, OFM, other “ please specify)
- 2) WEEKLY RECAP - Looking back on the past week:
 - a. Executive summary - What has happened in your sector this week? (please provide a short high level narrative; 2-3 sentences)
 - b. Program administration or initiative updates (bulleted list; please include key dates)
 - c. Federal or state policy or funding decisions that have impacted your sector (bulleted list; please include key dates)
 - d. Important communications or events (bulleted list; please include key dates)
- 3) OUTLOOK - Looking ahead for the next 2 weeks:
 - a. What challenges are you anticipating in this sector over the next two weeks? (bulleted list; please describe the challenge, where/who you think it is most likely to affect vs. statewide, and as much detail as you wish to share)
 - b. Identify specific requests for support or decision from FSCT (bulleted list; please describe your specific request for resource, action, or decision, including What/By Whom/When)
 - c. Observation of trends (please provide a bulleted list of any trends you are observing anecdotally among hunger relief and food benefit service providers or food insecure populations. Too chaotic to estimate? getting worse? Getting better? Gaps widening in some places, narrowing in others?)
 - d. Planned actions, initiatives, service changes, communications or other key dates
- 4) OVERARCHING ISSUES & NEEDS:
 - a. Service delivery gaps or concerns
 - b. Funding needs or concerns
 - c. Policy needs or concerns

Thank you for taking a few moments to send in your first situation report email on Friday 4/10 before you turn in for the day. Brief and complete is preferred over comprehensive and not sent in. Your tireless efforts are greatly appreciated!

FW: Notification of a Major Disaster Declaration for the State of Illinois (FEMA-4489-DR-IL)

March 26, 2020 at 4:05 PM EDT

To: William Kirkland, Crozer, William (who.eop.gov), SHORT, CHERIE, Harper, Jay, Pat.Collier@illinois.gov

Cc: FEMA-IGA, Greff, Stacie

STATE OF ILLINOIS**FEDERAL DISASTER DECLARATION FACT SHEET****MARCH 26, 2020**

Today, March 26, 2020, President Donald J. Trump granted a Major Disaster Declaration for the State of Illinois triggering the release of Federal funds to help people and communities recover from COVID-19 that occurred January 20, 2020, and continuing. Details of the disaster declaration and assistance programs are as follows:

Declaration Number:	FEMA-4489-DR
Incident:	COVID-19
Incident Period:	January 20, 2020, and continuing
Federal Coordinating Officer:	Steven W. Johnson National FCO Program
Individual Assistance (IA): households):	(Assistance to individuals and
IA-Designated Areas: limited to the Crisis Counseling Program in all areas in the State of Illinois.	Individual Assistance
Public Assistance (PA):	(Assistance for emergency work and the repair or replacement of disaster-damaged facilities):
PA-Designated Areas: measures (Category B) not authorized under other Federal statutes, including direct federal assistance, under the Public Assistance program at 75 percent federal	Emergency protective funding for all areas in the State of Illinois.
OTHER:	Additional designations may be made at a later date if requested by the State and warranted by the results of further assessments.

For your reference, I have attached fact sheets on the Individual Assistance and Public Assistance programs.

If you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

FEMA Advisory: COVID-19 Daily Briefing Points (April 25, 2020)

April 25, 2020 at 1:14 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 25, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- During the **April 24** White House Press Briefing, Food and Drug Administration (FDA) Commissioner Dr. Stephen Hahn announced that the FDA had [approved the first COVID-19 home collection test kit](#).
 - The FDA continues to facilitate test development to ensure access to accurate diagnostics, working with over 350 test developers and authorizing 63 types of

tests to date.

- On **April 24**, President Trump signed the [Paycheck Protection Program and Health Care Enhancement Act](#) to replenish the Small Business Administration's small business loan program while also providing crucial support for America's frontline medical workers.
 - The act provides \$320 billion in additional funding for the Paycheck Protection Program, along with \$75 billion for hospitals and healthcare providers to fight coronavirus and \$25 billion for ongoing testing across the country.
 - The [Paycheck Protection Program](#) processed nearly \$350 billion in loans to 1.6 million small businesses from funding provided in the CARES Act. More than 4,900 lending institutions participated in making these SBA-backed loans.
- As of **April 24**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.5 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.8 million surgical gowns, 779.1 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting

April 23, 2020 at 10:15 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the announcement below, and attached, fact sheet from our partners in Federal Emergency Management Agency (FEMA) regarding Addressing PPE Needs in Non-Healthcare Setting.

FEMA has published the attached Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting. This guidance summarizes how organizations should consider and manage their personal protective equipment (PPE) needs while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response, including how to preserve limited supplies of PPE, how to consider need during periods of shortages, and how to acquire and request PPE (i.e., in the face of critical shortages and whereas normal supply chain allocation cannot meet operational requirements).

The attached fact sheet may also be found on the FEMA website [here](#).

Acting_Secretary_Chad_Wolf_Statement_on_the_President's_Executive_Order_on_Duties_and_Fees_Deferment_for_Certain_Importers

April 20, 2020 at 9:51 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the President's Executive Order on Duties and Fees Deferment for Certain Importers

"I applaud the President for signing this [Executive Order](#), which gives the Administration the ability to help the trade community and U.S. businesses who keep critical supply chains for U.S. manufacturers moving during this unprecedented time. As we all know, the COVID-19 pandemic response has created serious economic issues for many American businesses. This President and this Department have, and always will, put the American worker first.

This EO will give the Administration the flexibility to allow importers who have faced a significant financial hardship during the COVID-19 response to defer the payment of certain duties, taxes, and fees for 90 days. This payment flexibility will be available only for importers with a significant financial hardship. Duties and fees associated with antidumping and countervailing duties (AD/CVD), and Section 201, 232 and 301. Trade Remedies are not included in this relief effort."

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

Subject: Transition in Federal POC - 3/14-3/22

Importance: High

Darcie and Nic:

I am writing to inform you that we will be temporarily transitioning the Federal Point of Contact (POC) role for the rapidly evolving COVID-19 response in Washington State.

Timing is not ideal but my brother is getting married in Mexico next week, and I will be traveling out of the country for his wedding. During that time, the governor's DC deputy director Morgan Wilson (Morgan.Wilson@gov.wa.gov) will serve as the primary Federal POC for the coronavirus response. After that time I will resume my post as Federal POC for our state.

Federal POC for Washington's COVID-19 Response: March 14 - March 22

Morgan Wilson

Deputy Director of Gov. Inslee's DC Office

Morgan.Wilson@gov.wa.gov

Cell: 360.968.9255

Although I'll be traveling I expect to have cell service and will remain as available as possible to assist. If you need to reach me for any reason, you may try my work cell (360.999.0155) or my personal cell (206.459.9520).

Thanks for all you're doing to support Washington during this challenging time.

Casey

Federal_Partners_Bring_Additional_Resources_to_US_for_COVID-19_Response

March 29, 2020 at 12:53 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 29, 2020

FEMA Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal

reimbursement, by FEMA for the states of California, New York and Washington, for states' use of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 2, 2020

April 02, 2020 at 10:51 AM EDT

To: Undisclosed recipients:

Good morning,

The national social hot issues and social listening reports are attached for greater context.

If there are any topics to monitor for, please let us know.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 2, 2020

SUMMARY

- Washington continues to ramp up medical capacity for COVID-19 response.
- Economic impacts of the crisis are especially acute at the beginning of the month, when many rent and mortgage payments are due.
- Gov. Inslee put a call out to manufacturers in Washington state for help producing PPE for health care workers.
- Oregon receives much-needed federal shipment of PPE, reports 'Strong evidence' that Oregon's coronavirus restrictions are working to flatten the curve.

Public Sentiment

- As Washington's Stay-at-Home order is likely to be extended, people are sad and fatigued but say they understand why social distancing measures need to keep going
- Calls from the public for people to stay home continue, the more people comply, the sooner these measures can end.
- Oregonians are grateful for PPE shipment as they carefully watch to see if it is appropriately distributed.
- There is broad concern regarding access to testing (including the time it takes to get results) and what it means for reported cases numbers.
- Alaskans understand the need for extended mandates during the pandemic, while some are opposed to continued restrictions on their freedom of movement and commerce.

Washington

Federal Response

- A look inside the Army field hospital at CenturyLink Field, designed to help medical centers swamped by coronavirus patients. ([Seattle Times](#))
- Army hospitals ready in New York and Seattle ([U.S. Army](#))
 - [GEN James C. McConville](#): Set-up of our [@USArmy](#) Field Hospital is underway at CenturyLink Field Event Center. Great teamwork and unity of purpose between [@fema](#), state/local officials, and our Soldiers to expand medical care capacity to defeat #COVID19 #KilltheVirus. ([@ArmyChiefStaff](#))
 - [Pete Gaynor](#): Field hospitals continue to be built around the nation as we respond to #COVID19. Soldiers from the 627th Army Hospital based in Fort Carson, CO are setting up the CenturyLink Field Event Center to treat patients without COVID-19 & help Puget Sound

area hospitals. ([@FEMA Pete](#))

- FEMA grants Pierce County \$15 million for coronavirus response ([Tacoma News Tribune](#))
- More than 1,000 unused coronavirus test kits sitting in storage in Tacoma. City officials say FEMA had jurisdiction over the tests, but FEMA now says it's up to the state and local health authorities to allocate the tests. ([KING 5](#))
 - Comments on the [KING 5 Facebook post](#) are irritated by finger-pointing and "blame" going around ([example 1](#), [example 2](#), [example 3](#), [example 4](#)) with one person calling the entire news story "unnecessary" ([example 5](#)) and another saying that everyone need to stop "whining" about who is at fault and just get to work ([example 6](#)).
- FEMA, Washington State Department of Health (DOH), and the Yakima Health District announced that a former Yakima hospital will be used to help support the state's COVID-19 response. ([NBC Right Now](#))

PPE

- Gov. Inslee on Wednesday put a call out to manufacturers in Washington state for help producing personal protection equipment (PPE) for health care workers. ([My Northwest](#))
- [Maddow Blog](#): Gov. Inslee: "We are so desperate for PPEs. We are desperate for test kits. We are sending nurses in who don't have what they need for PPEs and we need to have a national mobilization of the manufacturing base of the US as we had in WWII so we can get these nurses what they deserve..." ([@MaddowBlog](#))
- Kitsap County hobbyists team up with Navy to produce PPE in COVID-19 fight. ([KOMO](#))

Social Distancing

- Inslee says its 'highly likely' state's stay-home order will be extended ([KOMO](#))
 - In comments on the [KOMO News Facebook post](#), many express sadness and fatigue but say they understand why social distancing measures need to keep going. People urge each other to keep staying home, saying that the more that people comply, the sooner these measures can end. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))
- Seattle has booked an entire downtown hotel for first responders to isolate and quarantine during coronavirus pandemic ([Seattle Times](#))

Business and Economy

- Port of Seattle defers rent for airport and marina tenants hit by coronavirus shutdown ([Seattle Times](#))
- Boeing announces plan for voluntary layoffs ([KIRO 7](#))
- Tukwila may cut city workers' pay 10% because of COVID-19. While emergency professionals worldwide battle the coronavirus, first responders in Tukwila learned Tuesday their pay may be cut because of COVID-19. ([KIRO 7](#))
- Calls grow to cancel rent, mortgage payments in coronavirus crisis ([KIRO 7](#))

Community Impact

- Overall crime is down in Washington amid coronavirus crisis, but domestic violence calls are up. Multiple police departments in Washington have reported a double-digit decrease in overall crime but say domestic violence calls have increased. ([KING 5](#))
- 'A Brave New World:' Music video chronicles life in Seattle during COVID-19 outbreak ([KOMO](#))
- Op-Ed: Coronavirus could mean catastrophe for public transit. The federal stimulus will help, but we'll need more creative funding approaches to save King County's transit system. ([Crosscut](#))

Medicine and Modeling

- More evidence indicates healthy people can spread virus ([Seattle Times](#))
- New model predicts Washington Coronavirus deaths peaking April 13 ([KEPR](#))

New Cases and Fatalities

- More than 1,000 in US die in a single day from coronavirus, doubling the worst daily death toll of the flu ([Kitsap Sun](#))
- Yakima County at 224 coronavirus cases, 6 deaths ([Yakima Herald](#))
- Before a Washington mother died of coronavirus, her six children used a walkie-talkie to say goodbye ([YakTriNews](#))

Oregon

Federal Response

- Oregon receives large shipment of personal protective equipment from FEMA. ([KATU2](#), [KTVZ](#), [The News Guard](#), [Tillamook Headlight Herald](#), [KOEN](#), [KPIC](#), [Lincoln City News Guard](#)). In response, some Oregonians [thanked FEMA](#) while criticizing Gov. Brown for a lack of gratitude for federal support ([example 1](#)). Others called for America to rebuild "by us, for us" manufacturing at home ([example 2](#), [example 3](#)). People are watching closely to see how PPE will be distributed. ([example 4](#), [example 5](#))

Flattening the Curve

- 'Strong evidence' seen that Oregon's coronavirus restrictions are working. ([Portland Tribune](#)) A model by University of Washington researchers forecasts that Oregon's hospital system will be capable of handling the flow of patients with COVID-19. Some doubt the accuracy of the research since so few people are being tested. ([example 1](#), [example 2](#), [example 3](#))

PPE

- Legacy Health receives much needed personal protective equipment from Newberg manufacturing company ([KPTV12](#))
- Oregon company starts producing face shields and PPE shortage ([KGW](#))

Business

- Oregon Gov. Brown halts commercial evictions amid COVID-19 response. ([KOIN](#), [KATU2](#)) Responses ask for more to be done, and ask what happens after the pandemic ends. ([example1](#), [example2](#))
- Oregon's construction industry is chugging along like it's still 2019. ([Willamette Week](#))
- Oregon's wine industry chases safety and sales in the coronavirus era. ([OPB](#))
- Some Oregon newspapers stop printing, cut jobs and hours amid coronavirus crisis. ([The Oregonian](#))
- OLCC extends bottle bill reprieve for Oregon businesses due to pandemic. ([KPTV12](#))

Community Efforts

- 'Operation Gresham Connected' checks on city's most vulnerable residents. ([KATU2](#))
- Website offers to pair people to meet needs in Albany. When the city of Albany, OR, signed up for [albany.recovers.org](#) through FEMA last year, it was with the thought that a massive Cascadia earthquake was a possibility in the future and other natural disasters could cut communication or render emergency services thin. The program allows people to enter a need they have — groceries, for example — and then partners them with volunteers who have submitted tasks they're available to help with or supplies they have to spare. ([Lebanon Express](#))

New Cases

- 1 more death, 47 new coronavirus cases reported in Oregon. ([KGW8](#), [KOIN](#), [KATU2](#), [Statesman Journal](#))
- Oregon state penitentiary employee diagnosed with COVID-19. ([OPB](#), [Statesman Journal](#))
- Oregon hospitals say there's no surge in COVID-19 patients, yet. ([KPTV12](#))

Humanity

- 95-year-old Oregon veteran recovers from coronavirus ([KVAL](#))

Idaho

New Cases

- Idaho hit with largest single-day coronavirus increase as cases eclipse 650 ([Idaho Statesman](#)) Some Idahoans feel that the reason the situation is not improving is because people are not staying home. ([example 1](#), [example 2](#))
- Blaine sheriff's employee tests positive for COVID-19, Staff otherwise 'healthy and working,' sheriff says. ([Idaho Mountain Express](#))

First-hand account

- I tested positive for coronavirus, here is what I learned ([KTVB](#))

Medical capacity

- As financial losses from COVID-19 mount, Saint Al's enacts temporary cuts and furloughs ([Idaho Statesman](#))
- First responders bear the brunt of COVID-19 ([Idaho Mountain Express](#)) Local departments bolster ranks to handle coronavirus outbreak.

Anti-Government

- Idaho Anti-Government Activists Split On Coronavirus Emergency Orders ([Boise State Public Radio](#)) Response's to the radio station's Facebook post are mostly negative. ([example 1](#), [example 2](#))

Alaska

Social Distancing

- State extends mandates, closing dine-in services and others indefinitely, as coronavirus case total rises to 143 ([KTUU](#))
 - The announcement came during a press briefing where Alaska's Chief Medical Officer announced 10 new cases and provided context: 5,022 people have been tested, with 2.8% testing positive.
 - The [spring bear hunting season was cancelled](#) as part of the extended closures. Subsistence bear hunting is still allowed. In response to this, some said it only make sense [for sport fishing to be closed as well](#).
 - The Commissioner for Alaska's Department of Education and Early Development gave an update on the statewide virtual school program, as Gov. Dunleavy said he has not yet decided if schools will remain closed for the entire school year ([Alaska Public Media](#))
 - Several viewers of the press briefing praised Gov. Dunleavy's leadership in the pandemic response. ([example 1](#), [example 2](#), [example 3](#)) Others decried the news ([example 4](#)) and question whether these mandates against free movement violate the constitution. ([example 5](#))

Private Sector/PPE

- Fairbanks auto accessory shop makes face shields for health care workers. ([KTVF](#)) They are [celebrated](#) in response.

Price Gouging

- Anchorage man who allegedly bought thousands of N95 masks and sold at huge markup faces steep fines. ([Alaska Public Media](#)) In response, some comment they were under the impression that these type of business practices are still legal in Alaska. ([example 1](#), [example 2](#), [example 3](#))

Economic Relief

- These Y-K Delta Communities, Including Bethel, Waiving Some Utility Costs During COVID-19 Pandemic ([KYUK](#)) The goal is to offer financial relief, as well as provide more water for residents to wash their hands.

Personal Account

- Recovering Fairbanks COVID-19 patient speaks out as a cautionary tale. ([KTVF](#)) Alaskans appreciated her sharing her story. ([example](#))

Cc: Benardo, Nichole (MIL)

The following message is sent on behalf of MG Daugherty and Mr. Robert Ezelle. **Please note the suspense is close of business March 16, 2020.**

Dear State Agency Representatives,

We have an immediate time-sensitive request from the Department of Health and the Policy Group for operational level plans describing what your agency would do to implement Non-Pharmaceutical Interventions 10-13 *AND* what steps your agency would take to reduce potential negative impacts of enacting these interventions.

What are NPIs 10–13:

- NPI 10: Recommend or Order Cancellation of Major Public and Large Private Gatherings
- NPI 11: Recommend or Order Closure or Restrictions of Public or Private Sites within impacted communities
- NPI 12: Prevent Non-Emergency Travel Outside the Home
- NPI 13: Establish a Cordon Sanitaire (restrict movement in and out of an area of quarantine)

This is a continuation of the efforts taken the past two weeks by many of your staff. We are asking to reinvigorate these efforts to identify the specific actions and steps needed in order to make them possible. In addition, we are asking your teams to take the next step and identify how you will put efforts in place to reduce or address the negative primary, secondary, and tertiary impacts associated with these actions.

Collectively we will take this information, identify our dependencies, and create an action plan for how we can lean forward as one Washington to reduce the spread and protect the health.+

I realize the enormity of creating an operational level plan of this nature, however bearing in mind the Governor's Proclamation on March 11, 2020 and the direction this incident is predicted to go in the

coming days and weeks, we are now requesting immediate action.

In order to help ease some of the burden for this task, four templates are attached for your teams to use. The templates include comments throughout the document and are meant to guide plan development and capture the conversations many of you are already having. We are requesting your agency fill out each NPI template, four (4) in total.

As of yesterday, we are now at a point where we are seeing evidence of continued spread of COVID-19 in two or more counties. We are facing an unprecedented challenge that will require the whole of government response.

Please send your completed templates to our Advanced Planning Team no later than COB March 16, 2020.

Attached you will find:

- NPI Worksheets 10-13 (developed by your collective agencies during the first planning session held at Camp Murray February 27-March 2). The worksheets are provided for your reference and identify actions your agency has already indicated it will take to reduce the impact of these interventions.
- NPI Guidance Document
- NPI 10-13 Operational Level Plan Templates.

We are asking for two (2) main outputs:

1. What you are doing as an agency to implement NPI 10-13 (Feel free to use information from existing plans and the request for information sent by our planner Nichole Benardo on March 4, 2020).
2. What steps you are taking to reduce the identified negative impacts expected from implementation of interventions (10-13)?

Please send your completed templates to AVDPLNG@Mil.wa.gov. If you have any questions or need additional support in completing this urgent task, please feel free to contact the leads for Advanced Planning.

FEMA Region 10 - External affairs

Media analysis & SOCIAL LISTENING REPORT

March 27, 2020 PM

SUMMARY

- Officials see hope in Washington state as cases appear to be leveling off. UW model says social distancing is starting to work — but still projects 1,400 coronavirus deaths in the state.
- The Governor of Idaho and other government officials work to clarify how the stay-at-home order affects Idahoans.
- As number of COVID-19 cases grows, Alaska officials warn of a limited healthcare system.
- Oregon healthcare workers continue to highlight the lack of critical PPE - a problem that existed prior to the COVID-19 crisis.

Public Sentiment

- Washingtonians express gratitude toward Gov. Inslee's handling of the COVID-19 crisis so far, given that social distancing measures are showing their first signs of success. Many wish the mandate was stricter and others would like exceptions for their small businesses.
- The general sentiment from Idahoans is accepting and appreciative of measures put in place to stop the spread of coronavirus and protect those at risk such as the elderly.
- Support for increased social distancing – both mandated and voluntary – continues to grow in Alaska, even as economic concern looms large.
- People across the region continue to cheer on private companies that voluntarily step in to meet supply needs.

Washington

Flattening-the-Curve

- UW model says social distancing is starting to work — but still projects 1,400 coronavirus deaths in the state. Modeling from the UW's Institute for Health Metrics and Gerontology suggests that social distancing could reduce the number of deaths by 75% nationwide. ([HYPERLINK "https://www.seattletimes.com/seattle-news/health/uw-model-says-social-distancing-is-starting-to-work-but-still-projects-1400-coronavirus-deaths-in-the-state/"](https://www.seattletimes.com/seattle-news/health/uw-model-says-social-distancing-is-starting-to-work-but-still-projects-1400-coronavirus-deaths-in-the-state/))
- Seattle researchers predict Washington could be facing 27 coronavirus deaths a day by mid-to-late April. ([HYPERLINK "https://www.king5.com/article/news/health/coronavirus/coronavirus-forecast-deaths-could-spike-in-washington-state-by-mid-april/281"](https://www.king5.com/article/news/health/coronavirus/coronavirus-forecast-deaths-could-spike-in-washington-state-by-mid-april/281))
- Where coronavirus outbreak started in Washington state, officials see hope as cases appear to be leveling off ([HYPERLINK "https://www.washingtonpost.com/news/health/wp/2020/03/27/coronavirus-outbreak-started-in-washington-state-officials-see-hope-as-cases-appear-to-be-leveling-off/"](https://www.washingtonpost.com/news/health/wp/2020/03/27/coronavirus-outbreak-started-in-washington-state-officials-see-hope-as-cases-appear-to-be-leveling-off/))
 - Gov. Inslee shared this article on [HYPERLINK "https://www.facebook.com/156188051194984/posts/1637697329710708"](https://www.facebook.com/156188051194984/posts/1637697329710708) Facebook with the caption "source=feed_text&epa=HASHTAG&xts=%5B0%5D=68.ARBGTGU7HWLOj3yjiTgm00SPm7Z6CeeYeZTxvLqIOMSI9A_pSorNwCOL74AlnQ4uQ3KEXxfNYrAhlPIBRcIK1HwypHC1iP8OBDEAb0LwYlKdqfURJNaRpUIX4uOb2X0hcKN3MCJzEj2bWZsByPpV0kJs0GX2v7SCBq4dR" #WeGotThisWA."
 - Comments on [HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?xts=%5B0%5D=68.ARBGTGU7HWLOj3yjiTgm00SPm7Z6CeeYeZTxvLqIOMSI9A_pSorNwCOL74AlnQ4uQ3KEXxfNYrAhlPIBRcIK1HwypHC1iP8OBDEAb0LwYlKdqfURJNaRpUIX4uOb2X0hcKN3MCJzEj2bWZsByPpV0kJs0GX2v7SCBq4dR"](https://www.facebook.com/WaStateGov/posts/1637697329710708?xts=%5B0%5D=68.ARBGTGU7HWLOj3yjiTgm00SPm7Z6CeeYeZTxvLqIOMSI9A_pSorNwCOL74AlnQ4uQ3KEXxfNYrAhlPIBRcIK1HwypHC1iP8OBDEAb0LwYlKdqfURJNaRpUIX4uOb2X0hcKN3MCJzEj2bWZsByPpV0kJs0GX2v7SCBq4dR) Governor Inslee's Facebook post are largely appreciative of the governor's efforts so far-- including from people who self-describe as not typically fans of the governor ([comment_id=1637804229700018" example 1](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=1637804229700018), [HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=1637702866376821" example 3](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=1637702866376821)).
 - Comments also feature discussion about "essential" businesses impacted by the Governor's Stay-at-Home order:
 - One person says their employer in a "non-essential" position is not allowing them to stay home without the threat of losing their jobs ([HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932"](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932)).
 - Another expresses gratitude for essential workers and says we should be doing more to help overwhelmed grocery store workers ([HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932"](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932)).
 - A third person expresses the "danger" they feel reporting to work as an essential employee in the mental health profession and wishes the Governor would place that allow contractors to safely keep building ([HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932"](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932)).
 - Some people do consider the Stay-at-Home order to be a "joke" because they observe non-essential businesses still operating ([HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932"](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932)) out that it's hard to take the order seriously when smoke shops are considered "essential" ([HYPERLINK "https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932"](https://www.facebook.com/WaStateGov/posts/1637697329710708?comment_id=163781756359932)).

Medicine and Testing

- U.S. Army Brings Field Hospital to Seattle to Help Reduce Burden on Local Hospitals, Field Hospital Arrives After Calls for Urgent Action by Mayor Durkan ([on-local-hospitals/" Seattle Mayor Jenny Durkan](https://www.seattlepi.com/news/health/article/Seattle-Mayor-Durkan-Brings-Field-Hospital-to-Seattle-to-Help-Reduce-Burden-on-Local-Hospitals-5844441.html))

Dear State Agency Liaisons

As we continue to plan for the impacts unfolding around the COVID19 Pandemic, we are looking to better understand your agency's outlook related to the potential activation of your COOP plan. Expect a similar email to be sent to your agency heads shortly, but I wanted to give you all a heads up and a head start on answering the questions listed below. Please send your answers to AVDPLNG@MIL.WA.GOV by COB on Monday, March 16, 2020

- 1. Do you have any known challenges to meeting the Mission Essential Functions (MEFs) outlined in your agency's COOP?**
- 2. How will those challenges disrupt the services you provide to your customers and stakeholders?**
- 3. What is the approximate timeframe you expect those disruptions to begin and for how long do you expect the disruption to continue?**
- 4. What strategies have you developed to mitigate potential disruptions to customers and stakeholders, based upon your agency's authorities?**
- 5. Are there any mitigation strategies for the continuation of Mission Essential Functions that would require the use of the Governor's emergency powers?**

6. **What services that you provide to your customers and stakeholders will be disrupted due to the activation of your COOP because those services are not considered Mission Essential Functions?**

Please send responses to AVDPLNG@MIL.WA.GOV

Regards

Michael Roberson
Planning Section Chief

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_1

April 01, 2020 at 8:26 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic.

These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people is our top priority.
- On March 31, the president extended the nation's Slow the Spread campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut

(50) and Louisiana (150).

- Thirty states and 12 tribes have issued stay at home orders.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 3, 2020

April 03, 2020 at 10:36 AM EDT

To: Undisclosed recipients:

Good morning.

The two most recent national hot issues and social listening reports are attached for greater context.

If you come across any hot issues, please send them our way for inclusion in our report.

Thank you.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 3, 2020

SUMMARY

- Washington Governor Jay Inslee announced Thursday he will extend his statewide stay-at-home order through May 4 to limit the spread of the coronavirus.
- A model from UW suggests Washington hospitals could handle the peak of the coronavirus crisis, but experts caution that the model only looks at the best-case scenario.
- Recent reports indicate that Washington's social distancing measures are slowing, but not stopping, the spread.
- Oregon reports dire need for personal protective equipment.
- Alaska's largest regional airline suspends most service, potentially leaving dozens of rural Alaskan communities without options for transportation and critical deliveries.

Public Sentiment

- Many Washingtonians support Governor Inslee's extension of his Stay-at-Home Order, but economic anxiety looms large.
- Oregonians are stressed about the future of small business but are celebrating good news where they can; recovery stories, frontline workers, and local efforts to support the vulnerable.
- Alaskans appreciate state leadership in the pandemic response—particularly the clarity and frequency of updates. Economic concerns continue to fuel anger toward the state legislature.
- A sheriff and legislator in Idaho encourage defiance of Governor Little's stay-at-home order. In response, there is some support, but many feel that the order is in place for people's health and safety.

Washington

Response

- Gov. Jay Inslee has extended his order for Washingtonians to stay home unless engaging in essential activities until 11:59 p.m. on May 4. ([KOMO](#), [Everett Herald](#), [KNKX](#), [Seattle PI](#), [Kitsap Sun](#), [El Sol de Yakima](#))
 - On [KOMO's Facebook page](#), many comments are supportive of the Governor's leadership and response so far ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#), [example 7](#)).
 - Many express anxiety over the long-term impacts of "killing our economy" ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#)).

- o Some worry that the Stay-at-Home is not working with too many "essential" workers still working ([example 1](#), [example 2](#)).
- National Guard begins to arrive, helping Walla Walla Food Bank. A team of 40 Washington National Guardsmen will assist at the Blue Mountain Action Council Food Bank in Walla Walla. ([Walla Walla Union Bulletin](#))
- Gov. Jay Inslee answered Washingtonian's questions about the coronavirus via his Twitter feed on Thursday. Gov. Inslee's answered questions about [social distancing](#), [paying rent](#), and the [grocery supply chain](#) during coronavirus crisis. ([KING 5](#))
- Feds propose \$611,000 fine at Seattle-area nursing home ([KATU](#))

PPE

- Clark County PPE shortage 'frustrating' to officials. ([KOIN](#))
- She closed her island attire business, then made 10,000 masks for coronavirus fight. Kati Nguyen shut down her custom sewing business to begin making masks, and with the help of other Vietnamese women, more than 10,000 have been made. ([Seattle Times](#))
- [Washington State Department of Health](#) posted photos of PPE shipments arriving saying "As shipments of hospital beds, ventilators, and personal protective equipment arrive at a state warehouse, they are unwrapped, put on pallets, and shipped to long term care and medical facilities as quickly as possible. The goal is to keep decreasing the time between the arrival of shipments and delivery to needed locations."

Community Impact

- King County to move nearly 400 homeless from shelters to hotels ([KIRO](#))
 - o While some comments on the [KIRO 7 Facebook page](#) express gratitude that people will not have to be on the street in this hard time ([example 1](#)), many more express concern for the hotel owners and the value/state of their property ([example 2](#), [example 3](#), [example 4](#), [example 5](#)). One person wonders why King County can move homeless people into hotels but cannot "manage" keeping prisoners in jail. ([example 6](#))
- Kitsap homeless shelters work overtime to prevent coronavirus spread. While most Kitsap residents hunker down under the governor's stay-at-home order, homeless shelters have been brought to the pandemic's front lines as staff work to prevent the virus from breaking out among an already vulnerable community. ([Kitsap Sun](#))
- Vancouver Mall parking lot opening for people living in their vehicles as temporary 'Safe Parking Zone' ([KPTV](#))
- The Seattle Police Department said it saw a 21 percent increase in domestic violence reports last month, suggesting that stay home orders issued last month may be contributing to the rise. ([KOMO](#))
 - o On [KOMO News' Facebook post](#), people express sadness and concern over this but say it is "not surprising" and additional job losses and stress are bound to compound this ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#)). One person points out that it would be very hard to leave a domestic violence situation with nowhere to go and without the money or transportation to do so ([example 7](#))

Medical Capacity

- Coronavirus response forces Pullman Regional Hospital to cut staff pay by 25 percent.
- Pullman Regional has 64 days cash on hand. They are working on a goal to not fall below 30 days cash on hand. ([KREM](#))
- Virginia Mason Medical Center to furlough workers, cut pay amid Washington coronavirus crisis. Top medical center leaders notified managers of the decision this week, citing a 30% drop in revenue since the COVID-19 crisis began. ([KING 5](#))
- Feds book out entire Yakima hotel for medical staff to reopen Astria hospital building. ([KIMA](#))
- Model suggesting Washington's hospitals could withstand a COVID-19 surge may be too optimistic, experts say ([KUOW](#))

Economic Impacts

- Some people without direct deposit information may not get coronavirus stimulus checks until mid-August or later. ([KOMO](#))
- Economic fallout mounts, along with competition for gear ([KOMO](#))

New Cases

- Yakima County COVID-19 cases climb to 240, but no new deaths reported ([Yakima Herald](#))

Donations

- Local credit union donates more than 1,700 toilet paper rolls to Meals on Wheels in Spokane ([KXLY](#))
- Jeff Bezos donates \$100 million to U.S. food banks ([KIRO 7](#), [KOMO](#))

Oregon

PPE

- Health care workers around Oregon say they are in dire need of PPE. ([KMTR](#), [The Oregonian](#), [KATU](#)) Representatives for the Oregon Nurses Association say they've heard of [no hospital that has more than a seven-day supply of personal protection equipment](#), and some nurses have been wearing swim goggles to work.
- Are homemade masks helping? ([The Oregonian](#))
- Pacific Faculty, Staff, Students Rise to Meet the Challenges Posed by COVID-19. ([Pacific University Oregon](#)) Forest Grove Fire and Rescue is one of the recipients. People have responded positively to both organizations. ([example1](#), [example2](#))

Business

- Nearly 93,000 Oregonians filed new unemployment claims last week. ([OPB](#), [KOIN](#))
- Some Oregon stores take advantage of coronavirus crisis to jack up prices on masks, toilet paper. ([The Oregonian](#))
- Gov. Brown unveiled a small business resource website ([Portland Business Journal](#))
- A Hood River area fruit packing plant hires teens as coronavirus fears keep at-risk workers home. The plant is hiring minors who are children of people who work at the plant to encourage high-risk employees to stay home and also get on with the pear season. ([KGW](#))

State/Local Response

- Oregon OKs malaria drug for COVID-19 patients in care facilities, prisons ([NBC 16](#))
- TriMet: No more than 15 people on buses ([KOIN](#))
- Corvallis police begin prescription delivery service during stay-home order ([Corvallis Gazette-Times](#))

New Cases

- New cases of COVID-19 surpass 800. ([OPB](#), [KGW8](#), [KATU2](#), [KOIN](#), [KPTV12](#))
- Two new COVID-19 cases in Union County. ([East Oregonian](#))
- Why does Marion County have 2nd-highest OR COVID-19 tally? ([KOIN](#)) Marion County has the highest coronavirus infection rate in Oregon, according to data from the Oregon Health Authority ([KGW](#))

Humanity

- Husband released from nursing home, surprises wife on 84th birthday ([KGW](#))
- Oregonians share the message: "Health care workers grocery store employees and truck drivers are now more important than pro athletes actors and famous musicians!" ([That Oregon Life Facebook](#))

Idaho

Healthcare capacity

- Boise hospitals prepare to add beds in hotels, arenas as cases of coronavirus grow. ([Idaho Statesman](#))
- St. Mary's closes clinics. "Due to the quickly evolving impact of the COVID-19 virus in our area, we are exercising an abundance of caution." ([Idaho Free County Press](#)) People are surprised to see healthcare facilities closing their doors. ([example 1](#), [example 2](#))

New cases

- Plexus Nampa plant closes after employee tests positive for COVID-19 ([KIVI](#))
- Community Spread of COVID-19 Confirmed in Twin Falls County ([KEZI](#)) People are not surprised, as they see people not heeding stay-at-home orders. ([example 1](#), [example 2](#), [example 3](#))
- No new COVID-19 cases reported in Kootenai County Officials attribute the relatively slow rate of spread to the community's compliance with Gov. Little's stay-at-home order. ([Coeur d'Alene](#))

[Press\)](#)

Stay-at-Home Order Reactions

- Coeur d'Alene's Altar Church suspends in-person services, reversing previous decision. ([KREM](#))
- Sheriff opposes stay-at-home order ([Bonner County Daily Bee](#), [KTVB](#)) "I do not believe that suspending the Constitution was wise because COVID-19 is nothing like the plague. We were misled by some public health officials, and now it is time to reinstate our constitution." His letter received strong reactions on Facebook, with some thanking him, ([example 1](#)) while healthcare workers told him he is 'way out of line.' ([example 2](#), [example 3](#))
- North Idaho Legislator Urges People 'Push Back' Against Governor's Stay-Home 'Edict' ([KUOW](#))
The reactions to this story all disagree with the legislator. ([example 1](#), [example 2](#), [example 3](#))

Private Sector/PPE

- Boise company pivots to manufacture protective masks, gowns for healthcare workers ([KTVB](#))
The news was praised on Facebook. ([example](#))

Alaska

Economy

- Ravn suspends air service, including mail deliveries, to most rural Alaska communities due to a 90% reduction in passenger revenue. The regional airline notified the U.S. Postal Service it could no longer bring mail to 180 communities, mostly in the northern part of the state. It is a move that could leave dozens of rural villages without passenger air service and no other reliable link to the road system. ([Anchorage Daily News](#), [Alaska Public Media](#))
 - In response, people worry how those communities would receive mail, medicine, food and other critical deliveries ([example 1](#), [example 2](#), [example 3](#)), one person calling the news 'heartbreaking' ([example 4](#)).
 - Gov. Dunleavy briefly addressed the closure [in his briefing Thursday night](#)—saying other airlines will pick up the slack.
- Gov. Mike Dunleavy rescinded the cancellation of all spring bear hunts in Alaska Thursday, saying that spring bear hunts will be open to Alaskan hunters, but not available to those non-residents and anyone from outside the state. ([KTVE](#))
- Former Alaska leaders urge lawmakers to give emergency money to all Alaskans now ([KTVA](#))
Former Alaska Republican Gov. Sean Parnell and former Alaska Democratic U.S. Sen. Mark Begich deliver a united message to the Alaska state legislature. In response, people support the message but are skeptical it will be successful. ([example 1](#), [example 2](#))
- Alaska Railroad delays passenger season start ([KTUU](#))

State Response

- Chief medical officer presents new tools Alaskans can use to stay updated on COVID-19 ([KTVA](#)) In a briefing Thursday evening, Dr. Zink and Gov. Dunleavy introduced a new tracking system.
 - Dr. Zink addressed recent requests for recovery numbers saying "the problem is it's not a reportable condition to us." She said Alaska is in the top 10 states with the highest percentage of testing. ([KTVA](#))
 - Gov. Dunleavy said that compared to other states Alaska "is not doing that poorly" and Dr. Zink said that Alaska's labs have a uniquely quick turnaround relative to other states.
 - People responded with appreciation for Dr. Zink and Gov. Dunleavy taking the time to explain the new tracking tools and educate Alaskans on commonly asked questions. ([example 1](#), [example 2](#), [example 3](#))
 - State medical officer encourages Alaskans to wear homemade masks ([Alaska Public Media](#))
- Southeast Alaska Regional Health Consortium eyes closed boarding school as COVID-19 treatment site. The tribal health organization is asking to use the state's school for overflow COVID-19 patients. So far, state is noncommittal. ([KSTK](#))

Tribal

- Seldovia Village Tribe is encouraging people to '[think like Zink](#),' referencing Alaska's Chief Medical Officer, encouraging precautions to slow the spread of coronavirus.
- Several tribes are sharing resources for people struggling with the emotional strain and isolation of the pandemic. ([example 1](#), [example 2](#))

Private Sector/PPE

- Surgical material given out to volunteers making masks for hospital workers in Fairbanks ([KTVE](#))
- Education
- Alaska establishes new statewide online school staffed by a Florida education provider ([Anchorage Daily News](#))
- New Cases
- Fort Greely announces first confirmed case of COVID-19 ([KTVE](#))
- Humanity
- Bagpipers played "Scotland the Brave" outside of Alaska Regional Hospital this morning to show appreciation for health care workers on the front lines ([KTVA Facebook](#))

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 19, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Best Practices

FEMA and the U.S. Department of Health and Human Services (HHS) are collecting and sharing best practices and lessons learned from the whole-of-America response to the coronavirus (COVID-19) pandemic. The best practices are intended to help medical practitioners, emergency managers, and other critical stakeholders learn from each other's approaches and apply solutions to current response and recovery operations.

The [FEMA Coronavirus Emergency Management Best Practices](#) page provides a one-stop shop to explore best practices and lessons learned across all levels of government, private sector, academic institutions, professional associations, and other organizations. HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

Best practices are organized around five themes:

- *Helping People*, which includes best practices on topics such as crisis counseling resources and anticipating and attending to civil rights;
- *Government Operations* best practices such as public information and continuity of operations considerations;
- *Private Sector and Infrastructure*, which includes best practices for commercial trucking and food stores;
- *Recovery Planning and Implementation*, to include the newly released FEMA Disaster Financial Management Guide and economic recovery considerations; and
- *Medical Supplies and Equipment*, including best practices for the preservation of personal protective equipment while ensuring workers are protected.

Please visit www.coronavirus.gov for current health-related guidance and information on COVID-19.

Treasury_Guidance_--_State,_Local,_and_Tribal_Governments_for_the_Coronavirus_Relief_Fund

April 22, 2020 at 7:45 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the below announcement from the White House Office of Intergovernmental Affairs regarding Treasury's release of CARES Act guidance for State, Local, and Tribal Governments.

Today, Secretary of the Treasury Steven Mnuchin released guidance for State, Local, and Tribal Governments regarding the Coronavirus Relief Fund (Section 5001 of the CARES Act).

As stated by the [legislation](#) signed by President Trump on March 27, the use of funds “are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID–19).” The guidance document ([here](#)) and frequently asked questions ([here](#)) provide, in detail, examples of eligible and ineligible expenditures of the \$150 billion Coronavirus Relief Fund. You can find additional information about Assistance to State and local governments [here](#).

We will continue to share all relevant information as it becomes available.

Thank you,

White House Office of Intergovernmental Affairs

Coronavirus Aid, Relief, and Economic Security Act (CARES)

Following extensive negotiations between the Trump Administration and Congressional Leaders, President Trump signed the *Coronavirus Aid, Relief, and Economic Security Act (CARES)*. The \$2.2 trillion economic relief package provides American families, healthcare workers, and small businesses with the economic support they need to get

through this challenging time. This aid comes on top of the Family First Coronavirus Aid Package, enacted last month. State/Local/Tribal provisions include:

- \$150 billion in direct aid to State, Tribal, and local governments. Aid will be allocated primarily by a State's population with each State receiving at least \$1.25 billion.
- \$340 billion in additional emergency supplemental funding to combat the coronavirus outbreak.
- \$500 billion for loans and guarantees that authorize the U.S. Treasury to support eligible businesses and States and local governments to cover losses incurred as a result of COVID-19.
- \$100 billion for hospitals and health care facilities to reimburse expenses or lost revenues not otherwise reimbursed that are directly attributable to COVID-19.
- **\$3.5 billion** to allow States to expand childcare benefits for healthcare workers, first responders, and others on the frontlines of this crisis.
- Read more here: **[President Donald J. Trump Is Providing Economic Relief to American Workers, Families, and Businesses Impacted by the Coronavirus](#)**

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- During the **April 24** White House Press Briefing, Food and Drug Administration (FDA) Commissioner Dr. Stephen Hahn announced that the FDA had [approved the first COVID-19 home collection test kit](#).

- The FDA continues to facilitate test development to ensure access to accurate diagnostics, working with over 350 test developers and authorizing 63 types of tests to date.
- On **April 24**, President Trump signed the [Paycheck Protection Program and Health Care Enhancement Act](#) to replenish the Small Business Administration's small business loan program while also providing crucial support for America's frontline medical workers.
 - The act provides \$320 billion in additional funding for the Paycheck Protection Program, along with \$75 billion for hospitals and healthcare providers to fight coronavirus and \$25 billion for ongoing testing across the country.
 - The [Paycheck Protection Program](#) processed nearly \$350 billion in loans to 1.6 million small businesses from funding provided in the CARES Act. More than 4,900 lending institutions participated in making these SBA-backed loans.
- As of **April 24**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.5 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.8 million surgical gowns, 779.1 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Michigan's Request for a Major Disaster Declaration (IA, PA, & HM)

March 26, 2020 at 4:15 PM EDT

To: William Kirkland, Crozer, William (who.eop.gov), SHORT, CHERIE, Harper, Jay

Cc: Peterson, Mark J, FEMA-IGA

Good Afternoon,

Please find attached Governor Gretchen Whitmer's request for an expedited major disaster declaration for the State of Michigan as a result of the COVID-19 Pandemic beginning on January 31, 2020, and continuing.

The Governor is specifically requesting the Individual Assistance (all programs) statewide; debris removal and emergency protective measures (Categories A and B), including direct Federal assistance, under the Public Assistance program statewide; and Hazard Mitigation statewide.

For your reference, I have also attached a comprehensive Stafford Act Declaration Process Fact Sheet.

We will notify you as soon as a determination is made. Should you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

Respectfully,

Jacob Spell

FEMA_Offers_Ways_for_Private_Sector_to_Help_Fight_COVID-19

March 27, 2020 at 4:08 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA Offers Ways for Private Sector to Help Fight COVID-19

Under the White House Coronavirus Task Force's direction, FEMA, HHS and our federal partners continue to work closely with state, local, tribal and territorial governments in executing a whole-of-government response to fight the COVID-19 pandemic and protect the public. The outpouring of support from the private sector to provide medical supplies and equipment has been tremendous. To help us match the many offers of assistance to the right place, at the right time, and in the right quantity, we ask for your help in ensuring partners know how to connect.

To **sell medical supplies** or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Updated Notice ID 70FA2020R00000011](#)). This solicitation requires registration with the System for Award Management (SAM) in order to be considered for award, pursuant to applicable regulations and guidelines. Registration information can be found at www.sam.gov. Registration must be "ACTIVE" at the time of award.

If you have **medical supplies or equipment to donate**, please provide us details on what you are offering through our online medical supplies and equipment form at <https://www.fema.gov/covid19offers>.

If you are interested in **doing business with FEMA** and supporting the response to COVID-19 with your company's **non-medical** goods and/or services, please submit your inquiry to the Department of Homeland Security's Procurement Action Innovative

Response (PAIR) team at DHSIndustryLiaison@hq.dhs.gov.

In addition to these avenues to help, **licensed healthcare professionals that want to volunteer** can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.

If you are a hospital or healthcare provider in need of medical supplies, please contact your state, local, tribal or territory department of public health and/or emergency management agency. Any needs that cannot be met by the state or tribe are then sent to the respective FEMA regional office who are coordinating requirements through the FEMA National Response Coordination Center. FEMA is working with the Department of Health and Human Services and other federal agencies to fulfill requests and ship supplies as quickly as possible.

Additional ways to help can be found at www.fema.gov/coronavirus/how-to-help.

Interim_Guidance_for_Implementing_Safety_Practices_for_Critical_Infrastructure_Workers_Who_May_Have_Had_Exposure_to_a_Person_with_Suspected_or_Confirmed_COVID-19

April 09, 2020 at 11:11 AM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the update below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19.

April 9, 2020

CISA Update

Interim Guidance for Critical Infrastructure Workers Who May Have Had Exposure to COVID-19

Partners,

Please find below an important update from the Centers for Disease Control and Prevention (CDC) and the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19. These two important informational products include *Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19* and a quick reference of the Do's and Don'ts for employers and employees related to COVID-19 exposures.

While the [Interim Guidance](#) specifically calls attention to critical infrastructure workers serving in the specific capacities and functions, as below, the guidance can apply to all critical infrastructure workers with the exception of Healthcare Providers who are covered under [separate guidance](#).

- Federal, state, & local law enforcement
- 911 call center employees

- Fusion Center employees
- Hazardous material responders from the government and the private sector
- Janitorial staff and other custodial staff
- Workers – including contracted vendors – in food and agriculture, critical manufacturing, informational technology, transportation, energy and government facilities

Employers should implement the recommendations in the [Interim Guidance](#) for Businesses and Employers, to Plan and Respond to Coronavirus Disease 2019, to help prevent and slow the spread of COVID-19 in the workplace.

Please continue to monitor the CDC website for the most current medical [guidance](#).

FEMA-IGA

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 5, 2020)

April 05, 2020 at 2:31 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 5, 2020

Coronavirus (COVID-19) Pandemic:

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- HHS will be providing state, territory and tribal Public Health departments with a one-time shipment of Abbott COVID-19 rapid tests.
 - Shipments are expected to arrive at the 70 identified locations by April.
 - The tests allow for immediate, on-site testing at the point-of-care.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April

1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.

- Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
- Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - DOD will deliver 300 ventilators from its supply to New Jersey today, April 5.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and an additional 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 30 ventilators for Guam; an additional 200 ventilators for Louisiana; an additional 200 ventilators to New Jersey; and 100 ventilators for Massachusetts.
- Forty states, four territories and 12 tribes have issued stay at home orders.

Office of Intergovernmental Affairs (IGA)

Treasury Launches Web Portal and Begins Disbursement of CARES Act Funding to State, Local, and Tribal Governments

April 13, 2020 at 6:01 PM EDT

To: casey.katims@gov.wa.gov

State, Local, and Tribal Leaders –

Today, April 13, the U.S. Department of the Treasury released eligibility guidance for CARES Act funding to State, Local, and Tribal Governments. Below, please find additional information. Note that additional guidance on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Sincerely,

The White House Office of Intergovernmental Affairs

U.S. Department of the Treasury: The CARES Act Provides Assistance for State and Local Governments

April 13, 2020

Through the Coronavirus Relief Fund, the CARES Act provides for payments to State, Local, and Tribal governments navigating the impact of the COVID-19 outbreak.

The CARES Act established the \$150 billion Coronavirus Relief Fund.

Treasury will make payments from the Fund to States and eligible units of local government; the District of Columbia and U.S. Territories (the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands); and Tribal governments (collectively “governments”).

The CARES Act requires that the payments from the Coronavirus Relief Fund only be used to cover expenses that—

- (1) are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID-19);
- (2) were not accounted for in the budget most recently approved as of March 27, 2020 (the date of enactment of the CARES Act) for the State or government; and
- (3) were incurred during the period that begins on March 1, 2020, and ends on December 30, 2020.

Additional information on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Amounts paid to States, the District of Columbia, U.S. Territories, and eligible units of local government are based on population as provided in the CARES Act. The CARES Act directs

Treasury to use U.S. Census Bureau data for the most recent year for which data is available. The amount of payments made to each State will be reduced by the aggregate amount of payments that will be disbursed to eligible local governments within such State that have provided the required certifications to Treasury. Additional information on these points can be accessed below.

A unit of local government eligible for receipt of direct payment includes a county, municipality, town, township, village, parish, borough, or other unit of general government below the State level with a population that exceeds 500,000. Eligible local governments must submit the certification required by the CARES Act to Treasury by the deadline set forth below in order to receive payment.

Payments to Tribal Governments are to be determined by the Secretary of the Treasury in consultation with the Secretary of the Interior and Indian Tribes. Although that consultation has not yet concluded, certain data is requested of Tribal governments at this time to assist in this determination. Additional information on payments to Tribal governments will be posted as it becomes available.

Governments eligible for payments must provide payment information and required supporting documentation through the electronic form accessible below. To ensure payments are made within the 30 day period specified by the CARES Act, governments must submit completed payment materials not later than 11:59 p.m. EDT on April 17, 2020. Eligible local and Tribal governments that do not provide required information—and in the case of a local government, the required certification—by 11:59 p.m. EDT on April 17, 2020, may not receive any payment from the Fund.

- Data sources and the distribution methodology for units of local government (more [here](#)).
- Listing of eligible units of local government (more [here](#)).
- Eligible Units: Submission Required for Receipt of Coronavirus Relief Fund Payments (more [here](#)).

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_11

April 12, 2020 at 12:49 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 12, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators

to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.

- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

Added additional document that consolidated the line items.

State and Federal Partners,

The attached RRF has routed from HHS to FEMA for action. The request is for facilities and wraparound services assessment (quarantine) and recovery (isolation) centers.

This call/meeting is intended to bring our Federal and State partners together to talk about potential courses of action for fulfilling this request.

Please review the attached and be prepared with your questions and information on your program/agencies capability, requirements, and time lines to support this request.

Thank you,

Lisa Davidson

Federal Emergency Management Agency (FEMA) Region X is committed to providing access, equal opportunity and reasonable accommodation in its services, programs, activities, education and employment for individuals with disabilities. To request a disability accommodation contact me at least five working days in advance at (425) 487-4628 or Lisa.Davidson@fema.dhs.gov.

Baumgart, Jim (GOV)

preferred sites for isolation centers

To: Biermann, Jason, Kurt Hardin, Gillespie Amy, Kaplan, Alysha

Cc: Wasserman, Adam R (MIL), Zimmerman, Matthew S (DOH), Furze, Michael (COM), doh-ic3@doh.wa.gov, McGill, Jason T (HCA), Davidson, Lisa, Covington, Bob (DES), Roberts, Shawn A (DOH)

Good morning,

As the Unified Area Command and federal agencies move forward on isolation facilities as part of a broader alternate care site model, it is critical that we recognize the work already done at the local government level. Each of counties expressed concern about making sure any effort done at the state and federal level is well coordinated and supports . Please send your preferred isolation sites along with the level of coordination already completed so that the team working on this at the state level can work closely with you about securing facilities. From our perspective these are the site requirements we are looking at:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - o Select rooms with individual ventilation system or a room with a non-recirculating air
 - o If recirculation of air from isolations rooms to other rooms in unavoidable, HEPA filters should be installed in the exhaust ducts.
 - o If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal
- Access and functional needs
- Space considerations for staff
 - o PPE donning/doffing space or area.
 - o Space for light nursing care
 - o Administrative space for medical records processing
 - o Areas or rooms for housing staff staying overnight with bathroom facilities.
 - o Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support areas
- Mental health support areas

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 25, 2020

FEMA Advisory

Federal Partners Continue Providing Resources for COVID-19 Response Efforts

The federal government continues to take aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, more than 9,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington, California, Iowa and Louisiana were approved for major disaster declarations to assist with additional needs identified in these states.

11 states and 4 tribes have issued full stay-at-home orders; in addition, 5 states have issued partial or localized orders.

Medical supplies are en route to states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington, New York and California. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff and is expected to arrive by March 27. The U.S. Navy hospital ship Comfort is scheduled to arrive in New York on April 7. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

Subject: Public info ad campaign options

Good evening, Robert –

My notes about who else to send this info to is at my JIC desk, unfortunately, so I'm just sending to you for now.

Attached are two documents.

The word document is the initial draft of what the campaign might look like. It's draft and was created prior to getting a budget put together so our ultimate campaign may not include all the elements but it gives you a sense of the messaging and targeting.

The excel sheet details four options for the team's consideration. We highly recommend the third or fourth options because they ensure the most impressions and because we anticipate needing to communicate to seniors and the public over the next several weeks. We do not recommend investing heavily in radio because as more people choose to stay home, TV is overcoming radio. Some of these costs could come down if we're able to get networks to donate air time.

- \$100k campaign = two-weeks of digital and multicultural advertising
- \$250k campaign = three weeks of digital, online news and multicultural advertising
- \$500k 8-week campaign = the above plus cable and local news advertising
- \$1M 10-week campaign = the above plus expanded TV advertising and some rural radio

These estimates do not include some of the digital and social media we will do in-house and amplify through an extensive network of partners who have agreed to help amplify messaging through their

own social media, newsletters, etc. Here are the partners who have committed to helping communicate to their members and networks:

State Ombuds
State Council on Aging
Adult Family Home Council
Washington Health Care Association (Assisted Living and NF associations)
Retired Public Employees of WA
Mobile Home Parks Associations
W4A
Alzheimers Association
AARP
ARCORA (delta dental)
Catholic Community Services
Senior Services for South Sound
Columbia Legal Services
Disability Rights WA
Hearing Loss Association
Keiser Permanente
Home Care Associations of WA
Elder Law
Washington Association of Professional Guardians
Washington State Associations of Senior Centers
Washington State Hospice and Palliative Care Organization

Happy to answer questions. I have additional back-up documentation from the marketing firm HCA contracts with that put the numbers together but it's not helpful for purposes of decision-making. If we decide to pursue one of these options, HCA and DOH can compile a detailed outline of the budget + deliverables.

[Ernesto Apreza](#), Office of Mayor Jenny Durkan

[Tara Lee](#), Office of Gov. Jay Inslee

ADVISORY: Inslee to join federal and local leaders at Century Link Events Center, site of new field hospital

Gov. Jay Inslee will join Seattle Mayor Jenny Durkan, King County Executive Dow Constantine, FEMA Region 10 Administrator Mike Oâ€™Hare and Brigadier General Doug Cherry today to discuss deployment of a new field hospital at CenturyLink Field Event Center.

The field hospital will include 300 soldiers from the 627th Army Hospital at Fort Carson, Colorado who have deployed to Seattle to staff the hospital, which is expected to create at least 150 hospital beds for non-COVID-19 cases.

Saturday, March 28

1:30 PM - State, local and federal leaders at site of new field hospital

Location: CenturyLink Field Event Center, 800 Occidental Ave S., Seattle

**Please note: in order to accommodate social distancing, the Seattle Mayor's office has decided that Seattle Times will serve as the print pool and KIRO will serve as the TV pool.*

Other reporters can attend via [WebEx](#). It will also be streamed live on [Seattle Channel](#).

***Mayor Durkan's office is handling logistics for the event, media questions should be directed to: Ernesto.Apreza@seattle.gov.**

FEMA Region 10 Private Sector COVID-19 Update for April 17

April 17, 2020 at 12:50 PM EDT

To: Undisclosed recipients:

FEMA REGION 10 PRIVATE SECTOR COVID-19 UPDATE

APRIL 17, 2020

Good Morning Region 10 Partners

The FEMA National Business Emergency Operations Center (NBEOC) call will be today at 12pm PST. Details below. We provided additional information about the PPE Exchange [Dashboard](#). The [FEMA Coronavirus Response](#) page is updated. I recommend you visit for News Releases, Media Gallery, Rumors, FAQ, How to Help, and Best Practices.

Continue to contact me for questions, comments, or be added to the distribution list. Feel free to distribute.

Updates noted in [blue](#).

PPE Exchange

The [Private Sector PPE Exchange Dashboard](#) is now live.

The PPE Exchange is a simple to use Dashboard to connect private sector sellers with private sector buyers. The users enter their own information and update as needed.

PPE (focus is on these products)

- N95 Masks
- Surgical Masks
- Non-surgical Masks
- Gloves
- Gowns
- Booties

It's Simple to Connect

1. Log-in with your name and company on the [dashboard](#)
2. Follow instructions on completing either the need or sell section.
3. Contact individuals via their provided contact information.
4. When you log out of the Dashboard, your information remains, but no one can connect with you in the Dashboard. Providing your contact information is important.

This dashboard is not for government contracting.

Trends and Analysis

National Business Emergency Operations Center (NBEOC) Snapshot (see attached)

The NBEOC produces a daily Snapshot on business and industry domestic supply chains. You can find these each morning on the [NBEOC Dashboard](#) in the 'Snapshot' pod. I attached today's Snapshot for your review.

Key Highlights

- It is estimated that jobless claims for the **week ending April 11th could pass 5.5 million.**
- The consensus estimate would bring total filings for unemployment to more than **22 million over four weeks** which would push the unemployment rate up to 17%
- Analysts suggest that **unemployment could exceed 32.1% in the second quarter** with Gross Domestic Product expected to drop by 30-50%.
- US economy will have erased all the jobs created since the 2008-2009 recession.
- Employee absenteeism is growing at critical supply chain nodes and grocery retail locations.
- Measures taken by the grocery industry to mitigate virus transmission within the supply chain are contributing to reduced demand velocity and some transportation delays.

Google Mobility Reports

- Google is producing [Public Community Mobility Reports](#). The reports chart movement trends over time across the US and the world, so you can see how movement has changed at retail, parks, workplaces, grocery stores and the like in your state during the pandemic; down in some instances to the county level. Below are links to current reports for Region 10 states (unsure on frequency of change).

Bailey, Danielle

RE: Please review: Stay home campaign drafts

March 22, 2020 at 8:46 PM EDT

To: Smith, Jaime (GOV), Soileau, Kennedy (HCA), Kopriva, James (DSHS/ALTSA), Marchand, Michael (HBE), Crume-Bruce, Shawna, Holman, Sam (GOV)

Cc: Blaske, Laura A (DOH)

Only suggestions for future planning for people with disabilities/older adults:

*Need to define using plain language “shelter in place” and potential impacts to a person’s ability to access goods and services.

Suggested bullets:

- Know who to contact. Call your emergency contacts to develop a plan: self-advocacy group, friends, case manager, family, neighbors, church group to develop a plan to provide ongoing support.
- Call the services you rely on to understand their plan to continue service?
- Know where to get more information or request services.
- Cancel any non-critical appointments. Make a plan for how you will stay safe when you do have to leave the house for important appointments only.
- Contact your healthcare provider to ask about obtaining extra necessary medications to have on hand to stay home for a prolonged period of time.
- Call your pharmacy, can medications be delivered by mail or can a neighbor/family member pick them up?
- Be sure you have over-the-counter medicines and medical supplies to treat fever and other symptoms.
- Do you have a backup if your personal care assistant gets sick?
- Have enough household items and groceries on hand so that you will be prepared to stay at home.
 - Who can go food shopping for you? Can you coordinate meal delivery?
- Do you have enough supplies for personal care (oxygen, adult under garments, dialysis, wound care)?
- Are their family, friends, case managers, who can provide daily check ins?
- Who can you call if feeling sick?

Family and Caregiver Support

- Know what medications your loved one is taking and see if you can help them have extra on hand.
- Monitor food and other medical supplies (oxygen, incontinence, dialysis, wound care) needed and create a back-up plan.
- Stock up on non-perishable food items to have on hand in your home to minimize trips to stores.
- If you care for a loved one living in a care facility, monitor the situation, ask about the health of the other residents frequently and know the protocol if there is an outbreak.

Neighbor Helping Neighbor

- Neighbors helping neighbors is critical during times when federal, state, and local government are

overwhelmed.

- Talk with your neighbors about emergency planning.
- Share with neighbors regarding the help you may need as well as help can offer.
- Consider using the Nextdoor app, social networking platform for local communities and neighborhoods. Nextdoor app users can support each other in a safe way to share online the kinds of things you share with your neighbors in person. Nextdoor is securely encrypted using the HTTPS Internet protocol. Every neighbor must verify their address in the neighborhood and use their real name. This app is one way to communicate with neighbors during emergencies, as well as provide and get help with such items as food, household supplies, water, vitamins, and medications.

Thanks

Interim_Guidance_for_Implementing_Safety_Practices_for_Critical_Infrastructure_Workers_Who_May_Have_Had_Exposure_to_a_Person_with_Suspected_or_Confirmed_COVID-19

April 09, 2020 at 11:11 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the update below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19.

April 9, 2020

CISA Update

Interim Guidance for Critical Infrastructure Workers Who May Have Had Exposure to COVID-19

Partners,

Please find below an important update from the Centers for Disease Control and Prevention (CDC) and the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19. These two important informational products include *Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19* and a quick reference of the Do's and Don'ts for employers and employees related to COVID-19 exposures.

While the [Interim Guidance](#) specifically calls attention to critical infrastructure workers serving in the specific capacities and functions, as below, the guidance can apply to all critical infrastructure workers with the exception of Healthcare Providers who are covered under [separate guidance](#).

- Federal, state, & local law enforcement
- 911 call center employees

- Fusion Center employees
- Hazardous material responders from the government and the private sector
- Janitorial staff and other custodial staff
- Workers – including contracted vendors – in food and agriculture, critical manufacturing, informational technology, transportation, energy and government facilities

Employers should implement the recommendations in the [Interim Guidance](#) for Businesses and Employers, to Plan and Respond to Coronavirus Disease 2019, to help prevent and slow the spread of COVID-19 in the workplace.

Please continue to monitor the CDC website for the most current medical [guidance](#).

FEMA_Offers_Ways_for_Private_Sector_to_Help_Fight_COVID-19

March 27, 2020 at 4:08 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA Offers Ways for Private Sector to Help Fight COVID-19

Under the White House Coronavirus Task Force's direction, FEMA, HHS and our federal partners continue to work closely with state, local, tribal and territorial governments in executing a whole-of-government response to fight the COVID-19 pandemic and protect the public. The outpouring of support from the private sector to provide medical supplies and equipment has been tremendous. To help us match the many offers of assistance to the right place, at the right time, and in the right quantity, we ask for your help in ensuring partners know how to connect.

To **sell medical supplies** or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Updated Notice ID 70FA2020R00000011](#)). This solicitation requires registration with the System for Award Management (SAM) in order to be considered for award, pursuant to applicable regulations and guidelines. Registration information can be found at www.sam.gov. Registration must be "ACTIVE" at the time of award.

If you have **medical supplies or equipment to donate**, please provide us details on what you are offering through our online medical supplies and equipment form at <https://www.fema.gov/covid19offers>.

If you are interested in **doing business with FEMA** and supporting the response to COVID-19 with your company's **non-medical** goods and/or services, please submit your inquiry to the Department of Homeland Security's Procurement Action Innovative

Response (PAIR) team at DHSIndustryLiaison@hq.dhs.gov.

In addition to these avenues to help, **licensed healthcare professionals that want to volunteer** can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.

If you are a hospital or healthcare provider in need of medical supplies, please contact your state, local, tribal or territory department of public health and/or emergency management agency. Any needs that cannot be met by the state or tribe are then sent to the respective FEMA regional office who are coordinating requirements through the FEMA National Response Coordination Center. FEMA is working with the Department of Health and Human Services and other federal agencies to fulfill requests and ship supplies as quickly as possible.

Additional ways to help can be found at www.fema.gov/coronavirus/how-to-help.

RE: [EXT] Re: Tour with Local, State and Federal Officials

March 29, 2020 at 7:01 PM EDT

To: Vila, Simon (GOV), Wilson-Codega, Lily, Katims, Casey (GOV), Wilson, Morgan (GOV)

Cc: Garza, Jeff, Raghavan, Gautam, Powell, Brent C SFC USARMY 76 ORC (USA), Howlett Browne, Sierra, Ike, Ryan, Putney, April, Berkson, Rachel, Morrow, Michael, brent.c.powell@gmail.com, Kraman, James

Thanks all – I just spoke with Sgt. Powell and is he working with medical personnel on site to coordinate this request for a tour.

Two rounds of tours will work for the US Army:

- 10:00 am to 10:30 am
- 10:45 am to 11:15 am

Tomorrow afternoon/Tuesday is when the medical equipment will be moving in, so there is still limited equipment but it is the most appropriate time to keep medical equipment sterile from visitors.

The Army would like to RSVPs by 9 pm, so we™ll let our teams coordinate as appropriate to ensure the proper invites to local, state, and federal officials.

Good afternoon, all, and thanks very much for your assistance.

Congresswoman Jayapal is free all morning, but I know several other members of the WA delegation are eager to participate as well but I know at least Reps. Larsen and Heck have conflicts in the late morning. If you have flexibility and can arrange for one tour in the 9-10:30 am window, I know their teams would appreciate it.

Best,
Gautam

Subject: Tour with Local, State and Federal Officials

Hi Sgt. Powell â€” I appreciate all your support over the last few

days. As we discussed yesterday, there has been some interest from local, state, and federal officials do a tour of the hospital. Per our discussion, it seems like tomorrow morning would be the most appropriate time as the facility will soon become unavailable for anyone but Army personnel, doctors, and patients.

Do you think we could make two tour options available? Potentially from 10:45 -11:30 and 11:30 – 12:15 pm?

On our end with the folks copied here, we can help coordinate our city/county officials, state officials and federal delegation between those two options. Also, keep up posted if you would recommend any limitations such as no media or principals only to allow a minimal footprint and appropriate social distancing.

Happy to chat further if that's easier.

Best,
Stephanie

Johnston, Darcie (HHS/IEA)

update from CDC

March 31, 2020 at 10:13 AM EDT

To: Katims, Casey (GOV), Wilson, Morgan (GOV)

Cc: Graham, John (HHS/IEA), Smart, John (OS/ASPR/EMMO), Lopez, Christopher (HHS/IEA), Balenger, Juanita (ACL), Harper, Jay (fema.dhs.gov)

Hi Casey and Morgan-

Here is an update from CDC that I got yesterday on the status of Washington State's lab order.

Washington

CDC is actively working to make CDC's COVID-19 testing kits available to public health laboratories. All requests for these reagents are being filled by the IRR as quickly as possible. Due to the volume of requests and order processing constraints, labs may anticipate at least 2 business days between CDC's receipt of a new order and shipping to their facility. All reagents are shipped by FedEx Priority for next day delivery, however destinations outside the continental US may experience longer transit times due to airline flight limitations.

Please also note that there are broad, national and global supply chain shortages for many of commercial ancillary reagents required for COVID-19 testing that are impacting the ability of not only the IRR, but all purchasers, international and domestic, to immediately fill orders for these additional items. We certainly understand the frustration states are experiencing and want to be as supportive as possible during these challenging circumstances. Every effort is being made to ensure that requests are filled as soon as CDC receives additional inventory of these items from their commercial manufacturers.

Our CDC Lab Task Force just checked on requests specifically from Washington. Since early February, IRR has filled 32 orders and shipped 161 components. In the last few days, IRR received an additional request for the ER-25 MagNA Pure 96 DNA and Viral NA Small Volume Kit. IRR is working diligently process and ship out all orders as soon as possible

Notification of a Major Disaster Declaration for the State of Washington (FEMA-4539-DR-WA)

April 23, 2020 at 8:45 PM EDT

To: Morgan.Wilson@gov.wa.gov, casey.katims@gov.wa.gov

Cc: Ike, Ryan, Ward, Erin, FEMA-IGA

STATE OF WASHINGTON**FEDERAL DISASTER DECLARATION FACT SHEET****APRIL 23, 2020**

Today, April 23, 2020, President Donald J. Trump granted a Major Disaster Declaration for the State of Washington triggering the release of Federal funds to help communities recover from Severe Storms, Flooding, Landslides, and Mudslides that occurred January 20 to February 10, 2020. Details of the disaster declaration and assistance programs are as follows:

Declaration Number:	FEMA-4539-DR
Incident: and Mudslides	Severe Storms, Flooding, Landslides,
Incident Period:	January 20 to February 10, 2020
Federal Coordinating Officer:	Timothy B. Manner National FCO Program
Individual Assistance (IA): households):	(Assistance to individuals and
IA-Designated Areas:	Under Review.
Public Assistance (PA):	(Assistance for emergency work and the repair or replacement of disaster-damaged facilities):
PA-Designated Areas:	Columbia, Garfield, Grays Harbor, Island, King, Lewis, Mason, Pacific, San Juan, Skagit, Snohomish, Thurston, Wahkiakum, Walla Walla, and Whatcom Counties.
Hazard Mitigation (HM):	(Assistance for actions taken to prevent or reduce long term risk to life and property from natural hazards):
HM-Designated Areas:	All areas in the State of Washington are eligible for assistance under the Hazard Mitigation Grant Program.

OTHER:

Additional designations may be made at a later date if requested by the State and warranted by the results of further assessments.

For your reference, I have attached fact sheets on the Public Assistance and Hazard Mitigation Grant programs.

If you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

FEMA Advisory: Proposed Mitigation Grant Program Policy for Public Comment (BRIC)

April 15, 2020 at 11:43 AM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 15, 2020

Proposed Mitigation Grant Program Policy for Public Comment

On Friday, April 10, FEMA published a proposed policy for the new Building Resilient Infrastructure and Communities (BRIC) grant program in the Federal Register for public comment. Stakeholders may view the proposed policy and provide new comments until May 11, 2020, at [regulations.gov](https://www.regulations.gov). In the “search function,” type identification number FEMA-2019-0018 at [regulations.gov](https://www.regulations.gov) or view the proposed policy at this link. Although FEMA recognizes there may be operational constraints for some to publicly comment during these challenging times, FEMA is proceeding with publishing the proposed BRIC policy for notice and public comment in order to keep program implementation moving forward.

In developing the proposed policy, FEMA spent months in 2019 reaching out to stakeholders for input and has given serious consideration to the comments it received during the comprehensive engagement process. The proposed policy is broad and intended to establish the framework and requirements for BRIC.

Each year FEMA will post a Notice of Funding Opportunity (NOFO) on [grants.gov](https://www.grants.gov) providing detailed program information and other grant application and administration requirements. Following the review and adjudication of comments received on the proposed policy, FEMA anticipates finalizing the proposed policy and releasing a NOFO by the fall of 2020. This timing is subject to change. To learn more visit www.fema.gov/bric.

Good morning,

Building on the initial planning done March 6-9 on addressing shelter requirements for those unable to self-isolate or quarantine at home, we are conveying a meeting today to fully develop the plan and resourcing strategy. I expect there will be need for meetings throughout the weekend with the goal of a decision briefing complete by late Monday.

Key topic areas:

- Expected number of bed spaces needed
- Suitability requirements (social distancing, airflow, etc)
- Acceptable locations
- Build, lease, purchase or contract considerations
- Staffing considerations
- Cost considerations (site, manning, etc)
- Funding (federal, state, local)

I do not have the contact info for FEMA or local EM representation – Can EMD request their participation?

Can Commerce request participation from county CHG grantees?

PIO - HECC

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

COVID-19 Potentially overlooked public health concern

March 19, 2020 at 4:52 AM EDT

Executive Dammeier, Director Chen, Manager Pauli, and Mayor Woodard,

I would like to start this email by commending every level of government covered in this email. In this unprecedented in nature and magnitude I commend ALL of you on your work thus far! I'm writing this evening in the wake of watching a news clip covering several out of region municipalities relaxing arrest standards for "simple crimes". The arrest standards relaxation being the least of my concerns, but it did start my mind down a focused train of thought that left me wondering IF my inevitable concern is on the radar of your various jurisdictions. My concern is the infection threat to the effected, my neighbors, my employees, and my customers.

I own a business on and reside near the intersections of the 6th, 9th, and 10th congressional districts OR the intersection of the 25th, 27th, & 29th legislative districts, county council districts 2,4,5,&6, Tacoma City council positions 4,5,6,7,&8. The intersection of East 72nd Street and East McKinley Ave is locally known and regarded as a "hot spot" for persons experiencing homelessness, transients, railroad trespassers, mentally ill, and/or intoxicated persons. While all jurisdictions have thus far done a remarkable job I'm writing tonight knowing and appreciating that western Washington has not experienced potential social breakdown in quite some time and from past experience living through both tropical depressions, and Hurricanes in the south east while serving as an Active Duty enlisted Air traffic controller I've experienced social breakdown and unrest and at this point in our COVID-19 struggle its at the front of my mind.

For nearly 10 years under arguably "normal" circumstances I've watched petty crime occur at our local Chevron gas station, Safeway, Goodwill, Dollar General, and even my own business. Admittedly some of these folks are legitimately experiencing homelessness by no fault of their own and some of the crimes I've observed are purely for survival. When they happen to other residents or businesses I feel great empathy for the victim, and the several times they've happened to me I've experienced a fair amount of frustration to say the least, but I digress.

We can likely argue 1,000 different reasons why people in our community are experiencing homelessness, but I think we can all agree there is an elevated percentage of that population prone to crime, mentally ill, or intoxicated on one or more substances, and even sometimes all 3. I'm writing tonight in the wake of watching a news clip about relaxed arrest standards to protect the incarcerated population (which I actually don't disagree with) and on Tuesday night breaking up a group of what appeared to likely be intoxicated cyclists without a home, and an uncontrollable desire to deface my business's signage and flowerbeds.

My overlying concern is as we face the grim reality of our COVID-19 situation more stringent measures will need to be taken and the very folks I just mentioned will still be wandering the streets. Not all of them, but certainly more than one of them shoplifting from the Chevron Station, or the Safeway which are now the primary sources for food and fuel for about a 1.5 mile radius around my home. I wonder what level of consideration has been given to these folks potentially unknowingly being infected with COVID-19 and wandering into a grocery store to get their meal while unknowingly infected and touching, or coughing on produce and merchandise? Is it in the interest of public safety to assume mentally ill, intoxicated, or persons experiencing both have the wherewithal to understand the gravity of this pandemic and the safety threat they pose to their fellow citizens?

Just 2 miles south of me there is a vacant elementary school. A vacant schools have classrooms that could become bunk rooms with the appropriate 6' separation, an abundance of bathrooms, a cafeteria to feed them, and a gym and playground for common area recreation. It seems to me that facilities like this could be a quick, inexpensive, and safe shelter in place location with the assistance of FEMA, Military, and/or National Guard resources for people experiencing homelessness, and it affords law enforcement the ability to put someone without a home in a secure location without arresting them all the while preserving the effected person's health, public health, and allowing these folks to participate in our communal effort to social distance and stem the tide of new COVID-19 infections so we can all resume our lives as they were just a few weeks ago.

I implore Pierce county, and the city of Tacoma to utilize every local, state, and federal resource available to ensure our efforts to stem the tide of this pandemic are in fact fruitful in preserving lives, and protecting our local economy. Its quite possible that simply one unknowingly infected person could wander through a grocery store and easily spread the virus to 20-30 new people and further delay our return to life as it was and potentially cost an innocent bystander their life, or unknowingly allow them to carry the virus back home to a susceptible family member and cost them their life.

If these contingencies have already been considered I would very much appreciate a detailed plan from the county, and city. If they haven't been considered I look forward to hearing how you plan to combat these threats moving forward.

Thank you,

Brett Johnson

Good morning,

I am reaching out to schedule a call this afternoon between Governor Jay Inslee and FEMA Administrator Peter Gaynor. The administrator would like to schedule about 30 minutes to discuss COVID-19 with Governor Inslee. Does he have sometime to discuss between 2:30-4:00 pm PDT?

I am hoping you can help me schedule this call, let me know if a phone call would be better or how you prefer to coordinate.

Thank you so much for your help!

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following

the event, the video will be available for download via the [King County TV streaming page](#).
Media questions: [Chase Gallagher](#), King County, 206.263.8537

Sanchez, Alejandro (GOV)

RE: Marcos Orellana Pineda

To: Nitsch, Melissa A

Thank you for your quick response, and nice to meet you. To clarify, is it your preference that I include you on all correspondence to Immigration and Customs Enforcement officials? Or are there specific divisions that fall outside of your portfolio?

Also, I do see now that we are missing the signature on the privacy waiver, so I appreciate any information that is available in lieu of the completed document.

Best regards,
Alejandro

Subject: RE: Marcos Orellana Pineda

Good morning Alejandro,

I'm writing to acknowledge receipt of your request, and also introduce myself as your point of contact for any ICE-related inquiries in Washington State.

With regards to your request for updates, we are not generally permitted to release any information on someone without a signed privacy waiver (signed by the person about whom you are requesting information). However, given the current situation, we are asking our attorneys to review and determine what is legally releasable without a signature. I'll be in touch either way. In the meantime, please don't hesitate to reach out should you have further questions on this or any other matter.

Thank you,

Melissa Nitsch

Muirhead, Brian E <Brian.E.Muirhead@ice.dhs.gov>
Subject: Marcos Orellana Pineda

Hello, Officers Berg, Williams, and Muirhead:

I am writing you today on behalf of Marcos Orellana Pineda. As I understand it, he is currently detained at the Northwest ICE Processing Center, having travelled to the United States as a human trafficking and domestic survivor. Furthermore, Mr. Pineda has pending applications for Special Immigrant Juvenile Status and asylum, no arrests or criminal record, and a guardian, Ms. Kathleen Goforth, ready to take him into her care. Lastly, I have read the many letters, submitted on his behalf, from legislators and others and see that he has broad support from his community.

For these reasons, I respectfully request that you give full and fair consideration to his case. I also ask that, in accordance with the privacy waiver attached to this email, you provide me with updates as appropriate.

Best regards,
Alejandro

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_21

April 21, 2020 at 1:28 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 21, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million

surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

RE: Marcos Orellana Pineda

April 10, 2020 at 1:01 PM EDT

To: Sanchez, Alejandro (GOV)

You can actually send all inquiries directly to me, as my role is to essentially handle all (non-media) stakeholder inquiries. If there's something that requires certain subject matter expertise, I will coordinate directly with those officials to get you information. I cover the entire ICE portfolio, and am in close contact with the managers of all our various operational components.

Thank you,
Melissa

COVID-19 Potentially overlooked public health concern

March 19, 2020 at 4:52 AM EDT

To: elizabeth.pauli@cityoftacoma.org, achen@tpchd.org, Pcoexecutive@piercecountywa.gov, victoria.woodards@cityoftacoma.org

Cc: shana.chandler@mail.house.gov, "steve.kirby@leg.wa.gov, steve.kirby@leg.wa.gov, rachel.kelly@mail.house.gov, Melanie.Stambaugh@leg.wa.gov, Marty.Campbell@piercecountywa.gov, newsdesk@fema.dhs.gov, steve.oban@piercecountywa.gov, taddwille@cityoftacoma.org, "John.Graham@hhs.gov, John.Graham@hhs.gov, connie.ladenburg@piercecountywa, lrohrer@co.pier, steve.conway@leg.wa.gov, melanie.morgan@leg.wa.gov, brendan.woodbury@mail.house.gov

Executive Dammeier, Director Chen, Manager Pauli, and Mayor Woodard,

I would like to start this email by commending every level of government covered in this email. In this unprecedented in nature and magnitude I commend ALL of you on your work thus far! I'm writing this evening in the wake of watching a news clip covering several out of region municipalities relaxing arrest standards for "simple crimes". The arrest standards relaxation being the least of my concerns, but it did start my mind down a focused train of thought that left me wondering IF my inevitable concern is on the radar of your various jurisdictions. My concern is the infection threat to the effected, my neighbors, my employees, and my customers.

I own a business on and reside near the intersections of the 6th, 9th, and 10th congressional districts OR the intersection of the 25th, 27th, & 29th legislative districts, county council districts 2,4,5,&6, Tacoma City council positions 4,5,6,7,&8. The intersection of East 72nd Street and East McKinley Ave is locally known and regarded as a "hot spot" for persons experiencing homelessness, transients, railroad trespassers, mentally ill, and/or intoxicated persons. While all jurisdictions have thus far done a remarkable job I'm writing tonight knowing and appreciating that western Washington has not experienced potential social breakdown in quite some time and from past experience living through both tropical depressions, and Hurricanes in the south east while serving as an Active Duty enlisted Air traffic controller I've experienced social breakdown and unrest and at this point in our COVID-19 struggle its at the front of my mind.

For nearly 10 years under arguably "normal" circumstances I've watched petty crime occur at our local Chevron gas station, Safeway, Goodwill, Dollar General, and even my own business. Admittedly some of these folks are legitimately experiencing homelessness by no fault of their own and some of the crimes I've observed are purely for survival. When they happen to other residents or businesses I feel great empathy for the victim, and the several times they've happened to me I've experienced a fair amount of frustration to say the least, but I digress.

We can likely argue 1,000 different reasons why people in our community are experiencing homelessness, but I think we can all agree there is an elevated percentage of that population prone to crime, mentally ill, or intoxicated on one or more substances, and even sometimes all 3. I'm writing tonight in the wake of watching a news clip about relaxed arrest standards to protect the incarcerated population (which I actually don't disagree with) and on Tuesday night breaking up a group of what appeared to likely be intoxicated cyclists without a home, and an uncontrollable desire to deface my business's signage and flowerbeds.

My overlying concern is as we face the grim reality of our COVID-19 situation more stringent measures will need to be taken and the very folks I just mentioned will still be wandering the streets. Not all of them, but certainly more than one of them shoplifting from the Chevron Station, or the Safeway which are now the primary sources for food and fuel for about a 1.5 mile radius around my home. I wonder what level of consideration has been given to these folks potentially unknowingly being infected with COVID-19 and wandering into a grocery store to get their meal while unknowingly infected and touching, or coughing on produce and merchandise? Is it in the interest of public safety to assume mentally ill, intoxicated, or persons experiencing both have the wherewithal to understand the gravity of this pandemic and the safety threat they pose to their fellow citizens?

Just 2 miles south of me there is a vacant elementary school. A vacant schools have classrooms that could become bunk rooms with the appropriate 6' separation, an abundance of bathrooms, a cafeteria to feed them, and a gym and playground for common area recreation. It seems to me that facilities like this could be a quick, inexpensive, and safe shelter in place location with the assistance of FEMA, Military, and/or National Guard resources for people experiencing homelessness, and it affords law enforcement the ability to put someone without a home in a secure location without arresting them all the while preserving the effected person's health, public health, and allowing these folks to participate in our communal effort to social distance and stem the tide of new COVID-19 infections so we can all resume our lives as they were just a few weeks ago.

I implore Pierce county, and the city of Tacoma to utilize every local, state, and federal resource available to ensure our efforts to stem the tide of this pandemic are in fact fruitful in preserving lives, and protecting our local economy. Its quite possible that simply one unknowingly infected person could wander through a grocery store and easily spread the virus to 20-30 new people and further delay our return to life as it was and potentially cost an innocent bystander their life, or unknowingly allow them to carry the virus back home to a susceptible family member and cost them their life.

If these contingencies have already been considered I would very much appreciate a detailed plan from the county, and city. If they haven't been considered I look forward to hearing how you plan to combat these threats moving forward.

Thank you,

Brett Johnson

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_11

April 12, 2020 at 12:49 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 12, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators

to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.

- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

Hi,

Good morning,

I am reaching out to schedule a call this afternoon between Governor Jay Inslee and FEMA Administrator Peter Gaynor. The administrator would like to schedule about 30 minutes to discuss COVID-19 with Governor Inslee. Does he have sometime to discuss between 2:30-4:00 pm PDT?

I am hoping you can help me schedule this call, let me know if a phone call would be better or how you prefer to coordinate.

Thank you so much for your help!

April 17, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to

- local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
- Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.
 - Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state's entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

Hello John and Brian,

Governor Inslee would like to speak with Administrator Gaynor today following up on yesterday's commitment of field hospitals for Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.968.9255 with any questions.

Thank you,

Morgan

FEMA Stakeholder Advisory: Federal Partners Continue Providing Resources for COVID-19 Response Efforts

March 25, 2020 at 12:42 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 25, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

Federal Partners Continue Providing Resources for COVID-19 Response Efforts

The federal government continues to take aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, more than 9,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing

to request individual emergency declarations. In addition, the states of New York, Washington, California, Iowa and Louisiana were approved for major disaster declarations to assist with additional needs identified in these states.

11 states and 4 tribes have issued full stay-at-home orders; in addition, 5 states have issued partial or localized orders.

Medical supplies are en route to states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington, New York and California. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff and is expected to arrive by March 27. The U.S. Navy hospital ship Comfort is scheduled to arrive in New York on April 7. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Advisory

President Donald J. Trump Directs FEMA Support Under Emergency Declaration for COVID-19

The federal government continues to take aggressive and proactive steps to address the COVID-19 threat as the health and safety of the American people remain a top priority.

Today, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the “Stafford Act”). This increases federal support to the Department of Health and Human Services (HHS) in its role as the lead federal agency for the ongoing COVID-19 pandemic response. As a result of the President’s decisive, unprecedented action, FEMA is directed to assist state, local, tribal, territorial governments and other eligible entities with the health and safety actions they take on behalf of the American public. Today’s declaration does not make direct financial assistance available to individuals.

The emergency declaration does not change measures authorized under other federal statutes and HHS remains the lead federal agency directing the federal response to COVID-19. FEMA actions will be in support of HHS and in coordination with state, tribal and territorial governments. Eligible emergency protective measures taken at the direction or guidance of public health officials in response to this emergency, and not supported by the authorities of another federal agency, will be reimbursed strictly under the FEMA Public Assistance program. FEMA assistance will be provided at a 75 percent Federal cost share. Reimbursable activities typically include emergency protective measures such as the activation of State Emergency Operations Centers, National Guard costs, law enforcement and other measures necessary to protect public health and safety.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

Good morning,

Building on the initial planning done March 6-9 on addressing shelter requirements for those unable to self-isolate or quarantine at home, we are conveying a meeting today to fully develop the plan and resourcing strategy. I expect there will be need for meetings throughout the weekend with the goal of a decision briefing complete by late Monday.

Key topic areas:

- Expected number of bed spaces needed
- Suitability requirements (social distancing, airflow, etc)
- Acceptable locations
- Build, lease, purchase or contract considerations
- Staffing considerations
- Cost considerations (site, manning, etc)
- Funding (federal, state, local)

I do not have the contact info for FEMA or local EM representation – Can EMD request their participation?

Can Commerce request participation from county CHG grantees?

Fordice, Justin

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 18, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing

resources to reopen safely and responsibly.

- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

April 15, 2020 at 2:19 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 15, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [FEMA Project Airbridge](#).
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - The seven new ventilator contracts announced by HHS this month will supply 6,190

ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.

- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.

FEMA_Supply_Chain_Task_Force_Leads_Four-Pronged_Approach_to_Securing_Needed_Supplies_and_Equipment_in_COVID-19_Fight

March 31, 2020 at 10:39 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the fact sheet below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Supply Chain Task Force for COVID-19 response.

March 31, 2020

FEMA Fact Sheet

FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Service created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

The task force's primary effort is the sourcing of personal protective equipment (PPE), ventilators and other critical resources requested by states, tribes and territories. By using the structure of FEMA's NRCC, the task force is finding and executing solutions to meet urgent demand and enable the U.S. Government to surge support to COVID-19 "hot spots" as they arise.

The Supply Chain Stabilization Task Force is executing a whole-of-America approach to address limited supply of critical protective and life-saving equipment. Through a four-prong approach of *Preservation, Acceleration, Expansion and Allocation*, FEMA is bringing the full capacity of the Federal government to bear to find solutions to protect the American people and defeat COVID-19.

Locating Available Critical Resources

The task force's primary effort is the sourcing of personal protective equipment, ventilators and other critical resources to respond to requests by states, tribes and territories. Through the National Response Coordination Center, the task force is working to find critical resources to meet urgent demand and enable the U.S. Government to surge support to "hot spots" as they arise. In addition, the task force is engaging manufacturers, distributors and healthcare networks to build the next phase of supply chain stabilization.

Increasing Availability of Critical Resources

The task force is developing a strategy to increase availability of critical resources through four primary efforts:

Preservation

Preservation to limit unnecessary use of PPE and other supplies. Developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs are critical components of this strategy.

- The task force is in the process of developing and verifying techniques to clean and recycle products.
- This line of effort also includes developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs, critical components of this strategy.
- The task force is also working to expand equipment resources through the Preservation line of effort. The FDA issued an Emergency Use Authorization (EUA) for ventilators on March 24, which allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The new guidance will also assist health care personnel on how to use other ventilators, like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

Acceleration

Acceleration of industrial manufacturing is required to help meet the urgent demand placed on the market. Manufacturers are ramping up production of critical resources and have extended operating hours to increase production well above pre-COVID-19 levels.

- To expedite purchasing, FEMA issued a request for quotation for vendors who have needed medical equipment and supplies to sell to the agency.
- FEMA is also expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- As an example of this effort, FEMA coordinated an air bridge for flights from Asia

beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- The second flight landed in Chicago this morning. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical PPE (gloves, gowns, goggles, and masks) in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Additionally, in some cases, the federal government may purchase some of the supplies to be used to replenish the Strategic National Stockpile (SNS) or to provide to states with any identified and unmet needs.
- To address the anticipated ventilator shortage across the nation, the task force has implemented a similar strategy, leveraging the strengths of the commercial industry. Including numerous vendors, such as General Electric, Phillips, Medtronic, Hamilton, Zoll, ResMed, Hillrom and Vyair, to produce 20,000 ventilators over the next two months with the potential to add 100,000 by end of June. This represents a significant increase in velocity as the normal annual market is 30,000 per year.

Expansion

Expansion of the industry is also taking place. Manufacturers are enhancing production capacity with additional machinery, and in some cases re-tooling assembly lines to produce new products needed.

- As an example of this work, the Food and Drug Administration (FDA) is providing information for manufacturers on adding production lines or alternative sites, like automobile manufacturers, for making more ventilators during the COVID-19 public health emergency.
- In addition, the task force is working through over 350 leads to match American businesses who have excess raw materials, workforce or factory production capacity combined with an overwhelming desire to provide their support to the national response effort.
 - Task force members are actively working to facilitate the creation of private sector partnerships to pair companies that have volunteered excess factory production capacity, the talents of their workforce and access to their raw material supply chains with critical supply manufacturers who have the expertise in producing PPE, ventilator and other needed equipment.
 - The creation of these partnerships to align capacity with know-how will

unleash the potential engine of our national private sector and help overcome the supply shortfalls.

Allocation

Allocation of critical resources based on data-informed decisions. These decisions will be coordinated between the U.S. Government and the private sector.

- FEMA is focusing its allocation of critical resources to highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls, with consideration to the at-risk population distribution across the Nation.
- To more effectively adjudicate resources throughout the nation and private industry, a National Resource Prioritization Cell was established to unify government and private industry prioritization recommendations which will inform federal, state and private sector operations.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 26, 2020

FEMA Advisory

COVID-19 Federal Response Efforts Continue

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

Sixteen states and 4 tribes have issued full stay-at-home orders; in addition to eight states that have issued partial or localized orders, and one state that has issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to

support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Iowa, Louisiana, New York, North Carolina, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves. Many supplies have already arrived and additional supplies are en route to these designated areas. The U.S. Navy hospital ship Mercy is en route and expected to be operational by April 1 to support Los Angeles with additional hospital beds and medical staff. The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

FEMA Advisory

FEMA and Our Partners Remain Actively Engaged to Support State-Managed Coronavirus Response

“I can tell you this weekend, we will be reporting on aggressive efforts that our supply stabilization task force at FEMA is taking to import medical supplies from around the world.” – Vice President Mike Pence

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- Apple and CDC, together with the White House and FEMA, launched a [new website](#) and app with a COVID-19 screening tool and resources to help people protect their health.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is

shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. We are sending more every day, and we are working nonstop to acquire or produce even more.

Today, the US-NS *Comfort* will be underway today from Norfolk, VA to New York, NY.

- The *Comfort* will arrive at Pier 90 in Manhattan on Monday – only approximately a mile away from the Javits Convention Center where the U.S. Army Corps of Engineers are actively constructing a 2,910-bed alternate care facility.
- The *Comfort* is equipped with 12 operating rooms, 1,000 hospital beds, a medical laboratory, a pharmacy, an optometry lab, digital radiology services, a CAT-scan, two oxygen producing plants, a helicopter deck and a crew of nearly 1,200 U.S. military personnel.
- The crew onboard the *Comfort* will provide critically needed medical surge capacity for New York Metropolitan area. Their mission will be to care for New Yorkers who do not have COVID-19, but who require urgent medical care.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.

- This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
- Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act to avoid governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Michigan, Missouri, South Carolina, Texas, Washington, the commonwealth of Puerto Rico, and the territory of Guam were approved for major disaster declarations to assist with additional needs identified in these states. Seventeen states and four tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 27, 2020

April 27, 2020 at 11:01 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today is attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 27, 2020

SUMMARY

- Focus remains on economic challenges in Washington, with much debate over when the state should ease restrictions.
- Oregon's governor apologizes for challenges with the state's unemployment system and announces plan to increase staff from 106 to 520, with a goal of 800.
- Alaska began its first phase of reopening on Friday, April 24. Some regions are implementing their own reopening plans, creating confusion.
- Testing is now available to anyone who wants it in Idaho Falls in a partnership with Mountain View Hospital.

Public Sentiment

- Economic concerns are top of mind throughout the region, with people sharing stories of personal hardship, and challenges accessing unemployment or small business aid.
- In Oregon and Washington, residents remain frustrated at the slow resolution of issues with the unemployment system.
- In Washington, the public is not prepared to maintain strict distancing measures throughout the summer while calls continue for various sectors of the economy to reopen.
- With Alaska beginning to reopen, most are eager to get back to normal. Some residents are concerned about the lack of social distancing already occurring at newly opened businesses.
- In Idaho, protest headlines continue with individuals calling for broad re-opening and saying all businesses are essential.

Washington

Reopening

- With construction projects restarting, thousands soon will return to work. ([KOMO](#))
- More than 7,000 people have signed a petition to return Washington's hairdressers to work. ([KIRO7](#))
- A popular local media piece highlights Governor Inslee's challenges in navigating Washington through the pandemic, as well as his role 'at the forefront in the political struggle with the White House' over response policies. ([Seattle Times](#)) Reactions fall along political lines. ([Facebook](#))

- The Yakima Herald-Republic Editorial Board: The governor is correct in pursuing a data-driven approach, but he needs to be more transparent about the target metrics that must be met before reopening. ([The Daily Chronicle](#))

Health Equity

- The Washington Department of Health's Medium blog, "We are all in this together," was widely shared over the weekend. The blog looks at disparate effects of the pandemic on communities of color and discusses ways to combat health inequity. ([WA DOH on Medium](#))
 - Many people commented that we are not in fact 'all in this together' when the wealthy, those who work for the government, and those with jobs in general are not impacted as much as others. ([Facebook](#))

Social Distancing

- A Columbia virologist advised people, 'Don't make any plans' for summer travel. This advice coincides with [Dr. Birx's comments](#) over the weekend about social distancing likely lasting through the summer. ([MyNorthwest](#))
 - Much of the reaction to these comments from medical officials is negative, with many people saying they are not willing to cancel summer activities. Several people are referencing [comments from two California ER doctors](#) that social distancing may weaken people's immune systems. ([example 1](#), [example 2](#), [example 3](#))
- New study shows Tri-Cities residents are doing 'above average' at staying home but have room to improve. ([Tri-City Herald](#))
 - Many people are concerned about the privacy violations involved with this study and others that use cell phone data. ([Facebook](#))

Protests

- 'Let us fish:' Washingtonians protest statewide fishing ban at Seattle rally. ([KOMO](#), [KING5](#), [The Columbian](#))
- Dozens gather to play softball on Sunday amid stay home order. ([YakTriNews](#)) Reactions are split, with some chastising the ballplayers and some supporting them. ([Facebook](#))
- Despite the stay at home order many public venues across the Tri-Cities are still full with people in them. Examples cited are mostly outdoors: hiking trails, dog parks, an athletic complex. ([KNDU25](#))

Food Security

- Coronavirus outbreak at a Washington beef plant could have impact on grocery shelves. The plant closed last week to test it's 1,400 employees after around 100 tested positive. ([KREM2](#))
- Another four people test positive for coronavirus at Kelso meat processing plant. ([KIRO7](#))
 - Many people are calling news reports about the meat industry 'fear mongering,' while others are genuinely concerned over the food supply. ([Facebook](#))

Humanity

- The Seattle Times launched a "Lives Remembered" project, sharing about the lives of each person in Washington who died of COVID-19. ([Seattle Times](#))
 - People [share sorrow and sympathy](#) in reaction to the project. On the [Governor's post](#) highlighting the project, sympathy was mingled with many calls for an end to the economic restrictions.

Mental Health & Community Impact

- Suicides have surged in Benton County in the seven weeks since coronavirus outbreak. ([Tri-City Herald](#))
- Illegal dumping is on the rise in Washington while some dumps are closed due to pandemic. ([KING5](#))

Economy

- Bellingham small-business owners struggle to find financing. They say seeking financial help has been a frustrating experience as rules continue to change, aid programs are overwhelmed quickly, and the paperwork piles up. ([The Bellingham Herald](#))
- Puyallup's Step By Step and Farm 12—a nonprofit and a restaurant for low-income and underprivileged women—had a round of layoffs after their application for the Payroll Protection Program was not accepted. ([The News Tribune](#))
 - People are sad at the news, and encourage the nonprofit and restaurants to keep fighting to

survive the temporary challenges. ([Facebook](#))

- Seattle Opera receives \$2.4 million Paycheck Protection Program loan enabling them to rehire 180 people. ([King5](#), [KOMO](#))
- Residents continue to express frustration with the state's overwhelmed unemployment system. ([KIRO7](#))

New Cases

- COVID-19 cases continue to rise in the Tri-Cities area, with 841 cases. (YakTriNews)
- Statewide coronavirus death toll climbs to at least 750. ([KOMO](#))
- Everett-based USS Kidd reports more coronavirus cases in outbreak at sea, and is returning to port. Navy officials said at least 33 members of the crew of the ship have now tested positive. ([KATU2](#), [KING5](#))

Tribes

- Yakima Tribal member and leader of a tribal fishing village, dies from coronavirus. ([Oregon Live](#))

Oregon

Economy

- Gov. Kate Brown apologizes as Oregon's unemployment site was down on Sunday. She said the office is increasing its staff from 106 to 520 staffers, with a goal of 800. ([Governor's Facebook](#), [KATU2](#))
 - Reactions are negative, with people frustrated at the delay in addressing the issues, and several mentions of previous state investments aimed at improving the unemployment system. ([example 1](#), [example 2](#))
- Oregon Employment Dept. will soon launch Pandemic Unemployment Assistance program for self-employed and gig workers. ([KATU2](#))
- Employment department callers wait on hold for two hours on average. ([The Oregonian](#))
Reaction is negative, with people calling for better management of the state system. ([Facebook](#))
- OHSU will cut salaries due to forecasted revenue loss from COVID-19. ([FOX12](#))

Reopening

- Eastern Oregon's Baker County submits coronavirus reopening plan to the governor. ([KGW8](#))
- Oregon City commissioners tell the governor they will not defy the stay-home order. This came after the mayor suggested the city may reopen, defying the governor's order. ([The Oregonian](#))

Flattening the Curve

- Coronavirus has tested Gov. Kate Brown's leadership. So far, Oregonians approve. ([The Oregonian](#)) People were mostly in support of the Governor's leadership and stay at home order. ([Facebook](#))
- No new cases of Coronavirus in any of the five Southern Oregon counties. ([KDRV](#))

Social Distancing

- Roseburg Veterans Affairs director leads coronavirus dance party without social distancing, face masks. ([The Oregonian](#)) Most reactions are negative toward the VA, while some say people need to lighten up. ([Facebook](#))

New Cases

- Grants Pass Dutch Bros employee tests positive for coronavirus. ([KDRV](#))
- Portland area Safeway employee tests positive for coronavirus. ([The Oregonian](#))

Oregon Tribes

- Wildhorse Resort and Casino, a large employer in the Columbia basin, is creating a plan to safely reopen when the time comes. ([My Columbia Basin](#))

Idaho

Testing

- New COVID-19 antibody test available to everyone in eastern Idaho beginning Monday. Crush The Curve Idaho is partnering with Mountain View Hospital in Idaho Falls to offer a COVID-19 antibody serology test to anyone who would like it. ([East Idaho News](#))

PPE

- University of Idaho team works on shining light to fight the virus. UVC cabinets sterilize critical personal protective equipment for health care workers. ([The Lewiston Tribune](#))

- A popular Twin Falls store makes face masks. ([KMVT](#))

Recoveries & Case Count

- Reports show new Idaho coronavirus cases continue to fall with no new deaths (April 26). The number of Idahoans who have been tested for COVID-19 is approaching 20,000. ([Idaho Statesman](#))
- Idaho COVID-19 recoveries near 1,000. ([Local News 8](#))

School

- Idaho coronavirus school closures mean more teens now work essential agriculture jobs. ([Magic Valley Times-News](#))

Protests

- Idaho County sheriff says he won't enforce stay-home order and sees no 'emergency crisis' from COVID-19. ([Lewiston Tribune](#))
- At a rally, Idaho lieutenant governor says stay-home orders should be 'guidelines,' not mandatory. ([Idaho Statesman](#))
- Opinion: Let's be honest about anti-government protests in Idaho. ([Idaho Statesman](#))
- Anti-government activist, Ammon Bundy, and protesters target the home of the Idaho officer who made playground arrest. ([Idaho State Journal](#))

Alaska

Updates from the Governor

- The Governor was on The Ben Shapiro Show this weekend discussing Alaska's plan to reopen. He said that face coverings and masks are not mandatory. He stated it wasn't necessary to force businesses to comply with guidelines because most are complying. ([Ben Shapiro's Facebook Page](#))
 - Most comments were positive about the phased reopening plan. Several people mentioned how busy and crowded home improvement stores were in Anchorage this weekend, noting that social distancing guidelines were not being followed.

Reopening

- Alaska is reopening for business far ahead of widespread COVID-19 testing. ([Alaska Daily News](#))

Cases

- State reports no new cases of COVID-19 Saturday. ([KTTU](#), [Daily News Miner](#)) Some stated the reason for this was the social distancing, which is being relaxed under phase 1 of reopening. Other commented on the lack of testing in the state. ([Facebook](#))
- A resident at a long-term care facility in Sitka tested positive for COVID-19. This is Sitka's first case. ([Alaska Daily News](#))
- Inmate at Goose Creek Correctional tests positive for coronavirus. ([Alaska Public Media](#))

Domestic Violence

- Reports of domestic violence are increasing in Nome as people are asked to stay put. ([KNOM](#))

Economy

- RavnAir warns it will collapse without more federal coronavirus loans. ([KTUU](#))
- State faces massive budget shortfall from coronavirus-impacted oil price crash. ([KTUU](#))

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 23, 2020

April 23, 2020 at 10:43 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 23, 2020

SUMMARY

- Washington's governor stands firm on the "Stay Home, Stay Healthy" order in the face of mounting resistance from politicians and leaders across the state.
- Amid significant economic impacts in the oil, tourism, and retail sectors, Alaska will start to reopen most businesses on Friday, April 24th.
- The governor of Idaho will announce a phased approach to re-opening businesses today.
- While calls to report domestic abuse are down in Idaho, cases are up due to people staying at home.

Public Sentiment

- In Washington, most people affirm that state law cannot be usurped by local jurisdictions, but people are increasingly worried that the economy cannot withstand continued closures.
- Against voices of protest, many more Idahoans voice their support for the governor's actions to slow the spread of coronavirus.
- Most Alaskans are hopeful about the reopening of the economy, however, some question if small businesses can stay afloat running at a reduced capacity.
- Oregonians largely support the stay at home orders.

Washington

Tension over the "Stay Home, Stay Healthy" order

- Governor Inslee stands firm in the face of growing resistance to stay-at-home orders. The governor gave a press briefing Wednesday following the refusal by some Franklin County leaders to enforce the state's "Stay Home, Stay Healthy" order. He emphasized that state decisions would be data driven, and that local jurisdictions do not have the authority to decide not to enforce state laws. ([The Columbian](#), [KIRO 7](#), [Q13](#), [YakTriNews](#))
 - The governor's office also [issued a written response](#) to the Franklin County Board of Commissioners, following a [report](#) that they had voted to overrule the state order, and the county sheriff is refusing to continue to enforce it.
 - Public reaction has been very strong on all sides. Those who believe it is too soon to reopen the state debate against those who say people should be allowed to take their own

individual risks. People are expressing frustration over which activities are allowed and which are not; for example, citing Boeing opening while construction is halted, and Costco/Walmart being open while small stores are closed. People are worried the economy cannot withstand continued closures. ([example 1](#), [example 2](#), [example 3](#), [example 4](#))

- Following the press conference, other local sheriffs expressed their own positions on enforcing the "Stay Home, Stay Healthy" order.
 - The Snohomish County sheriff [announced on Facebook](#) that he will not enforce the stay-at-home order. ([Seattle Times](#), [KHQ](#), [Seattle P.I.](#))
 - The Whatcom County sheriff took to Facebook to urge residents to continue using caution and said that sheriffs do not have the authority to declare any law or order unconstitutional. He said his office's resources will be utilized against activities that "pose actual risks to the community." ([Bellingham Herald](#))
 - The Benton County Sheriff said that he does not plan to issue citations to workers that are taking appropriate safety precautions. He said enforcement of the order should be left up to individual counties. ([YakTriNews](#))
 - The Kitsap County sheriff will not join other sheriffs in refusing to enforce 'stay at home' order, though he has concerns about the order. ([Kitsap Sun](#))
 - Reaction to these announcements is divided with many people applauding sheriffs for making local decisions based on perceptions of what is constitutional and right for each community. Others reiterate that sheriffs do not get to choose which laws to enforce. Many note that people have been going out a lot anyway, and that this debate doesn't make much of a difference in day-to-day practices. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#))
- A republican gubernatorial candidate filed a lawsuit against the governor on Wednesday, over the prohibitions on religious gatherings. ([Seattle Times](#))

Protests

- Spokane residents gathered on Wednesday to protest the "Stay Home, Stay Healthy" order. The gathering included [a gubernatorial candidate](#) and [a state representative](#). ([KHQ](#))

Plans to Reopen

- A [Congressman from Washington says](#) it's clear that Gov. Inslee has not developed a plan for coronavirus recovery. ([YakTriNews](#))
- Spokane's mayor and other city leaders want a regional approach to reopening Washington's economy. The mayor emphasizes that Spokane is "drastically different than western Washington." ([KING5](#), [The Spokesman-Review](#)) Much of the reaction to this is negative, with people pointing out that the disease is not bound by geography. ([example 1](#), [example 2](#))

New Cases

- A Tyson beef plant worker in Tri-Cities dies of coronavirus. All workers are to be tested. ([YakTriNews](#), [KEPR](#))
- Walla Walla County is a 'hot spot' of coronavirus, officials say. ([Union-Bulletin](#))

Prisoner Release

- More than 300 inmates were released from Washington prisons due to COVID-19 concerns. Some local media are [releasing details about offenses committed](#) by prisoners set for release. ([KOMO](#), [Q13](#), [KIMA](#))
 - Reactions are generally negative, with worry about what inmates will do following their release. Many speculate that the potential for the spread of coronavirus could occur by releasing inmates who have it, and they'd be better off staying in prison. ([example 1](#), [example 2](#)) People are concerned that upon release, inmates will have nowhere to go. ([example 3](#))
- A Washington state legislator says the mass release of prisoners is mistake. "Putting convicted felons back on the street is bad for public safety, it's bad for state government and it's bad for the inmates themselves," he said. ([KMAS](#))

Economy

- Seattle Mayor Jenny Durkan says she'll forgo her salary during the coronavirus pandemic. ([KING5](#))
- Alcoa Corporation will close Intalco Works smelter near Ferndale and lay off around 700 employees. ([The Bellingham Herald](#))

Education

- Washington's state schools superintendent announces no failing grades for high-school students during coronavirus closures. ([YakTriNews](#))

Oregon

Reopening

- Hundreds of Oregon businesses questioned Brown about lifting coronavirus restrictions, fulfilling unemployment benefits and delaying new corporate tax. ([Oregon Live](#))

Federal Response

- Small businesses eagerly await passage of relief bill, since the Paycheck Protection Program ran out of funding last week. ([KGW8](#))

Economy

- Oregon lawmakers to consider more than \$30 million in coronavirus-related spending. ([The Oregonian](#), [KATU2](#))
- Oregon to send \$30 million to workers, small businesses, others hit by coronavirus closure. ([KMTR](#))
- McMenamins will reopen pubs and breweries for takeout. ([KATU2](#))
- Almost half of Oregonians are drinking while working at home during coronavirus pandemic, survey says. ([The Oregonian](#)) The survey was done nationally, with a high positive response from Oregon, which may correlate with increased alcohol sales. Responses seem empathetic. ([example1](#))

Flattening the Curve

- Poll: 82% of Oregonians support stay at home orders. ([KGW8](#), [KATU2](#), [KOIN](#))
- Multnomah County is now the center of Oregon's COVID-19 outbreak. ([Willamette Week](#))
- Jackson County reports 33 recoveries on sixth day of no new COVID-19 cases. ([KDRV](#))

New Cases

- Oregon has no new COVID-19 deaths for first time in 3 weeks. ([KTVZ](#))

Idaho

Stay-Home Order

- Little to announce business reopening plan Thursday ([Idaho Press](#))
- Gov. Little gets flak from his own party on COVID-19 decisions ([Idaho News 6](#), [Local News 8](#)) Many respond that they understand the decision to keep businesses closed in the name of public health, while a few voice a desire to get back to business. ([example](#))
- The organization associated with the playground protest two days ago hosted a dodge ball protest game yesterday. Many feel that the game is disrespectful of healthcare workers. ([Idaho News 6 Facebook](#))
- Protesters block Meridian Road after playground trespassing arrest ([Idaho News 6](#))

Testing

- COVID-19 tests being offered at ISU starting Thursday ([Idaho State Journal](#))

Medical Capacity

- East Idaho to get equipment capable of sterilizing 80,000 N95 masks daily ([KPVI 6](#))

School

- If District 91 extends soft closure, they will hold 'drive-in' graduation ceremonies. ([East Idaho News](#)) People are glad to hear there is a plan to acknowledge this important moment in student's lives. ([example](#))

Treatment

- Hydroxychloroquine linked to more COVID-19 deaths, study says. What about other drugs? ([Idaho Statesman](#)) With the Facebook post to this article mentioning the president's promotion of the drug, responses tend to fall down political lines. ([example](#))

PPE

- Computer engineers in CdA design new reusable mask for medical uses ([Spokesman Review](#))

Domestic Abuse

- Faces of Hope offers free smartphones to victims of domestic violence ([Idaho News 2](#))
- Calls to Idaho child abuse hotline down nearly 39% during coronavirus pandemic ([KTVB 7](#))

- Idaho family advocates see a spike in domestic abuse, protective orders ([KTVB 7](#))

Alaska

Reopening

- During a press conference on Wednesday evening, the Governor of Alaska released a new health mandate, Health Mandate #16, which provides guidance to businesses that will be allowed to reopen on April 24th. The mandate includes protocol for hygiene, cleaning, and limiting capacity to 25%, amongst others. The Governor gave room for communities to reopen on their own timeline, depending on their circumstances. The State will start reopening Friday, Anchorage will start Monday, April 27th. This begins phase 1 out of 5 phases. ([Facebook](#), [KTUU](#)) The majority of people are in favor of the reopening of Alaska. A couple of people question the ability of businesses to stay afloat at a 25% capacity.
- 'Ready to get back to work': Anchorage residents rally for an end to pandemic restrictions. Hundreds of Alaskans gathered in a library parking lot on Wednesday to protest the health mandates that closed business. ([Alaska Daily News](#))

Economy

- State of Alaska receives \$1.25B in federal COVID-19 relief. The Governor has made a request to Alaska State's legislature to approve the budget and begin spending the funds. ([KTUU](#))
- Gov. Dunleavy's coronavirus aid plan would send \$563 million to cities and boroughs, eliminating layoffs and tax hikes for many. ([Alaska Daily News](#))
- 'Optimistic' oil forecast calls for Alaska to run out of savings in June 2021. ([Alaska Daily News](#))
- 'Putting the company almost on life support': Cruise ship cuts devastate Alaska tourism. The coronavirus has dealt a blow to the tourism and cruise ship industry in Alaska. 360 sailings to Alaska thus far have been cancelled, impacting the local communities that rely heavily on cruise ship customers. ([Alaska Public Media](#))

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Supply Chain Stabilization

The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and encourage domestic production of critical resources to increase supply long-term.

The **preservation** line of effort focuses on providing federal guidance to responders and the non-medical sector public service (police, fire, EMT), energy distribution and the food industry on how to preserve supplies when they reduce impact on the medical supply chain.

The **acceleration** line of effort provides direct results to help meet the demand for personal protective equipment through the industry to allow responders to get supplies they need as fast as possible.

The **expansion** line of effort is charged with generating capacity with both traditional and non-traditional means such as adding machinery or by re-tooling assembly lines to produce new products.

The **allocation** of supplies facilitates the distribution of critically needed PPE to "hot spots" for immediate resupply. Distributors report on supplies and can request assistance when they experience a shortage.

The Supply Chain Task Force is working with the major commercial distributors to facilitate the rapid distribution of resources in short supply to locations where they are needed most. This partnership enables FEMA and its federal partners to take a whole-of-America approach to combatting COVID-19. The task force is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. The distributors have agreed to focus portions of their distributions on these areas in order to alleviate the suffering of American people.

A key example of this partnership in action is Project Airbridge. The airbridge was created to reduce the time it takes for U.S. medical supply distributors to receive PPE and other critical supplies into the country for their respective customers. FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks

Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations. Per agreement with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical need. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide. FEMA determines hotspot areas based on CDC data.

Working together, we can efficiently distribute these vital resources to hospitals, nursing homes, long-term care facilities, pre-hospital medical services, state and local governments, and other facilities critical to caring for the American people during this pandemic.

April 4, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement

- actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- As of April 3, FEMA and HHS have delivered ventilators from the Strategic National

Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).

- Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
- On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
- Forty states, four territories and 12 tribes have issued stay at home orders.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 3, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty-one states and 12 tribes have issued stay at home orders.

COVID-19 FEMA National Hot Issues & Social Listening Reports April 25, 2020

April 25, 2020 at 7:23 PM EDT

To: Undisclosed recipients:

Good afternoon.

We are on break from our reporting schedule this weekend of social listening in the region, and will be back at it starting Monday morning. Attached is today's national hot issues and national social listening reports.

Below, you will find the section from the national listening report on observations for Alaska, Idaho, Oregon, and Washington.

Region 10

Alaska

- The [governor issued new updates to the state's health mandate](#) as it moves to reopen.
 - [Religious and social gatherings](#) are now limited to 20 people, or 25% of the building's capacity.
- Saturday marks 14 days with [no new cases in Fairbanks](#) but officials continue to urge caution.
- Health officials are encouraging people with any type of symptom, including very mild symptoms [to get tested for COVID-19](#), saying this will help the reopening of the state.
- On Friday, April 24th, the [first wave of businesses in Fairbanks reopened](#), allowing customers into their stores.
- Travelers to Nome are [required to have an Essential Traveler Permit](#) in hand if they come to the town or region.

Idaho

- On Friday, April 24th, the governor announced the creation of a new [public-private task force to create a COVID-19 testing strategy](#) for the state to move forward.
- Private sector and [religious organizations](#) are donating food and [personal protective equipment to health care staff](#).
- [Protesters gathered again](#) outside the Nez Perce County Courthouse in Lewiston against the ongoing shutdown of nonessential businesses.

Oregon

- A [new analysis provided by the Institute for Disease Modeling](#) in Washington shows that Oregon's social distancing measures may have averted more than 70,000 infections, including 1,500 hospitalizations.
- The [Oregon Zoo is asking the public for \\$1 million lifeline](#) in emergency fundraising effort.
- The [Mid Oregon Credit Union](#) completed the approval of 37 Paycheck Protection Program loans during the past week, totaling \$9.3 million.
- [Domestic violence reports have nearly doubled](#) in Oregon while reports of child abuse have decreased since the stay-at-home order has been put in place.
- [Masks are now required](#) at New Seasons Markets, making it the first major Portland grocer to enforce facial coverings.
- Oregon senator is pushing for a \$3.6 billion bill to [expand vote-by-mail and early voting](#) to be added on the next COVID-19 relief package.

Washington

- Second Harvest is hosting an emergency [drive-thru food distribution today](#) at the Spokane Distribution Center. Families in need of food can pick up supplies from 1000 to 1300 PST.
- Of 71 agricultural workers who were tested, [36 tested positive for COVID-19 at a Central Washington orchard](#), dozens were reportedly asymptomatic.
- [Seattle will receive \\$14 million from the federal government](#) for COVID-19 relief, which will be distributed to small businesses, expansion of food delivery programs, shelter meals, and rental

assistance.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 21, 2020

April 21, 2020 at 10:45 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 21, 2020

SUMMARY

- Public pressure is mounting across the region for leaders to take steps to open the economy and allow at least some businesses to resume operations.
- Washington's COVID-19 response is praised as an example for other states in national media.
- In Idaho, three businesses look to defy the stay-home order—a bar, a salon, and a gym.
- Alaska announces a fourteen-day downward trend in cases, and the governor says today he will announce a plan to reopen the state economy.
- Oregon's governor outlines tentative plans to begin reopening the state as soon as May 4.

Public Sentiment

- In Washington there is strong debate and division over when to reopen the economy, with health experts pitted against economic hardship in popular conversation.
- Alaskans were encouraged by the governor's press conference and support plans to reopen the state economy soon.
- People in Oregon, Idaho and Washington are increasingly frustrated by delays in receiving unemployment benefits.
- As an article from the AP covers the story that many Idaho students that would be in school take to the farms, people's reactions express that the experience is valuable and educational.

Washington

Reopening

- Franklin County Sheriff won't stop churches, small businesses from reopening in a safe manner. ([YakTriNews](#), [KEPR](#))
 - Reaction to this news is split, with some people thanking the sheriff for standing up for people's rights, with an emphasis on personal responsibility, and others saying the sheriff needs to follow the law and authority of the governor. ([example 1](#), [example 2](#))
- Calls for Inslee to ease the stay-home order mount after weekend protest. Some people are encouraging small businesses to open in defiance of the governor's orders. ([KOMO](#))
 - In reaction to this report, some people thanked the governor for his leadership, and

expressed that they would not feel safe if the economy reopened. Others say that it should be a personal decision, not a collective one, when to resume activities, and they point to the high economic and personal toll of the restrictions. ([example 1](#), [example 2](#))

- Whatcom County task force begins working on plans to reopen the county. "This isn't going to be a one size fits all," says the county health department. ([Bellingham Herald](#))
- Bellingham's Fourth of July festival and fireworks officially canceled by coronavirus. ([The Bellingham Herald](#)) Many people are reacting that this decision was made too soon. ([example](#))
- Editorial: Western States Pact is a promising move. ([Seattle Times](#)) Most reactions agree with the editorial, confident that the pact will lead to better outcomes for the three states than relying on federal support. Still, some people do not want Oregon or California influencing Washington decisions. ([example](#))

New Cases

- Four COVID-19 cases confirmed at Foster Farms chicken processing facility in Kelso. ([The Daily News](#))
- Coronavirus cases skyrocket among homeless shelter population in King County, and a death was reported at an isolation site. ([Seattle Times](#), [Q13](#))

Washington's Response

- Seattle is emerging as a role model for handling coronavirus within the U.S. ([CBS](#), [Dow Constantine's Facebook](#))
- There is growing national media anticipation about [PBS' Frontline documentary film](#) about COVID-19, specifically how Washington state and the federal government have respectively responded to the COVID-19 outbreak. The documentary is supposed to air Tuesday April 21st.

Flattening the Curve

- People in Washington are reacting to a national report suggesting many may have had coronavirus with no symptoms. ([KOMO](#), [KING 5](#), [KREM2](#))
 - As people speculate over possible implications of the news for the disease curve, there are many calls for better data via increased testing. People are also sharing anecdotes of when they may have had the virus. ([example 1](#), [example 2](#), [example 3](#))
- Grant County: Zero new cases reported for first time since mid-March. ([Columbia Basin Herald](#))
- The Washington Labor and Industry's guidelines for keeping agriculture workers safe from COVID-19 has been widely shared. ([WA EMD Facebook](#))

Testing

- This Whatcom community's residents can be tested for coronavirus, even without symptoms ([Bellingham Herald](#))

Economy

- State sues Tacoma apartment complex accused of defying coronavirus eviction orders. ([The News Tribune](#))
 - Reactions cite concern for those who live paycheck to paycheck, worry that renters will be in trouble as soon as the eviction ban ends, and some understanding for landlords in these difficult times. ([example](#))
- A Washington senator joins those urging Senate leadership to make local media outlets eligible for small-business coronavirus assistance. ([The Columbian](#))
 - Some people agree that the media should be supported as it is essential, but the majority of people seem to disagree for various reasons. ([example](#))
- Business owners say they've applied for numerous grants and loans but haven't seen any financial help. ([KING 5](#))
 - In reaction, many people conclude that financial assistance does not trickle down to the small businesses who need it; rather it gets diverted to large companies. ([example](#))

Prisoner Release

- After a report circulated the identities of prisoners granted early release in Spokane, the Department of Corrections subsequently removed certain prisoners from the list of those eligible for release. ([KHQ](#)) The reaction to this news surrounding the prisoner release is overwhelmingly negative, with most people disagreeing with the decision to release prisoners. ([example](#))

Oregon

Federal Response

- Oregon faces steep drop in income taxes; seeks federal aid. ([Mail Tribune](#))
- FEMA to reimburse Oregon \$7.5M for protective gear. ([Portland Business Journal](#))

Business and Unemployment

- Senate Republican leadership says they want to "return to a new normal and get back to work." ([KGW8](#), [KATU2](#), [KOIN](#))
- Representative Peter DeFazio posted an update that Congress is close to finalizing negotiations to add additional funding to the Paycheck Protection Program, the #COVID19 relief program that helps small businesses keep their employees on the payroll. ([Facebook](#))
- Astoria and Warrenton cope with coronavirus shutdown, as Oregon Coast braces for an uncertain future. ([The Oregonian](#))
- More than 34,000 people sign petition to open Oregon salons by April 27. ([KGW8](#))
- Oregon workers struggling without paychecks and unprocessed unemployment benefits. ([KATU2](#)) Many are frustrated with the system and lag time to receive benefits. ([Facebook](#))
- Factory workers return to work at Daimler truck plant in north Portland ([KPTV](#))

Testing

- Oregon State starts program to test Corvallis residents for COVID-19 ([KGW8](#)), while an antibody test is underway at Providence Health Care Services. ([OPB](#))

Flattening the Curve

- Oregon officials credit early action, luck to curbing virus. According to researchers at the University of Washington, Oregon is expected to have one of the lowest death rates per capita in the country. ([OPD](#), [KGW](#))

Reopening

- Gov. Kate Brown outlines tentative plans for reopening Oregon if COVID-19 fades. The Governor's office has a three stage plan for reopening Oregon as soon as May 4. ([Statesman Journal](#), [Oregon Live](#))

Idaho

Stay-Home Order

- Idaho businesses are beginning to reopen despite Gov. Little's stay at home order. ([Boise State Public Radio](#))
- Defying stay-home order, Nampa bar to reopen: 'We truly do not care if you disagree.' The bar applied for, but did not receive a small business loan. ([Idaho Statesman](#)) Many in response worry about how this could impact bar staff and anyone who visits spreading coronavirus. Many suggest one ramification should be to deny health care to those who chose to defy the order. ([example](#))
- Middleton gym owner defies extension of stay-home order. ([Idaho News 6](#)) While some support the business's decision, many feel that this could lead to greater spread of coronavirus. ([example](#))
- Liberate Moscow Peaceful Protest Set For Tonight Outside City Hall ([Pullman Radio 102.1 & 1150](#), [Moscow-Pullman Daily News](#))
- Local woman petitions governor to list hair salons as essential. ([Idaho State Journal](#)) Reactions vary - some feel willing to assume the risk in the name of restoring the economy, but many feel that these services put people at risk of getting COVID-19, and that hair salons are not essential. ([example](#))

Economy

- With schools closed, more Idaho students start farm jobs. ([KTVB](#), [Idaho News 6](#), [Local News 8](#), [East Idaho News](#)) While headlines indicate this is not good, many respond that the experience has been and can be educational and positive. ([example 1](#), [example 2](#), [example 3](#))
- Idaho has taken the biggest gas price drop in the nation ([Idaho News 6](#))
- Congress promised laid-off workers \$600 a week. Idahoans aren't getting it. This is why. ([Idaho Statesman](#))

Testing

- St. Luke's new in-house testing will get results back in hours instead of days ([KTVB 7](#))

New and Recovered Cases

- First Asotin County Resident Death from COVID-19 ([Daily Fly](#))

Alaska

Reopening

- In the Alaska Governor's press briefing Monday night, he noted that the state has conducted 10,124 tests thus far and 161 Alaskans have recovered from the virus. The Alaskan economy will start opening large eating establishments, retail stores, nail salons and barber shops that can safely distance customers as the mandates keeping them closed expire April 21. The Chief Medical Officer stated that the past fourteen days have shown a downward trend in cases, but that citizens should still follow social distancing guidance with the initial economy opening. ([Facebook](#), [KTVA](#), [Radio Kenai](#)) The response to this announcement was generally positive with numerous comments in favor of the opening. ([example](#))
 - The governor will give details on reopening plans Tuesday, and may begin to relax regulations as early as next week. ([Alaska Public Media](#))
- Anchorage unveils a plan to move on from the 'hunker down' coronavirus order. The Anchorage Mayor released a four-phase plan to open up the city once cases have been trending downward for over 14 days. ([Alaska Daily News](#), [KTVA](#))

Flattening the Curve

- Now all ANMC Patients can be tested for COVID-19. The Alaska Native Tribal Health Consortium is now able to test anyone with cold or flu like symptoms. ([Alaska Native Tribal Health Consortium - Facebook](#))

Economy

- Alaska oil industry and analyst react to U.S. oil prices crashing. ([KTUU](#))

PPE

- Dimond High student designs 3D-printed masks for medical providers. In a coordinated effort with the Municipality of Anchorage Innovation Team, a local teen is 3D printing masks for a local hospital. ([KTVA](#))

Subject: Notification of a Major Disaster Declaration for the State of Washington (FEMA-4539-DR-WA)

Importance: High

STATE OF WASHINGTON

FEDERAL DISASTER DECLARATION FACT SHEET

APRIL 23, 2020

Today, April 23, 2020, President Donald J. Trump granted a Major Disaster Declaration for the State of Washington triggering the release of Federal funds to help communities recover from Severe Storms, Flooding, Landslides, and Mudslides that occurred January 20 to February 10, 2020. Details of the disaster declaration and assistance programs are as follows:

Declaration Number:	FEMA-4539-DR
Incident: and Mudslides	Severe Storms, Flooding, Landslides,
Incident Period:	January 20 to February 10, 2020
Federal Coordinating Officer:	Timothy B. Manner National FCO Program
Individual Assistance (IA): households):	(Assistance to individuals and

IA-Designated Areas:

Under Review.

Public Assistance (PA):

(Assistance for emergency work and the repair or replacement of disaster-damaged facilities):

PA-Designated Areas:

Columbia, Garfield, Grays Harbor, Island, King, Lewis, Mason, Pacific, San Juan, Skagit, Snohomish, Thurston, Wahkiakum, Walla Walla, and Whatcom Counties.

Hazard Mitigation (HM):

(Assistance for actions taken to prevent or reduce long term risk to life and property from natural hazards):

HM-Designated Areas:

All areas in the State of Washington are eligible for assistance under the Hazard Mitigation Grant Program.

OTHER:

Additional designations may be made at a later date if requested by the State and warranted by the results of further assessments.

For your reference, I have attached fact sheets on the Public Assistance and Hazard Mitigation Grant programs.

If you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

April 17, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to

- local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
- Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.
 - Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state's entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

Subject: FW: need some details on staffing numbers by skill set

Adam,

We got some answers back from April Putney at King County. While the data is a little light on the shelter, there is real good info in here email about what medical staffing would look like.

Here's what a typical shelter staffing model looks like:

Sincerely,
Jim

JIM BAUMGART

Subject: Re: need some details on staffing numbers by skill set

Hi Jim, here's more information.

For the 31/75:

- **The 71:** There is no specific credential to work in a shelter. People with social work or low-level medical (CNAs) medical backgrounds would be wonderful, but the tasks that we anticipate here are just staff to supplement Shelter providers once existing shelter staff either become ill or to operate new spaces to help “deintensify” existing shelters. People for this role just need to be ready to join existing operations and help them keep going.
- **The 35:** These are ideally higher-skilled supportive services people—either nurses, CNAs, social workers, or others with a background in social services. In these cases, we’re assuming that the County Workforce can (at least in the short term) fill the operational needs, but we will continue to need help with skilled work to help keep people supported and staying in I/Q settings. At the same time, if mid-skilled persons are not available, we’ll also take any type of person we can get.

For the AC/RC mass care facilities, we've since updated the numbers: the staffing request, per week, based on 12-hour shifts, for each AC/RC (with 6 planned, each with 400-person capacity) is:

- General non-clinical staff: 40 per site (240 total for 6 sites)
- Licensed Mental Health Practitioner: 8 (48)
- Unlicensed Mental Health Practitioner: 11 (66)
- Physician: 2 (12)
- Psychiatrist: 2 total (rotate between sites)
- Registered Nurses: 17 (102)
- RN Supervisors: 6 (36)
- Advanced Practice RN: 6 (36)
- Medical Director (physician): 1 (6)
- Medical Assistant: 6 (36)

April,

Hi and Happy Monday. We've ran the line at the state level at can't find the resources so it's going out to FEMA. Can you get me a skills set for the 106 pax for staffing at I/Q and also to reinforce existing shelter systems?

Thanks

Jim

Lily,

Thanks for the phone call yesterday. Can you get me some details on slide 8? I'm working a staffing request and FEMA needs a bit more specificity to work it. It will also help when we send this out for contract.

As you note, we simply do not have the staffing expertise readily available within our volunteer or state workforce.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_14

April 14, 2020 at 4:24 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- HHS announced five new contracts for ventilator production rated under the Defense Production Act (DPA), to General Electric, Hill-Rom, Medtronic, ResMed, and Vyaire, as well as two other contracts for ventilator production, to Hamilton and Zoll.
 - In total, combined with contracts with [General Motors](#) and [Philips](#) rated under the DPA issued last week, HHS has finalized contracts to supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
 - The seven new ventilator contracts announced by HHS this month will provide

a total of 137,431 ventilators by the end of 2020.

- The thousands of ventilators delivered to the Strategic National Stockpile starting this month, continuing through the spring and summer, will provide more capacity to respond to the pandemic as it evolves.
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
- On **April 13**, The Department of Homeland Security and FEMA announced the funding notice for an additional \$100 million in supplemental Emergency Management Performance Grant Program funds.
 - The money is available to all 56 states and territories as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. All applications must be submitted on [Grants.gov](https://www.grants.gov) by April 28.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.
- FEMA [issued guidance](#) on the framework, policy details and requirements for determining the eligibility for FEMA reimbursement of states purchasing and distributing food to meet the immediate needs of those who do not have access to food as a result of COVID-19 and to protect the public from the spread of the virus.
 - State, local, tribal, and territorial governments with the legal responsibility for protecting life, public health and safety are eligible applicants under emergency and major disaster declarations for the COVID-19 pandemic.
 - Applicants may enter into formal agreements or contracts with private

organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the pandemic.

FEMA Advisory: COVID-19 Daily Briefing Points (April 22, 2020)

April 22, 2020 at 1:09 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 22, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.4 million samples, which is more total tests than the

following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.

- States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
- HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
- Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

DHS_Announces_\$10_Million_in_FY20_Funding_Availability_for
_Targeted_Violence_and_Terrorism_Prevention_Grant_Programs

April 21, 2020 at 9:47 AM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

**DHS Makes \$10 Million in Funding Available for
Targeted Violence and Terrorism Prevention Grants**

WASHINGTON – The Department of Homeland Security (DHS) is making \$10 million available to help local communities more effectively combat terrorism and targeted violence across the United States. The \$10 million appropriated by Congress under the Fiscal Year 2020 Targeted Violence and Terrorism Prevention (TVTP) Grant Program will support the development of a nationwide terrorism and targeted violence prevention framework. DHS strongly encourages all eligible entities to apply for this funding opportunity to build capabilities in their communities and online.

“Attacks by domestic terrorists, those inspired by foreign terrorist organizations, and acts committed by violent individuals with no clear ideological motivation have occurred in communities across America with tragic outcomes,” said Acting Secretary of Homeland Security Chad F. Wolf. “These grants will improve local communities’ ability to prevent individuals from mobilizing or radicalizing to violence and create locally-based prevention frameworks to address these emerging threats.”

The TVTP Grant Program helps DHS to fulfill its commitment to addressing the threat posed by terrorism and targeted violence at home and builds on the promising practices identified in previous grant programs. It is the only federal grant program dedicated to enhancing prevention capabilities in local communities. In its first year, the TVTP Grant Program has three priorities: (1) establishing and enhancing local prevention frameworks with an emphasis on threat assessment and management capabilities; (2) preventing domestic terrorism; and (3) finding innovative solutions for preventing targeted violence and terrorism.

“I want to thank Congress for funding for this mission in a bipartisan way over the last few years, most recently and most significantly, in the Fiscal Year 2020 Appropriations Act. We look forward to working with Congress to continue to advance this effort.” Wolf continued.

Eligible activities under the TVTP Grant Program cover all aspects of prevention, including building resilience, intervention, recidivism prevention, and reintegration programs at the local level. The program directly supports the objectives of the [DHS Strategic Framework for Countering Terrorism and Targeted Violence](#), which DHS released in September 2019. Making these funds available for local prevention partners is a key milestone in the implementation of the Strategic Framework.

TVTP Grant Program funds will support the development of local prevention capabilities at a time when DHS is observing an uptick in online efforts for terrorism recruitment and

radicalization from a variety of sectors. DHS is committed to expanding the program and the President has requested an additional \$20 million for TVTP grant funds next fiscal year.

The application period will close on May 29, 2020. Applicants should consult the [Notice of Funding Opportunity](#) for more specific information about the process. Applying for this grant is a multi-step process and it is recommended that applicants begin that process early in order to allow sufficient time to complete the interim steps.

For more information, please see the TVTP Grant Program site at <https://www.dhs.gov/tvtpgrants>.

Good morning,

FEMA is coordinating state calls on behalf of White House Intergovernmental Affairs and the Office of Policy Coordination. Your participation is requested on a call this **Saturday, April 25 from 10:00 to 11:00am PDT** to discuss COVID testing. This call is for senior health officials to discuss plans to increase testing capacity, surveillance (including surveillance in high risk settings) and contact tracing.

A calendar invitation with call-in information will follow shortly. Questions that are going to be asked will be provided so you can prepare responses.

Call Participants

Federal Government:

CDC Technical Lead

FEMA Regional Administrator – Mike O’Hare

HHS Regional Director – CAPT John Smart

White House Task Force POC – Dr. Birx

White House Intergovernmental Affairs

Indian Health Service – CAPT Tom Weiser

Others as interested

State Government:

State Health Officer – John M. Wiesman

Lab Director – Brian Hiatt

Epidemiologist – Scott Lindquist

Public Health EM – Clark Halvorson

Emergency Management Director – Robert Ezelle

Governor’s Office

State Econ Development

Call with Administrator Gaynor and Governor Inslee

March 22, 2020 at 11:38 AM EDT

To: Hill, John, Hyer, Brian

Cc: Wilson, Morgan (GOV), Daugherty, Bret D. (MIL), Tichenor, Stacey (GOV)

John and Brian:

Governor Inslee would like to speak with Administrator Gaynor today to discuss the urgent need for the USNS Mercy to be deployed to the Puget Sound area to address the deteriorating situation in Washington State.

Enclosed, please find letters transmitted last night to the President, Vice President and Secretary Azar laying out this urgent need. With each day that passes, the number of available physicians and nurses in Washington decreases as illness and fatigue take their toll, and our already low number of available hospital beds continues to shrink, leaving us unable to meet current and projected patient needs from COVID-19 and other acute and subacute patients. With our rural hospitals facing increasing challenges and our medical system facing a growing shortage of health care personnel, it is clear that no state on the West Coast needs the capacity provided by the Mercy as soon and as greatly as Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.999.0155 with any questions.

Casey

April 17, 2020

FEMA Advisory

Disaster Financial Management Guide

On Thursday, April 16, FEMA released the “Disaster Financial Management Guide” to support jurisdictions in establishing and implementing sound disaster financial management practices, which are critical for successful response and recovery. The guide takes an all-hazards approach and addresses a broad range of issues and contains concepts, principles and resources applicable to the coronavirus (COVID-19) pandemic response environment.

The guide identifies the capabilities and activities necessary to prepare and successfully implement disaster financial management while maintaining fiscal responsibility throughout response and recovery operations. This includes considerations and practices necessary to track, calculate and justify the costs of an emergency; support local reimbursement reconciliation; avoid de-obligation of grant funding; and effectively fund and implement recovery projects and priorities. The principles, concepts and resources contained in the guide can support jurisdictions in identifying the resources needed to support their community, increase the efficiency of recovery efforts, and reduce the likelihood of audits and financial penalties for the jurisdiction.

To view the guide, please visit <https://www.fema.gov/plan>.

Good morning,

I am reaching out to schedule a call this afternoon between Governor Jay Inslee and FEMA Administrator Peter Gaynor. The administrator would like to schedule about 30 minutes to

discuss COVID-19 with Governor Inslee. Does he have sometime to discuss between 2:30-4:00 pm PDT?

I am hoping you can help me schedule this call, let me know if a phone call would be better or how you prefer to coordinate.

Thank you so much for your help!

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 11, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and

- number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - On April 10, HHS Secretary Azar sent a follow up letter to hospital administrators, reinforcing the need for this data to be provided daily to facilitate planning, monitoring, and resource allocation in response to COVID-19.
 - Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them.
 - The letter included a set of frequently asked questions that details federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information.
 - These FAQs will be updated if additional data delivery methods become available.
 - The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.
- On April 10, HHS began delivering the initial \$30 billion in relief funding to providers in support of the national response to COVID-19, with \$26 of the \$30 billion expected to be delivered to providers' bank accounts the same day.
 - The payments are part of the distribution of the \$100 billion provider relief fund included in the CARES Act.
 - To expedite providers getting money as quickly as possible, the initial funding was distributed immediately proportionate to providers' share of Medicare fee-for-service reimbursements in 2019.
 - The Administration is rapidly working on future targeted distributions to hospitals and providers that will focus on providers in areas particularly impacted by COVID-19, rural providers, and providers with lower shares of Medicare reimbursement or who predominantly serve the Medicaid population.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132

ventilators by June 1.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing

resources to reopen safely and responsibly.

- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

RE:

To: Nitsch, Melissa A

Thank you for the update. Out of curiosity, are you aware of the letter our office sent to GEO/ICE regarding COVID-19 planning at the NWDC? I'm guessing that any response would have pointed to the guidance packet found at the link you provided me.

That said, do you know whether NWDC staff, either GEO or ICE, have taken the following steps (both of which are sourced from that manual)?

- Identify points of contact in relevant state, local, tribal, and/or territorial public health department before cases develop.
- Communicate with other correctional and detention facilities in the same geographic area to share information including disease surveillance and absenteeism patterns among staff.

Again, thank you.

Alejandro

Alejandro,

Unfortunately, I'm unable to provide any case updates on this individual without a signed privacy waiver.

On a separate note, I wanted to make sure you were aware of our website, which is tracking all developments related to the COVID-19 impacts on agency operations, detainee care, etc. The information is reviewed and updated frequently. I'm sure you are receiving inquiries from the public, so please feel free to share if it is helpful: <https://www.ice.gov/coronavirus>

Thank you,

Melissa Nitsch

Good morning Alejandro,

I'm writing to acknowledge receipt of your request, and also introduce myself as your point of contact for any ICE-related inquiries in Washington State.

With regards to your request for updates, we are not generally permitted to release any information on someone without a signed privacy waiver (signed by the person about whom you are requesting information). However, given the current situation, we are asking our attorneys to review and determine what is legally releasable without a signature. I'll be in touch either way. In the meantime, please don't hesitate to reach out should you have further questions on this or any other matter.

Thank you,

Melissa Nitsch

Hello, Officers Berg, Williams, and Muirhead:

I am writing you today on behalf of Marcos Orellana Pineda. As I understand it, he is currently detained at the Northwest ICE Processing Center, having travelled to the United States as a human trafficking and domestic survivor. Furthermore, Mr. Pineda has pending applications for Special Immigrant Juvenile Status and asylum, no arrests or criminal record, and a guardian, Ms. Kathleen Goforth, ready to take him into her care. Lastly, I have read the many letters, submitted on his behalf, from legislators and others and see that he has broad support from his community.

For these reasons, I respectfully request that you give full and fair consideration to his case. I also ask that, in accordance with the privacy waiver attached to this email, you provide me with updates as appropriate.

Best regards,
Alejandro

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

Coronavirus (COVID-19) Pandemic: Whole-of-America Response - April 27

April 27, 2020 at 12:39 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 27, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 26**, CDC and the Occupational Safety and Health Administration (OSHA) [released targeted guidance](#) to help meat and poultry processing facilities implement infection control practices to reduce the risk of transmission and illness from COVID-19 in these facilities.
 - Meat and poultry processing facilities present unique challenges for the prevention and control of COVID-19 transmission among workers.
 - Meat and poultry processing employers should implement a combination of

- engineering controls, cleaning and disinfection, social distancing, work practice controls, administrative controls, and use of personal protective equipment.
- Basic worker infection prevention information and training should be provided to all workers in a clear and accessible manner, including training on social distancing and ways to reduce the spread of infection. To ensure accessibility, multi-lingual materials should be considered and made available, as appropriate.
- FEMA, HHS and the Cybersecurity Infrastructure and Security Agency (CISA) along with other federal agencies are distributing cloth face coverings as part of a multi-prong approach to re-open American economic activity while continuing to limit spread of COVID-19.
 - As of **April 26**, 32.5 million cloth face coverings are being processed and distributed to state, local, tribal, private sector, and federal entities.
 - The facial coverings are being delivered in a phased approach for infrastructure workers, first responders and food producers who do not need medical-grade personal protective equipment (PPE) for their daily work. Distribution is based on CISA's analysis of priority infrastructure sectors.
 - The federal government will provide additional face coverings in production to states, territories and tribes for distribution, with priority to emergency services, food production and distribution, and other sectors that support community lifelines.
 - FEMA and HHS are also providing face coverings to federal departments and agencies with mission essential functions to promote health and safety in the workplace and in their execution of public-facing missions
 - As of **April 26**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 74.7 million N95 respirators, 104.8 million surgical masks, 7.2 million face shields, 15 million surgical gowns, 798 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
 - The U.S. has now processed 5.2 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

REMARKS BY PRESIDENT TRUMP,
PRESIDENT PENCE,
MEMBERS OF THE CORONAVIRUS TASK FORCE
PRESS BRIEFING

P.M. EDT

trends demonstrate that our aggressive strategy to battle the virus is working and that more gradually and safely reopen. It's very exciting. It was very exciting, even today, watching getting ready and they're all excited.

do want to mention a man who's done a very good job for us: Dr. Robert Redfield. He was tot about the fall season and the virus. Totally misquoted. I spoke to him. He said it was ridi corona coming together at the same time. And corona could be just some little flare-ups tha out. We'll knock it out fast. But that's what he was referring to: coming together at the s

I think rather than waiting, I'd ask Dr. Redfield to come up, say a couple of words just to it was a big -- a big explosion. The headline in the Washington Post was totally inaccurate the headline was ridiculous, which is -- as I say, that's fake news. And CNN is fake news 1 wrong story, which they knew. They were asked to change it, and they wouldn't do that. And

I'll ask Dr. Redfield, who is, you know, a real professional, to come up and explain. Please

REDFIELD: Thank you, Mr. President. I really do think it's important to clarify this as we

I commented yesterday that there was a possibility of the fall, winter -- next fall and win complicated when we had two respiratory illnesses circulating at the same time: influenza a

I think it's really important to emphasize what I didn't say. I didn't say that this was going to be more complicated -- or more difficult and potentially complicated because we'll have flu and COVID.

want to emphasize that we continue to build the nation's public health infrastructure to enter containment mode. Those of you who heard me talk before, I've told you that in January and February, the nation had 14 cases. We were in the containment mode. And then, unfortunately, the virus overwhelmed our mitigation.

are building that public health capacity now to make sure that we stay in the containment m so we will not need to resort to the kind of mitigation that we had to this spring.

have confidence that our public health response of early case recognition that we've talked combined with our plans for increased surveillance, particularly for the most vulnerable, w our nation will be able to maintain itself in the containment mode.

that will be supported by the American public's continued cooperation, obviously in the area of social distancing strategies that may be appropriate.

key to my comments and the reason that I really wanted to stress them was to appeal to the public with confidence. One of the greatest tools we have as we go through the fall-winter season is to embrace the influenza vaccine and thereby minimize the impact of flu to be the co-respiratory virus you very much.

Q Could I just ask a follow-up on that, Dr. Redfield?

Sir, just to clarify your comments --

PRESIDENT: But I don't know what's to follow up.

Well --

PRESIDENT: He was misquoted. Totally misquoted. He said they could come together. They didn't make the statement was to get a flu shot, so that next fall we don't have such a big season.

as you said, there's -- it's possible, if the corona even comes back -- and he doesn't know how long it spoke a great length. And I think the doctor will speak, if you'd like to continue. But we've put them out -- of corona. But we may have a big flu season. But that's different. Flu is very

Can I just ask him a follow-up question?

PRESIDENT: Yeah, go ahead. Sure.

Okay. So, Dr. Redfield, the Washington Post -- which, you did the interview with them -- the possibility that the assault of the virus on our nation next winter will actually be much more serious than we went through. And when I've said this to others, they've kind of put their head back, they've said, "We have the flu epidemic and the coronavirus epidemic at the same time." Is that what you said?

REDFIELD: Yeah, that's what I was trying to say to you just a minute ago -- that the issue is difficult, is that we're going to have two viruses circulating the same time.

spring that we just went through -- February -- we had a benefit of having the flu season and our surveillance systems to say, "Whoops, this is coronavirus. We need to focus." Next fall and winter, if it's circulating, and we're going to have to distinguish between which is flu and which is the coronavirus.

so the comment that I made: It's more difficult. It doesn't mean it's going to be more important, more, as some people have said, "worse." It just means it's going to be difficult because we

what I was wanting to do and what I want to do again here is appeal to the American public to help us with mitigation, which they really helped. I need them to help now to best prepare us for the picture.

But that quote -- but that quote --

THE PRESIDENT: And you may not even have corona coming back, just so you understand.

Doctor, would you like to explain that.

Q No, but -- but, I'm sorry, but that quote that I just read was accurate -- right, sir? Because the Washington Post. You were accurately quoted, correct?

REDFIELD: I'm accurately quoted in the Washington Post as "difficult." But the headline was

PRESIDENT: What does the headline say? What does the headline say? Go ahead, read the headline.

The headline says, "CDC Director Warns Second Wave of Coronavirus is Likely to be Even More Difficult Because --"

PRESIDENT: That's not what he says.

VICE PRESIDENT: It's not what he said.

PRESIDENT: It's not what he said.

But if you have the two things happening --

PRESIDENT: The headline doesn't correspond to the story.

REDFIELD: No. I actually think it's actually going to be -- I think the American public is vaccine hesitancy, to vaccine with confidence for flu. And I'm confident that the public has come together now across this country so that we can early-case diagnose, isolate, and contact trace -- that system is going to be there, and we're going to be able to contain this virus.

Why did you retweet the article if it was inaccurate? Doctor, why did you retweet it?

PRESIDENT: You weren't called.

DR. BIRX: So, I just -- we talked about this yesterday when you asked me this question. And "devastating." And I want to really, again, emphasize to the American public that when we first came out in the February and March timeframe, we didn't have an understanding of its transmissibility.

I think what we are building together, and the -- when we talk about the public health infrastructure, surveillance piece. But I think we also know the strength of the American people and their ability to protect themselves with not touching their face, making sure that they're washing their hands.

the other piece I wanted just to talk about, and we mentioned yesterday also: that we have the ability to utilize syndromic management that we can utilize -- we have all of that time that you would need in a flu, potentially, if COVID came back. Potentially.

so we are preparing for that potential right now. And I think we spoke to you all about that -- preparing for today and tomorrow, but we're preparing for six months from now, three months from now, pieces are in place.

think what Dr. Redfield clearly was asking for -- just like we asked for every American to add to that guidelines getting your flu shot and making sure you're protected.

PRESIDENT: And, Doctor, wouldn't you say there's a good chance that COVID will not come back?

BIRX: We don't know --

THE PRESIDENT: And if it does come back, it's in a very small, confined area that we put out.

DR. BIRX: Well, the great thing is we'll be able to find it earlier this time. And I think that's those cases earlier. So what Dr. Redfield said: We would be able to stay in containment phase.

what we're also hoping -- and we talked about this about four or five weeks ago -- that we're down because people are much more aware of respiratory illnesses and how to protect themselves. We also want to also protect individuals from getting the flu because of the vulnerability, we're seeing devastating outcomes to flu. We could prevent and decrease both of those things.

I think we are assured that the CDC is putting in place today what we are going to need in the future if, potentially, the virus comes back.

PRESIDENT: And if it comes back, though, it won't be coming back in the form that it was. I think we can contain. But what the doctor was saying -- and I spoke to him a great length -- he was saying, "Now you have a flu and you have the embers of corona."

in my opinion, from everything I've seen, it can never be like anything that we've witnessed before. statement?

REDFIELD: Absolutely. I think --

PRESIDENT: It's nothing like what we're talking -- what we've just gone through, we will not have corona, and you could have a big flu system. And if they combine, if they come together -- will not go through what we went through for the last two months.

Jeff.

Mr. President, I --

PRESIDENT: Is that a correct statement?

REDFIELD: Correct.

I understand that the United States will certainly be more prepared in the fall, but how can we get to the same level that it has today?

PRESIDENT: What -- it is estimated it might not come back at all, Jeff. It may not come back.

But how -- how can you --

PRESIDENT: He's talking about a worst-case scenario where you have a big flu and you have something that's not going to come back -- and I've spoken to 10 different people -- it's not going to be like that.

We have much better containment now. Before, nobody knew about it. Nobody knew anything about pockets -- a little pocket here or there -- we're going to have to put out. It goes out and we're watching for it.

It's all possible. It's also possible it doesn't come back at all.

I understand the containment, but I don't understand how you know it won't come back on a big scale.

PRESIDENT: I didn't say it's not. I said if it does, it's not going to come back on anything like that. We have a mess, where they come at the same time. And if they come at the same time -- the flu and the corona. Jeff. It's not the greatest thing either. If they come at the same time, you have them both.

If we have embers of corona coupled with the flu, that's not going to be pleasant, but it's not the worst. Any way, shape, or form.

If you don't think that it's going to come back at the same severity it is right now, why are we not spending more on emergency procurement of ventilators? Tens of thousands of --

PRESIDENT: Because we have to have them for other reasons. Something else could come. I mean, we're talking about corona. But look at what happened. And now, we did have the H1N1 swine flu. We had that. We had various forms of flu, but nothing like what we've had here. Nothing at all like what we could have.

We think that the stockpiles -- we're making hundreds of thousands of ventilators right now. Not long ago, all they talked about was ventilators, right? Because you didn't think it was possible to have it and nobody can believe it.

Just spoke to world leaders today who desperately need ventilators. They said, "The job you did was to get another 500 to France. We're sending some to Spain. We're sending some to Italy. We have thousands."

World leaders -- I spoke to Prime Minister -- I mean, I went through a lot of different calls. I can give you a list if you want -- but I went through a lot of calls to a lot of people who like to have some ventilators. We're going to get them some ventilators. But they all said they had solved the ventilator problem because that was a big problem.

Testing problem. We've done more than any other nation in the world. Go a step further: If you

the world, put them together, we've done substantially more than that. You people aren't sa

let's say we had 350 million people in the United States, right? Let's say. And if we gave
so we give 350 people a test 10 times -- the fake news media would say, "Where's the 11th t
his job." Because you have a lot of bad reporting out there. It's very sad. And it's so bad

But that's not true. That's not true. That wouldn't be the case --

PRESIDENT: But you're one of -- you're one of the leaders of the bad reporting. You know?

No, but that's not true. I mean, this is --

PRESIDENT: Okay, let's get onto another subject. I wanted that to be --

Mr. President, can I just follow up on this real quick?

PRESIDENT: I wanted that to be cleared up. If you want, we can get on to it later, but I wa
to get the news accurately. You ought to write it -- if you -- if you take a look at what y
became the king of ventilators -- we're making different factories all over. Ventilators by

fact, Mike got back from Wisconsin. The first thing he did, he called up. I said, "How's it
believe." He just saw a plant, a factory where they're making ventilators. I think I can sa
was unbelievable what he saw -- the quality of the equipment, the professionalism.

VICE PRESIDENT: They doubled production.

PRESIDENT: A tremendous number of -- how many workers would you say were there?

VICE PRESIDENT: It was over 550. They doubled production and are about to triple production

PRESIDENT: Nobody thought this could be done. The fake news was very unhappy that it was do
ventilators anymore.

Well, who's unhappy -- who's unhappy that ventilators are being made, Mr. President?

PRESIDENT: Everybody. Everybody. Because you never mention it. You never mention it. There'
with ventilators.

're now supplying ventilators all over the world. Because no other country could have done
great story. Instead you say, "Trump was slow" or -- slow? We were so fast.

we put the ban on so much earlier. When Nancy Pelosi, as an example -- you don't say this --
Francisco -- in Chinatown, in San Francisco. Nobody wants to say that. If we didn't -- and
country to China, we would have been so infected, like nobody's ever seen.

you saw the chart -- and we were at the top of the list, in terms of success -- nobody wrote
-- is anybody going to use that chart?" Nobody wrote it. In terms of mortality. You saw tha
the most successful, in terms of mortality. Nobody wrote it.

would be great if you wrote the truth, but let's get on with it because I want Mike to spea
on the assumption you'd like to and I think you probably will.

's been encouraging to watch states begin to open up as -- and it really has been; it's a b
lifted. We must maintain vigilance and continue practicing social distancing. I encourage g
approach. And I want to remind all Americans to adhere to our guidelines. Very important. T
or they're going to do what they think is best. I want them to do what they think is best, I

your hands, avoid close physical contact as much as possible, and wear a face covering when

flattened the curve and really made tremendous progress, but we must guard against a danger
so important. This is what we were just talking about. We don't want a rebound. The doctor
definitely don't want to rebound. I don't think you want one, do you, huh? You especially.

don't want to rebounds after all this death -- death -- that we've suffered. Not work -- I was unnecessary. It should have never happened. It should have never left that little area and they know it.

our all-out war against the virus, we continue to make great strides on testing. Famous test in the world. Nothing funny about that, Jon.

of the governors have never faced a situation like this before, but we're helping them find -- tremendous testing capacity that the governors, in many cases, didn't know they had. And every day. We're coming up with new equipment, like the Abbott Laboratories equipment -- on wants it. But you can only make so many of those machines, so we have many other forms of test it very quickly and by the millions -- by the millions.

task force issued its reopening guidelines earlier than April 30th to give governors the time capability and capacity and customized plans for their states, which many of them did. We've testing and on a lot of other things.

spoke -- as you know, Governor Cuomo was here. He had a -- we had a great conversation on the good job in New York.

're working very closely with each of the states to help them succeed. I spoke earlier today was all about testing, that conversation. He has been scaling up really well. Really good job critical supplies that California needs to make use of the tremendous capacity that they've capacity. And I'm going to do it very quickly. He needs certain things. I'm going to -- we're

could he get it himself? Yes. But I can get it faster. He understands that. And he's done a -- we're going to have a lot of it to him over the next two days. And we're going to beef it additional. He's done a really terrific job in California. Some of the governors have done

told the governor of Georgia, Brian Kemp, that I disagree strongly with his decision to open of the phase one guidelines for the incredible people of Georgia. They're incredible people great. They've been strong, resolute.

at the same time, he must do what he thinks is right. I want him to do what he thinks is right doing. But I want to let the governors do -- now, if I see something totally egregious, total and beauty salons and tattoo parlors and barbershops in phase one -- we're going to have phase think it's too soon.

I love the people. I love -- I love those people that use all of those things: the spas and parlors. I love them. But they can wait a little bit longer. Just a little bit. Not -- not have to have that. So I told the governor, very simply, that I disagree with his decision, I

'm excited to announce that, in the coming weeks, the Air Force Thunderbirds -- they're incredibly equally incredible -- will be performing air shows over America's major cities and some of going to be doing a lot of work -- a lot of very dangerous flying. It's dangerous, you know speeds and you're 18 inches away from each other. That's dangerous work.

son is a great pilot. And I don't know if he could be -- could he be a -- could he be a Thunder

VICE PRESIDENT: We'll see.

PRESIDENT: I think -- I think he probably could, from what I hear. I don't know if I'd want what they're able to do. And to sacrifice our frontline -- what we're doing is we're paying confronting COVID. And it's really a signal to all Americans to remain vigilant during the is a -- a tribute to them, to our warriors. Because they are equal warriors to those incredible have for the more traditional fights that we win. And we win. If we want to win, we always just go to a standstill. But that's always -- that's not the way this country works.

America Strong was the idea of our great military men and women -- the Thunderbirds and the to the American medical workers who, just like military members in a time of war, are fierce be great. I want to see those shows. I've seen them many times and I can't get enough of the

on July 4th, we'll be doing what we had at the Mall, as you know. We're going to be doing it

would imagine we'll do it -- hopefully, I can use the term "forever." That was a great success. It was raining so hard. It was raining at -- that was about as hard as I've seen it. Didn't bother the pilots. It didn't bother the military. It didn't bother the crews that we again on July 4th.

great military is operating at 100 percent during this crisis and thousands of troops are doing hotspots, as you know. You see them all over. I spoke -- when I spoke with Governor Cuomo, and the other governors, they wanted to know if we could have some military help with the medical. Every case, they said, "Fantastic." I mean, just fantastic.

New York City, Mayor de Blasio called me to say it was inspiring to watch. He was there when everybody spirit when he saw the professionalism and the spirit that they had. They walked through the people: doctors, nurses, respiratory technicians, and professionals. It was an incredible thing. The people going to work said that was something special.

we're going to have some tremendous air shows all throughout our country. And that's in honor of the people that are helping us so much, and, unfortunately, the people who have passed away. They've been allowed to happen.

around-the-clock negotiations yesterday, the Senate answered my call to replenish the Paycheck Protection Program so additional American workers can keep getting a paycheck. We just increased it by \$310 billion in the bill without delay. In our first round of funding, we've provided nearly \$350 billion dollars to small businesses and workers and small businesses. And it's really been an incredible, incredible success.

want to thank the banks. We have the big banks, the little banks, the commercial banks of all kinds. They were fantastic, by the way. Community banks.

as you know -- this was an interesting story in recent days -- I've called for Harvard -- the \$5 billion endowment fund -- to return the money that it was allocated under the CARES Act. And Harvard has announced today that they will not accept the funds, nor will Stanford University or many other universities at the university level. Also on company level, some of the companies were bigger than people had heard of and strong enough that they didn't need the money. So there's a certain amount of money that

soon as I heard it, I said, "Stop funds." And for the most part, I guess, they stopped it, but I don't know -- they're not accepting the money, and that's great. And so I want to thank Harvard, I want to thank the other companies in the case. It's broken differently between colleges and companies, but I think it's great universities. And there's some great ones.

legislation passed by the Senate yesterday also reserves \$30 billion in loans for small financial institutions and distressed communities. This is very important. We're determined to protect our African American workers who have been hit so hard by this hidden enemy.

administration is pursuing a comprehensive strategy to address the full spectrum of needs in our communities and economic revitalization. First, my administration is committed to providing the testing and treatment in distressed communities. In the last month alone, we've already sent over \$1.4 billion to our health centers -- think of that, 13,000 -- to increase testing and treatment in the underserved areas.

're also expanding access to telehealth. Telehealth has become a big deal. You know, I've been surprised, because of this, it's become a big -- a big thing. People can't leave their houses. For various reasons, including they wanted to follow the guidelines.

legislation passed by the Senate yesterday -- and I want to thank everybody. A great, great unanimous vote. How often do you see that? But the legislation passed by the Senate yesterday will further expand testing, and provides even more funding for community health centers and various other things. We'll be working on that because, you know, as per a couple of your statements and questions about the future.

hope this doesn't happen again for -- again, ever. But, you know, last time it was of this kind. We want to be prepared. And we are prepared.

as I told you, we're building up hospital -- not only our stockpile, which is being up great hospital stockpiles. We're getting them what they need. We're working out cost arrangements for the ventilators, which are the hardest thing for them to get, both from a cost standpoint and

FDA, the NIH, and industry leaders are establishing master clinical trial protocols to test time. And they're doing a lot of -- we're doing a lot of testing right now.

than 1,600 locations across the country have signed up to administer convalescent plasma to those who have recovered. And when they recover -- I said it last time -- practically, the blood so that I can help other people." They want to give their blood. It's incredible. The weakened conditions, and they say, "I want to give my blood." And that's happening all the coronavirus, I ask you to consider contacting your local blood or plasma donation center to save many lives.

love for our nation and loyalty for our fellow citizens, we will safeguard our families, care for our workers, and build a future for a country that is the greatest country anywhere in the

you very much. Mike Pence, please.

VICE PRESIDENT: Thank you, Mr. President. The White House Coronavirus Task Force met today more than 843,000 Americans who contracted the coronavirus and we grieve the loss of more than Dr. Birx and her team, we continue to see encouraging signs because the American people have that's been issued by the President and this task force and they've been taking to heart the

Mr. President, as we learned today, we are continuing to see declines in all the major metro most impacted. Numbers remain low and steady on the West Coast -- in Washington State and in Jersey, Connecticut all appear to be past their peak. And as -- as our scientists may reflect positive rate going down, which is actually even as encouraging as the declining cases.

Detroit metro area appears to be past its peak. The Seattle metro area, as I mentioned, remains most stable of all the large metro outbreaks.

also are continuing to see a stabilization and even declines in -- in Houston and Atlanta and elsewhere.

is a tribute to the American people, to the fact that the American people have taken to heart the personal hygiene; the recommendation that you use the drive-through at a restaurant, rather than groups of more than 10.

the President's behalf, on behalf of our entire White House Coronavirus Task Force, we just continue onward. We all want to reopen America. And we want to reopen our states and our communities responsible to do so.

I want to say to my countrymen: the fastest way to reopen America is to continue to do what President Trump has said many times, to get our country working again -- is to put the country to doing just that.

know, from early on, the President called forth not only the full power of the federal government of the American economy. And I had the privilege yesterday to travel to Madison, Wisconsin, workers at their very best. And I want to thank the GE Healthcare team in Wisconsin, as well with all day yesterday.

was extraordinary, Mr. President. And earlier this month, you used the Defense Production Act and General Motors and Ford and other companies that -- that were prepared to repurpose manufacturing to construct ventilators.

at this particular plant, they literally have -- the union sat down -- the machinists' union negotiated a new contract with GE Healthcare that allowed them to begin to bring in workers they doubled their -- their work line in one week. They're about to triple it. They've been working week.

the President promised that, by harnessing the power of the American economy, we would have to the ingenuity and the hardworking Americans that I was with yesterday and other companies ventilators in 100 days.

were all wearing t-shirts, Mr. President -- I brought one back for you -- that simply read, great team of GE Healthcare, I want to just say all of America is proud of you and grateful

're also grateful to all of our healthcare workers at every level and all the work that the Guard and our American military are at their side. As our task force learned today, more than 31. So we're going to continue to partner with states, as the National Guard plays a vital role in standing up states' response.

personnel: Mr. President, we have more than 5,500 active duty military personnel, including in the uniform of the United States, working in 17 hospitals in 7 states around the country

're also very proud of our team at the VA. The VA has -- has addressed its capacity issues. As its facilities increase, so they're deploying teams to focus on nursing homes.

Massachusetts, the VA personnel have disinfected two different nursing homes in New Jersey. In nursing homes and deployed 90 doctors and nurses. And, in Florida, we're sending 16 teams to

the President also mentioned, in addition to what I saw yesterday in Madison, Wisconsin, we have the Strategic National Stockpile. It's growing, again, with ventilators -- nearly 11,000 in supply. More will be added, transitioned in the near term. And every American, I think, can -- can be counted on as a family member, facing serious consequences from the coronavirus to need that equipment to help them there.

we said yesterday in Wisconsin and you've said, Mr. President, I think it should be a great honor for an American who has required a ventilator in the United States has been denied a ventilator. And for healthcare workers, it's a testament to every American putting mitigation principles into practice, and for companies.

of great companies, American businesses are stepping up. It was on April 1st that I traveled to the President reached out to the -- to the president and CEO of Walmart to ask Walmart to get in the line. I'm glad to report to you that we heard today at the task force that Walmart is producing 8.4 million units of our commercial supply to healthcare facilities around the country by the end of June.

hardly alone. Honda is producing 500,000 face shields. New Balance is making 100,000 masks. And as people have stepped up to make the sacrifices and endure the hardship that social distancing requires, people of every size and every means, have come together to respond to the President's call.

really has been a whole-of-America approach. And our message from the President's White House is that American people it's working. We're getting there. We can see light at the end of the tunnel. We've put America back to work. But it's going to take all of us, continuing to make the sacrifice to get us to a place where we can reopen safely and confidently.

with that, Mr. President, I'll call Dr. Fauci up for his reflections and -- and we'll move on.

PRESIDENT: Great.

FAUCI: Thank you very much, Mr. Vice President. So I'm going to just take off from when I was here and reiterate some of the things that the Vice President said, but to kind of connect the dots and show where I think we're going to be.

you remember a couple of weeks ago, when we talked about the fact that we were going to have a particularly driven by the situation in New York, were going to get worse and worse. But yesterday we see some turnaround, some flattening, and some coming down. As you've heard from Dr. Birx and I, it's continuing.

what has happened is that the mitigation that we put in with the first 15 days and then the social distancing worked. So it got us to where we are today. It is a successful formula. It is that we now think seriously about reopening America. And for that reason, we put together a careful and delineated and described program for Opening Up America Again. And you know what it is; it's a new formula. Those very guidelines are based on a version of the successful formula that got us to where we are today.

what I'm trying to say is that the program is not one that is going to be: "Turn the lights off." We have to proceed in a very careful, measured way. And if you look at the guidelines, they delineate certain checkpoints before you can even think about going into a phase one, and then things

relax a little and you go into phase three.

we live in a big country and it's heterogeneous, and there are different dynamics of outbreak speed with which one can go from one to another, at the point at which you can even begin to

the one thing that I know: The urge we all have to get out there and get it over with -- let's not do that because there's a lot of suffering, economic and otherwise, in this country because

again, as I've pleaded early on, weeks ago, I plead with the American public, with the government, with the responsibility: Although I know one has the need to leapfrog over things, don't do that. Do it the right formula. The problem is if we don't do that, there is a likelihood that we'll have a rebound

the one way not to reopen the economy is to have a rebound that we can't take care of. So, I plead with the American public in general and those who are responsible leaders to carefully consider this. Thank you.

Dr. Fauci, could you talk a little about your expectations for the fall? We heard from Dr. Redfield that the fall? Is it going to be embers or possibly no return of the virus at all?

FAUCI: You know, as I've said before here, when you look at an outbreak, it's two dynamic forces. The virus to its own devices, it will take off if you do nothing to stop it. If you put into place containment -- and then hopefully you never get to mitigation -- but containment is the key to determine whether you're going to have a big outbreak.

what Dr. Redfield was saying, first of all, is that we will have coronavirus in the fall. I think it's a matter of -- of transmissibility that it has, the global nature.

happens with that will depend on how we're able to contain it when it occurs. And what we're doing is much, much better prepared to do the kind of containment compared to what happened to us this year.

the complicating issue is that, unlike the syndromic and influenza-like observances that we've seen, clinically what's happening, it's going to get complicated by influenza season. And I believe that it is going to be complicated.

whether or not it's going to be big or small is going to depend on our response. And -- and there's a lot of misunderstanding. Nobody can predict what is going to happen with an outbreak, but you can prepare. And that's really very important.

So you would caution against people thinking that, in the fall, there's not going to be coronavirus about it?

FAUCI: No. No.

Or if it is, it'll be spotty and it won't be a big problem we have to worry about?

FAUCI: No. There will be coronavirus in the fall. If we do -- which we won't, but let's take it seriously, coronavirus, forget about it. We're not going to do anything about it." It will take off. That's what's going to happen. We're going to respond to it to not allow it to do that.

Dr. Fauci, what happens when governors like Governor Kemp are not following this careful, methodical approach to meeting the gating criteria? What do you do about that?

FAUCI: Well -- well, you know, if I were advising the governor, I would tell him that he should not just turn the switch on and go. Because there is a danger of a rebound. And I know there's a natural, human nature desire -- but going ahead and leapfrogging into phases where you should be official and as a physician, not to do that.

PRESIDENT: Okay. Go ahead, please.

Thank you, Mr. President. Can you please give some details about the executive order? I know you have a document. I haven't had a chance to review it.

PRESIDENT: Well, we could talk about that later. It's an executive order on immigration. We want Americans to have the healthcare. We want to take care of our citizens first. We have to. A few days. At the end of 60 days, or maybe even during 60 days, I'll extend it or not. And I'll

(Inaudible) for immigrants who are already here, Mr. President?

Mr. President, I wanted to ask you --

PRESIDENT: Yeah, go ahead, please.

Immigrants who are already here in the country or immigrants abroad who already effectively are in the country, and healthcare workers?

PRESIDENT: We're talking about immigrants that are trying to get in, and we're talking about people who are coming in illegally.

as you know, because you've seen the numbers, our border -- our southern border -- is very, very long. It's being helped by 160 -- more than that -- miles of wall that are going up. I'm talking about 450 miles.

We'll have 530 miles early next year, and that's really great. It's fully funded. We have a lot of people doing a fantastic job. Same people that did Javits Center, as you know. They're doing a fantastic job. It's very, very tight, for good reason -- for very good reason.

We're also being helped by 27,000 very good soldiers from Mexico, and I want to thank the President of Mexico, and I want to thank the President of the United States for the ways, including on what we're doing with COVID. And, as you know, we have a very good trade relationship with Mexico. So I want to thank the President of Mexico, in particular for the 27,000 soldiers.

Do you want to talk about the exemptions for the healthcare workers, sir?

PRESIDENT: They're doing -- they're doing a fantastic job.

Do you want to talk about the exemptions for healthcare workers?

PRESIDENT: Yeah, we want to protect our healthcare workers, and that's one of the other reasons why we're doing this. Jon.

Mr. President, I wanted to ask you about Rick Bright. He's the head of the federal agency in charge of the coronavirus. He says he has been pushed out of his job because he raised questions about your directives on that. Was he pushed out of that job?

PRESIDENT: I -- I've never heard of him. You just mentioned the name. I never heard of him.

This happened today.

PRESIDENT: Well, I've never heard of him. If the guy says he was pushed out of a job, maybe we should hear the other side. I don't know who he is.

And on the hydroxychloroquine --

PRESIDENT: Hold on one second, please.

I just wanted to -- you said by Fourth of July you expect people to be on the National Mall and

PRESIDENT: Hope so.

-- last year. Given what the doctors are just saying -- that, you know, coronavirus is still

bad as it is now, but it's still going to be circulating -- is that -- is that going to be July Fourth?

PRESIDENT: Well, we're going to probably have 25 percent of what we had last year. Last year, I saw a magnificent picture of Dr. Martin Luther King and I saw a magnificent picture of the Statue of Liberty maxed out. It was beautiful to see. Beautiful. Very similar.

year, most likely, we'll be standing six feet apart. We'll have to do that in a very, very greater, so we'll leave a little extra distance. But if we do that, we'd certainly do that.

-- I don't see, maybe, the purpose if we can't do that. We have to have people. Thousands -- were there -- tens of thousands of people last year. It was incredible. And it was, to an extent, an aircraft flying over. We even had Air Force One flying over.

ideally, it would be wonderful if we could actually have it as it was last year. But -- and think it's important to know: Eventually, we are going to have that.

stadiums are going to be the way --

You think by July you'd be able to have --

PRESIDENT: -- they've been for the last hundred years.

By July, you'd be able to have a --

PRESIDENT: No, I know. But your stadiums -- as an example, sports -- are going to be the way we're going to have owners. He said, "Do you think I should take out seats?" I said, "No, you shouldn't take out seats. We're going to be back.

virus will eventually be gone. And if it should show up in the fall, we're going to put it out very fast, because we've learned a lot. We've learned a lot about how to put it out very fast.

please.

Mr. President --

PRESIDENT: Nice -- just nice and easy. Just -- good.

You talk a lot about testing capacity.

PRESIDENT: Yeah.

And governors agree that that exists. But it's very different from testing implementation. We have your full authority to help them get reagents and other things. As you would like to say, we have that --

PRESIDENT: Well, I am doing that.

VICE PRESIDENT: We are doing that.

-- and becoming the king of testing?

PRESIDENT: And -- and let me just say, we are the king of testing already. There's no count not even close.

Well, only 1.2 percent of the population has been tested. Is that good enough?

PRESIDENT: I just said there's no country in the world that's done more. And we have tests that will be introduced very shortly that will do it more.

problem is this: It's a -- it's very much of a media trap. Whether we did 2 percent, 5 percent, or 10 percent, no matter what.

But it's 1.2 percent.

PRESIDENT: Now, with the -- with the expertise and with what we did -- because of our experience -- what we did with the ventilators, that wasn't a trap. Because we got them done, shockingly fast -- like Mike Pence saw yesterday in Wisconsin. But we have numerous of those sites and

that when the governors were complaining -- some of the governors, I must say. And it was very hard part, but when they -- except for one. When the governors were complaining, we said, "No, no, no, need 100." One governor asked for many, many, many thousands, and it turned out they didn't need anybody that needed a ventilator -- you know this, and we went through this with the governor and the ventilator. That was an incredible achievement.

testing, it's a little different. It's much easier than ventilators. It's like 2 percent. But by the millions. They're coming in -- literally coming in by the millions. Totally ordered. We've gotten a much lesser quality. We didn't want to do that. We got the highest quality.

testing -- it's like no matter how well you do, you can always say more. With the ventilator, we went to one meeting -- "Who wants a ventilator?" One governor -- one governor said "Who else?" Nobody spoke up. That was four weeks ago. So that was great.

problem with the testing is, as I said, if we test -- if we tested 350 million people, you'd need a first test or a third test or a fourth test."

everybody believes as strongly as some people in testing. Some people want to do testing before we fulfill that goal. That's easy compared to ventilators, as I've said. But we have a tremendous need in the world right now. And every day, it's growing. And it's growing very substantial. I mean, they've seen testing all their lives. They've never seen anything like we've been able to do

we're going to give everybody what they want with the testing. But again, testing -- and I think the test has to be administered locally. You can't do from Washington or faraway locations -- for example, where you have a governor, he has mayors, and they have representatives, and -- and they know the parking lot in the back of a Walmart or put it in a certain location in different states. They're doing it beautifully.

relationship I have with the governors, and Mike has, and we all have with the governors, I think, they don't complain. They're not complaining. So we're doing tremendous testing. And I think, more than probably any of the governors even want.

Please, Jennifer.

Back on the immigration EO -- can you say, is it just for green cards -- for green card holders?

PRESIDENT: It's green cards for -- subject --

Is it also for people seeking temporary work visas?

PRESIDENT: It's subject to change. We have some people coming in, for instance, helping the farmers -- they've been coming for years and years, and they're helping our farmers, and they're

don't want to do -- you know, the border has been turned off a number of times over the years, and all went out of business. They were out of business. They couldn't farm. We're taking care of the farmers like I take care of farmers.

Subject to change because some --

PRESIDENT: Including the \$19 billion that we're dispersing to farmers because of some very

Subject to change because some of your advisors are saying there could be a problem with it, so we're extending it?

PRESIDENT: No, no. Just it might be modified. It could be modified next week, in two weeks. We may modify it as we go along. But right now, we have a very powerful immigration ban, but it

or made less tough. We don't want to hurt our businesses, and we don't want to hurt our fam

Mr. President, can I ask you about your conversation with Governor Kemp? What did he say to with him? And, of course, for gym owners and tattoo parlor artists and barbers in Atlanta - advise them to listen to you and not to their governor?

PRESIDENT: Look, I'd like them to listen to their governors. All of their governors. I have down, but I have respect for our governors. They know what they're doing, I think. And, as worked very hard for his election. He beat their superstar. He beat the superstar of their

Obama, Barack Obama, Oprah Winfrey -- they all went in. They campaigned for him very, very primary, and he ended up winning a primary after I came out and endorsed him. So, a lot of between myself and Brian Kemp. I like him a lot.

happen to disagree with him only on time and timing. I disagree. When you have spas, beauty the people from spas and beauty parlors, tattoo parlors. Bikers for Trump -- a lot of tattoo barbershops. These are great people. But you know what? Maybe you wait a little bit longer

do I agree with him? No. But I respect him, and I will let him make his decision. Would I d want to protect people's lives. But I'm going to let him make his decision. But I told him:

Thank you, Mr. President. The Vice President, in his remarks, was talking about the federal relates to nursing facilities. And, as you both know, they've been just so incredibly hard deaths so far. The industry says that they're struggling as it relates to testing. Can you facilities across the country?

PRESIDENT: Yeah. Well, we're doing that automatically. I mean, that's almost common sense. look at the State of Washington. That was our first glimpse of it. They got hit so horribly like everybody was from a particular nursing home.

we knew immediately that was going to be a problem. And we're doing that, 100 percent.

VICE PRESIDENT: I can speak to --

PRESIDENT: We're taking very special care of our nursing homes and our seniors, other than of me. But other than me, we're taking care of our seniors.

Another -- another --

VICE PRESIDENT: I can speak to that as well.

PRESIDENT: Yeah, please, Mike. Go ahead.

Thank you, Mr. Vice President.

VICE PRESIDENT: No, it's just an enormously important question. And we want to thank the Am visits to their grandmothers and grandfathers and moms and dads. It's tough. I'm going to b go see my mom. She lives in her own home, but people get it that the risk of serious illness is fairly low. You'll either have flu-like symptoms or no symptoms at all.

as we've said so many times at this podium and the American people get it: A healthy Americ to a senior with an underlying health condition and have the kind of heartbreaking results country.

's the reason why, from early on, the President took decisive action to raise the infectiou America. He deployed all 8,000 of our inspectors at the Center for Medicare and Medicaid Se ensuring compliance with those new higher standards.

we've spoken about -- about nursing home issues with governors around the country. And fran that have done remarkable work with nursing homes. You mentioned Governor Brian Kemp. He ac he deployed them to nursing homes to do cleaning and to disinfect areas of those nursing ho

to your point about testing, if you look carefully at the Guidelines to Open Up America Again, the first of testing that we contemplate is first that we want to be able to test anyone who has the virus. Secondly, we want to do the kind of contact tracing -- and Dr. Redfield is asking every state in America -- to be able to find out everyone that that person has been in contact with.

if you look right underneath that, what we're directing states to do is be prepared to deploy testing in nursing homes and long-term care facilities so that we can monitor any potential outbreak of the virus in that population.

to the leadership of our Surgeon General, as the President announced today, we're also going to be focusing on the most vulnerable communities, to underserved communities. The CDC released new preliminary data on the health of American communities in this country. And it's the reason why part of our phase-one recommendations are going into those communities that are described by the doctors as socially vulnerable. And, even though we're already in the process of deploying testing.

so it's a good opportunity to remind every American to be especially careful around our senior citizens' visitations to protect the health of those who are most vulnerable. But the American people are going all the way through phase three and reopening, we're going to be helping to guide the state with our seniors with serious underlying health conditions.

Mr. Vice President --

PRESIDENT: How about right behind Jennifer? Go ahead.

Thank you, Mr. President.

PRESIDENT: We'll get back -- we'll get back to you.

Commercial labs say that they need to buy new diagnostic machines to be able to double their testing capacity. They said that there is enough testing capacity to double overnight. How do you, kind of, square that?

PRESIDENT: Very easy. They can get new machines if they want, but even if they didn't, we have to look at what's happening in California and New York. Governor Cuomo told us very strongly -- we know, that's a research center of the world. They have tremendous -- in California, too. Look at the testing capability there too. Now, if they want to increase it, they can increase it, but that's not the question.

we saw the maps the other day, when we put up the different sites in various states, and virtually every state had a site. About you with the mask? Nice that you wear a mask.

Yes. Mr. President, may I actually follow up on those maps from the other day? On Monday, a Miami sent me a question asking if it was possible to get the information on those maps distributed to the stations and newspapers can check on that information. So if that could that be done --

PRESIDENT: Who did the maps? Do you -- do you want to do that? Do you want to say something?

BIRX: Thank you for talking about testing and testing capacity because we have been talking about that. We could see -- and we did a full inventory of every single state and every single laboratory. We're working on the implementation piece of the testing capacity. And it's complicated, so we have been -- we have been working through the American Society of Microbiology, as I mentioned before, to really work with every laboratory in each laboratory.

I just want to thank Administrator Verma, who really worked on increasing the funding for the testing for the coronavirus nucleic acid test from \$50 to \$100 to really address some of the issues. Sometimes we think these tests run themselves; they don't. They actually need people to help with the testing. We need to purchase more machines; we actually need to have additional laboratory technicians to run the testing. And so it's lab by lab, state by state, and that's the dialogue that's going on now to unlock the testing.

the testing would not be needed at this moment, and maybe it is, but we want it also totally to be an issue where we have to distinguish between flu and COVID-19.

we're building infrastructure and capacity not only for today, but for tomorrow, and really

pandemics and bring testing to scale. Because the country has never had to do this before. countries, they're -- they're struggling with some of the issues, from PPE to testing. And working on it as a collective to really have a very innovative and integrated way to approach

PRESIDENT: But without building new, they have tremendous capability. And --

BIRX: And the maps are -- I will ask the companies, because, obviously, it's proprietary when if you have that machine and five others, maybe you don't want to know -- let that person know like Coke and Pepsi. So I think we're working very deliberately to really be able to share those

governors, I can tell you that they -- all of the state and local government -- state governors addresses and the type of machine for every single laboratory in their jurisdiction so know

PRESIDENT: And many of the governors were not aware that those laboratories were available.

Q One more for Dr. Birx, before you leave, on the -- the state of California has now partially get guidance and who should get testing because they want to test people without any symptoms nursing home. Do you agree with this? Vice President Pence, do you agree with this?

BIRX: Well, not only do we agree with it; it was in our guidelines.

VICE PRESIDENT: It's in our guidelines.

DR. BIRX: That was fundamental to our guidelines, and I think we were the first group that always said that we think that's a significant contribution to infections. And we went to the critical to find cases the earliest. And so that is where we have asked states in the guidelines to make sure that people in underserved areas and cities to really ensure that we're monitoring asymptomatic piece may be the tip of the iceberg. In fact, it'd be the iceberg underneath the cases and maybe this.

in parallel, we're working with states and local governments to really define what that population states, working with them together, to really reinforce this antibody testing but in a care increase your sensitivity and specificity into the 99-plus percent range, because we think high-quality test, but a high-quality test that you can really tell someone that they've had those two tests that we can do in series to really assure people.

that is -- that was in the guidelines from the very beginning, and we think it's fundamental fall, because that will be our early alert if any of the COVID virus reappears.

So how much more testing are we going to need? How much --

PRESIDENT: Jon, you didn't know that was in the guidelines?

The CDC criteria says that (inaudible) --

Well, it's currently in the CDC guidelines. You're saying that --

PRESIDENT: No, but it's right -- but it's right in the guidelines.

Dr. Birx --

PRESIDENT: I'm surprised at you.

-- while you're there, can I just --

PRESIDENT: Jerome, would you like to say something on that, please? Please.

GENERAL ADAMS: Thank you, Mr. President. And I just want to reiterate to everyone that the commitment to protecting vulnerable people, and that includes in the area of testing. We've different groups, and we hear that testing is absolutely a concern.

we'll be giving you more details in the coming days, but I just want you to know that we're that the President rolled out with pharmacy and retail companies like CVS, Walgreens, Rite .

testing for more Americans and more communities across the nation.

're going to be increasing access to testing for under-tested, underserved, and minority communities. We're going to be working with state partners and states to establish sites in areas most in need of increased access to testing.

're using data -- CDC-provided data -- to locate sites and counties that are under-tested and underserved, particularly in the populations of black, Hispanic, rural, and Native Americans.

're using the CDC's Vulnerability Index, as you heard about -- heard about earlier to select sites and counties. We're looking for communities when confronted by external stressors along four main themes: socioeconomic status, minority status, and housing type. Our goal -- our goal is to have about two-thirds of these sites and counties with moderate to high social vulnerability and about a quarter of these sites and counties with high social vulnerability.

again, I want communities that are vulnerable to understand that we are strategically and intentionally testing in those areas so that people can get identified if they have symptoms, can get identified if they have symptoms, and we will be able to deploy resources appropriately.

you, Mr. President.

PRESIDENT: Thank you, Jerome. Thank you. And I have to say our Surgeon General is doing a great job.

GENERAL ADAMS: Thank you, Mr. President.

PRESIDENT: Great job. Really good.

in the back, please.

Mr. President, thank you. Can we talk about Iran? You put out a message this morning making it clear that we are not going to change our rules of engagement when it comes to Iranians' -- Iranian aggression. Are you going to change, formally, rules of engagement so that they can engage?

PRESIDENT: No. We're covered -- we're covered 100 percent. We don't want their gunboats surfacing and having a good time. We don't want them anywhere near our boats. And -- so you know, we're covered. I say it again, but I've given that order.

the Obama administration, it was taking place all the time. Under my administration, I gave them a clear message. They were very nice; they were no problem. But then I noticed yesterday, they did that in a way that I said, "We're not going to -- we're not going to stand for it."

if they do that, that's putting our ships at danger and our great crews and sailors at -- in danger. And we will -- they'll shoot them out of the water.

So the U.S. military does not have to change its rules of engagement in order to follow you.

PRESIDENT: No, that's not rules of engagement; that's a threat when they get that close to our ships with substantial weapons on those boats. But we'll shoot them out of the water. Okay?

Thank you, President Trump. If possible, I'd like to ask a question to Dr. Fauci and then ask you. Today the CDC and the USDA said that the first pets in America had tested positive for coronavirus. How do you think the public know about that?

FAUCI: Pets?

Pets. Two pets.

PRESIDENT: Pets.

FAUCI: So that question was asked before, but I'd be happy to answer it again. Certainly, at least two zoos have been reported to be infected with coronavirus. There is no evidence that the virus is spreading to other animals.

obviously, is that impossible? I mean, biologically, you know, anything is possible, but the

from an epidemiological standpoint, that pets can be transmitters within the household.

it's not surprising. I mean, we -- when you have viruses that can infect multiple species, necessarily mean the animal is transmitting it.

PRESIDENT: What about the lion in the New York Zoo?

FAUCI: Yeah, well, you know, that's the lion in the New York --

PRESIDENT: How did that -- how did that happen?

FAUCI: You know what probably happened? I don't know, Mr. President, but I would imagine the probably had an asymptomatic infection, took care of the animal, gave him some food, touched

A question for you, President Trump. My question for you --

PRESIDENT: Yes.

-- is: Earlier in these briefings, you talked a lot about giving Americans hope and you want seems to perhaps be lessening, I wanted to ask you about accountability. And, of course, much familiar with you as the tough boss who fired people for doing a poor job. I wanted to ask report from Reuters today that the HHS Secretary put a former dog breeder in charge of day-to-day And also on --

PRESIDENT: He did what? What?

Reuters reported today that Alex Azar, the Secretary of HHS, put a former dog breeder -- the charge of day-to-day operations of the coronavirus.

PRESIDENT: That, I don't know. But I -- you're just telling me something. And what's the se

And the second one is on face masks. Taiwan has a bigger population than New York State. Face masks. Here --

PRESIDENT: No problem with face masks, if the governors want to do that. You know, we order face masks. We have hundreds of millions right now. And if people want to wear them, it's up to that, it's absolutely -- now, it's more appropriate in some states, obviously, than others. states where it's much less necessary.

no, that's up to the governors. And we have that very well covered, I think, face masks. But

Here, people aren't wearing masks.

PRESIDENT: We have hundreds of millions of face masks, and we have at least 500 million. The

And lots of people are wearing face masks now that the federal government advised. It was a our Surgeon General said that -- and I'm quoting -- they're, quote, "not effective in preventing coronavirus." I mean, is -- should there be accountability there and also from HHS Secretary

PRESIDENT: Well, I don't know. Would anybody like to speak about it? I don't -- I think, if somebody wants to wear them, I'm all for it. Would somebody like to discuss that?

VICE PRESIDENT: Bob Redfield. Bob.

FAUCI: Go -- go for it, Bob.

REDFIELD: I think the comments that we made when we came into face masks -- and I think it's guidance about face masks, or what we called "face coverings" -- was, in recognition of the infection or pre-symptomatic infection, was the recognition that we could use a barrier. And when I'm in public, right here, that I use -- you know, that this barrier, in case I was, is a barrier to prevent me to protect you in case I happened to be asymptotically infected.

's very good data to show that the ability of viral particles to go through a barrier is su

diminished. And that's why we recommended these face coverings. I think if you go back to what some people may think, intuitively, it's to protect them from getting infected. No, it was not infected by me when I go out in public.

do you --

PRESIDENT: Jerome, please.

GENERAL ADAMS: I actually appreciate you asking that question because it's one that -- that we understand why the American public has been confused over time.

Dr. Redfield mentioned, initially we said, based on CDC, World Health Organization, and most of all, that the public needed to know that these masks are not effective or shown to be effective in catching coronavirus.

an important thing to remember is the context of those statements was a run on medical masks, and the public was at risk.

VICE PRESIDENT: Right.

GENERAL ADAMS: What's changed? What's changed is, we found out that, unlike past viruses that we've seen, a significant proportion of coronavirus cases can be traced back to asymptomatic spread.

that's what the task force deliberated this. We've always told you that we will look at the facts and we will use the best available evidence at the time. And once we saw that asymptomatic spread, we said, "From our point of view, at preventing you from catching coronavirus in a significant way." But we also told you that, if they know they have symptoms, to prevent them from spreading to other people.

now that we know about 25 to 50 percent of people are spreading asymptotically, we suggest you prevent asymptomatic spread. You wear your mask to protect me. I wear my mask -- and Dr. Redfield believe I have mine on me, Bob. I carry mine around with me too. I wear my mask to protect you, not wearing my mask to protect you now, and we also all have been tested. So that's why I'm wearing mine.

PRESIDENT: Yeah, but I'm right next to you, so. (Laughter.)

GENERAL ADAMS: Well, I'll put mine on if you want me to, sir. But -- but again, important to know that it's not a substitute for social distancing. Still, social distancing is the number one thing that we recommend.

number two, it's important to know that you should practice good hand hygiene and not touch your face and bring disease to your face.

number three -- this is the most important -- well, it's just as important: Please, save the workers, because the cloth facial coverings are effective, as far as we know right now, basically preventing you from spreading disease to other people. So no inconsistency there. It's just that the information changed, and that's what you want from your public health leaders.

There's been the now argument made that you knew about the asymptomatic transmission at the time and essentially misleading the public?

PRESIDENT: No, I think it's (inaudible).

GENERAL ADAMS: Well, I made --

PRESIDENT: He's answered that question.

GENERAL ADAMS: The honest answer to you is: No, we did not. That was a recommendation of the best information we gave you the best information we could at the time.

I actually, a little bit, resent that implication because I work hard to try to protect the public and give the American people the best information we have available at the time. And we don't -- we don't say, "Look, if we don't know, we're going to change. We're going to change our recommendations."

PRESIDENT: Just a wise-guy question, that's all.

Mr. President --

PRESIDENT: Please, go ahead.

Mr. President, I wanted to ask you about the launch of the military satellite by Iran. I was wondering if this is an advancement of the missile program?

PRESIDENT: You mean the shot they took? Well, they say no. Okay? They say all sorts. "It was a test, we don't believe that? They want to have better television in Iran, so they say."

We're watching Iran very closely. Very closely.

Are you concerned --

PRESIDENT: We know more about Iran than they do. Right now, we know more than they do. So we're watching it. It was going up. We followed it very closely. They say it was for television.

please.

Are you concerned, though, Mr. President?

Mr. President, I have a question for Dr. Fauci.

PRESIDENT: Go ahead. Finish up there, please.

Yeah, very quickly. Are you concerned that they see this as a potential vulnerability on the outbreak --

PRESIDENT: See what? What is vulnerable?

Military readiness. The outbreak on the Roosevelt, the fact that you're consumed with dealing with the States.

PRESIDENT: Her, I read where various navies have had outbreaks of COVID. Look, we're in 184 hundred and eight-four -- the COVID.

We have a problem on -- that just shows you how rapidly it spreads. It started off with two I hear it's 540, of which one has died and a few are very sick. But most of them are back in the hospital. We did lose one, and it attacked the lungs of that young person. And then we also had a number of people either better or getting better. But most of them are better for a long time already.

please.

Mr. President, can I --

PRESIDENT: Yeah, just one second.

Thanks, Mr. President. As you know, over the course of the past few weeks, there have been outbreaks of COVID at companies across the country in several states.

PRESIDENT: Yeah.

Is this a concern to you?

PRESIDENT: Yeah.

Are you going to increase testing in these facilities because the workforce is getting sick?

PRESIDENT: Look at South Dakota, how well the governor is -- yeah, look at South Dakota, how well she's doing. Of a sudden, you have a big spike in one location. And she's got that very much under control. It's not surprising. And they had a big one right near where you were yesterday, as I understand it.

Is the food supply --

PRESIDENT: They're closing one or two of the plants, actually.

Is the food supply secure?

PRESIDENT: Yeah, totally secure. It's in great shape.

in the back. You didn't go.

Thank you, Mr. President. The Attorney General in the State of Missouri filed a law -- a law

PRESIDENT: Against China.

-- accusing it of lying and covering up about the origin of the virus.

PRESIDENT: Yeah.

Do support that? And do you call for international --

PRESIDENT: Well, I haven't seen the case. I know about the case. He filed a case against China. But I'm going to take a look at it. I actually know about it very much. I have to take the terms of reading it, but I will be doing that.

But would you call for international investigation?

PRESIDENT: Well, we're going to have to take a look. Oh, we're doing investigations. We're reviewing that lawsuit. I'm sure that won't be the last one.

Mr. President, yes, I just had a follow -- a question for Dr. Fauci, if you don't mind.

PRESIDENT: Yeah, sure.

And I'm happy to ask you one after. So Jon had asked the President about Rick Bright, and he's -- I'm sure you're familiar who he is since he was the head of BARDA. So this concern or an issue from his job because he protested widespread use of hydroxychloroquine, are you familiar with that? Do health experts feel they are able to speak publicly or to speak out in opposition to the President?

FAUCI: Here I am.

Yeah.

FAUCI: So you don't feel like there's any concern among --

FAUCI: No. No.

-- people at the NIH right now or in the public health community?

FAUCI: At the NIH, absolutely not.

Dr. Fauci, knowing Dr. Bright and knowing what his gifts are as one of the country's leading scientists, is he better suited at NIH rather than BARDA? What's he going to be doing with you?

FAUCI: What is he going to be doing at the NIH?

So, first of all, are his gifts best suited to work with you rather than BARDA?

FAUCI: No, I -- I can't -- I don't really think I can comment on somebody's relative gifts. But he's going to be responsible, from what I hear -- again, this is what I've heard -- the development of diagnostics, which is very, very important.

NIH is going to be involved in trying to develop new-generation diagnostics, which we feel of being able to facilitate the kinds of things that now are sometimes problematic.

Are you concerned at all that he --

PRESIDENT: And why did you say that he has great gifts or gifts? What, do you know him?

Well, that's his expertise. I mean, I'm just looking at his résumé.

PRESIDENT: No, no, but have you reviewed him? Have you -- have you studied him? Have you reviewed his gifts. I mean --

He's worked his entire career developing vaccines, including the --

PRESIDENT: Well, that doesn't mean you have gifts. I know a lot of people, they play baseball Leagues.

Well, he helped develop the flu vaccine last year.

PRESIDENT: No, no, but you talk about his great gifts.

ahead, please.

Mr. President, thank you.

PRESIDENT: Please, go ahead. You can go. Please.

Thank you, sir. I have two questions, one for myself and then one for a colleague of ours with distancing.

PRESIDENT: From where? From where?

I'm with USA Today. First, the executive director of the National Association of Counties said today to see money for local -- state and local governments in the latest COVID assistance package.

PRESIDENT: And they didn't want to say what? What does that mean? Tell me.

I'm sorry?

PRESIDENT: What does it mean? Repeat it. Say it a little differently.

The executive director of the National Association of Counties said today that the White House put local governments into the latest COVID assistance package.

PRESIDENT: Oh, really? That's interesting -- is he a Democrat?

I do not know, sir.

PRESIDENT: Well, check it. How can you ask those questions without knowing?

Okay. Well -- but what --

PRESIDENT: Check it out. You'll find out.

I'll check it out. But he says --

PRESIDENT: Okay, what's the next question?

His question was --

President: You know, the numbers -- you know, the money we put into states, local governments responsible for their own finances. But you check it out. Go ahead. What's the next --

Well, his point was -- he said that you felt like that this would somehow be a disincentive correct about that?

PRESIDENT: How would he know what I felt? I never spoke to him. I don't even know who he is I'm asking you, sir.

PRESIDENT: You don't know who he is either.

Yes, his name is Matthew Chase, sir.

PRESIDENT: Okay, it doesn't help me, and it doesn't help you.

go ahead, Jeff.

Mr. President, also a follow-up --

PRESIDENT: Do we want to keep going a little while longer or no?

Yes. Yes.

PRESIDENT: You're not going to say, "Oh, he took questions all night long"?

No, sir.

PRESIDENT: Okay? Right?

Yes, please. Thank you.

PRESIDENT: Okay, well, good. How many questions can you ask? Go ahead.

Also --

PRESIDENT: We -- we all have fun, because we're talking about something very important.

main thing is I think we're getting to a lot of solutions. We never want this to happen again what happened. And if it should come back in some form, we want to snuff it out very quickly.

I personally hope it doesn't come back in the fall as a combination of the flu or not as a combination. I've learned a lot. And, you know, some of these questions are good. Some of them are ridiculous. I think some of them are very important questions. Very important. You know, when you asked Dr. Fauci to speak, I'll let anybody speak. And we love him.

's go.

Mr. President, Senator -- Senator McConnell said today that he would prefer to see states take on more bankruptcy, rather than taking on more --

PRESIDENT: I -- I heard he said that.

-- federal bailout money.

PRESIDENT: I don't know -- I don't know what he said. I'll have to call him and ask him.

That's what he said.

PRESIDENT: Well, that's okay. I'm going to have to look at it directly.

Would you agree with him on that? Or --

PRESIDENT: I can't tell you that. I have to see -- I want to base it on fact and reason. I've seen how he said it and how he said it. I'd have to watch him say it. But some of the states are not doing phenomenally well. A state where Mike was governor, Indiana -- I looked at their numbers. The

doing.

states are doing fantastically well. Iowa is doing great. You have -- you have states doing doing well. We know the ones. I don't have to mention the ones that aren't doing well, but certainly they're coming back to talk to us. We'll see what happens.

Are you concerned -- are you concerned, sir, about the growing U.S. national debt as a result

PRESIDENT: Well, we have a choice. Do we have a choice? Yeah. I'm always concerned about even if we were attacked. This was an attack. This wasn't just, "Oh, gee."

this wasn't the flu, by the way. You know, they like to say the flu. Nobody has ever seen an attack. We were attacked. We had the greatest economy in the history of the world. We had the greatest any place. They will tell you that. I dealt with them for a long time, and they will tell you it in the last three years, three and a half years we built it.

then one day, they came and they said, "You have to close it." I said, "You got to be..." "They came to..." They came into my office -- into the Oval Office, and they said, "We have to close the Explain this to me." The greatest ever in history and we had to close it.

we're going to open it again, and we're going to be just as strong or stronger. But you have saved our airlines. We just, as you know, finished up with the airlines. We saved numerous that, two months ago, were having the best year they've ever had. Now, all of a sudden, they

was a great spirit today. You know, the fact is some of the governors are opening up their if you folks feel it. I feel it. There was a great spirit today. I don't know, the stock market a bit when I just walked out here.

I will say I feel much different today than I did two or three days ago, and I think the world feels that we're really leading a path of optimism. The European Union is having a lot of what's going on with the European Union; it's having tremendous difficulty.

we're going to be back, and we're going to be back stronger than ever. We're going to be at be look -- and they do; they look up to us. They want to know what are we doing. What are we with vaccines? We're going to have those answers too. We're going to have them, just like we taking care of -- and, already, as we said 100 times, we had more testing than any nation in those nations put together that we mentioned the other day -- all of them put together. And level that nobody has ever even seen before.

've never seen where we are right now. You don't have to build new machines. You don't have some of the labs are even upgrading to be able to double and triple their capacity, in one ever been. We're going to be bigger, better, and stronger than ever before. So I'm not concerned

you very much.

Treasury_Guidance_--_State,_Local,_and_Tribal_Governments_for_the_Coronavirus_Relief_Fund

April 22, 2020 at 7:45 PM EDT

To: david.postman@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the below announcement from the White House Office of Intergovernmental Affairs regarding Treasury's release of CARES Act guidance for State, Local, and Tribal Governments.

Today, Secretary of the Treasury Steven Mnuchin released guidance for State, Local, and Tribal Governments regarding the Coronavirus Relief Fund (Section 5001 of the CARES Act).

As stated by the [legislation](#) signed by President Trump on March 27, the use of funds “are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID–19).” The guidance document ([here](#)) and frequently asked questions ([here](#)) provide, in detail, examples of eligible and ineligible expenditures of the \$150 billion Coronavirus Relief Fund. You can find additional information about Assistance to State and local governments [here](#).

We will continue to share all relevant information as it becomes available.

Thank you,

White House Office of Intergovernmental Affairs

Coronavirus Aid, Relief, and Economic Security Act (CARES)

Following extensive negotiations between the Trump Administration and Congressional Leaders, President Trump signed the *Coronavirus Aid, Relief, and Economic Security Act (CARES)*. The \$2.2 trillion economic relief package provides American families, healthcare workers, and small businesses with the economic support they need to get

through this challenging time. This aid comes on top of the Family First Coronavirus Aid Package, enacted last month. State/Local/Tribal provisions include:

- \$150 billion in direct aid to State, Tribal, and local governments. Aid will be allocated primarily by a State's population with each State receiving at least \$1.25 billion.
- \$340 billion in additional emergency supplemental funding to combat the coronavirus outbreak.
- \$500 billion for loans and guarantees that authorize the U.S. Treasury to support eligible businesses and States and local governments to cover losses incurred as a result of COVID-19.
- \$100 billion for hospitals and health care facilities to reimburse expenses or lost revenues not otherwise reimbursed that are directly attributable to COVID-19.
- **\$3.5 billion** to allow States to expand childcare benefits for healthcare workers, first responders, and others on the frontlines of this crisis.
- Read more here: **[President Donald J. Trump Is Providing Economic Relief to American Workers, Families, and Businesses Impacted by the Coronavirus](#)**

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 26, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 25**, FEMA announced that more than \$5.1 million dollars in crisis counseling service grants have been made available to five states.
 - The grants, made to Massachusetts, Michigan, New Jersey, New York and Washington, will support programs providing free, confidential counseling to assist individuals through community-based outreach and educational services.
 - Due to the COVID-19 nationwide emergency and the need to protect the safety and health of all Americans, the crisis counseling will be delivered by phone,

internet and the media (including social media).

- As of **April 25**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.7 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.7 million surgical gowns, 793.8 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

FEMA_Advisory:_Disaster_Financial_Management_Guide
April 17, 2020 at 8:06 AM EDT
To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below, and attached fact sheet, from our partners in the Federal Emergency Management Agency (FEMA) regarding the release of a Disaster Financial Management Guide to assist communities in their COVID-19 response.

April 17, 2020

FEMA Advisory

Disaster Financial Management Guide

On Thursday, April 16, FEMA released the “Disaster Financial Management Guide” to support jurisdictions in establishing and implementing sound disaster financial management practices, which are critical for successful response and recovery. The guide takes an all-hazards approach and addresses a broad range of issues and contains concepts, principles and resources applicable to the coronavirus (COVID-19) pandemic response environment.

The guide identifies the capabilities and activities necessary to prepare and successfully implement disaster financial management while maintaining fiscal responsibility throughout response and recovery operations. This includes considerations and practices necessary to track, calculate and justify the costs of an emergency; support local reimbursement reconciliation; avoid de-obligation of grant funding; and effectively fund and implement recovery projects and priorities. The principles, concepts and resources contained in the guide can support jurisdictions in identifying the resources needed to support their community, increase the efficiency of recovery efforts, and reduce the likelihood of audits and financial penalties for the jurisdiction.

To view the guide, please visit <https://www.fema.gov/plan>.

Nitsch, Melissa A

RE: Marcos Orellana Pineda

April 14, 2020 at 12:29 PM EDT

To: Sanchez, Alejandro (GOV)

Alejandro,

Unfortunately, I'm unable to provide any case updates on this individual without a signed privacy waiver.

On a separate note, I wanted to make sure you were aware of our website, which is tracking all developments related to the COVID-19 impacts on agency operations, detainee care, etc. The information is reviewed and updated frequently. I'm sure you are receiving inquiries from the public, so please feel free to share if it is helpful: <https://www.ice.gov/coronavirus>

Thank you,

Melissa Nitsch

Subject: Marcos Orellana Pineda

Hello, Officers Berg, Williams, and Muirhead:

I am writing you today on behalf of Marcos Orellana Pineda. As I understand it, he is currently detained at the Northwest ICE Processing Center, having travelled to the United States as a human trafficking and domestic survivor. Furthermore, Mr. Pineda has pending applications for Special Immigrant Juvenile

Status and asylum, no arrests or criminal record, and a guardian, Ms. Kathleen Goforth, ready to take him into her care. Lastly, I have read the many letters, submitted on his behalf, from legislators and others and see that he has broad support from his community.

For these reasons, I respectfully request that you give full and fair consideration to his case. I also ask that, in accordance with the privacy waiver attached to this email, you provide me with updates as appropriate.

Best regards,
Alejandro

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_10

April 10, 2020 at 5:17 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Beginning **April 10**, HHS and FEMA will work with states with federal Community-Based Testing Sites to clarify whether sites want to continue as they are now, or transition to full state control.
 - Under state control, CBTS sites would still receive technical assistance from the federal government and be able to request supplies through the normal FEMA systems.
 - Leadership at both HHS and FEMA will consider approving extension requests by states that need additional federal assistance to manage and operate sites. A formal notice to continue must be submitted to the CBTS Task Force Leader,

- by either the state's Governor or his or her representative, no later than April 9.
 - The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.
 - After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.
 - States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share.
 - To date, Community Based Testing Sites have screened over 85,000 individuals.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- On **April 8**, HHS, through the Health Resources and Services Administration awarded more than \$1.3 billion to 1,387 health centers. These centers will help communities across the country detect coronavirus; prevent, diagnose, and treat COVID-19; and maintain or increase health capacity and staffing levels to address this public health emergency.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

Possible Check in Coordination Call with Governor Inslee and FEMA Region 10 Administrator

April 08, 2020 at 6:54 PM EDT

To: Stacey.tichenor@gov.wa.gov

Cc: Ward, Erin, Keelan, Kayla

Hi Stacey,

I am so sorry it has taken so long to get back to you. I appreciate all the work you do and for your call.

We are now looking at possibly Friday or Monday for a potential half-hour call with Governor Inslee and the FEMA Region 10 Administrator Mike O'Hare. Would the Governor have any availability on Friday, April 9 after 2:30? Or possibly Monday, April 13 any time after 11:00 AM?

A draft agenda is below:

Purpose of the Call

Opportunity to discuss COVID-19 ongoing operations, needs and issues.

Agenda

Welcome and Roll Call

- FEMA Intergovernmental Affairs

Opening Remarks

- FEMA Region 10 Administrator
- Washington Office of Emergency Management Director

Open Discussion

- Updates
- Needs/Issues/Questions

The following people will be available to answer questions:

- FEMA Region 10 Administrator
- Washington Office of Emergency Management
- Department of Health and Human Services
- U.S. Small Business Administration
- Department of Defense
- FEMA Recovery Division

Closing Remarks

- FEMA Region 10 Administrator

Thank you again for your help,

Betty

Subject: Call with Administrator Gaynor and Governor Inslee

CAUTION: This email originated from outside of DHS. DO NOT click links or open attachments unless you recognize and/or trust the sender. Contact your component SOC with questions or concerns.

John and Brian:

Governor Inslee would like to speak with Administrator Gaynor today to discuss the urgent need for the USNS Mercy to be deployed to the Puget Sound area to address the deteriorating situation in Washington State.

Enclosed, please find letters transmitted last night to the President, Vice President and Secretary Azar laying out this urgent need. With each day that passes, the number of available physicians and nurses in Washington decreases as illness and fatigue take their toll, and our already low number of available hospital beds continues to shrink, leaving us unable to meet current and projected patient needs from COVID-19 and other acute and subacute patients. With our rural hospitals facing increasing challenges and our medical system facing a growing shortage of health care personnel, it is clear that no state on the West Coast needs the capacity provided by the Mercy as soon and as greatly as Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.999.0155 with any questions.

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Hey Nancy.
Hope all is well and yesterday's SBA question is resolved.

Next Tue at 11:00 (planned time) we're hosting a Congressional Briefing for the WA delegation. From the feds, we'll have FEMA (Regional Administrator), HHS (Capt John Smart), SBA (Regional Director and/or Disaster Program Leader), and DoD (Defense Coordinating Officer). We'd like to also include WA EMD (Dir Ezelle) and, if appropriate, the Gov's office. Cam is leading our side of the effort. Do you have a few minutes to connect sometime this afternoon or tomorrow?

Thanks!

Ryan Ike
Director | External Affairs Division | Region 10

Subject: SBA COVID19 Disaster Loan Program Open for Applications

Good Day,

We are pleased to share that the Disaster Declaration has been issued for most of Washington in support of COVID19. The disaster declaration makes SBA assistance available in Adams, Asotin, Benton, Chelan, Clallam, Columbia, Franklin, Garfield, Grays Harbor, Island, Jefferson, King, Kitsap, Kittitas,

Klickitat, Lewis, Lincoln, Mason, Okanogan, Pacific, Pierce, San Juan, Skagit, Skamania, Snohomish, Spokane, Thurston, Wahkiakum, Walla Walla, Whatcom, Whitman and Yakima counties in Washington; Benewah, Latah and Nez Perce counties in Idaho; and Gilliam, Hood River, Morrow, Sherman, Umatilla and Wasco counties in Oregon.

Applicants may apply online, receive additional disaster assistance information and download applications at <https://disasterloan.sba.gov/ela>. Applicants may also call SBA's Customer Service Center at (800) 659-2955 or email disastercustomerservice@sba.gov for more information on SBA disaster assistance. Individuals who are deaf or hard of hearing may call (800) 877-8339. Completed applications should be mailed to U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR ALL APPLICATIONS THE FOLLOWING ITEMS MUST BE SUBMITTED. For your convenience, we've attached several of these documents so you will have the information gathered prior to going to the loan portal.

- Loan application (SBA Form 5), completed and signed (this is electronic/online in the portal) but we've attached here so you can see what information is asked prior to going to the portal.
- Tax Information Authorization (IRS Form 4506-T), completed and signed by each applicant, each principal owning 20 percent or more of the applicant business, each general partner or managing member; and, for any owner who has more than 50 percent ownership in an affiliate business. Affiliates include, but are not limited to, business parents, subsidiaries, and/or other businesses with common ownership or management - Also attached here.
- Complete copies, including all schedules, of the most recently filed Federal income tax returns for the applicant business; an explanation if not available
- Personal Financial Statement (SBA Form 413D) completed, signed, and dated by the applicant, each principal owning 20 percent or more of the applicant business, and each general partner or managing member
- Schedule of Liabilities listing all fixed debts (SBA Form 2202 may be used)

Additional Information on SBA's regular loan programs

- 1) [Lender Match](#) is an SBA site to introduce applicants with SBA lending partners utilizing our regular loan products.
- 2) If you have an existing SBA Guaranteed Loan, I recommend you contact your lender. Through SBA's regular policies, SBA participating lenders have some servicing flexibilities where they may be able to work with you on payment deferments, loan modifications, etc. It's also a good idea to reach out to any conventional financing lenders because they may be able to make similar concessions as SBA guaranteed loans, dependent upon bank policies.
- 3) In addition to traditional commercial lenders, we also have microlending partners where loans offered range from \$500 to \$50,000. SBA provides funding to these organizations who then re-lend this money to qualified small businesses. The microloan program may be a fit for relatively

small financing needs or in instances where a loan applicant is having difficulty obtaining financing from a traditional lender. The active SBA microlenders in the area include: [Business Impact Northwest](#), [Ventures](#) and [MercyCorps Northwest](#).

- 4) SBA partially funds several technical assistance partners to provide pro-bono, one on one personalized counseling services. To name a few:
- Small Business Development Center networks in both Washington and Idaho. The Washington Small Business Development Centers are throughout Washington <https://wsbdc.org/> and Idaho SBDCs located in Lewiston and Coeur d'Alene <https://idahosbdc.org/>
 - SCORE has several chapters across Washington. In western Washington, the Greater Seattle Chapter serves King, Snohomish, Kitsap, Jefferson, Clallam and Island Counties <https://seattle.score.org/> while the Tacoma Chapter serves Pierce, Thurston, Lewis, Mason, Grays Harbor and South King counties. <https://tacoma.score.org/>
 - We have three Women Business Centers across Washington. In western Washington, the Washington Womens Business Center located in Seattle <https://businessimpactnw.org/washington-womens-business-center/> and the Washington Center for Women in Business located in Lacey <https://wcwb.org/>
- 5) Of course, our [local SBA website](#) has a wealth of information, including our office directory and training opportunities. The [Resource Guide](#) is published for SBA and contains numerous contacts for resources, including state agencies, that maybe helpful as we learn more about the concessions being offered to small businesses.

Always feel welcome to contact me or call our customer service line at 206.553.7310 for more information.

Warm regards,

Kerrie Hurd

FW: Testing Call with White House and Governor

April 24, 2020 at 2:15 PM EDT

To: Ike, Ryan

Cc: Biasco, Lon, Manner, Timothy, Baumgart, Jim (GOV)

Ryan,

Jim Baumgart will be representing the Governors office for this call.

jim.baumgart@gov.wa.gov

Take care

Stacey McClain

State Coordinating Officer (SCO)

Governors Authorized Representative (GAR)

Washington Emergency Management Division

20 Aviation Drive | Camp Murray, WA 98433

Office: (253) 512-7071 | Mobile: (253) 312-8291

Stacey.McClain@mil.wa.gov | www.mil.wa.gov

Good morning,

FEMA is coordinating state calls on behalf of White House Intergovernmental Affairs and the Office of Policy Coordination. Your participation is requested on a call this **Saturday, April 25 from 10:00 to 11:00am PDT** to discuss COVID testing. This call is for senior health officials to discuss plans to increase testing capacity, surveillance (including surveillance in high risk settings) and contact tracing.

A calendar invitation with call-in information will follow shortly. Questions that are going to be asked will be provided so you can prepare responses.

Call Participants

Federal Government:

CDC Technical Lead

FEMA Regional Administrator – Mike O’Hare

HHS Regional Director – CAPT John Smart

White House Task Force POC – Dr. Birx

White House Intergovernmental Affairs

Indian Health Service – CAPT Tom Weiser

Others as interested

State Government:

State Health Officer – John M. Wiesman

Lab Director – Brian Hiatt

Epidemiologist – Scott Lindquist

Public Health EM – Clark Halvorson

Emergency Management Director – Robert Ezelle

Governor's Office

State Econ Development

Others as interested

Please let me know if you have any questions.

Mike

FEMA-IGA

CORRECTION: FEMA Stakeholder Advisory: State/Tribal-Managed, Federally-Supported COVID-19 Response Continues

March 24, 2020 at 1:03 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 24, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

State/Tribal-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing

to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

DHS_Announcement:_Important_Message_on_Essential_Financial_Services_Sector_Workers_-_From_
U.S._Treasury_Secretary_Mnuchin

March 22, 2020 at 7:13 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

On behalf of U.S. Treasury Secretary Mnuchin, please see an important message regarding financial service sector guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

A message from U.S. Treasury Deputy Assistant Secretary for Cybersecurity and Critical Infrastructure Protection David B. Lacquement:

Workers across the financial services sector play an important role in supporting the American people and our Nation's economy. Consistent with the need to ensure access for essential financial services workers, Secretary Mnuchin issued the attached memorandum. This memorandum points to guidelines from the President and the Department of Homeland Security, which provides guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

Everyone should follow guidance from the Centers for Disease Control and Prevention as well as State and local officials regarding strategies to limit disease spread. We are dedicated to working closely with all of you to ensure the safety of the workforce and ensure the continued operations of the financial services sector in support of our Nation's economy.

Thank you for your continued support.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_20

April 20, 2020 at 4:52 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 20, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 19**, FEMA, HHS, and the private sector combined have coordinated the delivery of, or are currently shipping: 57.4 million N95 respirators, 77.9 million surgical masks, 6.2 million face shields, 11.9 million surgical gowns, 587 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and

- commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA from April 1st – 14th through Project Airbridge and the commercial supply network.
 - The U.S. has now tested 4.18 million people, which is more total tests than the following nations combined: France, the United Kingdom, South Korea, Japan, Singapore, India, Austria, Australia, Sweden, and Canada.
 - As conveyed by Dr. Anthony Fauci and Admiral Brett Giroir, there is enough testing capacity for states to move into phase one of reopening when they choose to do so.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - President Trump and Vice President Pence are working closely with Governors to review what more they can do to develop locally tailored testing strategies.
 - HHS and FEMA continue to provide federal support to state run testing.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - FEMA and HHS have centralized best practices and lessons learned to help medical practitioners, emergency managers, and other stakeholders learn from each other's approaches.
 - The [FEMA Coronavirus Emergency Management Best Practices](#) page contains resources for all levels of government, private sector, academic institutions, professional associations, and other organizations responding to the pandemic.
 - HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Department of Homeland Security _Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

March 13, 2020 at 4:14 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a [Notice of Arrival Restrictions](#) outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best

practices.

“While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.,” said Acting Secretary Wolf. “To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them.”

Wolf continued: “I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities.”

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th [presidential proclamation](#) which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

Subject: Re: Grocery supply chain FEMA call

Do we want to consider a press event with the governor, grocers and providers? JIC issued a release today on this topic that is already being picked up and we're ready to get a drumbeat of "save some for your neighbors" going. I'm happy to make an ask to the gov office if this feels like an important enough ask and effective use of his time.

Jaime

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center.

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed.

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

Office of Intergovernmental Affairs (IGA)

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

April 14, 2020 at 7:31 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding eligibility requirements for expenses incurred from the purchasing and distribution of food relating to COVID-19 response operations.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA [issued a new policy](#) that addresses the purchase and distribution of food eligible for Public Assistance funding under emergency and major disaster declarations for the COVID-19 pandemic.

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

FEMA Advisory: COVID-19 Daily Briefing Points (April 17, 2020)

April 17, 2020 at 3:20 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 17, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
 - Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.

- Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state’s entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

Baumgart, Jim (GOV)

FW: need some details on staffing numbers by skill set

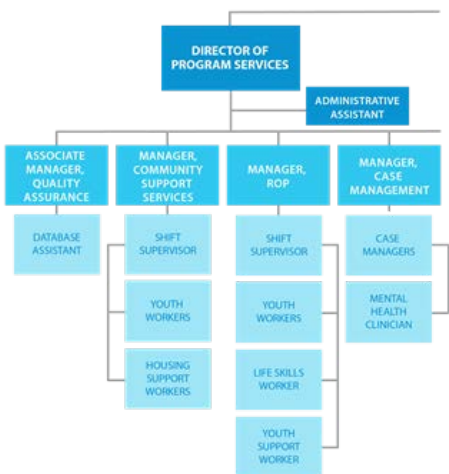

To: Wasserman, Adam R (MIL), Fordice, Justin

Cc: Robert Ezelle (Robert.Ezelle@mil.wa.gov)

Adam,

We got some answers back from April Putney at King County. While the data is a little light on the shelter, there is real good info in here email about what medical staffing would look like.

Here's what a typical shelter staffing model looks like:

Sincerely,
Jim

From: Putney, April <April.Putney@kingcounty.gov>

Sent: Monday, March 16, 2020 1:34 PM

To: Baumgart, Jim (GOV) <jim.baumgart@gov.wa.gov>

Subject: Re: need some details on staffing numbers by skill set

Hi Jim, here's more information.

For the 31/75:

- **The 71:** There is no specific credential to work in a shelter. People with social work or low-level medical (CNAs) medical backgrounds would be wonderful, but the tasks that we anticipate here are just staff to supplement Shelter providers once existing shelter staff either become ill or to operate new spaces to help “deintensify” existing shelters. People for this role just need to be ready to join existing operations and help them keep going.
- **The 35:** These are ideally higher-skilled supportive services people—either nurses, CNAs, social workers, or others with a background in social services. In these cases, we’re assuming that the County Workforce can (at least in the short term) fill the operational needs, but we will continue to need help with skilled work to help keep people supported and staying in I/Q settings. At the same time, if mid-skilled persons are not available, we’ll also take any type of person we can get.

For the AC/RC mass care facilities, we've since updated the numbers: the staffing request, per week, based on 12-hour shifts, for each AC/RC (with 6 planned, each with 400-person capacity) is:

- General non-clinical staff: 40 per site (240 total for 6 sites)
- Licensed Mental Health Practitioner: 8 (48)
- Unlicensed Mental Health Practitioner: 11 (66)
- Physician: 2 (12)
- Psychiatrist: 2 total (rotate between sites)
- Registered Nurses: 17 (102)
- RN Supervisors: 6 (36)
- Advanced Practice RN: 6 (36)
- Medical Director (physician): 1 (6)
- Medical Assistant: 6 (36)

April,

Hi and Happy Monday. We’ve ran the line at the state level at can’t find the resources so it’s going out to FEMA. Can you get me a skills set for the 106 pax for staffing at I/Q and also to reinforce existing shelter systems?

Thanks
 Jim

Hello Jim,

Thank you for following up. I am connecting you with April from the Exec's office and Leo Flor from King County DCHS. Leo was presenting the slide deck and April can also speak to your question below.

Thanks,
Lily

Lily,

Thanks for the phone call yesterday. Can you get me some details on slide 8? I'm working a staffing request and FEMA needs a bit more specificity to work it. It will also help when we send this out for contract.

As you note, we simply do not have the staffing expertise readily available within our volunteer or state workforce.

Jim

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 22, 2020

April 22, 2020 at 11:00 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 22, 2020

SUMMARY

- Across the region, governors work through plans and timelines for what reopening may look like.
- The Washington governor's plan to reopen the state hinges on mass testing, rapid response contact tracing, and keeping some mitigation measures in place until there is a vaccine.
- Increased testing has revealed outbreaks in a chicken processing facility and among some agriculture workers in Washington.
- In Oregon, there is discord regarding the governor's plan to reopen businesses – some elected officials push for reopening sooner than currently planned, studies indicate opening too soon may lead to more cases of COVID-19.
- Alaska's governor says some businesses—including some restaurants and retail stores—will be able to reopen on April 24, but the restrictions on travel will remain until May 19.
- Idaho works through reopening as some restrictions are eased, while elected officials and businesses push to reopen sooner than the governor's order.

Public Sentiment

- The Washington governor's plan to reopen sparked strong reactions; some applauded him for prioritizing health and data, while others feel the concerns and rights of those economically impacted by the closures are being ignored.
- Alaskans are happy about news that some businesses can begin to reopen, though they worry small businesses will not survive with the proposed restrictions.
- Idahoans resist stay-home orders by opening businesses, holding yard sales and taking down signs to closed playgrounds. Public reaction largely supports the order and worries about the spread of coronavirus from people gathering in public.
- While orders are being relaxed, there is an increased desire for more testing.

Washington

Updates from the Governor

- On Tuesday, Governor Inslee introduced his plan for reopening. ([press release](#), [policy brief](#), [Medium article](#))
 - It is unlikely many restrictions under the "Stay Home, Stay Healthy" order [will be modified](#)

[before May 4.](#)

- Inslee says [elective surgeries, outdoor recreation and some construction could restart](#) as Washington begins to recover from coronavirus.
- It will be gradual: "Depending on health projections for the spread of the virus, some distancing restrictions may be in place for weeks or months to come." ([Medium](#), [King 5](#))
- To reopen, the state [needs to scale from 4,000 tests per day to 20-30,000](#) tests per day, and referenced a [letter](#) to Pence calling for strong national testing system—requesting federal assistance to develop a robust national testing system to enable a safe return to public life.
- The governor hopes to have [1,500 workers focused on contact tracing](#) by mid-May.
- The governor will [appoint three leadership groups](#) to advise on public health, economic recovery, and social support.
- In response to the announcements, many people applaud the governor for prioritizing safety and data. There is significant frustration over the decision among those who are unable to work, and general concern that the plan does not do enough to save the economy. Many people think that the state cannot wait until a vaccine to lift all restrictions. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#))

Reopening

- State lawmakers from Clark County outline their own plans to re-open economy. "To the people employed by small businesses I would contend that all business is essential," one Senator says. ([Clark County Today](#))
- A U.S. Congresswoman and the Vancouver mayor call on Governor Inslee to allow a back-to-work demonstration project to begin re-opening the economy by conducting rapid saliva tests on residential construction industry workers in Southwest Washington. ([Clark County Today](#))
 - In response, some people are concerned over the requirement that workers take a test before returning to work, and want confirmation that it is voluntary. ([example](#))
- Commissioners ask Inslee to lift restrictions on construction, evictions, and fishing in Cowlitz County. ([The Daily News](#))
- Seattle will reopen 5 library bathrooms during coronavirus pandemic, to better meet some of the hygiene needs of the more than 3,500 people living unsheltered in the city. ([Seattle Times](#)) Most people respond with concern for library staff, and the impacts to security and cleanliness in the buildings. ([example](#))

New Cases

- Coronavirus might force closure at a Tyson plant after 100 workers test positive. ([KEPR](#), [YakTriNews](#))
- Stemilt, an agricultural services business, detects 36 coronavirus infections among East Wenatchee fieldworkers. ([NCWLife](#))

Economic Relief

- Washington opens no-barrier cash assistance for those without access to other programs. Now those without citizenship or a Social Security number can apply for help from the state during the coronavirus crisis. ([The Olympian](#), [The Daily Chronicle](#), [The News Tribune](#), [Tri-City Herald](#))
 - Most of the reactions to this news are negative, with many expressing frustration that citizens in Washington are still struggling to access aid. ([example 1](#), [example 2](#), [example 3](#))
- Seattle Times Co. gets nearly \$10 million in federal coronavirus aid in the face of a sharp drop in advertising revenue due to the COVID-19 pandemic. ([Seattle Times](#))
 - Reaction is split, with some people happy for the newspaper, and others saying the funding should have gone to a smaller business. ([example](#))
- Inslee bans utilities from cutting off water, energy and phone service to homes during coronavirus crisis. ([Seattle Times](#))

Testing

- Seattle's first walk-up testing site will open in Rainier Beach. The site was chosen by University of Washington in response to a realization that there were limited testing options for minority communities. ([South Seattle Emerald](#))

"Stay Home, Stay Healthy" order

- Tri-Cities car wash opens despite WA governor's stay-at-home order for coronavirus. The car wash is providing a free car wash to any first responders or medical personnel through

the end of April. ([Tri-City Herald](#))

Oregon

Reopening

- Brown's plan to reopen Oregon: 'At least it offers hope'. ([KOIN](#))
- Some states are ready to reopen, but Oregon health experts say it's too soon. ([KATU 2](#))
- Multnomah Co. Republicans petition Oregon Gov. Brown to repeal stay-at-home order. Party leaders called Oregon's stay-at-home order "illegal and unconstitutional," noting the economic impact it has had on the state and that the hospitals are not overwhelmed. However, a county health official responded to this stating that some models show that the health system will be overwhelmed if precautionary measures are lifted quickly. ([KATU](#))
- White House: Oregon among bottom 4 states in COVID-19 testing. According to the White House coronavirus task force, Oregon is able to test fewer than 30 in 1,000 people a month. ([KGW](#)) Several people blamed the Governor for tight restrictions on testing, while some applauded her stating that Oregon's low numbers were because of the early precautions taken. ([Facebook](#))
- New details leaked from the Governor's Office on reopening Oregon. ([The Oregonian](#), [Statesman Journal](#), [KGW8](#), [FOX26](#)) Responses have been broad, with some calling for reopening rural areas ([example](#)) to concern about reopening too soon.

Federal Response

- Oregon lawmakers demand natural disaster plans amid COVID-19 pandemic. ([KOBI 5](#))
- Portland Mayor Ted Wheeler is saying the city will receive \$114M, from the federal government, and is waiting for guidance on how to use it. ([KOIN](#))

Business

- Portland companies Keen and Dhavani pivot production lines to make masks. ([KGW8](#))
- Sporting wear company furloughs 52 employees in Coburg, Oregon, due to COVID-19 pandemic. ([KVAL](#))

Flattening the Curve

- Two Oregon surfers face trespassing charges after hopping fence for sweet waves. ([Willamette Week](#), [Statesman Journal](#))
- St. Charles Bend has no COVID-19 patients for first time in 6 weeks. ([KTVZ](#))

Preparedness

- Oregon is bracing for an early wildfire season that could be made tough due to COVID-19. ([KVAL](#), [KATU2](#))

Oregon Tribes

- Confederated Tribes of Warm Springs published a notice warning that anyone who attended the Salmon Feast in Celilo may have been exposed to coronavirus. ([Facebook](#))

Idaho

Stay-Home Order

- Meridian woman arrested during protest after refusing to leave a closed playground ([KTVB](#), [Meridian Police](#), [Idaho Statesman](#), [Idaho News 2](#)) Reactions support police, and point out that this was a planned event. ([example 1](#), [example 2](#), [example 3](#), [example 4](#))
- Officials won't act as Idaho business reopens in violation of Little's stay-home order ([Idaho Statesman](#))
- 'Hopefully others follow suit': Nampa bar plans to open despite Gov. Little's stay at home order ([KTVB 7](#))

Economy

- Lt. Gov. McGeachin urges Gov. Little to reopen all businesses in Idaho by April 30 ([KTVB 7](#)) Reactions vary with some support for the Lieutenant Governor, and many disagreeing. ([example](#))
- In response to the Support Local Gems campaign set for Friday, people point out that without an income, it's hard to participate. Many call for reopening all businesses. ([example](#))

Testing

- St. Luke's increases testing for COVID-19 ([Idaho News 6](#))

Medical Capacity

- St. Luke's reassigns staff to help fight coronavirus ([KTVB](#))

School

- Centennial High seniors are cheered as they collect their caps and gowns during COVID-19 crisis ([Idaho Statesman](#))
- Indian Creek Plaza Offers to Hold Senior Proms for Class of 2020 ([LITE 107.9](#))

Donations

- Chobani to send a 'truck-a-day' to food banks across the U.S. ([Idaho News 2](#))

PPE

- Nampa sign company makes sneeze guards to help businesses ([Idaho News 2](#))

Alaska

Reopening

- The Governor of Alaska held a press conference Tuesday evening with updates on reopening the economy, stating Alaska's "numbers are lowest in the country" and that the State would do everything to keep it under control. Precautionary measures will stay in place going forward, however, beginning Friday, April 24, restaurants with limited dine in service, retail stores, personal stores and other non-essential businesses in the State of Alaska will be able to open. The majority of these businesses will be able to open at a 25% capacity. International and interstate travel will remain limited until May 19, but will be evaluated weekly. Social distancing guidelines will remain in place, with a cap of 20 people for gatherings. When asked how the 25% capacity would be enforced, he stated it would be dealt on an individual basis. Additionally, the State is expecting a large order of PPE in the coming week. ([Anchorage Daily News](#))
 - Most people were happy about the reopening of the economy, while several questioned if businesses could stay afloat at reopening with a 25% capacity. ([example](#))
 - The State is in coordination with the Municipality of Anchorage, which will be delaying be reopening until Monday, April 27.
 - In an interview on reopening Alaska for business, the Governor stated local elected officials in communities that were more isolated would be able to determine their own reopening standards. ([Breitbart](#))

Flattening the Curve

- Alaska Airlines Center transformed into an alternate care site that officials hope never to use. ([Alaska Daily News](#))
- Fairbanks is beginning to flatten the curve but cannot go back to normalcy yet. Despite Fairbanks having no new positive cases for a week, officials warn prevention strategies still need to be maintained. ([Web Center 11](#))

Economy

- Girdwood Forest Fair is cancelled because of coronavirus concerns. ([KTUU](#))
- For Anchorage grocers, long days, shortages and tough choices during the coronavirus crisis. Anchorage area grocers discussed their struggles, from providing their workers with homemade masks to worrying about shortages, during the pandemic. ([Anchorage Daily News](#))
- Economic road map provides 'bit of hope' for Anchorage businesses. ([KTUU](#))

COVID-19 FEMA National Hot Issues & Social Listening Reports April 26, 2020

April 26, 2020 at 6:48 PM EDT

To: Undisclosed recipients:

Good afternoon.

We are on break from our reporting schedule this weekend of social listening in the region, and will be back at it starting Monday morning. Attached is today's national hot issues and national social listening reports.

Below, you will find the section from the national listening report on observations for Alaska, Idaho, Oregon, and Washington.

Region 10

Alaska

- Alaska reported [no news cases of COVID-19](#) yesterday.
- In Anchorage, the [Dimond Center shopping mall will reopen](#) Monday after being closed for a month.
- The governor plans to use \$300 million in federal funding to provide [relief to small businesses](#).
- Local media report [concerns about Alaska's reopening without widespread testing](#) in place first.

Idaho

- The mayor of Nampa warned businesses that the [city will enforce health guidelines](#) as businesses begin preparing to reopen.
- Despite court orders halting evictions, some residents of Boise still report [getting kicked out of their homes](#).
- The lieutenant governor [said stay-home orders should not be mandatory](#) at a rally to reopen the state.
- Local media report on measures being taken by [Mountain Home Air Force Base](#) to protect airmen, staff, and families.
- A Boise car dealership is [offering free short-term leases](#) to families and individuals in need.
- A potato farmer, unable to sell his potatoes, [offered them for free to the public](#).

Oregon

- The governor provided [guidelines to re-open rural communities](#).
- In Albany, eight [workers have tested positive at the National Frozen Food Corp plant](#). The food plant has closed and is undergoing cleaning.
- Residents express [continued frustration with the Oregon Employment Department](#). Average wait times have increased to nearly two hours per call.
- Many Oregon [small business owners are facing a rent crisis](#), unable to make ends meet due to extended closures and restrictions.
- Doctors with the Oregon Health and Science University [designed a low-cost ventilator using 3D printing](#) technology. The team says that the [ventilators can be printed for as little as \\$10](#) by any hospital with a 3D printer. The ventilators run off oxygen tanks instead of electricity.
- The [Oregon Health and Science University](#) announced salary reductions amid estimates of \$1 billion losses due to COVID-19.
- A [drive-thru zoo has opened in Oregon](#) to offer family entertainment at a safe distance.
- [Baker County submitted a reopening plan](#) to the governor.

Washington

- The [governor is urging residents to obtain health insurance](#) through new measures created in response to the COVID-19 pandemic.
- Residents continue to express frustration with the state's [overwhelmed unemployment system](#).
- In Seattle, following an increase in complaints, a new [emergency order has capped food delivery](#)

[fees](#) at 15%.

- Thousands of [construction workers can return to work tomorrow](#), after the governor relaxed restrictions.
- [Seattle aims to close 15 miles of streets](#) to allow for physical activity and better social distancing.
- In Pierce County, local police report [criminals are using face masks to their advantage](#) to commit robberies and other crimes.
- More than 7,000 people have signed a [petition to return Washington's hairdressers to work](#).
- In Wenatchee, an [outbreak has been reported an orchard](#), with 36 staff testing positive so far.
- In Cowlitz County, four workers at the [Foster Farms meat processing plant](#) have tested positive.
- [The Seattle Opera will be able to rehire 180 workers](#) for a period of time due to a \$2.3 million federal relief loan.

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 4, 2020)

April 04, 2020 at 1:13 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 4, 2020

Coronavirus (COVID-19) Pandemic:

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed

Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
 - As of April 3, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
 - On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
 - Forty states, four territories and 12 tribes have issued stay at home orders.

Joint FEMA-CBP Statement on Export of Critical PPE

April 08, 2020 at 3:28 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the statement below from our partners in the Federal Emergency Management Agency (FEMA) and U.S. Customs and Border Protection (CBP) regarding a statement on the export of critical Personal Protective Equipment (PPE).

April 8, 2020

COVID-19 Update

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and U.S. Customs and Border Protection (CBP) are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported.

Follow Us

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

Media questions: [Chase Gallagher](#), King County, 206.263.8537

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 17, 2020

April 17, 2020 at 11:15 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 17, 2020

SUMMARY

- A debate has been sparked around whether or not to include Alaska Native corporations in the \$8 billion funds for coronavirus. Senator Chuck Schumer, Governor Dunleavy, tribal leaders, and members of the public all weighed in.
- The Boeing Co. announced Thursday it will resume all commercial airplane production in a phased approach at its Puget Sound-area facilities.
- Groups in Washington and Oregon prepare to protest restrictions, while a church group in Idaho intends to defy the governor's ban on gatherings.
- Alaska's governor says 'we're going to be charting our own course' on reopening the state.
- Idaho's governor says the state's plan to open the economy aligns with presidential guidelines.
- Oregon's governor says the state will waive waiting week for jobless claims, boosting workers' benefits by millions of dollars.

Public Sentiment

- As people in Idaho, Oregon and Washington prepare to protest stay-at-home orders, there is some support, but still more people express worry that gatherings could lead to a greater spread of the virus.
- People remain concerned about economic impacts caused by stay-at-home orders as eviction moratoriums are extended in Washington, and Oregon works to waive the one-week waiting period to access unemployment.
- In Idaho, the public largely supports the governor's extension of the stay-at-home order. Many call for the opportunity to return to work as they grapple with economic hardship.
- In response to the debate about over federal aid, many Alaskans agree that the funds should go to tribal governments, not corporations. Some defend Alaska Native corporations, not appreciating the interference from the lower 48 in Alaskan tribal affairs.

Washington

Updates from Governor Inslee

- Inslee expands eviction moratorium protections, extends to June 4. ([Seattle Times](#), [KOMO](#)) Additionally, the order prohibits landlords from threatening to add late fees or charges for non-payment, as well as charge rent for housing where a tenant's access to the unit was prevented by COVID-19.
 - While many people applaud the move, most feel that these actions are not solving the problem. They worry that this is creating a bigger problem for renters who will have to repay the debt later. Some people are concerned about the owners who have expenses on the property. ([example 1](#), [example 2](#))

Protests

- Protesters plan to gather in Washington's capital on Sunday to protest restrictions. ([The Independent](#), [New York Times](#), [The Reflector](#)) Most responses on Facebook are not supportive of the protesters, though some defend them. ([example 1](#), [example 2](#))

Hospitals

- Hours cut for Virginia Mason Memorial Hospital employees in Yakima. ([KIMA Action News](#))
 - People are confused and frustrated that they were told hospitals were being overwhelmed, but now hospitals are cutting staff. One comment mentions the change of plans for Yakima's Astria Regional Medical Center. ([Facebook](#))
 - Some are saying this is evidence that the pandemic was overblown by politicians and media. Many understand that the revenue loss is from postponing non-essential services. ([Facebook](#))

Economy

- The Boeing Co. announced Thursday it will resume all commercial airplane production in a phased approach at its Puget Sound-area facilities. ([Q13 FOX](#), [KOMO](#)) Starting next week 27,000 Boeing Commercial Airplanes workers will get back to work.
 - Many people are happy about the news, though there is concern that it will spark new outbreaks in communities that host Boeing facilities. ([example 1](#), [example 2](#))
- Seattle-area Sikh community leans on core values to help those in need during coronavirus pandemic. ([Seattle Times](#))
- Washington Congresswoman leads the charge to expand the Paycheck Protection Program by \$900 billion, after reports that the program funds were exhausted. ([Sen. Herrera Beutler's website](#)) In response, some people asked the Senator to help get Washington residents back to work instead, saying that only consumers can revive the economy. ([Facebook](#))

Farm Workers

- Farm worker unions sue Washington state for safer work conditions due to coronavirus. ([Bellingham Herald](#))

New Cases

- First grocery store worker in Puget Sound dies from COVID-19. ([KOMO](#))
- First coronavirus case reported at Hanford nuclear reservation. Thousands of workers to stay home longer. ([Tri-City Herald](#))

Oregon

Business and Unemployment

- Gov. Brown says Oregon eventually will waive 'waiting week' for jobless claims, boosting workers' benefits by millions of dollars. ([The Oregonian](#)) Responses mostly cite frustration. ([example](#))
- New jobless claims hit 53,800 in Oregon. ([KATU2](#))
- \$38M from CARES Act to support Oregon child care. ([KOIN](#))

Flatten the Curve

- Should stay-at-home restrictions be lifted for rural Oregon? ([KGW8](#)) Small communities seem hit harder. ([The Oregonian](#), [example1](#))
- Portland Parks and Rec cancels all outdoor movies, concerts this summer. ([The Oregonian](#)) People are disappointed by this news. Some expect a similar action in Washington. A suggested alternative is to copy New York and have a singalong from home. ([Facebook](#))
- Pandemic park rules abused by bolt cutters, graffiti. ([KOIN](#))

New Cases

- 6 more virus deaths in Oregon; total now 64. ([KGW8](#), [KOIN](#), [Statesman Journal](#))

Protests

- Conservative Protestors Plan "Reopen Oregon" Rally at State Capitol. ([Portland Mercury](#), [KATU2](#)) A popular response is that a divide is growing between those who can work and those who cannot. Many point out that showing up in a group could cause greater danger and spread the outbreak. ([Facebook](#)) There is [little support for the protest](#) in public comments.

Long-Term Care Facilities

- Portland long-term care facility failed to control the spread of COVID-19; there are now 50 confirmed cases and 14 residents have died. ([FOX12](#)) There are several comments from people familiar with the facility who say that it has not been properly run, and this was to be expected. ([Facebook](#))

Idaho

Stay-home order

- The President's newly released guidelines for phased opening of the economy align with Idaho's decisions and actions to overcome coronavirus. ([Governor Brad Little Facebook](#)) In the comments, reactions vary. Some say a phased, county-by-county approach could result in further spread of COVID-19. Some feel that the testing levels remain inadequate to make effective decisions. Many call out hardships caused by shutting down businesses.
- Opinion: I support Gov. Little's decision for Idaho stay-home order 100%. ([Idaho Statesman](#)) Penned by a former opponent of the governor, this business leader and driver behind the Crush the Curve campaign has received public support. Some respond that the economic impacts outweigh coronavirus impacts. ([Facebook](#))

Opening Up America Congressional Group

- [Senator Jim Risch](#): I am honored the President has asked me to serve on the Opening Up America Again Congressional Group. The COVID-19 pandemic has created two unprecedented challenges. We must find a way forward that mitigates both loss of life and loss of families' economic security as much as possible. There are no easy solutions to the challenges we face, but I am committed to working closely with my task force colleagues and the President to reopen the U.S. economy safely and quickly. ([Senator Jim Risch Facebook](#))

Testing

- Thousands of [COVID-19 and antibody tests](#) have been secured for Idaho residents according to local media.

Community Impact

- Idaho Humane Society opens pet food pantry for those impacted by COVID-19. ([Idaho News 6](#))
- A Boise hotel is set to become a refuge for the local homeless community stricken by COVID-19, enabled by local public-private partnerships. ([KTVB7](#)) There are strong reactions in support of and against the action. Some respond with satisfaction that this helps people in need, others see this as a way for the hotel to profit. ([Facebook](#))

New Cases

- Idaho officials reported on Thursday there are 390 recovered COVID-19 cases in Idaho. ([KIFI](#)) People are [happy to hear positive news](#).
- Community spread of COVID-19 detected in Jerome County ([Magic Valley Times-News](#))

Protests

- The Communion of Reformed Evangelical Churches will ignore isolation orders if not lifted soon. ([Moscow-Pullman Daily News](#), [Lewiston Tribune](#)) Most reactions [do not support ignoring the order](#).

Alaska

Updates from Governor Dunleavy

- Alaska's governor said that while the president has told governors they could begin reopening their states by May 1, 'we're going to be charting our own course.' ([Alaska Public Media](#))
 - Restrictions at nursing homes, hygiene measures, cleaning guidance, mask wearing, and continuing to stay 6 feet apart will remain in effect.

Tribes in Alaska

- A debate has been sparked around whether or not to include Alaska Native corporations in the \$8 billion funds for coronavirus.

- Tribes want to exclude Alaska Native corporations from \$8 billion coronavirus fund. One Alaskan tribal leader says the Native corporations don't have governmental responsibilities, and should receive the relief set aside for businesses not for governments. Alaska's Congressional delegation says the CARES Act clearly says Alaska Native Corporations are eligible for that money, too. ([Alaska Public Media](#))
- Alaskan politicians and Sen. Chuck Schumer debate whether for-profit Alaska Native corporations should receive coronavirus relief cash. ([Anchorage Daily News](#)) Alaska's Governor to Senator Schumer: "I am appalled that you would consider excluding our Alaskan Native entities." ([Governor Dunleavy Facebook](#))
- In response to the debate, most people on Facebook seem to agree that the funds should go to tribal governments, not corporations. Some defend Alaska Native corporations, not appreciating the interference from the lower 48 in Alaskan tribal affairs. ([example 1](#), [example 2](#), [example 3](#))

Economy

- Alaska Delegation Welcomes \$124 Million in CARES Act Grants for Alaska's Airports. ([Senator Sullivan's website](#))
 - [Senator Dan Sullivan](#): "Airports are the only link to the outside world for so many of Alaska's remote communities, the gateway for people and vital goods, including food and medical supplies."
 - "This ... is the most money invested in Merrill Field in the last five years, if not ever," according to the manager of one of Anchorage's airports. ([Anchorage Daily News](#))
 - Many people are unhappy to see large amounts of funding go to airports when individual Alaskan's are struggling. Some hope that the airports manage the funds wisely to increase the level of service, and do not raise customer rates. Some others are grateful for the federal investment in Alaska's infrastructure. ([example 1](#), [example 2](#))

New Cases

- Yesterday marked the fifth day where no new cases had been reported in the Fairbanks, which was previously considered Alaska's hotspot. ([KTVF11](#)) People [applaud the good news](#) from Fairbanks.
- Total cases of COVID-19 in Alaska hit 300. ([KTUU](#))

PPE

- The Alaska Native Tribal Health Consortium addresses mask shortage with mobile sanitizing unit. ([KTUU](#)) A diverse team of medical staff, engineers, architects, environmental health and safety professionals and laborers all got to work planning and building the unit.
- High school mask maker wants to make a difference during pandemic. ([The Cordova Times](#))

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 8, 2020)

April 08, 2020 at 5:30 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 8, 2020

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into

distributors' normal supply chain to their customers in other areas nationwide.

- HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
- This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

Office of Public Affairs

WEEKLY UPDATE: DHS RESPONSE TO COVID-19

WASHINGTON - The Department of Homeland Security's efforts across its components last week have facilitated a speedy, whole-of-government response to confronting COVID-19 and slowing the spread to keep Americans safe. FEMA is leading the way by carrying out an approach that is locally executed, state managed, and federally supported.

"Protecting both the health and national security of the American people continues to be the top priority for the Department of Homeland Security," said Acting Secretary Chad F. Wolf. "I want to thank the men and women of the DHS workforce for their resilience as they put themselves at risk every day to protect the American people."

Below is a list of some of DHS's efforts against COVID-19 last week:

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

Total Obligations to States. As of April 5th, FEMA has obligated nearly \$4.1 billion in support of COVID-19 response efforts.

Project Air-Bridge. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge:

- From March 30th to April 5th, 10 flights arrived to the U.S with critical supplies.
- The cargo moved so far totals almost 83.5 million gloves, almost 5 million surgical masks, and 1.2 million gowns.
- Upon arrival, the PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization is given to hospitals, health care facilities, and nursing homes around the country.
- 23 additional flights are currently scheduled through April 18.

Ventilator Distribution. FEMA is distributing ventilators to hard hit states. From March 30th to April 4th, FEMA and HHS delivered ventilators from the Strategic National Stockpile to Michigan, New Jersey, Illinois, Connecticut, and Louisiana.

CUSTOMS AND BORDER PROTECTION (CBP)

Keeping Critical Cargo and Trade Moving. CBP continues to process commercial cargo. Approximately \$21B worth of goods crossed back and forth over the borders of U.S, Mexico, and Canada from March 30th to April 5th .

Working to Reduce Illegal Entries. CBP agents encountered nearly 4,200 migrants crossing illegally at the U.S. Southern border daily, compared to nearly 10,000 encounters daily prior to the current containment efforts.

Facilitating Critical PPE Deliveries. CBP lifted a Withhold Release Order that had barred importation of disposable rubber gloves which our health care workers and law enforcement personnel so desperately need right now.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Working with the Department of State, ICE continues to bring Americans home on the return leg of removal flights to Central America. As of April 5th, ICE has flown 853 U.S. citizens and legal permanent residents home on removal flights from Colombia, El Salvador, Honduras, and Nicaragua since the first flight on March 22.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Air Travelers Secure. Due to the pandemic and travel restrictions, TSA continues to screen a significantly reduced number of passengers. From March 27th to April 2nd, TSA successfully screened 1,124,145 travelers ensuring individuals reached their destinations safely.

CYBERSECURITY AND INFRASTRUCTURE SECURITY AGENCY (CISA)

Essential Critical Infrastructure Workers. CISA recently updated its list of essential critical infrastructure workers. As of April 5th, 20 states and territories have published Essential Business Designations.

Election Security Work Continues. CISA coordinated calls between the election community and the United States Postal Service (USPS) and Centers for Disease Control (CDC) to ensure that election officials have the most up to date information and advice from the experts at these agencies regarding COVID-19.

Helping the Private Sector Assess Risk. CISA released a guide titled Risk Management for Novel Coronavirus to assist executives in thinking through physical, supply chain, and cybersecurity issues that may arise from the spread of COVID-19.

UNITED STATES COAST GUARD (USCG)

Facilitating the Offload of Cruise Ships. On April 2nd, the Coast Guard facilitated the offload of more than 1,200 passengers from cruise ships Zaandam and Rotterdam in Port Everglade, FL after it was reported that crewmembers and passengers were infected with COVID-19.

U.S. CITIZENSHIP AND IMMIGRATION SERVICES (USCIS)

Making Extensions for Employment Authorization Easier. On March 30th , U.S. Citizenship and Immigration Services announced that it will reuse previously submitted biometrics

in order to process valid Form I-765, Application for Employment Authorization, extension requests due to the temporary closure of Application Support Centers (ASC) to the public.

Target Date to Reopen Offices. On April 1st, USCIS announced offices temporarily suspended will begin to reopen on May 4th unless the public closures are extended further to help slow the spread of COVID-19.

COUNTERING WEAPONS OF MASS DESTRUCTION (CWMD)

Medical Screening at Airports. CWMD contract personnel are continuing to support CDC with enhanced screening at 13 airports. From March 29th to April 5th, CBP referred 7,565 travelers to CWMD for enhanced screening. As of April 5th, over 265,647 travelers have been referred to CWMD for screening.

SCIENCE AND TECHNOLOGY (S&T)

Coronavirus Research. S&T's National Biodefense Analysis and Countermeasures Center (NBACC) continued researching the impact of environmental conditions, such as temperature and humidity, to determine the virus's survivability in the air, in respiratory fluids, and on various types of surfaces. Additional research includes decontamination methods to determine the most effective materials to clean and disinfect surfaces to rid them of the virus.

Consolidating COVID-19 Data for Government Officials. On April 1st, the NBACC updated the Master Question List (MQL), a compilation of available research and information on operationally-relevant questions.

FEMA_and_Our_Partners_Continue_to_Support_State-Managed_Coronavirus_Response

March 27, 2020 at 12:14 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of

California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

Coronavirus_(COVID-19)_Pandemic:_W hole-of-America_Response_-_April_24

April 24, 2020 at 2:15 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 24, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 22**, HHS launched [Telehealth.hhs.gov](#). The site is a central source of information on telehealth resources and tools for patients and providers.
 - In his blog post "[Health Providers: Join the Telehealth Revolution](#)," the Surgeon General of the United States, Vice Admiral Jerome M. Adams M.D.,

- M.P.H., outlines the benefits of using telemedicine tools.
- Working from the safety of home, these tools allow clinicians to perform virtual visits, refill and adjust essential medications, and modify treatments that will preserve and improve conditions that if left untreated, put patients at risk.
- As of **April 23**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 105 million surgical masks, 6.7 million face shields, 14.9 million surgical gowns, 747 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - The U.S. has now processed 4.9 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

FEMA Advisory: Disaster Financial Management Guide (April 16, 2020)

April 16, 2020 at 6:37 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 16, 2020

Disaster Financial Management Guide

On Thursday, April 16, FEMA released the “Disaster Financial Management Guide” to support jurisdictions in establishing and implementing sound disaster financial management practices, which are critical for successful response and recovery. The guide takes an all-hazards approach and addresses a broad range of issues and contains concepts, principles and resources applicable to the coronavirus (COVID-19) pandemic response environment. The guide identifies the capabilities and activities necessary to prepare and successfully implement disaster financial management while maintaining fiscal responsibility throughout response and recovery operations. This includes considerations and practices necessary to track, calculate and justify the costs of an emergency; support local reimbursement reconciliation; avoid de-obligation of grant funding; and effectively fund and implement recovery projects and priorities. The principles, concepts and resources contained in the guide can support jurisdictions in identifying the resources needed to support their community, increase the efficiency of recovery efforts, and reduce the likelihood of audits and financial penalties for the jurisdiction.

To view the guide, please visit <https://www.fema.gov/plan>.

April 15, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [FEMA Project Airbridge](#).
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/hospital beds; total

- acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - The seven new ventilator contracts announced by HHS this month will supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.

King, Elizabeth (COM)

FW: Puget Sound Energy - Request for Support - COVID 19 Testing for Energy Sector Critical employees

March 24, 2020 at 8:44 PM EDT

To: Furze, Michael (COM), McCloy, Lauren (GOV), Richeson, Jonathan, Chung, Allen, Fordice, Justin

Hello Federal Friends,

I've received this request a few times via the phone and PSE provided it in email so I can share their concerns and requests. Last weekend at the Tacoma Dome there was a testing facility that was focused on critical infrastructure testing however the message was not widely communicated to the energy sector.

If at all possible another testing site comes up with this participate focus would you please let me know and I'll pass it along to those within the area for an opportunity to safe guard their essential staff.

Thank you,

-Eli

Elizabeth "Eli" King, CEM

Subject: Puget Sound Energy - Request for Support - COVID 19 Testing for Energy Sector Critical employees

Eli,

This request came up in PSE Daily planning meeting

Request the State establish pro-active testing (since so many people are asymptomatic) for Critical Energy Employees - control room operators, electric and gas first response crews and Energy Generation and Storage facilities. These PSE employees monitor, control and operate Electric and gas transmission & Disrupt system that support over 1.1 electric and 900K gas customers in the state. This could help if with quarantines so they can continue to function during the COVID crisis –

Please let us know if you need more information please let me know

Unclassified

Location(s): United States

U.S. officials are alleging that a foreign disinformation campaign is underway aimed at spreading fear in the country amid the COVID-19 pandemic, three U.S. officials said Monday.

On Sunday, federal officials began confronting what they said was a deliberate effort by a foreign entity to sow fears of a nationwide quarantine amid the virus outbreak.

Agencies took coordinated action to deny that any such plans were put in place.

U.S. officials did not name the foreign entity they believe to be responsible.

"Text message rumors of a national [#quarantine](#) are FAKE," tweeted the National Security Council (NSC)

Sunday. "There is no national lockdown," it added.

The NSC tweet was reportedly connected to a hacking attempt against the U.S. Department of Health and Human Services (HHS) related to its COVID-19 response.

The hack, which involved multiple incidents, aimed to overload HHS servers with millions of hits over several hours.

Call with Administrator Gaynor and Governor Inslee

To: Hill, John, Hyer, Brian

Cc: Wilson, Morgan (GOV), Daugherty, Bret D. (MIL), Tichenor, Stacey (GOV)

John and Brian:

Governor Inslee would like to speak with Administrator Gaynor today to discuss the urgent need for the USNS Mercy to be deployed to the Puget Sound area to address the deteriorating situation in Washington State.

Enclosed, please find letters transmitted last night to the President, Vice President and Secretary Azar laying out this urgent need. With each day that passes, the number of available physicians and nurses in Washington decreases as illness and fatigue take their toll, and our already low number of available hospital beds continues to shrink, leaving us unable to meet current and projected patient needs from COVID-19 and other acute and subacute patients. With our rural hospitals facing increasing challenges and our medical system facing a growing shortage of health care personnel, it is clear that no state on the West Coast needs the capacity provided by the Mercy as soon and as greatly as Washington State.

Our scheduler Stacey Tichenor (cc'd) can help find a time for the two to connect.

We appreciate your assistance with this matter. I can be reached at 360.999.0155 with any questions.

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- * FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people
- * FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- * Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.

-- Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.

--This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.

* The White House announced [a new collaboration by Schema.org](#) to help Americans find the most up-to-date public health guidance and the most relevant information on testing facilities in their communities

--Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.

--All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

Fact Sheet: DHS Measures on the Border to Limit the Further Spread of Coronavirus

March 23, 2020 at 12:23 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Release Date:

March 23, 2020

<https://www.dhs.gov/news/2020/03/23/fact-sheet-dhs-measures-border-limit-further-spread-coronavirus>

In order to limit the further spread of coronavirus, the U.S. has reached agreements with both Canada and Mexico to limit all non-essential travel across borders. Working closely and collaboratively, the Department of Homeland Security is part of a North American approach to stop the spread of the virus.

Additionally, CBP will no longer detain illegal immigrants in our holding facilities and will immediately return these aliens to the country they entered from – Canada or Mexico. Where such a return is not possible, CBP will return these aliens to their country of origin.

These measures will be implemented on March 21, 2020 and will be in place for 30 days, at which point they will be reviewed by both parties.

The U.S., Mexican, and Canadian governments are taking necessary action to fight against this pandemic together.

Northern Border

- March 20, 2020: [Joint Statement on US-Canada Joint Initiative: Temporary Restriction of Traveler Crossing the US-Canada Land Border for Non-Essential Purposes](#)

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars daily cross-border trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries.

supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Southern Border

- March 20, 2020: [Joint Statement on US-Mexico Joint Initiative to Combat the COVID-19 Pandemic](#)

The strong partnership and close cooperation between the United States and Mexico has allowed us to maintain a productive border environment. We value the health and safety of our citizens and keep that at the forefront of our joint decisions made by our respective leaders regarding cross-border operations.

Recognizing the robust trade relationship between the United States and Mexico, we agree our two countries' response to the ongoing global and regional health situation, require particular measures both to protect border trade and our countries' economies and ensure the health of our nations' citizens. We agree to the need for a dedicated joint effort to prevent spread of the COVID-19 virus and address the economic effects resulting from reduced mobility along our shared border.

The U.S. and Mexican governments further recognize critical services such as food, fuel, healthcare and life-saving medicines must reach people on both sides of the border every day. Essential travel must therefore continue unimpeded during this time. In order to ensure that essential travel can continue, the United States and Mexico are also temporarily restricting all non-essential travel across its borders.

"Non-essential" travel includes travel that is considered tourism or recreational in nature. Additionally, we are encouraging people to exercise caution by avoiding unnecessary contact with others.

This collaborative and reciprocal initiative is an extension of our nations' prudent approach that values the health and safety of our citizens in the joint decisions made by our respective leaders regarding cross-border operations.

This joint initiative will commence at 00:01 Saturday March 21 throughout the US-Mexico land border for a period of 30 days subject to extension upon review.

Detention Facilities

CBP is the first line of defense of our nation's borders. To help prevent the introduction of COVID-19 into

border facilities and into our country, aliens subject to the order will not be held in congregate areas for processing by CBP and instead will immediately be turned away from ports of entry.

Those encountered between ports of entry after illegally crossing the border similarly will not be held in congregate areas for processing and instead, to the maximum extent feasible, will immediately be returned to their country of last transit. These aliens are processed in stations designed for short-term processing, where distancing is not a viable option, creating a serious danger of an outbreak.

The Centers for Disease Control and Prevention (CDC) has determined that these conditions present a serious infection control challenge and are a risk to public health. Should an outbreak occur at these facilities, local medical facilities would be forced to devote extensive resources and may become overwhelmed.

This action will also protect the health of our country's dedicated border agents and other law enforcement personnel, who are vital to the security of our Nation.

Apprehension of illegal immigrants along both borders between POEs:

- *Migrants from Coronavirus Impacted Areas:* Since the beginning of the FY20 fiscal year in October through the end of February 2020 (over the period of October 1, 2019 to February 29, 2020), foreign nationals from 122 separate countries have been apprehended or denied entry (inadmissible) at the Southwest border, for a total of over 190,000 apprehended or inadmissible migrants from countries currently with confirmed COVID cases.
- *Size and Scale:* Every week, CBP apprehends between 7,000 – 9,000 individuals between ports of entry —the equivalent of 2.5 Diamond Princess cruise ships per week.
- *Human-to-human Spread:* The spread of coronavirus is exacerbated by human-to-human transmission and the need for detention. CBP law enforcement facilities are for short-term holding and do not provide for needed large-scale isolation, diagnosis, or treatment of such a novel disease.
- *CBP Facilities:* CBP facilities are not structured or equipped to effectively quarantine an infected population. CBP would be forced to rely on state and local hospitals to provide longer-term medical care for individuals who fall ill, further burdening our strained healthcare system and depriving American citizens of key medical resources.

Although CBP has policies and procedures in place to handle transmittable diseases, COVID-19 will impact already strained holding capacities and place an extreme burden on what is forecasted to be a stretched healthcare system and the nation's critical medical professionals who are needed to attend to U.S. citizens and legal residents.

Migrants should shelter-in-place in their homes and communities, rather than attempting a long and dangerous journey to the United States borders at the hands of traffickers and smugglers.

U.S. Citizens:

U.S. citizens, lawful permanent residents and certain other travelers are exempt from this action. They will receive the same processing, evaluation and potential CDC medical screening that all entrants undergo at Ports of Entry.

Authority:

Effective at March 21, 2020 at 12:00 a.m. EDT, CBP will, as authorized, implement CDC authority under U.S.C. § 265 to prohibit entry of certain persons into the United States. CBP will assist the Department of Health and Human Services' (HHS) and U.S. Centers for Disease Control and Prevention (CDC) to protect against the spread of the novel coronavirus (COVID-19) by implementing the emergency authorities under U.S.C. § 265 at the nation's land borders to prohibit the introduction of certain persons in the interest of public health.

“Essential travel,” which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the US;
- Individuals traveling for medical purposes (e.g., to receive medical treatment in the US);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (e.g., individuals working in the farming or agriculture industry who must travel between the US and Canada or the US and Mexico in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (e.g., government officials or emergency responders entering the US to support Federal, state, local, tribal, or territorial government efforts to respond to COVID-19 or other emergencies);
- Individuals engaged in lawful cross-border trade (e.g., truck drivers supporting the movement of cargo between the US and Canada or the US and Mexico);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the US; and
- Individuals engaged in military-related travel or operations.

Joint_DHS/EOIR_Statement_on_MPP_Rescheduling

March 23, 2020 at 11:10 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Joint DHS/EOIR Statement on MPP Rescheduling

Due to circumstances resulting from COVID-19, all Migrant Protection Protocol (MPP) master calendar and merit hearings presently scheduled through April 22 will be rescheduled. Neither the MPP program nor any hearings will be cancelled.

Any individual with an MPP hearing date through April 22 should present themselves at their designated port of entry on their previously scheduled date to receive a tear sheet and hearing notice containing their new hearing dates. DHS and EOIR are deeply committed to ensuring that individuals ‘have their day in court’ while also ensuring the health and safety of aliens, our frontline officers, immigration court professionals, and our citizens.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators

to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.

- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

Nitsch, Melissa A

Latest false allegations

April 16, 2020 at 11:14 AM EDT

To: Sanchez, Alejandro (GOV)

Good morning Alejandro,

We are aware of yet another round of “hunger strike” claims by outside activists. This does not reflect reality, however, as there have been no widespread or consistent meal refusals, nor has any detainee expressed an intent to participate in a hunger strike. It’s deeply unfortunate that these activists continue to push false claims that tie up resources at the city/county/state/federal level that could be used toward other purposes during this unprecedented time. I share for your reference our latest public statement on this issue:

There is not a hunger strike at the Northwest ICE Processing Center (NWIPC), nor any detainee claiming hunger strike status to detention officials. In fact, there has not *been* a hunger strike at the NWIPC this calendar year. All claims to the contrary are patently false.

Routinely, a some detainees will choose to skip a meal on any given day for a variety of personal reasons. While there are a handful of detainees who have declined meals provided to them by the facility today, ultimately at taxpayer’s expense, these detainees are eating food they have purchased from the commissary. This does not constitute a hunger strike. In fact, commissary purchases by detainees on so-called “hunger strikes” are shown to increase significantly immediately preceding alleged “hunger strikes.”

Coordinated efforts by external agitators to encourage detainees to decline facility-provided meals and instead, eat food that they’ve purchased from the commissary continues to be a widespread source of misinformation. These deceptive tactics, inarguably being orchestrated by advocacy groups not only misinforms the public but, in fact, can harm some detainees who fear retribution if they don’t join the others in their sham hunger strike. These staged events exploit the plight of detainees and delegitimizes the integrity of media outlets that unwittingly report these lies as factual. At this time, more than ever, those who spread these lies do a damaging disservice to the individuals and communities they claim to represent.

Thank you, and please let me know if you have any questions.

Strategies_for_Addressing_Personal_Protective_Equipment_(PPE)_Shortage

April 14, 2020 at 9:16 AM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding strategies for addressing Personal Protective Equipment (PPE) shortages.

April 14, 2020

CISA Advisory

Strategies for Addressing Personal Protective Equipment (PPE) Shortage

The U.S. government's strategy for addressing COVID-19 personal protective equipment (PPE) shortages relies on three pillars of practice to ensure continued availability of protective gear: reduce – reuse – repurpose. In this time of the COVID-19 pandemic and the associated PPE shortages, implementation of contingency plans across all sectors are necessary to ensure continued availability of protective gear. In support of this strategy, the U.S. government has recently released two documents that will be of assistance to all infrastructure sectors.

FEMA has published the attached *COVID-19 Pandemic: Personal Protective Equipment Preservation Best Practices*. This document summarizes government guidance and best practices currently being implemented across the United States for COVID-19 response has been released. While tailored to the Healthcare Sector, many of these strategies can be applied to other sectors with similar PPE requirements.

NIOSH has recently issued [Interim Guidance for Conserving and Extending Filtering Facepiece Respirator Supply in Non-Healthcare Sectors](#). That document offers strategies to conserve, extend, and respond to shortages in the supply of NIOSH-approved filtering facepiece respirators (FFRs) used in non-healthcare worksites such as manufacturing and construction. Employers should implement alternative controls to reduce, as much as possible, their reliance on PPE, particularly FFRs.

Please continue to refer to CDC for updates to posted guidance for businesses and employers to plan and respond to COVID-19: <https://www.cdc.gov/coronavirus/2019->

[ncov/guidance-business-response.html](https://www.fda.gov/ncov/guidance-business-response.html). For general and other useful information regarding COVID-19, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. Information on FEMA's efforts to stabilize the PPE supply chain can be found at: <https://www.fema.gov/news-release/2020/04/08/fema-covid-19-supply-chain-task-force-supply-chain-stabilization>.

Respectfully,
Cybersecurity and Infrastructure Security Agency

Baumgart, Jim (GOV)

Master Lease - Alternate Care Facilities (isolation)

March 25, 2020 at 9:19 PM EDT

To: Liu, Chris (DES), Covington, Bob (DES), Larson, Ann (DES), McClain, Stacey (MIL)

Cc: Davidson, Lisa, Zimmerman, Matthew S (DOH), Ezelle, Robert (MIL), Daugherty, Bret D. (MIL), Phillips, Keith (GOV), Postman, David (GOV), McGill, Jason T (HCA)

Chris,

In speaking with the executive team and the Unified Area Command leadership, I'd like to move forward on securing facilities for use as isolation centers. We have concurrence from CDC, HHS, DOH, and EMD regarding the site requirements for isolation facilities. These include:

- Locations where air intake and air outflow occur for the building and for each room
- Ensure rooms have appropriate airflow for isolation
 - o Select rooms with individual ventilation system or a room with a non-recirculating air
 - o If recirculation of air from isolations rooms to other rooms is unavoidable, HEPA filters should be installed in the exhaust ducts.
 - o If the facility has centralized HVAC, ensuring the ventilation is set to full exhaust and intake will minimize cross contamination,
- Individual bedrooms and bathrooms for isolated persons is ideal
- Access and functional needs
- Space considerations for staff
 - o PPE donning/doffing space or area.
 - o Space for light nursing care
 - o Administrative space for medical records processing
 - o Areas or rooms for housing staff staying overnight with bathroom facilities.
 - o Workspace for staff with power, phone/internet, and break areas for meals.
- Site safety and security considerations
- Spiritual, religious and cultural support
- Mental health support

Mr Stacey McClain from Emergency Management is coordinating the multi-agency site survey teams. These teams could have representatives from DOH, EMD, USACE, HHS, FEMA based on needs. Please let Stacey know if you need assistance in site survey.

Size is scalable; however, we are looking at capacity within Snohomish, King, Pierce and Thurston counties. Total capacity across those counties should be 2,250 – 5,000.

Health Care Authority is still examining if licensing the facility is required and what possible reimbursement beyond HHS and FEMA authorities is available.

DOH is still discussing what they staffing model for this will look like; however, I suspect it will have some facility operations staff supported with light nursing.

Sincerely,
Jim

JIM BAUMGART

RE: Latest false allegations

To: Nitsch, Melissa A

Thank you for the update.

From: Nitsch, Melissa A <Melissa.A.Nitsch@ice.dhs.gov>

Sent: Thursday, April 16, 2020 8:14 AM

To: Sanchez, Alejandro (GOV) <Alejandro.Sanchez@gov.wa.gov>

Subject: Latest false allegations

Good morning Alejandro,

We are aware of yet another round of “hunger strike” claims by outside activists. This does not reflect reality, however, as there have been no widespread or consistent meal refusals, nor has any detainee expressed an intent to participate in a hunger strike. It’s deeply unfortunate that these activists continue to push false claims that tie up resources at the city/county/state/federal level that could be used toward other purposes during this unprecedented time. I share for your reference our latest public statement on this issue:

There is not a hunger strike at the Northwest ICE Processing Center (NWIPC), nor any detainee claiming hunger strike status to detention officials. In fact, there has not *been* a hunger strike at the NWIPC this calendar year. All claims to the contrary are patently false.

Routinely, a some detainees will choose to skip a meal on any given day for a variety of personal reasons. While there are a handful of detainees who have declined meals provided to them by the facility today, ultimately at taxpayer’s expense, these detainees are eating food they have purchased from the commissary. This does not constitute a hunger strike. In fact, commissary purchases by detainees on so-called “hunger strikes” are shown to increase significantly immediately preceding alleged “hunger strikes.”

Coordinated efforts by external agitators to encourage detainees to decline facility-provided meals and instead, eat food that they’ve purchased from the commissary continues to be a widespread source of misinformation. These deceptive tactics, inarguably being orchestrated by advocacy groups not only misinforms the public but, in fact, can harm some detainees who fear retribution if they don’t join the others in their sham hunger strike. These staged events exploit the plight of detainees and delegitimizes the integrity of media outlets that unwittingly report these lies as factual. At this time, more than ever, those who spread these lies do a damaging disservice to the individuals and communities they claim to represent.

Thank you, and please let me know if you have any questions.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_15

April 15, 2020 at 3:19 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 15, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [FEMA Project Airbridge](#).
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/hospital beds; total

- acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - The seven new ventilator contracts announced by HHS this month will supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

April 14, 2020 at 7:31 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding eligibility requirements for expenses incurred from the purchasing and distribution of food relating to COVID-19 response operations.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA [issued a new policy](#) that addresses the purchase and distribution of food eligible for Public Assistance funding under emergency and major disaster declarations for the COVID-19 pandemic.

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_9,_2020

April 09, 2020 at 4:37 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - As of April 8, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
 - An additional 49 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not

- mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.
- On April 8, the Department of Health and Human Services announced the first contract for ventilator production rated under the Defense Production Act, to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - On April 3, President Trump issued "Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.
- On April 8, CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.
 - The guidance covers essential health care workers who've been exposed to the coronavirus.
 - Essential workers can, under certain circumstances, go back to work, if they're

asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they're at work.

FEMA-IGA

CONGRESSIONAL ADVISORY #4: State-Managed, Federally-Supported COVID-19 Response Continues

March 24, 2020 at 11:41 AM EDT

To: Undisclosed recipients:

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 24, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-4500

Advisory

State-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified

in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-Congressional-Affairs@fema.dhs.gov.

LEOFA Program-Moore Farewell/Supervisory Transition

April 22, 2020 at 11:36 AM EDT

To: LEOFA

Good morning to you all,

First, I hope you and your families are holding up and doing well during this current crisis. I am here to inform you that effective April 26, 2020, I will be transitioning out of the Law Enforcement Officer Flying Armed (LEOFA) Program to our Critical Incident Response Program (CIRP). From November 2015 to now, it has been a pleasure overseeing the LEOFA Program and working with you all in many capacities. It has been a highlight of my career, as your professionalism and support has been beyond measure. Please know that I appreciate you, your service and contributions to keep our nation safe. I truly cherish the partnerships that we collectively hold.

Upon my transition, please contact the POCs below for LEOFA-related questions or issues:

-Matthew Ryan (Supervisor)

Office: (703) 487-3328

Mobile: (571) 213-7078

Email: Matthew.Ryan@tsa.dhs.gov<mailto:Matthew.Ryan@tsa.dhs.gov>

Note: Interim LEOFA POC until the new supervisor is selected.

-Clayton Pope

Office: (703) 487-3256

Mobile: (571) 425-0739

Clayton.Pope@tsa.dhs.gov<mailto:Clayton.Pope@tsa.dhs.gov>

-LEOFA Program

Office: (703) 487-0033

1 (855) FLY-LEOS

LEOFA@tsa.dhs.gov<mailto:LEOFA@tsa.dhs.gov>

Take care and be safe out there,

Mike

Rains, Katie (AGR)

Food Security Coordination Team 2PM - Agenda & SitRep

April 16, 2020 at 3:45 PM EDT

To: Austin, JT (GOV), Baumgart, Jim (GOV), Eads, Kim (AGR), Connelly, Leslie (OFM), Gregerson, Mia, Warnick, Judy, Kumara, Yoshi, Voris, Molly (GOV), leanne.eko@k12.wa.us, Roberts, Babette (DSHS), Sheffels, Evan (AGR), Wilson, Morgan (GOV), Laxson, Joe D (DOH), Barkley, Wendy, Emmans, Gene (AGR), Sandison, Derek (AGR), Fuller, Steve (AGR), Thompson, Maddy (GOV), Orr, Daisye (DOH), Katims, Casey (GOV), Hovis, Emily S (DOH), Rains, Katie (AGR), Butler, Laura (AGR), Evans, Rayanna (OFM), Bailey, Sami, Way, Bryan (OFM), nicolas.granum@fema.dhs.gov, McGann, Chris (AGR), Andersen, Bryce (OFM), Throne, Paul (DOH), Thomas Reynolds, Biggins, Rosemary (DSHS/ALTA/HCS), Ellsworth, Michael L (DOH), Cooper, Kelly (DOH), Black, Ryan (DOH), Tiffani Kaech, Clark, Jason (WaTech), Linda Nageotte, Tybo, Brittany M (DOH), Phillips, Todd J (DOH), drew.meuer@2-harvest.org, Graham, Joe M (DOH), Banuelos, Cynthia, Ellings, Amy (DOH), Auvinen, Alyssa A (DOH), Aaron Czyzewski, Richartz, Sandra

Good afternoon,

I'm writing to share a rough compilation of the situation reports that we received on Friday and over the past few days. Please note the format will get cleaned up moving forward as we build more staff capacity to support our team. The current assumption at this point is that it's better to share information even if in messy format than to hold information. Â Â Â

Also, please note that Derek and JT have been pulled into another call at our usual time, so I will be working us through the agenda. We will be sure that they receive detailed updates. Â

1. Roll Call
2. OFM/Financial Updates " Leslie
 - a. FEMA Funding
3. Action Team Report Out "
 - a. Food Procurement Action Team
 - b. Coordinated Community Response Action Team
 - c. Gap Analysis Action Team
 - d. Any additional teams forming? Â
4. Resource Procurement Discussion
 - a. How are various sectors meeting needs for procurement of food, PPE, packaging supplies, and human resources? Is there a need to coordinate these efforts here?
5. Are there gaps in Food Security that need attention or documentation?
 - a. Meal Programs
 - b. Tribal Food Security
 - c. Houseless Populations
 - d. Children unable to get to schools to pick-up meals
6. Agency Updates
 - a. Governor's Office
 - b. Department of Commerce
 - c. WSDA
 - d. DOH
 - e. DSHS
 - f. OSPI
 - g. Legislators
 - h. Food Lifeline
 - i. Northwest Harvest

- j. Second Harvest
- k. FEMA
- 7. Strategic Issues for Next Agenda?
- 8. Adjourn

Please don't forget to send in your Situation Report for the week of 4/13 by COB Friday 4/17.Â
Thank you!

Weekly Food Security Coordination Team Situation Report – please copy the section below into an email and fill in updates to the best of your ability. Brevity is preferred and appreciated. Please send this email to krains@agr.wa.gov before you leave work on Fridays until further notice. We can refine this process, but the goal is the gather information from all Food Security Coordination team partners, provide an aggregated situation report to the team early in the week, and focus our meeting time on discussion of strategic questions and next steps.

Which Food Security sector are you responding on behalf of – (please write in: SNAP, WIC, Fruit & Veg Nutrition Incentives, Food Assistance programs, child nutrition programs, senior nutrition programs, NGO Hunger Relief, OFM, other – please specify)

WEEKLY RECAP - Looking back on the past week:

- a. Executive summary - What has happened in your sector this week? (please provide a short high level narrative; 2-3 sentences)
- b. Program administration or initiative updates (bulleted list; please include key dates)
- c. Federal or state policy or funding decisions that have impacted your sector (bulleted list; please include key dates)
- d. Important communications or events (bulleted list; please include key dates)

OUTLOOK - Looking ahead for the next 2 weeks:

- a. What challenges are you anticipating in this sector over the next two weeks? (bulleted list; please describe the challenge, where/who you think it is most likely to affect vs. statewide, and as much detail as you wish to share)
- b. Identify specific requests for support or decision from FSCT (bulleted list; please describe your specific request for resource, action, or decision, including What/By Whom/When)
- c. Observation of trends (please provide a bulleted list of any trends you are observing anecdotally among hunger relief and food benefit service providers or food insecure populations. Too chaotic to estimate? getting worse? Getting better? Gaps widening in some places, narrowing in others?)
- d. Planned actions, initiatives, service changes, communications or other key dates

OVERARCHING ISSUES & NEEDS:

- a. Service delivery gaps or concerns
- b. Funding needs or concerns
- c. Policy needs or concerns

Katie Rains

FW: FEMA Stakeholder Advisory: Federal Partners Provide Additional Health & Medical Support for Coronavirus

March 23, 2020 at 1:00 PM EDT

To: FEMA-IGA

Office of External Affairs

U.S. Department of Homeland Security

Washington, DC 20472

FEMA

March 23, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

Federal Partners Provide Additional Health & Medical Support for Coronavirus

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On Sunday, March 22, President Trump directed the Secretary of Defense to allow the States of California, New York and Washington use of the National Guard in a Title 32 status to support State and local emergency assistance efforts. This allows the Governors to call up the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states are able to request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. All 50 states, the District of Columbia, five territories and two tribes are working directly with FEMA under the nationwide emergency declaration for COVID-19. States, tribal and territorial governments do not need to request separate emergency declarations to receive FEMA assistance under this nationwide declaration.

In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states. Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves,

with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 48 hours.

The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. Additional hospital beds are being made available in Washington, as well as California and New York.

To help the American public distinguish between rumors and facts regarding the response to COVID-19, FEMA has created a Rumor Control page on FEMA.gov. The public can help control the spread of rumors by sharing our page: fema.gov/coronavirus.

Every American has a role to play. Consider donating cash, giving blood, or donating to your local food bank to help fight COVID-19.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Defense Production Act, and How to Help.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

King, Elizabeth (COM)

Energy Sector PPE - resource request & Priority Justification

March 24, 2020 at 8:21 PM EDT

To: Furze, Michael (COM), McCloy, Lauren (GOV), Richeson, Jonathan, Chung, Allen, Ball, Jason (UTC)

Allen and Jon,

I'm following up on priority of PPE and while I understand the focus is on healthcare workers, it is my responsibility to advocate for the energy sector for reliability. I've received concerns if the pandemic continues for the next few months PPE shortages would cause concerns, as it stands now I've been able to confirm with 30 energy sector partners they are not currently experiencing issues, however, the Natural Gas providers have reduced their interactions with individual homes and some have reduced the ability for relights to do the lack of PPE.

Sanitation items are lacking for those who have essential personnel who must remain on site, they are implementing social distancing in most cases, however, control rooms are limited in terms of implementation of social distancing availability.

Below is some information I was able to gather with support from the UTC on federal/ state codes as asked by Allen.

The Commission adopts by [reference](#) the American Petroleum Institute Standards as well as [title 49 C.F.R.](#)

The API standards for personal protection can be found [here](#). API has also published a Pandemic Guide [here](#).

The pipeline safety division enforces federal requirements around pipeline safety for federal transportation of gas. The state regulations mirror the federal ones. The federal Pipeline and Hazardous Materials Safety Administration (PHMSA) has issued [guidance](#) to state regulators enforcing federal requirements. In general, the guidance recommends prioritization of critical work and follow CDC guidance for PPE. As of right now, the CDC/OSHA Guidelines do not specifically reference energy partners however they do have guidance for [Solid Waste and Wastewater](#).

Office of Public Affairs

DHS and USDA Move to Protect American Farmers and Ensure Continued Flow of America's Food Supply

Department to Temporarily Amend Certain H-2A Requirements During COVID-19 National Emergency

WASHINGTON— The Department of Homeland Security, with the support of the U.S. Department of Agriculture (USDA), has announced a temporary final rule to change certain H-2A requirements to help U.S. agricultural employers avoid disruptions in lawful agricultural-related employment, protect the nation's food supply chain, and lessen impacts from the coronavirus (COVID-19) public health emergency. These temporary flexibilities will not weaken or eliminate protections for U.S. workers.

Under this temporary final rule, an H-2A petitioner with a valid temporary labor certification who is concerned that workers will be unable to enter the country due to travel restrictions can start employing certain foreign workers who are currently in H-2A status in the United States immediately after United States Citizenship and Immigration Services (USCIS) receives the H-2A petition, but no earlier than the start date of employment listed on the petition. To take advantage of this time-limited change in regulatory requirements, the H-2A worker seeking to change employers must already be in the United States and in valid H-2A status.

Additionally, USCIS is temporarily amending its regulations to protect the country's food supply chain by allowing H-2A workers to stay beyond the three-year maximum allowable period of stay in the United States. These temporary changes will encourage and facilitate the continued lawful employment of foreign temporary and seasonal agricultural workers during the COVID-19 national emergency. Agricultural employers should utilize this streamlined process if they are concerned with their ability to bring in the temporary workers who were previously authorized to work for the employer in H-2A classification. At no point is it acceptable for employers to hire illegal aliens.

“This Administration has determined that continued agricultural employment, currently threatened by the COVID-19 pandemic, is vital to maintaining and securing the country's critical food supply chain. The temporary changes announced by USCIS provide the needed stability during this unprecedented crisis,” said Acting Secretary of Homeland Security Chad F. Wolf.

“USDA welcomes these additional flexibilities provided by the Department of Homeland Security today,” said Secretary of Agriculture Sonny Perdue. “Providing flexibility for H-2A employers to utilize H-2A workers that are currently in the United States is critically important as we continue to see travel and border restrictions as a result of COVID-19. USDA continues to work with the Department of Homeland Security, the Department of Labor and the Department of State to minimize disruption and make sure farmers have access to these critical workers necessary to maintain the integrity in our food supply.”

The temporary final rule is effective immediately upon publication in the Federal Register. If the new petition is approved, the H-2A worker will be able to stay in the United States for a period of time not to exceed the validity period of the Temporary Labor Certification. DHS will issue a new temporary final rule in the Federal Register to amend the termination date of these new procedures in the event DHS determines that circumstances demonstrate a continued need for the temporary changes to the H-2A regulations.

The H-2A nonimmigrant classification applies to alien workers seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States, usually lasting no longer than one year, for which able, willing, and qualified U.S. workers are not available.

April 17, 2020

FEMA Advisory

Disaster Financial Management Guide

On Thursday, April 16, FEMA released the “Disaster Financial Management Guide” to support jurisdictions in establishing and implementing sound disaster financial management practices, which are critical for successful response and recovery. The guide takes an all-hazards approach and addresses a broad range of issues and contains concepts, principles and resources applicable to the coronavirus (COVID-19) pandemic response environment.

The guide identifies the capabilities and activities necessary to prepare and successfully implement disaster financial management while maintaining fiscal responsibility throughout response and recovery operations. This includes considerations and practices necessary to track, calculate and justify the costs of an emergency; support local reimbursement reconciliation; avoid de-obligation of grant funding; and effectively fund and implement recovery projects and priorities. The principles, concepts and resources contained in the guide can support jurisdictions in identifying the resources needed to support their community, increase the efficiency of recovery efforts, and reduce the likelihood of audits and financial penalties for the jurisdiction.

To view the guide, please visit <https://www.fema.gov/plan>.

FEMA Advisory: FEMA Implementation of Allocation Order on Exports of Scarce PPE and Notice of Exemptions (April 24, 2020)

April 24, 2020 at 2:03 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 24, 2020

FEMA Implementation of Allocation Order on Exports of Scarce PPE and Notice of Exemptions

FEMA recently published a Temporary Final Rule and a subsequent notice in the Federal Register to support President Trump's "[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)" issued on April 3, 2020.

The COVID-19 National Strategy for Addressing Personal Protective Equipment (PPE) Shortage seeks to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: reduce, reuse and repurpose. Industries that use similar PPE (e.g., N95 respirators) as part of their normal duties will be challenged in obtaining PPE while available supply is prioritized for healthcare workers and first responders. Industries whose [essential critical infrastructure workers](#) need PPE to perform their duties should continue working with suppliers to acquire needed PPE, but should expect shortages to continue. All industries should immediately implement strategies to preserve existing supplies of PPE and find alternative work methods to address shortfalls. A critical component in implementing PPE preservation strategies is determining the appropriate level of PPE for use. Non-healthcare industries should carefully consider whether PPE is required by law or regulation as part of their routine duties, or whether it is needed for mitigating employee exposure to COVID-19.

The intent of the President's Memorandum and the FEMA Administrator's allocation order are to preserve scarce personal protective equipment for domestic use in the response to the COVID-19 emergency. FEMA is working closely with U.S. Customs and Border Protection (CBP) to implement the allocation order through the [Temporary Final Rule](#) published on April 10. The notice lists the Personal Protective Equipment (PPE) subject to this allocation order to include: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

On April 21, FEMA published a “[Notification of Exemptions](#)” in the Federal Register to supplement the rule. Every exporter is required to submit data about their shipment into the Automated Export System (AES) to electronically declare their international exports. When reviewing this data, CBP will determine if products are covered under the allocation order or exempt from being held. If no exemptions apply, CBP will notify FEMA for a determination on the shipment.

FEMA will then determine if a shipment is in the national defense interest to remain in the United States as related to the COVID-19 pandemic response. If this is the case, FEMA may purchase part or all of the shipment using a rated order under Title 1, return part or all of the shipment for domestic distribution, or allow part or all of the shipment to be exported. If a shipment is detained, FEMA and CBP will provide a response to the owner of the shipment within 72 hours.

Contact Us

Questions about a specific shipment should be directed to [Custom and Border Protection](#). Questions about the allocation order and Notice of Exemptions in the Federal Register may be directed to [FEMA National Business Emergency Operations Center](#).

If you have a legal question regarding the allocation order, send an email to PPE-export@fema.dhs.gov.

FEMA Advisory: COVID-19 Daily Briefing Points (April 27, 2020)

April 27, 2020 at 12:17 PM EDT

To: Undisclosed recipients:

FEMA ADVISORY – APRIL 27, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 26**, CDC and the Occupational Safety and Health Administration (OSHA) [released targeted guidance](#) to help meat and poultry processing facilities implement infection control practices to reduce the risk of transmission and illness from COVID-19 in these facilities.
 - Meat and poultry processing facilities present unique challenges for the prevention and control of COVID-19 transmission among workers.
 - Meat and poultry processing employers should implement a combination of engineering controls, cleaning and disinfection, social distancing, work practice

controls, administrative controls, and use of personal protective equipment.

- Basic worker infection prevention information and training should be provided to all workers in a clear and accessible manner, including training on social distancing and ways to reduce the spread of infection. To ensure accessibility, multi-lingual materials should be considered and made available, as appropriate.
- FEMA, HHS and the Cybersecurity Infrastructure and Security Agency (CISA) along with other federal agencies are distributing cloth face coverings as part of a multi-prong approach to re-open American economic activity while continuing to limit spread of COVID-19.
 - As of **April 26**, 32.5 million cloth face coverings are being processed and distributed to state, local, tribal, private sector, and federal entities
 - The facial coverings are being delivered in a phased approach for infrastructure workers, first responders and food producers who do not need medical-grade personal protective equipment (PPE) for their daily work. Distribution is based on CISA's analysis of priority infrastructure sectors.
 - The federal government will provide additional face coverings in production to states, territories and tribes for distribution, with priority to emergency services, food production and distribution, and other sectors that support community lifelines.
 - FEMA and HHS are also providing face coverings to federal departments and agencies with mission essential functions to promote health and safety in the workplace and in their execution of public-facing missions
- As of **April 26**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 74.7 million N95 respirators, 104.8 million surgical masks, 7.2 million face shields, 15 million surgical gowns, 798 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.2 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Administrator_Gaynor_Sends_Letter_to_Emergency_Managers

March 27, 2020 at 1:31 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on COVID-19.

FEMA

March 27, 2020

Administrator Gaynor Sends Letter to Emergency Managers

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. Today, Administrator Gaynor sent the following letter to emergency managers outlining critical steps to help the nation respond to COVID-19:

Fellow Emergency Managers,

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. I thank you for your tireless efforts under these unprecedented and very demanding circumstances.

I write to you today as the Administrator of FEMA and a former state and local emergency manager. Now more than ever, we must work as a team to deliver locally executed, state-managed, and federally supported solutions on behalf of the American people. The best and the brightest emergency managers, public health officials, private industry partners, scientists, and medical doctors and nurses are assembling at FEMA Headquarters and in our regional offices; in your state and local emergency operations centers; and in hospital operations centers across the country. This is truly a whole-of-nation response. Rest assured, the full weight of our Nation is supporting all of us to overcome the pandemic and I have no doubt that we will be successful in defeating the spread of COVID-19.

To be successful across the nation – from the smallest town, tribal nation, island, and to the largest city – we must act decisively and immediately. Today, many of you are at the center of the battle, in places like New York, Washington, California, and Louisiana. Others of you may only have a few cases. It is our collective responsibility to do our very best today, so we can continue to blunt the spread of COVID-19. If you have excess capacity, please consider using EMAC to offer resources that your peers from around the country may need.

As the Nation's lead emergency manager, I want to be completely transparent about our national response and your responsibility to respond proactively and aggressively. To that point, I would like to share seven critical steps that I ask you to **immediately** consider and act upon.

First, mitigation works. Ensure you preserve your “force” while maintaining the ability to respond in a COVID-19 degraded environment without access to the tools typically used in an emergency or disaster like mutual aid and EMAC. Ensure that your communities, small or large embrace mitigation efforts. Every American has a role to play in defeating COVID-19, including good hygiene and social distancing. Follow the President's [15 Days to Slow the Spread](#).

Second, integrate all emergency management and public health operations. Identify and integrate your leading health official into your Emergency Operations Center and Unified Command Group at every level of government. You must form a unified Emergency Management – Public Health Team. Ensure that the entire state political leadership team understand the emergency management process. All requests to the Federal government must be formally communicated by the state's emergency manager to the FEMA Regional Administrator. This is the same process as natural disasters.

Third, collect public, private, and government hospital bed capacity data, if you haven't already – total beds, acute care beds, normal occupancy, predicted surge occupancy. This data will assist you in crafting requests for high demand, low density critical resources should the time come that you may need it. We must use all data wherever possible to allocate scarce resources, including consideration of population size, demographics, and vulnerability.

Fourth, actively plan to stand-up Alternate Care Sites. Be creative in identifying facilities that can support low acuity patients and require a minimal amount of medical staff, already in short supply. Consider locations such as convention centers, hotels, shuttered hospitals, college or university dormitories, or vacant open space in commercial buildings. Ask your FEMA Regional Administrator to brief you on the US Army Corps of Engineers “Hotel to Healthcare” initiative. If you need a plan, here is a [link](#) to a plan.

Fifth, maintain situational awareness of ventilators that may be used across your area. Check hospitals, acute care sites, outpatient locations, and any other location that may use these devices, especially those that may be a source for reallocation to an area of greater need. Like hospital bed capacity, this data will help you understand what you have and what you may need, informing your resource management strategy for these high

demand, low density critical resources should the time come that you may need it. Just as we are moving resources nationally, you should also be moving resources within your state.

Sixth, identify all sources to surge medical professionals. Look for retirees, medical contract services, nurses, respiratory therapists, medical students, and emergency medical technicians or local equivalents. You will need them to support the increased hospital surge and management of patients on ventilators and you should be cataloging and training them now, as appropriate.

Seventh, manage Personal Protective Equipment (PPE) carefully. We have stood-up the *Supply Chain Stabilization Task Force* within FEMA with the purpose of increasing the flow of critical medical supplies such as N95 masks, surgical masks, and ventilators. We are using four guiding principles: 1) preserve what we have; 2) locate medical stockpile around the globe; 3) distribute them to locations most in need; and 4) build capacity in America through partners with industry. While some of these strategies will yield near-term benefits, it must be your highest priority to carefully manage what you have available to you now.

To help you with this, the CDC produced a [Personal Protective Equipment \(PPE\) Burn Rate Calculator](#). This spreadsheet-based model provides information for healthcare facilities to plan and optimize the use of PPE for response to COVID-19. Similarly, non-healthcare facilities (e.g., correctional facilities) may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

FEMA will reimburse all eligible expenses for emergency protective measures under the Stafford Act; however, do not wait for the PPE from the Federal government to show-up. Take aggressive action now to source your own. Because of the actions the Administration and federal government is taking, you will begin to see PPE supplies come online in the weeks ahead as the commercial distribution chain adapts as well as the quantities of shipments from the Strategic National Stockpile continue to move. Continue to be resourceful, ask the building trades to donate PPE or that they allow you access to their supplier; and, ask dental and outpatient offices that are closed to donate PPE to local hospitals and care critical care sites. And finally, I ask you to review and utilize the guidance the *Supply Chain Stabilization Task Force* released regarding guidance for PPE.

Lastly, some [external communication](#) resources that may be helpful:

- **[Best Practices](#):** This page provides a platform for sharing best practices and lessons learned by the government, private sector, academic institutions, professional associations, and other organizations to support the whole of community response.
- **[Rumor Control](#):** This page is to help the public distinguish between rumors and facts regarding the response to COVID-19.
- **[How to Help](#):** This page provides guidance on how to **donate** critical resources & supplies; how to **do business** with FEMA; and, how to **volunteer**.

These are unprecedented times and many lives are potentially at stake. We are doing things many of us have never imagined, especially at this scale. As professional emergency managers, we are built for this – this is what we do best; coordinate, problem-solve, and act. I ask all of you to lead, innovate, and be resourceful. This is a whole of nation response and I need every emergency manager to be an active participant.

We are emergency managers and America needs us at our best.

Respectfully,

Pete Gaynor
Administrator

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_5

April 05, 2020 at 3:25 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 5, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - On April 3, CDC issued a recommendation to the public to use cloth face

coverings in community settings to help prevent the spread of COVID-19 by people are infected and do not know it.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- HHS will be providing state, territory and tribal Public Health departments with a one-time shipment of Abbott COVID-19 rapid tests.
 - Shipments are expected to arrive at the 70 identified locations by April.
 - The tests allow for immediate, on-site testing at the point-of-care.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - DOD will deliver 300 ventilators from its supply to New Jersey today, April 5.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and an additional 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 30 ventilators for Guam; an additional 200 ventilators for Louisiana; an additional 200 ventilators to New Jersey; and 100 ventilators for Massachusetts.

- Forty states, four territories and 12 tribes have issued stay at home orders.

CISA_and_NCSC_Joint_Activity_Alert_-_COV ID-19_Exploited_by_Malicious_Cyber_Actors

April 08, 2020 at 11:29 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding a joint activity alert on COVID-19 exploitations by malicious cyber actors, found [here](#).

April 8 2020

CISA Alert

CISA and NCSC Joint Activity Alert - COVID-19 Exploited by Malicious Cyber Actors

Partners,

As the nation and the world continues to fight against this newest coronavirus, COVID-19 — the Cybersecurity and Infrastructure Security Agency (CISA) continues to monitor how the crisis is affecting the American public on the cybersecurity and infrastructure security front.

Today, CISA and United Kingdom's National Cyber Security Centre issued an activity alert titled, *COVID-19 Exploited by Malicious Cyber Actors*. This joint alert seeks to address the growing use of COVID-19-related themes by malicious cyber actors and it can be found here: <https://www.us-cert.gov/ncas/alerts/aa20-099a>.

CISA and NCSC see the surge of reporting about malicious cyber activity using COVID-19 to prey on people's goodwill, curiosity and concern, and exploit organizations that establish remote work options. Specifically, this alert discusses the exploitation of virtual private networks, phishing email and text messages about COVID-19, and websites deceptively advertised as COVID 19 sites.

We are sharing this information to help you and your team effectively assess your cybersecurity posture and ensure appropriate mitigation is in place. The alert provides many

resources to help detect and prevent COVID-19 malicious activity on your networks. Industry partners played a key role in helping CISA and NCSC teams determine which IOCs to include in this alert and they continue to be integral to CISA's mission as the nation's risk advisor.

We encourage you to share this alert with anyone who might be able to use it. We will continue to keep you updated as more information becomes available.

For authoritative information and resources on COVID-19 -- including situation reports, guidance, and more, visit the CDC's website and [CISA.gov/coronavirus](https://www.cisa.gov/coronavirus).

Thank you,
CISA

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 16, 2020

April 16, 2020 at 10:58 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today and yesterday's national social listening report are attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 16, 2020

SUMMARY

- Washington's governor says the state is 'not close' to restarting the economy; it will be a phased approach, and the stay-at-home order may extend beyond May 4.
- Alaska's governor issued a fifteenth health mandate, which eases restrictions on health care providers: doctors, naturopaths, acupuncturists, physical therapists, psychologists, veterinarians and others can resume services that require minimal PPE.
- Idaho Governor Brad Little extends stay-at-home order through April 30 while lifting restrictions on some businesses.
- In Oregon and Washington, COVID-19 patients receive experimental plasma from recovered donors.

Public Sentiment

- In reaction to headlines coming from the Washington governor's press conference, an increased number of people are resolved to defy stay-home orders—and call for businesses to do the same—if they extend beyond May 4th.
- Many Idahoans support the Governor's extension of the stay-at-home order. Some feel people that at essential businesses, people aren't following distancing guidelines. Some call for all business to resume as soon as possible.
- In Alaska, people are increasingly frustrated that some service providers and companies are now allowed to resume, but other businesses involving equal or lower risk of disease transmission are not.

Washington

Stay-at-Home

- Inslee: 'We're not close' to restarting the economy in Wash. State ([KOMO](#), [KEPR](#), [KIMA](#))
 - Inslee: Social distancing is working, but stay-at-home order may go past May 4 ([Q13](#))
 - Gov. Inslee says reopening of Washington's economy will be a 'phased approach' ([YakTriNews](#))
 - Gov. Inslee said the first things that shut down during his emergency declaration will likely

be the last to reopen under a phased-in reopening of Washington's economy. ([Seattle Times](#))

- In reaction, people continue to be very divided as to whether social distancing orders are essential or whether it is time to get back to work. An increasing number of people are calling for citizens to defy the social distancing orders, especially if they extend beyond May 4. Some express strong frustration at seeing others go about their business while they themselves stay home. Others blame the lack of urgency in restarting the economy on the fact that leaders and most tech workers still receive their salaries. ([example 1](#), [example 2](#), [example 3](#), [example 4](#), [example 5](#), [example 6](#))
- Some politicians denounce government's COVID-19 response in Washington, Idaho. The police chief in Republic, Washington, has called Gov. Jay Inslee a "would-be dictator." A Spokane Valley lawmaker has asserted the new coronavirus is a "Chinese Communist Party bioweapon." And a Yakima city councilman has told constituents to ignore public health advice and return to work. ([Reflector](#), [The Daily Chronicle](#))
 - Some reactions to this news point out that there are areas of the state with very few or no cases, and call for more regional approaches to addressing the pandemic. ([Facebook](#))

Social Distancing

- Another sign the curve is bending: Positive coronavirus tests at UW peaked March 28 ([Seattle Times](#))
- Grocery workers and customers say social distancing inside stores is difficult amid coronavirus pandemic. During recent visits to several grocery stores, The Seattle Times witnessed customers going the wrong direction down one-way aisles, ignoring distancing stickers in checkout lines or brushing past other shoppers. Not all workers wore masks or gloves, even those serving unpackaged counter food. ([Seattle Times](#))
- In a step toward normalcy, two popular Seattle farmers markets — in the University District and Ballard — will reopen this weekend despite the coronavirus. Here's what's being done to protect people and what you need to know. U District, Ballard farmers markets will reopen this weekend despite coronavirus. ([Seattle Times](#)) In response, people are sharply divided as to whether this makes sense since farmers markets are outdoors, or whether this will expose people to unnecessary risks. ([Facebook](#))

Politicians

- "We need testing to be fast, free and everywhere," Sen. Patty Murray said during a press briefing with other Democratic senators on Wednesday, 12 weeks after a Snohomish County man was the first person in the United States to test positive for COVID-19. Sen. Murray and other Democrats push White House to make coronavirus testing available nationwide. ([Seattle Times](#))
- [Senator Maria Cantwell](#): Washington state is still facing a lack of COVID-19 testing kits and supplies - including PPE and testing swabs - needed to conduct adequate tests. I urged the Trump Administration to develop a national, real-time, public-facing inventory of COVID-19 diagnostic tests and results. We need this transparency to anticipate problems in the national testing supply chain and help the federal government address potential testing shortages. ([Senator Cantwell's website](#))

Medical Research

- Coronavirus destroys lungs. But doctors are finding its damage in kidneys, hearts and elsewhere. Clinicians around the world are seeing evidence that suggests the coronavirus is also causing heart inflammation, acute kidney disease, neurological malfunction, blood clots, intestinal damage and liver problems. ([Seattle Times](#))

Economy

- Relief fund for undocumented workers in Washington state sees big demand. If undocumented workers are not working — because they're sick, caring for someone who is ill, or laid off — they don't have many options to deal with the sudden loss of income. ([Yakima Herald](#)) While opinions are divided, most people reacting on Facebook are sympathetic to the workers and call for more support to be directed their way. ([Facebook](#))
- State orders Tacoma apartment complex to stop eviction notices. ([The News Tribune](#)) Even if they are not evicted, people continue to worry about credit damage and falling deeper in debt. ([Facebook](#))

Donations and Community Support

- Gates Foundation boosts funding for coronavirus response to \$250 million. ([Seattle Times](#), [KIRO 7](#))
- Relief fund for undocumented workers in Washington state sees big demand. If undocumented workers are not working — because they're sick, caring for someone who is ill, or laid off — they don't have many options to deal with the sudden loss of income. ([Yakima Herald](#)) While opinions are divided, most people reacting on Facebook are sympathetic to the workers and call for more support to be directed their way. ([Facebook](#))
- Hoping To Save The Postal Service, People Rush To Buy Stamps ([KUOW](#))

Prisoner release

Gov. Jay Inslee signed a new proclamation, which was accompanied by a commutation order to release some inmates early to stop the spread of the coronavirus among the prison population. ([KIRO 7](#))

- Many [do not agree with the move](#). Some think that inmates would be safer from coronavirus in prison. Others feel that releasing them into an economy with few job opportunities isn't going to help the situation.

Treatment

- First Seattle COVID patients treated with survivor plasma at Swedish. ([KIRO7](#))

Oregon

Business and Unemployment

- A Portland coffeehouse has used an SBA loan program to rehire its workforce. ([KOIN](#))
- Oregon's congressional delegation urges governor to waive waiting week for unemployment benefits. ([The Oregonian](#))
- Oregon's antiquated computers could cost laid-off workers more than \$100 million in benefits. ([KGW8](#))
- PDX, SEA to get \$264 million from federal CARES act to keep operations running. ([KATU2](#))

Flattening the Curve

- Oregonians bypass outdoor closures with 'creative parking' sparking COVID-19 concerns. ([Statesman Journal](#))
- Masks are still voluntary as other states increasingly require them to slow the pandemic. ([The Oregonian](#))
- Southern Oregon bar has license suspended for violating coronavirus executive order, officials say. Cave Junction's Sportsman Tavern is the first Oregon establishment to have its license suspended for allegedly defying Gov. Brown's executive order. ([KGW8](#))
- TriMet driver who installed shower curtain to protect himself from passengers told to remove it ([Oregonian](#))

Treatment

- Oregon nurse with coronavirus receives possible life-saving plasma donation ([Oregonian](#))

Testing

- OSU and Oregon lab team up to run thousands of COVID-19 tests. ([KATU2](#))

New Cases

- 3 more deaths, 33 new coronavirus cases. ([KGW8](#), [KPTV12](#), [The Oregonian](#))

Idaho

- Gov. Little extends stay-home order to April 30, with looser guidelines. ([Idaho News 6](#), [Idaho State Journal](#), [KIFI](#), [Idaho Statesman](#), [KEZI](#), [Times News](#)) He said some businesses that were not previously classified as essential, such as retailers, will be allowed to operate if they can offer curbside service.
 - The decision is welcomed even by those hurt by the move as their businesses remain closed. There is recognition for how this can have [a positive, long-term impact](#).
 - Many feel that [people weren't heeding the order](#) before the extension.
 - People ask for [physical distance enforcement at essential businesses](#) to help slow the spread of coronavirus.
 - Many agree with the order, with [some calls to open more businesses](#).

Donations

- Idaho farm gave away potatoes for free so they wouldn't go to waste. Cranney Farms in Oakley has thousands of potatoes they were expecting to sell. Instead of dumping them, they gave them away. ([KGW](#))
- Idaho Diaper Bank holds distribution event for families in need of diapers, other paper goods. ([KTVB](#)) Many [refer people they know to this article](#) in case they need it.

PPE

- Saint Alphonsus doctor partners with Boise company to print 3D masks for healthcare workers ([KTVB](#))

Healthcare Capacity

- Hospitals hurting: Local medical centers are not immune to financial hardships amid pandemic. ([Idaho State Journal](#))

Alaska

Updates from Governor Dunleavy

- In his Wednesday night briefing, the [governor issued a fifteenth health mandate](#), which eases restrictions on health care providers and procedures over the next 3 weeks. ([Anchorage Daily News](#), [Must Read Alaska](#)) Starting next week a long list of health care providers—including doctors, naturopaths, acupuncturists, physical therapists, psychologists, veterinarians and religious healers—can resume services that require minimal personal protective equipment. Restrictions on non-urgent medical procedures will be further relaxed in May.
 - In reaction, some wondered why other professions, such as barbers and retailers, cannot resume since high-exposure services provided by massage therapists and dentists are now permitted. ([example 1](#), [example 2](#))
- The governor expects more restrictions to be relaxed—such as those on retail stores and state fisheries—if Alaska continues to limit the spread of COVID-19. His goal is to “reopen the life we’re used to and the life we want to get back to.” ([Anchorage Daily News](#))
 - Debate continues between those who advocate for reopening the economy and letting people make their own choices about taking personal risks, versus those who say it is too soon to do so.
 - One comment claimed that FEMA seized a test order intended for Anchorage Providence hospital on Wednesday. ([Facebook](#))

Social Distancing Orders

- The Sitka Assembly has passed a controversial ordinance that would quarantine incoming seasonal workers. Sitka has no COVID-19 cases to date. ([KCAW](#))
- Anchorage medical leaders endorse mayor’s ‘hunker down’ order and ask the public to stay the course. ([Anchorage Daily News](#))
 - Reaction is split between those who applaud the mayor's decision and those who want the right to go back to work. One person who owns a dog grooming business expressed frustration that Petco is still allowed to operate and provide grooming services. ([Facebook](#))

New Cases

- More than 100 people have recovered from COVID-19 in Alaska, as case tally rises to 293. ([KTUU](#), [Anchorage Daily News](#)) Many people credit the social distancing with slowing the spread, and urge people to continue to stay home. Others are saying that there must be a better way; one that doesn't have such a harsh economic and psychological toll. ([Facebook](#))
- Kodiak Island has its first case of coronavirus. ([Alaska Public Media](#), [KMXT](#))
- Fairbanks goes three days without a new COVID case. ([Daily News-Miner](#)) Alaska's Chief Medical Officer praised the borough for early detection, contact tracing and isolation of its 79 positive cases.

Economy

- Senators Dan Sullivan and Lisa Murkowski are hosting a virtual Small Business Town Hall with local Alaskan leaders to discuss challenges facing small business and CARES Act relief opportunities. ([@SenDanSullivan](#))

National Guard

- Anchorage’s request for National Guard help with homeless camps is rejected. ([Anchorage Daily News](#)) Most [people on Facebook agree](#) that cleaning up the camps is not a job for the National

Guard.

Law Enforcement

- Woman arrested, charged with terroristic threatening in the second degree, after coughing on people and claiming she has coronavirus. ([KTUU](#))

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following

the event, the video will be available for download via the [King County TV streaming page](#).

ADVISORY: Inslee press conference on COVID-19 Monday in Seattle

Gov. Jay Inslee will address media Monday via streaming video and telephone to provide details on a temporary statewide shutdown of restaurants, bars, and entertainment and recreational facilities to mitigate the effects of the COVID-19 outbreak. The governor will also discuss limits at retail establishments and an updated ban on gatherings over 50 participants.

The governor will be joined by King County Executive Dow Constantine.

Inslee declared a [state of emergency](#) in response to new cases of COVID-19 earlier this month, directing state agencies to use all resources necessary to prepare for and respond to the outbreak.

Monday, March 16

10:30 AM - Press conference on COVID-19

FOR PLANNING PURPOSES ONLY, NOT FOR REPORTING

CALL-IN FOR REPORTERS: No reporters will be admitted into the conference room. Reporters will be able to ask questions via conference call. **To receive the call-in information [please RSVP here](#). Call-in information will be distributed by 9:45 a.m.**

Note, there are only 250 phone slots available. Lines will be muted during the briefing and unmuted during the Q&A period and called upon by a moderator for your question. Please keep your line muted until you're called upon to avoid any background noise.

TV: KING TV will serve as pool for live feeds. They will have 8 feeds to share out to your systems. Location: Executive Conference Room, King County Chinook Building, 401 5th Ave, Seattle. Arrive by 9:30 a.m. to set up your broadcast hardware.

AGAIN, NO ADDITIONAL CAMERAS WILL BE ALLOWED IN THE CONFERENCE ROOM, ONLY THE POOL CAMERA

Live video will also be available through the King County [livestream](#) page and [TVW](#). Following the event, the video will be available for download via the [King County TV streaming page](#).

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_8,_2020

April 08, 2020 at 5:47 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 8, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is

loaded.

- **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
 - Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
 - This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_2

April 02, 2020 at 6:57 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 2, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).

- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

Michigan's Request for a Major Disaster Declaration (IA, PA, & HM)

March 26, 2020 at 4:15 PM EDT

To: William Kirkland, Crozer, William (who.eop.gov), SHORT, CHERIE, Harper, Jay

Cc: Peterson, Mark J, FEMA-IGA

Good Afternoon,

Please find attached Governor Gretchen Whitmer's request for an expedited major disaster declaration for the State of Michigan as a result of the COVID-19 Pandemic beginning on January 31, 2020, and continuing.

The Governor is specifically requesting the Individual Assistance (all programs) statewide; debris removal and emergency protective measures (Categories A and B), including direct Federal assistance, under the Public Assistance program statewide; and Hazard Mitigation statewide.

For your reference, I have also attached a comprehensive Stafford Act Declaration Process Fact Sheet.

We will notify you as soon as a determination is made. Should you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

Respectfully,

Jacob Spell

Fact Sheet: DHS Measures on the Border to Limit the Further Spread of Coronavirus

March 23, 2020 at 12:23 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Release Date:

March 23, 2020

<https://www.dhs.gov/news/2020/03/23/fact-sheet-dhs-measures-border-limit-further-spread-coronavirus>

In order to limit the further spread of coronavirus, the U.S. has reached agreements with both Canada and Mexico to limit all non-essential travel across borders. Working closely and collaboratively, the Department of Homeland Security is part of a North American approach to stop the spread of the virus.

Additionally, CBP will no longer detain illegal immigrants in our holding facilities and will immediately return these aliens to the country they entered from – Canada or Mexico. Where such a return is not possible, CBP will return these aliens to their country of origin.

These measures will be implemented on March 21, 2020 and will be in place for 30 days, at which point they will be reviewed by both parties.

The U.S., Mexican, and Canadian governments are taking necessary action to fight against this pandemic together.

Northern Border

- March 20, 2020: [Joint Statement on US-Canada Joint Initiative: Temporary Restriction of Traveler Crossing the US-Canada Land Border for Non-Essential Purposes](#)

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars daily cross-border trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries.

supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Southern Border

- March 20, 2020: [Joint Statement on US-Mexico Joint Initiative to Combat the COVID-19 Pandemic](#)

The strong partnership and close cooperation between the United States and Mexico has allowed us to maintain a productive border environment. We value the health and safety of our citizens and keep that at the forefront of joint decisions made by our respective leaders regarding cross-border operations.

Recognizing the robust trade relationship between the United States and Mexico, we agree our two countries' response to the ongoing global and regional health situation, require particular measures both to protect border trade and our countries' economies and ensure the health of our nations' citizens. We agree to the need for a dedicated joint effort to prevent spread of the COVID-19 virus and address the economic effects resulting from reduced mobility along our shared border.

The U.S. and Mexican governments further recognize critical services such as food, fuel, healthcare and life-saving medicines must reach people on both sides of the border every day. Essential travel must therefore continue unimpeded during this time. In order to ensure that essential travel can continue, the United States and Mexico are also temporarily restricting all non-essential travel across its borders.

"Non-essential" travel includes travel that is considered tourism or recreational in nature. Additionally, we are encouraging people to exercise caution by avoiding unnecessary contact with others.

This collaborative and reciprocal initiative is an extension of our nations' prudent approach that values the health and safety of our citizens in the joint decisions made by our respective leaders regarding cross-border operations.

This joint initiative will commence at 00:01 Saturday March 21 throughout the US-Mexico land border for a period of 30 days subject to extension upon review.

Detention Facilities

CBP is the first line of defense of our nation's borders. To help prevent the introduction of COVID-19 into

border facilities and into our country, aliens subject to the order will not be held in congregate areas for processing by CBP and instead will immediately be turned away from ports of entry.

Those encountered between ports of entry after illegally crossing the border similarly will not be held in congregate areas for processing and instead, to the maximum extent feasible, will immediately be returned to their country of last transit. These aliens are processed in stations designed for short-term processing, where distancing is not a viable option, creating a serious danger of an outbreak.

The Centers for Disease Control and Prevention (CDC) has determined that these conditions present a serious infection control challenge and are a risk to public health. Should an outbreak occur at these facilities, local medical facilities would be forced to devote extensive resources and may become overwhelmed.

This action will also protect the health of our country's dedicated border agents and other law enforcement personnel, who are vital to the security of our Nation.

Apprehension of illegal immigrants along both borders between POEs:

- *Migrants from Coronavirus Impacted Areas:* Since the beginning of the FY20 fiscal year in October through the end of February 2020 (over the period of October 1, 2019 to February 29, 2020), foreign nationals from 122 separate countries have been apprehended or denied entry (inadmissible) at the Southwest border, for a total of over 190,000 apprehended or inadmissible migrants from countries currently with confirmed COVID cases.
- *Size and Scale:* Every week, CBP apprehends between 7,000 – 9,000 individuals between ports of entry —the equivalent of 2.5 Diamond Princess cruise ships per week.
- *Human-to-human Spread:* The spread of coronavirus is exacerbated by human-to-human transmission and the need for detention. CBP law enforcement facilities are for short-term holding and do not provide for needed large-scale isolation, diagnosis, or treatment of such a novel disease.
- *CBP Facilities:* CBP facilities are not structured or equipped to effectively quarantine an infected population. CBP would be forced to rely on state and local hospitals to provide longer-term medical care for individuals who fall ill, further burdening our strained healthcare system and depriving American citizens of key medical resources.

Although CBP has policies and procedures in place to handle transmittable diseases, COVID-19 will impact already strained holding capacities and place an extreme burden on what is forecasted to be a stretched healthcare system and the nation's critical medical professionals who are needed to attend to U.S. citizens and legal residents.

Migrants should shelter-in-place in their homes and communities, rather than attempting a long and dangerous journey to the United States borders at the hands of traffickers and smugglers.

U.S. Citizens:

U.S. citizens, lawful permanent residents and certain other travelers are exempt from this action. They will receive the same processing, evaluation and potential CDC medical screening that all entrants undergo at Ports of Entry.

Authority:

Effective at March 21, 2020 at 12:00 a.m. EDT, CBP will, as authorized, implement CDC authority under U.S.C. § 265 to prohibit entry of certain persons into the United States. CBP will assist the Department of Health and Human Services' (HHS) and U.S. Centers for Disease Control and Prevention (CDC) to protect against the spread of the novel coronavirus (COVID-19) by implementing the emergency authorities under U.S.C. § 265 at the nation's land borders to prohibit the introduction of certain persons in the interest of public health.

Additional Information

“Essential travel,” which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the US;
- Individuals traveling for medical purposes (e.g., to receive medical treatment in the US);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (e.g., individuals working in the farming or agriculture industry who must travel between the US and Canada or the US and Mexico in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (e.g., government officials or emergency responders entering the US to support Federal, state, local, tribal, or territorial government efforts to respond to COVID-19 or other emergencies);
- Individuals engaged in lawful cross-border trade (e.g., truck drivers supporting the movement of cargo between the US and Canada or the US and Mexico);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the US; and
- Individuals engaged in military-related travel or operations.

Federal_Partners_Bring_Additional_Resources_to_US_for_COVID-19_Response

March 29, 2020 at 12:53 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 29, 2020

FEMA Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal

reimbursement, by FEMA for the states of California, New York and Washington, for states' use of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

FEMA ADVISORY: Coronavirus (COVID-19) Pandemic Whole-of America Response (APRIL 16, 2020)

April 16, 2020 at 1:20 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 16, 2020

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.
 - Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.
 - This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.
- The White House announced [a new collaboration by Schema.org](#) to help Americans find the

most up-to-date public health guidance and the most relevant information on testing facilities in their communities.

- Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.
- All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

CISA_releases_Version_3.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance

April 17, 2020 at 3:17 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the release of Version 3.0 of the Essential Critical Infrastructure Worker Guidance, found [here](#).

April 17, 2020

CISA Advisory

CISA releases Version 3.0 of the Essential Critical Infrastructure Worker Guidance

The Cybersecurity and Infrastructure Security Agency (CISA) has released [Version 3.0 of the Essential Critical Infrastructure Workers list](#). Version 3.0 provides clarity around a range of positions needed to support the critical infrastructure functions laid out in the original guidance and Version 2.0. This iteration includes a reorganization of the section around Healthcare and Public Health and more detail to clarify essential workers; emphasis for Emergency Medical Services workers; and adds lawyers and legal aid workers. Also included is language focused on sustained access and freedom of movement; a reference to the CDC guidance on safety for critical infrastructure workers; and a statement saying sick employees should avoid the workplace and the workforce. In worker categories, all references to “employees” or “contractors” have been changed to “workers.” Other additions include a reference to the USCG Marine Safety Information Bulletin on essential maritime workers; clarified language including vehicle manufacture; and many other small changes to clarify language.

CISA issued initial guidance on Essential Critical Infrastructure Workers on March 19, which was developed to help state, local, tribal, and territorial authorities as they decide who to allow freedom of movement in areas that are under restrictions such as shelter-in-place or quarantine. That initial guidance was developed with input from our government and industry partners, on the assumption that we would need to update the guidance as we received additional feedback from stakeholders.

CISA moved quickly to incorporate feedback to update the list of Essential Critical Infrastructure Workers to expand and specify additional categories of essential workers who are key to maintaining a community’s safety, public health, and economy. These changes

were included in Version 2.0 of this guidance, released March 28, generally represented minor clarifications or additions that did not shift the overall scoping of critical infrastructure activity as highlighted in the initial release. Specifically, clarity was provided around a range of supporting and enabling activity for infrastructure resilience – the commodity, services, and logistical supply chains of other infrastructure functions. This included more direct call outs for essential sanitation and hygiene production and services, as well as manufacturing of critical products.

The Guide continues to be a resource for state and local decision makers and is in no way a binding document. Ultimately, all final decisions rest with state and local authorities, who must use their own judgment to balance public health and safety with the need to maintain critical infrastructure.

The degree to which state and local orders have leveraged our guidance when defining essential workers is encouraging. A common national picture will ultimately benefit us all. We hope this updated Guide helps as your communities grapple with the impacts of COVID-19. Please direct any questions to CISA.CAT@cisa.dhs.gov.

Regional Isolation & Quarantine Sites

To: Wasserman, Adam R (MIL), Fordice, Justin, Way, Bryan (OFM), Zimmerman, Matthew S (DOH), Benardo, Nichole (MIL), Larson, Ann (DES)

During today's meeting, the governor indicated that he'd like us to consider a state run regional isolation and/or quarantine site. I'd like to get together and discuss the planning and siting considerations as well as how FEMA would process this request.

DHS.IGA

United States / Canadian Border Travel

March 18, 2020 at 6:10 PM EDT

To: DHS.IGA

Homeland Security Advisors and Governors Senior Staff,

The U.S. and Canada are working closely together to limit the spread of the coronavirus between our countries. To that end, we are advising that non-essential travel across the northern border be delayed until health authorities recommend normal movement. More specific guidance will be provided to you soon. Once we are able to provide full guidance, we will schedule a conference call with you to discuss the implementation.

Q: Are you closing the border?

A: No.

Q: Will commerce or cross border cargo be limited?

A: Essential commercial trade & commerce will NOT be impacted. We will maintain a secure & strong economic supply chain.

Q: Will travel for health purposes be restricted?

A: No, movement of health workers and patients for treatment will continue.

Thank you for your ongoing partnership. Please continue to reach out with questions. Again, once we are able to provide full guidance, we will schedule a conference call with you to walk through the implantation and address concerns.

Thank you,

Office of Intergovernmental Affairs

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 8, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is

loaded.

- **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
 - Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
 - This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

FEMA_Stakeholder_Advisory:_State-Managed,_Federally-Supported_COVID-19_Response_Continues

March 24, 2020 at 12:13 PM EDT

To: casey.katims@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 24, 2020

FEMA Advisory

State-Managed, Federally-Supported COVID-19 Response Continues

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, 8,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington and California were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington and New York. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff because the projected cases there are expected to be greater than Washington. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected. FEMA is working with the Department of Health and Human Services and the state of New York to complete the construction of a 1,000-bed medical station at the Jacob K. Javits Convention Center in New York City to care for patients with special health needs. These medical stations increase local healthcare capabilities and can be tailored to meet local requirements.

Please see attached for updated information on the federal response efforts, including support for delivery of critical goods and services, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

Sanchez, Alejandro (GOV)

Letter from Governor Inslee re: NWDC

March 23, 2020 at 4:09 PM EDT

To: Carina.G.Benito@ice.dhs.gov

Cc: Tim.A.Petrie@ice.dhs.gov

Hello, Assistant Director Benito:

My name is Alejandro Sanchez, and I am hoping to direct this email to the right person. Recently, Governor Inslee sent a letter to ICE and GEO leadership, requesting information about COVID-19 planning at the Northwest Detention Center. I have attached that letter here.

I originally sent the letter to Director Asher, but when she was unavailable, I forwarded it to Assistant Director Lawrence. As per Director Lawrence's away message, I am now forwarding this inquiry to you. Do you know whether your agency or GEO leadership intend to provide us information about COVID-19 planning at the Northwest Detention Center? If a response has been issued, could you forward it to me?

Thank you for your attention to this matter,
Alejandro

ALEJANDRO SANCHEZ

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are [executing a four-pronged approach](#) to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation**.

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19 response, please review the attached fact sheet.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Weekly Update: DHS Response to COVID-19

WASHINGTON – The Department of Homeland Security and its dedicated workforce across more than a dozen offices and components are working diligently with the White House to execute an unprecedented, whole-of America response to the COVID-19 pandemic. These strategic and tactical efforts range from coordinating critical air transportation to addressing medical supply shortages to expediting the inspection of vital goods at our borders, ensuring that our national supply chains remain abundant, accessible, and reliable.

“Everything we have done to this point has been unprecedented and everything we do in the coming weeks and months ahead focuses on life-safety and reducing suffering,” said FEMA Administrator Pete Gaynor. “It is absolutely critical that we maintain our response efforts alongside our federal, state, local, tribal, and industry partners to ensure the virus’s spread is contained and human life is preserved.”

Below is a list of some of DHS’s efforts against COVID-19 last week:

Federal Emergency Management Agency (FEMA)

Deploying Federal Funds in Support of State Response Efforts. Federal funds are being deployed to help ensure that health care providers have the critical resources they need to provide rapid care and treatment to COVID-19 patients in hard-hit areas across the U.S. As of April 12th, FEMA has obligated \$5.2 billion in support of state response efforts.

Increasing Availability of Critical Resources. As a part of the Supply Chain Stabilization Task Force, FEMA is executing a whole-of- America approach to address the limited supply of critical and life-saving equipment. As of April 12th, FEMA has coordinated the delivery of the following to areas in greatest need : 38 million N95 respirators, 32.6 million surgical masks, 5.5 million face shields, 4.7 million surgical gowns, 30.3 million gloves, 212,000 coveralls, and 10,448 ventilators.

Expanding Surge Capacity in Highly-Impacted Areas. FEMA is focusing its allocation of resources in highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls.

- On April 6th, FEMA and the U.S. Army Corps of Engineers announced plans to convert three convention centers in Virginia into temporary hospital facilities. The facilities – the Dulles Expo Center in Northern Virginia and the Richmond and Hampton Roads convention centers – will be able to provide beds for 1,107 acute patients or 1,848 non-acute patients. The conversion is expected to be complete within six weeks.
- On April 8th, FEMA and HHS delivered 80,000 nasopharyngeal swabs to various federal Community-Based Testing Sites (CBTS) locations to help surge testing capacity nationwide.
- As of April 12th, FEMA has delivered 8,600 medical beds to surge capacity and care for an increased volume of COVID-19 patients across the U.S.

Coordinating Air Flights to Address Medical Supply Shortages. FEMA is expediting movement of critical supplies including masks, respirators, gloves, goggles and surgical gowns, from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge. As of April 12th, 28 international flights have arrived in the U.S. with critical medical supplies. An additional 28 flights are scheduled over the next three weeks.

Countering Weapons of Mass Destruction (CWMD)

Administering Medical Screenings at Airports. CWMD contract personnel are continuing to support the CDC with enhanced medical screenings for travelers through 13 specially designated airports. As of April 12th, CWMD has processed approximately 271,529 travelers for enhanced screening, including 1,491 who were referred to CDC for further medical evaluation.

CUSTOMS AND BORDER PROTECTION (CBP)

Maintaining Domestic Supply of Critical Medical Equipment. On April 8th, CBP and FEMA announced that the federal government will begin restricting exports of PPE to ensure that critical supplies stay in the country to fight COVID-19.

Securing U.S. Borders. On April 9th, CBP provided an operational update on activities for the month of March. Total Border Patrol encounters have declined 7% total in March from February, and 76% since the height of the crisis last May. In addition, 80% of the people who CBP encountered since the March 21 enactment of Title 42 are being returned to the

country from where they came within two hours.

Cybersecurity and Infrastructure Security Agency (CISA)

Protecting Critical Workers and Infrastructure from Potential Threats. CISA regularly publishes guidance to help individuals, businesses, organizations, and governments protect their essential workers, while also improving their security posture against a myriad of potential threats throughout the COVID-19 pandemic.

- On April 6th, CISA updated its list of essential businesses. To date, 45 states and territories have published Essential Business Designations, 20 of them are referencing this list in their essential business designations, while 14 states or territories have incorporated CISA guidance fully into their own lists.
- On April 8th, CISA and CDC issued new guidelines aimed at getting workers in critical infrastructure who may have been exposed to COVID-19 back to work faster. It also calls on employers to take steps to ensure workplace safety, like sending workers home immediately if they are sick and increasing air exchange in the workplace.

Protecting Against Malicious Cyber Actors. On April 8th, CISA and the United Kingdom's National Cyber Security Centre issued an activity alert titled, COVID-19 Exploited by Malicious Cyber Actors. This joint alert addresses the growing use of COVID-19-related themes by malicious cyber actors to attack individuals, businesses, and organizations with a range of ransomware and malware.

Protecting Networks and Cloud Environment. On April 9th, CISA released interim Trusted Internet Connections (TIC) guidance to aid agencies in securing their network and cloud environments. This guidance supports the current surge in teleworking and use of collaboration tools amongst the federal workforce during the COVID-19 pandemic.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Americans Safe While Ensuring Continuity of U.S. Travel: TSA continues to follow CDC guidance to protect its workers and the nation's transportation system, while ensuring the freedom of movement for people and commerce will not be impeded during the pandemic. Between April 5th and April 12th, TSA has screened more than 729,000 travelers who have all reached their destinations safely.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Immigration and Customs Enforcement, in close coordination with the State Department, continues to bring stranded Americans home on the return leg of removal flights to Central America. Between March 22nd and April 10th, ICE has flown 1,037 individuals back to the U.S. from Columbia, El Salvador, Honduras, and Nicaragua.

& ANALYSIS (I & A)

Keeping the Homeland Safe, Secure and Resilient. On April 8th, DHS Intelligence and Analysis (I&A) published information to federal, state, local, tribal and territorial counterterrorism and law enforcement officials on the potential for COVID-19-related cyber threats and fraud. These threat-monitoring activities ensure the homeland is safe, secure, and resilient from hostile actors who might otherwise attempt to exploit the crisis to harm American lives.

United States Coast Guard (USCG)

Facilitating the Offload of Cruise Ships. The U.S. Coast Guard is working non-stop to protect the health and safety of Americans inbound to the U.S. while helping slow the spread of COVID-19. Between April 5th and April 10th, USCG facilitated the offload of 100 passengers and 881 crew members from one cruise ship in Florida and helped transfer 7 crew members from a second cruise ship to local hospitals. In Louisiana, the USCG worked with state and local authorities to disembark several healthy crew members after determining they were not infected with COVID-19.

Keeping the U.S. Maritime Supply Chain Open and Viable. As of April 12th, USCG is monitoring 38 commercial vessels with crew or passengers that have embarked from a coronavirus port of interest in the last 14 days.

FEMA-IGA

FEMA Advisory: Option to Transition Federal Community-Based Testing Sites to State Management

April 09, 2020 at 8:46 PM EDT

To: FEMA-IGA

FEMA ADVISORY “ APRIL 9, 2020

Coronavirus (COVID-19) Pandemic Community-Based Testing Sites Transition

The Department of Health and Human Services and the FEMA worked with state and local partners to establish Community-Based Testing Sites (CBTS) in CDC-prioritized locations across the country. The CBTS model was developed for states, local public health agencies, healthcare systems, and commercial partners as they work together to stop the spread of coronavirus (COVID-19) in their communities, focusing initially on healthcare facility workers and first responders.

The CBTS model has been a profound success, screening over 84,800 individuals; testing over 77,000 individuals; and having a COVID positive rate of approximately 20% - meaning that the CBTS are testing the right individuals at the right time. Since the onset, we have also led technological advances, such as the validation of nasal self-swabbing, which has minimized the need for trained health professionals and personal protective equipment.

As a result of these advances, many states have indicated that they want to fully transition the CBTS to state control, allowing more flexibility in testing and reporting. Many states have already begun transitioning these programs, and other states have implemented testing sites based on the CBTS model.

Therefore, the federal CBTS Task Force is working with states to clarify whether sites want to continue as they are now, or transition to full state control. Under state control, CBTS sites would still receive technical assistance from the federal government and be able to request supplies through the normal FEMA systems.

The CBTS Task Force will continue to work closely with the states and FEMA Regions to ensure a successful transition and ensure that each state has the flexibility and autonomy to manage and operate testing sites within the needs of their specific community.

Transition Plan

The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.

Potential advantages of a fully state-managed site include:

- The opportunity for the states to better serve their own communities, while leveraging

federal support to augment their state's success.

- The potential to expand patient throughput to >250 per day, use a credentialed provider of their choice, and route patient samples to a lab of their choice.
- The ability to use a locally run call center or the regular state notification processes for public health results.

Responsibilities

The USPHS Commissioned Corps officers onsite (1-3 per location) will work with the site manager to plan for and complete the transition checklist and will verify that the site is ready for transition to the state. Once the sites are transitioned to the states, each state will be responsible for:

- Assuming responsibility for staffing their sites to ensure quality control, safety, biohazard waste management, and security;
- Assuming responsibility for the credentialed provider to order the labs;
- Procuring and managing their own cadre of supplies (e.g., personal protective equipment, test kits, etc.); requests for continued federal support should be made through the normal FEMA process
- Contracting for lab testing; and
- Managing patient notification process for results, while maintaining patient privacy under the [Health Insurance Portability and Accountability Act of 1996 \(HIPAA\)](#).

After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.

Eligibility for Reimbursement under FEMA's Public Assistance Program

States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share. Costs should be reasonable and necessary to address the public health needs of the event and all costs incurred should be documented. More information on what COVID-19 activities are eligible for reimbursement under the Public Assistance Program can be found in the [COVID-19 Pandemic: Eligible Emergency Protective Measures fact sheet](#) and the [COVID-19 Pandemic: Emergency Medical Care fact sheet](#). Information on how to apply is available in the [COVID-19 Pandemic: Public Assistance Simplified Application fact sheet](#). More information on contracting and procurement can be found in the [Procurement Under Grants: Under Exigent or Emergency Circumstances fact sheet](#).

RE: Possible Check in Coordination Call with Governor Inslee and FEMA Region 10 Administrator

To: Radwanski, Betty

Cc: Ward, Erin, Keelan, Kayla

Hi Betty,

Thank you for reaching out. Governor Inslee is available on Monday, April 13 at 11:30 AM.

If this works on your end, please let me know what number the Governor and staff should call.

Thank you,

Stacey

STACEY TICHENOR

Subject: Possible Check in Coordination Call with Governor Inslee and FEMA Region 10 Administrator

Hi Stacey,

I am so sorry it has taken so long to get back to you. I appreciate all the work you do and for your call.

We are now looking at possibly Friday or Monday for a potential half-hour call with Governor Inslee and the FEMA Region 10 Administrator Mike O'Hare. Would the Governor have any availability on Friday, April 9 after 2:30? Or possibly Monday, April 13 any time after 11:00 AM?

A draft agenda is below:

Purpose of the Call

Opportunity to discuss COVID-19 ongoing operations, needs and issues.

Agenda

Welcome and Roll Call

- FEMA Intergovernmental Affairs

Opening Remarks

- FEMA Region 10 Administrator

- Washington Office of Emergency Management Director

Open Discussion

- Updates
- Needs/Issues/Questions

The following people will be available to answer questions:

- FEMA Region 10 Administrator
- Washington Office of Emergency Management
- Department of Health and Human Services
- U.S. Small Business Administration
- Department of Defense
- FEMA Recovery Division

Closing Remarks

- FEMA Region 10 Administrator

Thank you again for your help,

Betty

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 23, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- In order to help Americans, return to work, the federal government will distribute cloth facial coverings for critical infrastructure workers who do not need medical-grade personal protective equipment (PPE) for their daily work.
 - The facial coverings will be delivered in a phased approach for infrastructure workers, first responders and food producers. Prioritization will also be to areas with the highest COVID-19 infection rates.

- Distribution will be based on the Cybersecurity and Infrastructure Security Agency's analysis of priority infrastructure sectors and will include food production and distribution, energy, water and wastewater treatment, essential transportation and logistics, first responders, communications, hazardous materials management, manufacturing of medical supplies, and sanitation and disinfection supplies.
 - The first phase includes distribution of more than 19 million facial coverings.
 - HHS anticipates production of 6.5 million facial coverings each week for the next month.
- As of **April 22**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 96.9 million surgical masks, 6.6 million face shields, 13.8 million surgical gowns, 727 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.69 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Subject: Marcos Orellana Pineda

Hello, Officers Berg, Williams, and Muirhead:

I am writing you today on behalf of Marcos Orellana Pineda. As I understand it, he is currently detained at the Northwest ICE Processing Center, having travelled to the United States as a human trafficking and domestic survivor. Furthermore, Mr. Pineda has pending applications for Special Immigrant Juvenile Status and asylum, no arrests or criminal record, and a guardian, Ms. Kathleen Goforth, ready to take him into her care. Lastly, I have read the many letters, submitted on his behalf, from legislators and others and see that he has broad support from his community.

For these reasons, I respectfully request that you give full and fair consideration to his case. I also ask that, in accordance with the privacy waiver attached to this email, you provide me with updates as appropriate.

Best regards,
Alejandro

COVID-19 Potentially overlooked public health concern

March 19, 2020 at 4:52 AM EDT

To: elizabeth.pauli@cityoftacoma.org, achen@tpchd.org, Pcoexecutive@piercecountywa.gov, victoria.woodards@cityoftacoma.org

Executive Dammeier, Director Chen, Manager Pauli, and Mayor Woodard,

I would like to start this email by commending every level of government covered in this email. In this unprecedented in nature and magnitude I commend ALL of you on your work thus far! I'm writing this evening in the wake of watching a news clip covering several out of region municipalities relaxing arrest standards for "simple crimes". The arrest standards relaxation being the least of my concerns, but it did start my mind down a focused train of thought that left me wondering IF my inevitable concern is on the radar of your various jurisdictions. My concern is the infection threat to the effected, my neighbors, my employees, and my customers.

I own a business on and reside near the intersections of the 6th, 9th, and 10th congressional districts OR the intersection of the 25th, 27th, & 29th legislative districts, county council districts 2,4,5,&6, Tacoma City council positions 4,5,6,7,&8. The intersection of East 72nd Street and East McKinley Ave is locally known and regarded as a "hot spot" for persons experiencing homelessness, transients, railroad trespassers, mentally ill, and/or intoxicated persons. While all jurisdictions have thus far done a remarkable job I'm writing tonight knowing and appreciating that western Washington has not experienced potential social breakdown in quite some time and from past experience living through both tropical depressions, and Hurricanes in the south east while serving as an Active Duty enlisted Air traffic controller I've experienced social breakdown and unrest and at this point in our COVID-19 struggle its at the front of my mind.

For nearly 10 years under arguably "normal" circumstances I've watched petty crime occur at our local Chevron gas station, Safeway, Goodwill, Dollar General, and even my own business. Admittedly some of these folks are legitimately experiencing homelessness by no fault of their own and some of the crimes I've observed are purely for survival. When they happen to other residents or businesses I feel great empathy for the victim, and the several times they've happened to me I've experienced a fair amount of frustration to say the least, but I digress.

We can likely argue 1,000 different reasons why people in our community are experiencing homelessness, but I think we can all agree there is an elevated percentage of that population prone to crime, mentally ill, or intoxicated on one or more substances, and even sometimes all 3. I'm writing tonight in the wake of watching a news clip about relaxed arrest standards to protect the incarcerated population (which I actually don't disagree with) and on Tuesday night breaking up a group of what appeared to likely be intoxicated cyclists without a home, and an uncontrollable desire to deface my business's signage and flowerbeds.

My overlying concern is as we face the grim reality of our COVID-19 situation more stringent measures will need to be taken and the very folks I just mentioned will still be wandering the streets. Not all of them, but certainly more than one of them shoplifting from the Chevron Station, or the Safeway which are now the primary sources for food and fuel for about a 1.5 mile radius around my home. I wonder what level of consideration has been given to these folks potentially unknowingly being infected with COVID-19 and wandering into a grocery store to get their meal while unknowingly infected and touching, or coughing on produce and merchandise? Is it in the interest of public safety to assume mentally ill, intoxicated, or persons experiencing both have the wherewithal to understand the gravity of this pandemic and the safety threat they pose to their fellow citizens?

Just 2 miles south of me there is a vacant elementary school. A vacant schools have classrooms that could become bunk rooms with the appropriate 6' separation, an abundance of bathrooms, a cafeteria to feed them, and a gym and playground for common area recreation. It seems to me that facilities like this could be a quick, inexpensive, and safe shelter in place location with the assistance of FEMA, Military, and/or National Guard resources for people experiencing homelessness, and it affords law enforcement the ability to put someone without a home in a secure location without arresting them all the while preserving the effected person's health, public health, and allowing these folks to participate in our communal effort to social distance and stem the tide of new COVID-19 infections so we can all resume our lives as they were just a few weeks ago.

I implore Pierce county, and the city of Tacoma to utilize every local, state, and federal resource available to ensure our efforts to stem the tide of this pandemic are in fact fruitful in preserving lives, and protecting our local economy. Its quite possible that simply one unknowingly infected person could wander through a grocery store and easily spread the virus to 20-30 new people and further delay our return to life as it was and potentially cost an innocent bystander their life, or unknowingly allow them to carry the virus back home to a susceptible family member and cost them their life.

If these contingencies have already been considered I would very much appreciate a detailed plan from the county, and city. If they haven't been considered I look forward to hearing how you plan to combat these threats moving forward.

Thank you,

Brett Johnson

Coronavirus (COVID-19) Pandemic Whole-of-America Response - April 16

April 16, 2020 at 1:46 PM EDT

To: kym.ryan@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 16, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- * FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people

- * FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

- * Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.

-- Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.

--This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.

* The White House announced [a new collaboration by Schema.org](#) to help Americans find the most up-to-date public health guidance and the most relevant information on testing facilities in their communities

--Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.

--All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

Subject: RE:

Alejandro,

Yes, I was made aware of the letter a few weeks after it was received. You are correct -- any response would point you to the website.

The section you are referring to is guidance specifically for the facility administrator (GEO Group), so I don't have information on their communications with other detention or correctional facilities in the area. Separately, ICE maintains frequent communication among our detention centers, particularly regarding the movement, health, and safety of detainees.

Yes, we have points of contact with the local health department.

Thank you,
Melissa

To: Nitsch, Melissa A <Melissa.A.Nitsch@ice.dhs.gov>

Subject: RE:

Thank you for the update. Out of curiosity, are you aware of the letter our office sent to GEO/ICE regarding COVID-19 planning at the NWDC? I'm guessing that any response would have pointed to the guidance packet found at the link you provided me.

That said, do you know whether NWDC staff, either GEO or ICE, have taken the following steps (both of which are sourced from that manual)?

- Identify points of contact in relevant state, local, tribal, and/or territorial public health department

before cases develop.

- Communicate with other correctional and detention facilities in the same geographic area to share information including disease surveillance and absenteeism patterns among staff.

Again, thank you.

DHS and USDA Move to Protect American Farmers and Ensure Continued Flow of America's Food Supply

Department to Temporarily Amend Certain H-2A Requirements During COVID-19 National Emergency

WASHINGTON— The Department of Homeland Security, with the support of the U.S. Department of Agriculture (USDA), has announced a temporary final rule to change certain H-2A requirements to help U.S. agricultural employers avoid disruptions in lawful agricultural-related employment, protect the nation's food supply chain, and lessen impacts from the coronavirus (COVID-19) public health emergency. These temporary flexibilities will not weaken or eliminate protections for U.S. workers.

Under this temporary final rule, an H-2A petitioner with a valid temporary labor certification who is concerned that workers will be unable to enter the country due to travel restrictions can start employing certain foreign workers who are currently in H-2A status in the United States immediately after United States Citizenship and Immigration Services (USCIS) receives the H-2A petition, but no earlier than the start date of employment listed on the petition. To take advantage of this time-limited change in regulatory requirements, the H-2A worker seeking to change employers must already be in the United States and in valid H-2A status.

Additionally, USCIS is temporarily amending its regulations to protect the country's food supply chain by allowing H-2A workers to stay beyond the three-year maximum allowable period of stay in the United States. These temporary changes will encourage and facilitate the continued lawful employment of foreign temporary and seasonal agricultural workers during the COVID-19 national emergency. Agricultural employers should utilize this streamlined process if they are concerned with their ability to bring in the temporary workers who were previously authorized to work for the employer in H-2A classification. At no point is it acceptable for employers to hire illegal aliens.

“This Administration has determined that continued agricultural employment, currently threatened by the COVID-19 pandemic, is vital to maintaining and securing the country's critical food supply chain. The temporary changes announced by USCIS provide the needed stability during this unprecedented crisis,” said Acting Secretary of Homeland Security Chad F. Wolf.

“USDA welcomes these additional flexibilities provided by the Department of Homeland Security today,” said Secretary of Agriculture Sonny Perdue. “Providing flexibility for H-2A employers to utilize H-2A workers that are currently in the United States is critically important as we continue to see travel and border restrictions as a result of COVID-19. USDA continues to work with the Department of Homeland Security, the Department of Labor and the Department of State to minimize disruption and make sure farmers have access to these critical workers necessary to maintain the integrity in our food supply.”

The temporary final rule is effective immediately upon publication in the Federal Register. If the new petition is approved, the H-2A worker will be able to stay in the United States for a period of time not to exceed the validity period of the Temporary Labor Certification. DHS will issue a new temporary final rule in the Federal Register to amend the termination date of these new procedures in the event DHS determines that circumstances demonstrate a continued need for the temporary changes to the H-2A regulations.

The H-2A nonimmigrant classification applies to alien workers seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States, usually lasting no longer than one year, for which able, willing, and qualified U.S. workers are not available.

To: Sanchez, Alejandro (GOV)

Alejandro,

Yes, I was made aware of the letter a few weeks after it was received. You are correct -- any response would point you to the website.

The section you are referring to is guidance specifically for the facility administrator (GEO Group), so I don't have information on their communications with other detention or correctional facilities in the area. Separately, ICE maintains frequent communication among our detention centers, particularly regarding the movement, health, and safety of detainees.

Yes, we have points of contact with the local health department.

Thank you,
Melissa

Subject: RE:

Thank you for the update. Out of curiosity, are you aware of the letter our office sent to GEO/ICE regarding COVID-19 planning at the NWDC? I'm guessing that any response would have pointed to the guidance packet found at the link you provided me.

That said, do you know whether NWDC staff, either GEO or ICE, have taken the following steps (both of which are sourced from that manual)?

- Identify points of contact in relevant state, local, tribal, and/or territorial public health department before cases develop.
- Communicate with other correctional and detention facilities in the same geographic area to share information including disease surveillance and absenteeism patterns among staff.

Again, thank you.
Alejandro

Alejandro,

Unfortunately, I'm unable to provide any case updates on this individual without a signed privacy waiver.

On a separate note, I wanted to make sure you were aware of our website, which is tracking all developments related to the COVID-19 impacts on agency operations, detainee care, etc. The information is reviewed and updated frequently. I'm sure you are receiving inquiries from the public, so please feel free to share if it is helpful: <https://www.ice.gov/coronavirus>

You can actually send all inquiries directly to me, as my role is to essentially handle all (non-media) stakeholder inquiries. If there's something that requires certain subject matter expertise, I will coordinate directly with those officials to get you information. I cover the entire ICE portfolio, and am in close contact with the managers of all our various operational components.

Thank you,

Melissa

Good morning Alejandro,

I'm writing to acknowledge receipt of your request, and also introduce myself as your point of contact for any ICE-related inquiries in Washington State.

With regards to your request for updates, we are not generally permitted to release any information on someone without a signed privacy waiver (signed by the person about whom you are requesting information). However, given the current situation, we are asking our attorneys to review and determine what is legally releasable without a signature. I'll be in touch either way. In the meantime, please don't hesitate to reach out should you have further questions on this or any other matter.

Thank you,

Melissa Nitsch

Subject: Marcos Orellana Pineda

Hello, Officers Berg, Williams, and Muirhead:

I am writing you today on behalf of Marcos Orellana Pineda. As I understand it, he is currently detained at the Northwest ICE Processing Center, having travelled to the United States as a human trafficking and domestic survivor. Furthermore, Mr. Pineda has pending applications for Special Immigrant Juvenile Status and asylum, no arrests or criminal record, and a guardian, Ms. Kathleen Goforth, ready to take him into her care. Lastly, I have read the many letters, submitted on his behalf, from legislators and others and see that he has broad support from his community.

For these reasons, I respectfully request that you give full and fair consideration to his case. I also ask that, in accordance with the privacy waiver attached to this email, you provide me with updates as appropriate.

Best regards,
Alejandro

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 27, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 26**, CDC and the Occupational Safety and Health Administration (OSHA) [released targeted guidance](#) to help meat and poultry processing facilities implement infection control practices to reduce the risk of transmission and illness from COVID-19 in these facilities.
 - Meat and poultry processing facilities present unique challenges for the prevention and control of COVID-19 transmission among workers.
 - Meat and poultry processing employers should implement a combination of

- engineering controls, cleaning and disinfection, social distancing, work practice controls, administrative controls, and use of personal protective equipment.
- Basic worker infection prevention information and training should be provided to all workers in a clear and accessible manner, including training on social distancing and ways to reduce the spread of infection. To ensure accessibility, multi-lingual materials should be considered and made available, as appropriate.
- FEMA, HHS and the Cybersecurity Infrastructure and Security Agency (CISA) along with other federal agencies are distributing cloth face coverings as part of a multi-prong approach to re-open American economic activity while continuing to limit spread of COVID-19.
 - As of **April 26**, 32.5 million cloth face coverings are being processed and distributed to state, local, tribal, private sector, and federal entities.
 - The facial coverings are being delivered in a phased approach for infrastructure workers, first responders and food producers who do not need medical-grade personal protective equipment (PPE) for their daily work. Distribution is based on CISA's analysis of priority infrastructure sectors.
 - The federal government will provide additional face coverings in production to states, territories and tribes for distribution, with priority to emergency services, food production and distribution, and other sectors that support community lifelines.
 - FEMA and HHS are also providing face coverings to federal departments and agencies with mission essential functions to promote health and safety in the workplace and in their execution of public-facing missions
 - As of **April 26**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 74.7 million N95 respirators, 104.8 million surgical masks, 7.2 million face shields, 15 million surgical gowns, 798 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
 - The U.S. has now processed 5.2 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Coronavirus_(COVID-19)_Pandemic_Community-Based_Testing_Sites_Transition

April 10, 2020 at 8:47 AM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Community-Based Testing Sites.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Community-Based Testing Sites Transition

The Department of Health and Human Services and the FEMA worked with state and local partners to establish Community-Based Testing Sites (CBTS) in CDC-prioritized locations across the country. The CBTS model was developed for states, local public health agencies, healthcare systems, and commercial partners as they work together to stop the spread of coronavirus (COVID-19) in their communities, focusing initially on healthcare facility workers and first responders.

The CBTS model has been a profound success, screening over 84,800 individuals; testing over 77,000 individuals; and having a COVID positive rate of approximately 20% - meaning that the CBTS are testing the right individuals at the right time. Since the onset, we have also led technological advances, such as the validation of nasal self-swabbing, which has minimized the need for trained health professionals and personal protective equipment.

As a result of these advances, many states have indicated that they want to fully transition the CBTS to state control, allowing more flexibility in testing and reporting. Many states have already begun transitioning these programs, and other states have implemented testing sites based on the CBTS model.

Therefore, the federal CBTS Task Force is working with states to clarify whether sites want to continue as they are now, or transition to full state control. Under state control, CBTS sites would still receive technical assistance from the federal government and be able to

request supplies through the normal FEMA systems.

The CBTS Task Force will continue to work closely with the states and FEMA Regions to ensure a successful transition and ensure that each state has the flexibility and autonomy to manage and operate testing sites within the needs of their specific community.

Transition Plan

The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.

Potential advantages of a fully state-managed site include:

- The opportunity for the states to better serve their own communities, while leveraging federal support to augment their state's success.
- The potential to expand patient throughput to >250 per day, use a credentialed provider of their choice, and route patient samples to a lab of their choice.
- The ability to use a locally run call center or the regular state notification processes for public health results.

Responsibilities

The USPHS Commissioned Corps officers onsite (1-3 per location) will work with the site manager to plan for and complete the transition checklist and will verify that the site is ready for transition to the state. Once the sites are transitioned to the states, each state will be responsible for:

- Assuming responsibility for staffing their sites to ensure quality control, safety, biohazard waste management, and security;
- Assuming responsibility for the credentialed provider to order the labs;
- Procuring and managing their own cadre of supplies (e.g., personal protective equipment, test kits, etc.); requests for continued federal support should be made through the normal FEMA process;
- Contracting for lab testing; and
- Managing patient notification process for results, while maintaining patient privacy under the [Health Insurance Portability and Accountability Act of 1996 \(HIPAA\)](#).

After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.

Eligibility for Reimbursement under FEMA's Public Assistance Program

States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share. Costs should be reasonable and necessary to address the public health needs of the event and all costs incurred should be documented. More information on what COVID-19 activities are eligible for reimbursement under the Public Assistance Program can be found in the [COVID-19 Pandemic: Eligible Emergency Protective Measures fact sheet](#) and the [COVID-19 Pandemic: Emergency Medical Care fact sheet](#). Information on how to apply is available in the [COVID-19 Pandemic: Public Assistance Simplified Application fact sheet](#). More information on contracting and procurement can be found in the [Procurement Under Grants: Under Exigent or Emergency Circumstances fact sheet](#).

Office of Intergovernmental Affairs (IGA)

Treasury Launches Web Portal and Begins Disbursement of CARES Act Funding to State, Local, and Tribal Governments

April 13, 2020 at 6:01 PM EDT

To: morgan.wilson@gov.wa.gov

State, Local, and Tribal Leaders –

Today, April 13, the U.S. Department of the Treasury released eligibility guidance for CARES Act funding to State, Local, and Tribal Governments. Below, please find additional information. Note that additional guidance on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Sincerely,

The White House Office of Intergovernmental Affairs

U.S. Department of the Treasury: The CARES Act Provides Assistance for State and Local Governments

April 13, 2020

Through the Coronavirus Relief Fund, the CARES Act provides for payments to State, Local, and Tribal governments navigating the impact of the COVID-19 outbreak.

The CARES Act established the \$150 billion Coronavirus Relief Fund.

Treasury will make payments from the Fund to States and eligible units of local government; the District of Columbia and U.S. Territories (the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands); and Tribal governments (collectively “governments”).

The CARES Act requires that the payments from the Coronavirus Relief Fund only be used to cover expenses that—

- (1) are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID-19);
- (2) were not accounted for in the budget most recently approved as of March 27, 2020 (the date of enactment of the CARES Act) for the State or government; and
- (3) were incurred during the period that begins on March 1, 2020, and ends on December 30, 2020.

Additional information on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Amounts paid to States, the District of Columbia, U.S. Territories, and eligible units of local government are based on population as provided in the CARES Act. The CARES Act directs

Treasury to use U.S. Census Bureau data for the most recent year for which data is available. The amount of payments made to each State will be reduced by the aggregate amount of payments that will be disbursed to eligible local governments within such State that have provided the required certifications to Treasury. Additional information on these points can be accessed below.

A unit of local government eligible for receipt of direct payment includes a county, municipality, town, township, village, parish, borough, or other unit of general government below the State level with a population that exceeds 500,000. Eligible local governments must submit the certification required by the CARES Act to Treasury by the deadline set forth below in order to receive payment.

Payments to Tribal Governments are to be determined by the Secretary of the Treasury in consultation with the Secretary of the Interior and Indian Tribes. Although that consultation has not yet concluded, certain data is requested of Tribal governments at this time to assist in this determination. Additional information on payments to Tribal governments will be posted as it becomes available.

Governments eligible for payments must provide payment information and required supporting documentation through the electronic form accessible below. To ensure payments are made within the 30 day period specified by the CARES Act, governments must submit completed payment materials not later than 11:59 p.m. EDT on April 17, 2020. Eligible local and Tribal governments that do not provide required information—and in the case of a local government, the required certification—by 11:59 p.m. EDT on April 17, 2020, may not receive any payment from the Fund.

- Data sources and the distribution methodology for units of local government (more [here](#)).
- Listing of eligible units of local government (more [here](#)).
- Eligible Units: Submission Required for Receipt of Coronavirus Relief Fund Payments (more [here](#)).

FEMA_Advisory:_Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response

April 13, 2020 at 8:03 PM EDT

To: jim.baumgart@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Project Airbridge, PPE Preservation, and resource requests from the International Reagent Resource.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

In support of the coronavirus (COVID-19) pandemic response, FEMA provides the following: FEMA Project Airbridge video Advisory; Personal Protective Equipment (PPE) Preservation Best Practices Advisory and Fact Sheet, and a Resource Requests from the International Reagent Resource (IRR) Advisory and Fact Sheet.

FEMA Project Airbridge

To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC

data.

A brief video on Project Airbridge is available on [FEMA's Media Gallery Website](#) and on all FEMA social media accounts.

Project Airbridge Advisory: Attachment [1]

Personal Protective Equipment Preservation Best Practices

This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19 pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

Preserving Personal Protective Equipment Best Practices Advisory: Attachment [2]

Preserving Personal Protective Equipment Best Practices Fact Sheet: Attachment [3]

Resource Requests from the International Reagent Resource

The International Reagent Resource (IRR), established by the Centers for Disease Control and Prevention (CDC), acquires, authenticates, and produces reagents that scientists need to carry out basic research and develop improved diagnostic tests, vaccines, and detection methods.

The (IRR) Fact Sheet (attached) outlines a simplified process for states and territories to make resource requests from the IRR. Consolidating testing supplies under the IRR alleviates burden on public health labs, which increases efficiency and reduces need to work with separate, individual suppliers for swabs, reagents, and other diagnostic testing supplies.

International Reagent Resource Advisory: Attachment [4]

International Reagent Resource Fact Sheet: Attachment [5]

Subject: COVID Testing Call (WA)

When: Saturday, April 25, 2020 10:00 AM-11:00 AM (UTC-08:00) Pacific Time (US & Canada).

Where: 888-270-9936 Code: 3147559#

Agenda:

1. Introduction

2. Discussion Questions

- A. How do you feel your state is doing with testing? Do you have all the testing you need to reopen?
- B. What efforts, if any, are your state taking to increase testing?
- C. What type of support, if any, do you need from the federal government to increase testing?
- D. As you scale testing, are there any improvements you need to make to your data reporting system?
- E. What is your strategy around surveillance, including ILI/syndromic surveillance?
- F. What are your sentinel surveillance strategies among vulnerable populations, including screening for asymptomatic cases? (e.g., nursing homes, FQHCs, IHS)
- G. What are your plans around contact tracing?

3. Conclusion and Next Steps

Joint_FEMA-CBP_Statement_on_Export_of_Critical_PPE

April 08, 2020 at 3:28 PM EDT

To: tara.lee@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the statement below from our partners in the Federal Emergency Management Agency (FEMA) and U.S. Customs and Border Protection (CBP) regarding a statement on the export of critical Personal Protective Equipment (PPE).

April 8, 2020

COVID-19 Update

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and U.S. Customs and Border Protection (CBP) are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported.

FEMA Stakeholder Advisory: Coronavirus (COVID-19) Pandemic - Eligible Emergency Protective Measures

March 19, 2020 at 3:50 PM EDT

To: FEMA-IGA

Office of External Affairs
U.S. Department of Homeland Security
Washington, DC 20472

FEMA

March 19, 2020

Contact: Congressional and Intergovernmental Affairs Division

Phone: 202-646-3444

Advisory

Coronavirus (COVID-19) Pandemic: Eligible Emergency Protective Measures

Consistent with the President's national emergency declaration for the coronavirus (COVID-19) pandemic on March 13, 2020, FEMA urges officials to, without delay, take appropriate actions that are necessary to protect public health and safety pursuant to public health guidance and conditions and capabilities in their jurisdictions.

Attached is the [*Coronavirus \(COVID-19\) Pandemic: Eligible Emergency Protective Measures Fact Sheet*](#), which provides guidance on the types of emergency protective measures that may be eligible under FEMA's Public Assistance Program in accordance with the COVID-19 Emergency Declaration in order to ensure that resource constraints do not inhibit efforts to respond to this unprecedented disaster.

If you have any questions, please contact the Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444 or at FEMA-IGA@fema.dhs.gov.

RE: need some details on staffing numbers by skill set

March 16, 2020 at 6:10 PM EDT

To: Baumgart, Jim (GOV)

Hi Jim,

If you have some time, I'd like to chat quickly about the email below so that if needed, we can modify the request that was sent earlier today. It would be timely to adjust the request before resources start moving.

Justin

From: Fordice, Justin

Sent: Monday, March 16, 2020 2:06 PM

To: Baumgart, Jim (GOV) <jim.baumgart@gov.wa.gov>; Wasserman, Adam R (MIL) <Adam.Wasserman@mil.wa.gov>

Cc: Ezelle, Robert (MIL) <Robert.Ezelle@mil.wa.gov>

Subject: RE: need some details on staffing numbers by skill set

Thanks Jim,

If WA State is comfortable, I'll update FEMA RX and HHS with the numbers and information below. For clarification, what is 31/75? Or 71/35?

Subject: FW: need some details on staffing numbers by skill set

Adam,

We got some answers back from April Putney at King County. While the data is a little light on the shelter, there is real good info in here email about what medical staffing would look like.

Here's what a typical shelter staffing model looks like:

Sincerely,
Jim

JIM BAUMGART

Sr. Policy Advisor | Office of Governor Jay Inslee

Sent: Monday, March 16, 2020 1:34 PM
To: Baumgart, Jim (GOV) <jim.baumgart@gov.wa.gov>
Subject: Re: need some details on staffing numbers by skill set

Hi Jim, here's more information.

For the 31/75:

- **The 71:** There is no specific credential to work in a shelter. People with social work or low-level medical (CNAs) medical backgrounds would be wonderful, but the tasks that we anticipate here are just staff to supplement Shelter providers once existing shelter staff either become ill or to operate new spaces to help “deintensify” existing shelters. People for this role just need to be ready to join existing operations and help them keep going.
- **The 35:** These are ideally higher-skilled supportive services people—either nurses, CNAs, social workers, or others with a background in social services. In these cases, we’re assuming that the County Workforce can (at least in the short term) fill the operational needs, but we will continue to need help with skilled work to help keep people supported and staying in I/Q settings. At the

same time, if mid-skilled persons are not available, we'll also take any type of person we can get.

For the AC/RC mass care facilities, we've since updated the numbers: the staffing request, per week, based on 12-hour shifts, for each AC/RC (with 6 planned, each with 400-person capacity) is:

- General non-clinical staff: 40 per site (240 total for 6 sites)
- Licensed Mental Health Practitioner: 8 (48)
- Unlicensed Mental Health Practitioner: 11 (66)
- Physician: 2 (12)
- Psychiatrist: 2 total (rotate between sites)
- Registered Nurses: 17 (102)
- RN Supervisors: 6 (36)
- Advanced Practice RN: 6 (36)
- Medical Director (physician): 1 (6)
- Medical Assistant: 6 (36)

Lily,

Thanks for the phone call yesterday. Can you get me some details on slide 8? I'm working a staffing request and FEMA needs a bit more specificity to work it. It will also help when we send this out for contract.

As you note, we simply do not have the staffing expertise readily available within our volunteer or state workforce.

Jim

Greetings former JOHN MIDGETT crew, friends, family,

Out of an abundance of caution the decision has been made to cancel the decommissioning ceremony for CGC JOHN MIDGETT (WHEC 726) due to the ongoing corona virus outbreak in the Seattle area. This is very disappointing as my Shipmates and I were looking forward to connecting with former crew, friends and family, swapping sea stories and together honoring 48 years of faithful service this beautiful ship has provided the Coast Guard and America.

Because work to prepare the ship for foreign military transfer must continue we cannot postpone the ceremony; however, rest assured that we will observe and document with video all the proper customs and courtesies associated with decommissioning JOHN MIDGETT. Once we have done this we will share the video with all who desire.

Warmest regards,

mwc

CAPT Mike Cribbs

Commanding Officer

USCGC JOHN MIDGETT (WHEC-726)

FEMA Advisory: Administrator Gaynor Second Letter to Emergency Managers

April 16, 2020 at 8:37 AM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 16, 2020

Coronavirus (COVID-19) Pandemic: Administrator Letter to Emergency Managers

Attached is FEMA Administrator Pete Gaynor's April 15, 2020 letter to the Nation's Emergency Managers, which outlines lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic. In this letter, Administrator Gaynor addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations (FMS) and Large-Format Alternative Care Sites (ACS); Mitigation efforts to flatten the curve; strengthening the supply chain; as well as importance of busting myths.

Administrator Gaynor's guidance is a follow-on to his first letter to emergency managers, dated March 27, 2020, which requested key actions and outlined critical steps for the initial COVID-19 response.

The letter is available on the [FEMA website](#), as well

The Trump Administration Is Supporting the People of Washington To Combat the Coronavirus

April 23, 2020 at 11:27 AM EDT

To: Undisclosed recipients:

Washington State and Local Partners,

Thank you for your continued efforts in the whole-of-America approach to respond to and mitigate the impact of COVID-19 (coronavirus) for the benefit of the people of Washington. As you know, our citizens are best served when response is locally executed, State managed and Federally supported. The Federal government scales best practices, coordinates key priorities, provides regulatory flexibilities, guidance, and key resources to supplement, but not replace, private sector, local, and State resources. On January 31, the Trump Administration [declared](#) the coronavirus a public health emergency. The declaration set in motion the Trump Administration's whole-of-government approach to protecting the health of Americans in response to the coronavirus. Working in partnership with State, Local, and Tribal leaders, the President and Administration have and continue to leverage all resources to respond to the coronavirus, bringing together government and private industry in a collaborative response.

Attached, please find a fact sheet (***The Trump Administration Is Supporting the People of Washington***) overviewing Federal coordination and assistance provided to the State of Washington and the people of Washington to combat the coronavirus. The attached information is bolstered by hundreds of additional actions by the Federal government to help the people of Washington in partnership with State and local leaders. The White House Office

of Intergovernmental Affairs (WH IGA) will continue to share pertinent information as it becomes available. Please do not hesitate to reach out to our office if we can be of assistance. As a reminder, WH IGA is the primary liaison between the White House and the country's State and local elected officials and Tribal Governments.

Sincerely,

The White House Office of Intergovernmental Affairs

William F. Crozer
Special Assistant to the President/Deputy Director
White House Office of Intergovernmental Affairs

Download the COVID-19 App

COVID-19: Important Resources for State, Local, and Tribal Officials

- **Guidelines for Opening Up America Again:** On April 16, President Trump and the White House Coronavirus Task Force unveiled [new guidelines](#) (*download [here](#)*) for the reopening of America. Developed by the top medical experts from across the Government and based on verifiable metrics regarding the situation on the ground, the guidelines outline a phased return to reopening and include specific steps for State, Local, and Tribal officials to

follow in tailoring their response. The guidelines also set clear benchmarks on new cases, testing, and hospital resources for States to meet to proceed toward a phased reopening. In the days and weeks ahead, the Administration plans to continue robust coordination and outreach with State, Local, and Tribal leaders as we collectively work to reopen the country.

- **Coronavirus Guidelines for America:** On March 31, the White House announced updated [Coronavirus Guidelines for America \(Español\)](#), extending social distancing efforts through April 30. On April 3, the Centers for Disease Control and Prevention (CDC) issued [guidance](#) recommending individuals wear cloth face coverings *in public settings where other social distancing measures are difficult to maintain* (e.g. grocery stores and pharmacies, particularly in areas of significant community-based transmission. On April 8, CDC also provided [guidelines](#) regarding when people in critical infrastructure roles can return to work after being exposed to a confirmed or suspected case of COVID-19. Additional information on critical infrastructure below.
- **Up-To-Date Information:** The most up-to-date, verified information and guidance can be found via the Centers for Disease Control and Prevention Coronavirus Disease 2019 website – www.coronavirus.gov. The Coronavirus Task Force holds frequent briefings, which can be viewed live [here](#).
- **COVID-19 Response and Recovery Primer:** Response and recovery efforts are locally executed, state managed, and federally supported. It is important that requests for assistance, including for critical supplies, get routed through the proper channels as soon as possible. Learn more about the response and recovery process via this important resource – [Coronavirus \(COVID-19\) Pandemic: Response and Recovery Through Federal-State-Local-Tribal Partnership](#). FEMA’s public assistance guidance for COVID-19 response efforts can be found [here](#). Guidance for Tribal Governments can be found [here](#).
- **Critical Infrastructure Workforce Guidelines:** On March 16th, the Department of Homeland Security (DHS) issued updated [critical infrastructure guidance](#) in response to the COVID-19 emergency. DHS continues to work with stakeholders in the critical infrastructure community to update the advisory list if necessary as the Nation’s response to COVID-19 evolves. The guidance, and accompanying list, is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list is advisory in nature and is not a federal directive or standard.
- **Rural Resource Guide:** USDA and Federal partners have programs that can be used to provide immediate and long term assistance to rural communities affected by the COVID-19 pandemic. These programs can support recovery efforts for rural residents, businesses, and communities. USDA developed a [resource guide](#) for State, Local, and Tribal leaders, and other stakeholders.
- **Coronavirus Fact vs. Myth:** Rumors can easily circulate within communities during a crisis. FEMA setup a [website](#) to help the public distinguish between rumors and facts regarding the response to the coronavirus pandemic.
- **Fraud & Scam Protection:** The Department of Justice is remaining vigilant in detecting, investigating, and prosecuting wrongdoing related to the crisis. Find out how you can protect yourself and helpful resources on DOJ’s Coronavirus Fraud Prevention [website](#). The Federal Trade Commission has also established a [website](#) with helpful information to help consumers avoid coronavirus-related scams.
- **Social Media Resources:** Download the [Apple COVID-19 Screening Tool](#). Follow the White House on [Twitter](#) and [Facebook](#). Also follow HHS ([Twitter/Facebook](#)) and CDC ([Twitter/Facebook](#)) You can also find informational videos from Coronavirus Task Force

members on mitigation, social distancing, etc. on the White House's [YouTube](#) page.

- **Mental Health Resources:** Natural disasters – including such pandemics as the coronavirus outbreak – can be overwhelming and also can seriously affect emotional health. The Substance Abuse and Mental Health Administration's (SAMHSA) Disaster Distress Helpline – 1-800-985-5990 (or text TalkWithUs to 66746) – provides 24/7, 365-day-a-year crisis counseling and support to anyone who is seeking help in coping with the mental or emotional effects caused by developments related to the coronavirus pandemic. Learn more about the Disaster Distress Helpline [here](#).
- **Addiction & Substance Abuse Resources:** The COVID-19 pandemic has created countless challenges for those delivering care to our most vulnerable populations. People with Substance Use Disorder (SUD) and Opioid Use Disorder (OUD) are especially at high risk suffering complications from COVID-19. The White House Office of National Drug Control Policy (ONDCP), which leads and coordinates the development, implementation, and assessment of U.S. drug policy, released a [fact sheet](#) that contains information on Federal actions to expand telemedicine and e-prescribing, to increase flexibility for treatment with methadone and buprenorphine, to improve access to prescribed controlled substances, and to expand assistance to rural areas.
- **Administration Actions and Federal Agency Resources:** USA.gov is cataloging all U.S. government activities related to coronavirus. From actions on health and safety to travel, immigration, and transportation to education, find pertinent actions [here](#). Each Federal Agency has also established a dedicated coronavirus website, where you can find important information and guidance. They include: Health and Human Services ([HHS](#)), Centers of Medicare and Medicaid ([CMS](#)), Food and Drug Administration ([FDA](#)), Department of Education ([DoED](#)), Department of Agriculture ([USDA](#)), Small Business Administration ([SBA](#)), Department of Labor ([DOL](#)), Department of Homeland Security ([DHS](#)), Department of State ([DOS](#)), Department of Veterans Affairs ([VA](#)), Environmental Protection Agency ([EPA](#)), Department of Energy ([DOE](#)), Department of Commerce ([DOC](#)), Department of Justice ([DOJ](#)), Department of Housing and Urban Development ([HUD](#)), Department of the Treasury ([USDT](#)), Internal Revenue Service ([IRS](#)), Office of the Director of National Intelligence ([ODNI](#)), and U.S. Election Assistance Commission ([EAC](#)).

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 26, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 25**, FEMA announced that more than \$5.1 million dollars in crisis counseling service grants have been made available to five states.
 - The grants, made to Massachusetts, Michigan, New Jersey, New York and Washington, will support programs providing free, confidential counseling to assist individuals through community-based outreach and educational services.
 - Due to the COVID-19 nationwide emergency and the need to protect the safety and health of all Americans, the crisis counseling will be delivered by phone,

internet and the media (including social media).

- As of **April 25**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.7 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.7 million surgical gowns, 793.8 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

FEMA_and_Our_Partners_Remain_Actively_Engaged_to_Support_State-Managed_Coronavirus_Response

March 28, 2020 at 1:56 PM EDT

To: morgan.wilson@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 28, 2020

FEMA Advisory

FEMA and Our Partners Remain Actively Engaged to Support State-Managed Coronavirus Response

“I can tell you this weekend, we will be reporting on aggressive efforts that our supply stabilization task force at FEMA is taking to import medical supplies from around the world.” – Vice President Mike Pence

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- Apple and CDC, together with the White House and FEMA, launched a [new website](#) and app with a COVID-19 screening tool and resources to help people protect their health.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is

shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. We are sending more every day, and we are working nonstop to acquire or produce even more.

Today, the US-NS *Comfort* will be underway today from Norfolk, VA to New York, NY.

- The *Comfort* will arrive at Pier 90 in Manhattan on Monday – only approximately a mile away from the Javits Convention Center where the U.S. Army Corps of Engineers are actively constructing a 2,910-bed alternate care facility.
- The *Comfort* is equipped with 12 operating rooms, 1,000 hospital beds, a medical laboratory, a pharmacy, an optometry lab, digital radiology services, a CAT-scan, two oxygen producing plants, a helicopter deck and a crew of nearly 1,200 U.S. military personnel.
- The crew onboard the *Comfort* will provide critically needed medical surge capacity for New York Metropolitan area. Their mission will be to care for New Yorkers who do not have COVID-19, but who require urgent medical care.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.

- This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
- Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act to avoid governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Michigan, Missouri, South Carolina, Texas, Washington, the commonwealth of Puerto Rico, and the territory of Guam were approved for major disaster declarations to assist with additional needs identified in these states. Seventeen states and four tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

DHS_Announcement:_Important_Message_on_Essential_Financial_Services_Sector_Workers_-_From_
U.S._Treasury_Secretary_Mnuchin

March 22, 2020 at 7:13 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

On behalf of U.S. Treasury Secretary Mnuchin, please see an important message regarding financial service sector guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

A message from U.S. Treasury Deputy Assistant Secretary for Cybersecurity and Critical Infrastructure Protection David B. Lacquement:

Workers across the financial services sector play an important role in supporting the American people and our Nation's economy. Consistent with the need to ensure access for essential financial services workers, Secretary Mnuchin issued the attached memorandum. This memorandum points to guidelines from the President and the Department of Homeland Security, which provides guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

Everyone should follow guidance from the Centers for Disease Control and Prevention as well as State and local officials regarding strategies to limit disease spread. We are dedicated to working closely with all of you to ensure the safety of the workforce and ensure the continued operations of the financial services sector in support of our Nation's economy.

Thank you for your continued support.

FW: Notification of a Major Disaster Declaration for the State of Illinois (FEMA-4489-DR-IL)

March 26, 2020 at 4:05 PM EDT

To: William Kirkland, Crozer, William (who.eop.gov), SHORT, CHERIE, Harper, Jay, Pat.Collier@illinois.gov

Cc: FEMA-IGA, Greff, Stacie

STATE OF ILLINOIS**FEDERAL DISASTER DECLARATION FACT SHEET****MARCH 26, 2020**

Today, March 26, 2020, President Donald J. Trump granted a Major Disaster Declaration for the State of Illinois triggering the release of Federal funds to help people and communities recover from COVID-19 that occurred January 20, 2020, and continuing. Details of the disaster declaration and assistance programs are as follows:

Declaration Number:	FEMA-4489-DR
Incident:	COVID-19
Incident Period:	January 20, 2020, and continuing
Federal Coordinating Officer:	Steven W. Johnson National FCO Program
Individual Assistance (IA): households):	(Assistance to individuals and
IA-Designated Areas: limited to the Crisis Counseling Program in all areas in the State of Illinois.	Individual Assistance
Public Assistance (PA):	(Assistance for emergency work and the repair or replacement of disaster-damaged facilities):
PA-Designated Areas: measures (Category B) not authorized under other Federal statutes, including direct federal assistance, under the Public Assistance program at 75 percent federal funding for all areas in the State of Illinois.	Emergency protective
OTHER:	Additional designations may be made at a later date if requested by the State and warranted by the results of further assessments.

For your reference, I have attached fact sheets on the Individual Assistance and Public Assistance programs.

If you have any questions, please contact FEMA's Office of External Affairs, Congressional and Intergovernmental Affairs Division at (202) 646-3444.

FEMA Advisory: Coronavirus (COVID-19) Pandemic (April 2, 2020)

April 02, 2020 at 6:05 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 2, 2020

Coronavirus (COVID-19) Pandemic:

Attached you will find today's FEMA Daily Briefing Points for the whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves,

gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.

- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

FEMA-IGA

FEMA Advisory: Coronavirus (COVID-19) Pandemic Supply Chain Stabilization (April 8, 2020)

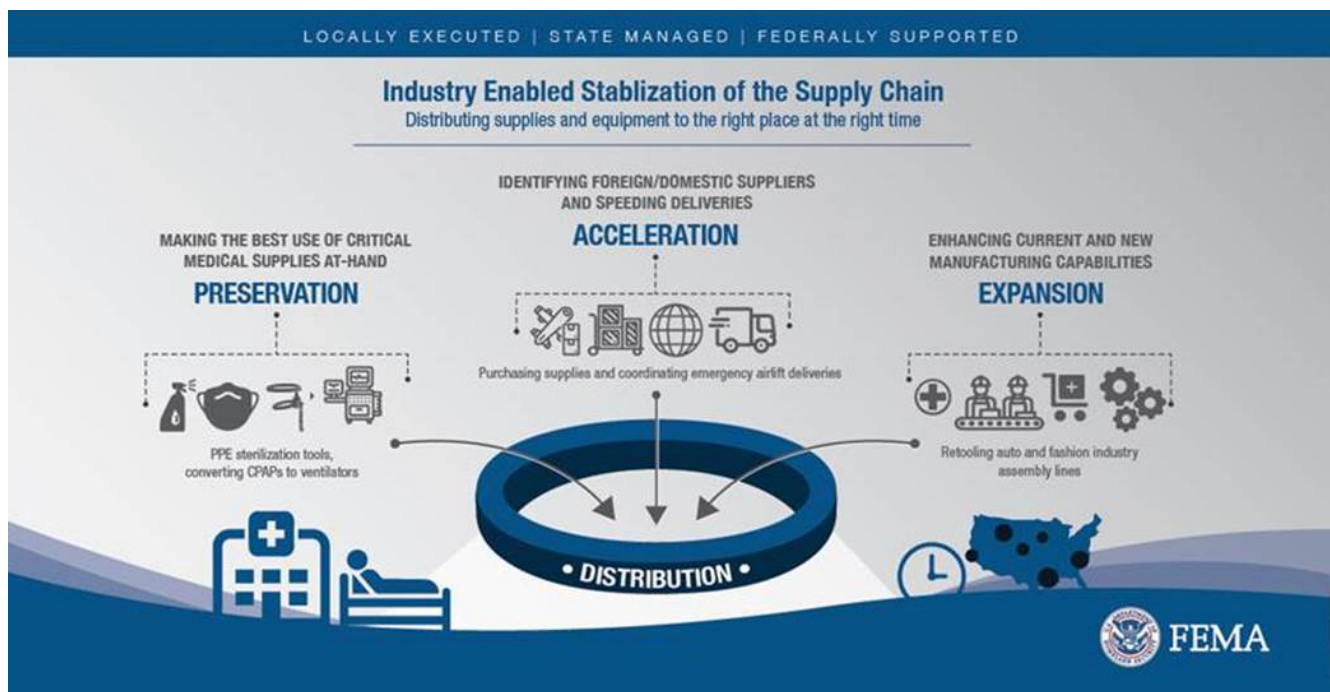

April 08, 2020 at 8:09 PM EDT

To: FEMA-IGA

FEMA ADVISORY – APRIL 8, 2020

Coronavirus (COVID-19) Pandemic Supply Chain Stabilization

The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective and lifesaving resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a four-prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and expand domestic production of critical resources to increase supply long-term.

The **preservation** line of effort focuses on providing federal guidance to responders and the non-medical sector, such as public service (police, fire, EMT), energy distribution and the food industry on how to preserve supplies when possible, to reduce impact on the medical supply chain.

The **acceleration** line of effort provides direct results to help meet the demand for personal protective equipment PPE through the industry to allow responders to get supplies they need as fast as possible.

The **expansion** line of effort is charged with generating capacity with both traditional and non-traditional manufacturers, such as adding machinery or by re-tooling assembly lines to produce new products.

The **allocation** of supplies facilitates the distribution of critically needed PPE to "hot spots" for immediate resupply. States report on supplies and can request assistance when they experience a shortage.

The Supply Chain Task Force is working with the major commercial distributors to facilitate the rapid distribution of critical resources in short supply to locations where they are needed most. This partnership enables FEMA

and its federal partners to take a whole-of-America approach to combatting COVID-19. The task force is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. The distributors have agreed to focus portions of their distributions on these areas in order to alleviate the suffering of the American people.

A key example of this partnership in action is Project Airbridge. The airbridge was created to reduce the time it takes for U.S. medical supply distributors to receive PPE and other critical supplies into the country for their respective customers. FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.

Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations. Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide. HHS and FEMA determine hotspot areas based on CDC data.

Working together, we can efficiently distribute these vital resources to hospitals, nursing homes, long-term care facilities, pre-hospital medical services, state and local governments, and other facilities critical to caring for the American people during this pandemic.

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; Hydroxychloroquine/Chloroquine; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The latest updates and information on how to protect yourself and what to do if you think you are sick are available at www.coronavirus.gov.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
 - Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.
 - Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
 - The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
 - As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
 - The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
- The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
 - Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19

- patients.
 - The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
 - 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and 300 additional ventilators to New Jersey.
- Forty states, four territories and 23 tribes have issued stay at home orders.

COVID-19 FEMA Region 10 - Media Analysis & Social Listening Report April 20, 2020

April 20, 2020 at 11:14 AM EDT

To: Undisclosed recipients:

Good morning.

The national social hot issues report from today is attached for greater context.

Please let us know if anyone should be added to our distro list.

If you come across any stories that should be included in the report, please send them our way.

COVID-19

FEMA REGION 10 - EXTERNAL AFFAIRS MEDIA ANALYSIS & SOCIAL LISTENING REPORT

APRIL 20, 2020

SUMMARY

- UW coronavirus model says Washington state could potentially start safely reopening the week of May 18 pending more testing and contact tracing.
- FEMA gives over \$7.5 million to Oregon for COVID-19 response.
- Oregon leaders urge residents to continue with social distancing, reporting positive trends in COVID-19 numbers.
- Alaska reports encouraging numbers, while ConocoPhillips announces further spending cuts and rural communities brace for challenges without Ravn Air.
- Protesters gathered at Washington's capital Olympia this weekend, as media reports highlight the challenges faced by unemployed individuals, rural hospitals, and businesses.
- Onions in Idaho are going to waste as demand decreases.
- State unemployment offices work to keep up with applications and adjustments from the CARES act.

Public Sentiment

- In Oregon, people are watching closely to see how federal pandemic-response funds will be spent, and many believe that official updates on the pandemic are inaccurate due to low testing.
- Rural Oregon is growing increasingly frustrated by the economic toll of social distancing with news reports of few new cases.
- Washington residents are divided, with skepticism that the state will be able to safely open soon mixed with reluctance to keep businesses closed for much longer.

Washington

Protests

- Demonstrators rally in Olympia against Washington's coronavirus stay-at-home order. ([Seattle Times](#), [KIRO](#), [KOMO](#), [The News Tribune](#))
- Hundreds of fishermen and women protest fishing restrictions in Washington. ([KHQ](#))
- Governor Inslee responded in [a statement](#), and on social channels, [supporting free speech](#), and asking people to do what they can to flatten the curve so that businesses and other [regular activities can resume when the time is right](#).

Plans to Reopen

- UW coronavirus model says Washington state could potentially start safely reopening the week of May 18. ([Seattle Times](#)) Most comments online doubt the ability to open safely so quickly. ([example](#))
- More testing, contact tracing, supplies needed before state dials back social distancing. ([The Spokesman-Review](#)) On Facebook, users are mixed in their support for waiting any longer to reopen. ([example](#))

PPE

- A Washington Congressman calls on the administration and FEMA to leverage the Department of Defense manufacturing capabilities to produce PPE. ([Representative Kilmer's Twitter](#))

Economy

- Puget Sound-area Boeing workers heading back to work amid pandemic. ([KOMO](#)) There is a mixed reaction to this news with some in support of reopening the plants to get people back to work, while others are concerned about safety and the ability to maintain social distancing. ([example](#))
- Washington state website crashes after seeing 'a tsunami of claims' for new coronavirus unemployment benefits. ([Seattle Times](#))

Hospitals

- COVID-19 puts rural hospitals in Eastern Washington on brink of financial collapse. ([The Spokesman-Review](#))

Testing

- University of Washington Medicine halts use of coronavirus testing kits airlifted from China after some had contamination. ([Seattle Times](#), [Washington Department of Health website](#), [KXLY](#))

Community Impact

- In parts of rural Washington, the lack of access to high-speed internet is adding a roadblock to people trying to work from home during the pandemic. ([The Spokesman-Review](#)) In response to the article, [people share their stories of struggling to stay connected](#) and work from home.

Oregon

Federal Response

- FEMA gives over \$7.5 million to Oregon for COVID-19 response. ([KEZI](#), [KATU](#), [KTVL](#), [KTVZ](#), [Univision Portland](#))
 - The dominant reaction is skepticism over how the funds will be spent. People want a breakdown of spending, and a follow-up report. Some are asking why the funding is needed since Oregon's numbers have been declining and since the state was able to send ventilators to New York. One person asked if FEMA had delivered funding to people affected by flooding in the state. ([example 1](#), [example 2](#), [example 3](#))

Business and Unemployment

- Rural Oregon counties are facing widespread business closures and press for reprieve from coronavirus closures—'We just can't hang on any longer.' ([The Oregonian](#)) Many people support easing restrictions in some rural areas, though people worry about intra-state travel. ([example](#))
- Oregon jobless claim system's 'restart' error returned despite state's insistence problem was fixed. ([The Oregonian](#)) People are very frustrated and [share their experiences](#) trying to access unemployment.

Flattening the Curve

- Oregon officials credit early action, luck to curbing virus. ([OPB](#), [KTVL](#)) Oregon is one of only five states expected to have the fewest COVID-19 deaths per capita as the peak reaches each state, according to University of Washington modeling.
 - Some [people distrust this positive news](#) due to perceptions of low testing, and others—especially in more rural areas—[call for businesses to be allowed to open](#) up immediately.
- 'Keep doing what you're doing': Heads of OHA and Oregon hospitals plead for continued social distancing. ([KTVB7](#)) People continue to debate the statistics and are frustrated at what they perceive as speculation, rather than evidence-based analysis. ([example](#))

Testing

- Oregon State University's TRACE team begins door-to-door testing. ([KEZI](#)) TRACE stands for Team-

based Rapid Assessment of Community-Level Coronavirus Epidemics, and the team plans to test 4,000 residents in Corvallis.

- Testing could expand in Oregon right now. Instead, tests sit idle amid restrictive guidelines. ([The Oregonian](#)) Tight controls on who should get tested have frustrated people who have symptoms but aren't part of the highest-risk groups. In reaction, most people call for more widespread testing, better contact tracing, and an overall more robust state response. ([example](#))

PPE

- Oregon National Guard brings PPE to all 36 Oregon counties. ([Portland Tribune](#))
- Washington County deputies are making their own facemasks to comply with new rules requiring masks be worn in jails. ([Washington Co. Sheriff's Facebook](#))
- Portland-based shoe company KEEN Footwear is making masks. ([FOX12](#))
- Oregon teen makes clear face masks for those hard of hearing. ([KATU2](#))

Protests

- Hundreds disregard stay-at-home order, gather to protest in Redmond, Oregon. ([The Oregonian](#))

Idaho

New and Recovered Cases

- 585 Idaho COVID-19 recoveries, 1,672 cases. ([KIFI8](#))
- Good weekend: No new COVID-19 cases in North Idaho. ([Coeur d'Alene Press](#))
 - Reactions range from speculating that protests will raise the number of cases, to a call for more testing for more accurate data. ([Facebook](#))

Testing

- State records show that North Idaho was testing less than other parts of the state as COVID-19 outbreak took hold. ([Idaho Statesman](#))

Economy

- Idaho residents are not yet receiving the additional unemployment relief promised through the CARES act, and they are asking why. ([Idaho Statesman](#))
 - Reactions vary as people wonder if the supplemental \$600 is really needed, and people debate the politics of COVID-19 policy and in-state legislation. ([Facebook](#))

Food Supply

- COVID-19's impact to the economy is hurting Idaho farmers. In a region that is one of the nation's leading onion suppliers, onions are going to waste. ([Idaho 6 News](#))
- Boise School District is adding supper, fresh snacks at some meal pick-up sites. ([CBS2](#))

Hand Sanitizer

- Mill Town Distillery is crafting hand sanitizer. ([Bonner County Daily Bee](#))

Protests

- State representative likens stay-home order to the Holocaust. ([Bonner County Daily Bee](#)) In response, some agree with the elected official, but many more do not. ([Facebook](#))
- Over 1,000 defy Idaho's stay-at-home order at Capitol protest. ([Idaho State Journal](#))

Alaska

Flattening the Curve

- Alaska reports encouraging numbers as coronavirus cases creep up. ([Alaska Public Media](#), [KTVA](#)) Five new cases of COVID-19, over 150 recoveries reported.
- Fairbanks, a former hotspot, sees 8th day without a new COVID-19 case. ([KTVE](#), [KXDF](#), [KTUU](#)) Most people are encouraged by this news, while a few question when reopening will occur. ([example](#))

Economy

- ConocoPhillips will cut another \$200M from spending in Alaska. ([KTUU](#))
- Bean's Cafe uses surplus foods donated from Anchorage restaurants to feed the city's hungry. ([KTUU](#)). With many restaurants left with excess food, numerous Anchorage businesses are donating to local food programs. Most reactions to this news are overwhelmingly positive. ([example](#))

PPE

- Alaska Boy Scouts in Wasilla are making PPE to protect healthcare providers against COVID-19.

([KTUU](#))

- Seward COVID-19 face mask project: 3,000 masks in 30 days. In partnership with the State of Alaska, Seward sewers will sew 3,000 masks that will be available for purchase for the public at a local craft store. ([Seward Journal](#))

Reopening

- A U.S. senator and U.S. representative from Alaska back Trump order to pull World Health Org funding. ([Fairbanks Daily News-Miner](#)) Reactions to this are mixed with many on both sides of the issue. ([example](#))

Tribes in Alaska

- Frontiers: Villages brace for change amid Ravn Air suspension. Ravn Air, one of the main passenger airlines that flies to remote Alaskan areas, has filed for bankruptcy. Many remote tribal villages rely on Ravn Airs service for passenger, mail and cargo deliveries. Other regional airlines are stepping up to help fill the void. ([KTVA](#))

Ike, Ryan

SIP Coordination

March 21, 2020 at 5:08 PM EDT

To: Smith, Jaime (GOV)

Cc: Brehmer, Savannah, Yost, David, Shagren, Karina L. (MIL) (Karina.Shagren@mil.wa.gov), Ward, Erin

Hey Jaime.

Below are some resources put together by the national Ad Council. I'm not sure they're really hitting what you need, but worth looking at, especially at the bottom (mental health/wellbeing). I've reached out to OR to find contacts for you from the state JIC and Gov Brown's group working on their messaging. We'll provide those contacts ASAP. Sounds like in OR there has been some discussion around the sensitivity of SIP vs a more gentle message like Stay Home, stay healthy. In short, it may be more effective to be specific and direct about the desired outcome (and actions to get there) rather than creating a campaign that could be seen as confusing or an obvious attempt to not say "shelter in place".

We'll be in touch. If you need anything, let me know!

Ad Council resources:

As they continue developing products over the next few days, they will be posted to the [Coronavirus Prevention Toolkit](#). Please continue to check the toolkit for the latest creative assets.

Ad Council's Coronavirus (COVID-19) efforts:

As discussed, the Ad Council has a number of efforts underway to provide critical messages to the American public in response to COVID-19. Our focus is reaching high-risk populations and the general public with messages around social distancing, personal hygiene and mental health.

- Today we launched a series of PSAs and content for our most **high-risk populations** as well as the general public in partnership with the White House and CDC/HHS. The assets include digital video, social graphics and digital banners in both English and Spanish. The PSAs inform high-risk populations about the steps they can take to protect themselves and help stop the spread of coronavirus and direct the public to the CDC's website, www.coronavirus.gov.
- We're also developing national broadcast PSAs featuring the **Surgeon General** that will communicate the most important ways Americans can protect themselves and those most at risk. The PSAs will be distributed to stations later this week.
- In partnership with ViacomCBS, we also just launched a multichannel campaign focusing on **social distancing**, and will soon extend this effort with new content to address mental health. The campaign includes broadcast, digital, social media and influencer content.
- The Atlantic's internal creative studio is developing a digital asset that provides **customized, relevant information**.
- iHeartMedia will support messaging around **social distancing and high-risk populations**, among other important topics related to COVID-19, across their network of stations.
- Additionally, the Ad Council will be **developing tailored content to help address mental health and wellbeing**.

- Finally, ABC/Disney is working on priority messaging for **parents and families** for distribution across their channels and platforms.

Cc: Shagren, Karina L. (MIL) <Karina.Shagren@mil.wa.gov>; Ward, Erin <Erin.Ward@fema.dhs.gov>

Subject: Connection

Hey Jaime.

It was great to meet you in person yesterday. I also appreciated the JIC walk through.

[Here is a copy of the ESF15 SOP](#) I was talking about. A few details to help navigate the document:

- The terminology is pretty different from what you're using, but I think it's generally clear how you

could crosswalk things. That said, titles and job descriptions are discussed on pg 11-14.

- Move to pg A-22 for Template of Coms Summary. These are extremely helpful to keep messaging/actions in line with the specific agencies so readers understand there are agency-specific priorities that are ongoing in addition to the priority messaging efforts being requested by executive leadership. This also helps keep your PIOs from being pulled in two directions.
 - The report also brings your sector reports into a common place (e.g. private sector, leg affairs, media, tribes, etc). If people are working for remote locations, this also keeps staff reporting through a common product (and daily timeline).
- **Annex B covers Government Coordination** (Gov, Legislature, Counties, Cities, tribes, and Federal Reps). It provides an overview, strategy and position titles/descriptions and Org Chart.
- **Annex C covers the JIC** (federal definition), which is slightly different from the way you all define it, but you can see the same functions are covered. It includes social media listening, photos/videos, news desk, spokesperson etc. In a nutshell, this is the distribution part of the operation. This section also includes overview, strategy, position titles and org chart.
- **Annex F covers Private Sector:** This is critical at this time given the number of partners at the table and the impacts to business. Clearly this group has a huge role in terms of getting consistent messaging to business/chambers on those policies and programs available to them via state or federal agencies.
- **Annex G covers Planning and Products:** this section generally outlines how to organize liaisons to other organizations, research, writing, community education needs, speakers bureau request tracking, LEP, ASL needs, graphics and any other “production” aspects of an operation. They work very close with JIC so you have a dedicated group just working on producing the content (for the rest of the operation to share). Benefit is that it ensures that everyone is pushing the same message/content/graphics so you don’t get accidental mixed signals or haves and have nots.
- Finally, I can’t stress enough that the “External Affairs Officer” or organizational lead should be part of the Command Staff. That person needs to be in the room for executive meetings and discussions related to the big operational picture. They need to be there to advise the leadership about possible issues from politics, media, public, trends, etc.

Finally, these are just notes and thoughts following our conversation yesterday and are not a critique.

The structure is expandable and can be implemented from various locations. We are available to help train or take Q/A if you need anything. I fully recognize that the folks at WA DOH and others have been in the fight for weeks now and any major reorgs could be counterproductive. So, please consider these thoughts as options. We will support you all in any way we can.

Thanks again,

Ryan

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 23, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- In order to help Americans, return to work, the federal government will distribute cloth facial coverings for critical infrastructure workers who do not need medical-grade personal protective equipment (PPE) for their daily work.
 - The facial coverings will be delivered in a phased approach for infrastructure workers, first responders and food producers. Prioritization will also be to areas with the highest COVID-19 infection rates.

- Distribution will be based on the Cybersecurity and Infrastructure Security Agency's analysis of priority infrastructure sectors and will include food production and distribution, energy, water and wastewater treatment, essential transportation and logistics, first responders, communications, hazardous materials management, manufacturing of medical supplies, and sanitation and disinfection supplies.
 - The first phase includes distribution of more than 19 million facial coverings.
 - HHS anticipates production of 6.5 million facial coverings each week for the next month.
- As of **April 22**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 96.9 million surgical masks, 6.6 million face shields, 13.8 million surgical gowns, 727 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.69 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

FEMA_Supply_Chain_Task_Force_Leads_Four-Pronged_Approach_to_Securing_Needed_Supplies_and_Equipment_in_COVID-19_Fight

March 31, 2020 at 10:39 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the fact sheet below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Supply Chain Task Force for COVID-19 response.

March 31, 2020

FEMA Fact Sheet

FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Service created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

The task force's primary effort is the sourcing of personal protective equipment (PPE), ventilators and other critical resources requested by states, tribes and territories. By using the structure of FEMA's NRCC, the task force is finding and executing solutions to meet urgent demand and enable the U.S. Government to surge support to COVID-19 "hot spots" as they arise.

The Supply Chain Stabilization Task Force is executing a whole-of-America approach to address limited supply of critical protective and life-saving equipment. Through a four-prong approach of *Preservation, Acceleration, Expansion and Allocation*, FEMA is bringing the full capacity of the Federal government to bear to find solutions to protect the American people and defeat COVID-19.

Locating Available Critical Resources

The task force's primary effort is the sourcing of personal protective equipment, ventilators and other critical resources to respond to requests by states, tribes and territories. Through the National Response Coordination Center, the task force is working to find critical resources to meet urgent demand and enable the U.S. Government to surge support to "hot spots" as they arise. In addition, the task force is engaging manufacturers, distributors and healthcare networks to build the next phase of supply chain stabilization.

Increasing Availability of Critical Resources

The task force is developing a strategy to increase availability of critical resources through four primary efforts:

Preservation

Preservation to limit unnecessary use of PPE and other supplies. Developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs are critical components of this strategy.

- The task force is in the process of developing and verifying techniques to clean and recycle products.
- This line of effort also includes developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs, critical components of this strategy.
- The task force is also working to expand equipment resources through the Preservation line of effort. The FDA issued an Emergency Use Authorization (EUA) for ventilators on March 24, which allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The new guidance will also assist health care personnel on how to use other ventilators, like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

Acceleration

Acceleration of industrial manufacturing is required to help meet the urgent demand placed on the market. Manufacturers are ramping up production of critical resources and have extended operating hours to increase production well above pre-COVID-19 levels.

- To expedite purchasing, FEMA issued a request for quotation for vendors who have needed medical equipment and supplies to sell to the agency.
- FEMA is also expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- As an example of this effort, FEMA coordinated an air bridge for flights from Asia

beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- The second flight landed in Chicago this morning. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical PPE (gloves, gowns, goggles, and masks) in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Additionally, in some cases, the federal government may purchase some of the supplies to be used to replenish the Strategic National Stockpile (SNS) or to provide to states with any identified and unmet needs.
- To address the anticipated ventilator shortage across the nation, the task force has implemented a similar strategy, leveraging the strengths of the commercial industry. Including numerous vendors, such as General Electric, Phillips, Medtronic, Hamilton, Zoll, ResMed, Hillrom and Vyair, to produce 20,000 ventilators over the next two months with the potential to add 100,000 by end of June. This represents a significant increase in velocity as the normal annual market is 30,000 per year.

Expansion

Expansion of the industry is also taking place. Manufacturers are enhancing production capacity with additional machinery, and in some cases re-tooling assembly lines to produce new products needed.

- As an example of this work, the Food and Drug Administration (FDA) is providing information for manufacturers on adding production lines or alternative sites, like automobile manufacturers, for making more ventilators during the COVID-19 public health emergency.
- In addition, the task force is working through over 350 leads to match American businesses who have excess raw materials, workforce or factory production capacity combined with an overwhelming desire to provide their support to the national response effort.
 - Task force members are actively working to facilitate the creation of private sector partnerships to pair companies that have volunteered excess factory production capacity, the talents of their workforce and access to their raw material supply chains with critical supply manufacturers who have the expertise in producing PPE, ventilator and other needed equipment.
 - The creation of these partnerships to align capacity with know-how will

unleash the potential engine of our national private sector and help overcome the supply shortfalls.

Allocation

Allocation of critical resources based on data-informed decisions. These decisions will be coordinated between the U.S. Government and the private sector.

- FEMA is focusing its allocation of critical resources to highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls, with consideration to the at-risk population distribution across the Nation.
- To more effectively adjudicate resources throughout the nation and private industry, a National Resource Prioritization Cell was established to unify government and private industry prioritization recommendations which will inform federal, state and private sector operations.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Supply Chain Stabilization

The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and enable domestic production of critical resources to increase supply long-term.

The **preservation** line of effort focuses on providing federal guidance to responders and the non-medical sector public service (police, fire, EMT), energy distribution and the food industry on how to preserve supplies when they reduce impact on the medical supply chain.

The **acceleration** line of effort provides direct results to help meet the demand for personal protective equipment through the industry to allow responders to get supplies they need as fast as possible.

The **expansion** line of effort is charged with generating capacity with both traditional and non-traditional means such as adding machinery or by re-tooling assembly lines to produce new products.

The **allocation** of supplies facilitates the distribution of critically needed PPE to "hot spots" for immediate resupply. Distributors report on supplies and can request assistance when they experience a shortage.

The Supply Chain Task Force is working with the major commercial distributors to facilitate the rapid distribution of resources in short supply to locations where they are needed most. This partnership enables FEMA and its federal partners to take a whole-of-America approach to combatting COVID-19. The task force is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. The distributors have agreed to focus portions of their distributions on these areas in order to alleviate the suffering of American people.

A key example of this partnership in action is Project Airbridge. The airbridge was created to reduce the time it takes for U.S. medical supply distributors to receive PPE and other critical supplies into the country for their respective customers. FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks

Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations. Per agreement with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical need. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide. FEMA determines hotspot areas based on CDC data.

Working together, we can efficiently distribute these vital resources to hospitals, nursing homes, long-term care facilities, pre-hospital medical services, state and local governments, and other facilities critical to caring for the American people during this pandemic.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the update below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19.

April 9, 2020

CISA Update

Interim Guidance for Critical Infrastructure Workers Who May Have Had Exposure to COVID-19

Partners,

Please find below an important update from the Centers for Disease Control and Prevention (CDC) and the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19. These two important informational products include *Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19* and a quick reference of the Do's and Don'ts for employers and employees related to COVID-19 exposures.

While the [Interim Guidance](#) specifically calls attention to critical infrastructure workers serving in the specific capacities and functions, as below, the guidance can apply to all critical infrastructure workers with the exception of Healthcare Providers who are covered under [separate guidance](#).

- Federal, state, & local law enforcement
- 911 call center employees

- Fusion Center employees
- Hazardous material responders from the government and the private sector
- Janitorial staff and other custodial staff
- Workers – including contracted vendors – in food and agriculture, critical manufacturing, informational technology, transportation, energy and government facilities

Employers should implement the recommendations in the [Interim Guidance](#) for Businesses and Employers, to Plan and Respond to Coronavirus Disease 2019, to help prevent and slow the spread of COVID-19 in the workplace.

Please continue to monitor the CDC website for the most current medical [guidance](#).

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_1

April 01, 2020 at 8:26 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic.

These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people is our top priority.
- On March 31, the president extended the nation's Slow the Spread campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut

(50) and Louisiana (150).

- Thirty states and 12 tribes have issued stay at home orders.

CISA_releases_Version_3.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance

April 17, 2020 at 3:17 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the release of Version 3.0 of the Essential Critical Infrastructure Worker Guidance, found [here](#).

April 17, 2020

CISA Advisory

CISA releases Version 3.0 of the Essential Critical Infrastructure Worker Guidance

The Cybersecurity and Infrastructure Security Agency (CISA) has released [Version 3.0 of the Essential Critical Infrastructure Workers list](#). Version 3.0 provides clarity around a range of positions needed to support the critical infrastructure functions laid out in the original guidance and Version 2.0. This iteration includes a reorganization of the section around Healthcare and Public Health and more detail to clarify essential workers; emphasis for Emergency Medical Services workers; and adds lawyers and legal aid workers. Also included is language focused on sustained access and freedom of movement; a reference to the CDC guidance on safety for critical infrastructure workers; and a statement saying sick employees should avoid the workplace and the workforce. In worker categories, all references to “employees” or “contractors” have been changed to “workers.” Other additions include a reference to the USCG Marine Safety Information Bulletin on essential maritime workers; clarified language including vehicle manufacture; and many other small changes to clarify language.

CISA issued initial guidance on Essential Critical Infrastructure Workers on March 19, which was developed to help state, local, tribal, and territorial authorities as they decide who to allow freedom of movement in areas that are under restrictions such as shelter-in-place or quarantine. That initial guidance was developed with input from our government and industry partners, on the assumption that we would need to update the guidance as we received additional feedback from stakeholders.

CISA moved quickly to incorporate feedback to update the list of Essential Critical Infrastructure Workers to expand and specify additional categories of essential workers who are key to maintaining a community’s safety, public health, and economy. These changes

were included in Version 2.0 of this guidance, released March 28, generally represented minor clarifications or additions that did not shift the overall scoping of critical infrastructure activity as highlighted in the initial release. Specifically, clarity was provided around a range of supporting and enabling activity for infrastructure resilience – the commodity, services, and logistical supply chains of other infrastructure functions. This included more direct call outs for essential sanitation and hygiene production and services, as well as manufacturing of critical products.

The Guide continues to be a resource for state and local decision makers and is in no way a binding document. Ultimately, all final decisions rest with state and local authorities, who must use their own judgment to balance public health and safety with the need to maintain critical infrastructure.

The degree to which state and local orders have leveraged our guidance when defining essential workers is encouraging. A common national picture will ultimately benefit us all. We hope this updated Guide helps as your communities grapple with the impacts of COVID-19. Please direct any questions to CISA.CAT@cisa.dhs.gov.

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center.

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed.

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

Subject: Connection

Hey Jaime.

It was great to meet you in person yesterday. I also appreciated the JIC walk through.

[Here is a copy of the ESF15 SOP](#) I was talking about. A few details to help navigate the document:

- The terminology is pretty different from what you're using, but I think it's generally clear how you could crosswalk things. That said, titles and job descriptions are discussed on pg 11-14.
- Move to pg A-22 for Template of Coms Summary. These are extremely helpful to keep messaging/actions in line with the specific agencies so readers understand there are agency-specific priorities that are ongoing in addition to the priority messaging efforts being requested by executive leadership. This also helps keep your PIOs from being pulled in two directions.
 - o The report also brings your sector reports into a common place (e.g. private sector, leg affairs, media, tribes, etc). If people are working for remote locations, this also keeps staff reporting through a common product (and daily timeline).
- **Annex B covers Government Coordination** (Gov, Legislature, Counties, Cities, tribes, and Federal Reps). It provides an overview, strategy and position titles/descriptions and Org Chart.
- **Annex C covers the JIC** (federal definition), which is slightly different from the way you all define it, but you can see the same functions are covered. It includes social media listening, photos/videogs, news desk, spokesperson etc. In a nutshell, this is the distribution part of the operation. This section also includes overview, strategy, position titles and org chart.
- **Annex F covers Private Sector:** This is critical at this time given the number of partners at the table and the impacts to business. Clearly this group has a huge role in terms of getting consistent messaging to business/chambers on those polices and programs available to them via state or federal agencies.
- **Annex G covers Planning and Products:** this section generally outlines how to organize

liaisons to other organizations, research, writing, community education needs, speakers bureau request tracking, LEP, ASL needs, graphics and any other “production” aspects of an operation. They work very close with JIC so you have a dedicated group just working on producing the content (for the rest of the operation to share). Benefit is that it ensures that everyone is pushing the same message/content/graphics so you don’t get accidental mixed signals or have and have not.

- Finally, I can’t stress enough that the “External Affairs Officer” or organizational lead should be part of the Command Staff. That person needs to be in the room for executive meetings and discussions related to the big operational picture. They need to be there to advise the leadership about possible issues from politics, media, public, trends, etc.

Finally, these are just notes and thoughts following our conversation yesterday and are not a critique. The structure is expandable and can be implemented from various locations. We are available to help train or take Q/A if you need anything. I fully recognize that the folks at WA DOH and others have been in the fight for weeks now and any major reorgs could be counterproductive. So, please consider these thoughts as options. We will support you all in any way we can.

Thanks again,

Ryan

Jaime

Some comments about the grocery industry and supply chain might be a good inclusion for a future press event if there is one scheduled soon.

Is there any benefit to coordinate the message with FEMA or do something jointly as far as a press event?

The FEMA Regional Administrator, Mike O'Hare, is the designated Federal Coordinating Officer (FCO), not sure if there is any benefit to doing something with the feds or just keeping it to messaging from our state's executives.

We do have FEMA staff and the HHS rep working out of BLDG 20 working the Federal Coordination pieces with our State Coordinating Officer (SCO) and staff, so that happened immediately in part because we have a FEMA Integration Team that works fulltime out of our facility and they immediately transitioned from their normal work to COVID response – good news story there on the responsiveness of the federal government.

We've placed our first resources requests already with them:

- to receive an embedded CISA PSA (Protective Security Advisor) – to assist us in looking at infrastructure advance planning
- a National Incident Management Organization (NIMO) team to come in and conduct a complexity analysis of our incident management structure at the state level to help us identify what staffing gaps or process gaps we may have and make recommendations on how to improve our operations
- Federal Medical Stations (FMS) - some equipment is enroute – deployable healthcare facilities that provide us a medical surge capacity

Subject: Re: Grocery supply chain FEMA call

Do we want to consider a press event with the governor, grocers and providers? JIC issued a release today on this topic that is already being picked up and we're ready to get a drumbeat of "save some for your neighbors" going. I'm happy to make an ask to the gov office if this feels like an important enough ask and effective use of his time.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_15

April 15, 2020 at 3:19 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 15, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [FEMA Project Airbridge](#).
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/hospital beds; total

- acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - The seven new ventilator contracts announced by HHS this month will supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.

Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting

April 23, 2020 at 10:15 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the announcement below, and attached, fact sheet from our partners in Federal Emergency Management Agency (FEMA) regarding Addressing PPE Needs in Non-Healthcare Setting.

FEMA has published the attached Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting. This guidance summarizes how organizations should consider and manage their personal protective equipment (PPE) needs while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response, including how to preserve limited supplies of PPE, how to consider need during periods of shortages, and how to acquire and request PPE (i.e., in the face of critical shortages and whereas normal supply chain allocation cannot meet operational requirements).

The attached fact sheet may also be found on the FEMA website [here](#).

Subject: Re: Please review: Stay home campaign drafts

Hi team,

Had to be pretty focused on yesterday's address the last couple days, but ready to get this PSA off the ground here. An update:

1) I've sent a script option to get Macklemore's sign off. (His team will be the one's we hire to produce this, so wanted to make sure they are good with direction first.

2) His people didn't think the "Dance off" idea was going to fly, so I sent an alternate idea. We may update some language based on yesterday's announcement and the "Stay Home. Stay Healthy." branding. That script is linked here: [HYPERLINK "https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing" PSA script google doc](https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing) if you want to make comments. I've also attached as a PDF. (Note: For clarity in the script, Macklemore's first name is Ben)

3) Once we have script close to signed off, I will start recruiting people to participate. My plan is to get each influencer to run through a version of the script that works for them. The only thing that will change are the person they are "staying home for" and any personal flare they add. The rest should be identical, which will give us a stand alone product for each person, but also allow us to create single video with many speakers cut together.

Our targeted influencers:

- Macklemore (Ben Haggerdy)
- Russell Wilson (and Ciara?)
- Pete Carroll
- Megan Rapino (and Sue Bird?)
- Brandi Carlyle
- Pearl Jam

- Ken Griffey Jr.
- Jordan Morris and or Steven Frei (Seattle Sounders)
- Mark Few (Gonzaga's basketball coach)

We have direct or one bounce connections to everyone on this list.

4) We will hopefully shoot these by late this week/early next week.

WHAT I NEED FROM YOU:

- 1) Feedback on script - especially the recommended steps.
- 2) Additional content asks we can try to produce with our influencers. What else would be useful?

If we move forward with this script concept, I plan to ask for stills of each participant holding up their video chat system and one of just them.

Thanks all,

Sam Holman

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_8,_2020

April 08, 2020 at 5:47 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 8, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is

loaded.

- **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
 - Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
 - This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

March 30, 2020 at 1:00 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 30, 2020

FEMA Advisory

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

“This response isn’t just about delivering food or supporting COVID test centers. It’s about protecting our children, parents, and grandparents. Our Nation is looking to the National Guard to help them and we can’t let them down.” – Air Force Gen. Joseph Lengyel, Chief of the National Guard Bureau

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people. The latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates

\$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA, for some states' use of their National Guard forces. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32.

FEMA coordinated an air bridge for flights from Asia beginning on Sunday, March 29, with the first delivery of 80 tons of much needed PPE supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 10.3 million gloves and thousands of thermometers for New York, New Jersey and Connecticut. Additional flights are contracted to go to Illinois today and to Ohio tomorrow. FEMA has scheduled additional flights and is adding more daily.

Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (180) and Connecticut (50).

Twenty-seven states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), the Strategic National Stockpile, Ventilator Guidance, CDC Respirator Guidance, Defense Production Act, CDC Public Guidance, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

Joint FEMA-CBP Statement on Export of Critical PPE

April 08, 2020 at 3:28 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the statement below from our partners in the Federal Emergency Management Agency (FEMA) and U.S. Customs and Border Protection (CBP) regarding a statement on the export of critical Personal Protective Equipment (PPE).

April 8, 2020

COVID-19 Update

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and U.S. Customs and Border Protection (CBP) are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported.

Holman, Sam (GOV)

Re: Please review: Stay home campaign drafts

March 24, 2020 at 2:37 PM EDT

To: Soileau, Kennedy (HCA)

Cc: Smith, Jaime (GOV), Kopriva, James (DSHS/ALTSA), Marchand, Michael (HBE), Crume-Bruce, Shawna, danielle.bailey@fema.dhs.gov, Blaske, Laura A (DOH)

Hi team,

Had to be pretty focused on yesterday's address the last couple days, but ready to get this PSA off the ground here. An update:

- 1) I've sent a script option to get Macklemore's sign off. (His team will be the one's we hire to produce this, so wanted to make sure they are good with direction first.
- 2) His people didn't think the "Dance off" idea was going to fly, so I sent an alternate idea. We may update some language based on yesterday's announcement and the "Stay Home. Stay Healthy." branding. That script is linked here: [HYPERLINK](https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing) ["https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing"](https://docs.google.com/document/d/1TqY6dNu6Zcf7vkYKJHgiR8SwinP2KzSCmRkrZSerp_w/edit?usp=sharing) [PSA script google doc](#) if you want to make comments. I've also attached as a PDF. (Note: For clarity in the script, Macklemore's first name is Ben)
- 3) Once we have script close to signed off, I will start recruiting people to participate. My plan is to get each influencer to run through a version of the script that works for them. The only thing that will change are the person they are "staying home for" and any personal flare they add. The rest should be identical, which will give us a stand alone product for each person, but also allow us to create single video with many speakers cut together.

Our targeted influencers:

- Macklemore (Ben Haggerdy)
- Russell Wilson (and Ciara?)
- Pete Carrol
- Megan Rapino (and Sue Bird?)
- Brandi Carlyle
- Pearl Jam
- Ken Griffey Jr.
- Jordan Morris and or Steven Frei (Seattle Sounders)
- Mark Few (Gonzaga's basketball coach)

We have direct or one bounce connections to everyone on this list.

- 4) We will hopefully shoot these by late this week/early next week.

WHAT I NEED FROM YOU:

- 1) Feedback on script - especially the recommended steps.

2) Additional content asks we can try to produce with our influencers. What else would be useful?

If we move forward with this script concept, I plan to ask for stills of each participant holding up their video chat system and one of just them.

Thanks all,

Hi all,

Quick update – we’ve revised the language to remove the “stay happy” message. Because this is a stressful time for many folks, we didn’t want to come off as out-of-touch or even condescending. The key messages now are: “Stay home. Stay healthy. Stay informed.”

Next steps – Laura Blaske and I are working with the ad agency that is leading Spread the Facts, and we will incorporate the “stay home” messaging into that campaign.

Help stop the spread of COVID-19.

Spread the facts.

Stay home. Everyone should stay home except to get food, care for a relative or friend, get necessary health care, or go to an essential job. (LINK HERE TO MORE INFO.)

Stay healthy. If you must go out, keep at least 6 feet of distance from other people. (LINK HERE FOR MORE INFO.)

Stay informed. Stay up to date on what is happening in Washington State; visit this website often.

Thanks!

–Kennedy

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the below announcement from the White House Office of Intergovernmental Affairs regarding Treasury's release of CARES Act guidance for State, Local, and Tribal Governments.

Today, Secretary of the Treasury Steven Mnuchin released guidance for State, Local, and Tribal Governments regarding the Coronavirus Relief Fund (Section 5001 of the CARES Act).

As stated by the [legislation](#) signed by President Trump on March 27, the use of funds “are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID–19).” The guidance document ([here](#)) and frequently asked questions ([here](#)) provide, in detail, examples of eligible and ineligible expenditures of the \$150 billion Coronavirus Relief Fund. You can find additional information about Assistance to State and local governments [here](#).

We will continue to share all relevant information as it becomes available.

Thank you,

White House Office of Intergovernmental Affairs

Coronavirus Aid, Relief, and Economic Security Act (CARES)

Following extensive negotiations between the Trump Administration and Congressional Leaders, President Trump signed the *Coronavirus Aid, Relief, and Economic Security Act (CARES)*. The \$2.2 trillion economic relief package provides American families, healthcare workers, and small businesses with the economic support they need to get

through this challenging time. This aid comes on top of the Family First Coronavirus Aid Package, enacted last month. State/Local/Tribal provisions include:

- \$150 billion in direct aid to State, Tribal, and local governments. Aid will be allocated primarily by a State's population with each State receiving at least \$1.25 billion.
- \$340 billion in additional emergency supplemental funding to combat the coronavirus outbreak.
- \$500 billion for loans and guarantees that authorize the U.S. Treasury to support eligible businesses and States and local governments to cover losses incurred as a result of COVID-19.
- \$100 billion for hospitals and health care facilities to reimburse expenses or lost revenues not otherwise reimbursed that are directly attributable to COVID-19.
- **\$3.5 billion** to allow States to expand childcare benefits for healthcare workers, first responders, and others on the frontlines of this crisis.
- Read more here: **[President Donald J. Trump Is Providing Economic Relief to American Workers, Families, and Businesses Impacted by the Coronavirus](#)**

Intergovernmental Affairs

Please see the advisory below, and attached fact sheet, from our partners in the Federal Emergency Management Agency (FEMA) regarding the release of a Disaster Financial Management Guide to assist communities in their COVID-19 response.

April 17, 2020

FEMA Advisory

Disaster Financial Management Guide

On Thursday, April 16, FEMA released the “Disaster Financial Management Guide” to support jurisdictions in establishing and implementing sound disaster financial management practices, which are critical for successful response and recovery. The guide takes an all-hazards approach and addresses a broad range of issues and contains concepts, principles and resources applicable to the coronavirus (COVID-19) pandemic response environment.

The guide identifies the capabilities and activities necessary to prepare and successfully implement disaster financial management while maintaining fiscal responsibility throughout response and recovery operations. This includes considerations and practices necessary to track, calculate and justify the costs of an emergency; support local reimbursement reconciliation; avoid de-obligation of grant funding; and effectively fund and implement recovery projects and priorities. The principles, concepts and resources contained in the guide can support jurisdictions in identifying the resources needed to support their community, increase the efficiency of recovery efforts, and reduce the likelihood of audits and financial penalties for the jurisdiction.

To view the guide, please visit <https://www.fema.gov/plan>.

Subject: Municipality of Anchorage "Hunker Down" Proclamation EO-03

APIP Members,

For those of you based or with offices and employees within the Municipality of Anchorage, please be aware of the Mayor's Emergency Order 03, which will be in effect from 22:00 on Sunday, March 22nd until midnight on Tuesday, March 31st.

The EO directs "Everyone currently in the Municipality of Anchorage (the "Municipality") shall stay at home as much as possible, except to work in certain critical jobs, listed below; to buy, sell, or deliver groceries or other important goods; to receive or provide health care; and to get fresh air without contacting others."

This EO was carefully crafted to identify exemptions for critical services and functions which are allowed to continue. Please review Paragraph 5 of the EO for applicability to your business or agency. Please bear in mind that measures like this are being enacted to protect the greater public good and ensure that only those employees performing essential tasks are exercising the exempt status.

Please direct any questions to myself and Shawna, we will collate and route them to Amanda Loach and her staff at the Muni EOC.

Very Respectfully,

Tom Koloski

Subject: RE: Grocery supply chain FEMA call

Jaime

Some comments about the grocery industry and supply chain might be a good inclusion for a future press event if there is one scheduled soon.

Is there any benefit to coordinate the message with FEMA or do something jointly as far as a press event?

The FEMA Regional Administrator, Mike O'Hare, is the designated Federal Coordinating Officer (FCO), not sure if there is any benefit to doing something with the feds or just keeping it to messaging from our state's executives.

We do have FEMA staff and the HHS rep working out of BLDG 20 working the Federal Coordination pieces with our State Coordinating Officer (SCO) and staff, so that happened immediately in part because we have a FEMA Integration Team that works fulltime out of our facility and they immediately transitioned from their normal work to COVID response – good news story there on the responsiveness of the federal government.

We've placed our first resources requests already with them:

- to receive an embedded CISA PSA (Protective Security Advisor) – to assist us in looking at infrastructure advance planning
- a National Incident Management Organization (NIMO) team to come in and conduct a complexity analysis of our incident management structure at the state level to help us identify

what staffing gaps or process gaps we may have and make recommendations on how to improve our operations

- Federal Medical Stations (FMS) - some equipment is enroute – deployable healthcare facilities that provide us a medical surge capacity

Subject: Re: Grocery supply chain FEMA call

Do we want to consider a press event with the governor, grocers and providers? JIC issued a release today on this topic that is already being picked up and we're ready to get a drumbeat of "save some for your neighbors" going. I'm happy to make an ask to the gov office if this feels like an important enough ask and effective use of his time.

Subject: Grocery supply chain FEMA call

Summary: Very heavy demand past 3 days >200% typical, straining distribution and delivery systems. Unsustainable if it continues. Concerns over Covid19 impact & school closures on workforce. Looking for waivers to increase delivery capabilities.

Call took the entire hour, few specific solutions identified, additional call possible in a few days, FEMA HQ sending out info to Regional Administrators on possible actions and messages to convey to Governors.

Notes:

12:00 FEMA Supply Chain Call

Difficulties in supplies and production

Grocery is under stress

Trucking experiencing driver shortages, and expecting to increase

Increased demand for past 16 days

Concerned about school closures increasing demand

Hourly workers that staff warehouses will have child care issues

>200% demand ongoing past 3 days (foods and commodities)

Resupply of distribution centers

Hourly workers - some reporting sick, first couple cases of Covid19

Waivers are helping for delivery were just about up to limit

Wide variation of requirements from local health authorities for cleaning on possible exposures

Empty shelves are due to product moving too fast to keep up supply

Challenges on social distancing - not possible to put 6' between checker and customer

Cleaning / Hand Sanitizers used internally, running out needed to keep things open

Surge buying seems to be mostly in stores, no big increases in home delivery and alternate methods

Needs relief from population limits to keep supply chain running - need to be able to have more than 100 (some areas restriction) or 250 people in a distribution center.

Federal Government needs to inspire some confidence to end the hoarding and fear buying

During disasters able to move trained people to deal with the problem - not an option for

national incident

Last 3 days has changed the context, if it maintains this level unable to support

Looking for drivers from the food/restaurant distribution centers to become available- has not happened yet.

Need relief from truck weight limits nationwide - not state by state

Need to remove fear, constant messaging from Federal Government to let public know that supply chain will be exempt from cordons and curfews and will be there when needed.

Driver shortage at moment, but wants fuel added to waiver. Access credentials for quarantine areas, possibility create a rally point for distribution

Get Governors to use common language

NBEOC is activated

Concerns about Hawaii and ship movements

Regards

DHS_Announcement:_CISA_Releases_Guidance_on_Essential_Critical_Infrastructure_Workers_During_COVID-19

March 19, 2020 at 4:08 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from Christopher Krebs, Director of the Cybersecurity and Infrastructure Security Agency (CISA), regarding the Identification of Essential Critical Infrastructure Workers During COVID-19, found [here](#).

March 19, 2020

CISA Releases Guidance on Essential Critical Infrastructure Workers During COVID-19

As the Nation comes together to slow the spread of COVID-19, on March 16, the President issued updated Coronavirus Guidance for America. This guidance states that:

“If you work in a critical infrastructure industry, as defined by the Department of Homeland Security, such as healthcare services and pharmaceutical and food supply, you have a special responsibility to maintain your normal work schedule.”

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security’s responsibilities as assigned under the Homeland Security Act of 2002 to provide strategic guidance, promote a national unity of effort, and coordinate the overall federal effort to ensure the security and resilience of the Nation's critical infrastructure. CISA uses trusted partnerships with both the public and private sectors to deliver infrastructure resilience assistance and guidance to a broad range of partners.

In accordance with this mandate, and in collaboration with other federal agencies and the private sector, CISA developed an initial list of “Essential Critical Infrastructure Workers” to help State and local officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list can also inform critical infrastructure community decision-making to determine the sectors, sub-sectors, segments, or critical functions that should continue normal operations, appropriately modified to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

The list identifies workers who conduct a range of operations and services that are essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing management functions, among others. The industries they support represent, but are not

necessarily limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

We recognize that State, local, tribal, and territorial governments are ultimately in charge of implementing and executing response activities in communities under their jurisdiction, while the Federal Government is in a supporting role. As State and local communities consider COVID-19-related restrictions, CISA is offering this list to assist prioritizing activities related to continuity of operations and incident response, including the appropriate movement of critical infrastructure workers within and between jurisdictions.

Accordingly, this list is advisory in nature. It is not, nor should it be considered to be, a federal directive or standard in and of itself.

In addition, these identified sectors and workers are not intended to be the authoritative or exhaustive list of critical infrastructure sectors and functions that should continue during the COVID-19 response. Instead, State and local officials should use their own judgment in using their authorities and issuing implementation directives and guidance. Similarly, critical infrastructure industry partners will use their own judgment, informed by this list, to ensure continued operations of critical infrastructure services and functions. All decisions should appropriately balance public safety while ensuring the continued delivery of critical infrastructure services and functions.

CISA will continue to work with you and our partners in the critical infrastructure community to update this list as the Nation's response to COVID-19 evolves. We also encourage you to submit how you might use this list so that we can develop a repository of use cases for broad sharing across the country.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

Decisive action taken today will protect Americans

March 21, 2020 at 11:01 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

US-Mexico-Canada Travel Restrictions

Decisive action taken today will protect Americans, slow the spread of the virus, and help save lives:

- The United States is cooperating closely with Canada and Mexico to ensure that North America has a coordinated approach to combating the pandemic caused by the coronavirus.
- The United States and Canada have agreed to restrict travel at our land border to essential travel only.
- Similarly, the United States and Mexico are finalizing an agreement that will facilitate only essential travel at our southern border.

We are maintaining cross-border activities with Canada and Mexico that support health security, trade, commerce, supply security, and other essential activities while taking critical steps to protect our citizens and to curb spread of the virus.

For more information on these measures please visit the [White House fact sheet](#).

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 17, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to

- local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
- Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.
 - Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state's entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 19**, FEMA, HHS, and the private sector combined have coordinated the delivery of, or are currently shipping: 57.4 million N95 respirators, 77.9 million surgical masks, 6.2 million face shields, 11.9 million surgical gowns, 587 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and

- commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA from April 1st – 14th through Project Airbridge and the commercial supply network.
 - The U.S. has now tested 4.18 million people, which is more total tests than the following nations combined: France, the United Kingdom, South Korea, Japan, Singapore, India, Austria, Australia, Sweden, and Canada.
 - As conveyed by Dr. Anthony Fauci and Admiral Brett Giroir, there is enough testing capacity for states to move into phase one of reopening when they choose to do so.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - President Trump and Vice President Pence are working closely with Governors to review what more they can do to develop locally tailored testing strategies.
 - HHS and FEMA continue to provide federal support to state run testing.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - FEMA and HHS have centralized best practices and lessons learned to help medical practitioners, emergency managers, and other stakeholders learn from each other's approaches.
 - The [FEMA Coronavirus Emergency Management Best Practices](#) page contains resources for all levels of government, private sector, academic institutions, professional associations, and other organizations responding to the pandemic.
 - HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

To: Shagren, Karina L. (MIL) <Karina.Shagren@mil.wa.gov>; seoc22 (MIL) <seoc22@mil.wa.gov>

Cc: Holt, Brett <brett.holt@fema.dhs.gov>

Subject: RE: Logistics Grocery call from today

It was a national call. HQ will be working on options for us to address (those actions we can take under our authorities). I think there are some decisions that need Gov input (waiving state regs, excluding grocery industry from ongoing limits on public gatherings, relaxing/staggering school closures. Etc – nationally). I’m not sure if the JIC is working on trying to message direct to consumers. Seems like the basic ask is to try and get people to limit hoarding.

Brett: does that sound correct?

Ryan Ike

Cc: Holt, Brett <brett.holt@fema.dhs.gov>

Subject: Logistics Grocery call from today

Notes from today's call:

FEMA Grocer Supply Chain Call

March 14, 2020

Speakers

- C&S Wholesale Grocers
- Target
- Albertsons/Safeway

Audience: FEMA, State Emergency Management, and Private Sector

Purpose: To clarify the near term issue that the grocer supply chain will feel this week with current consumer buying and potential significant worker absences due to closure of schools.

Notes

- Carla Gammon, FEMA Logistics Management Directorate: Welcomed the call to hear about the issues the private sector is experiencing. Will put together a letter to the FEMA Regional Administrators to pass on to states based on what she is hearing from the call.
- C&S Wholesale Grocers: The school-wide closures at the same time for 2-3 weeks will cripple every supply chain there is, including the food sector. C&S alone is seeing double/triple volume than normal and we are going on Day 16 straight of this volume. On top of losing working parents to taking care of their kids at home, there are more mouths to feed at home which is causing extraordinary amount of food volume to be shipped. The food sector has been struggling the past 2 weeks straight because of panic buying and hoarding. Manufacturers are struggling with production. We need staff members to be at the warehouses, stores, etc. Can FEMA work with Governors to stagger the closures. I understand we are trying to slow the rate of infection but, we can still slow it down if you stagger the closures (i.e., different counties at once, one week here, another week there, etc.)

Additional comments from private sector

- Consumers are purchasing more than needed nor the grocer supply chain can meet. The shelves will be emptied by Sunday afternoon and will NOT be refilled next week. This goes well-beyond toilet paper and hand-sanitizer. If these expectations are accurate, the sustained shortage will extend over many product categories.
- Target and Albertsons/Safeway agree with C&S Wholesale Grocers.

Solutions

- Need FEMA to get the message to Governors about school closings and the impacts
- Need FEMA to develop message to influence how people are currently purchasing and to have them decrease what they are purchasing. Need to encourage calm.
- Wavers: Need nationwide wavers for fuel, hours, and noise reduction to ensure supply chain can rebound

- Re-entry is not managed the same state to state. Some states are more advanced. Need for government to look at single rendezvous access points to allow for re-entry into areas to ensure grocers and restock store.

Region 10

- Washington holds grocer sector coordinating calls each Wednesdays, 11am-12pm
- Oregon will hold their first grocer sector call this week on Wednesday.

Office of Public Affairs

WEEKLY UPDATE: DHS RESPONSE TO COVID-19

WASHINGTON - The Department of Homeland Security's efforts across its components last week have facilitated a speedy, whole-of-government response to confronting COVID-19 and slowing the spread to keep Americans safe. FEMA is leading the way by carrying out an approach that is locally executed, state managed, and federally supported.

"Protecting both the health and national security of the American people continues to be the top priority for the Department of Homeland Security," said Acting Secretary Chad F. Wolf. "I want to thank the men and women of the DHS workforce for their resilience as they put themselves at risk every day to protect the American people."

Below is a list of some of DHS's efforts against COVID-19 last week:

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

Total Obligations to States. As of April 5th, FEMA has obligated nearly \$4.1 billion in support of COVID-19 response efforts.

Project Air-Bridge. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge:

- From March 30th to April 5th, 10 flights arrived to the U.S with critical supplies.
- The cargo moved so far totals almost 83.5 million gloves, almost 5 million surgical masks, and 1.2 million gowns.
- Upon arrival, the PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization is given to hospitals, health care facilities, and nursing homes around the country.
- 23 additional flights are currently scheduled through April 18.

Ventilator Distribution. FEMA is distributing ventilators to hard hit states. From March 30th to April 4th, FEMA and HHS delivered ventilators from the Strategic National Stockpile to Michigan, New Jersey, Illinois, Connecticut, and Louisiana.

CUSTOMS AND BORDER PROTECTION (CBP)

Keeping Critical Cargo and Trade Moving. CBP continues to process commercial cargo. Approximately \$21B worth of goods crossed back and forth over the borders of U.S, Mexico, and Canada from March 30th to April 5th .

Working to Reduce Illegal Entries. CBP agents encountered nearly 4,200 migrants crossing illegally at the U.S. Southern border daily, compared to nearly 10,000 encounters daily prior to the current containment efforts.

Facilitating Critical PPE Deliveries. CBP lifted a Withhold Release Order that had barred importation of disposable rubber gloves which our health care workers and law enforcement personnel so desperately need right now.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Working with the Department of State, ICE continues to bring Americans home on the return leg of removal flights to Central America. As of April 5th, ICE has flown 853 U.S. citizens and legal permanent residents home on removal flights from Colombia, El Salvador, Honduras, and Nicaragua since the first flight on March 22.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Air Travelers Secure. Due to the pandemic and travel restrictions, TSA continues to screen a significantly reduced number of passengers. From March 27th to April 2nd, TSA successfully screened 1,124,145 travelers ensuring individuals reached their destinations safely.

CYBERSECURITY AND INFRASTRUCTURE SECURITY AGENCY (CISA)

Essential Critical Infrastructure Workers. CISA recently updated its list of essential critical infrastructure workers. As of April 5th, 20 states and territories have published Essential Business Designations.

Election Security Work Continues. CISA coordinated calls between the election community and the United States Postal Service (USPS) and Centers for Disease Control (CDC) to ensure that election officials have the most up to date information and advice from the experts at these agencies regarding COVID-19.

Helping the Private Sector Assess Risk. CISA released a guide titled Risk Management for Novel Coronavirus to assist executives in thinking through physical, supply chain, and cybersecurity issues that may arise from the spread of COVID-19.

UNITED STATES COAST GUARD (USCG)

Facilitating the Offload of Cruise Ships. On April 2nd, the Coast Guard facilitated the offload of more than 1,200 passengers from cruise ships Zaandam and Rotterdam in Port Everglade, FL after it was reported that crewmembers and passengers were infected with COVID-19.

U.S. CITIZENSHIP AND IMMIGRATION SERVICES (USCIS)

Making Extensions for Employment Authorization Easier. On March 30th , U.S. Citizenship and Immigration Services announced that it will reuse previously submitted biometrics

in order to process valid Form I-765, Application for Employment Authorization, extension requests due to the temporary closure of Application Support Centers (ASC) to the public.

Target Date to Reopen Offices. On April 1st, USCIS announced offices temporarily suspended will begin to reopen on May 4th unless the public closures are extended further to help slow the spread of COVID-19.

COUNTERING WEAPONS OF MASS DESTRUCTION (CWMD)

Medical Screening at Airports. CWMD contract personnel are continuing to support CDC with enhanced screening at 13 airports. From March 29th to April 5th, CBP referred 7,565 travelers to CWMD for enhanced screening. As of April 5th, over 265,647 travelers have been referred to CWMD for screening.

SCIENCE AND TECHNOLOGY (S&T)

Coronavirus Research. S&T's National Biodefense Analysis and Countermeasures Center (NBACC) continued researching the impact of environmental conditions, such as temperature and humidity, to determine the virus's survivability in the air, in respiratory fluids, and on various types of surfaces. Additional research includes decontamination methods to determine the most effective materials to clean and disinfect surfaces to rid them of the virus.

Consolidating COVID-19 Data for Government Officials. On April 1st, the NBACC updated the Master Question List (MQL), a compilation of available research and information on operationally-relevant questions.

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the ventilator request process in effect for COVID-19 response.

For more information from FEMA, please visit: [FEMA.gov/Coronavirus](https://www.fema.gov/Coronavirus)

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic - Ventilator Request

Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted the process below to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis. In the case of ventilators, immediate is defined as requirements necessary to sustain life within a 72-hour window.

To submit a request, states and tribes will work through their FEMA/ HHS regional leadership. In order for a request to be processed, the state/tribe must provide detailed responses to the following five questions:

1. How many usable ventilators, ICU beds, and convertible ventilators are currently available within the state or tribe?
2. What is the current hospital bed and ICU bed occupancy rate in the state/tribe?
3. How many new ICU beds does the state/tribe estimate it can stand-up **and** the number of ventilators, or FDA-approved [ventilator alternatives](#), it can or is standing up?
4. What is the decompression ability of hospitals in the state/tribe (i.e.: are there currently field hospitals or alternate care facilities established)?
5. How many anesthesia machines are in the state/tribe **and** have they been converted?

Once the requesting state or tribe provides the FEMA/ HHS Region with the answers to these five questions, then the requirement is validated at the Regional level and forwarded to FEMA's National Response Coordination Center (NRCC) for processing.

At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.

In addition to submitting requests through this process, state, and tribal officials are encouraged to share the FDA's [Emergency Use Authorization \(EUA\) for Ventilators](#) issued on March 24. The EUA allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The EUA also provides guidance to assist health care personnel on use of other ventilators like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

CISA_releases_Version_2.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance_originally_published_on_March_19,_2020

March 28, 2020 at 6:01 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding an update to the Essential Critical Infrastructure Worker Guidance, found [here](#).

March 28, 2020

CISA Advisory

CISA releases Version 2.0 of the Essential Critical Infrastructure Worker Guidance originally published on March 19, 2020

As the Nation comes together to slow the spread of COVID-19, on March 16th the President issued updated Coronavirus Guidance for America that highlighted the importance of the critical infrastructure workforce.

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's authorities to secure critical infrastructure. Consistent with these authorities, CISA has developed, in collaboration with other federal agencies, State and local governments, and the private sector, an "Essential Critical Infrastructure Workforce" advisory list. This list is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. Decisions informed by this list should also take into consideration additional public health considerations based on the specific COVID-19-related concerns of particular jurisdictions.

This list is advisory in nature. It is not, nor should it be considered, a federal directive or standard. Additionally, this advisory list is not intended to be the exclusive list of critical infrastructure sectors, workers, and functions that should continue during the COVID-19 response across all jurisdictions.

Individual jurisdictions should add or subtract essential workforce categories based on their own requirements and discretion.

The advisory list identifies workers who conduct a range of operations and services that are typically essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing operational functions, among others. It also includes workers who support crucial supply chains and enable functions for critical infrastructure. The industries they support represent, but are not limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

State, local, tribal, and territorial governments are responsible for implementing and executing response activities, including decisions about access and reentry, in their communities, while the Federal Government is in a supporting role. Officials should use their own judgment in issuing implementation directives and guidance. Similarly, while adhering to relevant public health guidance, critical infrastructure owners and operators are expected to use their own judgement on issues of the prioritization of business processes and workforce allocation to best ensure continuity of the essential goods and services they support. All decisions should appropriately balance public safety, the health and safety of the workforce, and the continued delivery of essential critical infrastructure services and functions. While this advisory list is meant to help public officials and employers identify essential work functions, it allows for the reality that some workers engaged in activity determined to be essential may be unable to perform those functions because of health-related concerns.

CISA will continue to work with our partners in the critical infrastructure community to update this advisory list if necessary as the Nation's response to COVID-19 evolves. You can find the attached guidance as well as other COVID related information at cisa.gov.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

Federal_Partners_Bring_Additional_Resources_to_US_for_COVID-19_Response

March 29, 2020 at 12:53 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 29, 2020

FEMA Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal

reimbursement, by FEMA for the states of California, New York and Washington, for states' use of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

Using Autodialers for COVID-19 Related Public Service Announcements

April 02, 2020 at 11:51 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the guidance below, and attached, from our partners in the Communications Sector Coordinating Council regarding autodialers and how to ensure that legitimate COVID-related public service announcements are not inadvertently blocked.

April 2, 2020

Using Autodialers for COVID-19 Related Public Service Announcements

If your organization uses, or expects to use, automated dialing technology to make large numbers of voice telephone calls to citizens about COVID-19, there are measures you are advised to take to help ensure that those calls are not inadvertently blocked by service providers or other entities.

What You Should Know

Many telephone service and app providers offer services that consumers can use to block unwanted and illegal robocalls. While those services can protect citizens from illegal fraudulent robocallers (including ones taking advantage of the public's anxiety about COVID-19), there is some risk that legitimate calls made using automated dialing technology might inadvertently be identified as "spam" and blocked.

Calling patterns associated with legitimate, important public service telephone calls might in some instances be similar to those associated with unwanted (and often illegal) robocalls, so the algorithms used to identify and block unwanted robocalls could potentially be triggered.

What You Should Do

Any public service entity that uses an autodialer to contact its citizens can minimize the risk that its calls are incorrectly blocked (or labeled as "spam") by registering its telephone numbers with the companies that offer the blocking tools. Each has a procedure through which legitimate callers can register their numbers and report any instance(s) of incorrect blocking or labeling.

Telephone Service Providers' Portals for Registering Numbers

Legitimate callers can go the web sites below to register legitimate numbers and also address any incorrect labeling or call blocking.

- **AT&T:** <https://hiyahelp.zendesk.com/hc/en-us/requests/new>
 - Analytics Provider: Hiya
- **Sprint, Verizon, U.S. Cellular:** <http://Reportarobocall.com>
 - Analytics Provider: TNS
- **T Mobile:** <http://www.calltransparency.com>
 - Analytics Provider: First Orion

Third-Party App Providers

Legitimate callers can email these companies about their planned autodialing calls:

- **Nomorobo:** reports@nomorobo.com
- **YouMail:** TNissues@youmail.com

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_6

April 06, 2020 at 4:41 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 6, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; Hydroxychloroquine/Chloroquine; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The latest updates and information on how to protect yourself and what to do if you think you are sick are available at www.coronavirus.gov.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
 - Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.
 - Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
 - The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
 - As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
 - The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
- The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
 - Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19

- patients.
 - The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
 - 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and 300 additional ventilators to New Jersey.
- Forty states, four territories and 23 tribes have issued stay at home orders.

DHS_Announces_\$10_Million_in_FY20_Funding_Availability_for
_Targeted_Violence_and_Terrorism_Prevention_Grant_Programs

April 21, 2020 at 9:47 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

**DHS Makes \$10 Million in Funding Available for
Targeted Violence and Terrorism Prevention Grants**

WASHINGTON – The Department of Homeland Security (DHS) is making \$10 million available to help local communities more effectively combat terrorism and targeted violence across the United States. The \$10 million appropriated by Congress under the Fiscal Year 2020 Targeted Violence and Terrorism Prevention (TVTP) Grant Program will support the development of a nationwide terrorism and targeted violence prevention framework. DHS strongly encourages all eligible entities to apply for this funding opportunity to build capabilities in their communities and online.

“Attacks by domestic terrorists, those inspired by foreign terrorist organizations, and acts committed by violent individuals with no clear ideological motivation have occurred in communities across America with tragic outcomes,” said Acting Secretary of Homeland Security Chad F. Wolf. “These grants will improve local communities’ ability to prevent individuals from mobilizing or radicalizing to violence and create locally-based prevention frameworks to address these emerging threats.”

The TVTP Grant Program helps DHS to fulfill its commitment to addressing the threat posed by terrorism and targeted violence at home and builds on the promising practices identified in previous grant programs. It is the only federal grant program dedicated to enhancing prevention capabilities in local communities. In its first year, the TVTP Grant Program has three priorities: (1) establishing and enhancing local prevention frameworks with an emphasis on threat assessment and management capabilities; (2) preventing domestic terrorism; and (3) finding innovative solutions for preventing targeted violence and terrorism.

“I want to thank Congress for funding for this mission in a bipartisan way over the last few years, most recently and most significantly, in the Fiscal Year 2020 Appropriations Act. We look forward to working with Congress to continue to advance this effort.” Wolf continued.

Eligible activities under the TVTP Grant Program cover all aspects of prevention, including building resilience, intervention, recidivism prevention, and reintegration programs at the local level. The program directly supports the objectives of the [DHS Strategic Framework for Countering Terrorism and Targeted Violence](#), which DHS released in September 2019. Making these funds available for local prevention partners is a key milestone in the implementation of the Strategic Framework.

TVTP Grant Program funds will support the development of local prevention capabilities at a time when DHS is observing an uptick in online efforts for terrorism recruitment and

radicalization from a variety of sectors. DHS is committed to expanding the program and the President has requested an additional \$20 million for TVTP grant funds next fiscal year.

The application period will close on May 29, 2020. Applicants should consult the [Notice of Funding Opportunity](#) for more specific information about the process. Applying for this grant is a multi-step process and it is recommended that applicants begin that process early in order to allow sufficient time to complete the interim steps.

For more information, please see the TVTP Grant Program site at <https://www.dhs.gov/tvtpgrants>.

April 18, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing

resources to reopen safely and responsibly.

- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

Subject: Connection

Hey Jaime.

It was great to meet you in person yesterday. I also appreciated the JIC walk through.

[Here is a copy of the ESF15 SOP](#) I was talking about. A few details to help navigate the document:

- The terminology is pretty different from what you're using, but I think it's generally clear how you could crosswalk things. That said, titles and job descriptions are discussed on pg 11-14.
- Move to pg A-22 for Template of Coms Summary. These are extremely helpful to keep messaging/actions in line with the specific agencies so readers understand there are agency-specific priorities that are ongoing in addition to the priority messaging efforts being requested by executive leadership. This also helps keep your PIOs from being pulled in two directions.
 - o The report also brings your sector reports into a common place (e.g. private sector, leg affairs, media, tribes, etc). If people are working for remote locations, this also keeps staff reporting through a common product (and daily timeline).
- **Annex B covers Government Coordination** (Gov, Legislature, Counties, Cities, tribes, and Federal Reps). It provides an overview, strategy and position titles/descriptions and Org Chart.
- **Annex C covers the JIC** (federal definition), which is slightly different from the way you all define it, but you can see the same functions are covered. It includes social media listening, photos/videos, news desk, spokesperson etc. In a nutshell, this is the distribution part of the operation. This section also includes overview, strategy, position titles and org chart.
- **Annex F covers Private Sector:** This is critical at this time given the number of partners at the table and the impacts to business. Clearly this group has a huge role in terms of getting consistent messaging to business/chambers on those policies and programs available to them via state or federal agencies.
- **Annex G covers Planning and Products:** this section generally outlines how to organize liaisons to other organizations, research, writing, community education needs, speakers bureau request tracking, LEP, ASL needs, graphics and any other "production" aspects of an operation. They work very close with JIC so you have a dedicated group just working on producing the content (for the rest of the operation to share). Benefit is that it ensures that everyone is pushing the same message/content/graphics so you don't get accidental mixed signals or have and have not.
- Finally, I can't stress enough that the "External Affairs Officer" or organizational lead should be

part of the Command Staff. That person needs to be in the room for executive meetings and discussions related to the big operational picture. They need to be there to advise the leadership about possible issues from politics, media, public, trends, etc.

Finally, these are just notes and thoughts following our conversation yesterday and are not a critique. The structure is expandable and can be implemented from various locations. We are available to help train or take Q/A if you need anything. I fully recognize that the folks at WA DOH and others have been in the fight for weeks now and any major reorgs could be counterproductive. So, please consider these thoughts as options. We will support you all in any way we can.

Thanks again,

Ryan

US-Canada_Joint_Initiative:_Temporary_Restriction_of_Travelers_Crossing_the_US-Canada_Land_Border_for_Non-Essential_Purposes

March 20, 2020 at 1:17 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

US-Canada Joint Initiative: Temporary Restriction of Travelers Crossing the US-Canada Land Border for Non-Essential Purposes

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars in trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people to exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries. These supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_22

April 22, 2020 at 2:19 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 22, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical

distributors in various locations across the U.S. through [Project Airbridge](#).

- The U.S. has now processed 4.4 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

FEMA_Advisory:_COVID-19_Best_Practices

April 19, 2020 at 4:11 PM EDT

To: molly.voris@gov.wa.gov

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 19, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Best Practices

FEMA and the U.S. Department of Health and Human Services (HHS) are collecting and sharing best practices and lessons learned from the whole-of-America response to the coronavirus (COVID-19) pandemic. The best practices are intended to help medical practitioners, emergency managers, and other critical stakeholders learn from each other's approaches and apply solutions to current response and recovery operations.

The [FEMA Coronavirus Emergency Management Best Practices](#) page provides a one-stop shop to explore best practices and lessons learned across all levels of government, private sector, academic institutions, professional associations, and other organizations. HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

Best practices are organized around five themes:

- *Helping People*, which includes best practices on topics such as crisis counseling resources and anticipating and attending to civil rights;
- *Government Operations* best practices such as public information and continuity of operations considerations;
- *Private Sector and Infrastructure*, which includes best practices for commercial trucking and food stores;
- *Recovery Planning and Implementation*, to include the newly released FEMA Disaster Financial Management Guide and economic recovery considerations; and
- *Medical Supplies and Equipment*, including best practices for the preservation of personal protective equipment while ensuring workers are protected.

Please visit www.coronavirus.gov for current health-related guidance and information on COVID-19.

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 3, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty-one states and 12 tribes have issued stay at home orders.

CISA_and_NCSC_Joint_Activity_Alert_-_COV ID-19_Exploited_by_Malicious_Cyber_Actors

April 08, 2020 at 11:29 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding a joint activity alert on COVID-19 exploitations by malicious cyber actors, found [here](#).

April 8 2020

CISA Alert

CISA and NCSC Joint Activity Alert - COVID-19 Exploited by Malicious Cyber Actors

Partners,

As the nation and the world continues to fight against this newest coronavirus, COVID-19 — the Cybersecurity and Infrastructure Security Agency (CISA) continues to monitor how the crisis is affecting the American public on the cybersecurity and infrastructure security front.

Today, CISA and United Kingdom's National Cyber Security Centre issued an activity alert titled, *COVID-19 Exploited by Malicious Cyber Actors*. This joint alert seeks to address the growing use of COVID-19-related themes by malicious cyber actors and it can be found here: <https://www.us-cert.gov/ncas/alerts/aa20-099a>.

CISA and NCSC see the surge of reporting about malicious cyber activity using COVID-19 to prey on people's goodwill, curiosity and concern, and exploit organizations that establish remote work options. Specifically, this alert discusses the exploitation of virtual private networks, phishing email and text messages about COVID-19, and websites deceptively advertised as COVID 19 sites.

We are sharing this information to help you and your team effectively assess your cybersecurity posture and ensure appropriate mitigation is in place. The alert provides many

resources to help detect and prevent COVID-19 malicious activity on your networks. Industry partners played a key role in helping CISA and NCSC teams determine which IOCs to include in this alert and they continue to be integral to CISA's mission as the nation's risk advisor.

We encourage you to share this alert with anyone who might be able to use it. We will continue to keep you updated as more information becomes available.

For authoritative information and resources on COVID-19 -- including situation reports, guidance, and more, visit the CDC's website and [CISA.gov/coronavirus](https://www.cisa.gov/coronavirus).

Thank you,
CISA

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 7, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services (HHS) Response; FEMA Response Capacity; Strategic National Stockpile; CDC Public Guidance; CDC Respirator Guidance; Hydroxychloroquine/ Chloroquine; FDA Ventilator Guidance; National Guard Activation (Title 32); Community-Based Testing Sites; Defense Production Act; and Other Federal Response.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On **March 31**, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people are critical in the campaign to slow the virus' spread and keep high-risk populations safe.
 - For updates and information on how to protect yourself, visit www.coronavirus.gov.

- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - While FEMA schedules daily flights, it does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 6**, 13 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Seven flights are scheduled to arrive today, 6 in Chicago and 1 in Los Angeles. This is the greatest number of air bridge flights in a single day since the start of the program.
 - An additional 72 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.
- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- As of **April 6**, FEMA and HHS have provided or are currently shipping, 8,920 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (1,350), New York (4,400), Oregon (140), and Washington (500).
 - Governor Brown of Oregon sent the state's 140 ventilators directly to New York.
 - Governor Inslee of Washington is returning 400 of the state's 500 ventilators to

- the SNS to be deployed to areas of greatest need.
 - Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 250-bed Federal Medical Station for the Metro D.C. area.
- Forty states, four territories and 24 tribes have issued stay-at-home orders.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).

- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing resources to reopen safely and responsibly.
- As of April 18, FEMA, HHS, and the private sector combined have coordinated the

delivery of or are currently shipping: 55.8 million N95 respirators, 77.1 million surgical masks, 6.1 million face shields, 11.4 million surgical gowns, 564 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On April 17, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- The U.S. Department of Agriculture announced the [Coronavirus Food Assistance Program \(CFAP\)](#), an immediate relief program that provides \$19 billion in support to farmers and ranchers, maintains the integrity of our food supply chain and ensures access to food for those in need.
 - Direct support to farmers and ranchers provides \$16 billion based on actual losses for agricultural producers.
 - USDA will partner with regional and local distributors to purchase \$3 billion in fresh produce, dairy and meat products. The distributors and wholesalers will provide these items to food banks, community and faith-based organizations and other non-profits serving people in need.

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million

surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Connection

March 17, 2020 at 1:14 PM EDT

To: Smith, Jaime (GOV)

Cc: Shagren, Karina L. (MIL) (Karina.Shagren@mil.wa.gov), Ward, Erin

Hey Jaime.

It was great to meet you in person yesterday. I also appreciated the JIC walk through.

[Here is a copy of the ESF15 SOP](#) I was talking about. A few details to help navigate the document:

- The terminology is pretty different from what you're using, but I think it's generally clear how you could crosswalk things. That said, titles and job descriptions are discussed on pg 11-14.
- Move to pg A-22 for Template of Coms Summary. These are extremely helpful to keep messaging/actions in line with the specific agencies so readers understand there are agency-specific priorities that are ongoing in addition to the priority messaging efforts being requested by executive leadership. This also helps keep your PIOs from being pulled in two directions.
 - The report also brings your sector reports into a common place (e.g. private sector, leg affairs, media, tribes, etc). If people are working for remote locations, this also keeps staff reporting through a common product (and daily timeline).
- **Annex B covers Government Coordination** (Gov, Legislature, Counties, Cities, tribes, and Federal Reps). It provides an overview, strategy and position titles/descriptions and Org Chart.
- **Annex C covers the JIC** (federal definition), which is slightly different from the way you all define it, but you can see the same functions are covered. It includes social media listening, photos/videos, news desk, spokesperson etc. In a nutshell, this is the distribution part of the operation. This section also includes overview, strategy, position titles and org chart.
- **Annex F covers Private Sector:** This is critical at this time given the number of partners at the table and the impacts to business. Clearly this group has a huge role in terms of getting consistent messaging to business/chambers on those polices and programs available to them via state or federal agencies.
- **Annex G covers Planning and Products:** this section generally outlines how to organize liaisons to other organizations, research, writing, community education needs, speakers bureau request tracking, LEP, ASL needs, graphics and any other "production" aspects of an operation. They work very close with JIC so you have a dedicated group just working on producing the content (for the rest of the operation to share). Benefit is that it ensures that everyone is pushing the same message/content/graphics so you don't get accidental mixed signals or haves and have nots.
- Finally, I can't stress enough that the "External Affairs Officer" or organizational lead should be part of the Command Staff. That person needs to be in the room for executive meetings and discussions related to the big operational picture. They need to be there to advise the leadership about possible issues from politics, media, public, trends, etc.

Finally, these are just notes and thoughts following our conversation yesterday and are not a critique.

The structure is expandable and can be implemented from various locations. We are available to help train or take Q/A if you need anything. I fully recognize that the folks at WA DOH and others have been in the fight for weeks now and any major reorgs could be counterproductive. So, please consider these thoughts as options. We will support you all in any way we can.

Thanks again,

Ryan

Office of Intergovernmental Affairs (IGA)

Treasury Launches Web Portal and Begins Disbursement of CARES Act Funding to State, Local, and Tribal Governments

April 13, 2020 at 6:01 PM EDT

To: molly.voris@gov.wa.gov

State, Local, and Tribal Leaders –

Today, April 13, the U.S. Department of the Treasury released eligibility guidance for CARES Act funding to State, Local, and Tribal Governments. Below, please find additional information. Note that additional guidance on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Sincerely,

The White House Office of Intergovernmental Affairs

U.S. Department of the Treasury: The CARES Act Provides Assistance for State and Local Governments

April 13, 2020

Through the Coronavirus Relief Fund, the CARES Act provides for payments to State, Local, and Tribal governments navigating the impact of the COVID-19 outbreak.

The CARES Act established the \$150 billion Coronavirus Relief Fund.

Treasury will make payments from the Fund to States and eligible units of local government; the District of Columbia and U.S. Territories (the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands); and Tribal governments (collectively “governments”).

The CARES Act requires that the payments from the Coronavirus Relief Fund only be used to cover expenses that—

- (1) are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID-19);
- (2) were not accounted for in the budget most recently approved as of March 27, 2020 (the date of enactment of the CARES Act) for the State or government; and
- (3) were incurred during the period that begins on March 1, 2020, and ends on December 30, 2020.

Additional information on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Amounts paid to States, the District of Columbia, U.S. Territories, and eligible units of local government are based on population as provided in the CARES Act. The CARES Act directs

Treasury to use U.S. Census Bureau data for the most recent year for which data is available. The amount of payments made to each State will be reduced by the aggregate amount of payments that will be disbursed to eligible local governments within such State that have provided the required certifications to Treasury. Additional information on these points can be accessed below.

A unit of local government eligible for receipt of direct payment includes a county, municipality, town, township, village, parish, borough, or other unit of general government below the State level with a population that exceeds 500,000. Eligible local governments must submit the certification required by the CARES Act to Treasury by the deadline set forth below in order to receive payment.

Payments to Tribal Governments are to be determined by the Secretary of the Treasury in consultation with the Secretary of the Interior and Indian Tribes. Although that consultation has not yet concluded, certain data is requested of Tribal governments at this time to assist in this determination. Additional information on payments to Tribal governments will be posted as it becomes available.

Governments eligible for payments must provide payment information and required supporting documentation through the electronic form accessible below. To ensure payments are made within the 30 day period specified by the CARES Act, governments must submit completed payment materials not later than 11:59 p.m. EDT on April 17, 2020. Eligible local and Tribal governments that do not provide required information—and in the case of a local government, the required certification—by 11:59 p.m. EDT on April 17, 2020, may not receive any payment from the Fund.

- Data sources and the distribution methodology for units of local government (more [here](#)).
- Listing of eligible units of local government (more [here](#)).
- Eligible Units: Submission Required for Receipt of Coronavirus Relief Fund Payments (more [here](#)).

Interim_Guidance_for_Implementing_Safety_Practices_for_Critical_Infrastructure_Workers_Who_May_Have_Had_Exposure_to_a_Person_with_Suspected_or_Confirmed_COVID-19

April 09, 2020 at 11:11 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the update below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19.

April 9, 2020

CISA Update

Interim Guidance for Critical Infrastructure Workers Who May Have Had Exposure to COVID-19

Partners,

Please find below an important update from the Centers for Disease Control and Prevention (CDC) and the Cybersecurity and Infrastructure Security Agency (CISA) regarding the continued health, safety, and protection of Essential Critical Infrastructure Workers who may have been exposed to COVID-19. These two important informational products include *Interim Guidance for Implementing Safety Practices for Critical Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or Confirmed COVID-19* and a quick reference of the Do's and Don'ts for employers and employees related to COVID-19 exposures.

While the [Interim Guidance](#) specifically calls attention to critical infrastructure workers serving in the specific capacities and functions, as below, the guidance can apply to all critical infrastructure workers with the exception of Healthcare Providers who are covered under [separate guidance](#).

- Federal, state, & local law enforcement
- 911 call center employees

- Fusion Center employees
- Hazardous material responders from the government and the private sector
- Janitorial staff and other custodial staff
- Workers – including contracted vendors – in food and agriculture, critical manufacturing, informational technology, transportation, energy and government facilities

Employers should implement the recommendations in the [Interim Guidance](#) for Businesses and Employers, to Plan and Respond to Coronavirus Disease 2019, to help prevent and slow the spread of COVID-19 in the workplace.

Please continue to monitor the CDC website for the most current medical [guidance](#).

Treasury_Guidance_--_State,_Local,_and_Tribal_Governments_for_the_Coronavirus_Relief_Fund

April 22, 2020 at 7:45 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the below announcement from the White House Office of Intergovernmental Affairs regarding Treasury's release of CARES Act guidance for State, Local, and Tribal Governments.

Today, Secretary of the Treasury Steven Mnuchin released guidance for State, Local, and Tribal Governments regarding the Coronavirus Relief Fund (Section 5001 of the CARES Act).

As stated by the [legislation](#) signed by President Trump on March 27, the use of funds “are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID–19).” The guidance document ([here](#)) and frequently asked questions ([here](#)) provide, in detail, examples of eligible and ineligible expenditures of the \$150 billion Coronavirus Relief Fund. You can find additional information about Assistance to State and local governments [here](#).

We will continue to share all relevant information as it becomes available.

Thank you,

White House Office of Intergovernmental Affairs

Coronavirus Aid, Relief, and Economic Security Act (CARES)

Following extensive negotiations between the Trump Administration and Congressional Leaders, President Trump signed the *Coronavirus Aid, Relief, and Economic Security Act (CARES)*. The \$2.2 trillion economic relief package provides American families, healthcare workers, and small businesses with the economic support they need to get

through this challenging time. This aid comes on top of the Family First Coronavirus Aid Package, enacted last month. State/Local/Tribal provisions include:

- \$150 billion in direct aid to State, Tribal, and local governments. Aid will be allocated primarily by a State's population with each State receiving at least \$1.25 billion.
- \$340 billion in additional emergency supplemental funding to combat the coronavirus outbreak.
- \$500 billion for loans and guarantees that authorize the U.S. Treasury to support eligible businesses and States and local governments to cover losses incurred as a result of COVID-19.
- \$100 billion for hospitals and health care facilities to reimburse expenses or lost revenues not otherwise reimbursed that are directly attributable to COVID-19.
- **\$3.5 billion** to allow States to expand childcare benefits for healthcare workers, first responders, and others on the frontlines of this crisis.
- Read more here: **[President Donald J. Trump Is Providing Economic Relief to American Workers, Families, and Businesses Impacted by the Coronavirus](#)**

HHS_Letter_to_Hospital_Administrators

April 10, 2020 at 8:04 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the attached letter and FAQs sent by Health and Human Services (HHS) Secretary Azar to hospital administrators.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: HHS Letter to Hospital Administrators

To follow-up on his letter from March 29, 2020, Secretary Azar just sent the attached letter and Frequently Asked Questions (FAQ) to hospital administrators across the country. Today's letter underscores the importance of data-sharing and highlights that hospitals are key partners with the Federal Government as we work to ensure that the Whole of America response to COVID-19. The data requested included daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.

The FAQ attachment to the letter details the federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information. Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them. These FAQs will be updated if additional data delivery methods become available.

It remains critical that all requested information listed in the FAQ is provided daily to the federal government to facilitate planning, monitoring, and resource allocation in response to COVID-19.

JIC Director (MIL)

Re: FEMA says my last work day is tomorrow unless Justin Fordice extends

April 16, 2020 at 6:28 PM EDT

To: JIC41 (MIL), Fordice, Justin

Cc: Smith, Jaime (GOV Contractor), seoc22 (MIL)

Hi Justin, sounds like there was some confusion over work days and R&R days and how Kale's ESF 4 counted vs FEMA. Is there any way to extend? See email below for full context. We haven't secured Kale's replacement and this would be a really rough transition for our PIO shop. Is there any way we can make this happen please?! Thanks for your consideration.

Subject: FEMA says my last work day is tomorrow unless Justin Fordice extends

Howdy!

Another twist in the road here and sorry to spring this on you. My ESF4 LuAnn just called after the Webex meltdown and said FEMA contact just notified her that my Mato mission is scheduled to end tomorrow end of shift. My ESF4 calculated my length of assignment based on 28 work days and 2 R&R days that are not counted. FEMA apparently counts differently and LuAnn wasn't aware of that until just now.

LuAnn stated that FEMA's Justin Fordice is the person with decision authority. Unless Justin approves to extend the mission order I'll wrap everything up tomorrow and fly back to AK on Saturday.

Just another twist in the road. I know you have a lot on your plate(s).

Best -

Kale

Coronavirus (COVID-19) Pandemic Whole-of-America Response - April 16

April 16, 2020 at 1:46 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 16, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- * FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people
- * FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- * Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.

-- Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.

--This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.

* The White House announced [a new collaboration by Schema.org](#) to help Americans find the most up-to-date public health guidance and the most relevant information on testing facilities in their communities

--Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.

--All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Beginning **April 10**, HHS and FEMA will work with states with federal Community-Based Testing Sites to clarify whether sites want to continue as they are now, or transition to full state control.
 - Under state control, CBTS sites would still receive technical assistance from the federal government and be able to request supplies through the normal FEMA systems.
 - Leadership at both HHS and FEMA will consider approving extension requests by states that need additional federal assistance to manage and operate sites. A formal notice to continue must be submitted to the CBTS Task Force Leader,

- by either the state's Governor or his or her representative, no later than April 9.
- The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.
 - After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.
 - States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share.
 - To date, Community Based Testing Sites have screened over 85,000 individuals.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - On **April 8**, HHS, through the Health Resources and Services Administration awarded more than \$1.3 billion to 1,387 health centers. These centers will help communities across the country detect coronavirus; prevent, diagnose, and treat COVID-19; and maintain or increase health capacity and staffing levels to address this public health emergency.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 21**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 56.9 million N95 respirators, 82.5 million surgical masks, 5.9 million face shields, 12.3 million surgical gowns, 643 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical

distributors in various locations across the U.S. through [Project Airbridge](#).

- The U.S. has now processed 4.4 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.
- On **April 21**, [New York Gov. Andrew Cuomo announced](#) that the state would no longer need the USNS Comfort because of declining cases in New York City.
 - The USNS Comfort arrived in Manhattan on March 30 and has treated 182 patients.
- On **April 21**, HHS announced [\\$955 million in grants from the Administration for Community Living](#) to help meet the needs of older adults and people with disabilities. This funding is part of the CARES Act.
 - The grants will fund home-delivered meals, care services in the home, respite care and other support to families and caregivers, and other support services.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

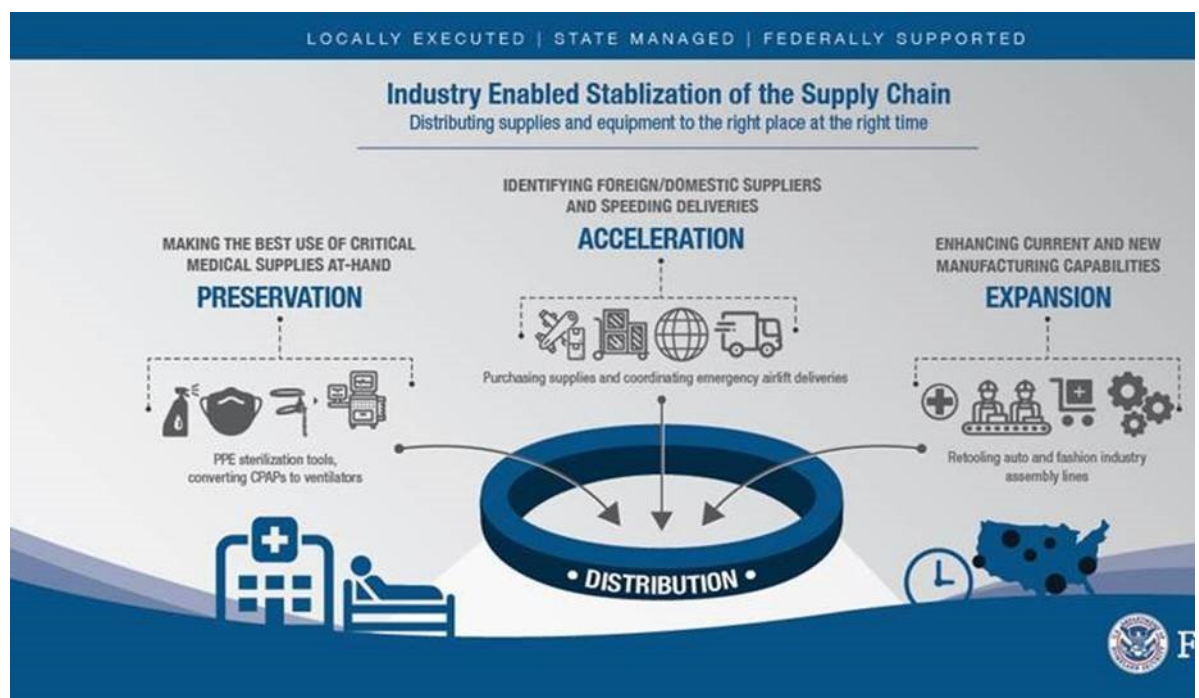

Please see the advisory below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding stabilize the supply chain in response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Supply Chain Stabilization

The Supply Chain Task Force continues executing a strategy maximizing the availability of critical protective resources through FEMA for a whole-of-America response. Efforts to date have focused on reducing the medical supply chain capacity gap to both satisfy and relieve demand pressure on medical supply capacity. The task force is applying a prong approach of Preservation, Acceleration, Expansion and Allocation to rapidly increase supply today and encourage domestic production of critical resources to increase supply long-term.

The **preservation** line of effort focuses on providing federal guidance to responders and the non-medical sector public service (police, fire, EMT), energy distribution and the food industry on how to preserve supplies when they reduce impact on the medical supply chain.

The **acceleration** line of effort provides direct results to help meet the demand for personal protective equipment through the industry to allow responders to get supplies they need as fast as possible.

The **expansion** line of effort is charged with generating capacity with both traditional and non-traditional means such as adding machinery or by re-tooling assembly lines to produce new products.

The **allocation** of supplies facilitates the distribution of critically needed PPE to "hot spots" for immediate resupply. Distributors report on supplies and can request assistance when they experience a shortage.

The Supply Chain Task Force is working with the major commercial distributors to facilitate the rapid distribution of resources in short supply to locations where they are needed most. This partnership enables FEMA and its federal partners to take a whole-of-America approach to combatting COVID-19. The task force is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. The distributors have agreed to focus portions of their distributions on these areas in order to alleviate the suffering of American people.

A key example of this partnership in action is Project Airbridge. The airbridge was created to reduce the time it takes for U.S. medical supply distributors to receive PPE and other critical supplies into the country for their respective customers. FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks

Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations. Per agreement with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical need. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide. FEMA determines hotspot areas based on CDC data.

Working together, we can efficiently distribute these vital resources to hospitals, nursing homes, long-term care facilities, pre-hospital medical services, state and local governments, and other facilities critical to caring for the American people during this pandemic.

Coronavirus_(COVID-19)_Pandemic:_Purchase_and_Distribution_of_Food_Eligible_for_Public_Assistance

April 14, 2020 at 7:31 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding eligibility requirements for expenses incurred from the purchasing and distribution of food relating to COVID-19 response operations.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA [issued a new policy](#) that addresses the purchase and distribution of food eligible for Public Assistance funding under emergency and major disaster declarations for the COVID-19 pandemic.

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

Using Autodialers for COVID-19 Related Public Service Announcements

April 02, 2020 at 11:51 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the guidance below, and attached, from our partners in the Communications Sector Coordinating Council regarding autodialers and how to ensure that legitimate COVID-related public service announcements are not inadvertently blocked.

April 2, 2020

Using Autodialers for COVID-19 Related Public Service Announcements

If your organization uses, or expects to use, automated dialing technology to make large numbers of voice telephone calls to citizens about COVID-19, there are measures you are advised to take to help ensure that those calls are not inadvertently blocked by service providers or other entities.

What You Should Know

Many telephone service and app providers offer services that consumers can use to block unwanted and illegal robocalls. While those services can protect citizens from illegal fraudulent robocallers (including ones taking advantage of the public's anxiety about COVID-19), there is some risk that legitimate calls made using automated dialing technology might inadvertently be identified as "spam" and blocked.

Calling patterns associated with legitimate, important public service telephone calls might in some instances be similar to those associated with unwanted (and often illegal) robocalls, so the algorithms used to identify and block unwanted robocalls could potentially be triggered.

What You Should Do

Any public service entity that uses an autodialer to contact its citizens can minimize the risk that its calls are incorrectly blocked (or labeled as "spam") by registering its telephone numbers with the companies that offer the blocking tools. Each has a procedure through which legitimate callers can register their numbers and report any instance(s) of incorrect blocking or labeling.

Telephone Service Providers' Portals for Registering Numbers

Legitimate callers can go the web sites below to register legitimate numbers and also address any incorrect labeling or call blocking.

- **AT&T:** <https://hiyahelp.zendesk.com/hc/en-us/requests/new>
 - Analytics Provider: Hiya
- **Sprint, Verizon, U.S. Cellular:** <http://Reportarobocall.com>
 - Analytics Provider: TNS
- **T Mobile:** <http://www.calltransparency.com>
 - Analytics Provider: First Orion

Third-Party App Providers

Legitimate callers can email these companies about their planned autodialing calls:

- **Nomorobo:** reports@nomorobo.com
- **YouMail:** TNissues@youmail.com

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_9,_2020

April 09, 2020 at 4:37 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - As of April 8, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
 - An additional 49 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not

- mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.
- On April 8, the Department of Health and Human Services announced the first contract for ventilator production rated under the Defense Production Act, to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - On April 3, President Trump issued "Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.
- On April 8, CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.
 - The guidance covers essential health care workers who've been exposed to the coronavirus.
 - Essential workers can, under certain circumstances, go back to work, if they're

asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they're at work.

Strategies_for_Addressing_Personal_Protective_Equipment_(PPE)_Shortage

April 14, 2020 at 9:16 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding strategies for addressing Personal Protective Equipment (PPE) shortages.

April 14, 2020

CISA Advisory

Strategies for Addressing Personal Protective Equipment (PPE) Shortage

The U.S. government's strategy for addressing COVID-19 personal protective equipment (PPE) shortages relies on three pillars of practice to ensure continued availability of protective gear: reduce – reuse – repurpose. In this time of the COVID-19 pandemic and the associated PPE shortages, implementation of contingency plans across all sectors are necessary to ensure continued availability of protective gear. In support of this strategy, the U.S. government has recently released two documents that will be of assistance to all infrastructure sectors.

FEMA has published the attached *COVID-19 Pandemic: Personal Protective Equipment Preservation Best Practices*. This document summarizes government guidance and best practices currently being implemented across the United States for COVID-19 response has been released. While tailored to the Healthcare Sector, many of these strategies can be applied to other sectors with similar PPE requirements.

NIOSH has recently issued [Interim Guidance for Conserving and Extending Filtering Facepiece Respirator Supply in Non-Healthcare Sectors](#). That document offers strategies to conserve, extend, and respond to shortages in the supply of NIOSH-approved filtering facepiece respirators (FFRs) used in non-healthcare worksites such as manufacturing and construction. Employers should implement alternative controls to reduce, as much as possible, their reliance on PPE, particularly FFRs.

Please continue to refer to CDC for updates to posted guidance for businesses and employers to plan and respond to COVID-19: <https://www.cdc.gov/coronavirus/2019->

[ncov/guidance-business-response.html](https://www.fda.gov/ncov/guidance-business-response.html). For general and other useful information regarding COVID-19, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. Information on FEMA's efforts to stabilize the PPE supply chain can be found at: <https://www.fema.gov/news-release/2020/04/08/fema-covid-19-supply-chain-task-force-supply-chain-stabilization>.

Respectfully,
Cybersecurity and Infrastructure Security Agency

Intergovernmental Affairs

Please see the advisory below, and attached fact sheet, from our partners in the Federal Emergency Management Agency (FEMA) regarding the release of a Disaster Financial Management Guide to assist communities in their COVID-19 response.

April 17, 2020

FEMA Advisory

Disaster Financial Management Guide

On Thursday, April 16, FEMA released the “Disaster Financial Management Guide” to support jurisdictions in establishing and implementing sound disaster financial management practices, which are critical for successful response and recovery. The guide takes an all-hazards approach and addresses a broad range of issues and contains concepts, principles and resources applicable to the coronavirus (COVID-19) pandemic response environment.

The guide identifies the capabilities and activities necessary to prepare and successfully implement disaster financial management while maintaining fiscal responsibility throughout response and recovery operations. This includes considerations and practices necessary to track, calculate and justify the costs of an emergency; support local reimbursement reconciliation; avoid de-obligation of grant funding; and effectively fund and implement recovery projects and priorities. The principles, concepts and resources contained in the guide can support jurisdictions in identifying the resources needed to support their community, increase the efficiency of recovery efforts, and reduce the likelihood of audits and financial penalties for the jurisdiction.

To view the guide, please visit <https://www.fema.gov/plan>.

April 11, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and

- number of ventilators available in the state.
- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
 - On April 10, HHS Secretary Azar sent a follow up letter to hospital administrators, reinforcing the need for this data to be provided daily to facilitate planning, monitoring, and resource allocation in response to COVID-19.
 - Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them.
 - The letter included a set of frequently asked questions that details federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information.
 - These FAQs will be updated if additional data delivery methods become available.
 - The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.
- On April 10, HHS began delivering the initial \$30 billion in relief funding to providers in support of the national response to COVID-19, with \$26 of the \$30 billion expected to be delivered to providers' bank accounts the same day.
 - The payments are part of the distribution of the \$100 billion provider relief fund included in the CARES Act.
 - To expedite providers getting money as quickly as possible, the initial funding was distributed immediately proportionate to providers' share of Medicare fee-for-service reimbursements in 2019.
 - The Administration is rapidly working on future targeted distributions to hospitals and providers that will focus on providers in areas particularly impacted by COVID-19, rural providers, and providers with lower shares of Medicare reimbursement or who predominantly serve the Medicaid population.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132

ventilators by June 1.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

April 17, 2020

CISA Advisory

CISA releases Version 3.0 of the Essential Critical Infrastructure Worker Guidance

The Cybersecurity and Infrastructure Security Agency (CISA) has released [Version 3.0 of the Essential Critical Infrastructure Workers list](#). Version 3.0 provides clarity around a range of positions needed to support the critical infrastructure functions laid out in the original guidance and Version 2.0. This iteration includes a reorganization of the section around Healthcare and Public Health and more detail to clarify essential workers; emphasis for Emergency Medical Services workers; and adds lawyers and legal aid workers. Also included is language focused on sustained access and freedom of movement; a reference to the CDC guidance on safety for critical infrastructure workers; and a statement saying sick employees should avoid the workplace and the workforce. In worker categories, all references to “employees” or “contractors” have been changed to “workers.” Other additions include a reference to the USCG Marine Safety Information Bulletin on essential maritime workers; clarified language including vehicle manufacture; and many other small changes to clarify language.

CISA issued initial guidance on Essential Critical Infrastructure Workers on March 19, which was developed to help state, local, tribal, and territorial authorities as they decide who to allow freedom of movement in areas that are under restrictions such as shelter-in-place or quarantine. That initial guidance was developed with input from our government and industry partners, on the assumption that we would need to update the guidance as we received additional feedback from stakeholders.

CISA moved quickly to incorporate feedback to update the list of Essential Critical Infrastructure Workers to expand and specify additional categories of essential workers who are key to maintaining a community’s safety, public health, and economy. These changes

were included in Version 2.0 of this guidance, released March 28, generally represented minor clarifications or additions that did not shift the overall scoping of critical infrastructure activity as highlighted in the initial release. Specifically, clarity was provided around a range of supporting and enabling activity for infrastructure resilience – the commodity, services, and logistical supply chains of other infrastructure functions. This included more direct call outs for essential sanitation and hygiene production and services, as well as manufacturing of critical products.

The Guide continues to be a resource for state and local decision makers and is in no way a binding document. Ultimately, all final decisions rest with state and local authorities, who must use their own judgment to balance public health and safety with the need to maintain critical infrastructure.

The degree to which state and local orders have leveraged our guidance when defining essential workers is encouraging. A common national picture will ultimately benefit us all. We hope this updated Guide helps as your communities grapple with the impacts of COVID-19. Please direct any questions to CISA.CAT@cisa.dhs.gov.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

DHS and USDA Move to Protect American Farmers and Ensure Continued Flow of America's Food Supply

Department to Temporarily Amend Certain H-2A Requirements During COVID-19 National Emergency

WASHINGTON— The Department of Homeland Security, with the support of the U.S. Department of Agriculture (USDA), has announced a temporary final rule to change certain H-2A requirements to help U.S. agricultural employers avoid disruptions in lawful agricultural-related employment, protect the nation's food supply chain, and lessen impacts from the coronavirus (COVID-19) public health emergency. These temporary flexibilities will not weaken or eliminate protections for U.S. workers.

Under this temporary final rule, an H-2A petitioner with a valid temporary labor certification who is concerned that workers will be unable to enter the country due to travel restrictions can start employing certain foreign workers who are currently in H-2A status in the United States immediately after United States Citizenship and Immigration Services (USCIS) receives the H-2A petition, but no earlier than the start date of employment listed on the petition. To take advantage of this time-limited change in regulatory requirements, the H-2A worker seeking to change employers must already be in the United States and in valid H-2A status.

Additionally, USCIS is temporarily amending its regulations to protect the country's food supply chain by allowing H-2A workers to stay beyond the three-year maximum allowable period of stay in the United States. These temporary changes will encourage and facilitate the continued lawful employment of foreign temporary and seasonal agricultural workers during the COVID-19 national emergency. Agricultural employers should utilize this streamlined process if they are concerned with their ability to bring in the temporary workers who were previously authorized to work for the employer in H-2A classification. At no point is it acceptable for employers to hire illegal aliens.

“This Administration has determined that continued agricultural employment, currently threatened by the COVID-19 pandemic, is vital to maintaining and securing the country's critical food supply chain. The temporary changes announced by USCIS provide the needed stability during this unprecedented crisis,” said Acting Secretary of Homeland Security Chad F. Wolf.

“USDA welcomes these additional flexibilities provided by the Department of Homeland Security today,” said Secretary of Agriculture Sonny Perdue. “Providing flexibility for H-2A employers to utilize H-2A workers that are currently in the United States is critically important as we continue to see travel and border restrictions as a result of COVID-19. USDA continues to work with the Department of Homeland Security, the Department of Labor and the Department of State to minimize disruption and make sure farmers have access to these critical workers necessary to maintain the integrity in our food supply.”

The temporary final rule is effective immediately upon publication in the Federal Register. If the new petition is approved, the H-2A worker will be able to stay in the United States for a period of time not to exceed the validity period of the Temporary Labor Certification. DHS will issue a new temporary final rule in the Federal Register to amend the termination date of these new procedures in the event DHS determines that circumstances demonstrate a continued need for the temporary changes to the H-2A regulations.

The H-2A nonimmigrant classification applies to alien workers seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States, usually lasting no longer than one year, for which able, willing, and qualified U.S. workers are not available.

Coronavirus (COVID-19) Pandemic: Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are [executing a four-pronged approach](#) to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation**.

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19 response, please review the attached fact sheet.

DHS and USDA Move to Protect American Farmers and Ensure Continued Flow of America's Food Supply

Department to Temporarily Amend Certain H-2A Requirements During COVID-19 National Emergency

WASHINGTON— The Department of Homeland Security, with the support of the U.S. Department of Agriculture (USDA), has announced a temporary final rule to change certain H-2A requirements to help U.S. agricultural employers avoid disruptions in lawful agricultural-related employment, protect the nation's food supply chain, and lessen impacts from the coronavirus (COVID-19) public health emergency. These temporary flexibilities will not weaken or eliminate protections for U.S. workers.

Under this temporary final rule, an H-2A petitioner with a valid temporary labor certification who is concerned that workers will be unable to enter the country due to travel restrictions can start employing certain foreign workers who are currently in H-2A status in the United States immediately after United States Citizenship and Immigration Services (USCIS) receives the H-2A petition, but no earlier than the start date of employment listed on the petition. To take advantage of this time-limited change in regulatory requirements, the H-2A worker seeking to change employers must already be in the United States and in valid H-2A status.

Additionally, USCIS is temporarily amending its regulations to protect the country's food supply chain by allowing H-2A workers to stay beyond the three-year maximum allowable period of stay in the United States. These temporary changes will encourage and facilitate the continued lawful employment of foreign temporary and seasonal agricultural workers during the COVID-19 national emergency. Agricultural employers should utilize this streamlined process if they are concerned with their ability to bring in the temporary workers who were previously authorized to work for the employer in H-2A classification. At no point is it acceptable for employers to hire illegal aliens.

“This Administration has determined that continued agricultural employment, currently threatened by the COVID-19 pandemic, is vital to maintaining and securing the country's critical food supply chain. The temporary changes announced by USCIS provide the needed stability during this unprecedented crisis,” said Acting Secretary of Homeland Security Chad F. Wolf.

“USDA welcomes these additional flexibilities provided by the Department of Homeland Security today,” said Secretary of Agriculture Sonny Perdue. “Providing flexibility for H-2A employers to utilize H-2A workers that are currently in the United States is critically important as we continue to see travel and border restrictions as a result of COVID-19. USDA continues to work with the Department of Homeland Security, the Department of Labor and the Department of State to minimize disruption and make sure farmers have access to these critical workers necessary to maintain the integrity in our food supply.”

The temporary final rule is effective immediately upon publication in the Federal Register. If the new petition is approved, the H-2A worker will be able to stay in the United States for a period of time not to exceed the validity period of the Temporary Labor Certification. DHS will issue a new temporary final rule in the Federal Register to amend the termination date of these new procedures in the event DHS determines that circumstances demonstrate a continued need for the temporary changes to the H-2A regulations.

The H-2A nonimmigrant classification applies to alien workers seeking to perform agricultural labor or services of a temporary or seasonal nature in the United States, usually lasting no longer than one year, for which able, willing, and qualified U.S. workers are not available.

FEMA_Advisory:_Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response

April 13, 2020 at 8:03 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Project Airbridge, PPE Preservation, and resource requests from the International Reagent Resource.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

In support of the coronavirus (COVID-19) pandemic response, FEMA provides the following: FEMA Project Airbridge video Advisory; Personal Protective Equipment (PPE) Preservation Best Practices Advisory and Fact Sheet, and a Resource Requests from the International Reagent Resource (IRR) Advisory and Fact Sheet.

FEMA Project Airbridge

To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC

data.

A brief video on Project Airbridge is available on [FEMA's Media Gallery Website](#) and on all FEMA social media accounts.

Project Airbridge Advisory: Attachment [1]

Personal Protective Equipment Preservation Best Practices

This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19 pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

Preserving Personal Protective Equipment Best Practices Advisory: Attachment [2]

Preserving Personal Protective Equipment Best Practices Fact Sheet: Attachment [3]

Resource Requests from the International Reagent Resource

The International Reagent Resource (IRR), established by the Centers for Disease Control and Prevention (CDC), acquires, authenticates, and produces reagents that scientists need to carry out basic research and develop improved diagnostic tests, vaccines, and detection methods.

The (IRR) Fact Sheet (attached) outlines a simplified process for states and territories to make resource requests from the IRR. Consolidating testing supplies under the IRR alleviates burden on public health labs, which increases efficiency and reduces need to work with separate, individual suppliers for swabs, reagents, and other diagnostic testing supplies.

Office of Intergovernmental Affairs (IGA)

Treasury Launches Web Portal and Begins Disbursement of CARES Act Funding to State, Local, and Tribal Governments

April 13, 2020 at 6:01 PM EDT

To: jaime.smith@gov.wa.gov

State, Local, and Tribal Leaders –

Today, April 13, the U.S. Department of the Treasury released eligibility guidance for CARES Act funding to State, Local, and Tribal Governments. Below, please find additional information. Note that additional guidance on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Sincerely,

The White House Office of Intergovernmental Affairs

U.S. Department of the Treasury: The CARES Act Provides Assistance for State and Local Governments

April 13, 2020

Through the Coronavirus Relief Fund, the CARES Act provides for payments to State, Local, and Tribal governments navigating the impact of the COVID-19 outbreak.

The CARES Act established the \$150 billion Coronavirus Relief Fund.

Treasury will make payments from the Fund to States and eligible units of local government; the District of Columbia and U.S. Territories (the Commonwealth of Puerto Rico, the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands); and Tribal governments (collectively “governments”).

The CARES Act requires that the payments from the Coronavirus Relief Fund only be used to cover expenses that—

- (1) are necessary expenditures incurred due to the public health emergency with respect to the Coronavirus Disease 2019 (COVID-19);
- (2) were not accounted for in the budget most recently approved as of March 27, 2020 (the date of enactment of the CARES Act) for the State or government; and
- (3) were incurred during the period that begins on March 1, 2020, and ends on December 30, 2020.

Additional information on eligible uses of Fund disbursements by governments will be posted as it becomes available.

Amounts paid to States, the District of Columbia, U.S. Territories, and eligible units of local government are based on population as provided in the CARES Act. The CARES Act directs

Treasury to use U.S. Census Bureau data for the most recent year for which data is available. The amount of payments made to each State will be reduced by the aggregate amount of payments that will be disbursed to eligible local governments within such State that have provided the required certifications to Treasury. Additional information on these points can be accessed below.

A unit of local government eligible for receipt of direct payment includes a county, municipality, town, township, village, parish, borough, or other unit of general government below the State level with a population that exceeds 500,000. Eligible local governments must submit the certification required by the CARES Act to Treasury by the deadline set forth below in order to receive payment.

Payments to Tribal Governments are to be determined by the Secretary of the Treasury in consultation with the Secretary of the Interior and Indian Tribes. Although that consultation has not yet concluded, certain data is requested of Tribal governments at this time to assist in this determination. Additional information on payments to Tribal governments will be posted as it becomes available.

Governments eligible for payments must provide payment information and required supporting documentation through the electronic form accessible below. To ensure payments are made within the 30 day period specified by the CARES Act, governments must submit completed payment materials not later than 11:59 p.m. EDT on April 17, 2020. Eligible local and Tribal governments that do not provide required information—and in the case of a local government, the required certification—by 11:59 p.m. EDT on April 17, 2020, may not receive any payment from the Fund.

- Data sources and the distribution methodology for units of local government (more [here](#)).
- Listing of eligible units of local government (more [here](#)).
- Eligible Units: Submission Required for Receipt of Coronavirus Relief Fund Payments (more [here](#)).

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

April 14, 2020 at 7:31 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding eligibility requirements for expenses incurred from the purchasing and distribution of food relating to COVID-19 response operations.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Purchase and Distribution of Food Eligible for Public Assistance

Due to the impact of the COVID-19 pandemic, it may be necessary as an emergency protective measure to provide food to meet the immediate needs of those who do not have access to food and to protect the public from the spread of the virus. On April 11, 2020, FEMA [issued a new policy](#) that addresses the purchase and distribution of food eligible for Public Assistance funding under emergency and major disaster declarations for the COVID-19 pandemic.

State, local, tribal, and territorial (SLTT) governments with the legal responsibility for protecting life, public health and safety are eligible applicants for assistance related to the purchase and distribution of food.

SLTT applicants may enter into formal agreements or contracts with private organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the COVID-19 pandemic. In these cases, Public Assistance funding is provided to the legally responsible government entity, which would then reimburse the private organization for services under the agreement or contract.

All costs must be reasonable and are subject to standard Public Assistance program eligibility and other federal requirements, as well as the prevailing cost-share requirement for the respective COVID-19 emergency or major disaster declaration.

This form of assistance is time-limited with additional information outlined in the policy.

FEMA will engage with interagency partners, including the U.S. Department of Agriculture, the U.S. Department of Health and Human Services, and U.S. Department of Housing and Urban Development, to ensure this assistance does not duplicate other available assistance.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_14

April 14, 2020 at 4:25 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- HHS announced five new contracts for ventilator production rated under the Defense Production Act (DPA), to General Electric, Hill-Rom, Medtronic, ResMed, and Vyaire, as well as two other contracts for ventilator production, to Hamilton and Zoll.
 - In total, combined with contracts with [General Motors](#) and [Philips](#) rated under the DPA issued last week, HHS has finalized contracts to supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
 - The seven new ventilator contracts announced by HHS this month will provide

a total of 137,431 ventilators by the end of 2020.

- The thousands of ventilators delivered to the Strategic National Stockpile starting this month, continuing through the spring and summer, will provide more capacity to respond to the pandemic as it evolves.
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
- On **April 13**, The Department of Homeland Security and FEMA announced the funding notice for an additional \$100 million in supplemental Emergency Management Performance Grant Program funds.
 - The money is available to all 56 states and territories as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. All applications must be submitted on [Grants.gov](https://www.grants.gov) by April 28.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.
- FEMA [issued guidance](#) on the framework, policy details and requirements for determining the eligibility for FEMA reimbursement of states purchasing and distributing food to meet the immediate needs of those who do not have access to food as a result of COVID-19 and to protect the public from the spread of the virus.
 - State, local, tribal, and territorial governments with the legal responsibility for protecting life, public health and safety are eligible applicants under emergency and major disaster declarations for the COVID-19 pandemic.
 - Applicants may enter into formal agreements or contracts with private

organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the pandemic.

HHS_Letter_to_Hospital_Administrators

April 10, 2020 at 8:04 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the attached letter and FAQs sent by Health and Human Services (HHS) Secretary Azar to hospital administrators.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: HHS Letter to Hospital Administrators

To follow-up on his letter from March 29, 2020, Secretary Azar just sent the attached letter and Frequently Asked Questions (FAQ) to hospital administrators across the country. Today's letter underscores the importance of data-sharing and highlights that hospitals are key partners with the Federal Government as we work to ensure that the Whole of America response to COVID-19. The data requested included daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

The letter also recognizes that many non-Federal entities may already be requesting this information from hospitals; therefore, the federal government has done its best to minimize the burden of sharing this data and to reduce further duplication of effort.

The FAQ attachment to the letter details the federal government's data needs, explains the division of reporting responsibility between hospitals and states, and provides clear, flexible options for the timely delivery of this critical information. Our objective is to allow states and hospitals either to leverage existing data reporting capabilities or, where those capabilities are insufficient, to provide guidance in how to build on them. These FAQs will be updated if additional data delivery methods become available.

It remains critical that all requested information listed in the FAQ is provided daily to the federal government to facilitate planning, monitoring, and resource allocation in response to COVID-19.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Weekly Update: DHS Response to COVID-19

WASHINGTON – The Department of Homeland Security and its dedicated workforce across more than a dozen offices and components are working diligently with the White House to execute an unprecedented, whole-of America response to the COVID-19 pandemic. These strategic and tactical efforts range from coordinating critical air transportation to addressing medical supply shortages to expediting the inspection of vital goods at our borders, ensuring that our national supply chains remain abundant, accessible, and reliable.

“Everything we have done to this point has been unprecedented and everything we do in the coming weeks and months ahead focuses on life-safety and reducing suffering,” said FEMA Administrator Pete Gaynor. “It is absolutely critical that we maintain our response efforts alongside our federal, state, local, tribal, and industry partners to ensure the virus’s spread is contained and human life is preserved.”

Below is a list of some of DHS’s efforts against COVID-19 last week:

Federal Emergency Management Agency (FEMA)

Deploying Federal Funds in Support of State Response Efforts. Federal funds are being deployed to help ensure that health care providers have the critical resources they need to provide rapid care and treatment to COVID-19 patients in hard-hit areas across the U.S. As of April 12th, FEMA has obligated \$5.2 billion in support of state response efforts.

Increasing Availability of Critical Resources. As a part of the Supply Chain Stabilization Task Force, FEMA is executing a whole-of- America approach to address the limited supply of critical and life-saving equipment. As of April 12th, FEMA has coordinated the delivery of the following to areas in greatest need : 38 million N95 respirators, 32.6 million surgical masks, 5.5 million face shields, 4.7 million surgical gowns, 30.3 million gloves, 212,000 coveralls, and 10,448 ventilators.

Expanding Surge Capacity in Highly-Impacted Areas. FEMA is focusing its allocation of resources in highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls.

- On April 6th, FEMA and the U.S. Army Corps of Engineers announced plans to convert three convention centers in Virginia into temporary hospital facilities. The facilities – the Dulles Expo Center in Northern Virginia and the Richmond and Hampton Roads convention centers – will be able to provide beds for 1,107 acute patients or 1,848 non-acute patients. The conversion is expected to be complete within six weeks.
- On April 8th, FEMA and HHS delivered 80,000 nasopharyngeal swabs to various federal Community-Based Testing Sites (CBTS) locations to help surge testing capacity nationwide.
- As of April 12th, FEMA has delivered 8,600 medical beds to surge capacity and care for an increased volume of COVID-19 patients across the U.S.

Coordinating Air Flights to Address Medical Supply Shortages. FEMA is expediting movement of critical supplies including masks, respirators, gloves, goggles and surgical gowns, from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge. As of April 12th, 28 international flights have arrived in the U.S. with critical medical supplies. An additional 28 flights are scheduled over the next three weeks.

Countering Weapons of Mass Destruction (CWMD)

Administering Medical Screenings at Airports. CWMD contract personnel are continuing to support the CDC with enhanced medical screenings for travelers through 13 specially designated airports. As of April 12th, CWMD has processed approximately 271,529 travelers for enhanced screening, including 1,491 who were referred to CDC for further medical evaluation.

CUSTOMS AND BORDER PROTECTION (CBP)

Maintaining Domestic Supply of Critical Medical Equipment. On April 8th, CBP and FEMA announced that the federal government will begin restricting exports of PPE to ensure that critical supplies stay in the country to fight COVID-19.

Securing U.S. Borders. On April 9th, CBP provided an operational update on activities for the month of March. Total Border Patrol encounters have declined 7% total in March from February, and 76% since the height of the crisis last May. In addition, 80% of the people who CBP encountered since the March 21 enactment of Title 42 are being returned to the

Cybersecurity and Infrastructure Security Agency (CISA)

- On April 6th, CISA updated its list of essential businesses. To date, 45 states and territories have published Essential Business Designations, 20 of them are referencing this list in their essential business designations, while 14 states or territories have incorporated CISA guidance fully into their own lists.
- On April 8th, CISA and CDC issued new guidelines aimed at getting workers in critical infrastructure who may have been exposed to COVID-19 back to work faster. It also calls on employers to take steps to ensure workplace safety, like sending workers home immediately if they are sick and increasing air exchange in the workplace.

Protecting Networks and Cloud Environment. On April 9th, CISA released interim Trusted Internet Connections (TIC) guidance to aid agencies in securing their network and cloud environments. This guidance supports the current surge in teleworking and use of collaboration tools amongst the federal workforce during the COVID-19 pandemic.

Keeping Americans Safe While Ensuring Continuity of U.S. Travel: TSA continues to follow CDC guidance to protect its workers and the nation's transportation system, while ensuring the freedom of movement for people and commerce will not be impeded during the pandemic. Between April 5th and April 12th, TSA has screened more than 729,000 travelers who have all reached their destinations safely.

Bringing Americans Home. Immigration and Customs Enforcement, in close coordination with the State Department, continues to bring stranded Americans home on the return leg of removal flights to Central America. Between March 22nd and April 10th, ICE has flown 1,037 individuals back to the U.S. from Columbia, El Salvador, Honduras, and Nicaragua.

Keeping the Homeland Safe, Secure and Resilient. On April 8th, DHS Intelligence and Analysis (I&A) published information to federal, state, local, tribal and territorial counterterrorism and law enforcement officials on the potential for COVID-19-related cyber threats and fraud. These threat-monitoring activities ensure the homeland is safe, secure, and resilient from hostile actors who might otherwise attempt to exploit the crisis to harm American lives.

Facilitating the Offload of Cruise Ships. The U.S. Coast Guard is working non-stop to protect the health and safety of Americans inbound to the U.S. while helping slow the spread of COVID-19. Between April 5th and April 10th, USCG facilitated the offload of 100 passengers and 881 crew members from one cruise ship in Florida and helped transfer 7 crew members from a second cruise ship to local hospitals. In Louisiana, the USCG worked with state and local authorities to disembark several healthy crew members after determining they were not infected with COVID-19.

Coronavirus_(COVID-19)_Pandemic_Community-Based_Testing_Sites_Transition

April 10, 2020 at 8:47 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Community-Based Testing Sites.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Community-Based Testing Sites Transition

The Department of Health and Human Services and the FEMA worked with state and local partners to establish Community-Based Testing Sites (CBTS) in CDC-prioritized locations across the country. The CBTS model was developed for states, local public health agencies, healthcare systems, and commercial partners as they work together to stop the spread of coronavirus (COVID-19) in their communities, focusing initially on healthcare facility workers and first responders.

The CBTS model has been a profound success, screening over 84,800 individuals; testing over 77,000 individuals; and having a COVID positive rate of approximately 20% - meaning that the CBTS are testing the right individuals at the right time. Since the onset, we have also led technological advances, such as the validation of nasal self-swabbing, which has minimized the need for trained health professionals and personal protective equipment.

As a result of these advances, many states have indicated that they want to fully transition the CBTS to state control, allowing more flexibility in testing and reporting. Many states have already begun transitioning these programs, and other states have implemented testing sites based on the CBTS model.

Therefore, the federal CBTS Task Force is working with states to clarify whether sites want to continue as they are now, or transition to full state control. Under state control, CBTS sites would still receive technical assistance from the federal government and be able to

request supplies through the normal FEMA systems.

The CBTS Task Force will continue to work closely with the states and FEMA Regions to ensure a successful transition and ensure that each state has the flexibility and autonomy to manage and operate testing sites within the needs of their specific community.

Transition Plan

The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.

Potential advantages of a fully state-managed site include:

- The opportunity for the states to better serve their own communities, while leveraging federal support to augment their state's success.
- The potential to expand patient throughput to >250 per day, use a credentialed provider of their choice, and route patient samples to a lab of their choice.
- The ability to use a locally run call center or the regular state notification processes for public health results.

Responsibilities

The USPHS Commissioned Corps officers onsite (1-3 per location) will work with the site manager to plan for and complete the transition checklist and will verify that the site is ready for transition to the state. Once the sites are transitioned to the states, each state will be responsible for:

- Assuming responsibility for staffing their sites to ensure quality control, safety, biohazard waste management, and security;
- Assuming responsibility for the credentialed provider to order the labs;
- Procuring and managing their own cadre of supplies (e.g., personal protective equipment, test kits, etc.); requests for continued federal support should be made through the normal FEMA process;
- Contracting for lab testing; and
- Managing patient notification process for results, while maintaining patient privacy under the [Health Insurance Portability and Accountability Act of 1996 \(HIPAA\)](#).

After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.

Eligibility for Reimbursement under FEMA's Public Assistance Program

States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share. Costs should be reasonable and necessary to address the public health needs of the event and all costs incurred should be documented. More information on what COVID-19 activities are eligible for reimbursement under the Public Assistance Program can be found in the [COVID-19 Pandemic: Eligible Emergency Protective Measures fact sheet](#) and the [COVID-19 Pandemic: Emergency Medical Care fact sheet](#). Information on how to apply is available in the [COVID-19 Pandemic: Public Assistance Simplified Application fact sheet](#). More information on contracting and procurement can be found in the [Procurement Under Grants: Under Exigent or Emergency Circumstances fact sheet](#).

Joint FEMA-CBP Statement on Export of Critical PPE

April 08, 2020 at 3:28 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the statement below from our partners in the Federal Emergency Management Agency (FEMA) and U.S. Customs and Border Protection (CBP) regarding a statement on the export of critical Personal Protective Equipment (PPE).

April 8, 2020

COVID-19 Update

Joint FEMA-CBP Statement on Export of Critical PPE

On Friday, April 3, President Trump issued “Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use” directing the Department of Homeland Security (DHS), through the Federal Emergency Management Agency (FEMA), in consultation with the U.S. Department of Health and Human Services (HHS), to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. Personal Protective Equipment (PPE) subject to this policy includes: N95 respirators, and a variety of other filtering respirators; air-purifying respirators; surgical masks; and, surgical gloves.

FEMA and U.S. Customs and Border Protection (CBP) are working together to prevent domestic brokers, distributors, and other intermediaries from diverting these critical medical resources overseas. To accomplish this, CBP will detain shipments of the PPE specified in the President’s Memorandum while FEMA determines whether to return the PPE for use within the United States; to purchase the PPE on behalf of the United States; or, allow it to be exported.

Coronavirus_(COVID-19)_Pandemic_Whole-of-America_Response_-_April_13

April 13, 2020 at 3:03 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators

to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.

- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- HHS announced five new contracts for ventilator production rated under the Defense Production Act (DPA), to General Electric, Hill-Rom, Medtronic, ResMed, and Vyaire, as well as two other contracts for ventilator production, to Hamilton and Zoll.
 - In total, combined with contracts with [General Motors](#) and [Philips](#) rated under the DPA issued last week, HHS has finalized contracts to supply 6,190 ventilators for the Strategic National Stockpile by May 8 and 29,510 by June 1.
 - The seven new ventilator contracts announced by HHS this month will provide

a total of 137,431 ventilators by the end of 2020.

- The thousands of ventilators delivered to the Strategic National Stockpile starting this month, continuing through the spring and summer, will provide more capacity to respond to the pandemic as it evolves.
- HHS and FEMA deployment of ventilators from the stockpile have helped ensure that hospitals in states such as New York have not run out of ventilator capacity while working to save lives.
 - The federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right number of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.
- On **April 13**, The Department of Homeland Security and FEMA announced the funding notice for an additional \$100 million in supplemental Emergency Management Performance Grant Program funds.
 - The money is available to all 56 states and territories as part of the Coronavirus Aid, Relief, and Economic Security (CARES) Act. All applications must be submitted on [Grants.gov](https://www.grants.gov) by April 28.
- HHS and FEMA have expanded the items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access diagnostics supplies and reagents for COVID-19 testing free of charge.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs of the need to work with separate, individual suppliers for swabs, reagents and other diagnostic testing supplies.
 - The expanded list of diagnostic supplies will include supplies to support the three components needed for COVID-19 testing: sample kits, extraction kits and test kits.
- FEMA [issued guidance](#) on the framework, policy details and requirements for determining the eligibility for FEMA reimbursement of states purchasing and distributing food to meet the immediate needs of those who do not have access to food as a result of COVID-19 and to protect the public from the spread of the virus.
 - State, local, tribal, and territorial governments with the legal responsibility for protecting life, public health and safety are eligible applicants under emergency and major disaster declarations for the COVID-19 pandemic.
 - Applicants may enter into formal agreements or contracts with private

organizations, including private nonprofit organizations such as food banks, to purchase and distribute food when necessary as an emergency protective measure in response to the pandemic.

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below, and attached fact sheet, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Defense Production Act.

April 14, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Applying the Defense Production Act

The scarcity of medical resources in the fight against COVID-19 is a global issue. The United States is competing for the same resources as many other countries. To maximize the availability of critical protective and lifesaving resources to front line health care workers, FEMA and the Department of Health and Human Services (HHS) are [executing a four-pronged approach](#) to rapidly increase supply today and expand domestic production of medical supplies and equipment to increase supply long-term. The approach includes **Preservation, Acceleration, Expansion and Allocation**.

The Defense Production Act (DPA) provides authorities that are being applied to support *Acceleration* and *Expansion* efforts. Priority rated DPA orders do not create a situation of “outbidding;” rather, it puts the federal government requirement to the “front of the line” for fulfillment ahead of other orders.

As we process orders through the supply chain, we are maintaining close coordination with governors to identify potential bidding conflicts. We look to the Nation’s governors and tribal leaders to make us aware of specific information regarding apparent bidding conflict. If a bidding conflict does arise, we work closely with the state or tribe to resolve it in a way that best serves their needs.

For more information on how the Defense Production Act authorities are helping during the COVID-19 response, please review the attached fact sheet.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Weekly Update: DHS Response to COVID-19

WASHINGTON – The Department of Homeland Security and its dedicated workforce across more than a dozen offices and components are working diligently with the White House to execute an unprecedented, whole-of America response to the COVID-19 pandemic. These strategic and tactical efforts range from coordinating critical air transportation to addressing medical supply shortages to expediting the inspection of vital goods at our borders, ensuring that our national supply chains remain abundant, accessible, and reliable.

“Everything we have done to this point has been unprecedented and everything we do in the coming weeks and months ahead focuses on life-safety and reducing suffering,” said FEMA Administrator Pete Gaynor. “It is absolutely critical that we maintain our response efforts alongside our federal, state, local, tribal, and industry partners to ensure the virus’s spread is contained and human life is preserved.”

Below is a list of some of DHS’s efforts against COVID-19 last week:

Federal Emergency Management Agency (FEMA)

Deploying Federal Funds in Support of State Response Efforts. Federal funds are being deployed to help ensure that health care providers have the critical resources they need to provide rapid care and treatment to COVID-19 patients in hard-hit areas across the U.S. As of April 12th, FEMA has obligated \$5.2 billion in support of state response efforts.

Increasing Availability of Critical Resources. As a part of the Supply Chain Stabilization Task Force, FEMA is executing a whole-of- America approach to address the limited supply of critical and life-saving equipment. As of April 12th, FEMA has coordinated the delivery of the following to areas in greatest need : 38 million N95 respirators, 32.6 million surgical masks, 5.5 million face shields, 4.7 million surgical gowns, 30.3 million gloves, 212,000 coveralls, and 10,448 ventilators.

Expanding Surge Capacity in Highly-Impacted Areas. FEMA is focusing its allocation of resources in highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls.

- On April 6th, FEMA and the U.S. Army Corps of Engineers announced plans to convert three convention centers in Virginia into temporary hospital facilities. The facilities – the Dulles Expo Center in Northern Virginia and the Richmond and Hampton Roads convention centers – will be able to provide beds for 1,107 acute patients or 1,848 non-acute patients. The conversion is expected to be complete within six weeks.
- On April 8th, FEMA and HHS delivered 80,000 nasopharyngeal swabs to various federal Community-Based Testing Sites (CBTS) locations to help surge testing capacity nationwide.
- As of April 12th, FEMA has delivered 8,600 medical beds to surge capacity and care for an increased volume of COVID-19 patients across the U.S.

Coordinating Air Flights to Address Medical Supply Shortages. FEMA is expediting movement of critical supplies including masks, respirators, gloves, goggles and surgical gowns, from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge. As of April 12th, 28 international flights have arrived in the U.S. with critical medical supplies. An additional 28 flights are scheduled over the next three weeks.

Countering Weapons of Mass Destruction (CWMD)

Administering Medical Screenings at Airports. CWMD contract personnel are continuing to support the CDC with enhanced medical screenings for travelers through 13 specially designated airports. As of April 12th, CWMD has processed approximately 271,529 travelers for enhanced screening, including 1,491 who were referred to CDC for further medical evaluation.

CUSTOMS AND BORDER PROTECTION (CBP)

Maintaining Domestic Supply of Critical Medical Equipment. On April 8th, CBP and FEMA announced that the federal government will begin restricting exports of PPE to ensure that critical supplies stay in the country to fight COVID-19.

Securing U.S. Borders. On April 9th, CBP provided an operational update on activities for the month of March. Total Border Patrol encounters have declined 7% total in March from February, and 76% since the height of the crisis last May. In addition, 80% of the people who CBP encountered since the March 21 enactment of Title 42 are being returned to the

country from where they came within two hours.

Cybersecurity and Infrastructure Security Agency (CISA)

Protecting Critical Workers and Infrastructure from Potential Threats. CISA regularly publishes guidance to help individuals, businesses, organizations, and governments protect their essential workers, while also improving their security posture against a myriad of potential threats throughout the COVID-19 pandemic.

- On April 6th, CISA updated its list of essential businesses. To date, 45 states and territories have published Essential Business Designations, 20 of them are referencing this list in their essential business designations, while 14 states or territories have incorporated CISA guidance fully into their own lists.
- On April 8th, CISA and CDC issued new guidelines aimed at getting workers in critical infrastructure who may have been exposed to COVID-19 back to work faster. It also calls on employers to take steps to ensure workplace safety, like sending workers home immediately if they are sick and increasing air exchange in the workplace.

Protecting Against Malicious Cyber Actors. On April 8th, CISA and the United Kingdom's National Cyber Security Centre issued an activity alert titled, COVID-19 Exploited by Malicious Cyber Actors. This joint alert addresses the growing use of COVID-19-related themes by malicious cyber actors to attack individuals, businesses, and organizations with a range of ransomware and malware.

Protecting Networks and Cloud Environment. On April 9th, CISA released interim Trusted Internet Connections (TIC) guidance to aid agencies in securing their network and cloud environments. This guidance supports the current surge in teleworking and use of collaboration tools amongst the federal workforce during the COVID-19 pandemic.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Americans Safe While Ensuring Continuity of U.S. Travel: TSA continues to follow CDC guidance to protect its workers and the nation's transportation system, while ensuring the freedom of movement for people and commerce will not be impeded during the pandemic. Between April 5th and April 12th, TSA has screened more than 729,000 travelers who have all reached their destinations safely.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Immigration and Customs Enforcement, in close coordination with the State Department, continues to bring stranded Americans home on the return leg of removal flights to Central America. Between March 22nd and April 10th, ICE has flown 1,037 individuals back to the U.S. from Columbia, El Salvador, Honduras, and Nicaragua.

& ANALYSIS (I & A)

Keeping the Homeland Safe, Secure and Resilient. On April 8th, DHS Intelligence and Analysis (I&A) published information to federal, state, local, tribal and territorial counterterrorism and law enforcement officials on the potential for COVID-19-related cyber threats and fraud. These threat-monitoring activities ensure the homeland is safe, secure, and resilient from hostile actors who might otherwise attempt to exploit the crisis to harm American lives.

United States Coast Guard (USCG)

Facilitating the Offload of Cruise Ships. The U.S. Coast Guard is working non-stop to protect the health and safety of Americans inbound to the U.S. while helping slow the spread of COVID-19. Between April 5th and April 10th, USCG facilitated the offload of 100 passengers and 881 crew members from one cruise ship in Florida and helped transfer 7 crew members from a second cruise ship to local hospitals. In Louisiana, the USCG worked with state and local authorities to disembark several healthy crew members after determining they were not infected with COVID-19.

Keeping the U.S. Maritime Supply Chain Open and Viable. As of April 12th, USCG is monitoring 38 commercial vessels with crew or passengers that have embarked from a coronavirus port of interest in the last 14 days.

April 8, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resources Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. The briefing points include Topline Messages, as well as information By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - FEMA does not have detailed visibility on PPE amounts until the cargo is

loaded.

- **As of April 7**, 15 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Five flights are scheduled to arrive today, 4 in Chicago and 1 in New York.
 - An additional 52 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
 - Emergency managers and public health officials must continue to report on the following data to FEMA and HHS:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state.
 - This morning, the Department of Health and Human Services [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August 2020, with a production schedule allowing for the delivery of 6,132 ventilators by June 1, 2020.
 - The rating of this contract under the DPA follows President Trump's direction to HHS Secretary Alex Azar to invoke the Defense Production Act with regard to GM's production of ventilators on March 27.
 - By rating contracts under the DPA, HHS is helping manufacturers like GM get the supplies they need to produce ventilators as quickly as possible, while also ensuring that these ventilators are routed through the Strategic National Stockpile to where they're needed most.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge.
- Beginning **April 10**, HHS and FEMA will work with states with federal Community-Based Testing Sites to clarify whether sites want to continue as they are now, or transition to full state control.
 - Under state control, CBTS sites would still receive technical assistance from the federal government and be able to request supplies through the normal FEMA systems.
 - Leadership at both HHS and FEMA will consider approving extension requests by states that need additional federal assistance to manage and operate sites. A formal notice to continue must be submitted to the CBTS Task Force Leader,

- by either the state's Governor or his or her representative, no later than April 9.
 - The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.
 - After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.
 - States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share.
 - To date, Community Based Testing Sites have screened over 85,000 individuals.
- On **April 8**, HHS [announced the first contract for ventilator production rated under the Defense Production Act](#), to General Motors. A second contract was awarded to Philips on the same day for ventilator production.
 - The Philips contract was for \$646.7 million for the delivery of 2,500 ventilators to the Strategic National Stockpile by the end of May 2020 and a total of 43,000 ventilators to be delivered by the end of December 2020.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- On **April 8**, HHS, through the Health Resources and Services Administration awarded more than \$1.3 billion to 1,387 health centers. These centers will help communities across the country detect coronavirus; prevent, diagnose, and treat COVID-19; and maintain or increase health capacity and staffing levels to address this public health emergency.

- On April 3, President Trump issued “[Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use](#)” directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.

April 13, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

In support of the coronavirus (COVID-19) pandemic response, FEMA provides the following: FEMA Project Airbridge video Advisory; Personal Protective Equipment (PPE) Preservation Best Practices Advisory and Fact Sheet, and a Resource Requests from the International Reagent Resource (IRR) Advisory and Fact Sheet.

FEMA Project Airbridge

To efficiently maintain the country's existing medical supply chain infrastructure, FEMA augments the existing supply chain through a variety of strategies, to include FEMA Project Airbridge.

FEMA created Project Airbridge to reduce the amount of time it takes for U.S. medical supply distributors to get commercially sourced and procured Personal Protective Equipment and other critical supplies into the country for their respective customers. FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.

FEMA provides distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future. As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. The HHS and FEMA determine hotspot areas based on CDC

data.

A brief video on Project Airbridge is available on [FEMA's Media Gallery Website](#) and on all FEMA social media accounts.

Project Airbridge Advisory: Attachment [1]

Personal Protective Equipment Preservation Best Practices

This Personal Protective Equipment Preservation Best Practices Fact Sheet (attached) summarizes best practices for national implementation to sustain personal protective equipment (PPE) while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response.

The objective of the *COVID-19 National Strategy for Addressing PPE Shortage* is to ensure protection against COVID-19 for healthcare workers, first responders, and patients by implementing three pillars of practice: **reduce**, **reuse**, and **repurpose**. Due to the COVID-19 pandemic response and associated PPE shortages, implementation of contingency and crisis capacity plans may be necessary to ensure continued availability of protective gear.

This fact sheet amplifies the Centers for Disease Control and Prevention (CDC) strategies on conventional, contingency and crisis capacity strategies for optimizing PPE. All U.S. healthcare facilities should begin using PPE contingency strategies now and may need to consider crisis capacity strategies if experiencing PPE shortages.

Preserving Personal Protective Equipment Best Practices Advisory: Attachment [2]

Preserving Personal Protective Equipment Best Practices Fact Sheet: Attachment [3]

Resource Requests from the International Reagent Resource

The International Reagent Resource (IRR), established by the Centers for Disease Control and Prevention (CDC), acquires, authenticates, and produces reagents that scientists need to carry out basic research and develop improved diagnostic tests, vaccines, and detection methods.

The (IRR) Fact Sheet (attached) outlines a simplified process for states and territories to make resource requests from the IRR. Consolidating testing supplies under the IRR alleviates burden on public health labs, which increases efficiency and reduces need to work with separate, individual suppliers for swabs, reagents, and other diagnostic testing supplies.

International Reagent Resource Advisory: Attachment [4]

International Reagent Resource Fact Sheet: Attachment [5]

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

WEEKLY UPDATE: DHS RESPONSE TO COVID-19

WASHINGTON - The Department of Homeland Security's efforts across its components last week have facilitated a speedy, whole-of-government response to confronting COVID-19 and slowing the spread to keep Americans safe. FEMA is leading the way by carrying out an approach that is locally executed, state managed, and federally supported.

"Protecting both the health and national security of the American people continues to be the top priority for the Department of Homeland Security," said Acting Secretary Chad F. Wolf. "I want to thank the men and women of the DHS workforce for their resilience as they put themselves at risk every day to protect the American people."

Below is a list of some of DHS's efforts against COVID-19 last week:

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)

Total Obligations to States. As of April 5th, FEMA has obligated nearly \$4.1 billion in support of COVID-19 response efforts.

Project Air-Bridge. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. This historic partnership with the private sector is named Project Air-Bridge:

- From March 30th to April 5th, 10 flights arrived to the U.S with critical supplies.
- The cargo moved so far totals almost 83.5 million gloves, almost 5 million surgical masks, and 1.2 million gowns.
- Upon arrival, the PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization is given to hospitals, health care facilities, and nursing homes around the country.
- 23 additional flights are currently scheduled through April 18.

Ventilator Distribution. FEMA is distributing ventilators to hard hit states. From March 30th to April 4th, FEMA and HHS delivered ventilators from the Strategic National Stockpile to Michigan, New Jersey, Illinois, Connecticut, and Louisiana.

CUSTOMS AND BORDER PROTECTION (CBP)

Keeping Critical Cargo and Trade Moving. CBP continues to process commercial cargo. Approximately \$21B worth of goods crossed back and forth over the borders of U.S, Mexico, and Canada from March 30th to April 5th .

Working to Reduce Illegal Entries. CBP agents encountered nearly 4,200 migrants crossing illegally at the U.S. Southern border daily, compared to nearly 10,000 encounters daily prior to the current containment efforts.

Facilitating Critical PPE Deliveries. CBP lifted a Withhold Release Order that had barred importation of disposable rubber gloves which our health care workers and law enforcement personnel so desperately need right now.

IMMIGRATION AND CUSTOMS ENFORCEMENT (ICE)

Bringing Americans Home. Working with the Department of State, ICE continues to bring Americans home on the return leg of removal flights to Central America. As of April 5th, ICE has flown 853 U.S. citizens and legal permanent residents home on removal flights from Colombia, El Salvador, Honduras, and Nicaragua since the first flight on March 22.

TRANSPORTATION SECURITY ADMINISTRATION (TSA)

Keeping Air Travelers Secure. Due to the pandemic and travel restrictions, TSA continues to screen a significantly reduced number of passengers. From March 27th to April 2nd, TSA successfully screened 1,124,145 travelers ensuring individuals reached their destinations safely.

CYBERSECURITY AND INFRASTRUCTURE SECURITY AGENCY (CISA)

Essential Critical Infrastructure Workers. CISA recently updated its list of essential critical infrastructure workers. As of April 5th, 20 states and territories have published Essential Business Designations.

Election Security Work Continues. CISA coordinated calls between the election community and the United States Postal Service (USPS) and Centers for Disease Control (CDC) to ensure that election officials have the most up to date information and advice from the experts at these agencies regarding COVID-19.

Helping the Private Sector Assess Risk. CISA released a guide titled Risk Management for Novel Coronavirus to assist executives in thinking through physical, supply chain, and cybersecurity issues that may arise from the spread of COVID-19.

UNITED STATES COAST GUARD (USCG)

Facilitating the Offload of Cruise Ships. On April 2nd, the Coast Guard facilitated the offload of more than 1,200 passengers from cruise ships Zaandam and Rotterdam in Port Everglade, FL after it was reported that crewmembers and passengers were infected with COVID-19.

U.S. CITIZENSHIP AND IMMIGRATION SERVICES (USCIS)

Making Extensions for Employment Authorization Easier. On March 30th , U.S. Citizenship and Immigration Services announced that it will reuse previously submitted biometrics

in order to process valid Form I-765, Application for Employment Authorization, extension requests due to the temporary closure of Application Support Centers (ASC) to the public.

Target Date to Reopen Offices. On April 1st, USCIS announced offices temporarily suspended will begin to reopen on May 4th unless the public closures are extended further to help slow the spread of COVID-19.

COUNTERING WEAPONS OF MASS DESTRUCTION (CWMD)

Medical Screening at Airports. CWMD contract personnel are continuing to support CDC with enhanced screening at 13 airports. From March 29th to April 5th, CBP referred 7,565 travelers to CWMD for enhanced screening. As of April 5th, over 265,647 travelers have been referred to CWMD for screening.

SCIENCE AND TECHNOLOGY (S&T)

Coronavirus Research. S&T's National Biodefense Analysis and Countermeasures Center (NBACC) continued researching the impact of environmental conditions, such as temperature and humidity, to determine the virus's survivability in the air, in respiratory fluids, and on various types of surfaces. Additional research includes decontamination methods to determine the most effective materials to clean and disinfect surfaces to rid them of the virus.

Consolidating COVID-19 Data for Government Officials. On April 1st, the NBACC updated the Master Question List (MQL), a compilation of available research and information on operationally-relevant questions.

CISA_releases_Version_2.0_of_the_Essential_Critical_Infrastructure_Worker_Guidance_originally_published_on_March_19,_2020

March 28, 2020 at 6:01 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding an update to the Essential Critical Infrastructure Worker Guidance, found [here](#).

March 28, 2020

CISA Advisory

CISA releases Version 2.0 of the Essential Critical Infrastructure Worker Guidance originally published on March 19, 2020

As the Nation comes together to slow the spread of COVID-19, on March 16th the President issued updated Coronavirus Guidance for America that highlighted the importance of the critical infrastructure workforce.

The Cybersecurity and Infrastructure Security Agency (CISA) executes the Secretary of Homeland Security's authorities to secure critical infrastructure. Consistent with these authorities, CISA has developed, in collaboration with other federal agencies, State and local governments, and the private sector, an "Essential Critical Infrastructure Workforce" advisory list. This list is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. Decisions informed by this list should also take into consideration additional public health considerations based on the specific COVID-19-related concerns of particular jurisdictions.

This list is advisory in nature. It is not, nor should it be considered, a federal directive or standard. Additionally, this advisory list is not intended to be the exclusive list of critical infrastructure sectors, workers, and functions that should continue during the COVID-19 response across all jurisdictions.

Individual jurisdictions should add or subtract essential workforce categories based on their own requirements and discretion.

The advisory list identifies workers who conduct a range of operations and services that are typically essential to continued critical infrastructure viability, including staffing operations centers, maintaining and repairing critical infrastructure, operating call centers, working construction, and performing operational functions, among others. It also includes workers who support crucial supply chains and enable functions for critical infrastructure. The industries they support represent, but are not limited to, medical and healthcare, telecommunications, information technology systems, defense, food and agriculture, transportation and logistics, energy, water and wastewater, law enforcement, and public works.

State, local, tribal, and territorial governments are responsible for implementing and executing response activities, including decisions about access and reentry, in their communities, while the Federal Government is in a supporting role. Officials should use their own judgment in issuing implementation directives and guidance. Similarly, while adhering to relevant public health guidance, critical infrastructure owners and operators are expected to use their own judgement on issues of the prioritization of business processes and workforce allocation to best ensure continuity of the essential goods and services they support. All decisions should appropriately balance public safety, the health and safety of the workforce, and the continued delivery of essential critical infrastructure services and functions. While this advisory list is meant to help public officials and employers identify essential work functions, it allows for the reality that some workers engaged in activity determined to be essential may be unable to perform those functions because of health-related concerns.

CISA will continue to work with our partners in the critical infrastructure community to update this advisory list if necessary as the Nation's response to COVID-19 evolves. You can find the attached guidance as well as other COVID related information at cisa.gov.

Should you have questions about this list, please contact CISA at CISA.CAT@cisa.dhs.gov.

Strategies_for_Addressing_Personal_Protective_Equipment_(PPE)_Shortage

April 14, 2020 at 9:16 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding strategies for addressing Personal Protective Equipment (PPE) shortages.

April 14, 2020

CISA Advisory

Strategies for Addressing Personal Protective Equipment (PPE) Shortage

The U.S. government's strategy for addressing COVID-19 personal protective equipment (PPE) shortages relies on three pillars of practice to ensure continued availability of protective gear: reduce – reuse – repurpose. In this time of the COVID-19 pandemic and the associated PPE shortages, implementation of contingency plans across all sectors are necessary to ensure continued availability of protective gear. In support of this strategy, the U.S. government has recently released two documents that will be of assistance to all infrastructure sectors.

FEMA has published the attached *COVID-19 Pandemic: Personal Protective Equipment Preservation Best Practices*. This document summarizes government guidance and best practices currently being implemented across the United States for COVID-19 response has been released. While tailored to the Healthcare Sector, many of these strategies can be applied to other sectors with similar PPE requirements.

NIOSH has recently issued [*Interim Guidance for Conserving and Extending Filtering Facepiece Respirator Supply in Non-Healthcare Sectors*](#). That document offers strategies to conserve, extend, and respond to shortages in the supply of NIOSH-approved filtering facepiece respirators (FFRs) used in non-healthcare worksites such as manufacturing and construction. Employers should implement alternative controls to reduce, as much as possible, their reliance on PPE, particularly FFRs.

Please continue to refer to CDC for updates to posted guidance for businesses and employers to plan and respond to COVID-19: <https://www.cdc.gov/coronavirus/2019->

[ncov/guidance-business-response.html](https://www.fda.gov/ncov/guidance-business-response.html). For general and other useful information regarding COVID-19, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>. Information on FEMA's efforts to stabilize the PPE supply chain can be found at: <https://www.fema.gov/news-release/2020/04/08/fema-covid-19-supply-chain-task-force-supply-chain-stabilization>.

Respectfully,
Cybersecurity and Infrastructure Security Agency

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 26, 2020

FEMA Advisory

COVID-19 Federal Response Efforts Continue

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

Sixteen states and 4 tribes have issued full stay-at-home orders; in addition to eight states that have issued partial or localized orders, and one state that has issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to

support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Iowa, Louisiana, New York, North Carolina, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

Medical supplies are en route to these states, including respirators, surgical masks and gowns, face shields, coveralls and gloves. Many supplies have already arrived and additional supplies are en route to these designated areas. The U.S. Navy hospital ship Mercy is en route and expected to be operational by April 1 to support Los Angeles with additional hospital beds and medical staff. The U.S. Navy hospital ship Comfort is expected to be operational by April 4 to support New York City. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 26, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 25**, FEMA announced that more than \$5.1 million dollars in crisis counseling service grants have been made available to five states.
 - The grants, made to Massachusetts, Michigan, New Jersey, New York and Washington, will support programs providing free, confidential counseling to assist individuals through community-based outreach and educational services.
 - Due to the COVID-19 nationwide emergency and the need to protect the safety and health of all Americans, the crisis counseling will be delivered by phone,

internet and the media (including social media).

- As of **April 25**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.7 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.7 million surgical gowns, 793.8 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing resources to reopen safely and responsibly.
- As of April 18, FEMA, HHS, and the private sector combined have coordinated the

delivery of or are currently shipping: 55.8 million N95 respirators, 77.1 million surgical masks, 6.1 million face shields, 11.4 million surgical gowns, 564 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On April 17, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- The U.S. Department of Agriculture announced the [Coronavirus Food Assistance Program \(CFAP\)](#), an immediate relief program that provides \$19 billion in support to farmers and ranchers, maintains the integrity of our food supply chain and ensures access to food for those in need.
 - Direct support to farmers and ranchers provides \$16 billion based on actual losses for agricultural producers.
 - USDA will partner with regional and local distributors to purchase \$3 billion in fresh produce, dairy and meat products. The distributors and wholesalers will provide these items to food banks, community and faith-based organizations and other non-profits serving people in need.

Fw: From NBC News National- Seeking Updated Numbers

April 14, 2020 at 12:18 PM EDT

To: Fehrenbach, Lacy M (DOH)

Cc: Davis, Jerrod (DOH), Bayne, David M (DOH), Lofy, Kathy H (DOH), Smith, Jaime (GOV), Davidson, Lisa

Lacy,

I looked at this email and it seemed that there are some opportunities for greater coordination. I feel like I can be helpful making sure that some of these pieces are connected with the other organizations with whom we're working and making sure that there is some visibility on these sorts of things within the statewide response organization.

Let me know if this would be helpful,

Nate

Nathan Weed
Unified Commander
WA COVID-19 Response

Subject: RE: From NBC News National- Seeking Updated Numbers

Appreciate this, Jerrod, thank you. As conversations continue on this, it's incredibly helpful for comms to, at a minimum, have SA around this because we get asked so many complex questions on this issue. And I ask that comms be included in the "LCTF team" so we can be part of discussion about what and how data or info is shared publicly. Chris Wright from DSHS is our JIC PIO on this issue, and/or Kris or myself can engage.

Subject: RE: From NBC News National- Seeking Updated Numbers

Jamie,

I'm off today, but I'm totally willing to chat. I left you a voice mail last night after receiving this e-mail. The slide deck from last night's call is attached. The meeting was to discuss the overall LTCF strategy and to hear from Rocky that we are on the right track.

Kathy is asking and I agree that our LTCF team needs to determine what numbers we report publically. The numbers that we are starting to talk about include: As of April 10th, there are 620 cases of COVID-19 associated with 169 LTC settings. These settings include nursing facilities, assisted living facilities, adult family homes, and supported living programs with developmentally disabled residents. As far as deaths from LTCFs go, I have heard percentages thrown around (as much as 50%?) but I haven't seen anything official.

I hope that helps. Jerrod

Subject: RE: From NBC News National- Seeking Updated Numbers

I'm looping in other folks working on our response to LTCFs.

Lisa is asking about public reporting of LTCF outbreaks, deaths and numbers of cases. The media is very interested in this issue. Jerrod, can you build a public reporting section into your plan for discussion at 5:15pm?

I would suggest that we limit state data reporting to the number of facilities that have had at least one confirmed case. Technically, we probably cannot withhold the names of facilities but I think we need to push back on the media because public reporting of facility names could discourage facilities from testing which could drastically interfere with our ability to save lives. Public reporting the names of facilities also creates a need for the facility to manage the media which can distract from their efforts to control the spread of COVID and save lives. We should absolutely encourage every facility with a case to communicate with the families of their residents if they have a case.

I know others may not agree with me so it would be worth discussing at 5:15pm.

Subject: Fwd: From NBC News National- Seeking Updated Numbers

Hey Kathy, (Kristen Maki cc'd for awareness)

As we begin to field more requests about LTCF, I'm wondering how we collate the data that we agree to share, and when we need to communicate our reporting plans.

Your suggestion on Friday about providing a list of confirmed facilities with a case/death may be something we want to pursue.

If so, what are the next steps, so that we can a) start this work and b) communicate about it.

Thank you,

Subject: From NBC News National- Seeking Updated Numbers

Dear State Health officials,

NBC News national is following up on [HYPERLINK](#)
["https://www.nbcnews.com/news/us-news/more-2-200-coronavirus-deaths-nursing-homes-federal-government-isn-n1181026"](https://www.nbcnews.com/news/us-news/more-2-200-coronavirus-deaths-nursing-homes-federal-government-isn-n1181026) our story from Friday where we summarized:

- 1) the number of long-term care facilities that have coronavirus cases in your state and
- 2) the number of deaths associated with those long-term care facilities from those outbreaks.

We are now asking if you have updated data for April 13, 2020. Our deadline is 5pm, EST.

Please feel free to contact me at the number below or respond to this email with any questions.

you very much,

Sincerely,

Laura Strickler & Suzy Khimm

Federal_Partners_Bring_Additional_Resources_to_US_for_COVID-19_Response

March 29, 2020 at 12:53 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 29, 2020

FEMA Advisory

Federal Partners Bring Additional Resources to US for COVID-19 Response

“We are marshalling the full power of the American Nation – economic, scientific, medical, and military – to vanquish the virus.” – President Trump

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance themselves from other people. For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal

reimbursement, by FEMA for the states of California, New York and Washington, for states' use of their National Guard forces. On March 28, President Trump approved requests from Florida, Guam, Louisiana, Massachusetts, Maryland, New Jersey and Puerto Rico. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32, enabling these States to use the additional resources to meet the missions necessary in the COVID-19 response.

As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the United States. Movement of supplies began on Saturday, March 28. The first flight will arrive today, March 29, with 80 tons of personal protection equipment (PPE) supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 30 million gloves and thousands of thermometers for New York, New Jersey and Connecticut.

Twenty-four states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), Strategic National Stockpile, Ventilator Guidance, Defense Production Act, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_6

April 06, 2020 at 4:41 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 6, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; Hydroxychloroquine/Chloroquine; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The latest updates and information on how to protect yourself and what to do if you think you are sick are available at www.coronavirus.gov.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S. through Project Air Bridge. FEMA is scheduling flights daily but does not have detailed visibility on the amount of PPE until the cargo is loaded.
 - Since March 29, flights have landed in New York, Chicago, Miami, Los Angeles, and Columbus, Ohio. On April 5, four additional flights landed in Chicago, Los Angeles, Columbus, Ohio and Louisville, Kentucky.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks.
 - Overseas flights are arriving at operational hub airports for distribution to hotspots and locations across the country through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
- To efficiently maintain the country's existing medical supply chain infrastructure, FEMA is supplementing – not supplanting – the supply chain through a variety of strategies, including Project Airbridge.
 - The air bridge was created to shorten the amount of time it takes for U.S. medical supply distributors to get personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA is doing this by covering the cost to fly supplies into the U.S. from overseas factories, cutting the amount of time it takes to ship supplies from weeks to days.
 - As part of the current agreement with distributors, 50 percent of the supplies on each plane are directed by the distributors to customers within hotspot areas with the most critical needs for those supplies. These areas are determined by HHS and FEMA based on CDC data.
 - The remaining 50 percent is fed into that distributors' normal supply chain and onto their customers in other areas across the U.S.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots. These funds will be used to support areas hard-pressed by COVID-19 in their work to respond effectively to the worsening situation in their jurisdictions.
- The FDA issued an [Emergency Use Authorization of hydroxychloroquine sulfate](#) and an [Emergency Use Authorization of chloroquine phosphate](#) to treat certain patients hospitalized with COVID-19.
 - Hydroxychloroquine sulfate and chloroquine phosphate are oral prescription drugs approved to treat malaria and other diseases but both drugs have shown activity in laboratory studies against coronaviruses, including SARS-CoV-2 (the virus that causes COVID-19) and anecdotal reports suggest that these drugs may offer some benefit in the treatment of hospitalized COVID-19

- patients.
 - The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 8,644 total ventilators available, which includes 8,044 in the Strategic National Stockpile and 600 available from the Department of Defense.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (850), New York (4,400), and Washington (500).
 - 140 ventilators that had previously been delivered to Oregon were donated to New York by Gov. Kate Brown.
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; a 50-bed Federal Medical Station for the Metro D.C. area; 30 ventilators for Guam; and 300 additional ventilators to New Jersey.
- Forty states, four territories and 23 tribes have issued stay at home orders.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- Data and information-sharing **are critical** for moving forward in this response and equipping areas expected to be the next medical hot spots.
 - Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage allocation of federal ventilator resources to ensure the right amount of ventilators are shipped to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators

to FEMA/HHS, providing detailed data on total medical/ hospital beds; total acute care (ICU) beds; normal occupancy; predicted surge occupancy; and number of ventilators available in the state.

- States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
- Hospital administrators across the country are being asked to provide daily reports on testing, capacity, supplies, utilization, and patient flows to facilitate the ongoing public health response.

CISA_and_NCSC_Joint_Activity_Alert_-_COV ID-19_Exploited_by_Malicious_Cyber_Actors

April 08, 2020 at 11:29 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Cybersecurity and Infrastructure Security Agency (CISA) regarding a joint activity alert on COVID-19 exploitations by malicious cyber actors, found [here](#).

April 8 2020

CISA Alert

CISA and NCSC Joint Activity Alert - COVID-19 Exploited by Malicious Cyber Actors

Partners,

As the nation and the world continues to fight against this newest coronavirus, COVID-19 — the Cybersecurity and Infrastructure Security Agency (CISA) continues to monitor how the crisis is affecting the American public on the cybersecurity and infrastructure security front.

Today, CISA and United Kingdom's National Cyber Security Centre issued an activity alert titled, *COVID-19 Exploited by Malicious Cyber Actors*. This joint alert seeks to address the growing use of COVID-19-related themes by malicious cyber actors and it can be found here: <https://www.us-cert.gov/ncas/alerts/aa20-099a>.

CISA and NCSC see the surge of reporting about malicious cyber activity using COVID-19 to prey on people's goodwill, curiosity and concern, and exploit organizations that establish remote work options. Specifically, this alert discusses the exploitation of virtual private networks, phishing email and text messages about COVID-19, and websites deceptively advertised as COVID 19 sites.

We are sharing this information to help you and your team effectively assess your cybersecurity posture and ensure appropriate mitigation is in place. The alert provides many

resources to help detect and prevent COVID-19 malicious activity on your networks. Industry partners played a key role in helping CISA and NCSC teams determine which IOCs to include in this alert and they continue to be integral to CISA's mission as the nation's risk advisor.

We encourage you to share this alert with anyone who might be able to use it. We will continue to keep you updated as more information becomes available.

For authoritative information and resources on COVID-19 -- including situation reports, guidance, and more, visit the CDC's website and [CISA.gov/coronavirus](https://www.cisa.gov/coronavirus).

Thank you,
CISA

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the President's Executive Order on Duties and Fees Deferment for Certain Importers

"I applaud the President for signing this [Executive Order](#), which gives the Administration the ability to help the trade community and U.S. businesses who keep critical supply chains for U.S. manufacturers moving during this unprecedented time. As we all know, the COVID-19 pandemic response has created serious economic issues for many American businesses. This President and this Department have, and always will, put the American worker first.

This EO will give the Administration the flexibility to allow importers who have faced a significant financial hardship during the COVID-19 response to defer the payment of certain duties, taxes, and fees for 90 days. This payment flexibility will be available only for importers with a significant financial hardship. Duties and fees associated with antidumping and countervailing duties (AD/CVD), and Section 201, 232 and 301. Trade Remedies are not included in this relief effort."

FEMA_Advisory:_COVID-19_Best_Practices

April 19, 2020 at 4:11 PM EDT

To: jaime.smith@gov.wa.gov

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 19, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Best Practices

FEMA and the U.S. Department of Health and Human Services (HHS) are collecting and sharing best practices and lessons learned from the whole-of-America response to the coronavirus (COVID-19) pandemic. The best practices are intended to help medical practitioners, emergency managers, and other critical stakeholders learn from each other's approaches and apply solutions to current response and recovery operations.

The [FEMA Coronavirus Emergency Management Best Practices](#) page provides a one-stop shop to explore best practices and lessons learned across all levels of government, private sector, academic institutions, professional associations, and other organizations. HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

Best practices are organized around five themes:

- *Helping People*, which includes best practices on topics such as crisis counseling resources and anticipating and attending to civil rights;
- *Government Operations* best practices such as public information and continuity of operations considerations;
- *Private Sector and Infrastructure*, which includes best practices for commercial trucking and food stores;
- *Recovery Planning and Implementation*, to include the newly released FEMA Disaster Financial Management Guide and economic recovery considerations; and
- *Medical Supplies and Equipment*, including best practices for the preservation of personal protective equipment while ensuring workers are protected.

Please visit www.coronavirus.gov for current health-related guidance and information on COVID-19.

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 7, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services (HHS) Response; FEMA Response Capacity; Strategic National Stockpile; CDC Public Guidance; CDC Respirator Guidance; Hydroxychloroquine/ Chloroquine; FDA Ventilator Guidance; National Guard Activation (Title 32); Community-Based Testing Sites; Defense Production Act; and Other Federal Response.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On **March 31**, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people are critical in the campaign to slow the virus' spread and keep high-risk populations safe.
 - For updates and information on how to protect yourself, visit www.coronavirus.gov.

- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - The air bridge was created to reduce the time it takes for U.S. medical supply distributors to receive personal protective equipment and other critical supplies into the country for their respective customers.
 - FEMA covers the cost to fly supplies into the U.S. from overseas factories, reducing shipment time from weeks to days.
 - While FEMA schedules daily flights, it does not have detailed visibility on PPE amounts until the cargo is loaded.
 - **As of April 6**, 13 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Seven flights are scheduled to arrive today, 6 in Chicago and 1 in Los Angeles. This is the greatest number of air bridge flights in a single day since the start of the program.
 - An additional 72 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not mean supplies will be distributed in the operational hub locations.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- HHS is releasing \$160 million dollars in additional CDC funding to dozens of regional hotspots for effective response to the worsening situation in their jurisdictions.
- The Strategic National Stockpile has begun shipping doses of hydroxychloroquine to New York and Los Angeles County based on their requests.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to manage the immediate crisis.
 - The federal government has 8,644 total ventilators available: 8,044 in the Strategic National Stockpile; 600 from the Department of Defense.
- As of **April 6**, FEMA and HHS have provided or are currently shipping, 8,920 ventilators from the Strategic National Stockpile (SNS) and the Defense Department to: Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Guam (30), Illinois (600), Louisiana (350), Maryland (120), Massachusetts (100), Michigan (700), New Jersey (1,350), New York (4,400), Oregon (140), and Washington (500).
 - Governor Brown of Oregon sent the state's 140 ventilators directly to New York.
 - Governor Inslee of Washington is returning 400 of the state's 500 ventilators to

- the SNS to be deployed to areas of greatest need.
 - Governor Newsom of California is sending 500 state-owned ventilators to medical hotspots across the country through Emergency Management Assistance Compacts (EMAC).
 - Additional allocations in process include a 250-bed Federal Medical Station and a Public Health strike team for Michigan; and a 250-bed Federal Medical Station for the Metro D.C. area.
- Forty states, four territories and 24 tribes have issued stay-at-home orders.

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

March 30, 2020 at 1:00 PM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 30, 2020

FEMA Advisory

FEMA Facilitates Massive Supply Movement to the US and COVID-Affected Areas

“This response isn’t just about delivering food or supporting COVID test centers. It’s about protecting our children, parents, and grandparents. Our Nation is looking to the National Guard to help them and we can’t let them down.” – Air Force Gen. Joseph Lengyel, Chief of the National Guard Bureau

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority. Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 29, the president extended the nation’s [Slow the Spread](#) campaign until April 30. The American people play a key role in the campaign to help slow the virus’ spread and keep our most high-risk populations safe. The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people. The latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.

On March 27, President Trump signed the CARES Act into law. The CARES Act allocates

\$2 trillion to COVID-19 response efforts.

On March 22, President Trump directed the Secretary of Defense to permit full Federal reimbursement, by FEMA, for some states' use of their National Guard forces. The President's action provides Governors continued command of their National Guard forces, while being federally funded under Title 32.

FEMA coordinated an air bridge for flights from Asia beginning on Sunday, March 29, with the first delivery of 80 tons of much needed PPE supplies including 130,000 N95 respirators, 1.8 million face masks and gowns, 10.3 million gloves and thousands of thermometers for New York, New Jersey and Connecticut. Additional flights are contracted to go to Illinois today and to Ohio tomorrow. FEMA has scheduled additional flights and is adding more daily.

Over the next 48 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (180) and Connecticut (50).

Twenty-seven states and 12 tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, federal funding of the National Guard, Community Based Testing Sites (CBTS), the Strategic National Stockpile, Ventilator Guidance, CDC Respirator Guidance, Defense Production Act, CDC Public Guidance, coping with stress, disinformation and rumor control, and How to Help for volunteers and the private sector.

Coronavirus_(COVID-19)_Pandemic_-_Ventilator_Request

April 01, 2020 at 9:05 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding the ventilator request process in effect for COVID-19 response.

For more information from FEMA, please visit: [FEMA.gov/Coronavirus](https://www.fema.gov/Coronavirus)

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic - Ventilator Request

Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted the process below to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis. In the case of ventilators, immediate is defined as requirements necessary to sustain life within a 72-hour window.

To submit a request, states and tribes will work through their FEMA/ HHS regional leadership. In order for a request to be processed, the state/tribe must provide detailed responses to the following five questions:

1. How many usable ventilators, ICU beds, and convertible ventilators are currently available within the state or tribe?
2. What is the current hospital bed and ICU bed occupancy rate in the state/tribe?
3. How many new ICU beds does the state/tribe estimate it can stand-up **and** the number of ventilators, or FDA-approved [ventilator alternatives](#), it can or is standing up?
4. What is the decompression ability of hospitals in the state/tribe (i.e.: are there currently field hospitals or alternate care facilities established)?
5. How many anesthesia machines are in the state/tribe **and** have they been converted?

Once the requesting state or tribe provides the FEMA/ HHS Region with the answers to these five questions, then the requirement is validated at the Regional level and forwarded to FEMA's National Response Coordination Center (NRCC) for processing.

At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.

In addition to submitting requests through this process, state, and tribal officials are encouraged to share the FDA's [Emergency Use Authorization \(EUA\) for Ventilators](#) issued on March 24. The EUA allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The EUA also provides guidance to assist health care personnel on use of other ventilators like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 4, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement

- actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- As of April 3, FEMA and HHS have delivered ventilators from the Strategic National

Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).

- Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
- On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
- Forty states, four territories and 12 tribes have issued stay at home orders.

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 22**, HHS launched [Telehealth.hhs.gov](#). The site is a central source of information on telehealth resources and tools for patients and providers.
 - In his blog post "[Health Providers: Join the Telehealth Revolution](#)," the Surgeon General of the United States, Vice Admiral Jerome M. Adams M.D.,

- M.P.H., outlines the benefits of using telemedicine tools.
- Working from the safety of home, these tools allow clinicians to perform virtual visits, refill and adjust essential medications, and modify treatments that will preserve and improve conditions that if left untreated, put patients at risk.
- As of **April 23**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 105 million surgical masks, 6.7 million face shields, 14.9 million surgical gowns, 747 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - The U.S. has now processed 4.9 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

DHS_Announces_\$10_Million_in_FY20_Funding_Availability_for
_Targeted_Violence_and_Terrorism_Prevention_Grant_Programs

April 21, 2020 at 9:47 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

**DHS Makes \$10 Million in Funding Available for
Targeted Violence and Terrorism Prevention Grants**

WASHINGTON – The Department of Homeland Security (DHS) is making \$10 million available to help local communities more effectively combat terrorism and targeted violence across the United States. The \$10 million appropriated by Congress under the Fiscal Year 2020 Targeted Violence and Terrorism Prevention (TVTP) Grant Program will support the development of a nationwide terrorism and targeted violence prevention framework. DHS strongly encourages all eligible entities to apply for this funding opportunity to build capabilities in their communities and online.

“Attacks by domestic terrorists, those inspired by foreign terrorist organizations, and acts committed by violent individuals with no clear ideological motivation have occurred in communities across America with tragic outcomes,” said Acting Secretary of Homeland Security Chad F. Wolf. “These grants will improve local communities’ ability to prevent individuals from mobilizing or radicalizing to violence and create locally-based prevention frameworks to address these emerging threats.”

The TVTP Grant Program helps DHS to fulfill its commitment to addressing the threat posed by terrorism and targeted violence at home and builds on the promising practices identified in previous grant programs. It is the only federal grant program dedicated to enhancing prevention capabilities in local communities. In its first year, the TVTP Grant Program has three priorities: (1) establishing and enhancing local prevention frameworks with an emphasis on threat assessment and management capabilities; (2) preventing domestic terrorism; and (3) finding innovative solutions for preventing targeted violence and terrorism.

“I want to thank Congress for funding for this mission in a bipartisan way over the last few years, most recently and most significantly, in the Fiscal Year 2020 Appropriations Act. We look forward to working with Congress to continue to advance this effort.” Wolf continued.

Eligible activities under the TVTP Grant Program cover all aspects of prevention, including building resilience, intervention, recidivism prevention, and reintegration programs at the local level. The program directly supports the objectives of the [DHS Strategic Framework for Countering Terrorism and Targeted Violence](#), which DHS released in September 2019. Making these funds available for local prevention partners is a key milestone in the implementation of the Strategic Framework.

TVTP Grant Program funds will support the development of local prevention capabilities at a time when DHS is observing an uptick in online efforts for terrorism recruitment and

radicalization from a variety of sectors. DHS is committed to expanding the program and the President has requested an additional \$20 million for TVTP grant funds next fiscal year.

The application period will close on May 29, 2020. Applicants should consult the [Notice of Funding Opportunity](#) for more specific information about the process. Applying for this grant is a multi-step process and it is recommended that applicants begin that process early in order to allow sufficient time to complete the interim steps.

For more information, please see the TVTP Grant Program site at <https://www.dhs.gov/tvtpgrants>.

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 20**, President Trump launched the Dynamic Ventilator Reserve Program, an innovative public-private partnership to access up to 65,000 additional ventilators in hospitals across the country that can be redeployed when not in use.
- As of **April 20**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 57.4 million N95 respirators, 85.3 million

surgical masks, 6.4 million face shields, 12.3 million surgical gowns, 638 million gloves, 10,998 ventilators and 8,450 federal medical station beds.

- FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing the medical equipment and supplies that have been distributed to each state from FEMA from April 1 – 14 through Project Airbridge and the commercial supply network.
- The U.S. has now processed 4.3 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- During the **April 24** White House Press Briefing, Food and Drug Administration (FDA) Commissioner Dr. Stephen Hahn announced that the FDA had [approved the first COVID-19 home collection test kit](#).

- The FDA continues to facilitate test development to ensure access to accurate diagnostics, working with over 350 test developers and authorizing 63 types of tests to date.
- On **April 24**, President Trump signed the [Paycheck Protection Program and Health Care Enhancement Act](#) to replenish the Small Business Administration's small business loan program while also providing crucial support for America's frontline medical workers.
 - The act provides \$320 billion in additional funding for the Paycheck Protection Program, along with \$75 billion for hospitals and healthcare providers to fight coronavirus and \$25 billion for ongoing testing across the country.
 - The [Paycheck Protection Program](#) processed nearly \$350 billion in loans to 1.6 million small businesses from funding provided in the CARES Act. More than 4,900 lending institutions participated in making these SBA-backed loans.
- As of **April 24**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.5 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.8 million surgical gowns, 779.1 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - On April 3, CDC issued a recommendation to the public to use cloth face

coverings in community settings to help prevent the spread of COVID-19 by people are infected and do not know it.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- HHS will be providing state, territory and tribal Public Health departments with a one-time shipment of Abbott COVID-19 rapid tests.
 - Shipments are expected to arrive at the 70 identified locations by April.
 - The tests allow for immediate, on-site testing at the point-of-care.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - DOD will deliver 300 ventilators from its supply to New Jersey today, April 5.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and an additional 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 30 ventilators for Guam; an additional 200 ventilators for Louisiana; an additional 200 ventilators to New Jersey; and 100 ventilators for Massachusetts.

- Forty states, four territories and 12 tribes have issued stay at home orders.

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 1, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic.

These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people is our top priority.
- On March 31, the president extended the nation's Slow the Spread campaign until April 30.

- The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - The second flight landed in Chicago on March 30; and, one landed in Miami last night and another in New York this morning. FEMA has scheduled additional flights and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 10,469 total ventilators available, which includes 9,404 in the Strategic National Stockpile and 1,065 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Over the next 24 hours, FEMA and HHS will deliver ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (300), Illinois (150), Connecticut

(50) and Louisiana (150).

- Thirty states and 12 tribes have issued stay at home orders.

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- On April 2, President Trump invoked the Defense Production Act to increase ventilator production. The order directed the supply of materials to make ventilators to six companies.
- On April 3, the Small Business Administration Paycheck Protection Program will begin offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.

- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- Since March 31, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).
- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty-one states and 12 tribes have issued stay at home orders.

FEMA_Supply_Chain_Task_Force_Leads_Four-Pronged_Approach_to_Securing_Needed_Supplies_and_Equipment_in_COVID-19_Fight

March 31, 2020 at 10:39 AM EDT

To: molly.voris@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the fact sheet below, and attached, from our partners in the Federal Emergency Management Agency (FEMA) regarding the Supply Chain Task Force for COVID-19 response.

March 31, 2020

FEMA Fact Sheet

FEMA Supply Chain Task Force Leads Four-Pronged Approach to Securing Needed Supplies and Equipment in COVID-19 Fight

Closing the gap between what the private sector is able to provide to healthcare end-users and what is needed for the fight against COVID-19 is a key priority for the White House Coronavirus Task Force. In support of the task force, FEMA and the U.S. Department of Health and Human Service created a Supply Chain Stabilization Task Force, one of eight COVID-19 focused task forces under the National Response Coordination Center (NRCC). This task force is taking a whole-of-America approach to address limited supply of critical protective and life-saving equipment.

The task force's primary effort is the sourcing of personal protective equipment (PPE), ventilators and other critical resources requested by states, tribes and territories. By using the structure of FEMA's NRCC, the task force is finding and executing solutions to meet urgent demand and enable the U.S. Government to surge support to COVID-19 "hot spots" as they arise.

The Supply Chain Stabilization Task Force is executing a whole-of-America approach to address limited supply of critical protective and life-saving equipment. Through a four-prong approach of *Preservation, Acceleration, Expansion and Allocation*, FEMA is bringing the full capacity of the Federal government to bear to find solutions to protect the American people and defeat COVID-19.

Locating Available Critical Resources

The task force's primary effort is the sourcing of personal protective equipment, ventilators and other critical resources to respond to requests by states, tribes and territories. Through the National Response Coordination Center, the task force is working to find critical resources to meet urgent demand and enable the U.S. Government to surge support to "hot spots" as they arise. In addition, the task force is engaging manufacturers, distributors and healthcare networks to build the next phase of supply chain stabilization.

Increasing Availability of Critical Resources

The task force is developing a strategy to increase availability of critical resources through four primary efforts:

Preservation

Preservation to limit unnecessary use of PPE and other supplies. Developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs are critical components of this strategy.

- The task force is in the process of developing and verifying techniques to clean and recycle products.
- This line of effort also includes developing guidance to prioritize the allocation and the most appropriate use of supplies for specific needs, critical components of this strategy.
- The task force is also working to expand equipment resources through the Preservation line of effort. The FDA issued an Emergency Use Authorization (EUA) for ventilators on March 24, which allows anesthesia gas machines and positive pressure breathing devices to be modified for use as ventilators. The new guidance will also assist health care personnel on how to use other ventilators, like CPAP devices for sleep apnea, with COVID-19 patients in respiratory distress, as well as on shelf life of existing ventilators.

Acceleration

Acceleration of industrial manufacturing is required to help meet the urgent demand placed on the market. Manufacturers are ramping up production of critical resources and have extended operating hours to increase production well above pre-COVID-19 levels.

- To expedite purchasing, FEMA issued a request for quotation for vendors who have needed medical equipment and supplies to sell to the agency.
- FEMA is also expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
- As an example of this effort, FEMA coordinated an air bridge for flights from Asia

beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.

- The second flight landed in Chicago this morning. FEMA has scheduled additional flights and is adding more daily.
- Each flight will contain critical PPE (gloves, gowns, goggles, and masks) in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
- Upon arrival, PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Additionally, in some cases, the federal government may purchase some of the supplies to be used to replenish the Strategic National Stockpile (SNS) or to provide to states with any identified and unmet needs.
- To address the anticipated ventilator shortage across the nation, the task force has implemented a similar strategy, leveraging the strengths of the commercial industry. Including numerous vendors, such as General Electric, Phillips, Medtronic, Hamilton, Zoll, ResMed, Hillrom and Vyair, to produce 20,000 ventilators over the next two months with the potential to add 100,000 by end of June. This represents a significant increase in velocity as the normal annual market is 30,000 per year.

Expansion

Expansion of the industry is also taking place. Manufacturers are enhancing production capacity with additional machinery, and in some cases re-tooling assembly lines to produce new products needed.

- As an example of this work, the Food and Drug Administration (FDA) is providing information for manufacturers on adding production lines or alternative sites, like automobile manufacturers, for making more ventilators during the COVID-19 public health emergency.
- In addition, the task force is working through over 350 leads to match American businesses who have excess raw materials, workforce or factory production capacity combined with an overwhelming desire to provide their support to the national response effort.
 - Task force members are actively working to facilitate the creation of private sector partnerships to pair companies that have volunteered excess factory production capacity, the talents of their workforce and access to their raw material supply chains with critical supply manufacturers who have the expertise in producing PPE, ventilator and other needed equipment.
 - The creation of these partnerships to align capacity with know-how will

unleash the potential engine of our national private sector and help overcome the supply shortfalls.

Allocation

Allocation of critical resources based on data-informed decisions. These decisions will be coordinated between the U.S. Government and the private sector.

- FEMA is focusing its allocation of critical resources to highly impacted areas experiencing the greatest increase in COVID-19 transmission and the greatest increase in forecasted capacity shortfalls, with consideration to the at-risk population distribution across the Nation.
- To more effectively adjudicate resources throughout the nation and private industry, a National Resource Prioritization Cell was established to unify government and private industry prioritization recommendations which will inform federal, state and private sector operations.

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- As of **April 19**, FEMA, HHS, and the private sector combined have coordinated the delivery of, or are currently shipping: 57.4 million N95 respirators, 77.9 million surgical masks, 6.2 million face shields, 11.9 million surgical gowns, 587 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and

- commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA from April 1st – 14th through Project Airbridge and the commercial supply network.
 - The U.S. has now tested 4.18 million people, which is more total tests than the following nations combined: France, the United Kingdom, South Korea, Japan, Singapore, India, Austria, Australia, Sweden, and Canada.
 - As conveyed by Dr. Anthony Fauci and Admiral Brett Giroir, there is enough testing capacity for states to move into phase one of reopening when they choose to do so.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - President Trump and Vice President Pence are working closely with Governors to review what more they can do to develop locally tailored testing strategies.
 - HHS and FEMA continue to provide federal support to state run testing.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - FEMA and HHS have centralized best practices and lessons learned to help medical practitioners, emergency managers, and other stakeholders learn from each other's approaches.
 - The [FEMA Coronavirus Emergency Management Best Practices](#) page contains resources for all levels of government, private sector, academic institutions, professional associations, and other organizations responding to the pandemic.
 - HHS has a comprehensive [Novel Coronavirus Resources](#) page that highlights technical resources and information for the medical community and emergency responders.

 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- In order to help Americans, return to work, the federal government will distribute cloth facial coverings for critical infrastructure workers who do not need medical-grade personal protective equipment (PPE) for their daily work.
 - The facial coverings will be delivered in a phased approach for infrastructure workers, first responders and food producers. Prioritization will also be to areas with the highest COVID-19 infection rates.

- Distribution will be based on the Cybersecurity and Infrastructure Security Agency's analysis of priority infrastructure sectors and will include food production and distribution, energy, water and wastewater treatment, essential transportation and logistics, first responders, communications, hazardous materials management, manufacturing of medical supplies, and sanitation and disinfection supplies.
 - The first phase includes distribution of more than 19 million facial coverings.
 - HHS anticipates production of 6.5 million facial coverings each week for the next month.
- As of **April 22**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 96.9 million surgical masks, 6.6 million face shields, 13.8 million surgical gowns, 727 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- The U.S. has now processed 4.69 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the vast testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - Consolidating testing supplies under the IRR simplifies the resource request process for states and territories and alleviates the burden on public health labs on needing to work with separate suppliers for swabs, reagents and other diagnostic testing supplies.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines also outline state responsibilities to have in place before moving into a reopening plan: protecting workers in critical industry, particularly protecting the most vulnerable, those who live and work in senior care facilities, and having a plan for testing symptomatic individuals with a focus on vulnerable populations.
 - The federal government will continue to work with governors across the country to ensure that they have the equipment and the supplies and the testing

resources to reopen safely and responsibly.

- As of **April 17**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 55 million N95 respirators, 69 million surgical masks, 5.9 million face shields, 10.5 million surgical gowns, 523 million gloves, 10,998 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - On **April 17**, Vice President Pence issued a letter to the nation's governors summarizing all the medical equipment and supplies that have been distributed to each state from FEMA between the first of this month and April 14th through Project Airbridge and through the commercial supply network.
- On **April 17**, the Cybersecurity and Infrastructure Security Agency released version 3.0 of the [Essential Critical Infrastructure Workers guidance](#) to help state and local jurisdictions and the private sector identify and manage their essential workforce while responding to COVID-19.
- On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose. The option was developed through a partnership with United Health Group, Quantigen, the Gates Foundation and U.S. Cotton.

April 17, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- On April 16, President Trump released [Guidelines for Opening America Up Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The guidelines were developed by top healthcare experts in government, including at the U.S. Department of Health and Human Services and the Center for Disease Control and Prevention.
- Core state preparedness responsibilities include testing & contact tracing, healthcare system capacity, and plans.
 - State and local officials may need to tailor the application of these criteria to

- local circumstances (e.g., metropolitan areas that have suffered severe COVID-19 outbreaks, rural and suburban areas where outbreaks have not occurred or have been mild).
- Where appropriate, governors can work on a regional basis to satisfy these criteria and to progress through the phases outlined.
 - Governors will continue to manage the situation in each state and develop robust reopening plans, working in close coordination with medical experts and key industries.
 - Fully assessing and leveraging the state's entire testing capacity will be important, including roadmap to all locations and types of testing available in the states, and the capacity of state and local labs, hospitals and universities, and private labs.
 - A robust and strategic testing strategy should include a plan to immediately test individuals if there is an outbreak in a community with a focus on vulnerable populations.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).

Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting

April 23, 2020 at 10:15 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the announcement below, and attached, fact sheet from our partners in Federal Emergency Management Agency (FEMA) regarding Addressing PPE Needs in Non-Healthcare Setting.

FEMA has published the attached Coronavirus (COVID-19) Pandemic: Addressing PPE Needs in Non-Healthcare Setting. This guidance summarizes how organizations should consider and manage their personal protective equipment (PPE) needs while ensuring the protection of workers during the coronavirus (COVID-19) pandemic response, including how to preserve limited supplies of PPE, how to consider need during periods of shortages, and how to acquire and request PPE (i.e., in the face of critical shortages and whereas normal supply chain allocation cannot meet operational requirements).

The attached fact sheet may also be found on the FEMA website [here](#).

Coronavirus (COVID-19) Pandemic Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- * FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people
- * FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
- * Last night, FEMA Administrator Pete Gaynor [issued a letter to the nation's emergency managers](#) outlining lessons learned from the first 30 days of FEMA leading the "Whole-of-America" response to the coronavirus (COVID-19) pandemic.

-- Specifically, the letter addresses preservation and prioritization of scarce resources; use of data-driven decision making; utilization of key federal medical staff, Federal Medical Stations and Large-Format Alternative Care Sites; mitigation efforts to flatten the curve; strengthening the supply chain; as well as the importance of busting myths.

--This guidance is a follow-on to the Administrator's [first letter to emergency managers](#) on March 27, which requested key actions and outlined critical steps for the initial COVID-19 response.

* The White House announced [a new collaboration by Schema.org](#) to help Americans find the most up-to-date public health guidance and the most relevant information on testing facilities in their communities

--Standard tags were created that can be [added to any website's code](#), making it easier to find COVID-19 prevention measures, disease spread statistics, quarantine rules and travel guidance, and testing information through online search engine results.

--All federal websites will incorporate these new Schema.org standard tags. The private sector, state and local governments, and the academic community are encouraged to do the same.

April 2, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with Medical Hotspots; FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance, CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of America response to fight the COVID-19 pandemic and protect the public.
- The health and safety of the American people are our top priority.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.

- The initiative presents the entire country with an opportunity to implement actions designed to slow and limit the spread of COVID-19, like staying home as much as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On March 27, President Trump signed the CARES Act into law. The CARES Act allocates \$2 trillion to COVID-19 response efforts.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA coordinated an air bridge for flights from Asia beginning Sunday, March 29 which delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights have landed in Chicago on March 30 as well as in Miami on March 31, and Los Angeles on April 1. Additional flights landed in Chicago and Columbus, Ohio early this morning. FEMA has more flights scheduled and is adding more daily.
 - Each flight will contain critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA will not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Upon arrival, the PPE will be provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,961 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 907 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- In the past 48 hours, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Michigan (400), New Jersey (650), Illinois (150), Connecticut (50) and Louisiana (150).

- FEMA will notify direct housing occupants in the states of California, Florida, North Carolina and Texas that they would suspend rent payment requirements for the months of April, May and June as a result of the ongoing impacts of COVID-19.
- Thirty states and 12 tribes have issued stay at home orders.

Bailey, Danielle

RE: Public info ad campaign options

March 20, 2020 at 11:54 AM EDT

To: Jaime.Smith@gov.wa.gov

Hi Jamie,

This email was forwarded to me, I just want to check in and make sure you are connected to folks in the state of WA. I work closely with the WA Coalition on Inclusive Emergency Planning (CIEP), chaired by the WA State Independent Living Council and represents a number of disability agencies in the state on inclusive emergency planning. If you would like I can make introductions. It is critical you are involving disability partners in messaging that is being developed. Let me know how I can support.

Thanks

Subject: Public info ad campaign options

Good evening, Robert –

My notes about who else to send this info to is at my JIC desk, unfortunately, so I'm just sending to you for now.

Attached are two documents.

The word document is the initial draft of what the campaign might look like. It's draft and was created prior to getting a budget put together so our ultimate campaign may not include all the elements but it gives you a sense of the messaging and targeting.

The excel sheet details four options for the team's consideration. We highly recommend the third or fourth options because they ensure the most impressions and because we anticipate needing to communicate to seniors and the public over the next several weeks. We do not recommend investing heavily in radio because as more people choose to stay home, TV is overcoming radio. Some of these costs could come down if we're able to get networks to donate air time.

- \$100k campaign = two-weeks of digital and multicultural advertising
- \$250k campaign = three weeks of digital, online news and multicultural advertising
- \$500k 8-week campaign = the above plus cable and local news advertising
- \$1M 10-week campaign = the above plus expanded TV advertising and some rural radio

These estimates do not include some of the digital and social media we will do in-house and amplify through an extensive network of partners who have agreed to help amplify messaging through their own social media, newsletters, etc. Here are the partners who have committed to helping communicate to their members and networks:

State Ombuds
State Council on Aging
Adult Family Home Council
Washington Health Care Association (Assisted Living and NF associations)
Retired Public Employees of WA
Mobile Home Parks Associations
W4A
Alzheimers Association
AARP
ARCORA (delta dental)
Catholic Community Services
Senior Services for South Sound
Columbia Legal Services

Disability Rights WA
Hearing Loss Association
Keiser Permanente
Home Care Associations of WA
Elder Law
Washington Association of Professional Guardians
Washington State Associations of Senior Centers
Washington State Hospice and Palliative Care Organization

Happy to answer questions. I have additional back-up documentation from the marketing firm HCA contracts with that put the numbers together but it's not helpful for purposes of decision-making. If we decide to pursue one of these options, HCA and DOH can compile a detailed outline of the budget + deliverables.

Department of Homeland Security _Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

March 13, 2020 at 4:14 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Department of Homeland Security Outlines New Process for Americans Returning from Certain European Countries, China, and Iran

WASHINGTON – In order to help prevent the spread of travel-related cases of coronavirus in the United States, today the Department of Homeland Security (DHS) Acting Secretary Chad F. Wolf issued a [Notice of Arrival Restrictions](#) outlining the process for American citizens, legal permanent residents, and their immediate families who are returning home after recently visiting certain European countries (listed below), China, and Iran.

Effective for flights taking off at 11:59 PM EDT on Friday, March 13th, Americans returning from all restricted countries will now be required to travel through the following 13 airports:

- Boston-Logan International Airport (BOS), Massachusetts
- Chicago O'Hare International Airport (ORD), Illinois
- Dallas/Fort Worth International Airport (DFW), Texas
- Detroit Metropolitan Airport (DTW), Michigan
- Daniel K. Inouye International Airport (HNL), Hawaii
- Hartsfield-Jackson Atlanta International Airport (ATL), Georgia
- John F. Kennedy International Airport (JFK), New York
- Los Angeles International Airport, (LAX), California
- Miami International Airport (MIA), Florida
- Newark Liberty International Airport (EWR), New Jersey
- San Francisco International Airport (SFO), California
- Seattle-Tacoma International Airport (SEA), Washington
- Washington-Dulles International Airport (IAD), Virginia

Upon arrival, travelers will proceed to standard customs processing. They will then continue to enhanced entry screening where the passenger will be asked about their medical history, current condition, and asked for contact information for local health authorities. Passengers will then be given written guidance about COVID-19 and directed to proceed to their final destination, and immediately home-quarantine in accordance with CDC best

practices.

“While the overall risk of serious infection from the coronavirus to the general public remains low at this time, the Trump administration is taking these aggressive measures to keep the risk low, requiring all Americans returning from affected areas in Europe to be funneled through 13 airports for screening upon their return to the U.S.,” said Acting Secretary Wolf. “To minimize disruptions to travelers, TSA, CBP, and air carriers are working to identify qualifying passengers before their scheduled flights. These passengers will be rerouted to one of the 13 airports by their airline at no cost to them.”

Wolf continued: “I understand this new process will be disruptive to some travelers, however this action is needed to protect the general public from further exposure and spread of the coronavirus. Once back in the U.S. it is imperative that individuals honor self-quarantine directives to help protect their loved-ones and communities.”

President Trump determined that the potential for widespread transmission of the coronavirus by infected individuals seeking to enter the United States threatens the security of the homeland. Therefore, the Department is taking action in furtherance of the public health interests advanced by the March 11th [presidential proclamation](#) which suspends entry to nearly all foreign nationals who have been in certain European countries, China and Iran at any point during the 14 days prior to their scheduled travel to the U.S.

These European countries, known as the Schengen Area, include: Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland. This Presidential Proclamation does not apply to U.S. citizens, legal permanent residents, nor their family members under the age of 21, and other individuals who are identified in the proclamation. Nor does it apply to cargo and economic shipping.

For further information, please visit [Coronavirus.gov](#) or [DHS.gov/Coronavirus](#).

FEMA_and_Our_Partners_Remain_Actively_Engaged_to_Support_State-Managed_Coronavirus_Response

March 28, 2020 at 1:56 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 28, 2020

FEMA Advisory

FEMA and Our Partners Remain Actively Engaged to Support State-Managed Coronavirus Response

“I can tell you this weekend, we will be reporting on aggressive efforts that our supply stabilization task force at FEMA is taking to import medical supplies from around the world.” – Vice President Mike Pence

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

The American people play a key role in the nation’s [15 Days to Slow the Spread](#) campaign to help slow the virus’ spread and keep our most high-risk populations safe.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- Apple and CDC, together with the White House and FEMA, launched a [new website](#) and app with a COVID-19 screening tool and resources to help people protect their health.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. As of March 28, FEMA, via the Strategic National Stockpile (SNS), has delivered, or is

shipping: 11.6 million N-95 respirators, 26 million surgical masks, 5.2 million face shields, 4.3 million surgical gowns, 22 million gloves, 132, 000 coveralls and 8,100 ventilators. We are sending more every day, and we are working nonstop to acquire or produce even more.

Today, the US-NS *Comfort* will be underway today from Norfolk, VA to New York, NY.

- The *Comfort* will arrive at Pier 90 in Manhattan on Monday – only approximately a mile away from the Javits Convention Center where the U.S. Army Corps of Engineers are actively constructing a 2,910-bed alternate care facility.
- The *Comfort* is equipped with 12 operating rooms, 1,000 hospital beds, a medical laboratory, a pharmacy, an optometry lab, digital radiology services, a CAT-scan, two oxygen producing plants, a helicopter deck and a crew of nearly 1,200 U.S. military personnel.
- The crew onboard the *Comfort* will provide critically needed medical surge capacity for New York Metropolitan area. Their mission will be to care for New Yorkers who do not have COVID-19, but who require urgent medical care.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts.

- This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary.
- Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act to avoid governors needing to request individual emergency declarations.

In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Michigan, Missouri, South Carolina, Texas, Washington, the commonwealth of Puerto Rico, and the territory of Guam were approved for major disaster declarations to assist with additional needs identified in these states. Seventeen states and four tribes have issued stay at home orders.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

FEMA_Offers_Ways_for_Private_Sector_to_Help_Fight_COVID-19

March 27, 2020 at 4:08 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA Offers Ways for Private Sector to Help Fight COVID-19

Under the White House Coronavirus Task Force's direction, FEMA, HHS and our federal partners continue to work closely with state, local, tribal and territorial governments in executing a whole-of-government response to fight the COVID-19 pandemic and protect the public. The outpouring of support from the private sector to provide medical supplies and equipment has been tremendous. To help us match the many offers of assistance to the right place, at the right time, and in the right quantity, we ask for your help in ensuring partners know how to connect.

To **sell medical supplies** or equipment to the federal government, please submit a price quote under the [COVID-19 PPE and Medical Supplies Request for Quotation](#). Full details can be found in the solicitation ([Updated Notice ID 70FA2020R00000011](#)). This solicitation requires registration with the System for Award Management (SAM) in order to be considered for award, pursuant to applicable regulations and guidelines. Registration information can be found at www.sam.gov. Registration must be "ACTIVE" at the time of award.

If you have **medical supplies or equipment to donate**, please provide us details on what you are offering through our online medical supplies and equipment form at <https://www.fema.gov/covid19offers>.

If you are interested in **doing business with FEMA** and supporting the response to COVID-19 with your company's **non-medical** goods and/or services, please submit your inquiry to the Department of Homeland Security's Procurement Action Innovative

Response (PAIR) team at DHSIndustryLiaison@hq.dhs.gov.

In addition to these avenues to help, **licensed healthcare professionals that want to volunteer** can get information on eligibility, view credential levels by clinical competency and register with the [Emergency System for Advance Registration of Volunteer Health Professionals](#) in their state.

If you are a hospital or healthcare provider in need of medical supplies, please contact your state, local, tribal or territory department of public health and/or emergency management agency. Any needs that cannot be met by the state or tribe are then sent to the respective FEMA regional office who are coordinating requirements through the FEMA National Response Coordination Center. FEMA is working with the Department of Health and Human Services and other federal agencies to fulfill requests and ship supplies as quickly as possible.

Additional ways to help can be found at www.fema.gov/coronavirus/how-to-help.

Subject: Please review: Stay home campaign drafts

Importance: High

Hi all,

Please review the attached DRAFT materials and track any edits/suggestions **by COB Monday, March 23**. Other materials, including a tip sheet for caregivers, are in the works. Laura and I are working with the agency heading up the Spread the Facts campaign to infuse this messaging into the overall campaign. More to come on that.

These materials serve as the basis and main key messages for:

- Infographics
- Digital ads
- Partner toolkit resources
- Talking points
- TV, radio, digital advertising

Best,
Kennedy

Hi Danielle –

Thanks for reaching out. Our folks have been reaching out to dozens of organizations that represent various senior and vulnerable communities. I'm connecting you here with the core group of folks that have been thinking about messaging and implementation of the campaign.

Appreciation the offer to assist with connecting folks. I'll let Jim and Kennedy here take the lead on getting back to you.

Hi Jamie,

This email was forwarded to me, I just want to check in and make sure you are connected to folks in the state of WA. I work closely with the WA Coalition on Inclusive Emergency Planning (CIEP), chaired by the WA State Independent Living Council and represents a number of disability agencies in the state on inclusive emergency planning. If you would like I can make introductions. It is critical you are involving disability partners in messaging that is being developed. Let me know how I can support.

Thanks

Subject: Public info ad campaign options

Good evening, Robert –

My notes about who else to send this info to is at my JIC desk, unfortunately, so I'm just sending to you for now.

Attached are two documents.

The word document is the initial draft of what the campaign might look like. It's draft and was created prior to getting a budget put together so our ultimate campaign may not include all the elements but it gives you a sense of the messaging and targeting.

The excel sheet details four options for the team's consideration. We highly recommend the third or fourth options because they ensure the most impressions and because we anticipate needing to communicate to seniors and the public over the next several weeks. We do not recommend investing heavily in radio because as more people choose to stay home, TV is overcoming radio. Some of these costs could come down if we're able to get networks to donate air time.

- \$100k campaign = two-weeks of digital and multicultural advertising
- \$250k campaign = three weeks of digital, online news and multicultural advertising
- \$500k 8-week campaign = the above plus cable and local news advertising
- \$1M 10-week campaign = the above plus expanded TV advertising and some rural radio

These estimates do not include some of the digital and social media we will do in-house and amplify through an extensive network of partners who have agreed to help amplify messaging through their own social media, newsletters, etc. Here are the partners who have committed to helping communicate to their members and networks:

State Ombuds
State Council on Aging
Adult Family Home Council
Washington Health Care Association (Assisted Living and NF associations)
Retired Public Employees of WA
Mobile Home Parks Associations
W4A
Alzheimers Association
AARP
ARCORA (delta dental)
Catholic Community Services
Senior Services for South Sound
Columbia Legal Services
Disability Rights WA
Hearing Loss Association
Keiser Permanente
Home Care Associations of WA
Elder Law
Washington Association of Professional Guardians
Washington State Associations of Senior Centers
Washington State Hospice and Palliative Care Organization

Happy to answer questions. I have additional back-up documentation from the marketing firm HCA contracts with that put the numbers together but it's not helpful for purposes of decision-making. If we decide to pursue one of these options, HCA and DOH can compile a detailed outline of the budget + deliverables.

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the President's Executive Order on Duties and Fees Deferment for Certain Importers

"I applaud the President for signing this [Executive Order](#), which gives the Administration the ability to help the trade community and U.S. businesses who keep critical supply chains for U.S. manufacturers moving during this unprecedented time. As we all know, the COVID-19 pandemic response has created serious economic issues for many American businesses. This President and this Department have, and always will, put the American worker first.

This EO will give the Administration the flexibility to allow importers who have faced a significant financial hardship during the COVID-19 response to defer the payment of certain duties, taxes, and fees for 90 days. This payment flexibility will be available only for importers with a significant financial hardship. Duties and fees associated with antidumping and countervailing duties (AD/CVD), and Section 201, 232 and 301. Trade Remedies are not included in this relief effort."

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 26, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 25**, FEMA announced that more than \$5.1 million dollars in crisis counseling service grants have been made available to five states.
 - The grants, made to Massachusetts, Michigan, New Jersey, New York and Washington, will support programs providing free, confidential counseling to assist individuals through community-based outreach and educational services.
 - Due to the COVID-19 nationwide emergency and the need to protect the safety and health of all Americans, the crisis counseling will be delivered by phone,

internet and the media (including social media).

- As of **April 25**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.7 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.7 million surgical gowns, 793.8 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Cc: McClain, Stacey (MIL) <Stacey.McClain@mil.wa.gov>; Ike, Ryan <Ryan.Ike@fema.dhs.gov>

Subject: RE: Tribal Access to Emergency Funds

Dear Nick and Craig,

No the President's emergency declaration did not release a funding.

There is a difference between an emergency declaration and a major Presidential Disaster Declaration in that an emergency declaration only allows federal agencies to assist states.

None of the states have a major presidential disaster declaration yet or tribes.

The tribes know that as sovereign as a sovereign entity they can both request a major Presidential Disaster Declaration and be included in the state's request.

Our Washington State tribes are included in the state's request for a major Presidential Disaster Declaration and they can apply on their own for this status.

The tribes in our state have extensive contact with FEMA Region X's Tribal Affairs team and know about major Presidential Disaster Declaration request processes and how to request.

Note that this is not funding released that can be applied for that was your question.

Within designation of a major Presidential Disaster Declaration there are two possible components which are Public Assistance (damage to public facilities) [https://www.fema.gov/media-library-data/1572028370885-e5aabd18bf3145151a89919f82500613/PublicAssistanceFactSheetJune2017_Updated_Oct2019\(FINAL\).pdf](https://www.fema.gov/media-library-data/1572028370885-e5aabd18bf3145151a89919f82500613/PublicAssistanceFactSheetJune2017_Updated_Oct2019(FINAL).pdf) and <https://www.fema.gov/public-assistance-local-state-tribal-and-non-profit> Individual Assistance (IA) <https://www.fema.gov/media-library/resources-documents/collections/382> that if the damage assessments show the threshold of damage to public facilities and concentrated impact potentially result in funding.

I have cc'd FEMA and Ryan if I have miss-spoke please feel free to add anything.

Craig Bill is the Director of our Governor's Office of Indian Affairs and connects to all of our federally recognized tribes.k

Sincerely,
Nancy

FEMA_Coronavirus_(COVID-19)_Pandemic:_Daily_Briefing_Points_-_April_4

April 04, 2020 at 1:25 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 4, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - The initiative presents the entire country with an opportunity to implement

- actions designed to slow and limit the spread of COVID-19, like staying home as much as possible, canceling or postponing gatherings of more than 10 people, and taking additional steps to distance yourself from other people.
 - On April 3, CDC issued a recommendation to the public to use cloth face coverings in community settings to help prevent the spread of COVID-19 by people who are infected and do not know it.
 - For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- On April 3, the Small Business Administration Paycheck Protection Program began offering nearly \$350 billion in loans to small businesses.
 - If an employer maintains their workforce, the SBA will forgive the portion of the loan used to cover the first 8 weeks of payroll and certain other expenses.
 - In addition to its traditional loan programs, the SBA is also providing Economic Injury Disaster Loans and forgiveness for up to six months of new and existing loans.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain. Prioritization will be given to hospitals, health care facilities, and nursing homes around the country.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure the ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - To submit a request, states and tribes will work through their FEMA/ HHS regional leadership.
- As of April 3, FEMA and HHS have delivered ventilators from the Strategic National

Stockpile to California (170), Connecticut (50), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).

- Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 200 ventilators for Louisiana; and 100 ventilators for Massachusetts.
- On April 3, CDC launched [COVIDView](#), a weekly report that summarizes and interprets key indicators from a number of existing surveillance systems.
 - The report provides CDC expert summaries and interpretations of important and timely surveillance data to track the COVID-19 pandemic in the United States.
 - COVIDView includes information related to COVID-19 outpatient visits, emergency department visits, and hospitalizations and deaths, as well as laboratory data.
 - The report will be updated every Friday.
- Forty states, four territories and 12 tribes have issued stay at home orders.

FEMA_and_Our_Partners_Continue_to_Support_State-Managed_Coronavirus_Response

March 27, 2020 at 12:14 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole of government response to COVID-19.

March 27, 2020

FEMA Advisory

FEMA and Our Partners Continue to Support State-Managed Coronavirus Response

“My current focus has been and will continue to be to make sure we get critical supplies to those places around the country that need them the most.” – FEMA Administrator Pete Gaynor

The federal government continues taking aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public. Seventeen states and 4 tribes have issued shelter-in-place orders in addition to eight states that have issued partial or localized orders and one state has that issued orders for certain at-risk groups only.

On March 22, President Trump directed the Secretary of Defense to allow the states of

California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of California, Florida, Illinois, Iowa, Louisiana, New Jersey, New York, North Carolina, Maryland, Missouri, Texas and Washington were approved for major disaster declarations to assist with additional needs identified in these states.

As of March 26, FEMA has shipped over 9 million N-95 masks, 20 million surgical/face masks, 3.1 million face shields, nearly 6,000 ventilators, 2.6 million gowns, and 14.6 million gloves. We are sending more every day, and we are working nonstop to acquire or produce even more.

Please see attached for updated information on Medical Hotspots, the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Coping with Stress, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and the Strategic National Stockpile.

Subject: SCAN Ecosystem Assessment Puget Sound (March 21, 2020)

Leaders,

Provided is the FEMA Supply Chain Analysis Network () Ecosystem Assessment of the Greater Seattle Area. This report is focused on the grocery supply chain.

Key Takeaway: This region's *targeted implementation* of Non-Pharmaceutical Interventions (school closings, gathering prohibitions, business closings, Shelter in Place, etc.) . . . **SEEM TO BE . . . contributing to supply chain resilience in comparison to more restrictive policies.** SCAN's mandate is to answer two fundamental questions:

1. Are key demand and supply networks failing (in the focus region) ?
2. If so, when, where, why – and with whom can FEMA engage to be most effective in reversing failure?

Key Findings:

1. Grocery demand and supply networks in the Puget Sound region are not failing; but these networks are experiencing significant stress.
2. After several weeks of demand of up to 300% of normal seasonal maximums (Thanksgiving and the Super Bowl), supply chains are under duress – but are displaying surprising levels of resilience.
3. Based on early indicators from the San Francisco Bay Area, there is cause for concern that the Puget Sound grocery supply chain will be disrupted by implementation of mandatory, wide-area Shelter-In-Place restrictions in neighboring states substantially contribute to Seattle area supply chains.
4. It would be helpful for to **discourage implementation of additional mandatory wide-area Shelter in Place (SIP) declarations** and to work with state and local colleagues to mitigate unnecessary constriction of supply chains within SIP areas.

Subject: FW: Seattle Highway Network Traffic and Freight Trucking Assesment

Tristan and Taylor,

I am getting this product to you for review as I am reviewing it myself . . . there will be a complimentary SCAN Ecosystem Assessment document also released this evening.

I have reviewed this once and will several more times. From a quick first read, I gather that the measures put in place in the Seattle region have not, for the most part, adversely impacted freight flows. Is this what you are seeing? This should indicate a relatively strong grocery sector and pharma supply chain that is demonstrating a good amount of resilience.

Is this the case?

DHS_Announcement:_Important_Message_on_Essential_Financial_Services_Sector_Workers_-_From_
U.S._Treasury_Secretary_Mnuchin

March 22, 2020 at 7:13 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

On behalf of U.S. Treasury Secretary Mnuchin, please see an important message regarding financial service sector guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

A message from U.S. Treasury Deputy Assistant Secretary for Cybersecurity and Critical Infrastructure Protection David B. Lacquement:

Workers across the financial services sector play an important role in supporting the American people and our Nation's economy. Consistent with the need to ensure access for essential financial services workers, Secretary Mnuchin issued the attached memorandum. This memorandum points to guidelines from the President and the Department of Homeland Security, which provides guidance to State and local officials as they work to protect their communities while ensuring continuity of critical functions to public health and safety, as well as economic and national security.

Everyone should follow guidance from the Centers for Disease Control and Prevention as well as State and local officials regarding strategies to limit disease spread. We are dedicated to working closely with all of you to ensure the safety of the workforce and ensure the continued operations of the financial services sector in support of our Nation's economy.

Thank you for your continued support.

Administrator_Gaynor_Sends_Letter_to_Emergency_Managers

March 27, 2020 at 1:31 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the announcement below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on COVID-19.

FEMA

March 27, 2020

Administrator Gaynor Sends Letter to Emergency Managers

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. Today, Administrator Gaynor sent the following letter to emergency managers outlining critical steps to help the nation respond to COVID-19:

Fellow Emergency Managers,

The coronavirus disease 2019 (COVID-19) pandemic has transformed our daily lives and our profession in a matter of weeks. Together with our public health colleagues, we work as a team to battle the nationwide effects of this virus. I thank you for your tireless efforts under these unprecedented and very demanding circumstances.

I write to you today as the Administrator of FEMA and a former state and local emergency manager. Now more than ever, we must work as a team to deliver locally executed, state-managed, and federally supported solutions on behalf of the American people. The best and the brightest emergency managers, public health officials, private industry partners, scientists, and medical doctors and nurses are assembling at FEMA Headquarters and in our regional offices; in your state and local emergency operations centers; and in hospital operations centers across the country. This is truly a whole-of-nation response. Rest assured, the full weight of our Nation is supporting all of us to overcome the pandemic and I have no doubt that we will be successful in defeating the spread of COVID-19.

To be successful across the nation – from the smallest town, tribal nation, island, and to the largest city – we must act decisively and immediately. Today, many of you are at the center of the battle, in places like New York, Washington, California, and Louisiana. Others of you may only have a few cases. It is our collective responsibility to do our very best today, so we can continue to blunt the spread of COVID-19. If you have excess capacity, please consider using EMAC to offer resources that your peers from around the country may need.

As the Nation's lead emergency manager, I want to be completely transparent about our national response and your responsibility to respond proactively and aggressively. To that point, I would like to share seven critical steps that I ask you to **immediately** consider and act upon.

First, mitigation works. Ensure you preserve your “force” while maintaining the ability to respond in a COVID-19 degraded environment without access to the tools typically used in an emergency or disaster like mutual aid and EMAC. Ensure that your communities, small or large embrace mitigation efforts. Every American has a role to play in defeating COVID-19, including good hygiene and social distancing. Follow the President's [15 Days to Slow the Spread](#).

Second, integrate all emergency management and public health operations. Identify and integrate your leading health official into your Emergency Operations Center and Unified Command Group at every level of government. You must form a unified Emergency Management – Public Health Team. Ensure that the entire state political leadership team understand the emergency management process. All requests to the Federal government must be formally communicated by the state's emergency manager to the FEMA Regional Administrator. This is the same process as natural disasters.

Third, collect public, private, and government hospital bed capacity data, if you haven't already – total beds, acute care beds, normal occupancy, predicted surge occupancy. This data will assist you in crafting requests for high demand, low density critical resources should the time come that you may need it. We must use all data wherever possible to allocate scarce resources, including consideration of population size, demographics, and vulnerability.

Fourth, actively plan to stand-up Alternate Care Sites. Be creative in identifying facilities that can support low acuity patients and require a minimal amount of medical staff, already in short supply. Consider locations such as convention centers, hotels, shuttered hospitals, college or university dormitories, or vacant open space in commercial buildings. Ask your FEMA Regional Administrator to brief you on the US Army Corps of Engineers “Hotel to Healthcare” initiative. If you need a plan, here is a [link](#) to a plan.

Fifth, maintain situational awareness of ventilators that may be used across your area. Check hospitals, acute care sites, outpatient locations, and any other location that may use these devices, especially those that may be a source for reallocation to an area of greater need. Like hospital bed capacity, this data will help you understand what you have and what you may need, informing your resource management strategy for these high

demand, low density critical resources should the time come that you may need it. Just as we are moving resources nationally, you should also be moving resources within your state.

Sixth, identify all sources to surge medical professionals. Look for retirees, medical contract services, nurses, respiratory therapists, medical students, and emergency medical technicians or local equivalents. You will need them to support the increased hospital surge and management of patients on ventilators and you should be cataloging and training them now, as appropriate.

Seventh, manage Personal Protective Equipment (PPE) carefully. We have stood-up the *Supply Chain Stabilization Task Force* within FEMA with the purpose of increasing the flow of critical medical supplies such as N95 masks, surgical masks, and ventilators. We are using four guiding principles: 1) preserve what we have; 2) locate medical stockpile around the globe; 3) distribute them to locations most in need; and 4) build capacity in America through partners with industry. While some of these strategies will yield near-term benefits, it must be your highest priority to carefully manage what you have available to you now.

To help you with this, the CDC produced a [Personal Protective Equipment \(PPE\) Burn Rate Calculator](#). This spreadsheet-based model provides information for healthcare facilities to plan and optimize the use of PPE for response to COVID-19. Similarly, non-healthcare facilities (e.g., correctional facilities) may find this tool useful for planning and optimizing PPE use as part of the response to COVID-19. This tool can also be used for planning PPE use outside the context of COVID-19, where PPE shortages may also occur due to supply chain issues related to the COVID-19 response (e.g. manufacturing facilities).

FEMA will reimburse all eligible expenses for emergency protective measures under the Stafford Act; however, do not wait for the PPE from the Federal government to show-up. Take aggressive action now to source your own. Because of the actions the Administration and federal government is taking, you will begin to see PPE supplies come online in the weeks ahead as the commercial distribution chain adapts as well as the quantities of shipments from the Strategic National Stockpile continue to move. Continue to be resourceful, ask the building trades to donate PPE or that they allow you access to their supplier; and, ask dental and outpatient offices that are closed to donate PPE to local hospitals and care critical care sites. And finally, I ask you to review and utilize the guidance the *Supply Chain Stabilization Task Force* released regarding guidance for PPE.

Lastly, some [external communication](#) resources that may be helpful:

- **[Best Practices](#):** This page provides a platform for sharing best practices and lessons learned by the government, private sector, academic institutions, professional associations, and other organizations to support the whole of community response.
- **[Rumor Control](#):** This page is to help the public distinguish between rumors and facts regarding the response to COVID-19.
- **[How to Help](#):** This page provides guidance on how to **donate** critical resources & supplies; how to **do business** with FEMA; and, how to **volunteer**.

These are unprecedented times and many lives are potentially at stake. We are doing things many of us have never imagined, especially at this scale. As professional emergency managers, we are built for this – this is what we do best; coordinate, problem-solve, and act. I ask all of you to lead, innovate, and be resourceful. This is a whole of nation response and I need every emergency manager to be an active participant.

We are emergency managers and America needs us at our best.

Respectfully,

Pete Gaynor
Administrator

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 5, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Daily Briefing Points

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as information associated with FEMA and Department of Health and Human Services Response; FEMA Disaster Response Capacity; Federal Funding of National Guard (Title 32); Community-Based Testing Sites; Strategic National Stockpile; FDA Ventilator Guidance; CDC Respirator Guidance; Defense Production Act; Guidance from Federal Agencies; CDC Public Guidance; Coping With Stress; Combating Disinformation and Rumors; and How To Help.

Topline messaging includes the following:

- Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole-of-America response to fight the COVID-19 pandemic and protect the public.
- The number one priority is the health and safety of the American people.
- On March 31, the president extended the nation's [Slow the Spread](#) campaign until April 30.
 - The American people play a key role in the campaign to help slow the virus' spread and keep our most high-risk populations safe.
 - On April 3, CDC issued a recommendation to the public to use cloth face

coverings in community settings to help prevent the spread of COVID-19 by people are infected and do not know it.

- For the latest updates and information on how to protect yourself and what to do if you think you are sick is available at www.coronavirus.gov.
- HHS will be providing state, territory and tribal Public Health departments with a one-time shipment of Abbott COVID-19 rapid tests.
 - Shipments are expected to arrive at the 70 identified locations by April.
 - The tests allow for immediate, on-site testing at the point-of-care.
- FEMA is expediting movement of critical supplies from the global market to medical distributors in various locations across the U.S.
 - FEMA continues to coordinate an air bridge for flights from Asia. The first flight landed Sunday, March 29, and delivered 80 tons of much needed PPE supplies to New York, New Jersey and Connecticut.
 - Additional flights landed in Chicago on March 30, Miami on March 31, Los Angeles on April 1, and Chicago and Columbus, Ohio, on April 3. FEMA has more flights scheduled and is adding more daily.
 - Each flight contains critical personal protective equipment (PPE), to include gloves, gowns, goggles, and masks in varying quantities. FEMA does not have detailed visibility on the amount of PPE until the flights are loaded overseas.
 - Overseas flights are arriving at airports that are operational hubs. They are not indicators that the supplies will be distributed in those locations. All supplies are national supplies and will be distributed to hot spots and through the vendors regular supply chain to locations across the country.
 - Upon arrival, PPE is provided, in varying quantities, first to medical distributors in areas of greatest need; then, the remainder will be infused into the broader U.S. supply chain.
- Given the scarcity of the ventilators in the Strategic National Stockpile (SNS) and the current capacity of the private sector to meet the demand, the federal government has adopted a process to manage federal ventilator resources to ensure ventilators are shipped to the states in the amount needed to manage the immediate crisis.
 - At present, the federal government has 9,800 total ventilators available, which includes 9,054 in the Strategic National Stockpile and 900 available from the Department of Defense.
 - DOD will deliver 300 ventilators from its supply to New Jersey today, April 5.
- As of April 4, FEMA and HHS have delivered ventilators from the Strategic National Stockpile to Alaska (60), California (170), Connecticut (50), Florida (200), Georgia (150), Illinois (450), Louisiana (150), Maryland (120), Michigan (400), New Jersey (850), New York (4,400), Oregon (140) and Washington (500).
 - Additional allocations in process include a 250 bed Federal Medical Station, a Public Health strike team and an additional 300 ventilators for Michigan; a 50 bed Federal Medical Station for the Metro DC area; 30 ventilators for Guam; an additional 200 ventilators for Louisiana; an additional 200 ventilators to New Jersey; and 100 ventilators for Massachusetts.

- Forty states, four territories and 12 tribes have issued stay at home orders.

Iowa State Stock Piling

April 14, 2020 at 7:10 PM EDT

To: Holt, Brett, Troyer, James, Streuli, Nick (GOV)

Dear all:

Please see this post. The two companies mentioned in the link below are delivering Face shields quickly in Iowa State at a similar rate as ours. I hope we can do the same here in WA.

<https://businessrecordcovid19.com/2020/04/10/two-iowa-manufacturers-collaborate-to-supply-face-shields-to-hospitals-state/>

Thank you very much

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 27, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- On **April 26**, CDC and the Occupational Safety and Health Administration (OSHA) [released targeted guidance](#) to help meat and poultry processing facilities implement infection control practices to reduce the risk of transmission and illness from COVID-19 in these facilities.
 - Meat and poultry processing facilities present unique challenges for the prevention and control of COVID-19 transmission among workers.
 - Meat and poultry processing employers should implement a combination of

- engineering controls, cleaning and disinfection, social distancing, work practice controls, administrative controls, and use of personal protective equipment.
- Basic worker infection prevention information and training should be provided to all workers in a clear and accessible manner, including training on social distancing and ways to reduce the spread of infection. To ensure accessibility, multi-lingual materials should be considered and made available, as appropriate.
- FEMA, HHS and the Cybersecurity Infrastructure and Security Agency (CISA) along with other federal agencies are distributing cloth face coverings as part of a multi-prong approach to re-open American economic activity while continuing to limit spread of COVID-19.
 - As of **April 26**, 32.5 million cloth face coverings are being processed and distributed to state, local, tribal, private sector, and federal entities.
 - The facial coverings are being delivered in a phased approach for infrastructure workers, first responders and food producers who do not need medical-grade personal protective equipment (PPE) for their daily work. Distribution is based on CISA's analysis of priority infrastructure sectors.
 - The federal government will provide additional face coverings in production to states, territories and tribes for distribution, with priority to emergency services, food production and distribution, and other sectors that support community lifelines.
 - FEMA and HHS are also providing face coverings to federal departments and agencies with mission essential functions to promote health and safety in the workplace and in their execution of public-facing missions
 - As of **April 26**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 74.7 million N95 respirators, 104.8 million surgical masks, 7.2 million face shields, 15 million surgical gowns, 798 million gloves, 10,603 ventilators and 8,450 federal medical station beds.
 - The U.S. has now processed 5.2 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Vice President Pence spoke with the Nation's governors on **April 24**, reinforcing the partnership between the federal and state governments and the continued progress to expand and implement testing to be able to reopen safely and responsibly under the phased approach.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources.
- During the **April 24** White House Press Briefing, Food and Drug Administration (FDA) Commissioner Dr. Stephen Hahn announced that the FDA had [approved the first COVID-19 home collection test kit](#).

- The FDA continues to facilitate test development to ensure access to accurate diagnostics, working with over 350 test developers and authorizing 63 types of tests to date.
- On **April 24**, President Trump signed the [Paycheck Protection Program and Health Care Enhancement Act](#) to replenish the Small Business Administration's small business loan program while also providing crucial support for America's frontline medical workers.
 - The act provides \$320 billion in additional funding for the Paycheck Protection Program, along with \$75 billion for hospitals and healthcare providers to fight coronavirus and \$25 billion for ongoing testing across the country.
 - The [Paycheck Protection Program](#) processed nearly \$350 billion in loans to 1.6 million small businesses from funding provided in the CARES Act. More than 4,900 lending institutions participated in making these SBA-backed loans.
- As of **April 24**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 70.5 million N95 respirators, 104.5 million surgical masks, 7 million face shields, 14.8 million surgical gowns, 779.1 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
- The U.S. has now processed 5.1 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.

Acting_Secretary_Chad_Wolf_Statement_on_the_REAL_ID_Enforcement_Deadline

March 26, 2020 at 11:21 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Acting Secretary Chad Wolf Statement on the REAL ID Enforcement Deadline

“Due to circumstances resulting from the COVID-19 pandemic and the national emergency declaration, the Department of Homeland Security, as directed by President Donald J. Trump, is extending the REAL ID enforcement deadline beyond the current October 1, 2020 deadline. I have determined that states require a twelve-month delay and that the new deadline for REAL ID enforcement is October 1, 2021. DHS will publish a notice of the new deadline in the Federal Register in the coming days.

“The federal, state and local response to the spread of the Coronavirus here in the United States necessitates a delay in this deadline. Our state and local partners are working tirelessly with the Administration to flatten the curve and, therefore, we want to remove any impediments to response and recovery efforts. States across the country are temporarily closing or restricting access to DMVs. This action will preclude millions of people from applying for and receiving their REAL ID. Extending the deadline will also allow the Department to work with Congress to implement needed changes to expedite the issuance of REAL IDs once the current health crisis concludes.

“Protecting both the health and national security of the American people continues to be the top priority for the President of the United States and the Department of Homeland Security.”

Fact Sheet: DHS Measures on the Border to Limit the Further Spread of Coronavirus

March 23, 2020 at 12:23 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Release Date:

March 23, 2020

<https://www.dhs.gov/news/2020/03/23/fact-sheet-dhs-measures-border-limit-further-spread-coronavirus>

In order to limit the further spread of coronavirus, the U.S. has reached agreements with both Canada and Mexico to limit all non-essential travel across borders. Working closely and collaboratively, the Department of Homeland Security is part of a North American approach to stop the spread of the virus.

Additionally, CBP will no longer detain illegal immigrants in our holding facilities and will immediately return these aliens to the country they entered from – Canada or Mexico. Where such a return is not possible, CBP will return these aliens to their country of origin.

These measures will be implemented on March 21, 2020 and will be in place for 30 days, at which point they will be reviewed by both parties.

The U.S., Mexican, and Canadian governments are taking necessary action to fight against this pandemic together.

Northern Border

- March 20, 2020: [Joint Statement on US-Canada Joint Initiative: Temporary Restriction of Traveler Crossing the US-Canada Land Border for Non-Essential Purposes](#)

The US-Canada land border serves as an economic engine that supports over \$1.7 billion (USD) dollars daily cross-border trade. As a result of the COVID-19 pandemic, the United States and Canada are temporarily restricting all non-essential travel across its borders. In each of our countries, we are encouraging people exercise caution by avoiding unnecessary contact with others. This collaborative and reciprocal measure is an extension of that prudent approach.

“Non-essential” travel includes travel that is considered tourism or recreational in nature.

The United States and Canada recognize it is critical we preserve supply chains between both countries.

supply chains ensure that food, fuel, and life-saving medicines reach people on both sides of the border. Supply chains, including trucking, will not be impacted by this new measure. Americans and Canadians also cross the land border every day to do essential work or for other urgent or essential reasons, and that travel will not be impacted.

This decision will be implemented on March 21, 2020, at which time the US and Canada will temporarily restrict all non-essential travel across the US-Canada land border. The measure will be in place for 30 days, at which point it will be reviewed by both parties.

Southern Border

- March 20, 2020: [Joint Statement on US-Mexico Joint Initiative to Combat the COVID-19 Pandemic](#)

The strong partnership and close cooperation between the United States and Mexico has allowed us to maintain a productive border environment. We value the health and safety of our citizens and keep that at the forefront of joint decisions made by our respective leaders regarding cross-border operations.

Recognizing the robust trade relationship between the United States and Mexico, we agree our two countries' response to the ongoing global and regional health situation, require particular measures both to protect border trade and our countries' economies and ensure the health of our nations' citizens. We agree to the need for a dedicated joint effort to prevent spread of the COVID-19 virus and address the economic effects resulting from reduced mobility along our shared border.

The U.S. and Mexican governments further recognize critical services such as food, fuel, healthcare and life-saving medicines must reach people on both sides of the border every day. Essential travel must therefore continue unimpeded during this time. In order to ensure that essential travel can continue, the United States and Mexico are also temporarily restricting all non-essential travel across its borders.

"Non-essential" travel includes travel that is considered tourism or recreational in nature. Additionally, we are encouraging people to exercise caution by avoiding unnecessary contact with others.

This collaborative and reciprocal initiative is an extension of our nations' prudent approach that values the health and safety of our citizens in the joint decisions made by our respective leaders regarding cross-border operations.

This joint initiative will commence at 00:01 Saturday March 21 throughout the US-Mexico land border for a period of 30 days subject to extension upon review.

Detention Facilities

CBP is the first line of defense of our nation's borders. To help prevent the introduction of COVID-19 into

border facilities and into our country, aliens subject to the order will not be held in congregate areas for processing by CBP and instead will immediately be turned away from ports of entry.

Those encountered between ports of entry after illegally crossing the border similarly will not be held in congregate areas for processing and instead, to the maximum extent feasible, will immediately be returned to their country of last transit. These aliens are processed in stations designed for short-term processing, where distancing is not a viable option, creating a serious danger of an outbreak.

The Centers for Disease Control and Prevention (CDC) has determined that these conditions present a serious infection control challenge and are a risk to public health. Should an outbreak occur at these facilities, local medical facilities would be forced to devote extensive resources and may become overwhelmed.

This action will also protect the health of our country's dedicated border agents and other law enforcement personnel, who are vital to the security of our Nation.

Apprehension of illegal immigrants along both borders between POEs:

- *Migrants from Coronavirus Impacted Areas:* Since the beginning of the FY20 fiscal year in October through the end of February 2020 (over the period of October 1, 2019 to February 29, 2020), foreign nationals from 122 separate countries have been apprehended or denied entry (inadmissible) at the Southwest border, for a total of over 190,000 apprehended or inadmissible migrants from countries currently with confirmed COVID cases.
- *Size and Scale:* Every week, CBP apprehends between 7,000 – 9,000 individuals between ports of entry —the equivalent of 2.5 Diamond Princess cruise ships per week.
- *Human-to-human Spread:* The spread of coronavirus is exacerbated by human-to-human transmission and the need for detention. CBP law enforcement facilities are for short-term holding and do not provide for needed large-scale isolation, diagnosis, or treatment of such a novel disease.
- *CBP Facilities:* CBP facilities are not structured or equipped to effectively quarantine an infected population. CBP would be forced to rely on state and local hospitals to provide longer-term medical care for individuals who fall ill, further burdening our strained healthcare system and depriving American citizens of key medical resources.

Although CBP has policies and procedures in place to handle transmittable diseases, COVID-19 will impact already strained holding capacities and place an extreme burden on what is forecasted to be a stretched healthcare system and the nation's critical medical professionals who are needed to attend to U.S. citizens and legal residents.

Migrants should shelter-in-place in their homes and communities, rather than attempting a long and dangerous journey to the United States borders at the hands of traffickers and smugglers.

U.S. Citizens:

U.S. citizens, lawful permanent residents and certain other travelers are exempt from this action. They will receive the same processing, evaluation and potential CDC medical screening that all entrants undergo at Ports of Entry.

Authority:

Effective at March 21, 2020 at 12:00 a.m. EDT, CBP will, as authorized, implement CDC authority under U.S.C. § 265 to prohibit entry of certain persons into the United States. CBP will assist the Department of Health and Human Services' (HHS) and U.S. Centers for Disease Control and Prevention (CDC) to protect against the spread of the novel coronavirus (COVID-19) by implementing the emergency authorities under U.S.C. § 265 at the nation's land borders to prohibit the introduction of certain persons in the interest of public health.

Additional Information

“Essential travel,” which includes, but is not limited to—

- U.S. citizens and lawful permanent residents returning to the US;
- Individuals traveling for medical purposes (e.g., to receive medical treatment in the US);
- Individuals traveling to attend educational institutions;
- Individuals traveling to work in the United States (e.g., individuals working in the farming or agriculture industry who must travel between the US and Canada or the US and Mexico in furtherance of such work);
- Individuals traveling for emergency response and public health purposes (e.g., government officials or emergency responders entering the US to support Federal, state, local, tribal, or territorial government efforts to respond to COVID-19 or other emergencies);
- Individuals engaged in lawful cross-border trade (e.g., truck drivers supporting the movement of cargo between the US and Canada or the US and Mexico);
- Individuals engaged in official government travel or diplomatic travel;
- Members of the U.S. Armed Forces, and the spouses and children of members of the U.S. Armed Forces, returning to the US; and
- Individuals engaged in military-related travel or operations.

Coronavirus_(COVID-19)_Pandemic_Community-Based_Testing_Sites_Transition

April 10, 2020 at 8:48 AM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding information on Community-Based Testing Sites.

April 10, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic Community-Based Testing Sites Transition

The Department of Health and Human Services and the FEMA worked with state and local partners to establish Community-Based Testing Sites (CBTS) in CDC-prioritized locations across the country. The CBTS model was developed for states, local public health agencies, healthcare systems, and commercial partners as they work together to stop the spread of coronavirus (COVID-19) in their communities, focusing initially on healthcare facility workers and first responders.

The CBTS model has been a profound success, screening over 84,800 individuals; testing over 77,000 individuals; and having a COVID positive rate of approximately 20% - meaning that the CBTS are testing the right individuals at the right time. Since the onset, we have also led technological advances, such as the validation of nasal self-swabbing, which has minimized the need for trained health professionals and personal protective equipment.

As a result of these advances, many states have indicated that they want to fully transition the CBTS to state control, allowing more flexibility in testing and reporting. Many states have already begun transitioning these programs, and other states have implemented testing sites based on the CBTS model.

Therefore, the federal CBTS Task Force is working with states to clarify whether sites want to continue as they are now, or transition to full state control. Under state control, CBTS sites would still receive technical assistance from the federal government and be able to

request supplies through the normal FEMA systems.

The CBTS Task Force will continue to work closely with the states and FEMA Regions to ensure a successful transition and ensure that each state has the flexibility and autonomy to manage and operate testing sites within the needs of their specific community.

Transition Plan

The federal government will continue supporting each site through the transition process to ensure that the states can fully manage and operate their CBTS program independently. This includes providing each site with enough supplies to continue to operate for 7-14 days after the agreed upon transition date.

Potential advantages of a fully state-managed site include:

- The opportunity for the states to better serve their own communities, while leveraging federal support to augment their state's success.
- The potential to expand patient throughput to >250 per day, use a credentialed provider of their choice, and route patient samples to a lab of their choice.
- The ability to use a locally run call center or the regular state notification processes for public health results.

Responsibilities

The USPHS Commissioned Corps officers onsite (1-3 per location) will work with the site manager to plan for and complete the transition checklist and will verify that the site is ready for transition to the state. Once the sites are transitioned to the states, each state will be responsible for:

- Assuming responsibility for staffing their sites to ensure quality control, safety, biohazard waste management, and security;
- Assuming responsibility for the credentialed provider to order the labs;
- Procuring and managing their own cadre of supplies (e.g., personal protective equipment, test kits, etc.); requests for continued federal support should be made through the normal FEMA process;
- Contracting for lab testing; and
- Managing patient notification process for results, while maintaining patient privacy under the [Health Insurance Portability and Accountability Act of 1996 \(HIPAA\)](#).

After transition, states can choose to source testing kits and supplies through their standard ordering process or to request assistance from FEMA using the standard Resource Request Process through the appropriate FEMA Region.

Eligibility for Reimbursement under FEMA's Public Assistance Program

States may also seek reimbursement for eligible expenses associated with running their sites through FEMA's Public Assistance program. In general, activities local and state governments are conducting at CBTS are eligible for reimbursement under the Public Assistance program, subject to a cost share. Costs should be reasonable and necessary to address the public health needs of the event and all costs incurred should be documented. More information on what COVID-19 activities are eligible for reimbursement under the Public Assistance Program can be found in the [COVID-19 Pandemic: Eligible Emergency Protective Measures fact sheet](#) and the [COVID-19 Pandemic: Emergency Medical Care fact sheet](#). Information on how to apply is available in the [COVID-19 Pandemic: Public Assistance Simplified Application fact sheet](#). More information on contracting and procurement can be found in the [Procurement Under Grants: Under Exigent or Emergency Circumstances fact sheet](#).

FEMA_Coronavirus_(COVID-19)_Pandemic_Update_-_April_9,_2020

April 09, 2020 at 4:37 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 9, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points and a Reference Document for Messaging and Resource Links for the Whole-of-America response to coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- FEMA, HHS, and our federal partners work with state, local, tribal and territorial governments to execute a whole-of-America response to COVID-19 pandemic and protect the health and safety of the American people.
- FEMA Project Air Bridge expedites movement of critical supplies, in varying quantities, from the global market to medical distributors in various locations across the U.S.
 - As of April 8, 21 flights have landed, containing critical personal protective equipment (PPE): gloves, gowns, goggles, and masks.
 - Three flights are scheduled to arrive today, 1 in Chicago, 1 in New York City, and 1 in Dallas/Ft. Worth.
 - An additional 49 flights are scheduled over the next three weeks.
 - Overseas flights arrive at operational hub airports for distribution to hotspots and nationwide locations through regular supply chains. Flight arrivals do not

- mean supplies will be distributed in the operational hub locations.
 - FEMA is providing distributors with up-to-date information on the locations across the country hardest hit by COVID-19 or in most need of resources now and in the future.
 - Per agreements with distributors, 50 percent of supplies on each plane are for customers within the hotspot areas with most critical needs. The remaining 50 percent is fed into distributors' normal supply chain to their customers in other areas nationwide.
 - HHS and FEMA determine hotspot areas based on CDC data.
- Considering both scarcity of ventilators in the Strategic National Stockpile (SNS) and current capacity of the private sector to meet demand, the federal government has adopted a process to manage federal ventilator resources to ensure the right amount of ventilators are shipped to the to the right states to sustain life within a 72-hour window.
 - Emergency managers and public health officials submit requests for ventilators to FEMA/HHS, providing detailed data on:
 - Total medical/ hospital beds;
 - Total acute care (ICU) beds;
 - Normal occupancy;
 - Predicted surge occupancy; and
 - Number of ventilators available in your state
 - States can send requests outside of the 72-hour window for consideration by the federal government; allocation decisions and/or shipments, however, should not be expected until the state is within the immediate 72-hour window.
 - The federal government has 8,324 total ventilators available: 7,724 in the Strategic National Stockpile; 600 from the Department of Defense.
- On April 8, the Department of Health and Human Services announced the first contract for ventilator production rated under the Defense Production Act, to General Motors.
 - GM's contract, at a total contract price of \$489.4 million, is for 30,000 ventilators to be delivered to the Strategic National Stockpile by the end of August, with a production schedule allowing for the delivery of 6,132 ventilators by June 1.
 - On April 3, President Trump issued "Memorandum on Allocating Certain Scarce or Threatened Health and Medical Resources to Domestic Use" directing DHS and FEMA, in consultation with the HHS, to use the Defense Production Act to keep scarce medical resources within the United States for domestic use. CBP is assisting FEMA in temporarily detaining export shipments of PPE. PPE subject to this policy includes: N95 respirators, and a variety of other respirators; surgical masks; and, surgical gloves.
- On April 8, CDC issued additional guidance to help ensure critical infrastructure workers can perform their jobs safely after potential exposure to the virus.
 - The guidance covers essential health care workers who've been exposed to the coronavirus.
 - Essential workers can, under certain circumstances, go back to work, if they're

asymptomatic and take the recommended actions of taking their temperature before they go to work, wearing a face mask at all times, and practicing social distancing when they're at work.

Federal_Partners_Continue_Providing_Resources_for_COVID-19_Response_Efforts

March 25, 2020 at 12:56 PM EDT

To: jaime.smith@gov.wa.gov

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the whole government response to COVID-19.

March 25, 2020

FEMA Advisory

Federal Partners Continue Providing Resources for COVID-19 Response Efforts

The federal government continues to take aggressive and proactive steps to address the coronavirus (COVID-19) pandemic. The health and safety of the American people is our top priority.

We are halfway through [15 Days to Slow the Spread](#). Do your part to flatten the curve:

- Stay home as much as much as possible.
- If you need to go out, practice social distancing.

Under the direction of the White House Coronavirus Task Force, FEMA, HHS and our federal partners are working with state, local, tribal and territorial governments to execute a whole of government response to fight the COVID-19 pandemic and protect the public.

On March 22, President Trump directed the Secretary of Defense to allow the states of California, New York and Washington use of the National Guard in a Title 32 status to support state and local emergency assistance efforts. This allows the governors to activate the National Guard to support their disaster response efforts, on a fully reimbursable basis and under their respective command and control, if that becomes necessary. To date, more than 9,000 National Guard troops have activated to help with testing and other response efforts. Additional states can request this assistance and those requests will be considered.

On March 13, 2020, President Trump declared a nationwide emergency pursuant to Sec. 501(b) of Stafford Act. The President's action cuts red tape and bureaucracy and avoids governors needing to request individual emergency declarations. In addition, the states of New York, Washington, California, Iowa and Louisiana were approved for major disaster declarations to assist with additional needs identified in these states.

11 states and 4 tribes have issued full stay-at-home orders; in addition, 5 states have issued partial or localized orders.

Medical supplies are en route to states, including respirators, surgical masks and gowns, face shields, coveralls and gloves, with quantities already delivered to Washington, New York and California. We anticipate additional supplies will be delivered within the next 24 hours. The U.S. Navy hospital ship Mercy is en route to Los Angeles to provide additional hospital beds and medical staff and is expected to arrive by March 27. The U.S. Navy hospital ship Comfort is scheduled to arrive in New York on April 7. FEMA issued a \$350 million Mission Assignment to the U.S. Army Corps of Engineers for construction of alternate care facilities in New York. Four sites have been selected.

Please see attached for updated information on the federal response efforts, Community Based Testing Sites (CBTS), Ventilator Guidance, Defense Production Act, Disinformation and Rumor Control, How to Help for volunteers and the private sector, and information on the Strategic National Stockpile.

U.S. DEPARTMENT OF HOMELAND SECURITY

Intergovernmental Affairs

Please see the advisory below from our partners in the Federal Emergency Management Agency (FEMA) regarding an update on the Whole-of-America response to COVID-19.

April 24, 2020

FEMA Advisory

Coronavirus (COVID-19) Pandemic: Whole-of-America Response

Attached you will find today's FEMA Daily Briefing Points for the Whole-of-America response to the coronavirus (COVID-19) pandemic. These briefing points include Topline Messages, as well as Supply Chain Task Force; By the Numbers; FEMA and Department of Health and Human Services Response; and Guidance from Federal Agencies.

Topline messaging includes:

- On **April 16**, President Trump released [Guidelines for Opening Up America Again](#), providing a plan for rolling back social distancing measures and reopening the country's economy in several phases, depending on location.
 - Under the guidelines, states will need to meet six metrics that include demonstrating a downward trajectory of COVID-19 cases over a 14-day period and a robust system for testing health care workers before they can proceed to a phased opening.
 - The federal government will continue to work with governors across the country to ensure they have the equipment, supplies and testing resources to reopen safely and responsibly.
- On **April 22**, HHS launched [Telehealth.hhs.gov](#). The site is a central source of information on telehealth resources and tools for patients and providers.
 - In his blog post "[Health Providers: Join the Telehealth Revolution](#)," the Surgeon General of the United States, Vice Admiral Jerome M. Adams M.D.,

- M.P.H., outlines the benefits of using telemedicine tools.
- Working from the safety of home, these tools allow clinicians to perform virtual visits, refill and adjust essential medications, and modify treatments that will preserve and improve conditions that if left untreated, put patients at risk.
- As of **April 23**, FEMA, HHS, and the private sector combined have coordinated the delivery of or are currently shipping: 66.9 million N95 respirators, 105 million surgical masks, 6.7 million face shields, 14.9 million surgical gowns, 747 million gloves, 10,563 ventilators and 8,450 federal medical station beds.
 - FEMA continues to expedite movement of commercially pre-sourced and commercially procured critical supplies from the global market to medical distributors in various locations across the U.S. through [Project Airbridge](#).
 - The U.S. has now processed 4.9 million samples, which is more total tests than the following nations combined: Australia, Austria, Canada, France, India, Japan, Singapore, Sweden, South Korea, and the United Kingdom.
 - States should be making full use of the testing resources available to them, to include leveraging the full capacity available through commercial laboratories in addition to the capability provided through state laboratories.
 - HHS and FEMA have expanded items supplied by the [International Reagent Resource \(IRR\)](#) to help public health labs access free diagnostics supplies and reagents.
 - On **April 16**, the FDA [announced an expansion of testing options](#) through use of synthetic swabs – with a design similar to Q-tips – to test patients by collecting a sample from the front of the nose.

Good Afternoon, All –

We have set the Policy Group meetings as recurrent, every morning at 8:00am, at the Fire Training Center Auditorium, *unless notified of a change* .

The Zoom meeting link is also now recurrent, so you only need to register on this link one time. If you were on Zoom for the Sunday, 22-March meeting you are registered on the link. If not, the link will take you to the registration page first.

Register in advance for this meeting:

[HYPERLINK "https://zoom.us/meeting/register/uZYscu2oqj8p7-0CS4IA-B8G3bJ995DxsA"](https://zoom.us/meeting/register/uZYscu2oqj8p7-0CS4IA-B8G3bJ995DxsA)

U.S. DEPARTMENT OF HOMELAND SECURITY

Office of Public Affairs

Joint DHS/EOIR Statement on MPP Rescheduling

Due to circumstances resulting from COVID-19, all Migrant Protection Protocol (MPP) master calendar and merit hearings presently scheduled through April 22 will be rescheduled. Neither the MPP program nor any hearings will be cancelled.

Any individual with an MPP hearing date through April 22 should present themselves at their designated port of entry on their previously scheduled date to receive a tear sheet and hearing notice containing their new hearing dates. DHS and EOIR are deeply committed to ensuring that individuals ‘have their day in court’ while also ensuring the health and safety of aliens, our frontline officers, immigration court professionals, and our citizens.

Bickford, Nancy (MIL)

RE: Tribal Access to Emergency Funds

March 19, 2020 at 12:10 PM EDT

To: Streuli, Nick (GOV), Bill, Craig (GOIA)

Cc: McClain, Stacey (MIL), Ike, Ryan

Dear Nick and Craig,

No the President's emergency declaration did not release a funding.

There is a difference between an emergency declaration and a major Presidential Disaster Declaration in that an emergency declaration only allows federal agencies to assist states.

None of the states have a major presidential disaster declaration yet or tribes.

The tribes know that as sovereign as a sovereign entity they can both request a major Presidential Disaster Declaration and be included in the state's request.

Our Washington State tribes are included in the state's request for a major Presidential Disaster Declaration and they can apply on their own for this status.

The tribes in our state have extensive contact with FEMA Region X's Tribal Affairs team and know about major Presidential Disaster Declaration request processes and how to request.

Note that this is not funding released that can be applied for that was your question.

Within designation of a major Presidential Disaster Declaration there are two possible components which are Public Assistance (damage to public facilities) [https://www.fema.gov/media-library-data/1572028370885-e5aabd18bf3145151a89919f82500613/PublicAssistanceFactSheetJune2017_Updated_Oct2019\(FINAL\).pdf](https://www.fema.gov/media-library-data/1572028370885-e5aabd18bf3145151a89919f82500613/PublicAssistanceFactSheetJune2017_Updated_Oct2019(FINAL).pdf) and <https://www.fema.gov/public-assistance-local-state-tribal-and-non-profit> Individual Assistance (IA) <https://www.fema.gov/media-library/resources-documents/collections/382> that if the damage assessments show the threshold of damage to public facilities and concentrated impact potentially result in funding.

I have cc'd FEMA and Ryan if I have miss-spoke please feel free to add anything.

Craig Bill is the Director of our Governor's Office of Indian Affairs and connects to all of our federally recognized tribes.k

Sincerely,

Nancy

Subject: RE: Tribal Access to Emergency Funds

I'm sorry, Nancy. I'm struggling to follow, is there a funding opportunity available to the Tribes as a result of the emergency declaration? If so, can we get details on the application process to share?

Thank you.

Importance: High

My update still holds but is the GOIA tribal directory up to date. All tribes listed in it correct?

Nancy and Craig – connecting you.

Nancy, on a call with Tribal Leaders earlier today they mentioned that the President's emergency declaration released money for Tribes to request from the National Guard. Do you know anything and can you help Craig and I pull together the application process for Tribes to access the funds?

Thank you.

Subject: Fwd: Stay Home Messaging

Hey Jaime. See contact info below from Gov Brown's team. Please let us know if there is anything more we can do. We will certainly help get the word out to the broadest audience. I can also add staff to help on campaign development if that's beneficial.

Ryan,

I spoke with Chris Pair, he's the contact given to me that is working with Gov. Brown and Mayor Wheeler on *Stay Home, Stay Healthy*, included in this email. Telephone is 305-304-7220.

Let me know if there are any questions.
