EXTERNAL SENDER: Use caution with links and attachments.

Hello Rebekah

Thank you for the discussion this morning.

Typically any charter-flight is priced on two factors; how many people and how far are they going.

Here are several examples:

4 to 8 x people going from Crestview to Boston area is approx \$35,000.00

4 to 8 x people going from Crestview to Los Angeles area is approx \$60,000.00

This is based on using a 8 x seat KingAir 350 Turbo Prop.

If you need to move more than 8 x people I would recommend using a mid-sized biz jet that can accommodate up-to 12 people.

8 to 12 x people going from Crestview to Boston area is approx \$55,000.00

8 to 12 x people going from Crestview to Los Angeles area is approx \$90,000.00

We are certainly willing to provide you with pricing information on specific ad-hoc requirements on a case by case basis.

I do hope this information is useful, and I am available to answer any questions, or provide further information as required.

Sincerely

v/r

A dark, atmospheric photograph of an aircraft cockpit. The image is dimly lit, with the primary light source coming from the instrument panels and screens, which glow with various colors like blue, green, and orange. A pilot is visible in the background, seated at the controls, their form partially obscured by the shadows. The cockpit is filled with numerous buttons, switches, and digital displays. The overall mood is serious and focused, emphasizing the complexity and precision of flight operations.

**No matter which type of aircraft
you're flying on, Wheels Up leads
with a **safety-first** mentality.**

World-Class Safety Standards

An unrivaled commitment to safety with standards that far exceed FAA minimum requirements.

Aircraft

The Wheels Up fleet includes owned, managed, and partner aircraft, all of which are operated under stringent Wheels Up standards for safety and maintenance. Every aircraft that a Wheels Up customer flies on undergoes a rigorous assessment and approval process performed by our dedicated in-house safety team and vetted partners, who specialize in aircraft maintenance, safety systems and technology, and FAA regulations.

Maintenance

Our team conducts audits to check aircraft age and ensure that planes pass all condition requirements.

Systems & Technology

The aircraft feature sophisticated safety systems and technology for communications, navigation, evaluation of weather conditions, route-planning, collision avoidance, ground proximity warnings, and other functions. Our team inspects the equipment on aircraft to confirm that they meet our strict requirements.

Pilots

Every Wheels Up flight is conducted by 2 pilots who are among the best in the industry, ensuring that you can travel with the utmost peace of mind.

Experience & Qualifications

Captains average 7,000+ flight hours, while First Officers average 4,000+ hours. Each pilot is required to hold an FAA Airline Transport Pilot (Highest level of aircraft Pilot certificate) and First-Class Medical Certificates as well as an FAA Pilot-in-Command Type-Rating in the aircraft they fly.

Training

Pilots complete mandatory advanced ground and flight training in a full-motion simulator, plus recurrent training. They are given comprehensive instruction in first aid, emergency drills, and survival techniques by highly qualified industry leading instructors. Each fly with an experienced Standards Captain post-training; Pilots-in-Command receive an extra FAA check ride.

Safe Passage™ Protocols

Safe Passage is a comprehensive health and safety program for Wheels Up Employees, Pilots, Members, and Customers, with expanded guidelines in response to COVID-19 and today's ongoing public health concerns.

Developed by the Wheels Up Safety and Operations leadership teams, the program will continue to evolve as new technology and innovations develop and in accordance with new medical and governmental guidelines.

Our Aircraft

Air Flow

The pressurization system on Wheels Up aircraft fully replenishes the cabin air with fresh outside air approximately every three minutes during flight so a HEPA filter is not needed since the air is not recycled or recirculated.

Anti-Microbial Shield

All Wheels Up aircraft are treated every 90 days at minimum with ClearCabin, an odorless and colorless solution that is professionally applied throughout the interior of the aircraft. ClearCabin works across a broad spectrum of bacteria and viruses like COVID-19.

Immediate Response

If anyone on board shows signs of illness, the aircraft will immediately undergo a deep cleaning and disinfecting procedure.

Additional Sanitizers

Between flights, all seats and interior surfaces of the aircraft are treated with a disinfectant-grade product that is EPA-approved for use against COVID-19 to sanitize and clean all touchpoint areas in the plane.

Social Aviation™ that allows you to
fly private at a fraction of the cost.

Hot Flights & Shuttle Flights

Countless opportunities every day to fly private for less.

Hot Flights

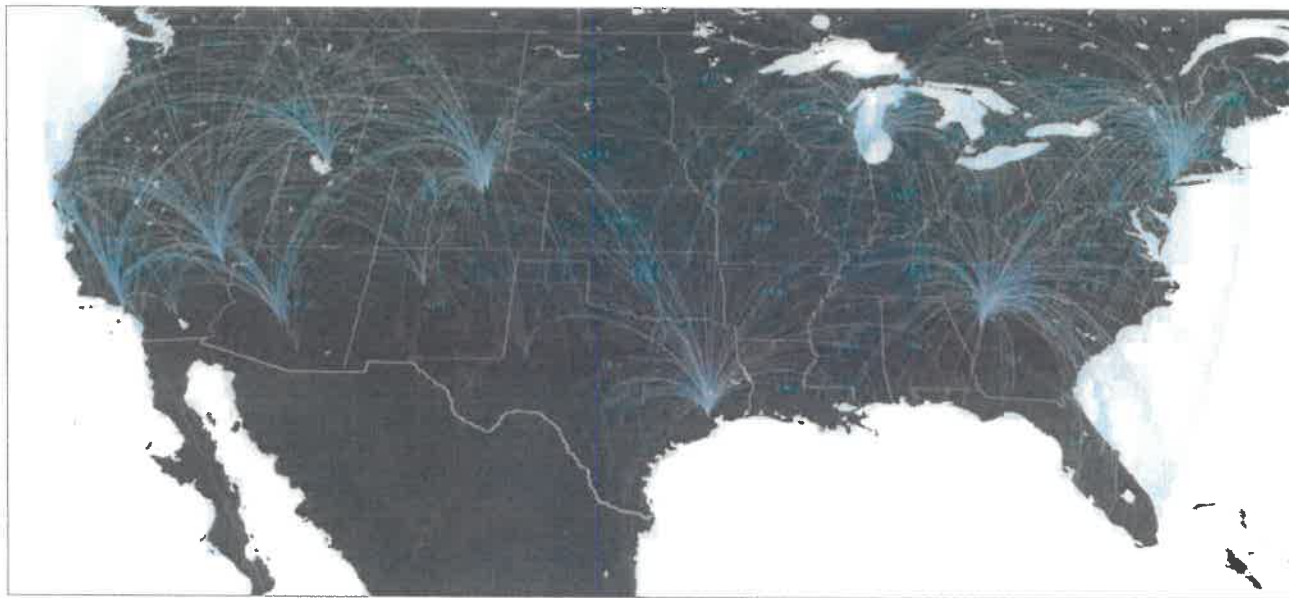

Fly on the fly

With Hot Flights, you can receive alerts about or search from a vast number of one-way, empty-leg flights on jets, turboprops, and helicopters that are posted daily to the Wheels Up App for as little as \$320 for the entire aircraft.

Shuttle Flights

Fly by the seat

Offered in certain markets during select months, Shuttle Flights allow members to book by the seat on scheduled private shuttles to and from popular destinations and events. Flight routes will be communicated as they become available.

All Wheels Up flights are operated by our DOT/FAA-authorized air carrier subsidiaries (Wheels Up Private Jets LLC, Gama Aviation LLC, Mountain Aviation LLC, Sterling Aviation LLC, and TWC Aviation LLC) or by an approved vendor air carrier that has undergone our safety assessment. For on-demand flights and shuttle flights operated as scheduled service, Wheels Up acts solely as an agent for Wheels Up members and guests in arranging these flights on their behalf. For shuttle flights operated as Public Charter service, Wheels Up acts as principal in offering these flights subject to the DOT's Public Charter rules contained in 14 CFR Part 380. Wheels Up share flights are member assembled. Wheels Up does not play a role in determining who participates in each shared flight, the points of departure, the date or time of a flight or the manner in which the cost is shared amongst passengers. All aircraft owned or operated by Wheels Up are leased to the operating air carrier and are operated exclusively by that air carrier.

Shared Flights

Three unique ways to take to the skies together and reduce your cost of flying by 50% or more. With over 10,000 members nationwide, your opportunities to fly private for less are endless.

Propose a Flight

When you don't need to fill every seat on your plane and you want to reduce your flight cost, propose your flight for sharing. This makes it available on the Shared Flights Board for over 10,000 members to view and join only with your permission.

Join a Flight

When your travel plans are flexible and you're looking to cut your cost, search the currently available flights on the Shared Flights Board and contact the proposing member to organize a Shared Flight and discuss how to split the cost.

Coordinate a Flight

The Community, our members-only digital platform with discussion forums, makes it easy for you to join chats or start your own, in order to facilitate Shared Flights to and from popular cities, colleges, universities, sporting events, concerts, and more.

All Wheels Up flights are operated by our DOT/FAA-authorized air carrier subsidiaries (Wheels Up Private Jets LLC, Gamma Aviation LLC, Mountain Aviation LLC, Sterling Aviation LLC, and TWC Aviation LLC) or by an approved vendor air carrier that is undergoing our safety assessment. For shuttle flights operated as Public Charter service, Wheels Up acts as principal in offering these flights subject to the DOT's Public Charter rules contained in 14 CFR Part 380.
