Thanks Patti.

I'm going to work on this today.

John

On Thu, Dec 15, 2016 at 4:24 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

Dear John,

I am emailing to request an emergency destruction authorization for the deteriorating 16mm motion picture film from the Space Shuttle program that has already been digitized at the Johnson Space Center of which Dan Rooney first apprised you in an August 10 email.

Specific information you had requested regarding the collection is as follows:

- Detailed description of the Records to be destroyed

- 16MM Film containing Space Shuttle Imagery that have been digitized and transferred onto LTO 4/5 data tapes.
- Current location of the records
- NASA/JSC
- Volume: 138 cubit feet
- Nature of the "menace"
- Deterioration of the 16 MM film due to vinegar syndrome and the subsequent odor the film is emitting.
- Disposition: NRRS 8/101 Program/Project Records
- NASA's initial actions to isolate or protect other records from deterioration or damage.
- The 16MM film was kept in a freezer until it was digitized onto LTO 4/5 data tapes located at JSC. It is now retained with paper records away from other special media.
- There is no continuing threat to other records, but there is no reason to retain these deteriorating tapes, nor does the Archives desire them.
-

Thank you.

Good Morning Patti,

I am sorry this information did not get to you when you originally requested assistance in December. Please see 36 CFR 1229.10 below. It's outdated a bit but our procedure is that you send a letter to the Chief Records Officer, Laurence Brewer, requesting that the records can be destroyed (follow the steps in the CFR in the info you provide), and we will then in turn will send you a letter authorizing the destruction. The process protects NASA and I advise that you do it via letter instead of email to Laurence.

John will keep you posted on the progress. We will try to rush this as soon as we receive your letter since you were not provided with the right guidance at the time of your original request.

Hi Kristy,

I've heard back from Dan Rooney of our Motion Picture unit and he has some follow-up questions regarding your request. Please see his major points below:

From Dan Rooney:

Regarding the first request listed here for the Shuttle 16 mm motion film, we understand that the materials have all been digitized, and we knew that NASA engaged in the digitization activity for many years and they consulted us on the file formats (.DPX) and other technical questions. However, the output of their film digitization project is currently stored on

many LTO 4/5 data tapes (actual number of which is in question and I think we need a clear answer on). NASA has offered the data tapes to NARA on a TR, however, we have not approved it because:

- A) we do not yet know whether we can read these tapes or not
- B) the volume of the data contained on these tapes is such that NARA has no effective way to migrate it and store it

During a conference call last fall, we asked for samples of the tapes so that we could at least test to see whether we could read them, but we never received any samples to my knowledge. To add a third problem, or C category, LTO 4/5 tapes are already potentially becoming obsolete. So, NARA would need a clear strategy as to how we would migrate the data off of the tapes and where we would store it, and we would have to commit to doing it relatively quickly before the hardware and software to do so becomes even more expensive.

Regarding the second request, I have fewer concerns about the 56 track audio tape, but I should add a few points, as follows:

A) NARA already has accessioned many similar 56 track audio tapes from STS missions. What of their fate? If we allow disposal of all of these tapes not yet accessioned because they've been digitized, should we consider whether or not the NARA tapes should be included as well in this request?

B) Have all tapes from all STS missions been digitized, and is that what this request refers to? Years ago there was a selection criteria agreed to between JSC and NARA (Waffen) as to which missions were the historically and technically significant ones to preserve the audio for, and my understanding was that only those are the ones that have been digitized at this point. I think we should get some confirmation on this, and make sure that if this is the case, that all parties are comfortable that this satisfies the appropriate records schedule requirements for permanent vs. temporary records.

I am hoping you can provide answers via email re these questions/concerns. It may be easier to set up a conference call to discuss these items further. If you agree, please send me some dates and times during the last half of March so we can move this along.

Thanks for help with this,

Kate

Wed, Mar 15, 2017 at 9:24 PM

Hey Kate,

Thanks for reaching out. The LTO problem is really more of a NARA problem than a NASA problem, that's why I wanted to discuss with you first.

I do think they can help us get answers to the # 2 request regarding the 56 track tapes.

Thanks, D

Hi Kristy -

Per our recent teleconference, is it still possible to get a sample of the LTO-4 data tapes proposed for transfer? We would like to do some testing on our end to see if the data is readable so we can continue to attempt to put solutions in place for this potential large digital transfer.

Can a tape or two be shipped to my attention?

Thanks!
Dan

Good Morning, Kristy,

Just a quick note to let you know that we've had some progress on reading the LTO-4 samples that you provided. We were able to read and transfer the contents onto external hard drives, and we are evaluating the individual video files now. It appears as though the contents of the tapes were packaged into TAR files, which required unpacking before transferring the actual files, adding fairly significantly to the total data migration time.

I wanted to try and get back to the question posed in our recent conference call about actual volume of tapes currently held by JSC for this particular collection.

In examining the attached inventory, the total number of rows is 26,601, which we are interpreting as the number of individual files stored on the tapes. Yes? If you filter the sheet for unique values in the "Data Tape" identifier (column A), you get 3,251 unique values. So, are we correct in assuming that the total number of LTO-4 tapes is 3,251? This is an important volume detail for us to be able to nail down.

Finally, LTO-4 tape typically has an uncompressed capacity of 800GB per tape, and roughly 1,600GB compressed. Can anyone speak to whether this compression was used, or are there reports showing actual volume of data stored on the tapes?

Thanks much,
Dan

Thanks so much ... one other question: is there anyone still at JSC who worked on this project to write the video and scanned film data to the LTO-4 data tapes that might know about that process or the particular software that was used to do so? I have some old notes suggesting that NASA was using Symantec NetBackup, but I don't know if this is accurate or not?

Hi Dan

I can answer the technical

The contents on the LTO4 tapes are all uncompressed and your right it is packaged into a tar command.

The motion picture film that's being transferred today is being stored on LTO6 packaged in LTFS commands also uncompressed

The LTO4 footage is 1080Psi @ 23.976 Fps 444 RGB

The LTO6 footage is 2k @ 23.976 Fps

444 RGB

Last year we decommissioned or telecine (nova) and purchased a newer scanner (laser graphics scan station)

-Chris

Hi Dan, et al,

For clarification, there were two areas that created LTO-4 tapes for Shuttle migration:

- 1) Chris' area (the FARM) which was responsible for migrating 16mm film content to LTO.
- 2) The Video Preservation Project (VPS) which was responsible for migrating content on obsolete tape formats (D2 and Betacam) to LTO. The technical folks who oversaw the VPS project have all moved on, but Chris may have some insight into the technical aspects of the VPS LTO tapes.

You may notice that there are two numbering systems for the LTOs on the spreadsheet. Most of the LTOs begin with a number 8. Those LTOs were created by the VPS project. The other LTO numbers begin with an L. Those are LTOs created by the FARM.

It was my understanding that some of the files on the VPS LTO tapes contain an additional line of data. I believe this was for on-orbit mission content. Files created by the VPS project are .mxf while files created by the FARM are .dpx.

All of the LTOs we would be sending you as part of the Shuttle migration would be LTO4. In looking at the numbers of the tapes we sent you as samples, it appears you have the VPS LTO tapes, but not FARM-created LTO tapes. If you want us to send you a sampling of those, we can certainly do that. Please let us know.

Thank you!

Hi Dan,

Per our conversation the other morning, I am attaching the 2 separate letters we just rec'd from Patti Stockman requesting authority to destroy deteriorated records. These records include audio tapes and 16mm film that has been copied on to a stable acceptable format.

Unless you have any objections, we plan to approve these requests. Please review these letters and let us know if you have any concerns. We'd like to wrap this up by the end of the week.

Thanks,
Kate

Wed, Mar 15, 2017 at 10:46 AM

Kate - Thanks for the call back this morning ... I was in late with another school delayed opening for my daughter. Let me try and lay out a couple of concerns:

Regarding the first request listed here for the Shuttle 16 mm motion film, we understand that the materials have all been digitized, and we knew that NASA engaged in the digitization activity for many years and they consulted us on the file formats (.DPX) and other technical questions. However, the output of their film digitization project is currently stored on many LTO 4/5 data tapes (actual number of which is in question and I think we need a clear answer on). NASA has offered the data tapes to NARA on a TR, however, we have not approved it because:

- A) we do not yet know whether we can read these tapes or not
- B) the volume of the data contained on these tapes is such that NARA has no effective way to migrate it and store it

During a conference call last fall, we asked for samples of the tapes so that we could at least test to see whether we could read them, but we never received any samples to my knowledge. To add a third problem, or C category, LTO 4/5 tapes are already potentially becoming obsolete. So, NARA would need a clear strategy as to how we would migrate the data off of the tapes and where we would store it, and we would have to commit to doing it relatively quickly before the hardware and software to do so becomes even more expensive.

Regarding the second request, I have fewer concerns about the 56 track audio tape, but I should add a few points, as follows:

A) NARA already has accessioned many similar 56 track audio tapes from STS missions. What of their fate? If we allow disposal of all of these tapes not yet accessioned because they've been digitized, should we consider whether or not the NARA tapes should be included as well in this request?

B) Have all tapes from all STS missions been digitized, and is that what this request refers to? Years ago there was a selection criteria agreed to between JSC and NARA (Waffen) as to which missions were the historically and technically significant ones to preserve the audio for, and my understanding was that only those are the ones that have been digitized at this point. I think we should get some confirmation on this, and make sure that if this is the case, that all parties are comfortable that this satisfies the appropriate records schedule requirements for permanent vs. temporary records.

As a sidebar, I know that some of the 56 track tapes in NARA's custody were loaned back to JSC several years ago to support their digitization and preservation efforts, but I have never seen the results of any of that, so I am unclear which missions actually exist in digital form at this point. On the plus side, I anticipate this would still be a large digital volume, but yet much more manageable than the video content. So, we'd probably be able to commit to accessioning the digital volume sooner in order to ensure that the record copy is now appropriately with NARA.

I know these are complicated issues/questions. So, I am free to discuss when you have time.

Thanks, Dan

Summary of NASA meeting re requests for destruction

1 message

Kate Flaherty <kate.flaherty@nara.gov>
To: "Hulmston, John" <john.hulmston@nara.gov>

Wed, Mar 29, 2017 at 9:52 AM

Hi John,

Below is a summary of the meeting that took place on 3/28 re the NASA requests for destruction.

Dan Rooney from Motion attended and has no concerns about these records being destroyed as they have been transferred to acceptable media and will be transferred to NARA soon.

Summary:

On Tuesday, March 28, 2017, Kate Flaherty, Supervisor for Appraisal Team 3 and Dan Rooney, Chief of the Motion Picture, Sound and Video unit at NARA met with the NASA Records Officer, Patti Stockman, NASA headquarters records management assistant Thomas Breigner, and Johnson Space Center staff Kristi Medina and Mark Scroggins regarding 2 recent requests from NASA for the emergency destruction of deteriorated 16mm Shuttle program related film and 56 track format reel to reel audio tapes.

The audio tapes have been migrated to wave file format and the 16mm film has been transferred on to Linear Tape Open (LTO) 4/5 data tapes.

The 56 track format is now obsolete and the 16mm film has form of decay known as "vinegar syndrome." This is a form of acetate film base degradation. Its causes are inherent in the chemical nature of the plastic and its progress very much depends on storage conditions.

Dan Rooney had a lengthy discussion with the Johnson Space Center staff about where the remaining film is stored and when it will be transferred to NARA. Dan is in contact with them re upcoming transfers and is in agreement with Kate Flaherty that the deteriorated film and the unreadable audio tapes should be destroyed since the content has been copied on to acceptable formats and will be transferred to NARA soon. Dan is working separately with NASA to facilitate transfers of this material.

Please prepare one letter that responds to BOTH requests from NASA. Be sure to use the SOPs for correspondence and the training material provided by Jessica to prepare your letter.

Kate

Margaret Hawkins <margaret.hawkins@nara.gov>
To: Kate Flaherty <kate.flaherty@nara.gov>

Fri, Jun 2, 2017 at 7:19 AM

Emergency disposal actions aren't used for obsolete formats. Emergency really means emergency.

This is essentially a re-scheduling effort, having the one be permanent and the original be temporary.

There is NO way we would send this to the Archivist, especially with Patti's statement "There is no emergency!"

[Quoted text hidden]

Kate Flaherty <kate.flaherty@nara.gov>
To: Margaret Hawkins <margaret.hawkins@nara.gov>

Fri, Jun 2, 2017 at 7:29 AM

Patti was trying to down play it, but the records are deteriorated and causing a problem in their facilities. (b) (5)

We can just let her know that a notification (or new schedule) can work at this point to make the digital versions the record keeping copy. I will double check to see if they have completed all of the migration.

We'll get in touch with Patti and start the notification. She doesn't like to do these cause she says their schedules state the records are media neutral and they should be able to transfer whatever format. we'll give her the choice.

[Quoted text hidden]

Margaret Hawkins <margaret.hawkins@nara.gov>
To: Kate Flaherty <kate.flaherty@nara.gov>

Fri, Jun 2, 2017 at 7:47 AM

I would look closely at the schedule and the media neutral regs and see which would apply. Or, maybe Dan thinks the media neutrality as written in the schedule is "good enough."

Deterioration isn't alone cause for emergency destruction. It has to pose a "menace" through mold or danger of catching on fire like with nitrate. Simple deterioration isn't sufficient. And preservation has to render a report. It doesn't just go to the Archivist. They often require samples and have often required remediation.

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I

believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital verions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~ **Now TR-0255-2018-0260**

[Submitted to NASA](#) to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-incide with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

Subject: Noification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to

declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.
Patti

Subject: Re: TR-0255-2016-0519 Submitted for NARA approval

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

On Tue, Aug 28, 2018 at 7:03 AM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

Hi John - I have in my notes that we discussed this in January and February. Any progress on these requests from NASA - JSC?

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital versions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~ **Now TR-0255-2018-0260**

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Subject: Re: No notification form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Cc: Flaherty, Kate <kate.flaherty@nara.gov>
Subject: Noificaon form in relaon to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

Subject: Re: No ficalion form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed perm were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

There were 2 emergency disposals that we were working with NARA. One was for the JSC History Collection (paper) and the other for the 16 mm film. The attached email is the last I have for the film.

I'll send what I have on the JSC History Collection in a separate email

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital verions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~ **Now TR-0255-2018-0260**

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for

disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

Subject: Noification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Subject: Re: No final notification form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.

Subject: Re: TR-0255-2016-0519 Submitted for NARA approval

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

On Tue, Aug 28, 2018 at 7:03 AM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

On Thu, Apr 19, 2018 at 1:15 PM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi John - I have in my notes that we discussed this in January and February. Any progress on these requests from NASA - JSC?

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital versions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.
Now TR-0255-2018-0260

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

Subject: No notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

On Tue, Aug 28, 2018 at 7:03 AM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital verions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~
Now TR-0255-2018-0260

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

To: Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov>
Subject: Re: No fical form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Cc: Flaherty, Kate <kate.flaherty@nara.gov>

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would

appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

Subject: Re: No notification form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not coincide with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with

John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

National Aeronautics and Space Administration Report on Suspected Removal/Destruction of NASA Records

Description of potentially involved records

The situation involves 325 magnetic (mag) data tape reels believed to have been of NASA's Goddard Space Flight Center (GSFC) origin. Appraised by the GSFC Archivist, each data tape reel measured 14" in diameter with a magnetic tape dimension of 1/2" on a metal reel. The tapes were in poor condition with almost all of them affected by moderate to severe mold, posing a potential health risk. Most of the tapes were not labeled and, of those that were, the labels revealed that the content appeared to have been space science related with missions including Pioneer and Helios with an inclusive date range of 1967-1974.

A final assessment of the tapes by the GSFC Archivist on April 13, 2016 enabled a further breakdown of the content of the tapes into the following:

PN8 [Pioneer 8]: 1 reel

PN9 [Pioneer 9]: 2 reel

PN10 [Pioneer 10]: 40 reels

PN11 [Pioneer 11]: 53 reels

HELI [or] *HEL-A* [Helios 1]: 10 reels

HESA [possibly an abbreviation for Helios A]: 2 reels

Intelsat IV: 2 reels

Unlabeled or labeled without mission-related identifying information: approximately 215 reels.

The archivist consulted with personnel from the NASA Space Science Data Center (NSSDC) and Earth Science Data and Information Systems (ESDIS) project, both experienced with science data on early mag-data tape media. They advised that mag tapes were often "scratched" to prepare them for re-use. Therefore, it is very probable that at least the unlabeled tapes were blank.

Because of the condition of the tapes, reading any of their content would have required a very costly recovery process that the tapes may not have survived and which may have put at risk the health of anyone attempting the recovery. However, the NSSDC and ESDIS personnel consulted with colleague scientists in their fields at both Goddard and NASA's Jet Propulsion Laboratory (JPL) in Pasadena, CA, resulting in their determination that it is doubtful the tapes contained any historically significant data, if any data at all.

The scientists, the GSFC Archivist, and the NASA Records Officer all agree that, if the tapes contained any data constituting records, they would have been temporary records under NASA's current records retention schedules (NRRS) 8/103 (disposition authority N1-255-10-4) which permits destruction between 0 and 30 years after the close of the program or project producing them. Since the last date identified on the tape reels was 1974, any records on them would have far exceeded their retention.

Office of responsibility

September 28, 2017

Labels on some of the tapes identified GSFC and plates on two large computers bore NASA GSFC markings (from IBM Alleghany Center, in Pittsburg, PA). Apparently, the computers and tapes had come from the IBM Center. Responsible NASA offices would have been Pioneer, Helios, and Intelsat project offices.

Circumstances surrounding the incident

The tapes (and computers) were discovered on November 14, 2015 in a residential basement in Pittsburgh, Pennsylvania, in the home of deceased man. The deceased man's daughter had arranged for an acquaintance whom she knew to scrap the metal materials from the home. The scrap metal acquaintance contacted the NASA Office of Inspector General (OIG) upon seeing that the computers had NASA Goddard contract numbers.

The OIG investigation interviews with the acquaintance indicated that the deceased man had received the computers involved in this case directly from IBM, which was disposing of them, sometime between the years of 1968-1972. Based on the OIG report, it is unclear whether the deceased man received the magnetic tape reels during this transaction. However, there is nothing in the report to indicate he would have received them at some other time. Therefore, based on the dates on the tapes, it is likely that the interviewee's recollection is incorrect and that the transaction occurred sometime in 1974 or later.

Safeguards established to prevent further loss of documentation

Today, NASA owned IT assets are managed by our property offices, tagged and managed IAW NPR 4200.0, NASA Equipment Management Procedural Requirements. But the majority of IT is managed by the NASA Agency Consolidated End-user Services (ACES) contractor and captured before users depart. But the management of the media containing data and the information or data contained on the media is the responsibility of the owner.

In terms of records, they are managed in accordance with NPR 1441.1, NASA Records Management Program Requirements, as well as at Goddard in accordance GPR 1440, Records Management, and with NRRS 1441, NASA Records Retention Schedules. NPR 1441.1 prohibits the removal of records from the Agency except in the course of official business or scheduled records disposition.

The NPR 1441.1 requires that Center Records Managers ensure that records clearance processes for all outgoing NASA personnel that provides for proper transition of any records custody and prevention of unauthorized removal of Federal records. Center Records Managers are required to report any unlawful damage, destruction, or removal of records immediately to the NASA Records Officer with initial notification of the incident with as much detail as is known so the Records Officer may report to NARA in accordance with 36 CFR 1230.14.

Actions taken to salvage, retrieve, or reconstruct the records

No actions were taken to attempt to retrieve the data because, as stated above, the condition of the tapes would have risked their destruction and the health of anyone attempting to conduct the process. Additional considerations were: (1) the process would have been quite costly, and (2) it

September 28, 2017

was felt that any data constituting records that might remain on the tapes would have long ago exceeded their retention. Therefore, the slim possibility of data retrieval was not worth the cost and risks.

patti.stockman@nasa.gov

Dear Patti:

This letter is to notify you that, in accordance with 36 CFR, Part 1229.10, the Chief Records Officer for the U.S. Government has approved your request for emergency destruction of 138 cubic feet of deteriorating 16mm motion picture film from the Space Shuttle program and 254 standard boxes of 56 track format reel to reel audio tapes located at the NASA /Johnson Space Center, the Washington National Records Center, and the Federal Records Center in Fort Worth, Texas. These records are severely damaged and exhibiting vinegar syndrome.

According to your letters regarding these records, we understand that the audio tapes have been migrated to wave file format and the 16mm film has been transferred to Linear Tape Open data tapes.

In their current state, the analog versions of these records are no longer usable and constitute potential human health or property hazards and, therefore, are appropriate for immediate destruction.

If you have any questions concerning this matter, please contact Kate Flaherty, Appraisal Team 3 Supervisor, at 301-837-1706 or kate.flaherty@nara.gov.

Sincerely,

for

LAURENCE BREWER,
Chief Records Officer
for the U.S. Government

Hello, Dawn.

A. ached, please find NASA's response to Laurence Brewer's request for a report of the situation with the 2015 discovery of Goddard Space Flight Center computers and data tapes located in the basement of a Pittsburgh, PA residence.

Do you need me to mail the hard copy package to Laurence, or will this suffice?

Thank you.

to me

On Wed, Aug 10, 2016 at 12:22 PM, Daniel Rooney <daniel.rooney@nara.gov> wrote:
Hi John -

This follows our phone conversation of yesterday.

NASA staff at JSC has alerted us to several different disposal projects that they would like to proceed with.

1) relates to deteriorating 16mm motion picture film from the Space Shuttle program that has already been digitized, and the digital moving image files stored on LTO data tape at the center. They do not have the space to continue to house the original film and it is becoming a menace due to the vinegar syndrome. I've asked them to provide an inventory and they say they will get us one probably by next week.

2) relates to 1" open reel magnetic tape, containing audio from the Space Shuttle program that has also been digitized. The original tapes are of highly specialized track configuration, and require unique playback equipment, which to our knowledge, does not exist outside of NASA. The question would be can the digital files which now exist be considered the substitute record copy for the 56 track 1" tapes.

What more do you need from us to get the notification process started with Patti ? I am going on leave for 2 weeks after this Friday, but could you please include the following staff on the correspondence:

kristy.l.medina@nasa.gov
leslie.k.richards@nasa.gov

michael.taylor@nara.gov
ellen.mulligan@nara.gov

Thanks, John,

Dan

Reply to Attn of:

Mr. Laurence Brewer
Chief Records Officer
National Archives & Records Administration
8601 Adelphi Road
College Park, MD 20740-6001

SUBJECT: NASA Request for Emergency Disposal Authorization

I am requesting an emergency destruction authorization approval to destroy 254 standard records boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp Records-Reproducer.

The original audio files have been converted from a Stencil-Hoffman Corp Recorder-Reproducer 56 track tapes to a .wav file format.

They are located in 3 different facilities:

NASA/Johnson Space Center (JSC) has 194 boxes, the Washington National Records Center (WNRC) has 13 boxes and Federal Records Center (FRC) in Ft. Worth has 47 boxes. JSC will permanently withdraw the boxes from the WNRC and the FRC for secure destruction at JSC.

The tapes were originally scheduled as permanent under NASA Records Retention Schedule 8/101, Program/Project Records. The tapes are obsolete and there is no existing equipment that can play them.

The digitized audio is currently on an external hard drive located at JSC. These were deemed to contain ITAR and the files will be transferred to NARA once the ITAR hold is lifted.

There is no continuing threat to other records, but there is no reason to retain these deteriorating tapes, nor does the Archives desire them.

Therefore, I am requesting NARA special approval to destroy these deteriorating records.

Sincerely,

A handwritten signature in cursive script that reads "Patti F. Stockman".

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I

believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital verions.

Thanks so much.

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~ **Now TR-0255-2018-0260**

[Submitted to NASA](#) to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Subject: Re: No fication form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Cc: Flaherty, Kate <kate.flaherty@nara.gov>
Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to

declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

Subject: Re: No ficalon form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

Hi John - I have in my notes that we discussed this in January and February. Any progress on these requests from NASA - JSC?

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital verions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~ **Now TR-0255-2018-0260**

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

Hi, Kristy.

I just noticed an old TR hanging out on the NASA Xfer Status Master spreadsheet, and noticed that it's sitting in limbo in ERA.

I looked back through my e-mail, and saw this is the last response we had from you on it.

Do you have any updates on this?

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Subject: Re: No fica on form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed perm were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

Subject: Re: TR-0255-2016-0519 Submitted for NARA approval

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

On Tue, Aug 28, 2018 at 9:35 AM, Kate Flaherty <kate.flaherty@nara.gov> wrote:

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

On Tue, Aug 28, 2018 at 7:03 AM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

On Thu, Apr 19, 2018 at 1:15 PM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi John - I have in my notes that we discussed this in January and February. Any progress on these requests from NASA - JSC?

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital versions.

Thanks so much.

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~ **Now TR-0255-2018-0260**

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for

disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.

Subject: Re: TR-0255-2016-0519 Submitted for NARA approval

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: No notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.

Patti

Subject: Re: TR-0255-2016-0519 Submitted for NARA approval

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Thanks, Kate. Sorry I was busy at 10:30. I can do anytime between 1 and 3:30 today if you are free?

On Tue, Aug 28, 2018 at 9:35 AM, Kate Flaherty <kate.flaherty@nara.gov> wrote:

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

On Tue, Aug 28, 2018 at 7:03 AM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

On Thu, Apr 19, 2018 at 1:15 PM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi John - I have in my notes that we discussed this in January and February. Any progress on these requests from NASA - JSC?

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital versions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.
Now TR-0255-2018-0260

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Subject: Re: No fica on form in rela on to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed perm were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio

is temporary.

Please let me know if there is anything else you require.

Cc: Flaherty, Kate <kate.flaherty@nara.gov>
Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.

Patti

Subject: Re: TR-0255-2016-0519 Submitted for NARA approval

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

(b) (5)

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

Subject: Re: No notification form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: No fical on form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Hi Dan,

Yes, John left abruptly on July 9. I have been going through his files and I read over the email thread you shared with me. From what I can tell, a draft letter to the Archivist for approval for NASA to destroy the analog material was written last year, but John never finished it. I found copies of that and also the notification form NASA sent.

I'm guessing that I will have to regenerate this letter for approval to destroy the originals. That should not hold up the accessioning of the digital version if it meets our format guidance and your good with it. We can have a phone call this morning - maybe 10:30? If that works for you, give me a number to call you on and we'll figure out next steps.

Thanks,
Kate

On Tue, Aug 28, 2018 at 7:03 AM, Daniel Rooney <daniel.rooney@nara.gov> wrote:

Hi Kate - this is an old issue that's been simmering for a while. I hadn't realized that John Hulmston was retired, but I am hoping I can pick up on this issue with you. Is there a good time we could catch up on this? NASA contacted me again about the submission of their NA 13171 for approval to destroy original recordings that had been digitized already. At this point, we have received the digitized audio files, but we have not yet accepted legal custody on the TRs. We are hoping this issue of the analog originals can be resolved first.

Let me know when you'd be free for a quick phone call.

Thanks, Dan

Hi John - I have in my notes that we discussed this in January and February. Any progress on these requests from NASA - JSC?

Thanks, Dan

On Thu, Jan 18, 2018 at 1:15 PM, John Hulmston <john.hulmston@nara.gov> wrote:

Dan,

I'm sorry to bother you with seemingly "old" issues. Will you take a look at this email chain from Patti concerning the JSC History Collection, 16 MM Film Collection, LTO Tapes? I thought this issue was addressed but I'm obviously mistaken. Is there an action I need to take to get this back on track or are we waiting for further information/documents from another stakeholder or management? I was hoping to jog your memory of this so I can deal with it and try to resolve it before it becomes a national incident! Before I get my managers involved in this, I'd like to get your input in order to better respond to Patti and if it becomes necessary, I can involve Kate and Laurence as a last resort. Meanwhile, I'd like to resolve this without drawing in my managers first because I don't want to prolong my response to Patti if possible. Thanks for your help, it's much appreciated.

Regards,

John

To: John Hulmston <john.hulmston@nara.gov>

Cc: "Medina, Kristy L. (JSC-IB)[MORI ASSOCIATES INC]" <kristy.l.medina@nasa.gov>

Hi, John. Both TR-0255-2014-0127 and TR-0255-2016-0519 have been submitted for NARA approval. Dan Rooney had told us in Nov to go ahead and prepare the TR for the digital formats of the legacy 56-track tapes. However, I believe each are awaiting your nod that permits us to destroy the legacy formats.

I am attaching for each an email with the history of our discussions, together with the completed NA 13171's. We would really like to divest ourselves of both the legacy and the permanent digital verions.

Thanks so much.

Subject: NARA status: JSC History Collection and 16MM film

Hi Patti,

Here's a quick summary of what JSC is waiting on from NARA.

JSC History Collection:

Waiting on NARA approval to destroy the paper. NA 13171 and email is attached.

Waiting on NARA to approve TR-0255-2016-0519 so we can transfer the e-records.

16MM Film Collection:

Waiting on NARA approval to destroy the deteriorating film. NA 13171 is attached.

Waiting on NARA to approve TR-0255-2014-0127 so we can transfer SSP Motion Imagery on LTO tapes.

JSC Audio Tapes (Future - FYI):

~~I need to submit a TR this week for the perm e-records now that ITAR hold is lifted.~~
Now TR-0255-2018-0260

Submitted to NASA to approve TR-0255-2018-0260 so we can transfer mission audio records to NARA

Let me know if you need anything else...

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Subject: Re: No fication form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

Subject: Noification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would

appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for you time Patti.

Regards,

John

Subject: RE: TR Question - TR-0255-2014-0127 - 16mm film emergency disposal

There were 2 emergency disposals that we were working with NARA. One was for the JSC History Collection (paper) and the other for the 16 mm film. The attached email is the last I have for the film.

I'll send what I have on the JSC History Collection in a separate email

Subject: RE: TR Question - TR-0255-2014-0127

Unfortunately no I don't have any other updates. Dan Rooney has still not approved the TR and the LTO tapes and film reels are still here at JSC. Back in June of this year, Patti and I did have some dialog with

John Hulmston and sent him a NA13171 to at least destroy the 16mm film, but not sure where that was hung up at.

Short story...nothing has happened and we probably need to leave that TR in ERA if that's OK.

Hi, Kristy.

I just noticed an old TR hanging out on the NASA Xfer Status Master spreadsheet, and noticed that it's sitting in limbo in ERA.

I looked back through my e-mail, and saw this is the last response we had from you on it.

Do you have any updates on this?

Regards,

Thomas

Subject: RE: TR Question

This TR is the pallets of SSP Moving Imagery Collection on LTO tapes sitting in Bldg 412 along with more pallets of the original film (which have vinegar syndrome). They have a "FOIA (b)(6) Personal Information" restriction on them. Dan Rooney hasn't approved the TR yet, nor has he given us permission to destroy the film. He has told us that there are some in his area that think they can properly house the film and would want that. It's an internal clash within his group.

We are in the midst of getting a telecom scheduled with him and a few others from his area and the Video repository folks from here. We've proposed an August 2nd date, but waiting to hear back from him.

Subject: Re: Noification form in relation to the emergency disposal request

Patti,

I'm a little confused. The 13171 that you sent me from Mark Scroggins are identified as Historical Items/Source Files (see number 4 on the 13171) (NRRS 1/8A). The Notification letter I sent you earlier is related to the request to destroy 254 standard boxes of 56 track reel-to-reel audio tapes from a Stencil-Hoffman Corp. Records-Reproducer and 16mm motion picture film from the Space Shuttle program. Are you saying that the Historical Items/Source Files notification letter sent by Mark last October are the same records as the 138 1 - cubic foot boxes of deteriorating 16 mm motion picture film from the Space Shuttle program and the 254 standard records boxes of 56 track reel-to-reel audio tapes as outlined in your two letters to Laurence dated February 13, 2017? If I remember right, Mark's request did not co-inside with an emergency request for disposition but rather wanted to notify NARA that the scanned images of Historical Items/Source Files were to be the official copy of these records (N1-0255-94/8a).

That is what I was expecting in this latest notification from you - a request to make the digital duplicates of the 16mm film and 56 track reel-to-reel the official copy of the records so the deteriorating film and obsolete tapes could be destroyed.

I'm interested in your opinion as to whether or not we are on the same page on this Patti and I look forward to hearing from you. Perhaps that would resolve my bewilderment.

Regards,

John

On Wed, Jun 7, 2017 at 4:25 PM, Stockman, Patti (JSC-JD000) <patti.stockman@nasa.gov> wrote:

John,

Apparently, JSC completed these forms for me long ago, but I can't find that I either received them, nor signed and passed them on to you.

Therefore, just to put all our records together in one place, I am again attaching to this message the copies of the two letters to Lawrence requesting emergency disposal, as well as the two completed and signed NF's 13171 – one for the audio and one for the film to be destroyed.

To verify, all the film has been digitized. Portions of the audio that were deemed permanent were digitized (air-to-ground Flight Controller loops) as detailed in email discussions with Dan Rooney. All other audio is temporary.

Please let me know if there is anything else you require.

Subject: Notification form in relation to the emergency disposal request

Hi Patti,

The emergency destruction request to destroy 16 mm film and the 254 boxes of 56 track reel-to-reel audio tapes is being revised into a Notification letter. The reasoning for this is that in those request letters, you indicated that all of the records proposed for emergency disposition were duplicated. I would appreciate your confirmation that the records included in the destruction request were indeed duplicated into a digital format.

I have attached a Notification form that I have partially completed to save you time. I would like you to complete the Notification and indicate the digital format in which they were duplicated. The notification form will allow you to declare the digital duplicates as the official record and the Emergency Disposition request will be unnecessary.

Please take a moment to complete the attached Notification form and confirm that the records included in your Emergency Disposal Authorization request have indeed been duplicated into a digital format.

Thank you for your time Patti.

Regards,

John

John,

You obviously recall JSC wanting to transfer digitized versions of the JSC history collection. I'd forgotten Sharmila had asked that "a media neutral notification be filed" for the History schedule item (N1-255-94-1, item 8).

Please see the attached message and NA 13171 that Mark Scroggins of JSC had submitted when I was absolutely buried. Is that all that's required to meet Sharmila's (now

National Archives & Records Administration Mail - Re: REMINDER: NASA Actions awaiting NARA direction
Ted's) request? I'm sorry, but the language different ones of you use really confuses me.

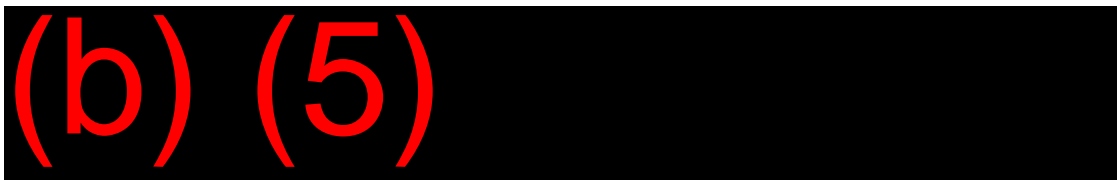

I can't keep track of what's required to accomplish what. If this was it, can you tell me what the status is of your processing it and what I need to tell Ted?

Thanks a lot.

Hi Patti:

Thanks for the heads up. Before I have Rachel approve this, I have a couple questions. Looking back in email chains about this UHCL collection, Sharmila in September 2015, she recommended that a media neutral notification be filed given that N1-255-94-1, item 8, is for paper records and pre-dates media neutrality. Can you verify that a media neutral notification has been approved?

Other than this, it looks good and the finding aid will facilitate us getting the records in the National Archives Catalog.

Ted

From: ACR

Subject: Request to destroy records

To: N through ACR, AC

In the attached letters of February 13, 2017, the National Aeronautics and Space Administration (NASA) requests emergency authorization to destroy records in accordance with 36 CFR 1229.10(a). The request covers 138 cubic feet of deteriorating 16mm motion picture film from the Space Shuttle program and 254 standard boxes of 56 track format reel to reel audio tapes. These records are located in three different locations; NASA/Johnson Space Center, the Washington National Records Center, and the Federal Records Center in Fort Worth, Texas. These records are severely damaged and are exhibiting vinegar syndrome deterioration. These records meet the criterion of being a continuing menace to human health or life or property, consistent with the above mentioned CFR section. It should be noted that the audio tapes have been migrated to wave file format and the 16mm film has been transferred on to Linear Tape Open data tapes.

After discussions with several NASA staff members from the Johnson Space Center, the ACR Appraisal Team 3 Supervisor, Kate Flaherty, met with Daniel Rooney, Supervisory Archivist of the Motion Picture, Sound and Video unit on March 28, 2017, both concurred that the 138 cubic feet of 16mm film and the 254 boxes of 56 track reel to reel audio tapes are badly deteriorated and should be disposed of in accordance with 36 CFR 1229.10(a).

Given that the prolonged storage and handling of the damaged records constitutes a hazard to human health or life and property and the fact that the records have been migrated to stable formats, ACR recommends approval of NASA's request to destroy these damaged records.

Reply

Dear John,

I am emailing to request an emergency destruction authorization for 254 boxes of 56 track reel-to-reel audio tapes of Shuttle air-to-ground transmissions.

Specific information you had requested regarding the collection is as follows:

Description of the Records to be destroyed

- Original Shuttle Audio Files on 56 track, reel to reel tapes were converted to a .wav file format from their original format produced with a Stencil-Hoffman Corporation Recorder-Reproducer.

Three locations of the records

- NASA/Johnson Space Center
- WNRC
- Ft. Worth FRC

Volume of records

- JSC = 194 cubic feet
- WNRC = 13 boxes
- Ft. Worth FRC = 47 boxes

Nature of the "menace"

- Obsolete and useless audio tapes that cannot be read by any existing equipment that can replay the audio reel to reel 56-track tapes.

Disposition or Job Number

- Permanent under NASA Records Retention Schedule 8/ Item 101 – Program/Project Schedule

NASA's initial actions to isolate or protect other records from deterioration or damage.

- All have been converted from a Stencil-Hoffman Corp Recorder-Reproducer to digital .wav file format files.
- The .wav files are currently on an external hard drive located at JSC. These were deemed to contain ITAR and the files will be transferred to NARA once the ITAR hold is lifted from Permanent records to be transferred to the Archives.

Continuing threat to other records:

There is no threat. It is just senseless to continue holding these obsolete formats.

Thank you.

Patti Stockman
