Confirmation that your Wickr Pro account will be deleted if you still have access to it and it is in use OR to make it easier, approval for CBP to initiate deletion via Wickr to ensure no conflicts for your user account occur accidentally. The data within will be lost regardless.

- How can WICKR validate non CBP users and provide secure confirmation that a user is who they said they are?
- If an outside device (NON CBP GFE) using WICKR ME or WICKR Enterprise where is the data reside.
- How is WICKR ME preventing data leaks. When CBP users are transmitting text/files/images the comms need to be configured to burn on read not allow screen shots.
- If Wickr Me federation is enabled and has been established by Wickr Support, your local Enterprise users can be found by Wickr Me users. The full email address must be known by the Wickr Me user to be discovered. **Do not enable Wickr Me federation unless your team is confortable with potentially being found by Wickr Me users.**
- What is the current status for High Availability offered by WICKR.
